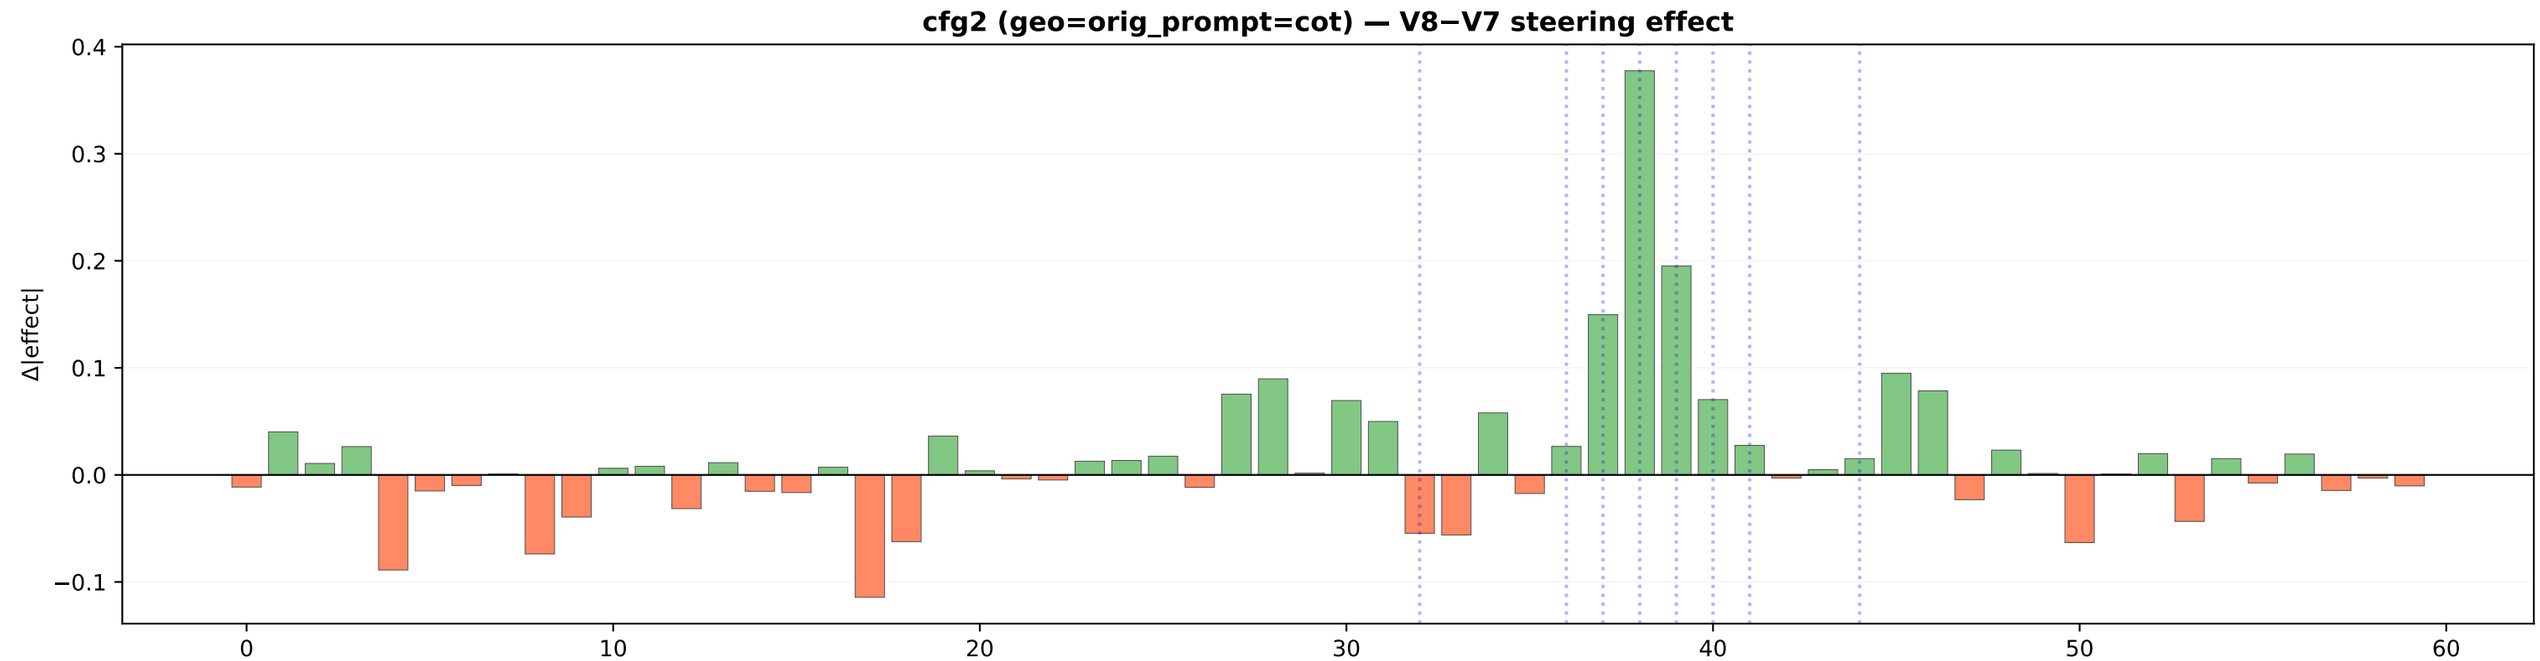
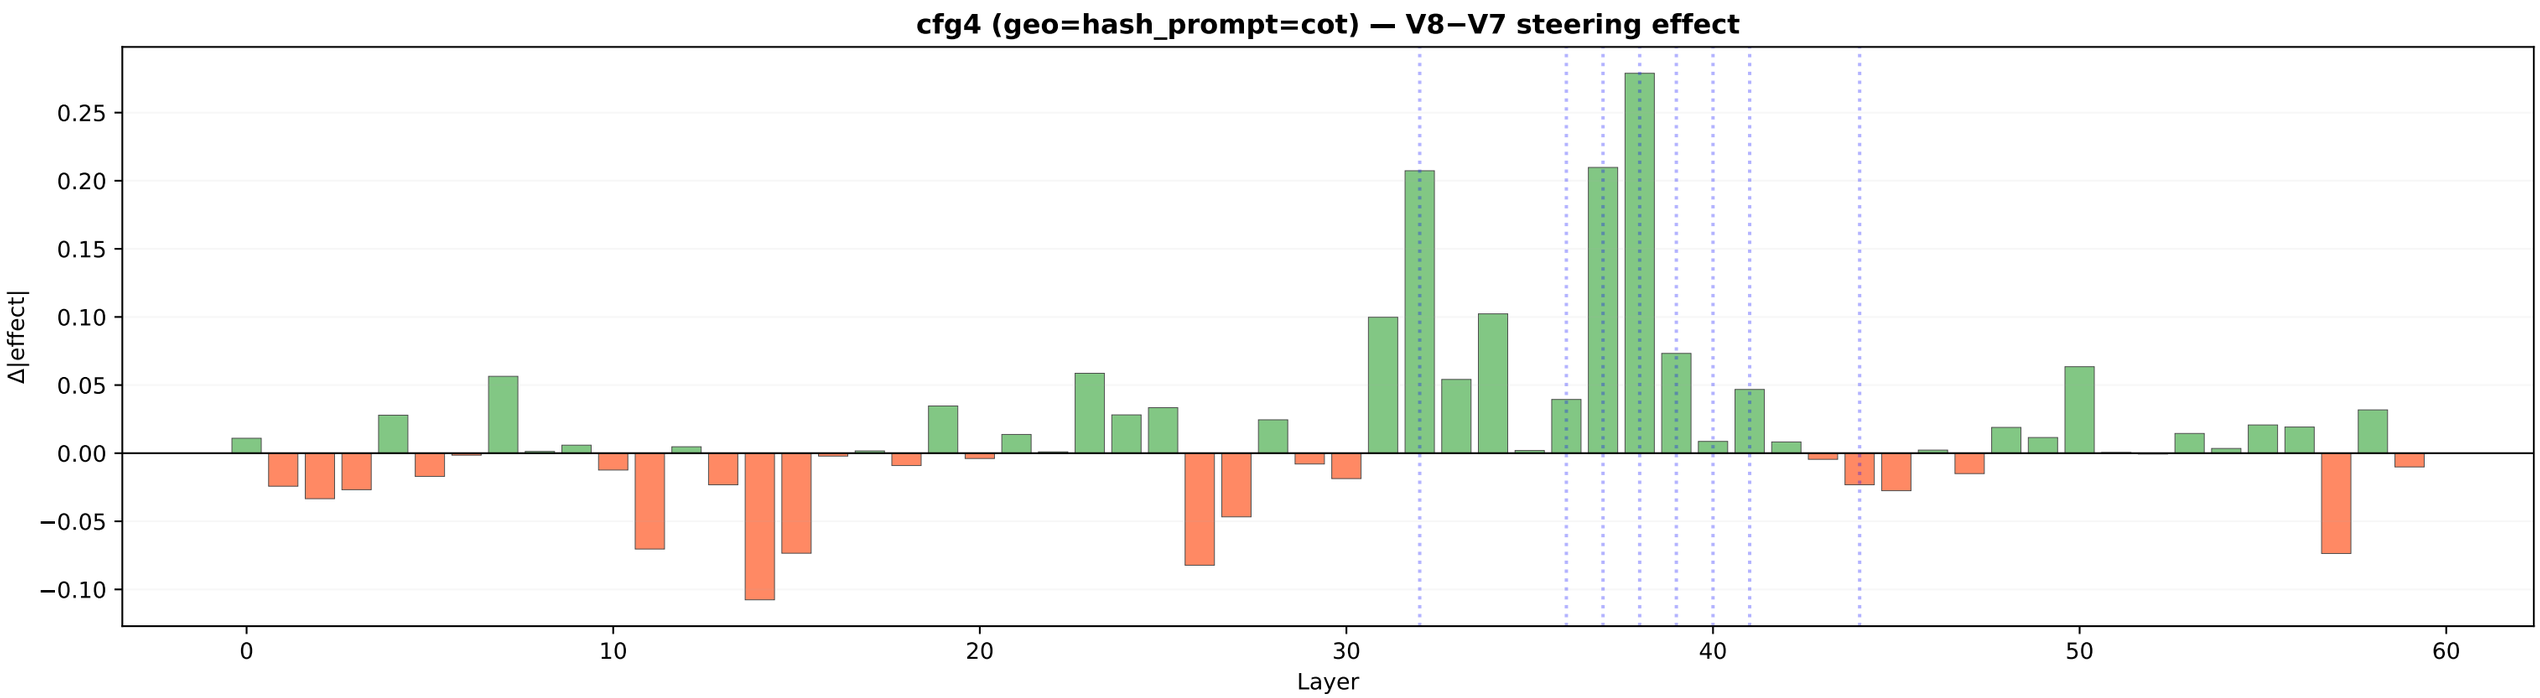
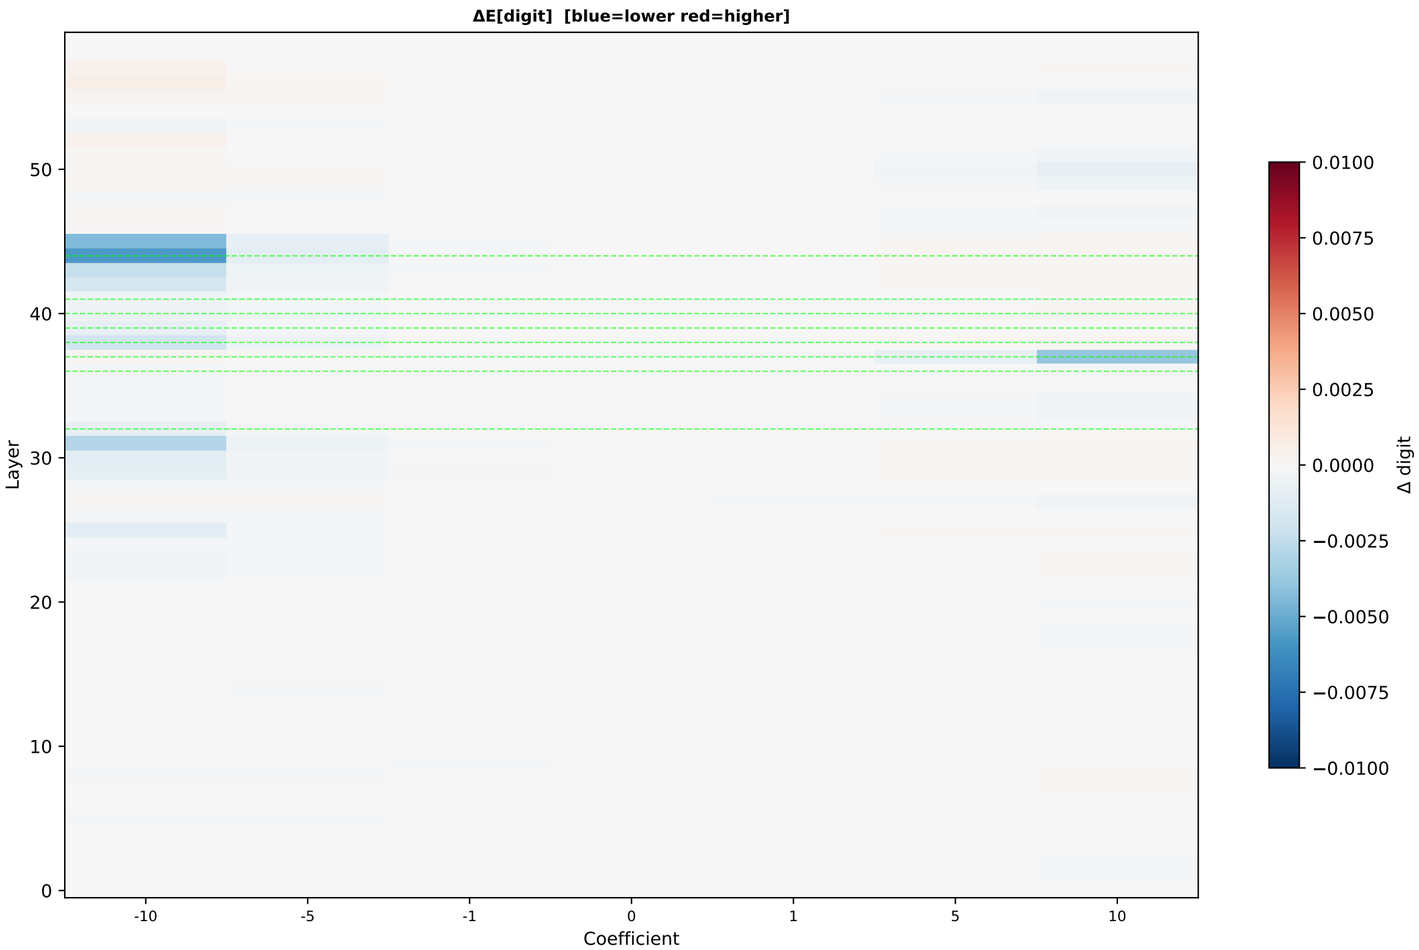
EXP1A — Hint Direction: V8 − V7
Green = hint ↑ steerability, Red = hint ↓

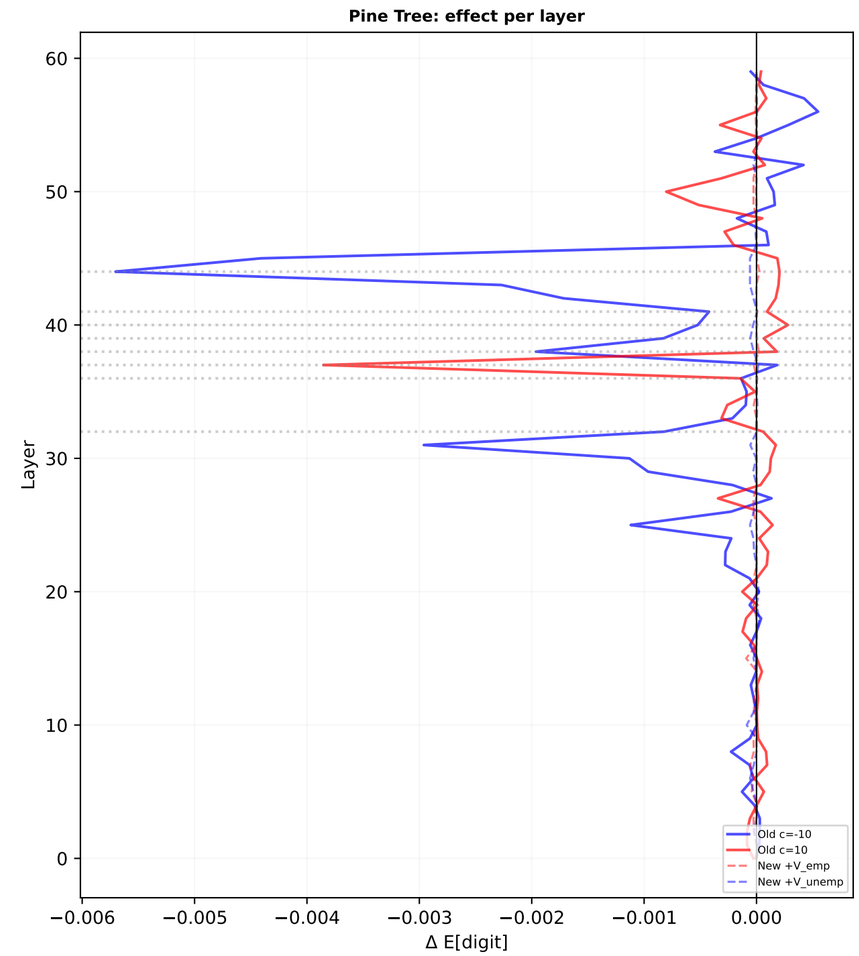


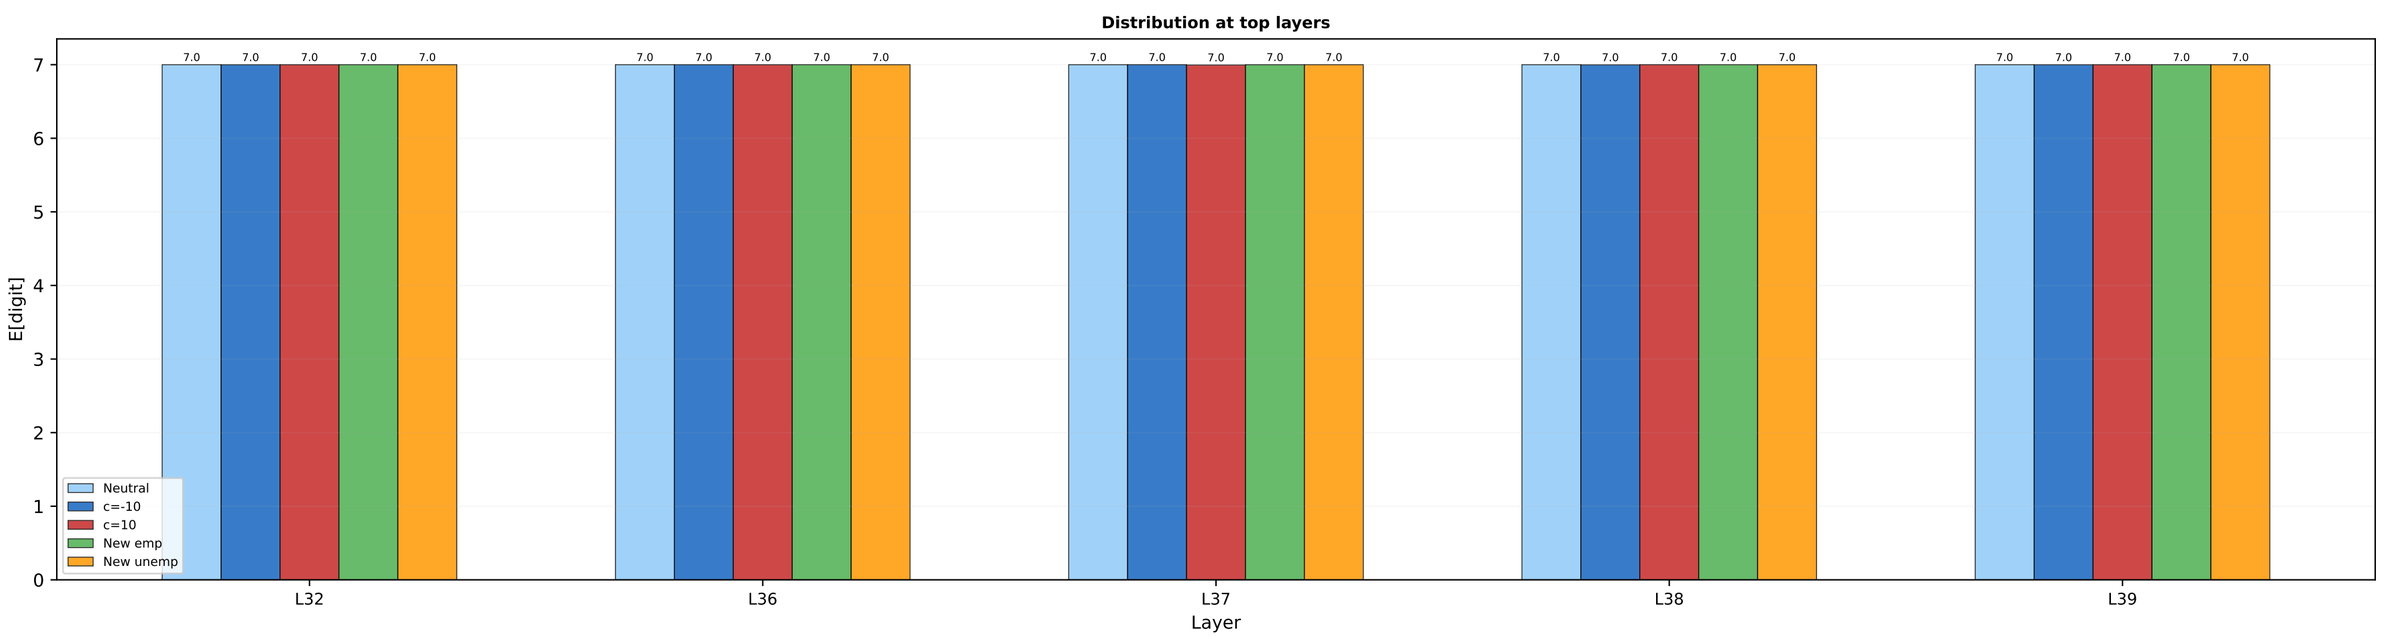


Complete with a single number only. | An individual wakes up at approximately ___:00 AM. |

W1: Wake-up hour | V7/cfg2

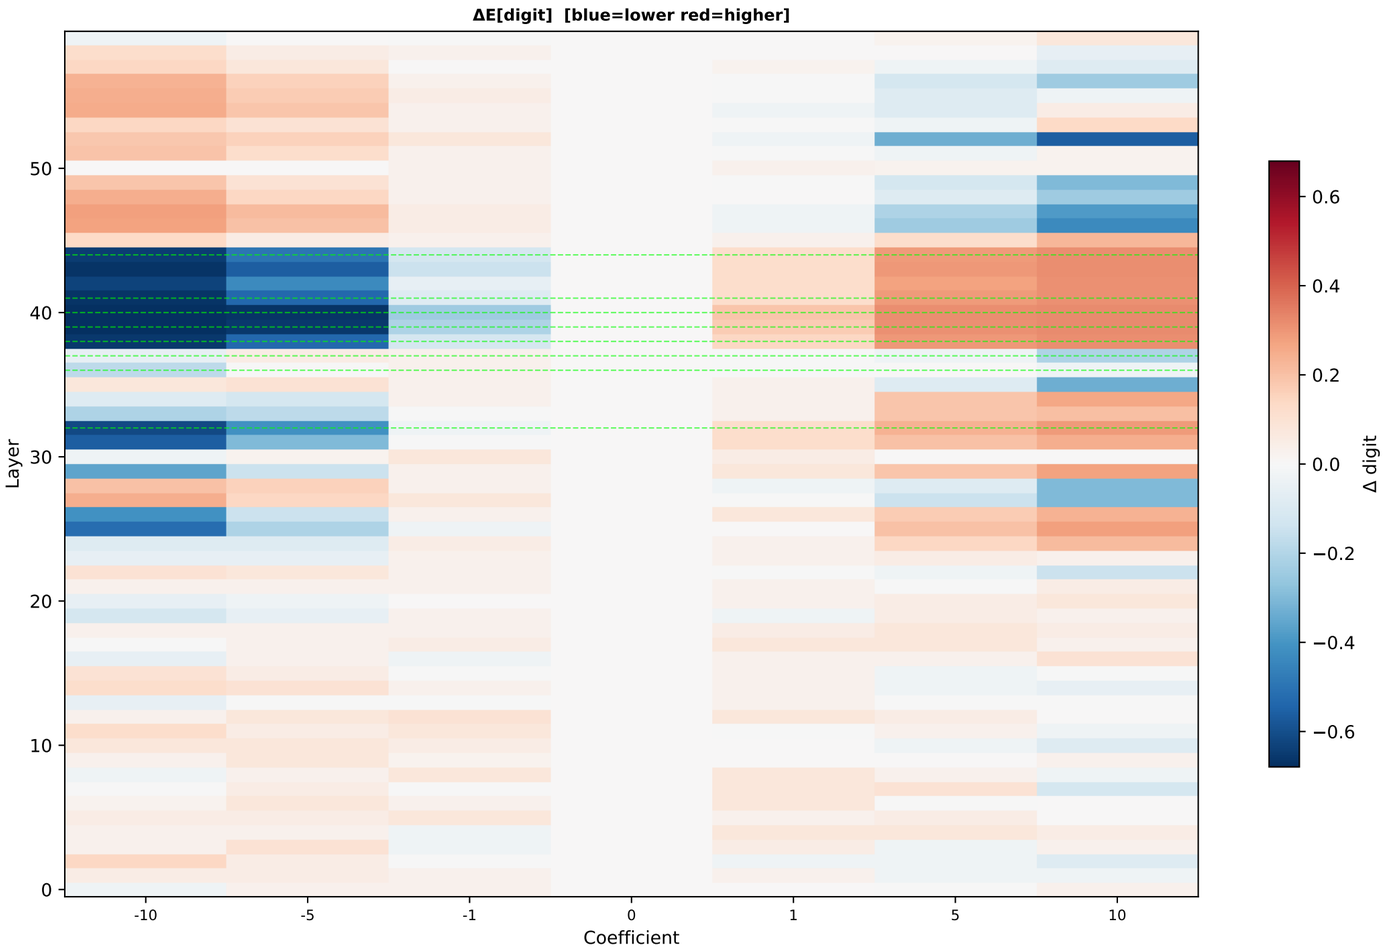


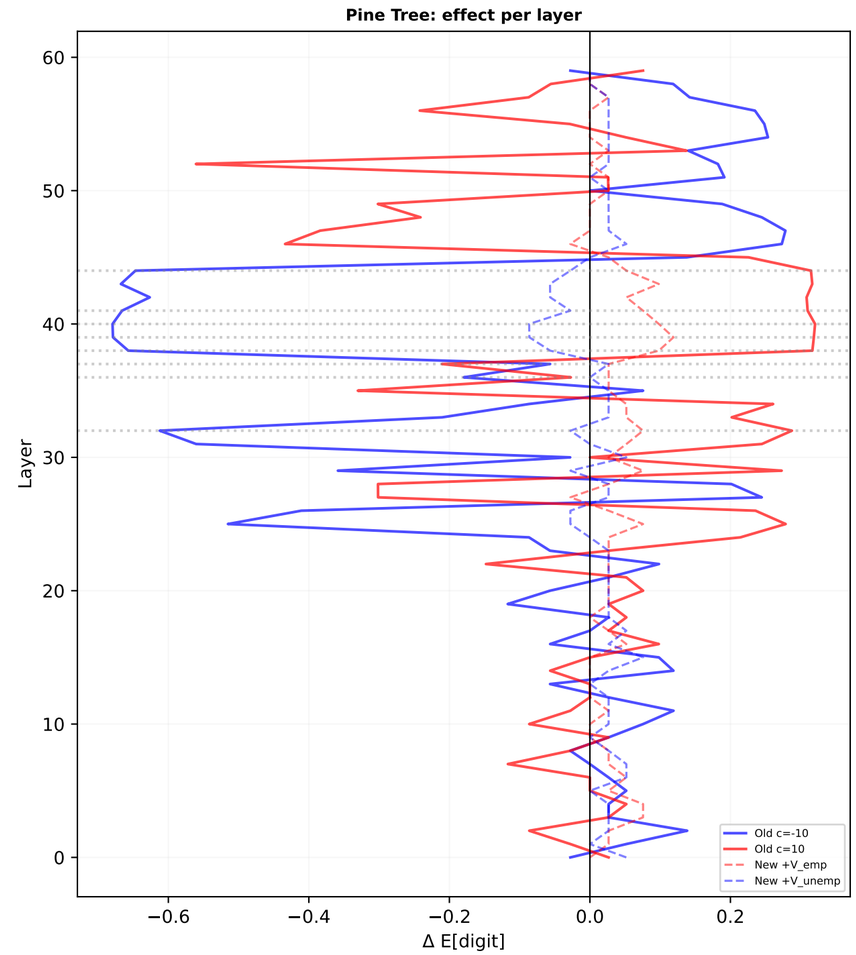


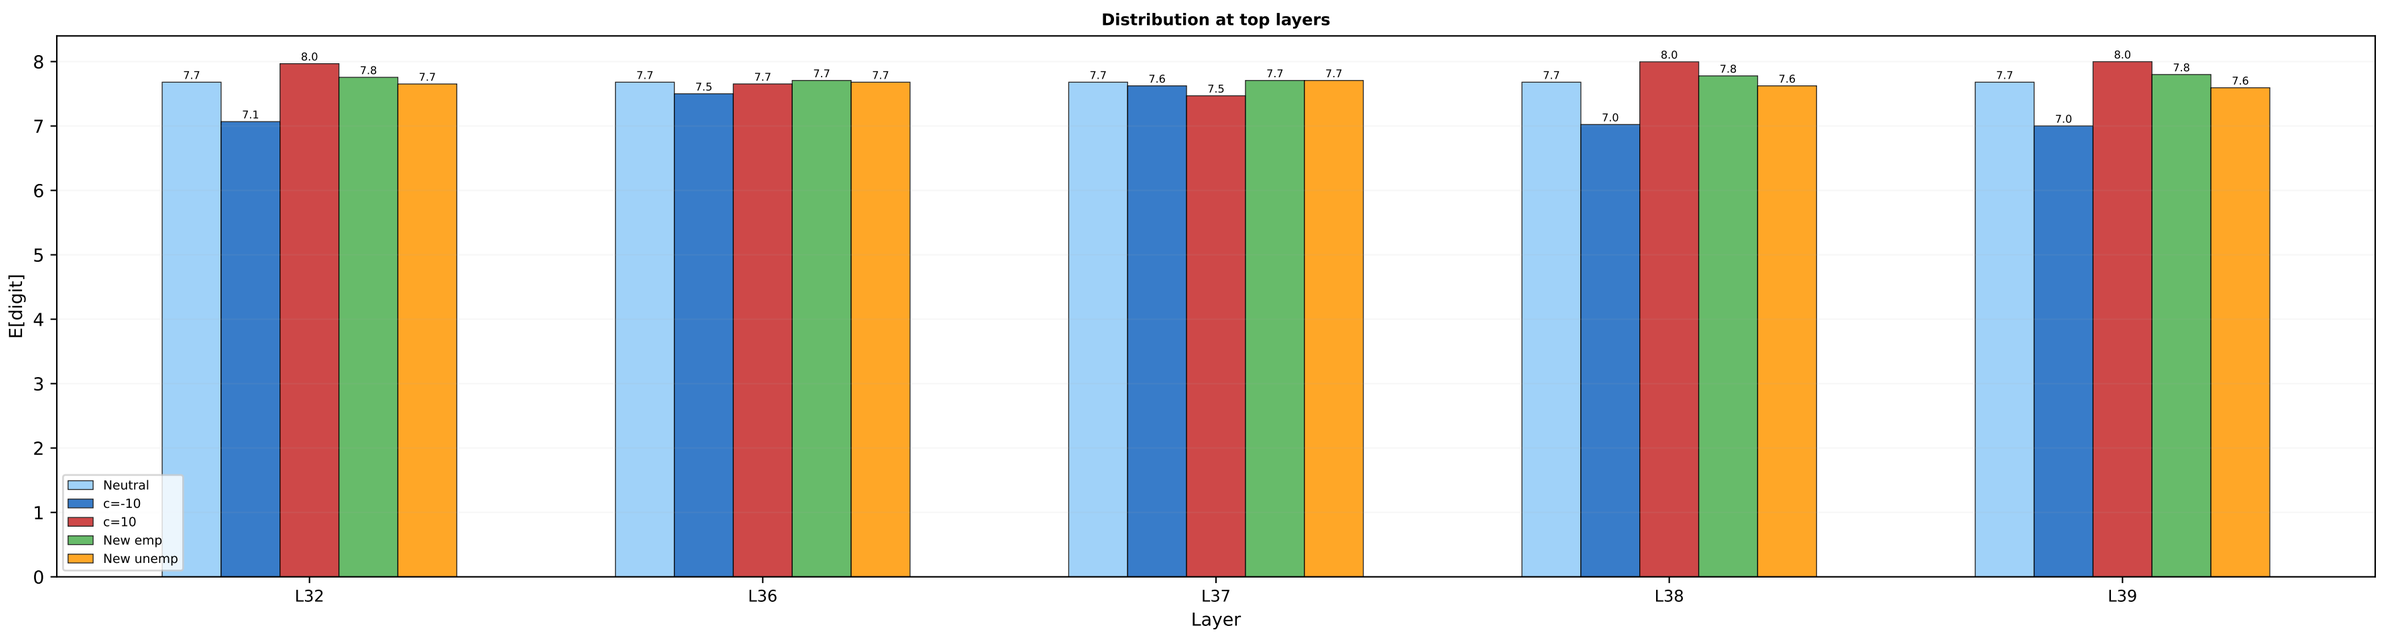


Complete with a single number only. | An individual leaves home at approximately ___:00 AM. |

W2: Leave-home hour | V7/cfg2

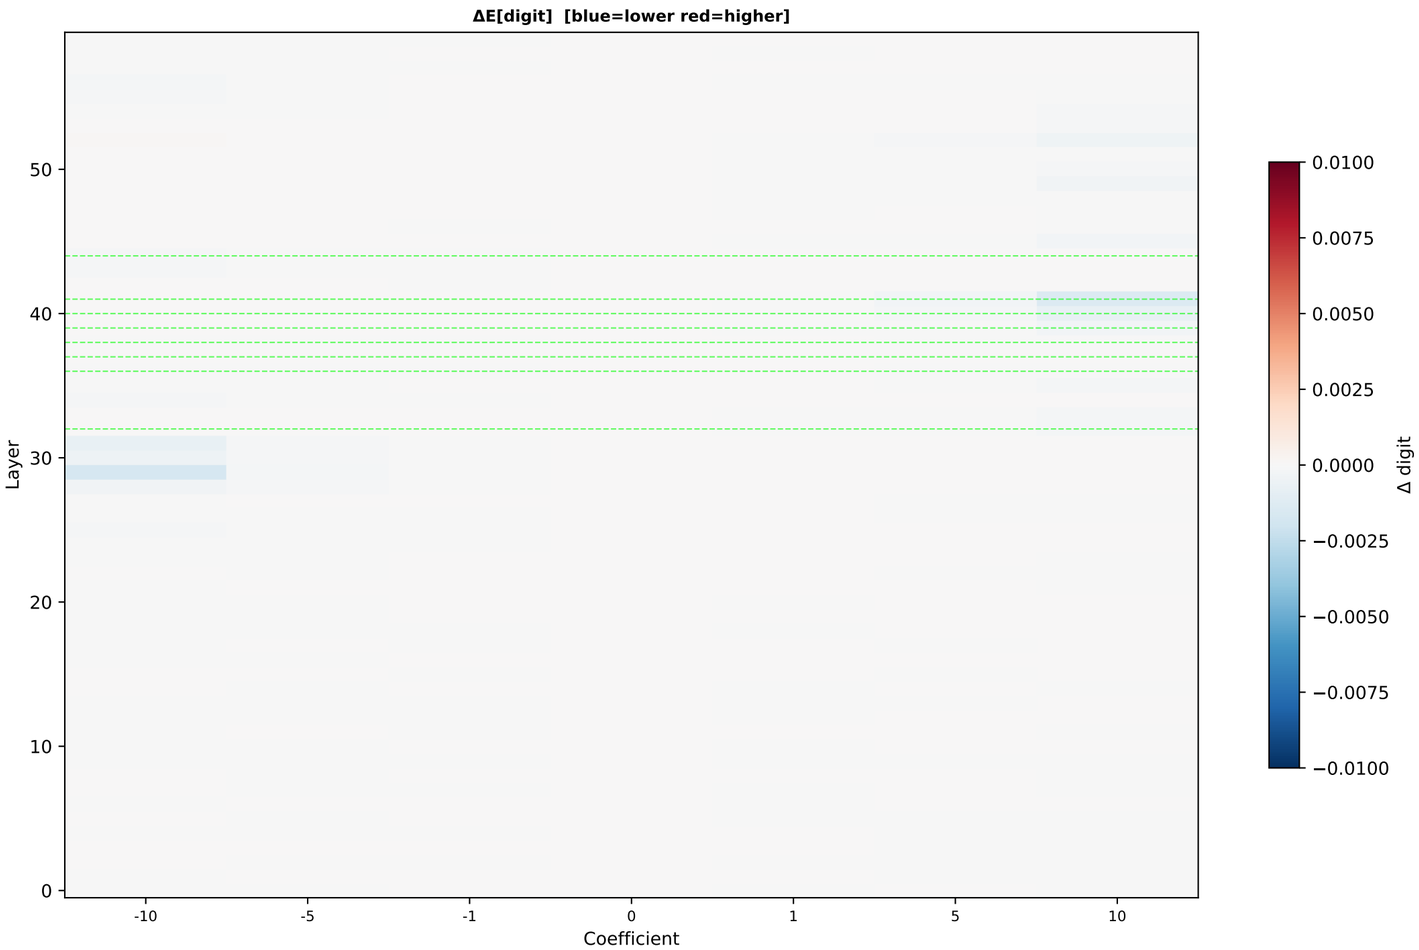


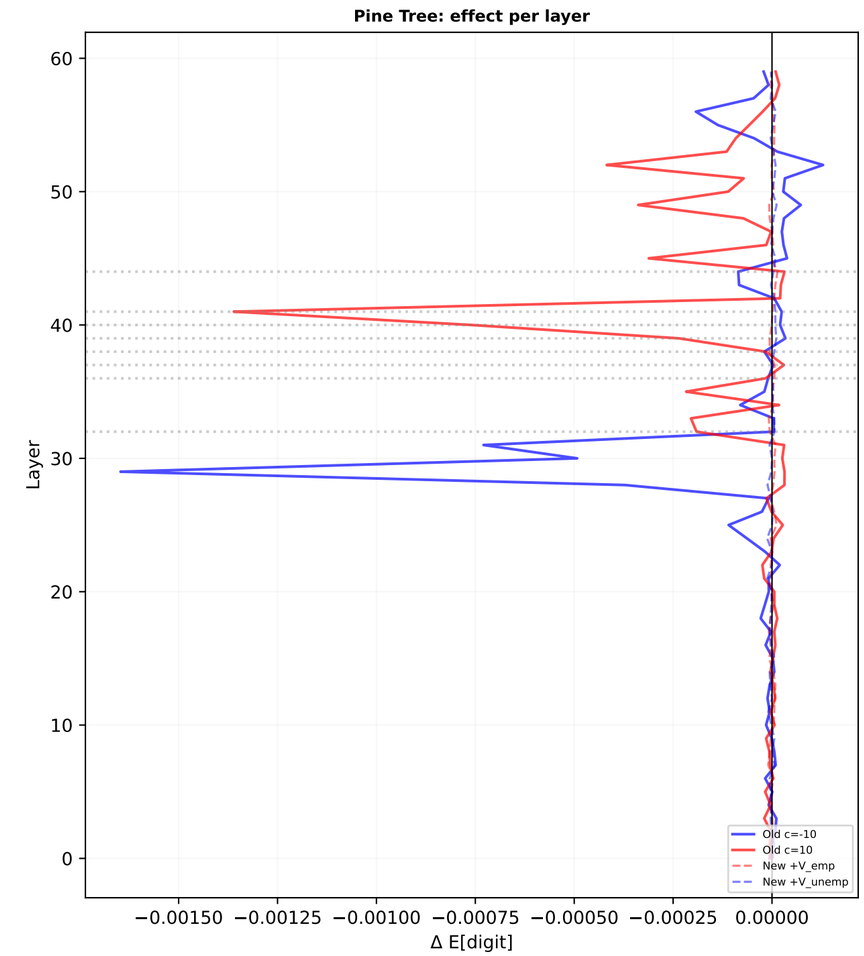


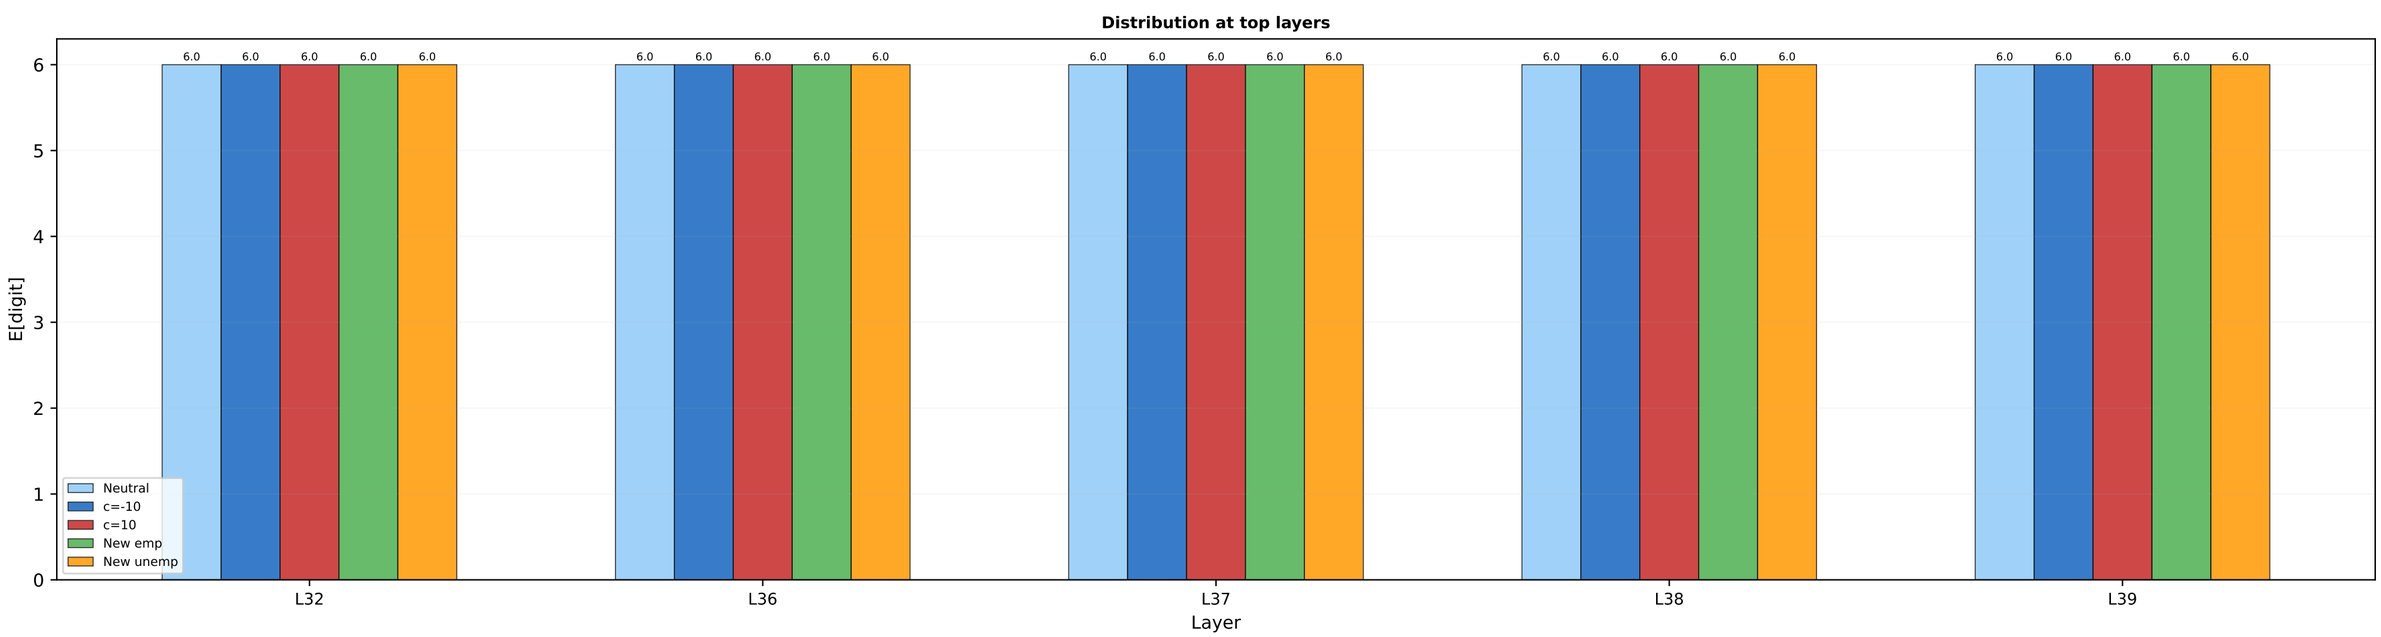


Complete with a single number only. | An individual arrives home at approximately ___:00 PM. |

W3: Arrive-home hour | V7/cfg2

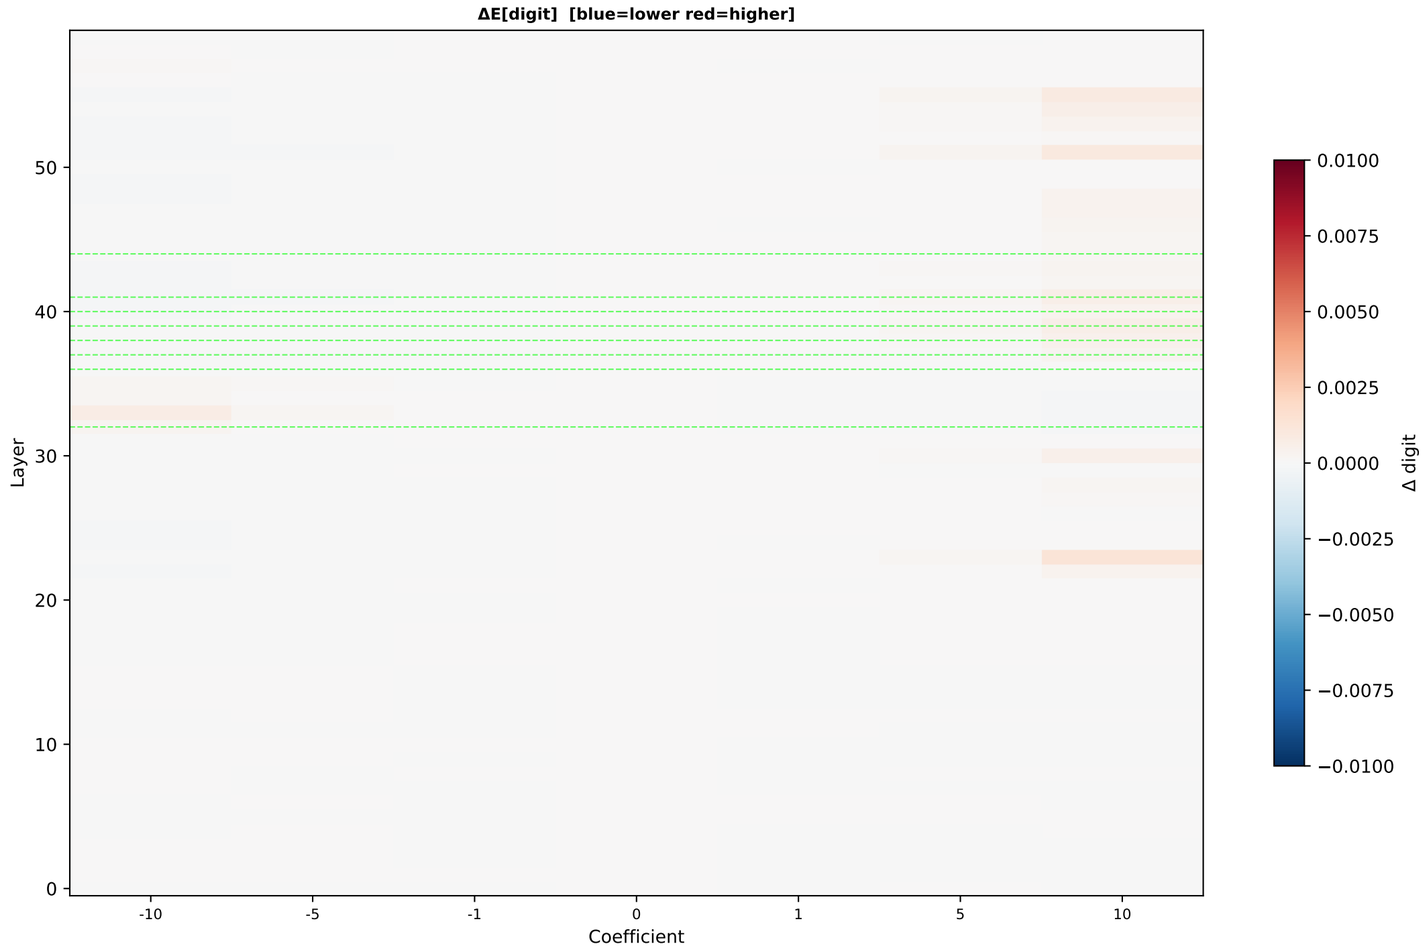


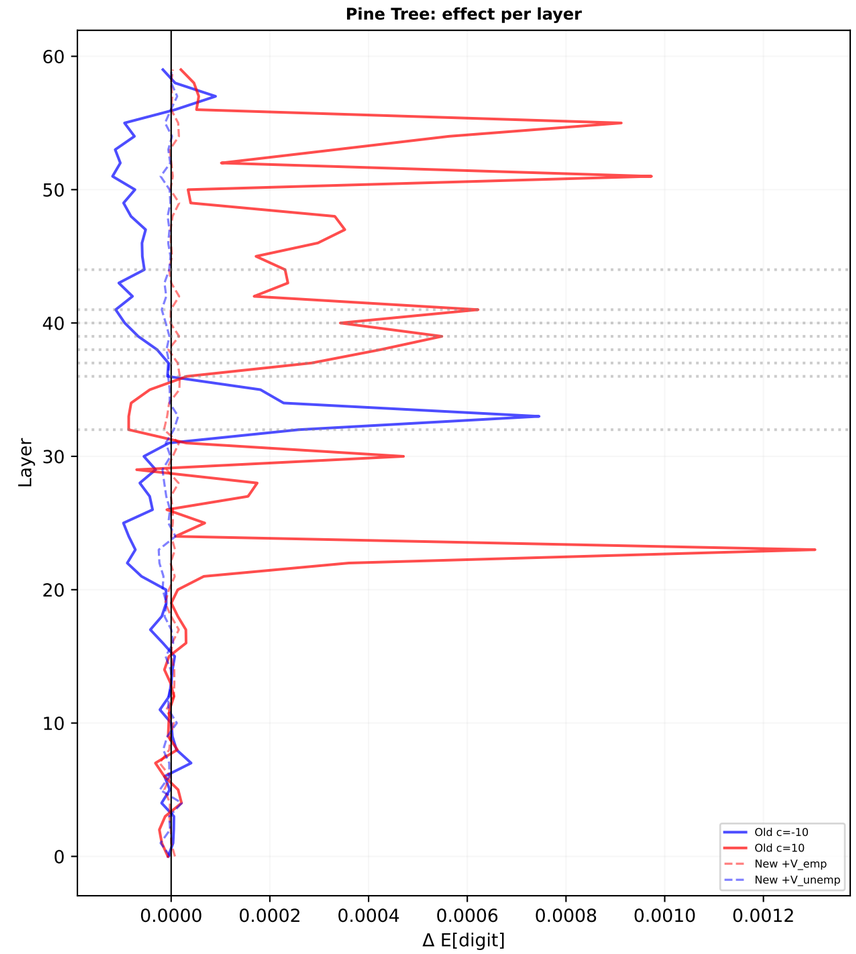


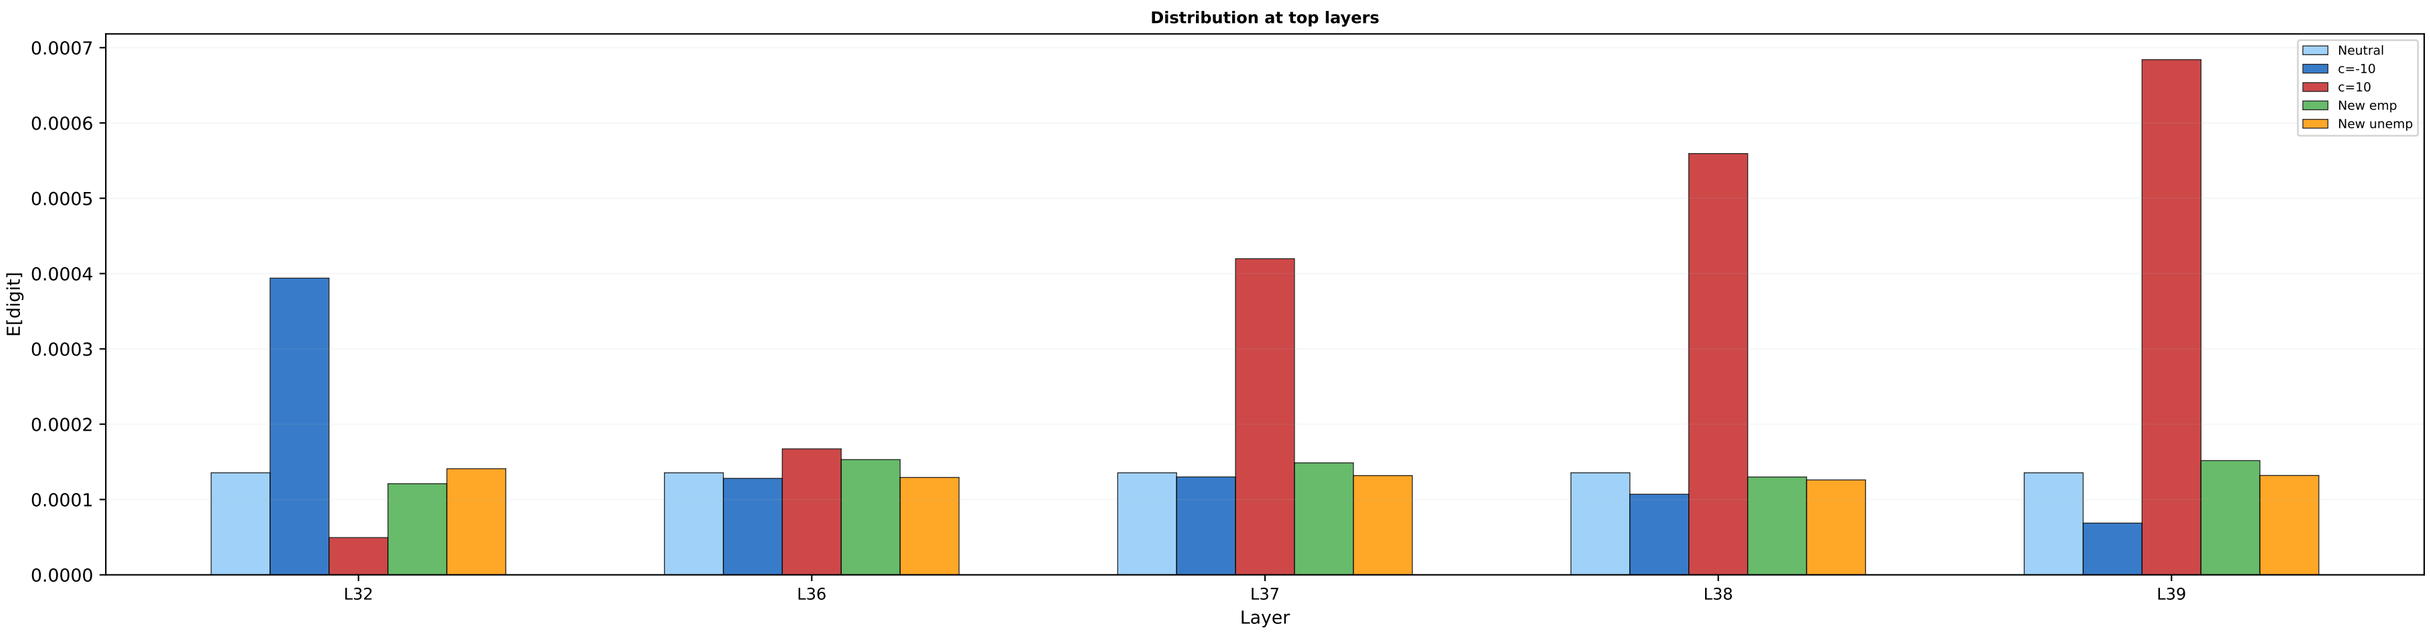


Answer with a single digit from 0 to 9. | How many hours does an individual spend at home between 8 AM and 6 PM? ___ |

W4: Daytime hours at home | V7/cfg2

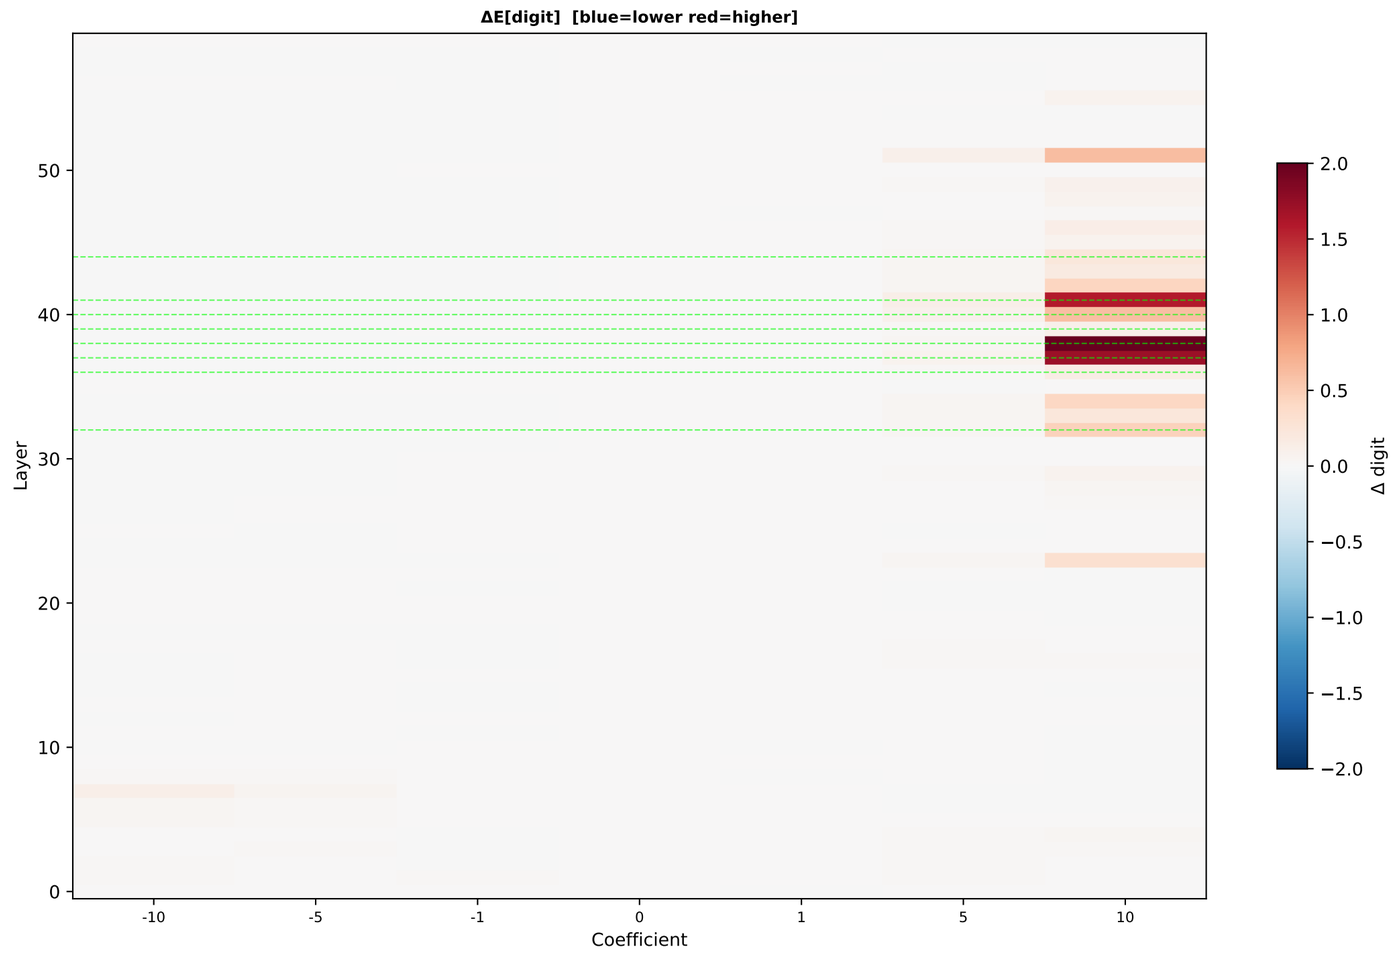


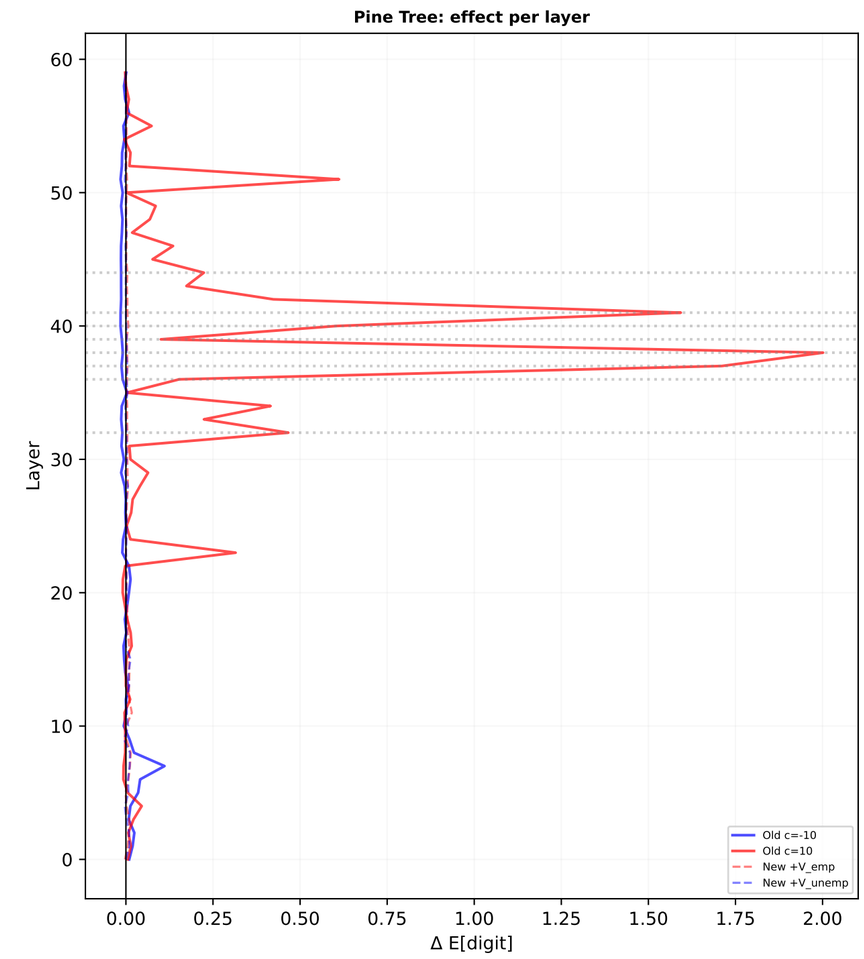


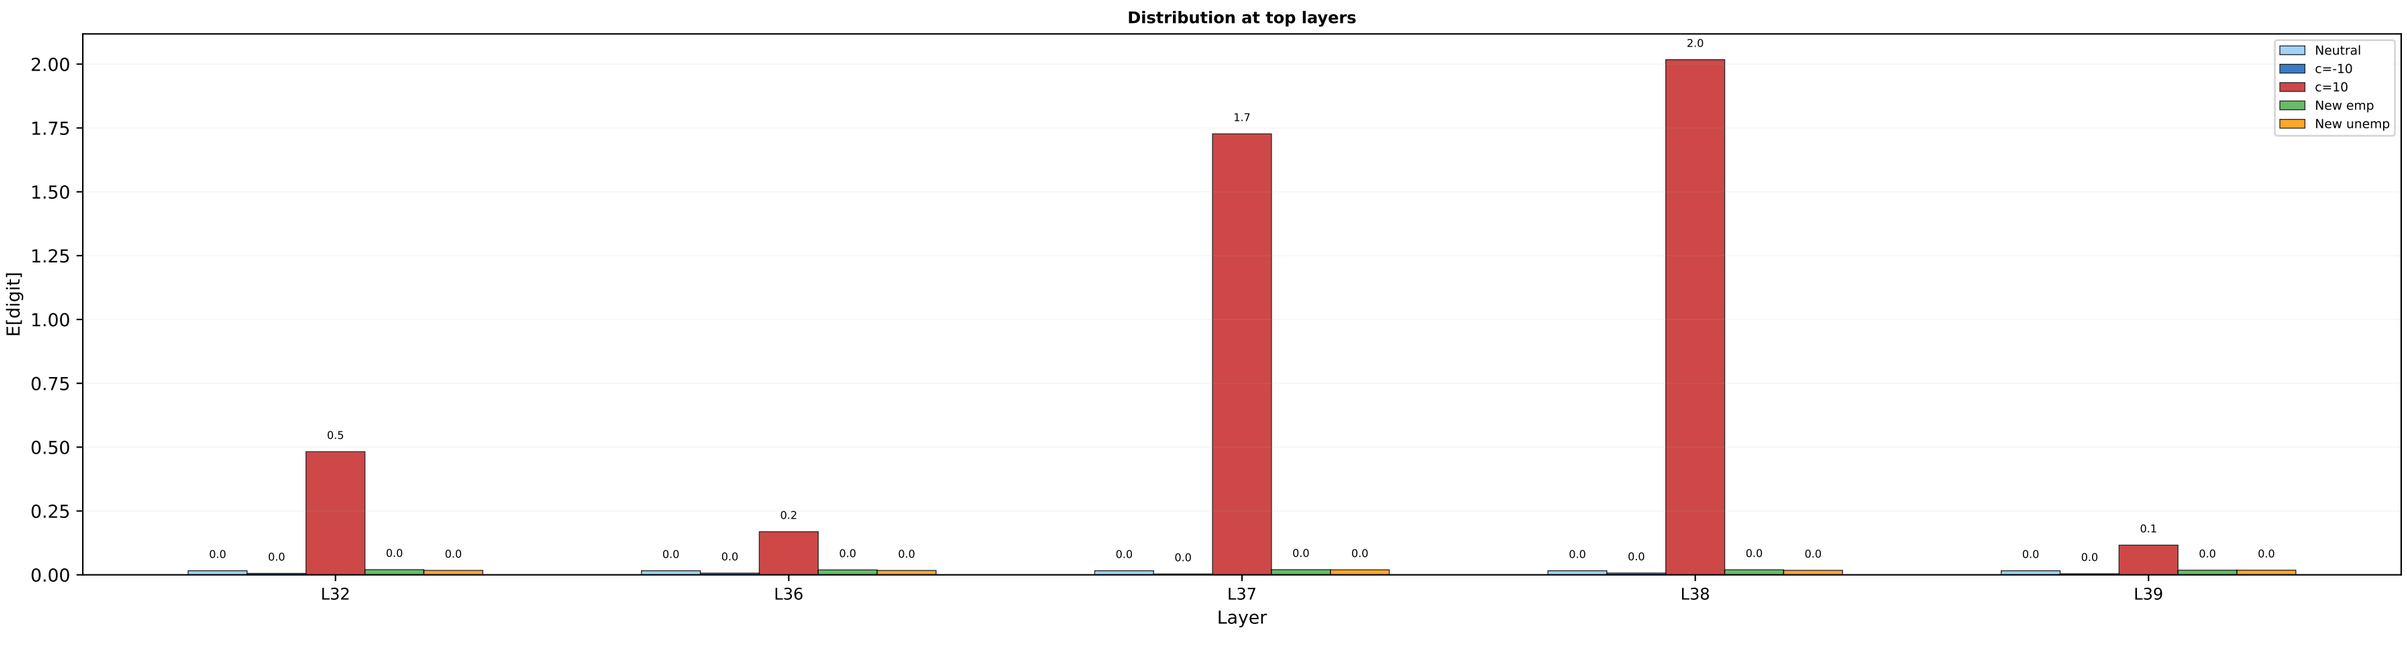


W5: Longest stretch outside | V7/cfg2

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours an individual spends outside the home today? ___ |

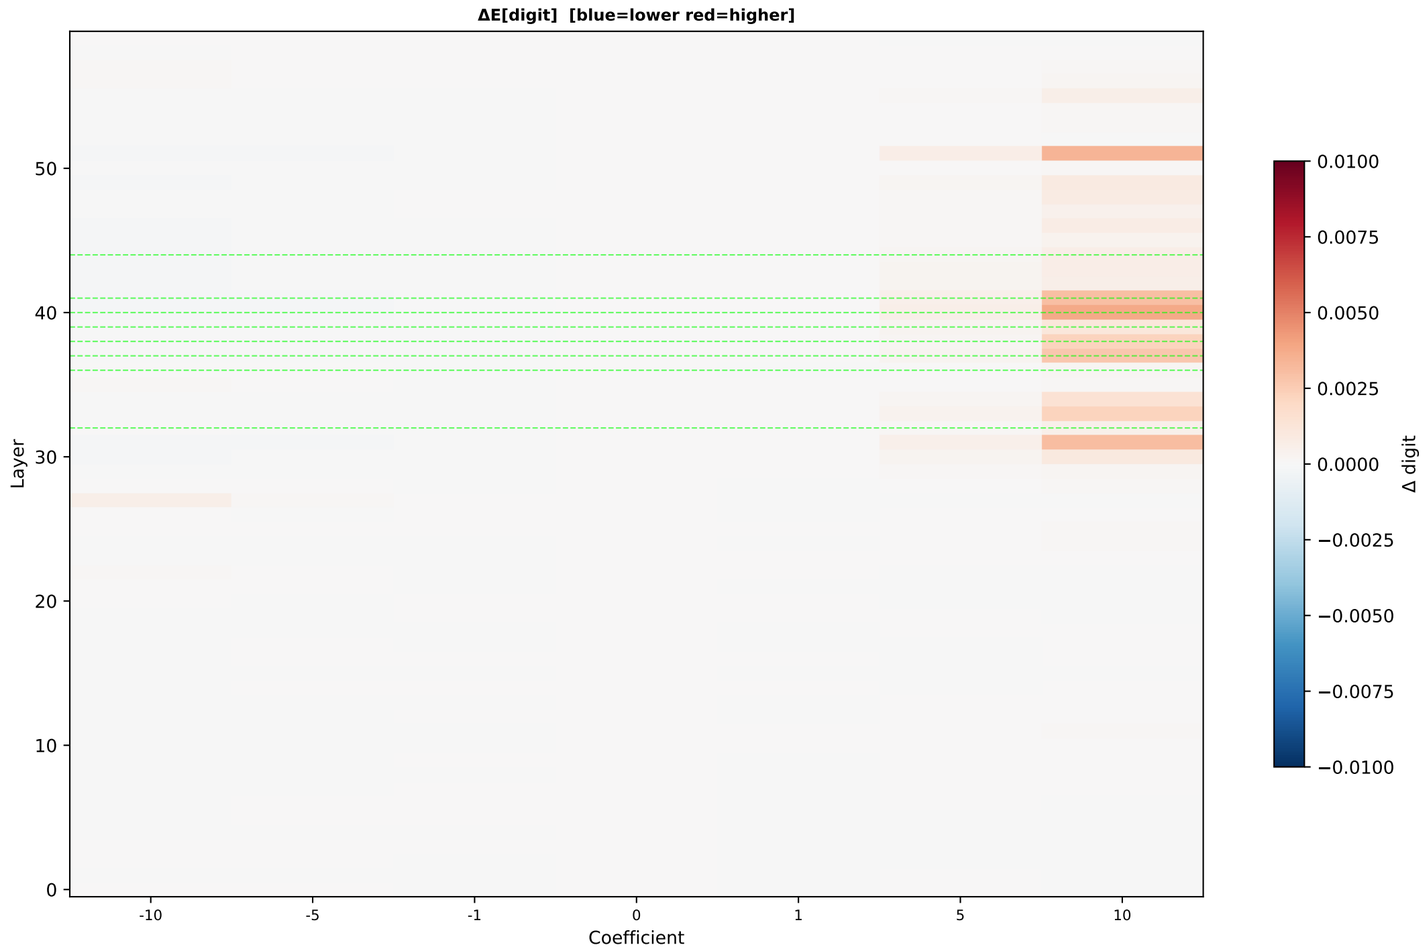


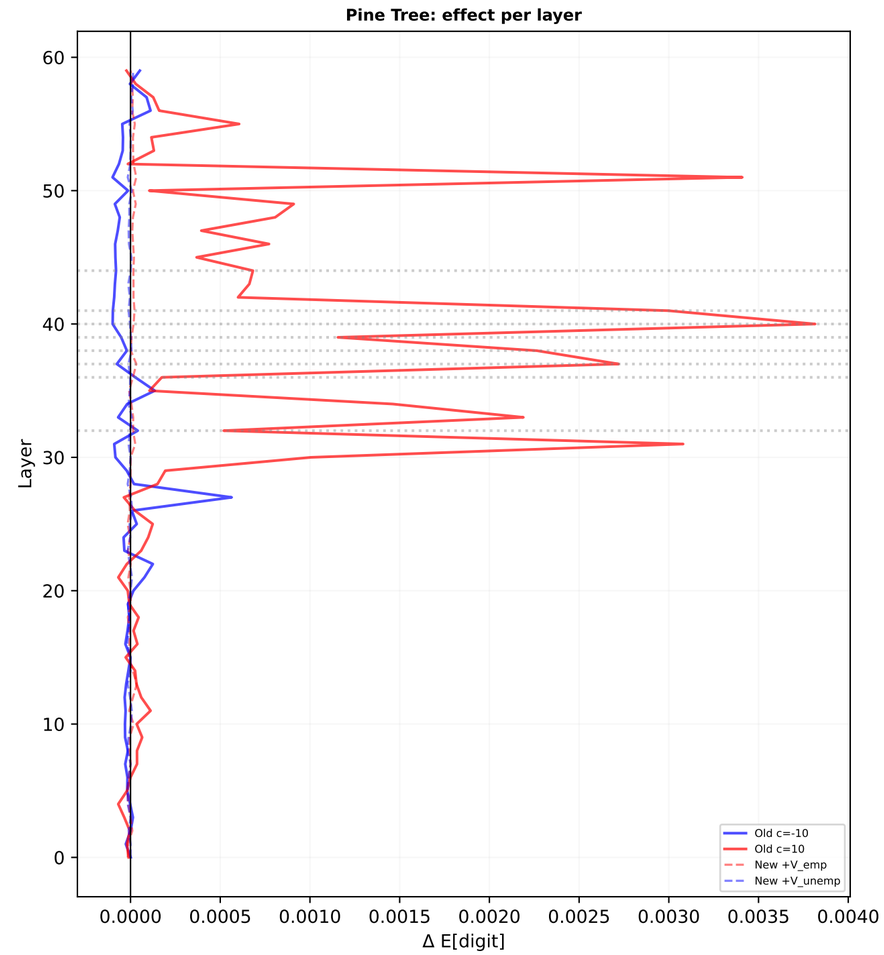


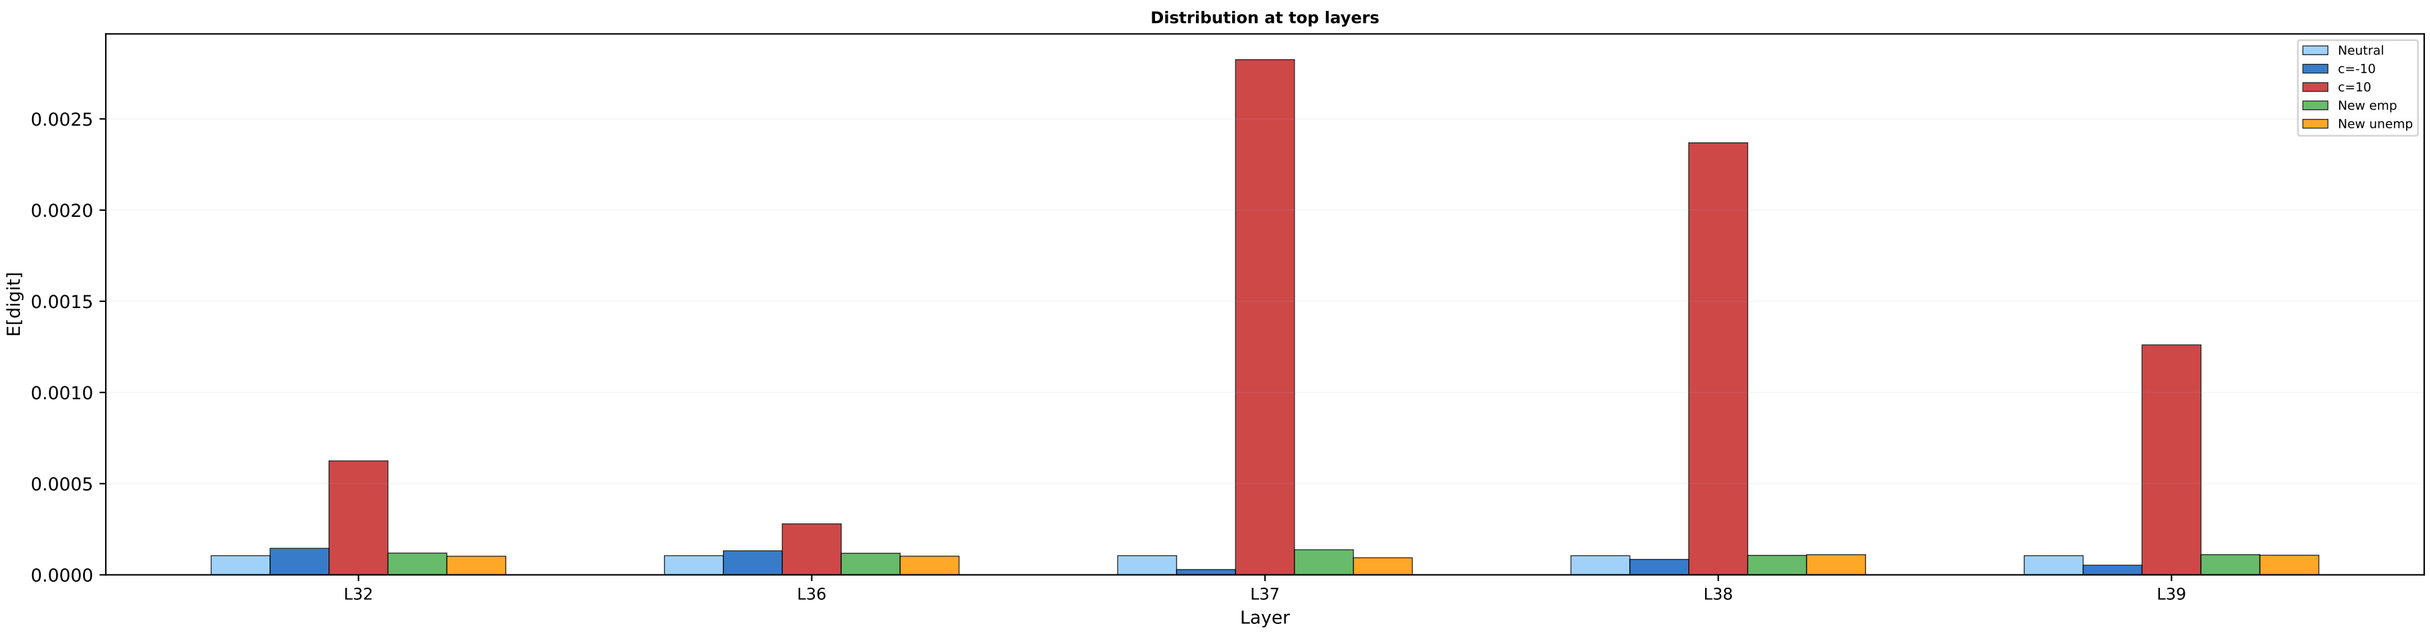


Answer with a single digit from 0 to 9. | How many total hours is an individual away from home today? ___ |

W6: Total hours away | V7/cfg2

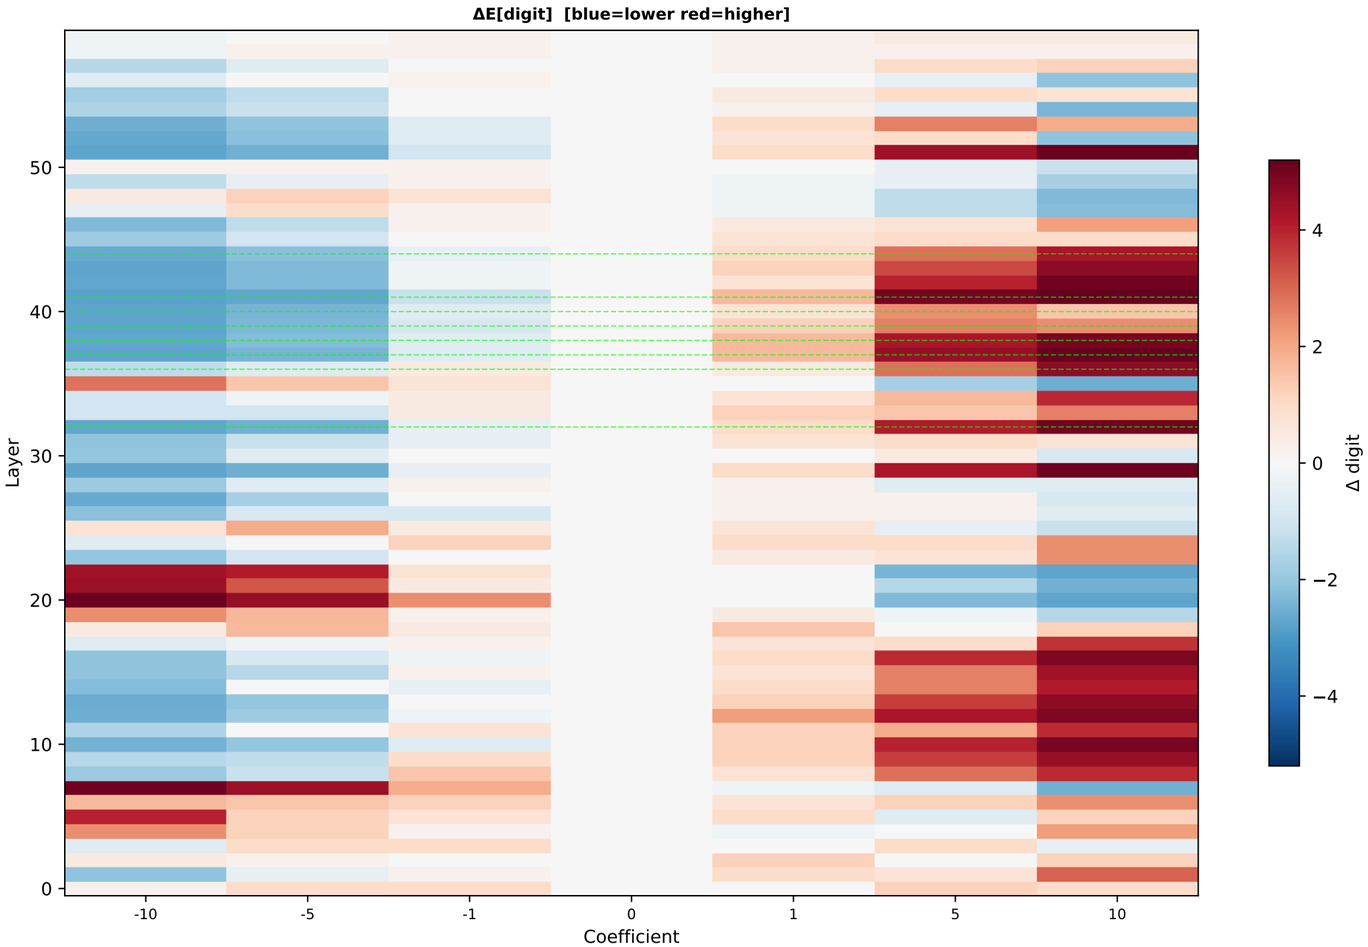


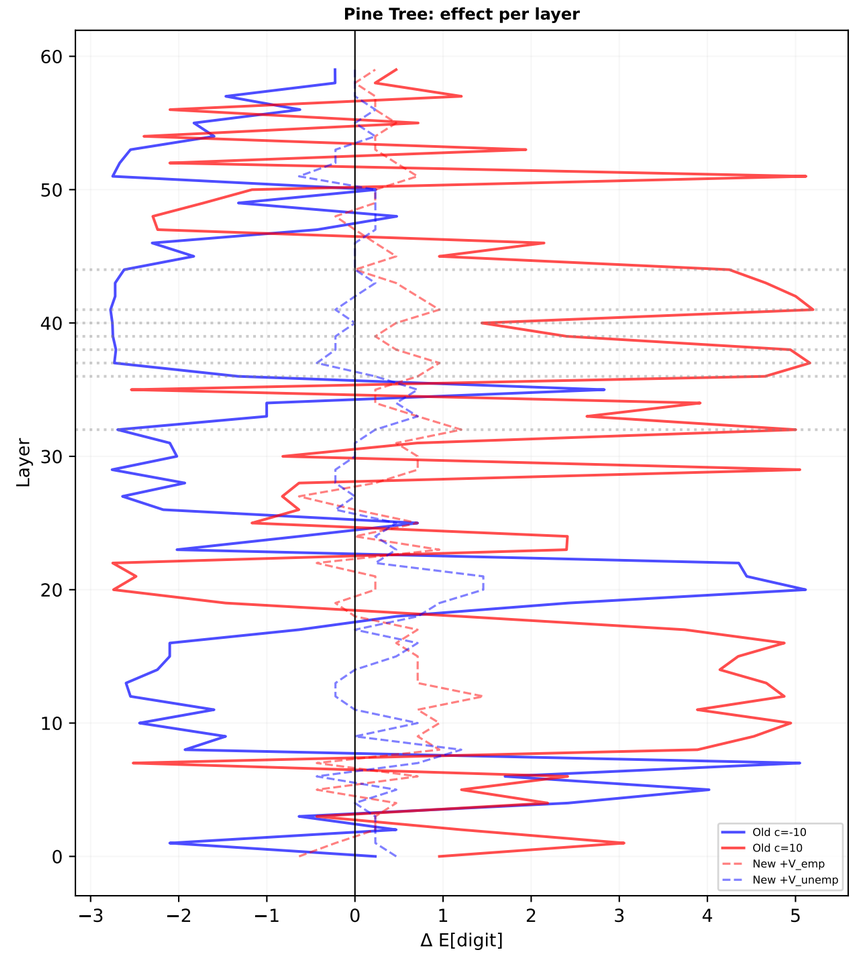


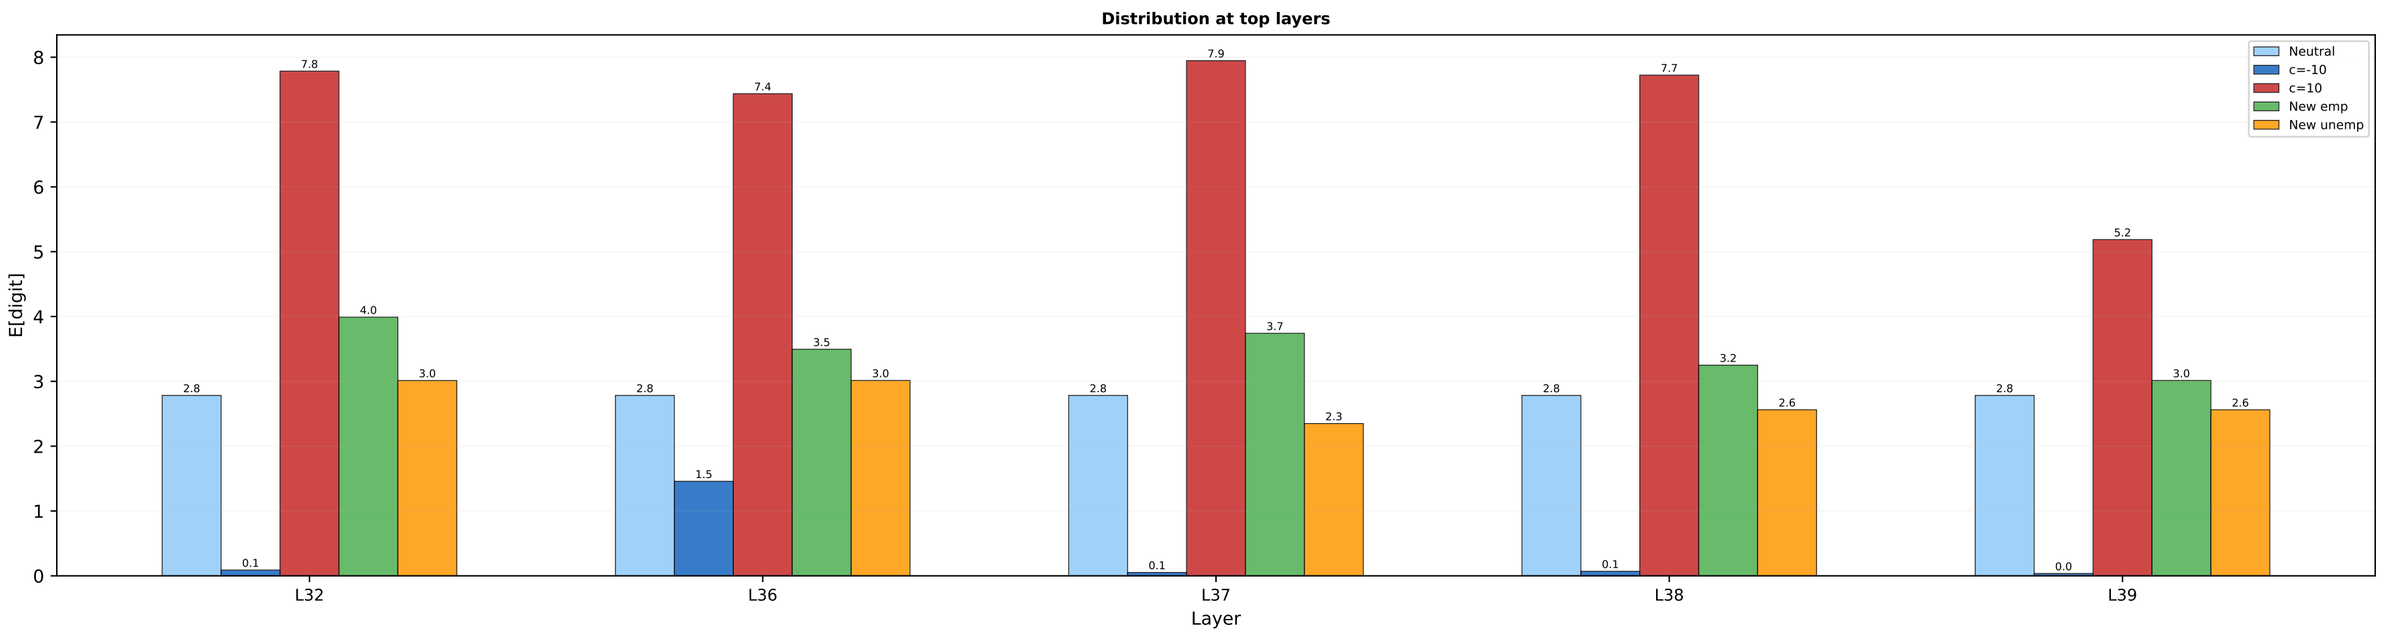


W7: Hours at primary non-home location | V7/cfg2

Answer with a single digit from 0 to 9. | How many hours does an individual spend at their most frequently visited non-home location today? ___ |

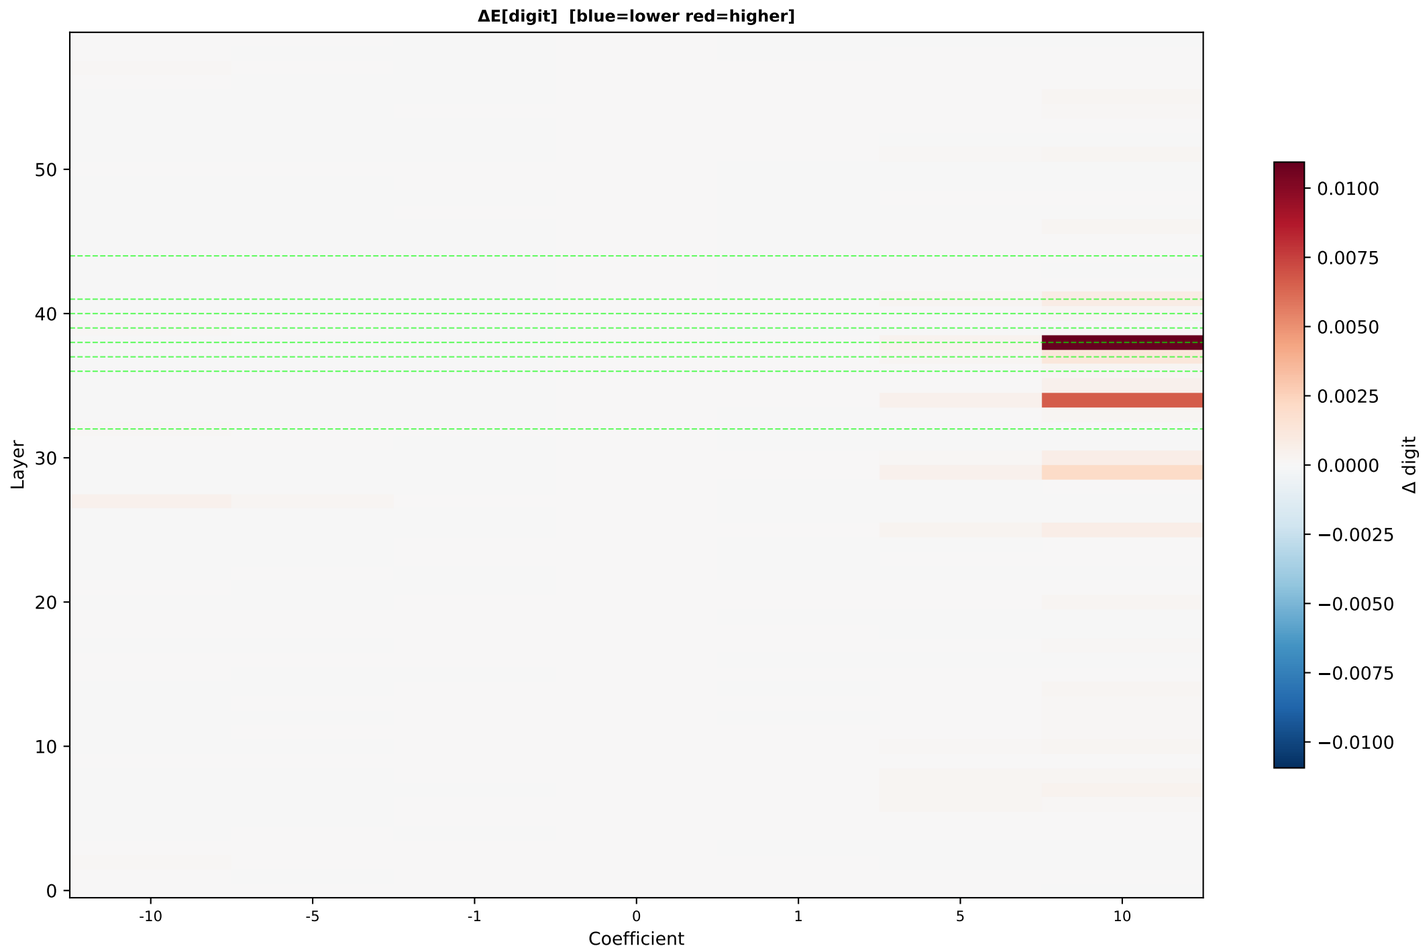


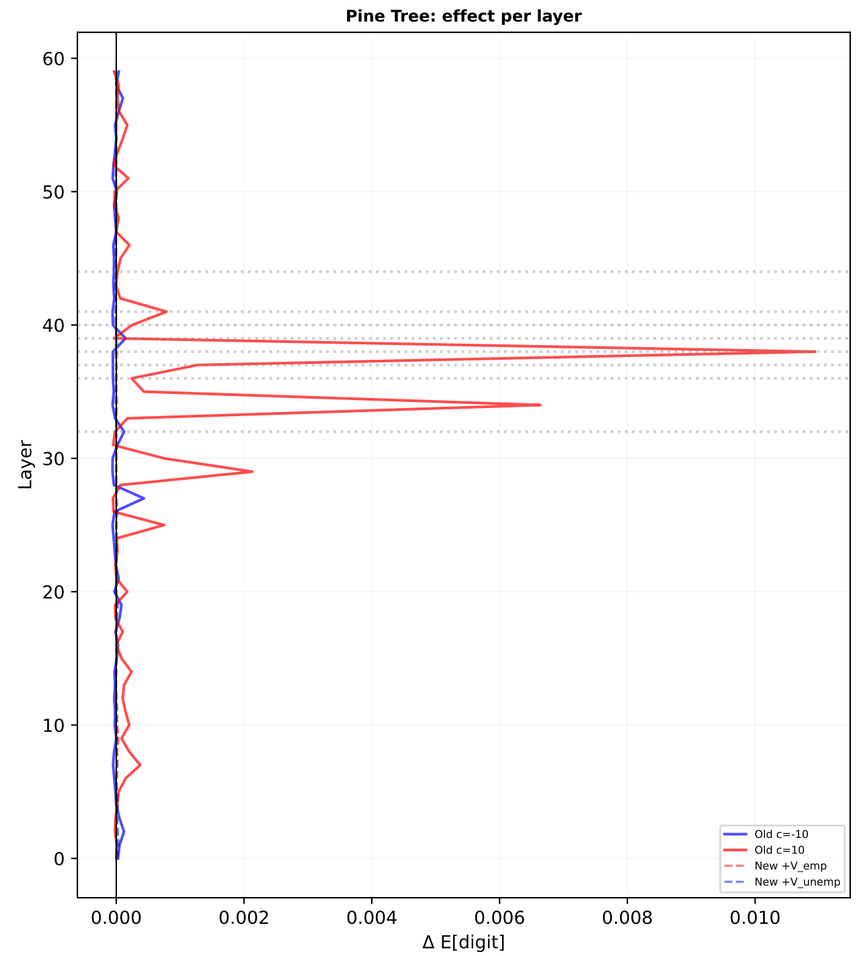


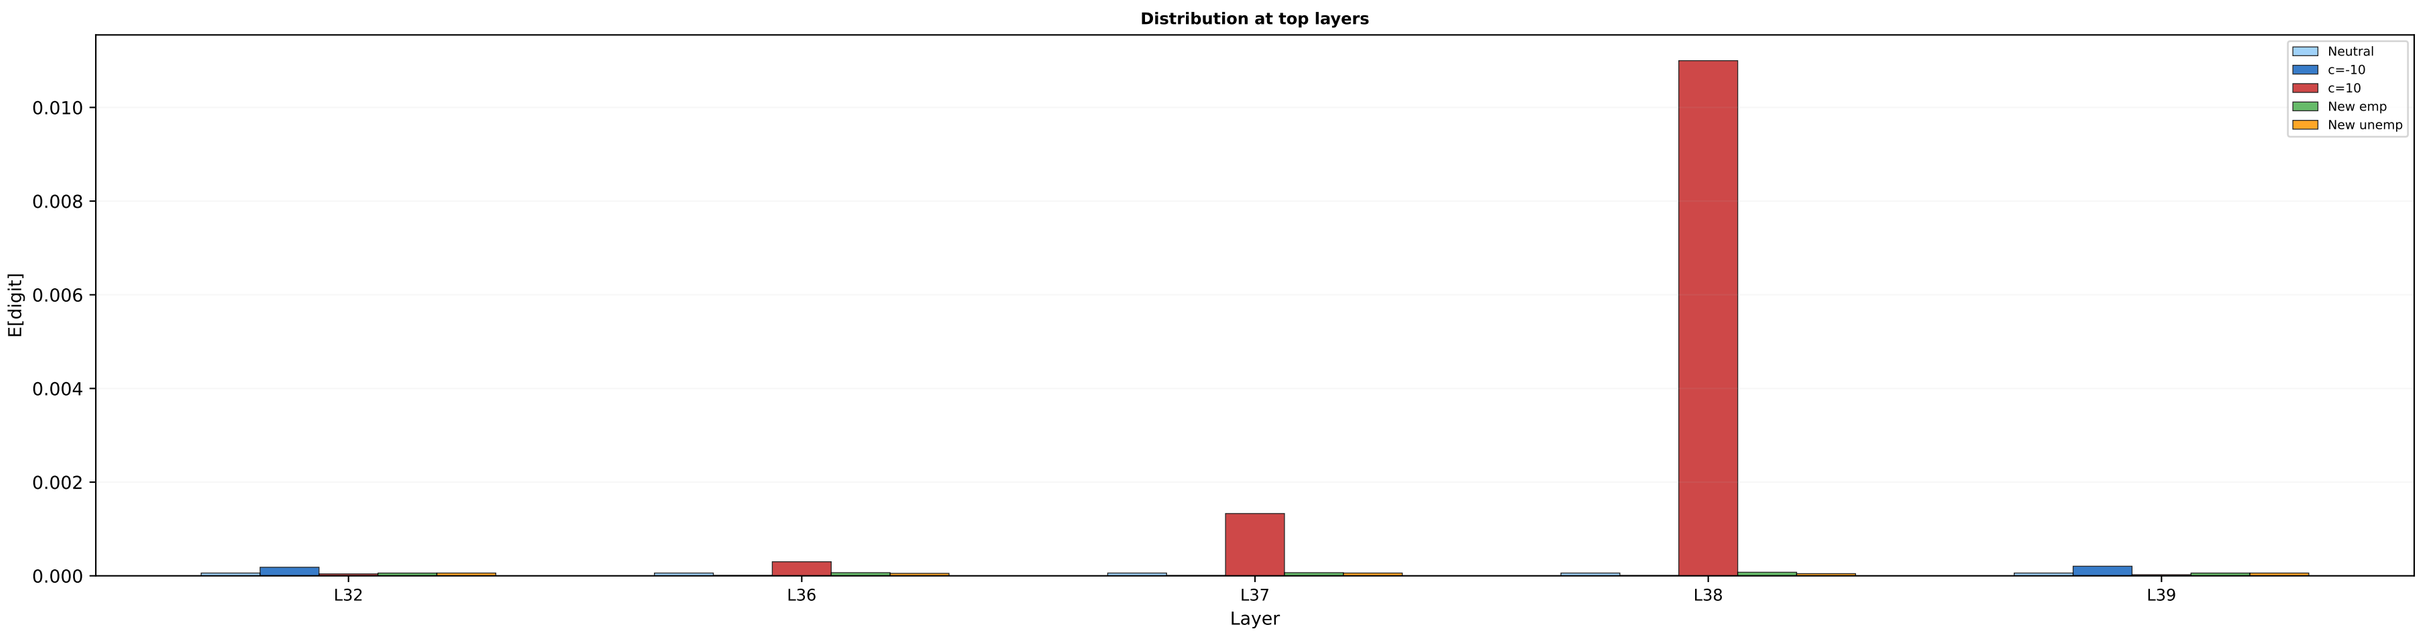


Answer with a single digit from 0 to 9. | How many times does an individual return home during the daytime (8 AM to 6 PM) today? ___ |

W8: Daytime home returns | V7/cfg2

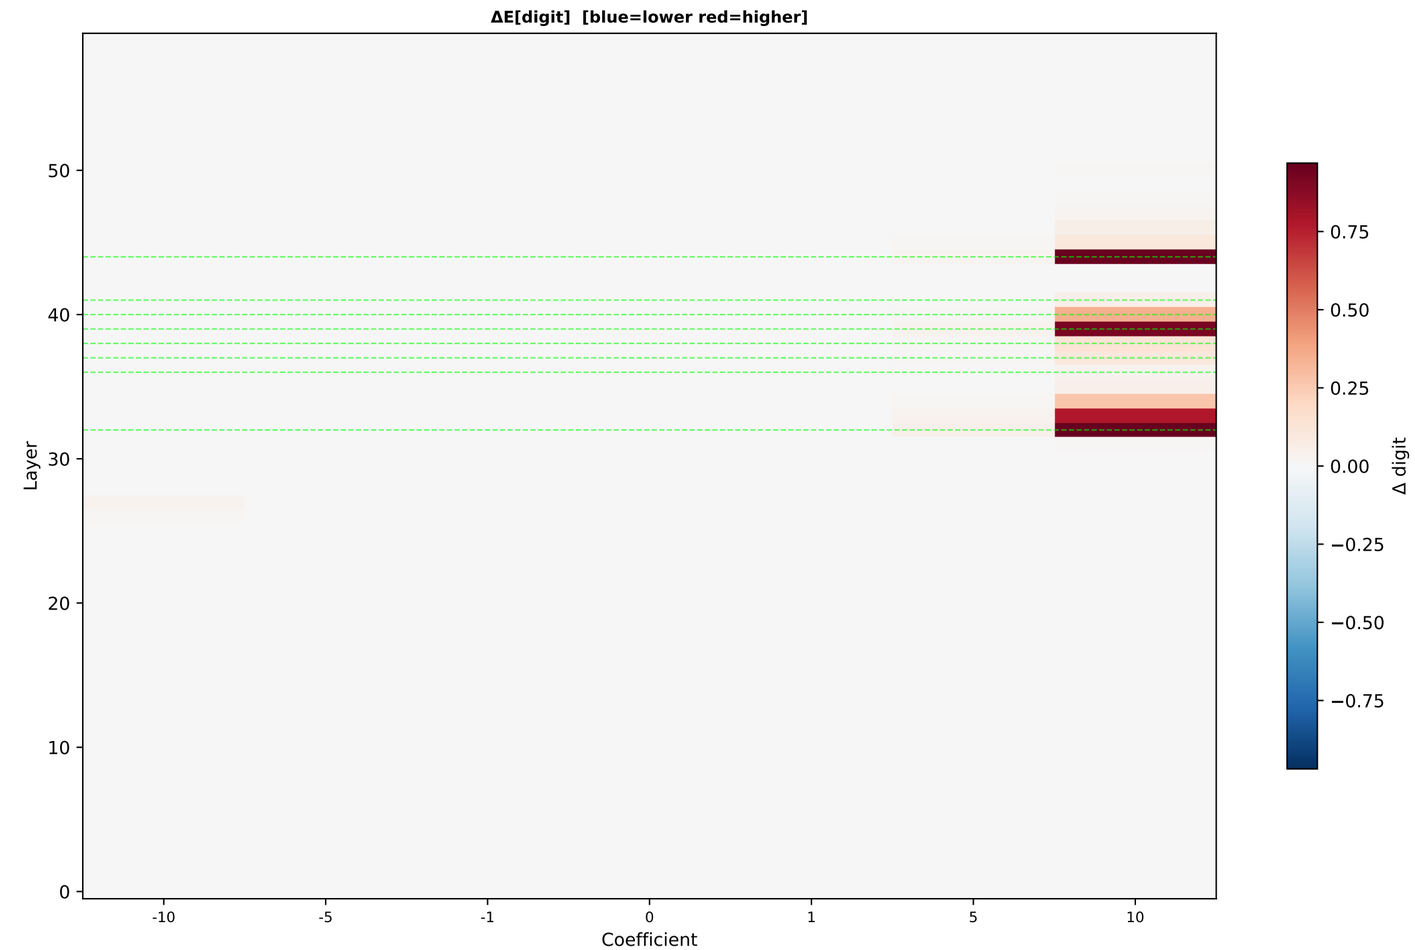


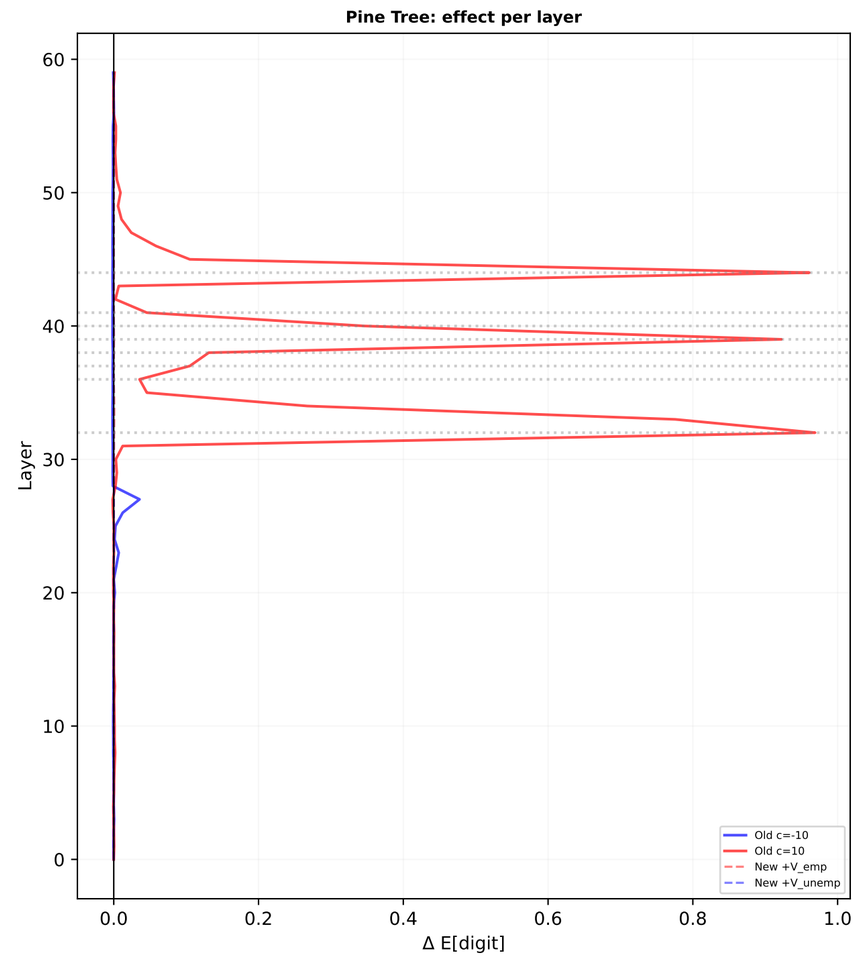


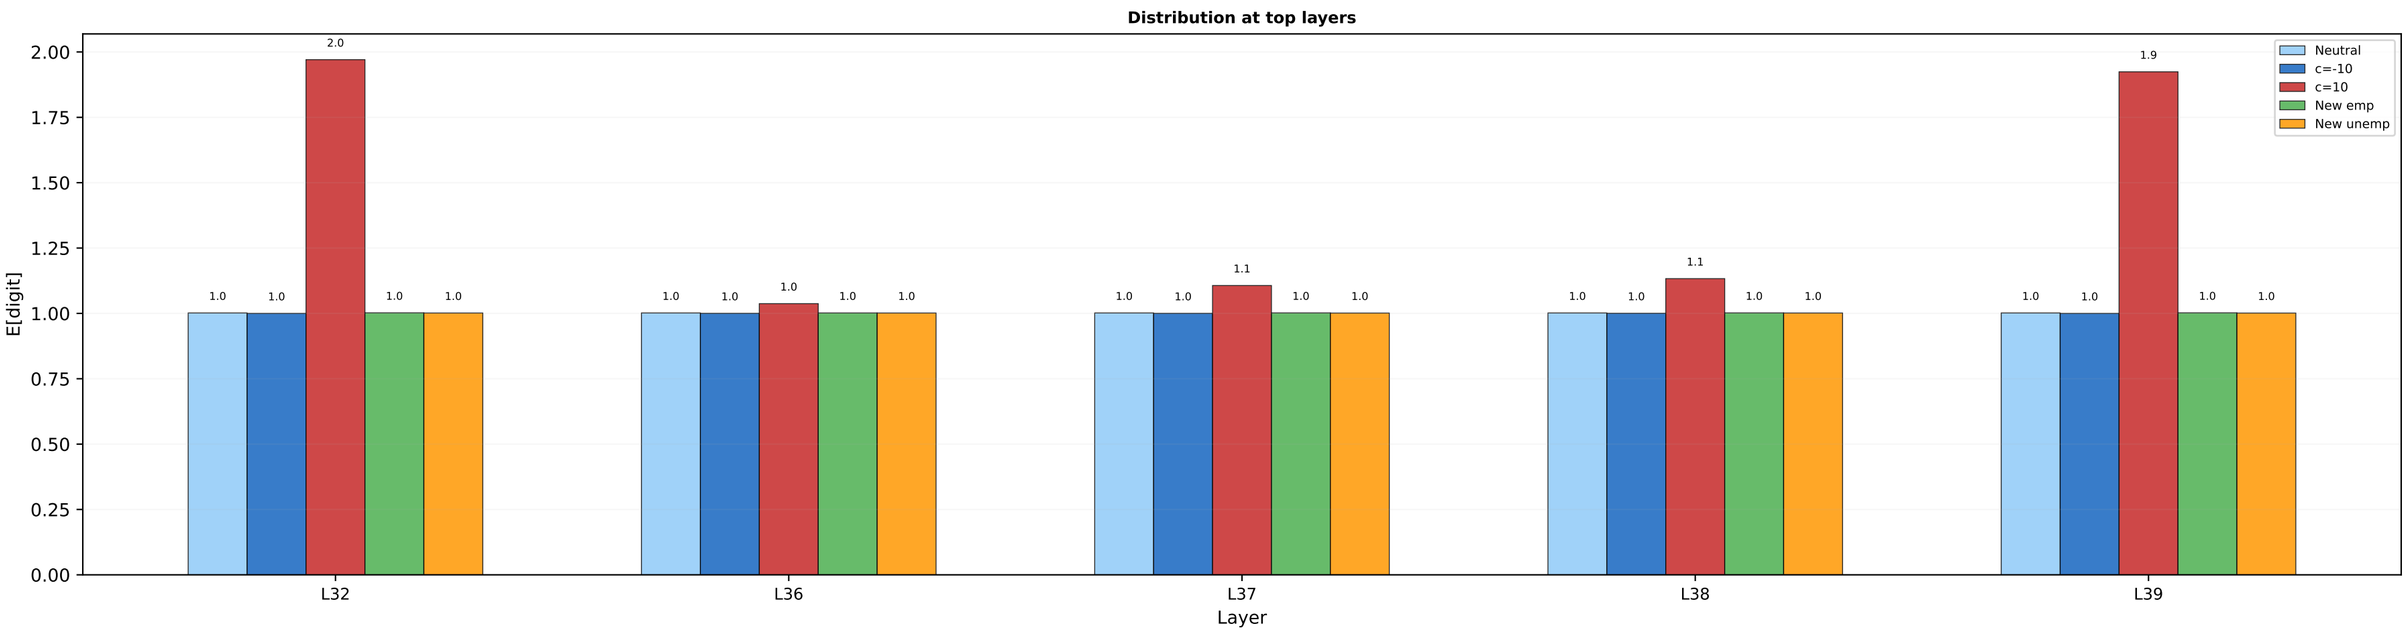


Answer with a single digit from 0 to 9. | How many hours does an individual spend commuting or in transit today? ___ |

W9: Commute/transit hours | V7/cfg2

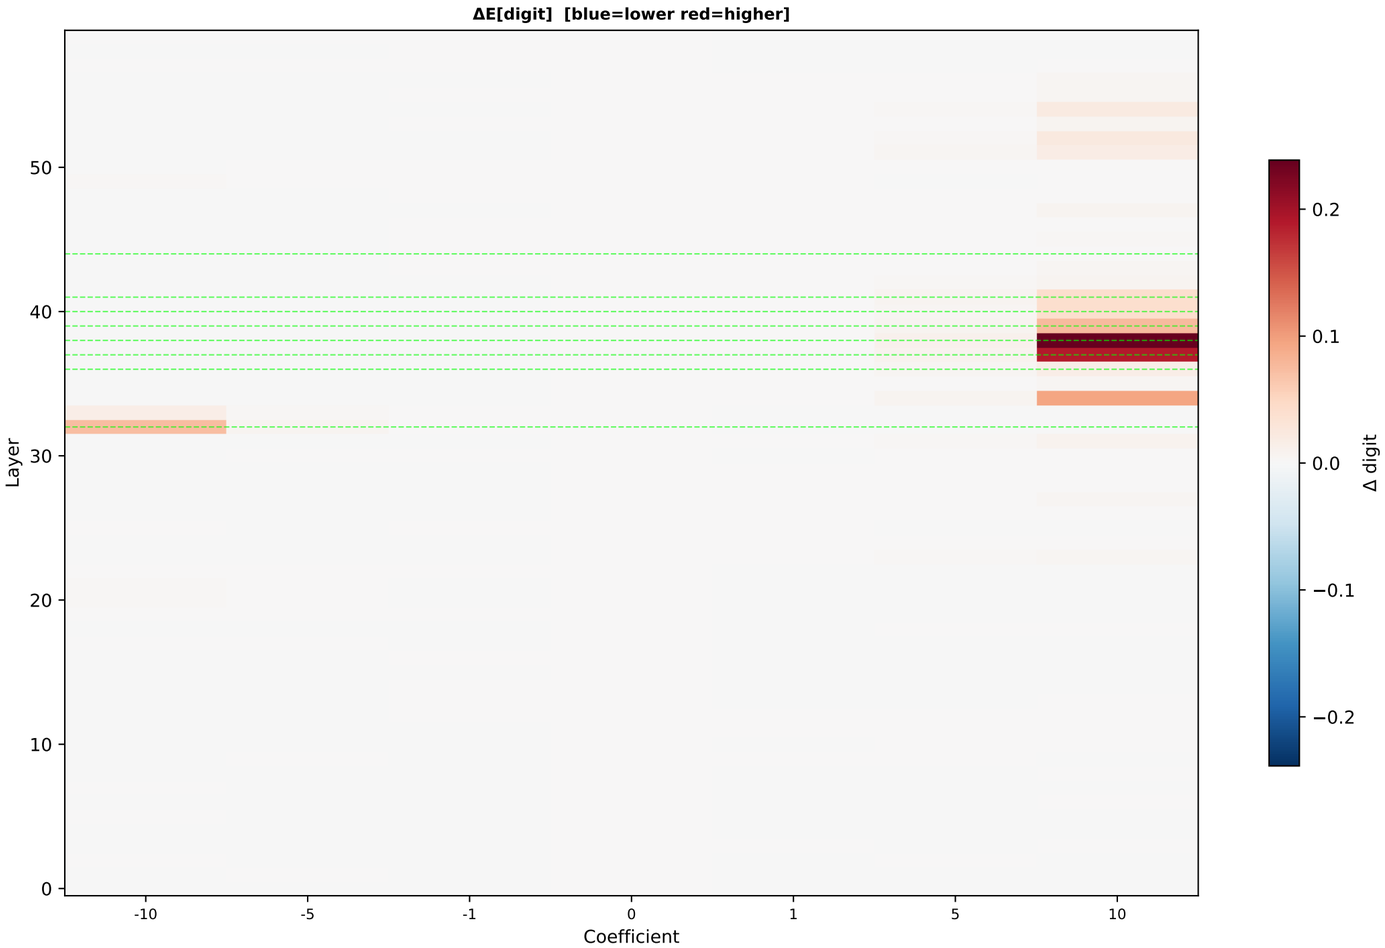


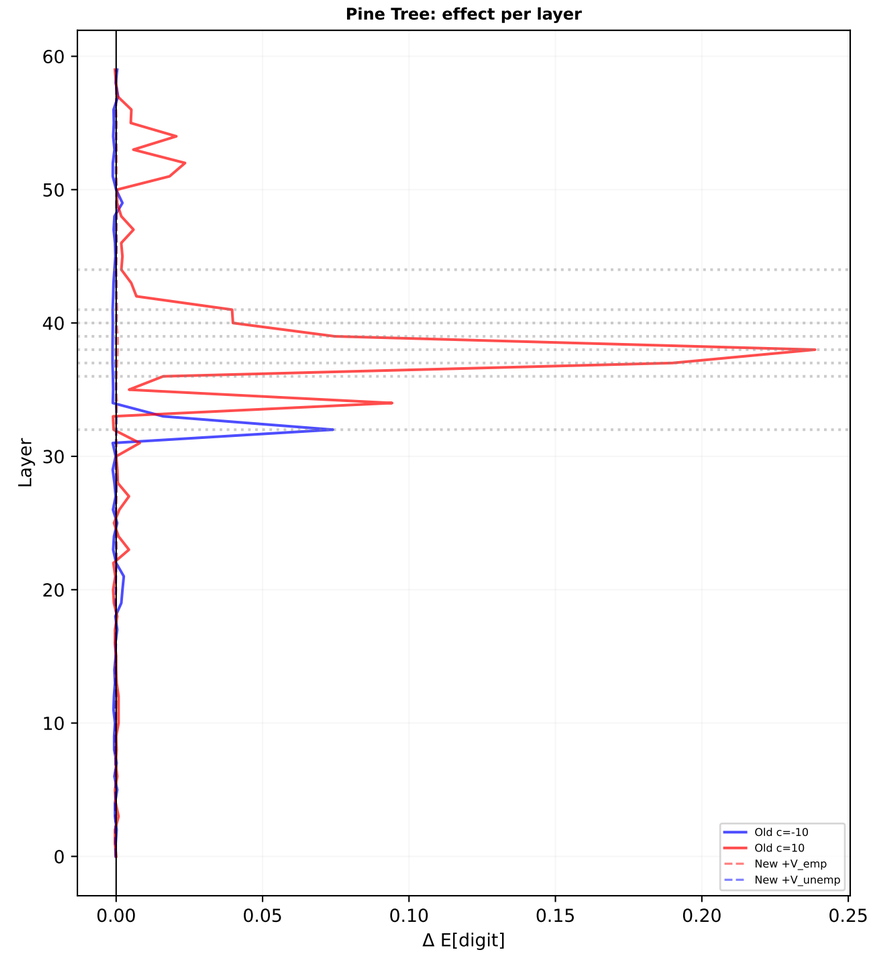


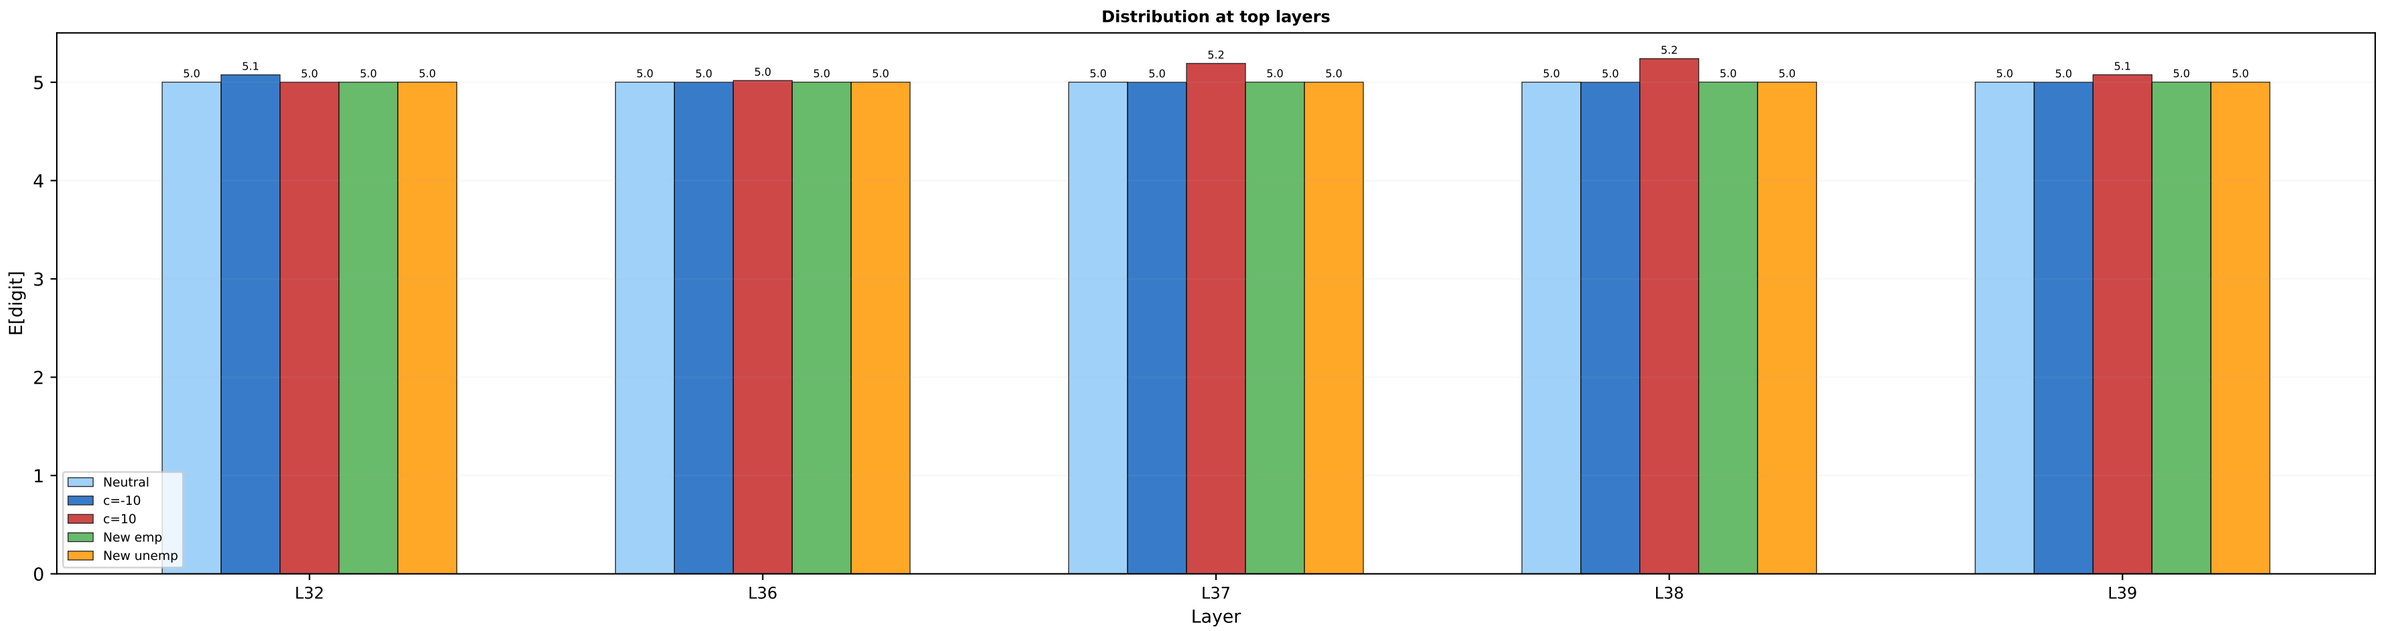


W10: Week-to-week consistency | V7/cfg2

Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is an individual's schedule today compared to the same day last week? (0 = completely different, 9 = identical) ___|

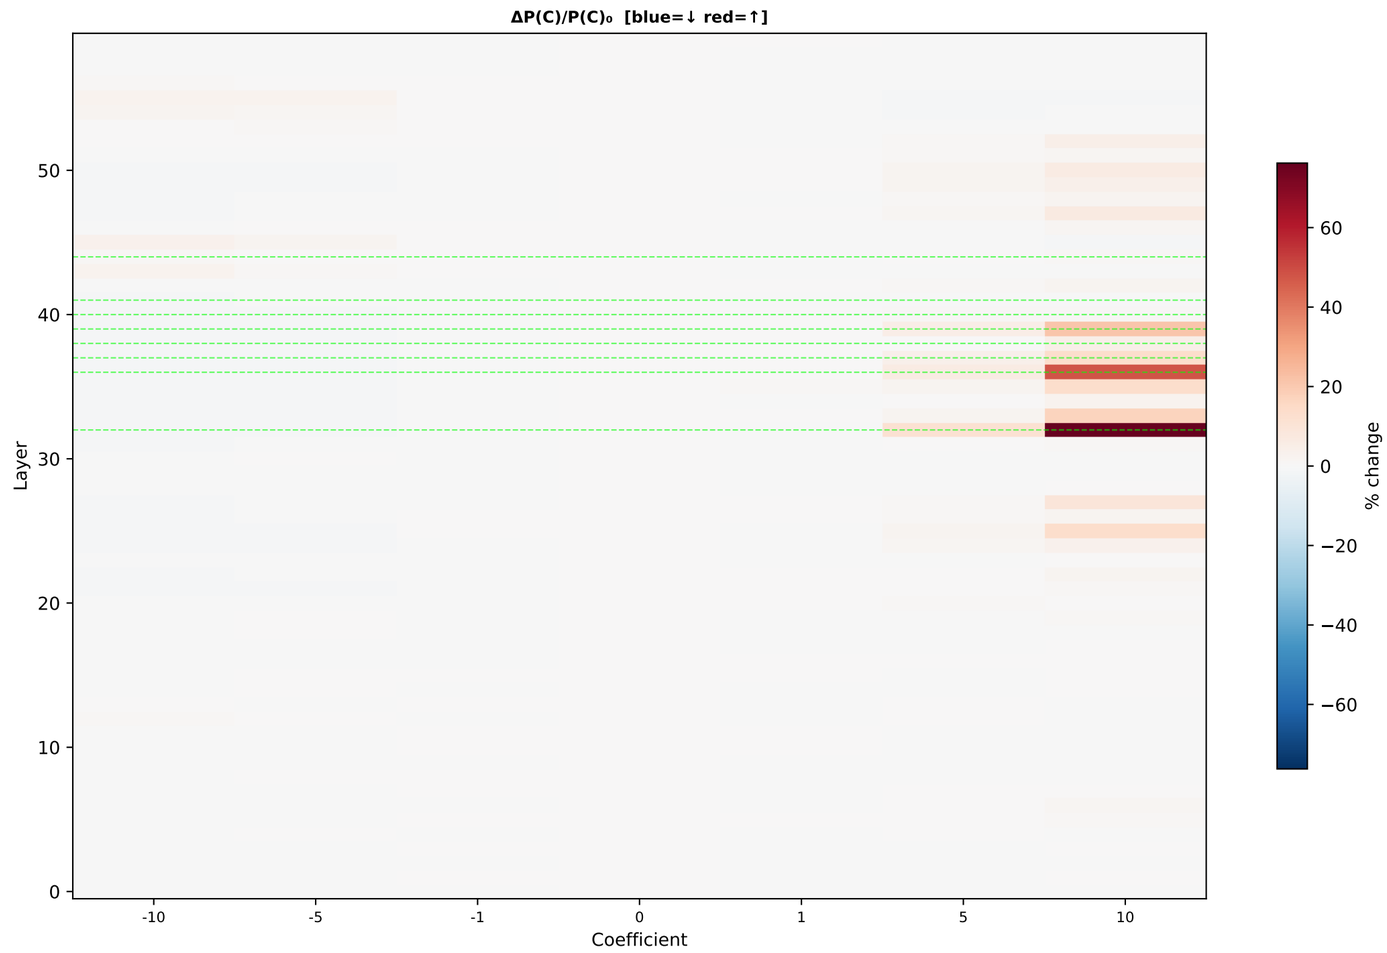


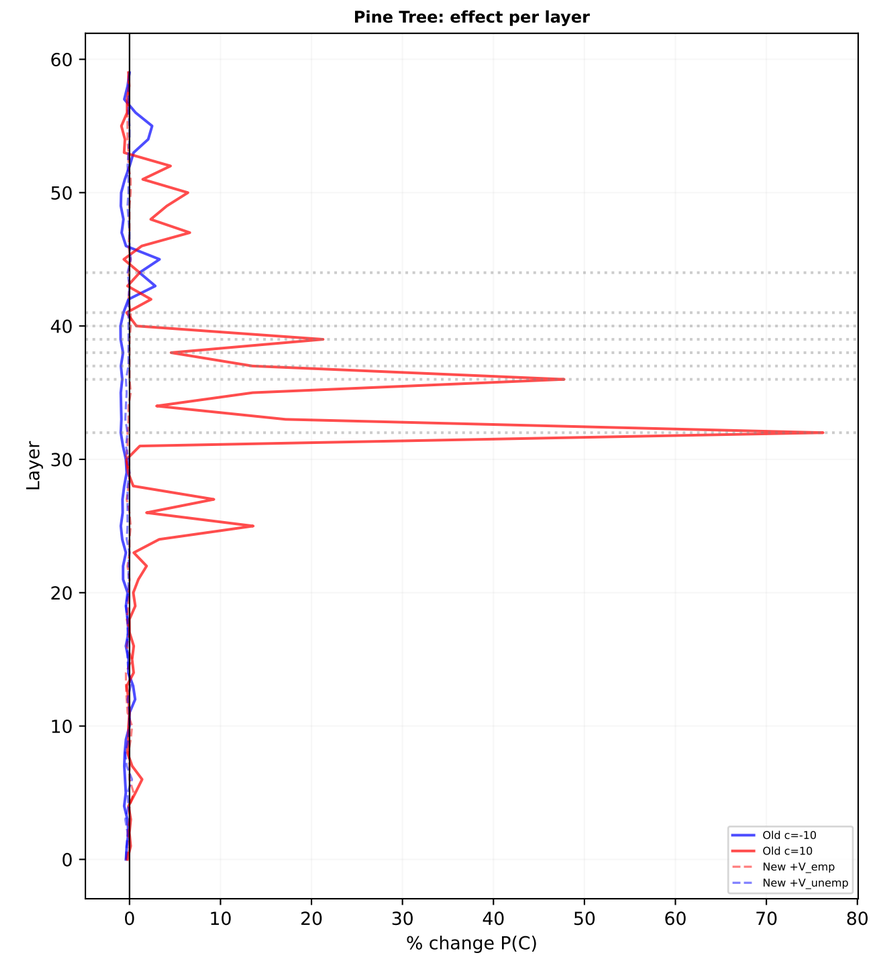


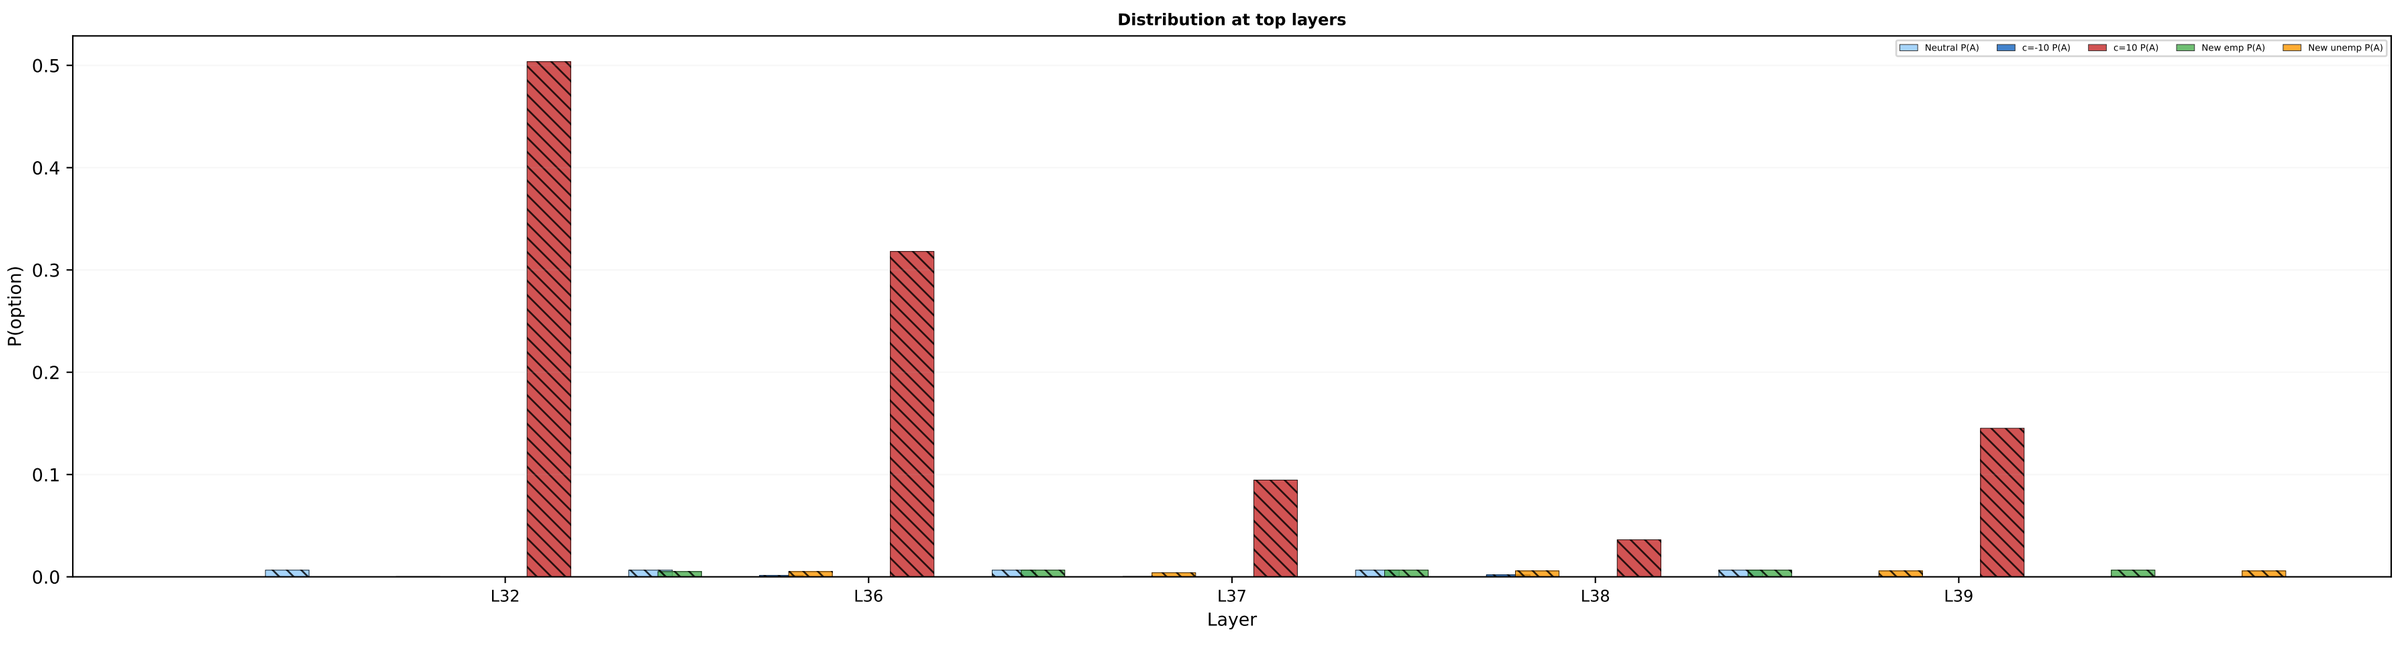


W11: 8 AM status | V7/cfg2

At 8:00 AM, an individual is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

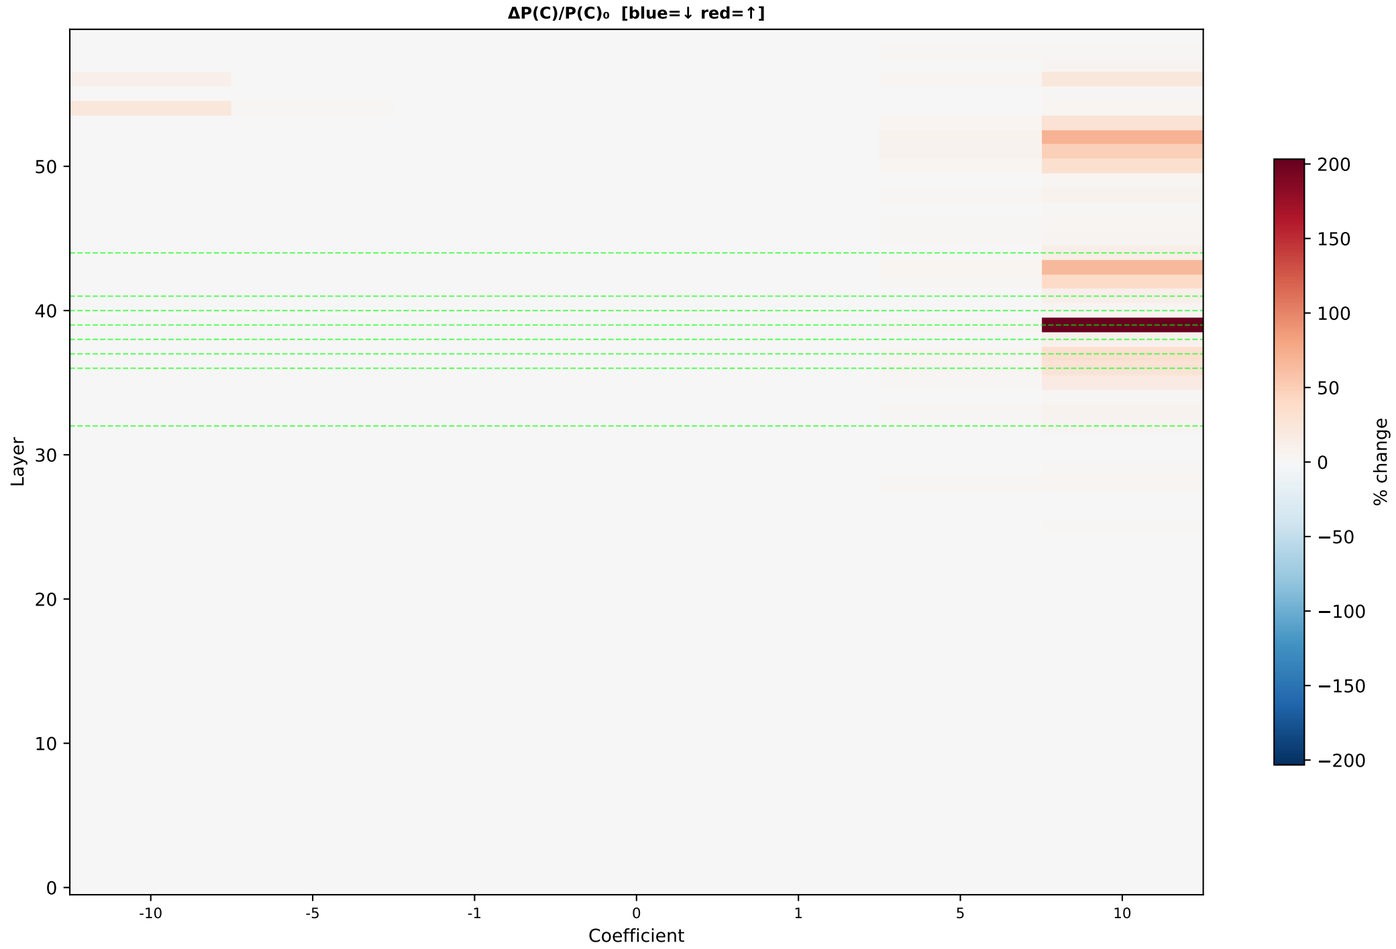


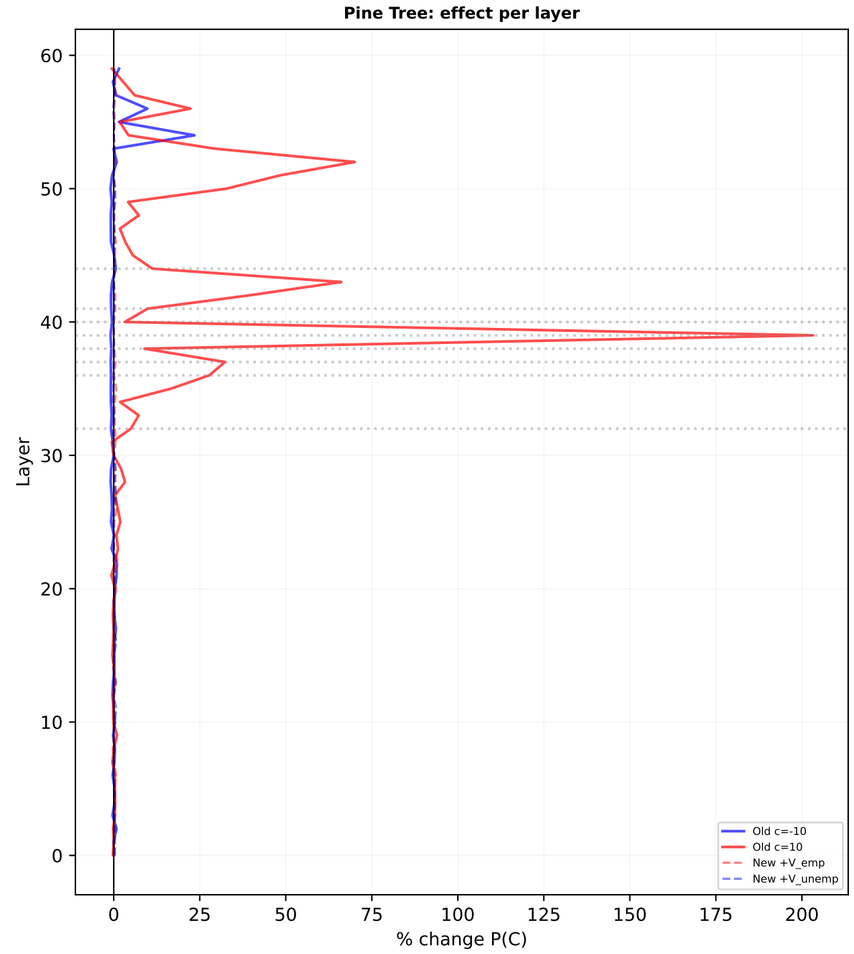


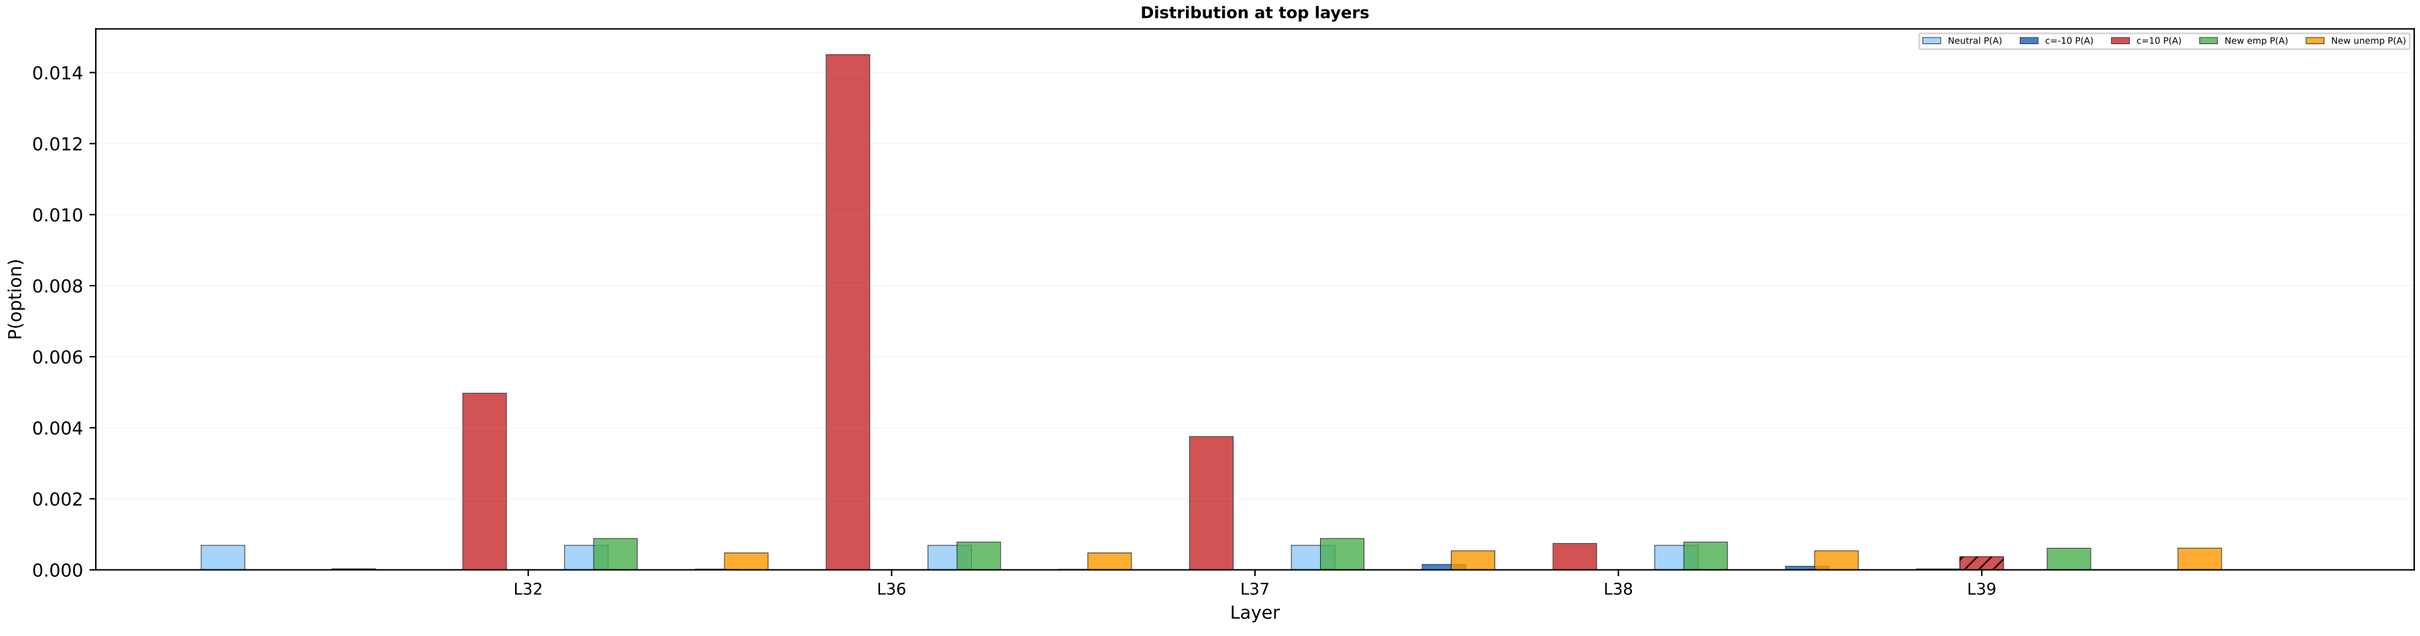


W12: 10:30 AM coffee availability | V7/cfg2

An individual is asked: "Are you usually free to meet for coffee at 10:30 AM?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

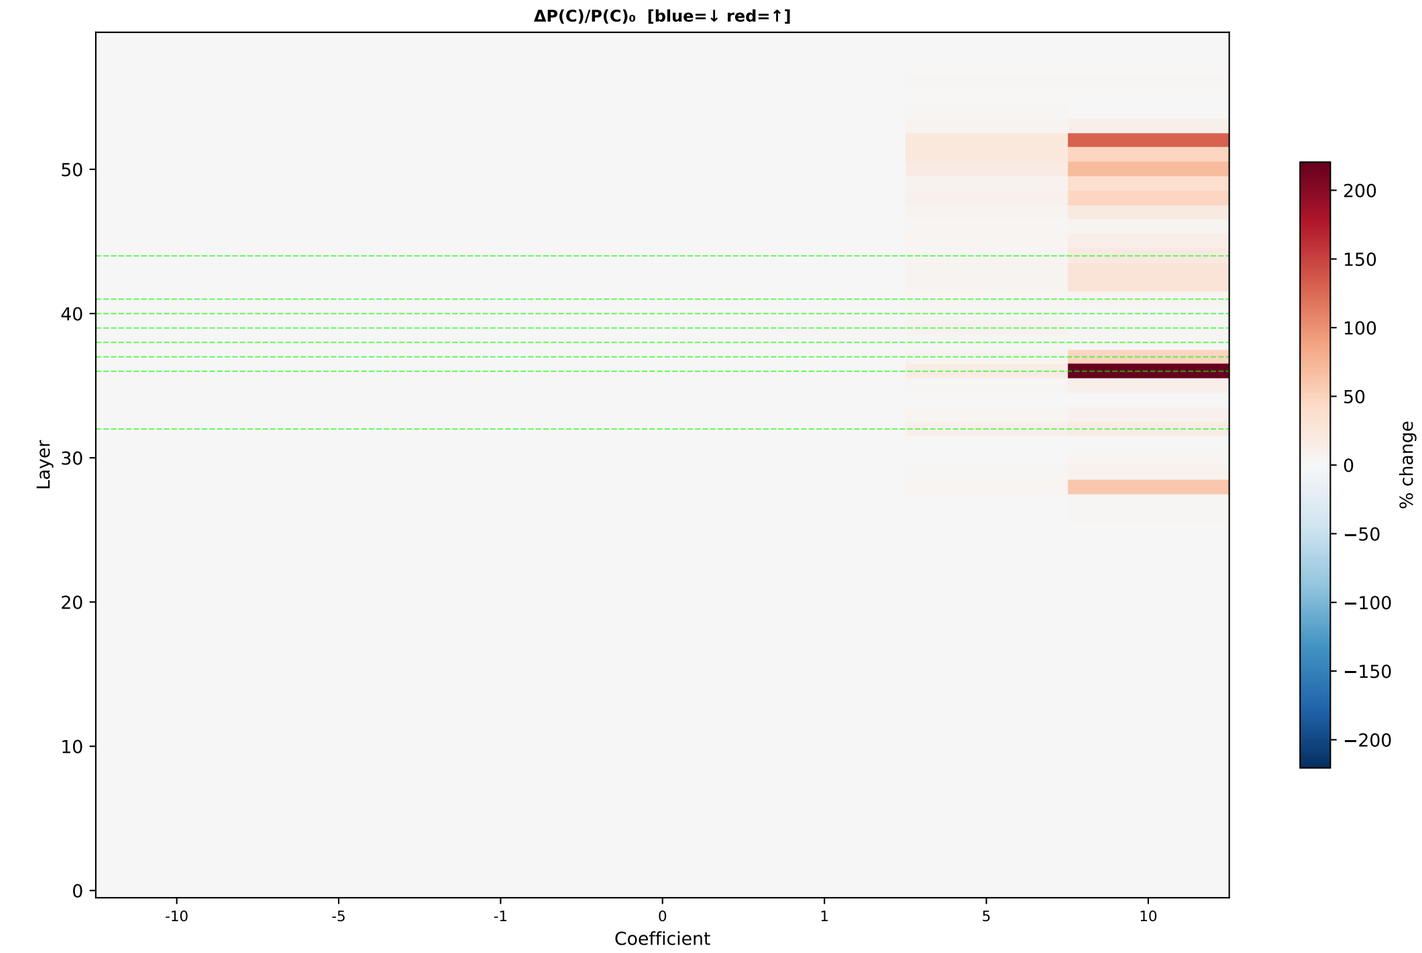


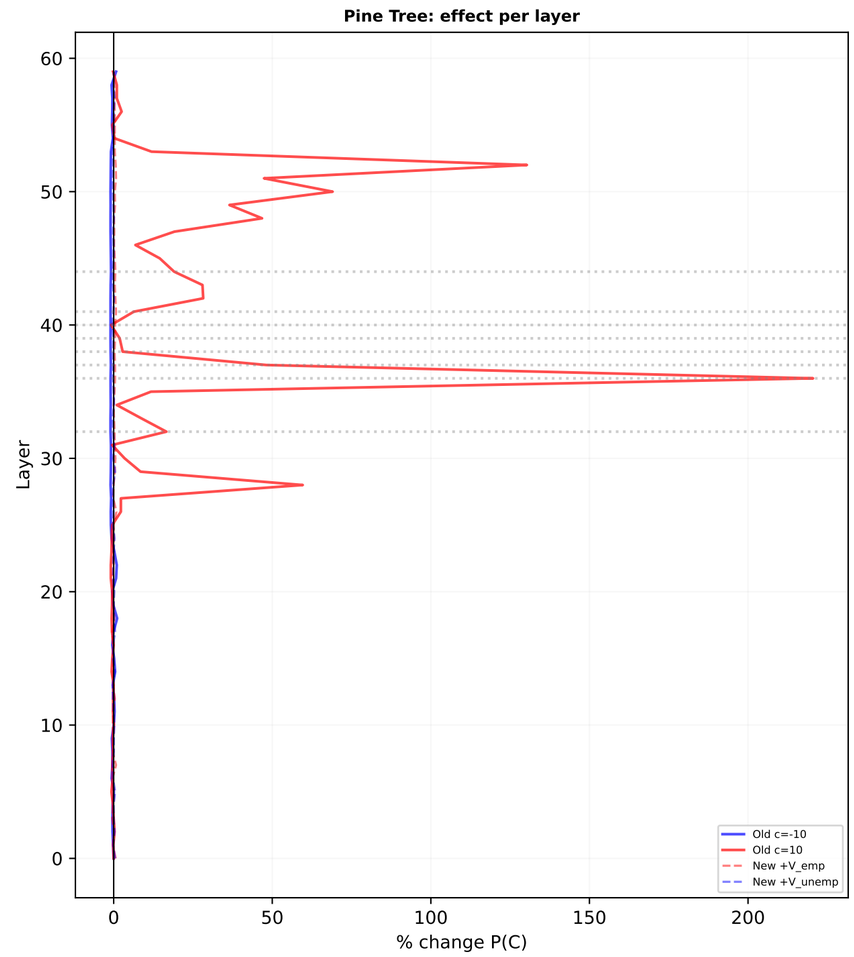


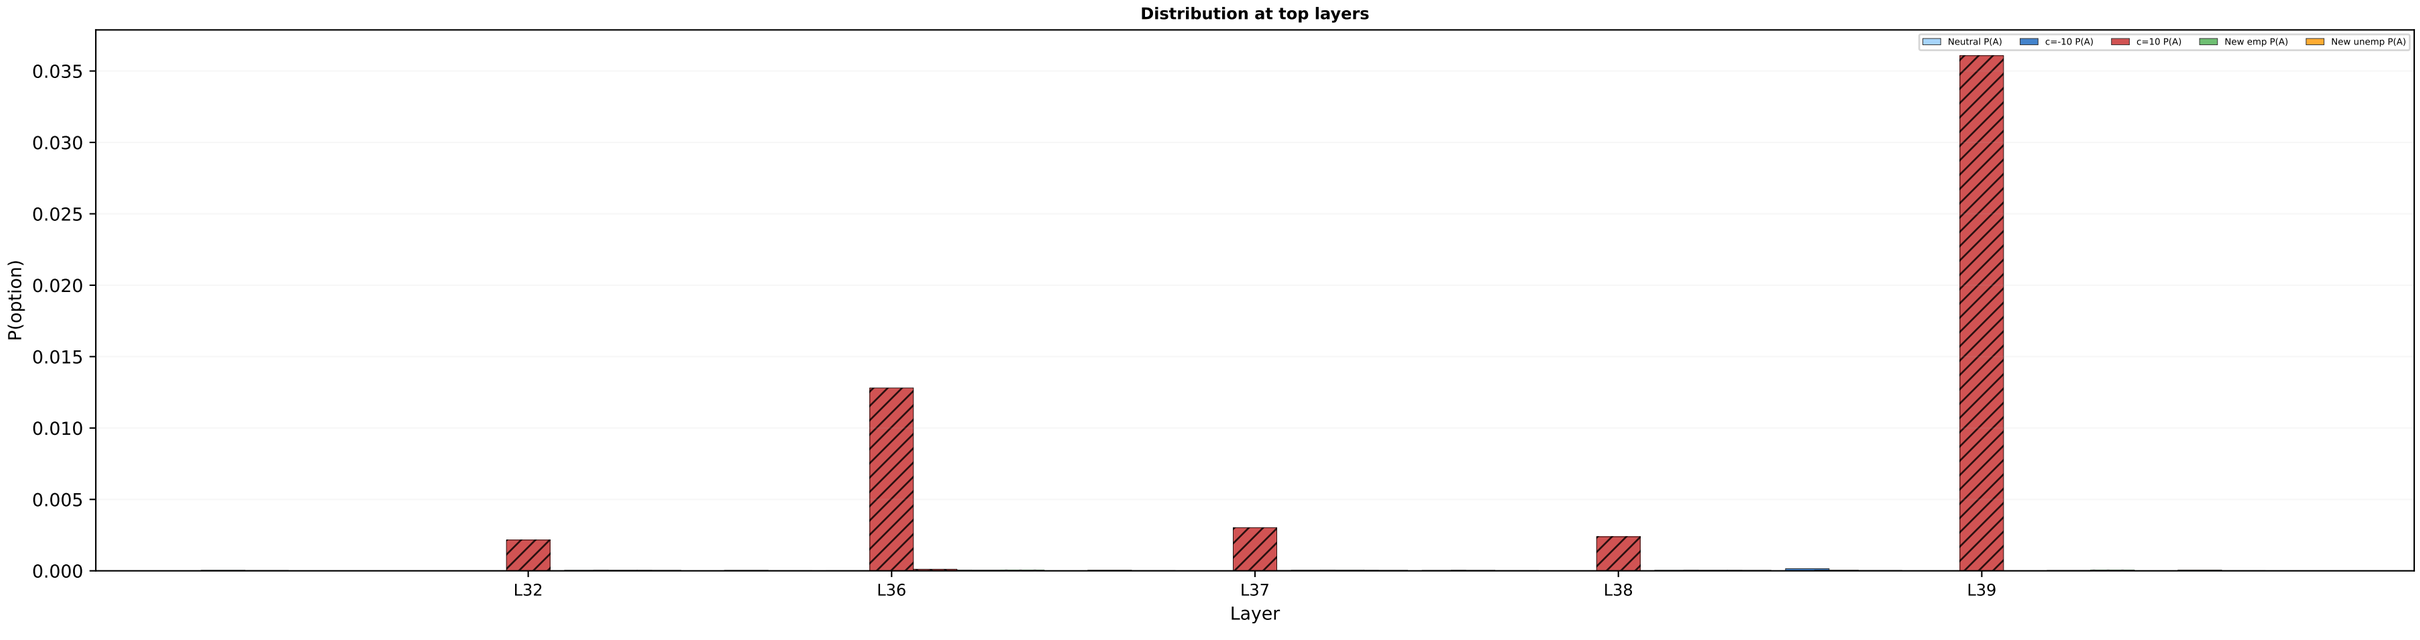


W13: Noon availability | V7/cfg2

An individual is asked: "Can you meet me for lunch at noon?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

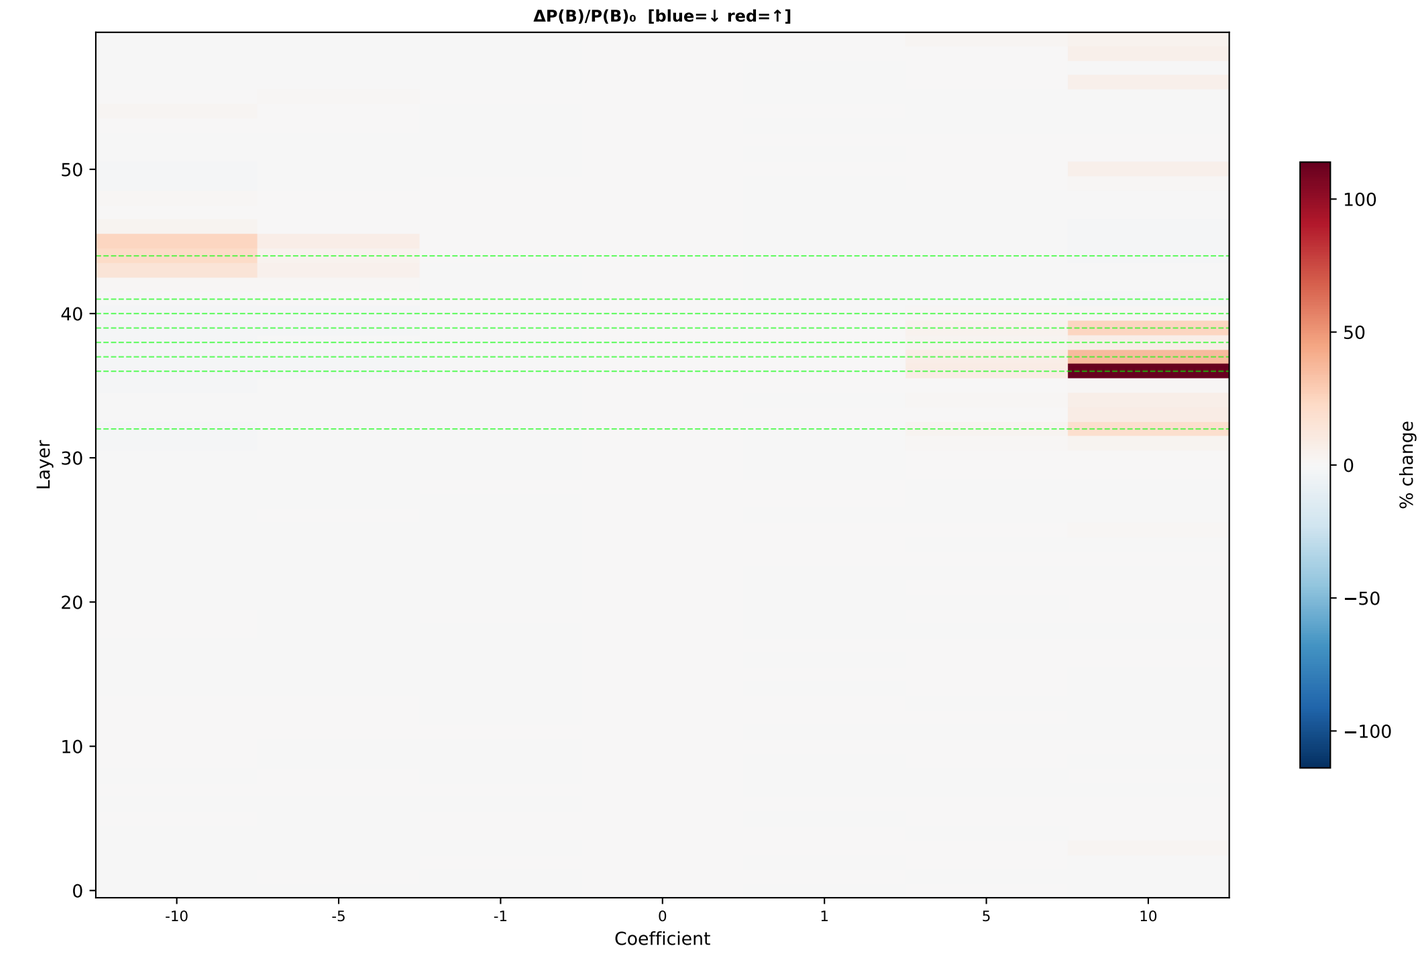


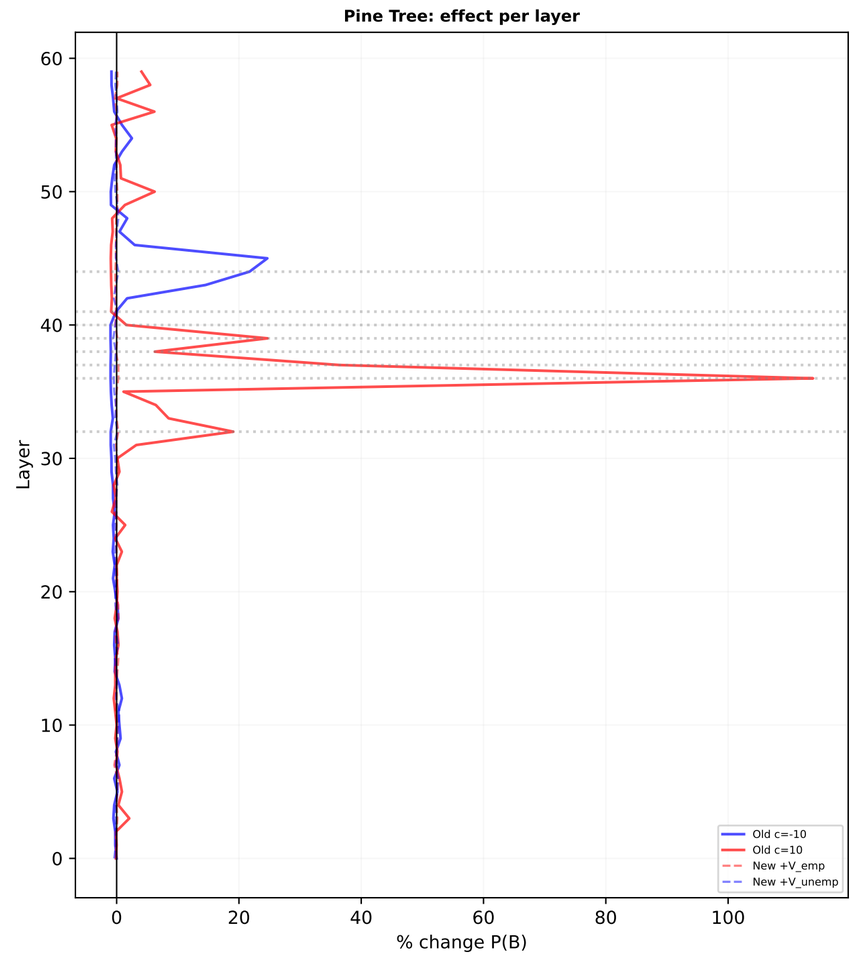


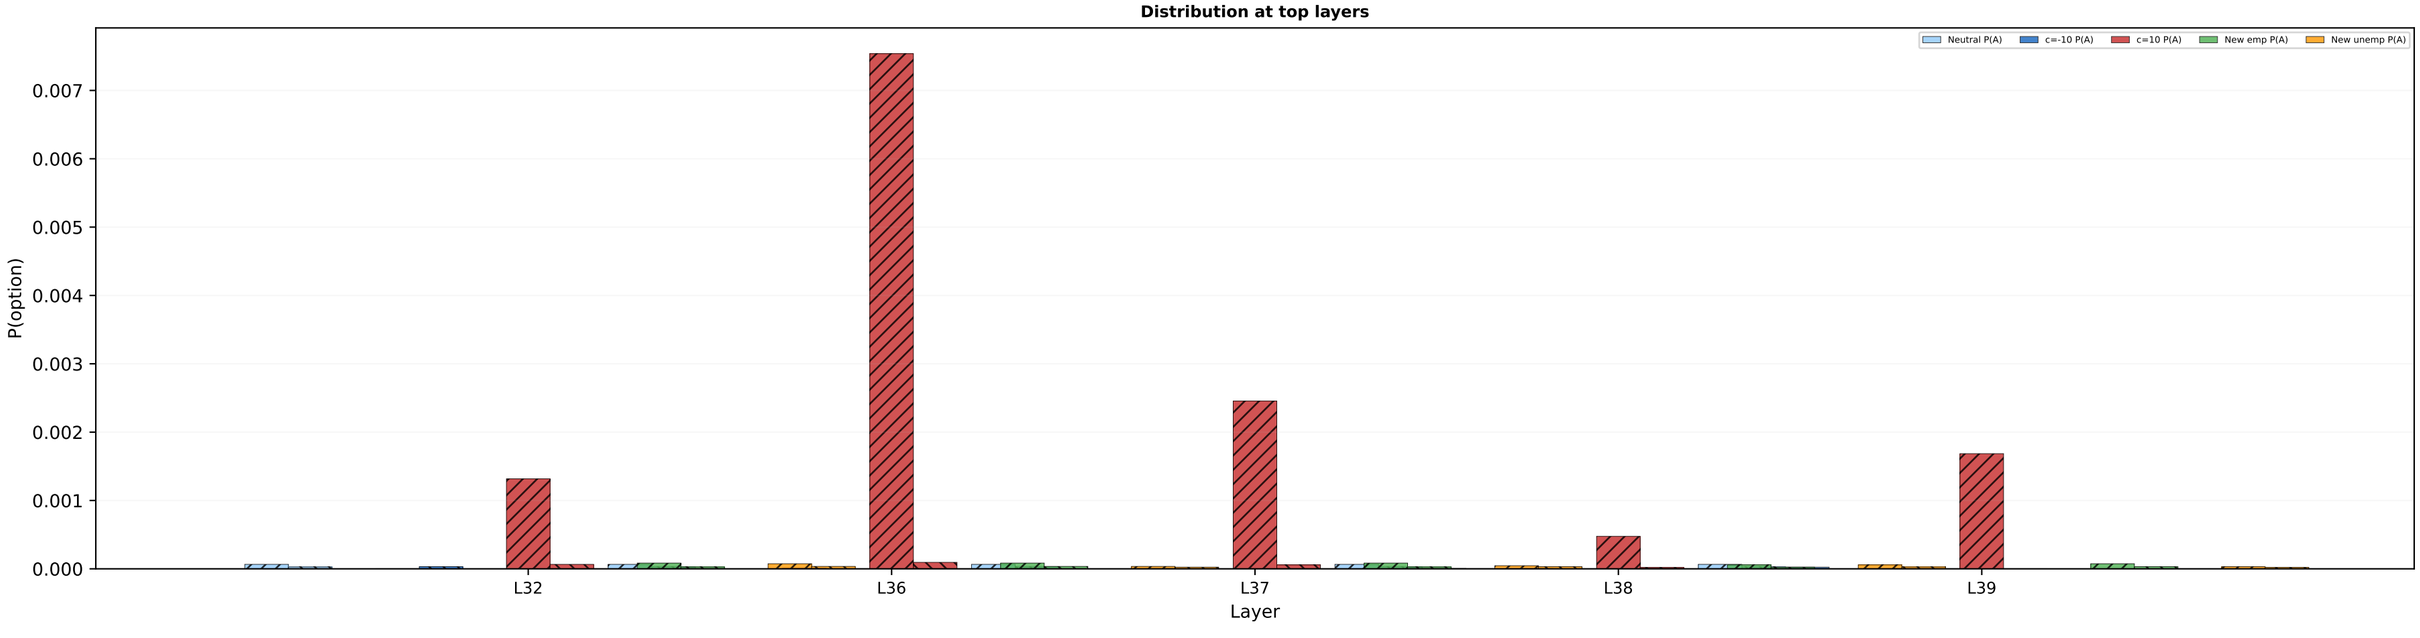


W14: 3 PM location | V7/cfg2

At 3:00 PM, an individual is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

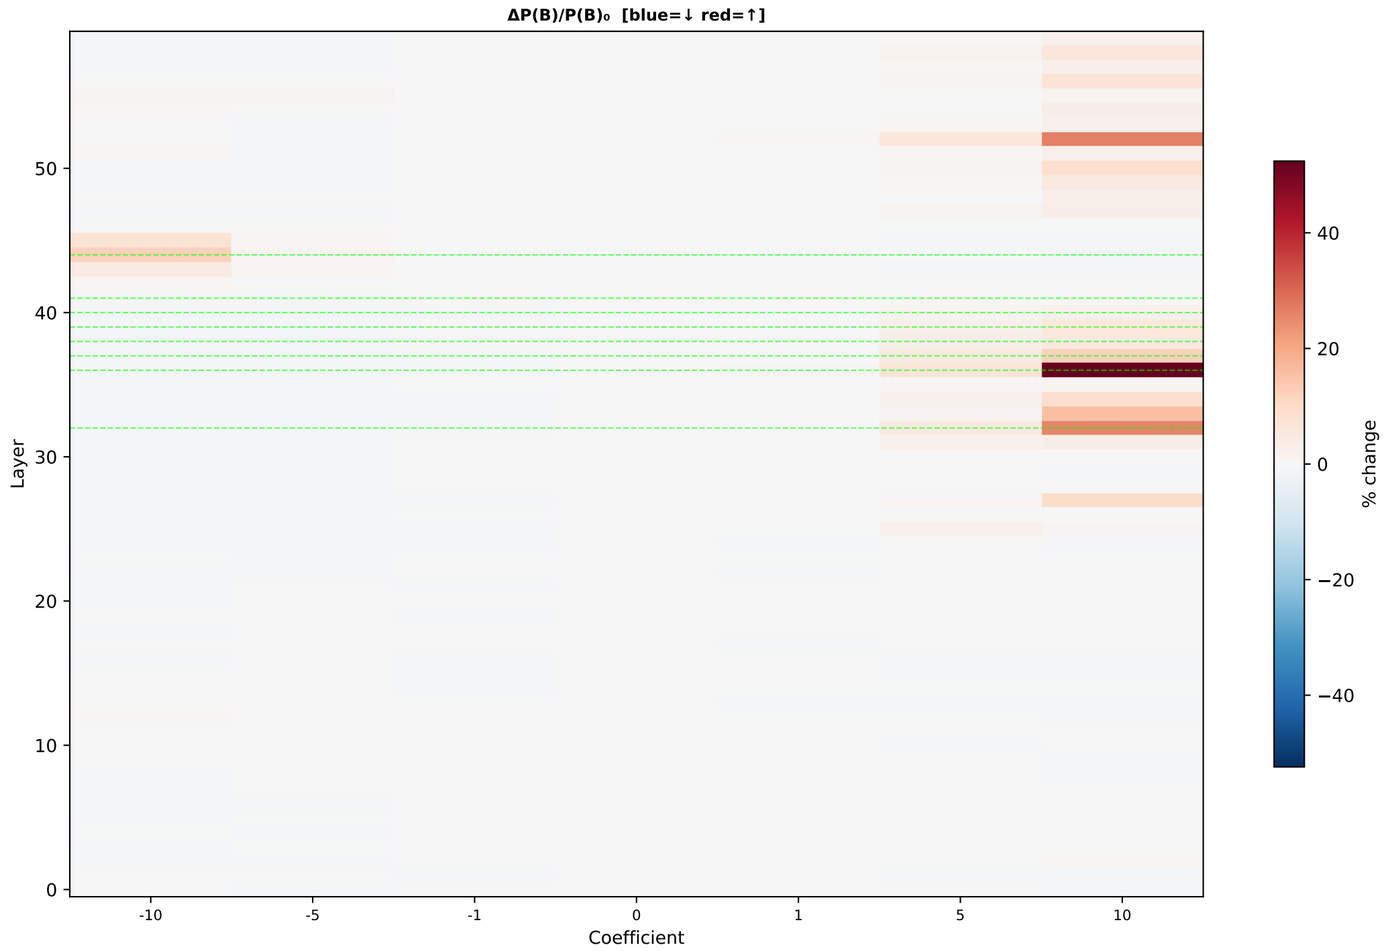


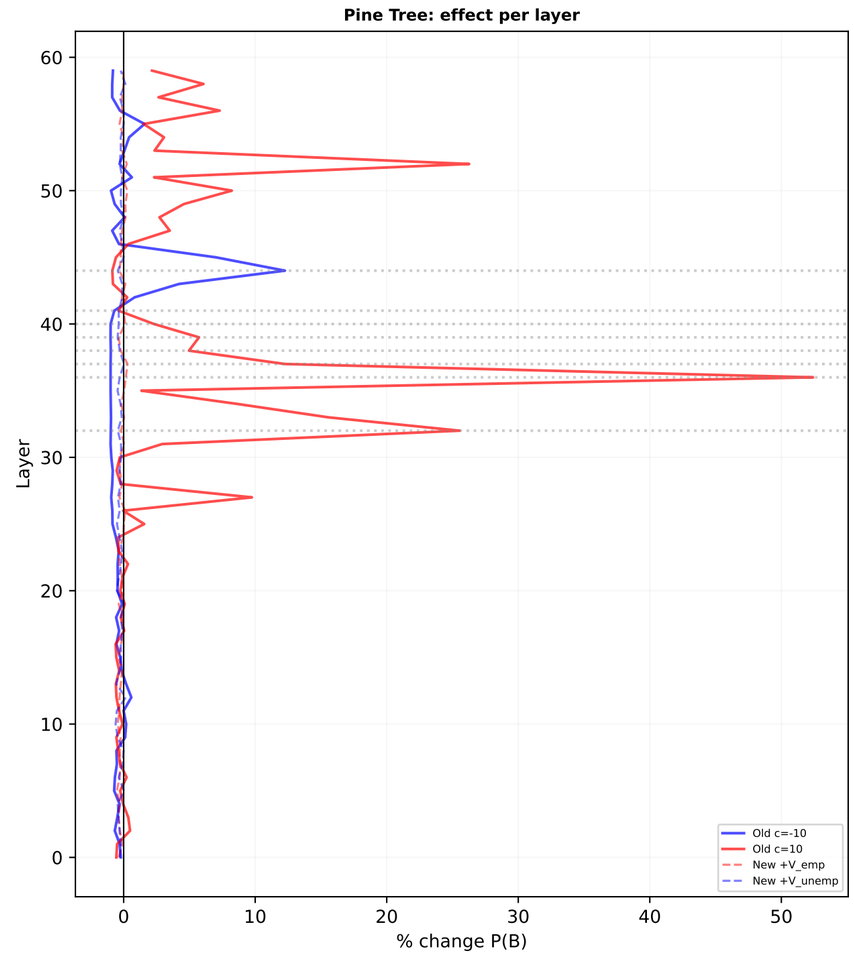


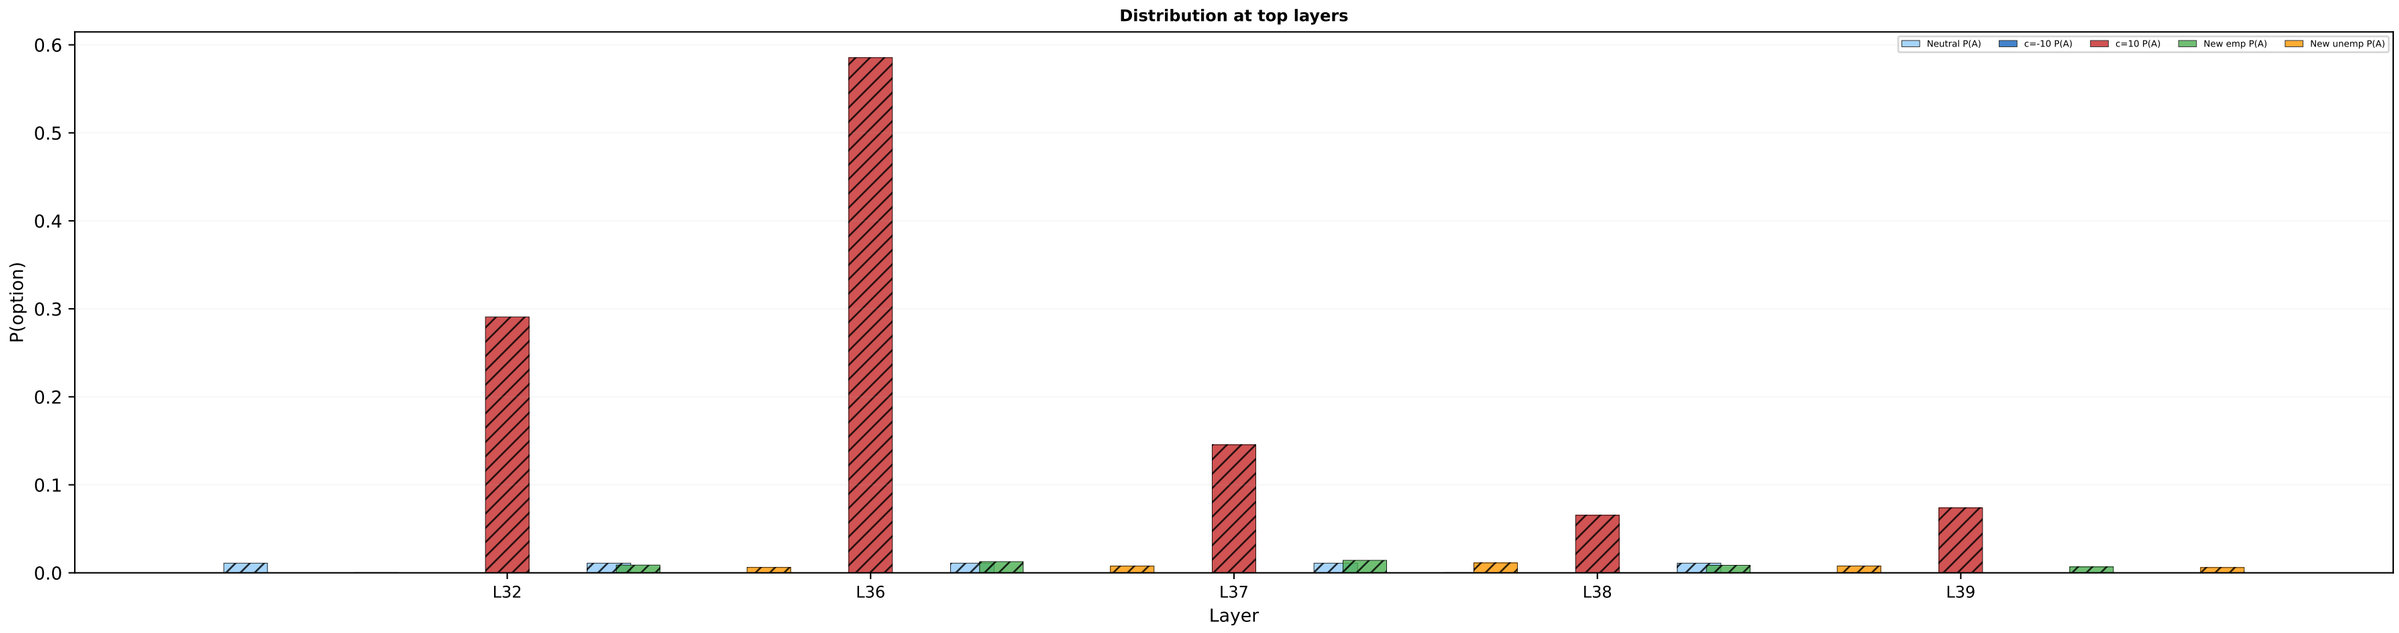


W15: 5 PM status | V7/cfg2

At 5:00 PM, an individual is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

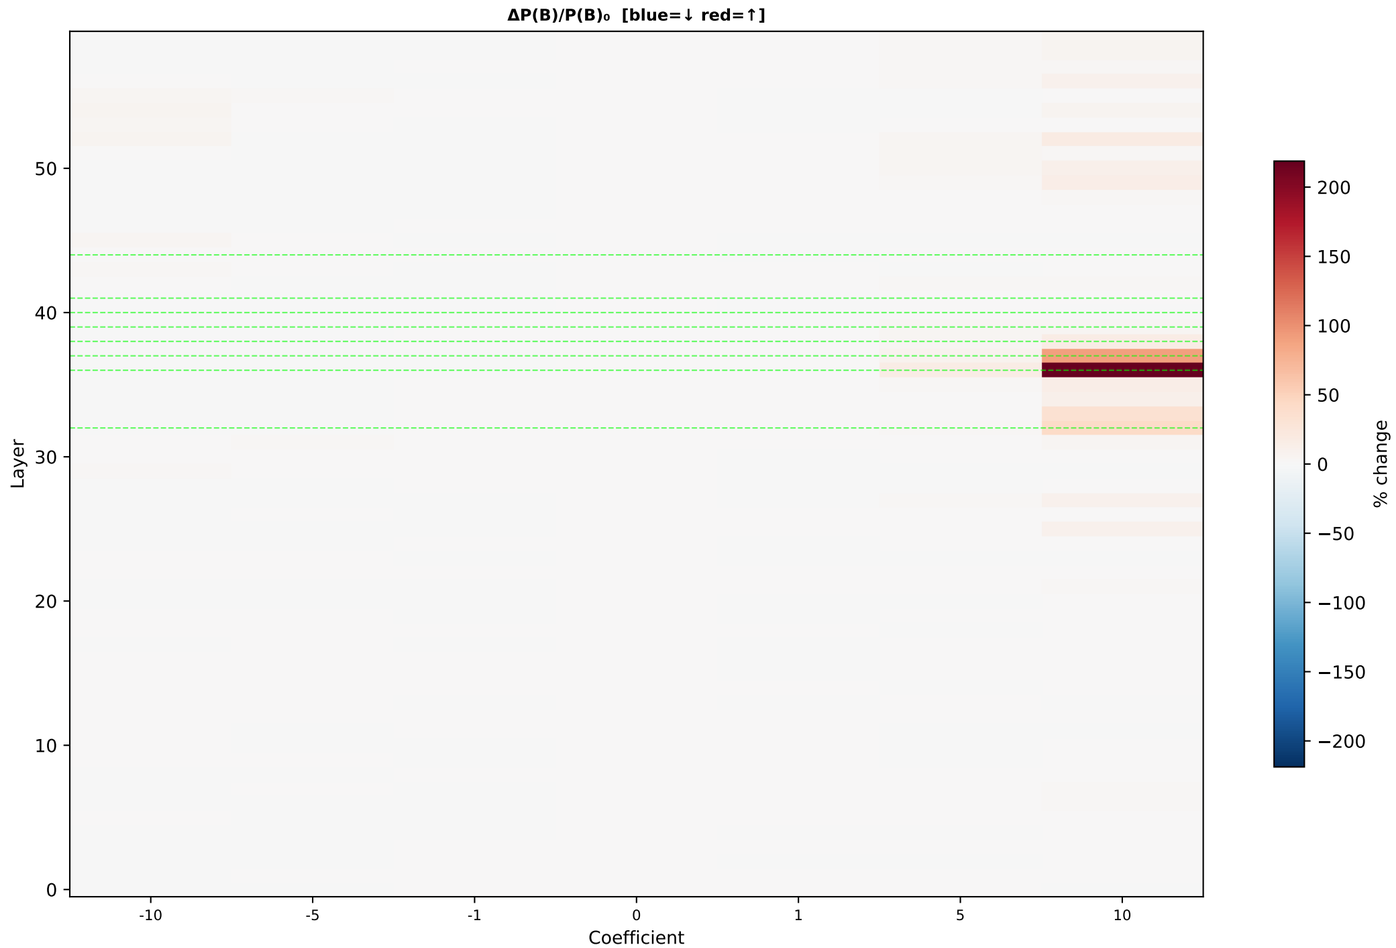


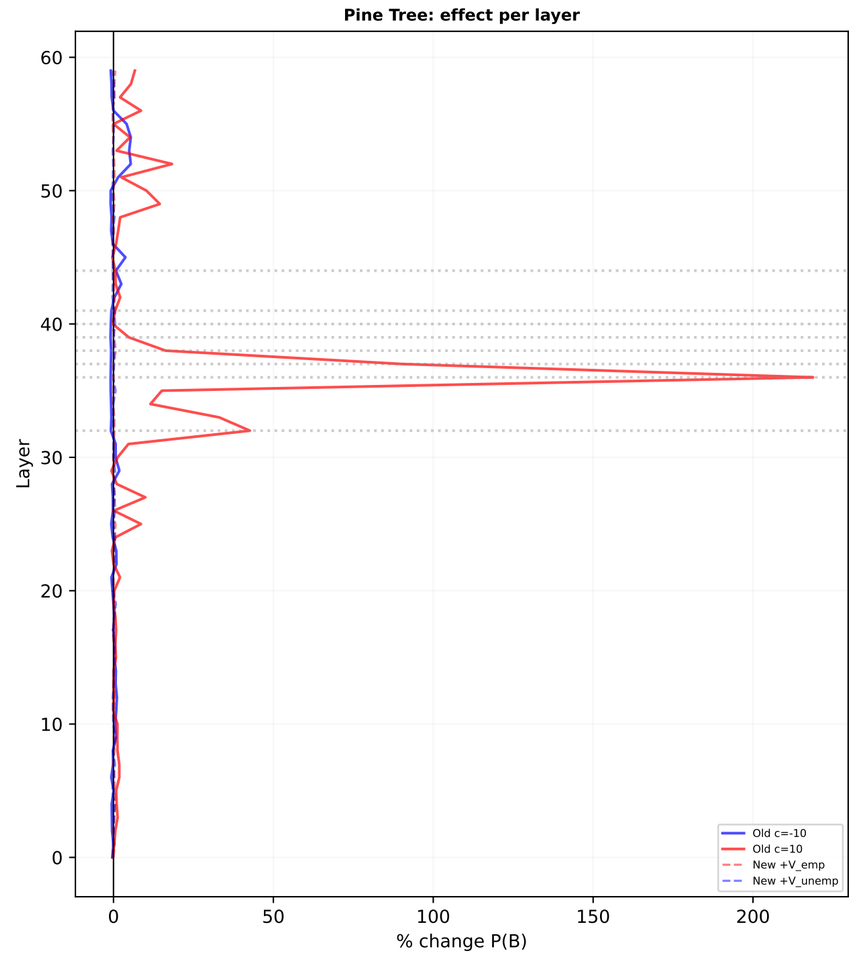


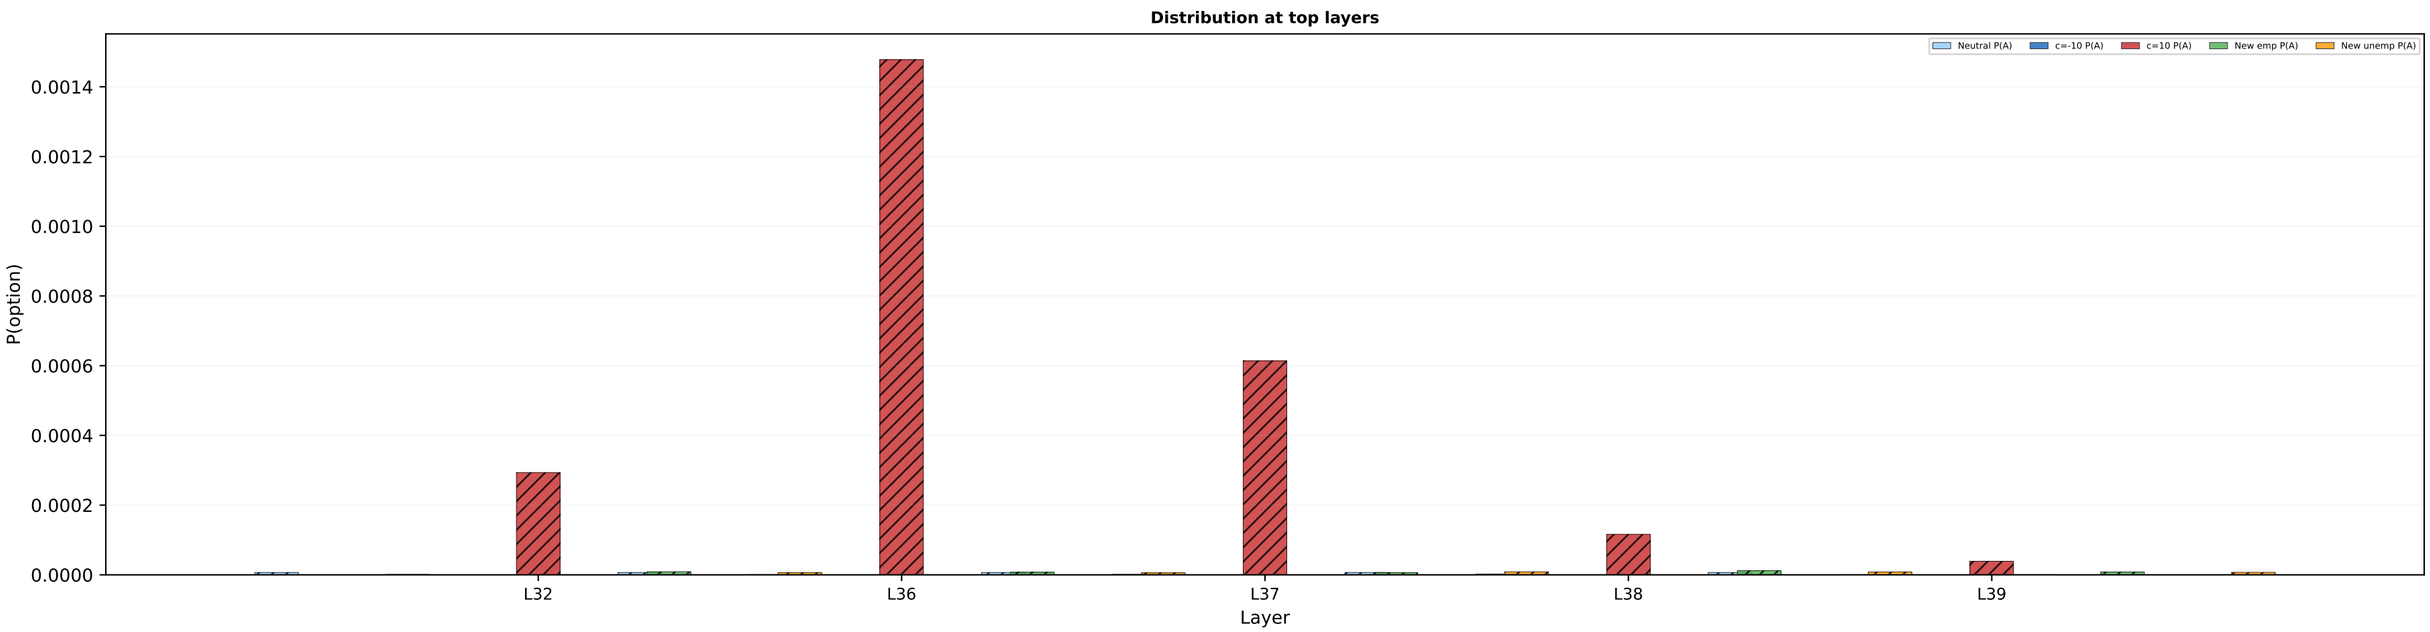


W16: 7 PM status | V7/cfg2

At 7:00 PM, an individual is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

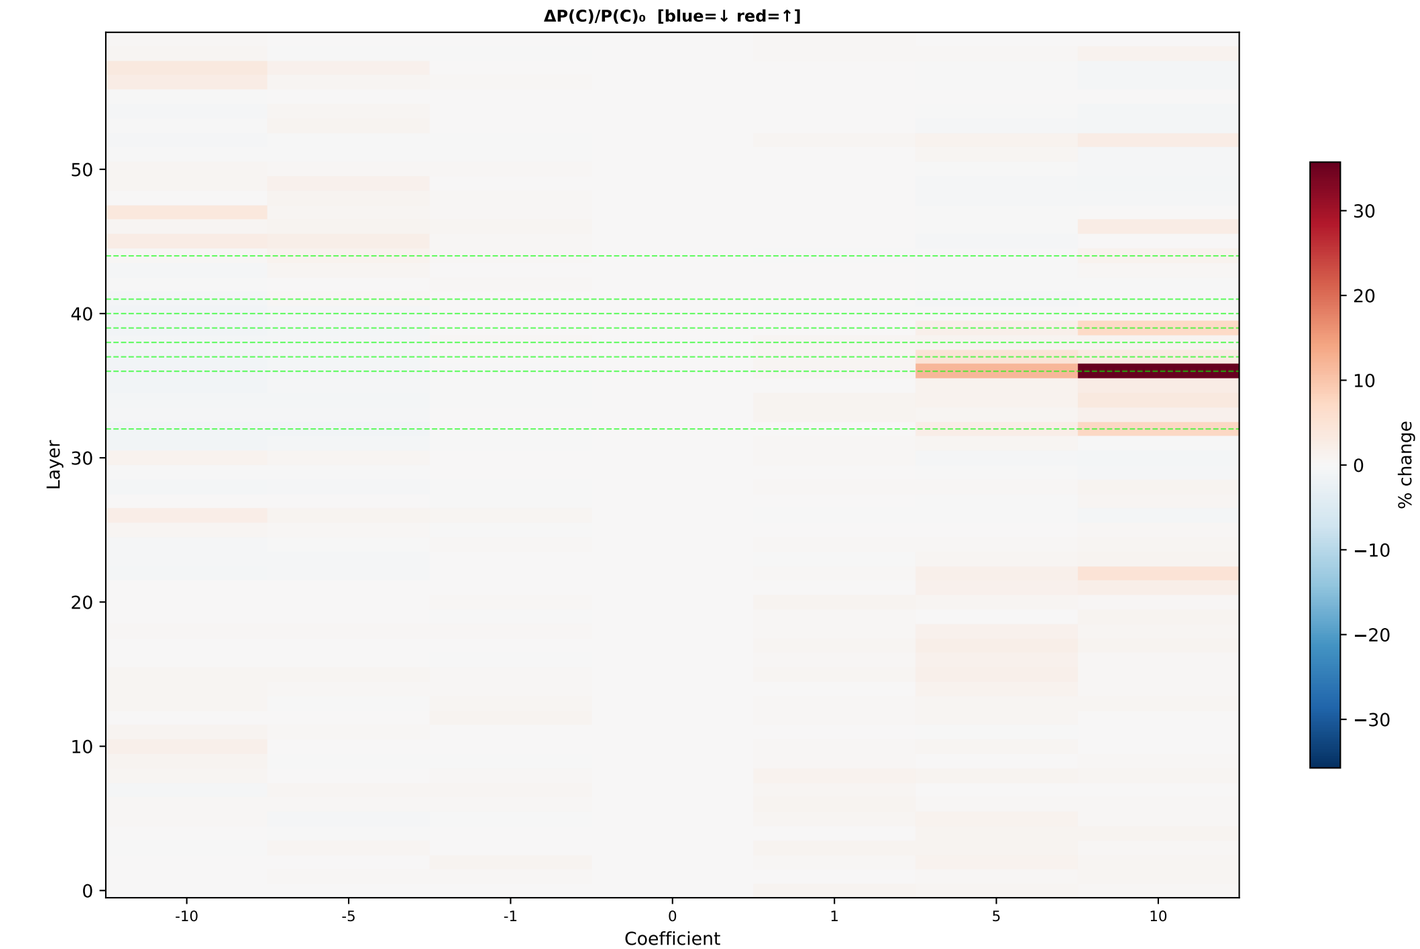


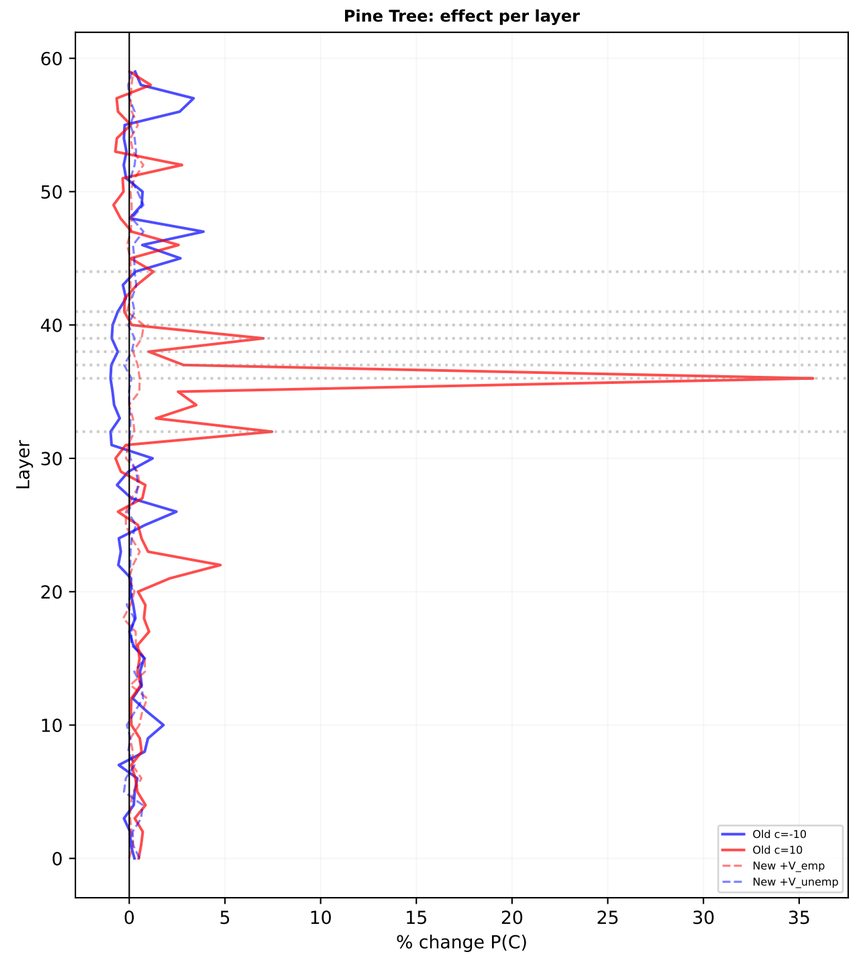


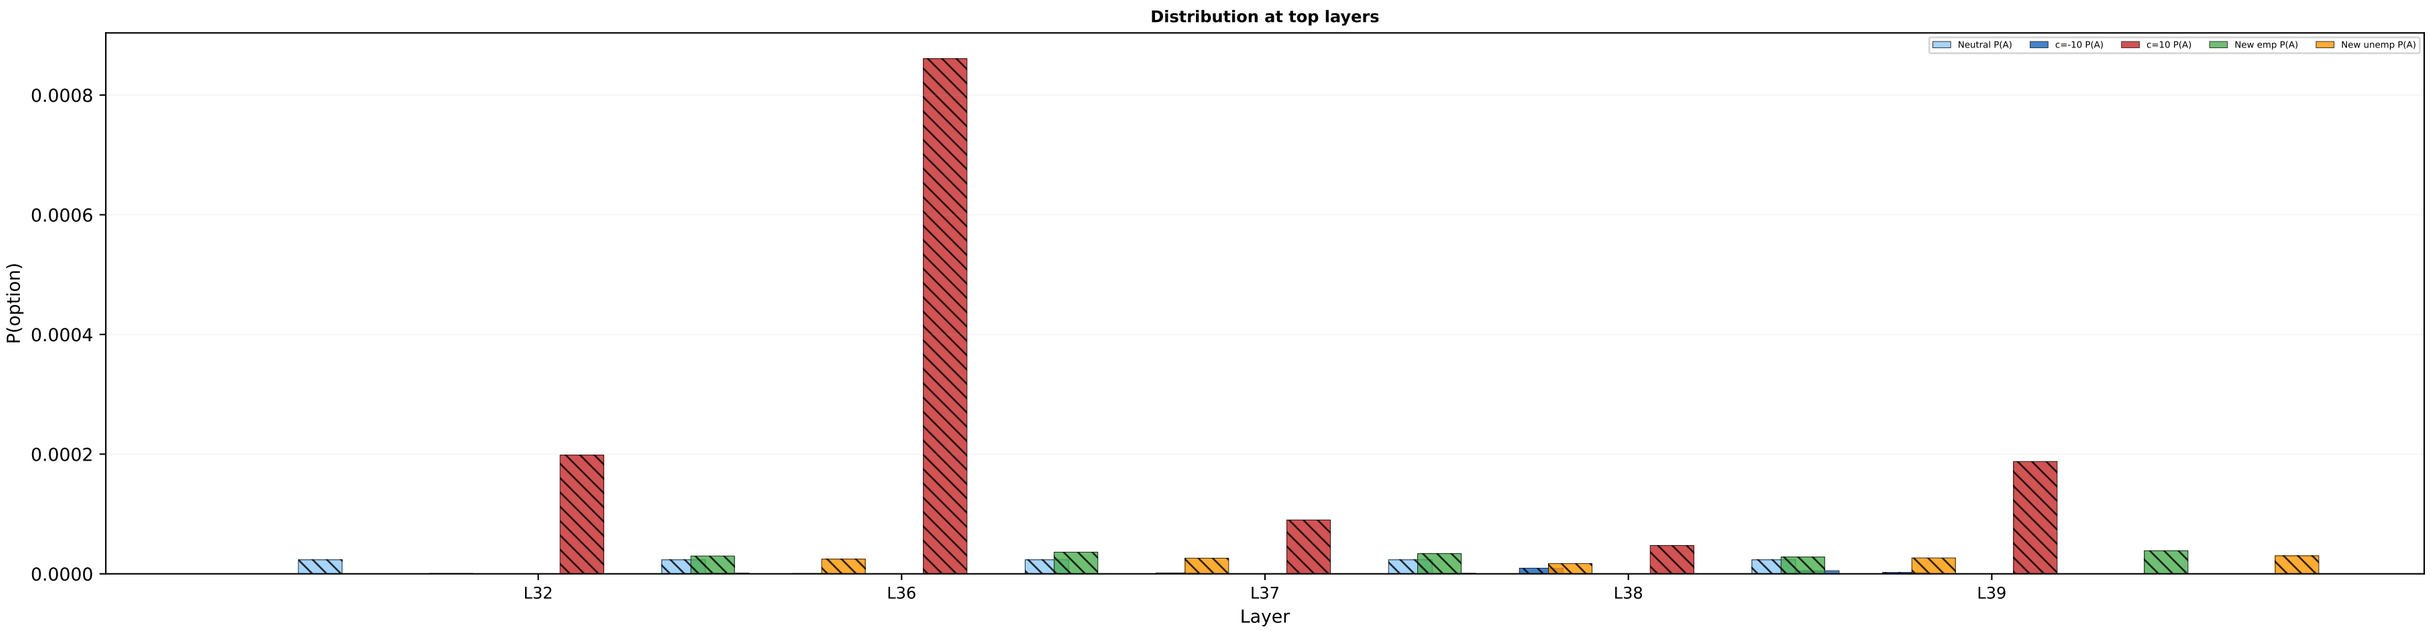


W17: Alarm clock usage | V7/cfg2

Does an individual use an alarm clock this morning? | (A) No, they wake up naturally | (B) Maybe, depending on plans | (C) Yes, set for a specific early time | Answer: (

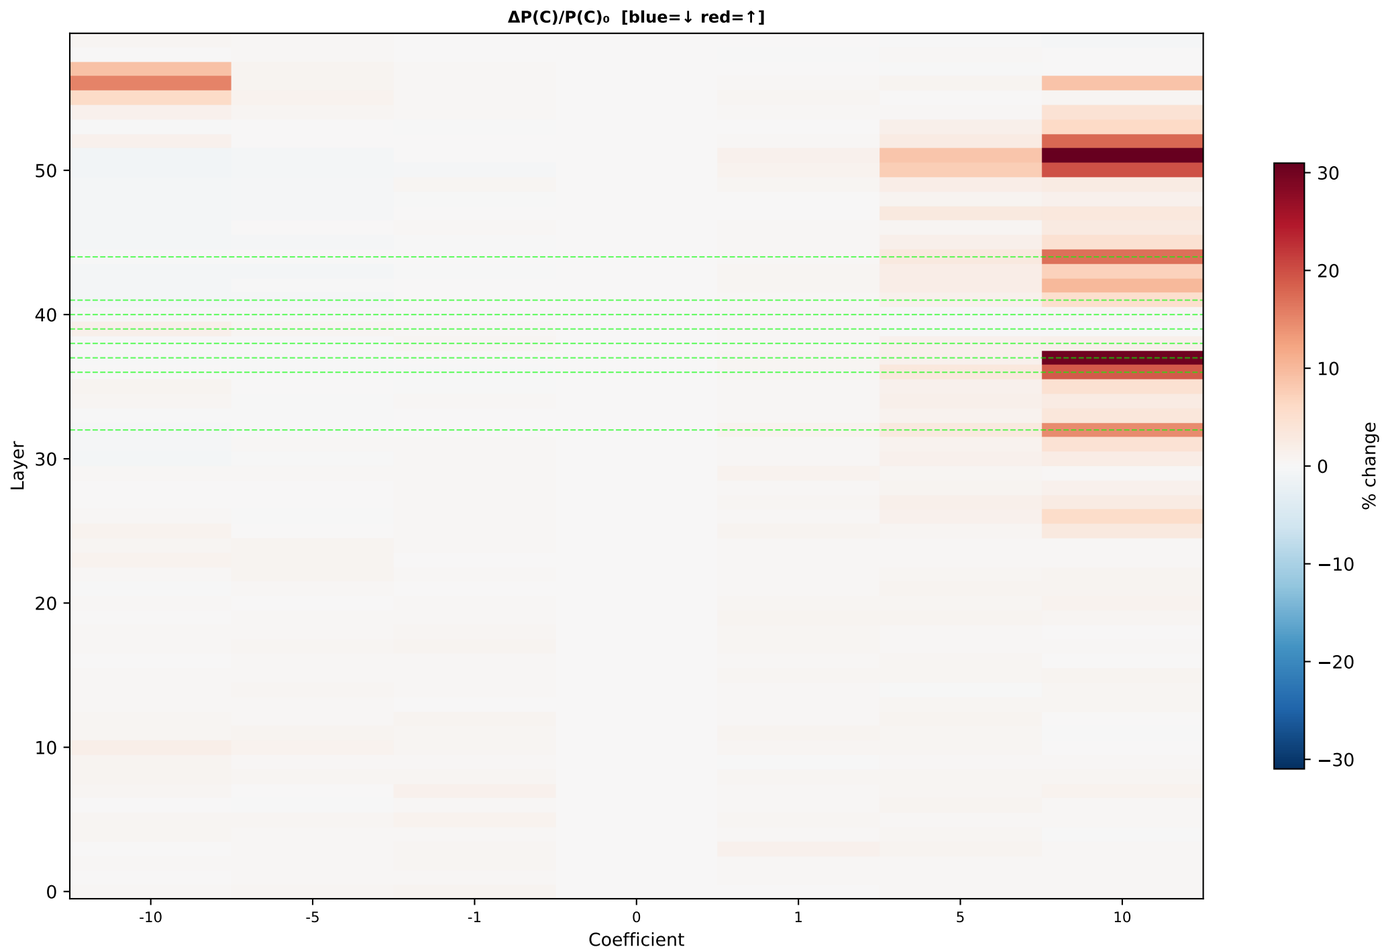


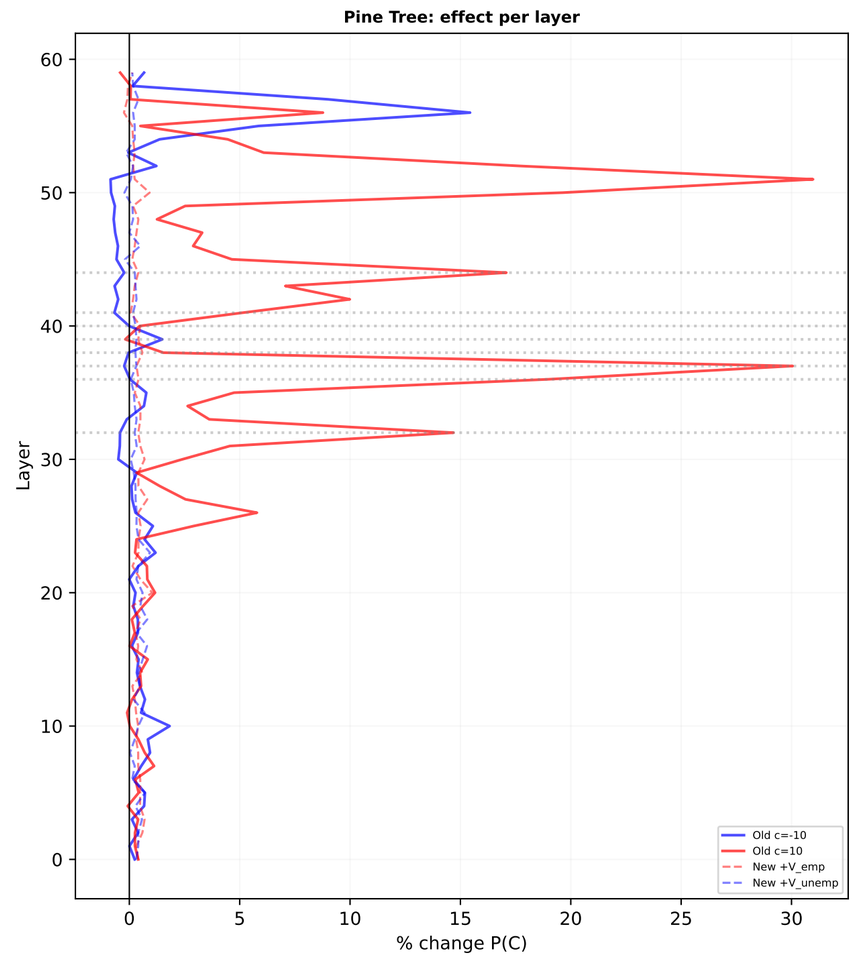


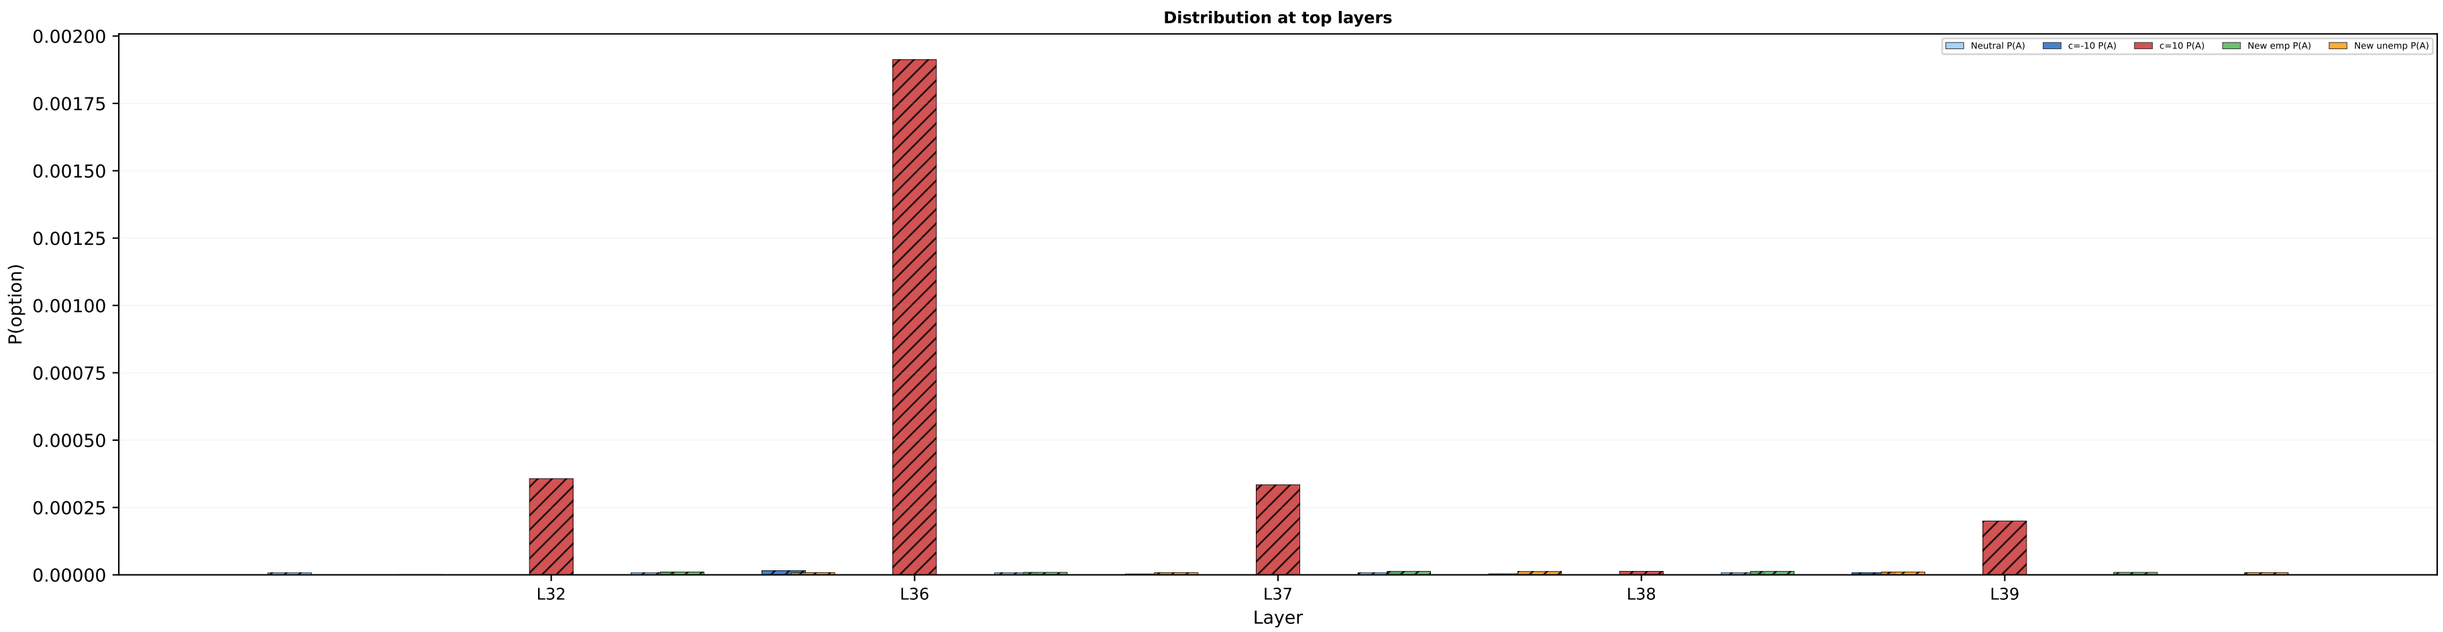


W18: Departure time consistency | V7/cfg2

Does an individual leave home at the same time today as they did the same day last week? | (A) No, the departure time is very different | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

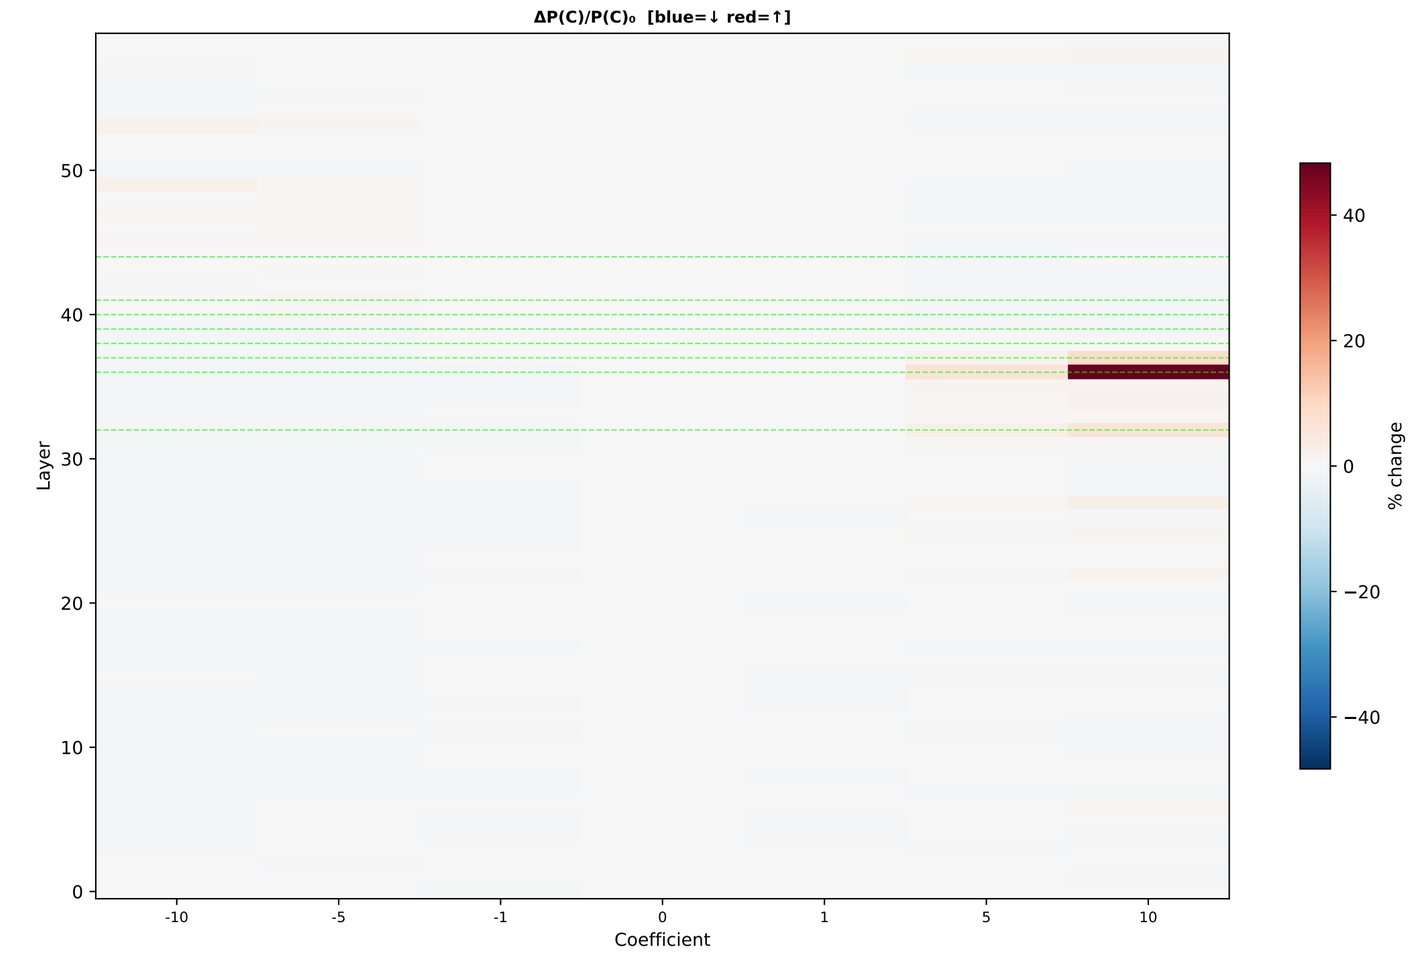


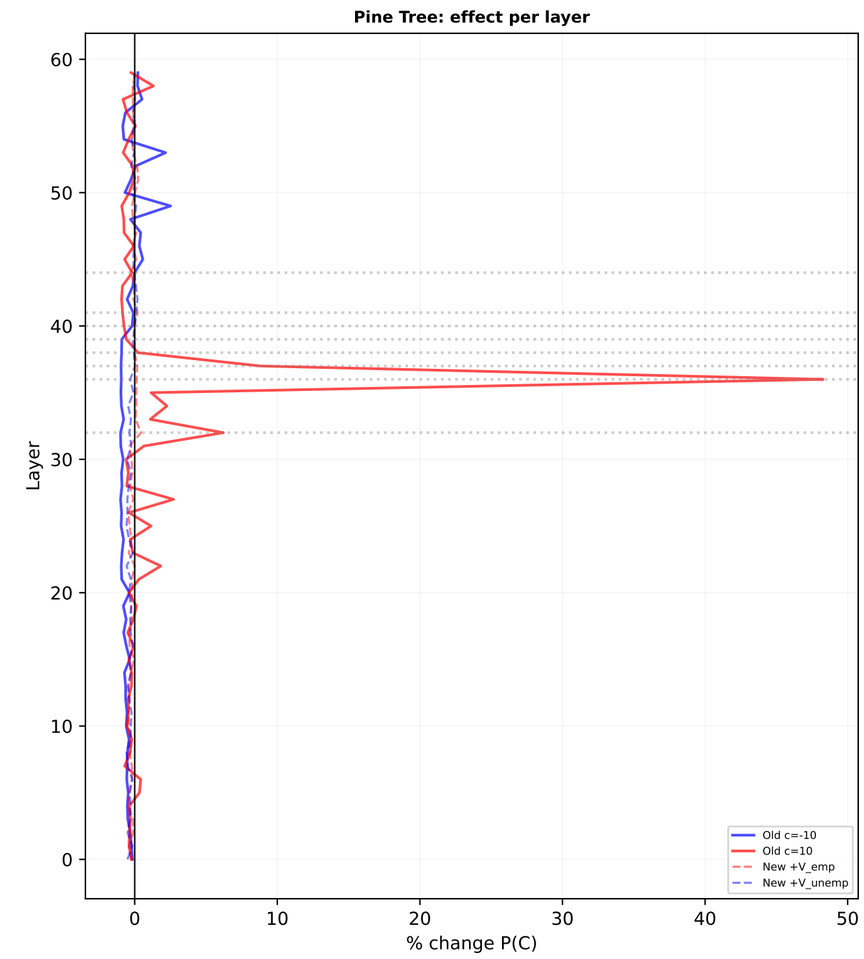


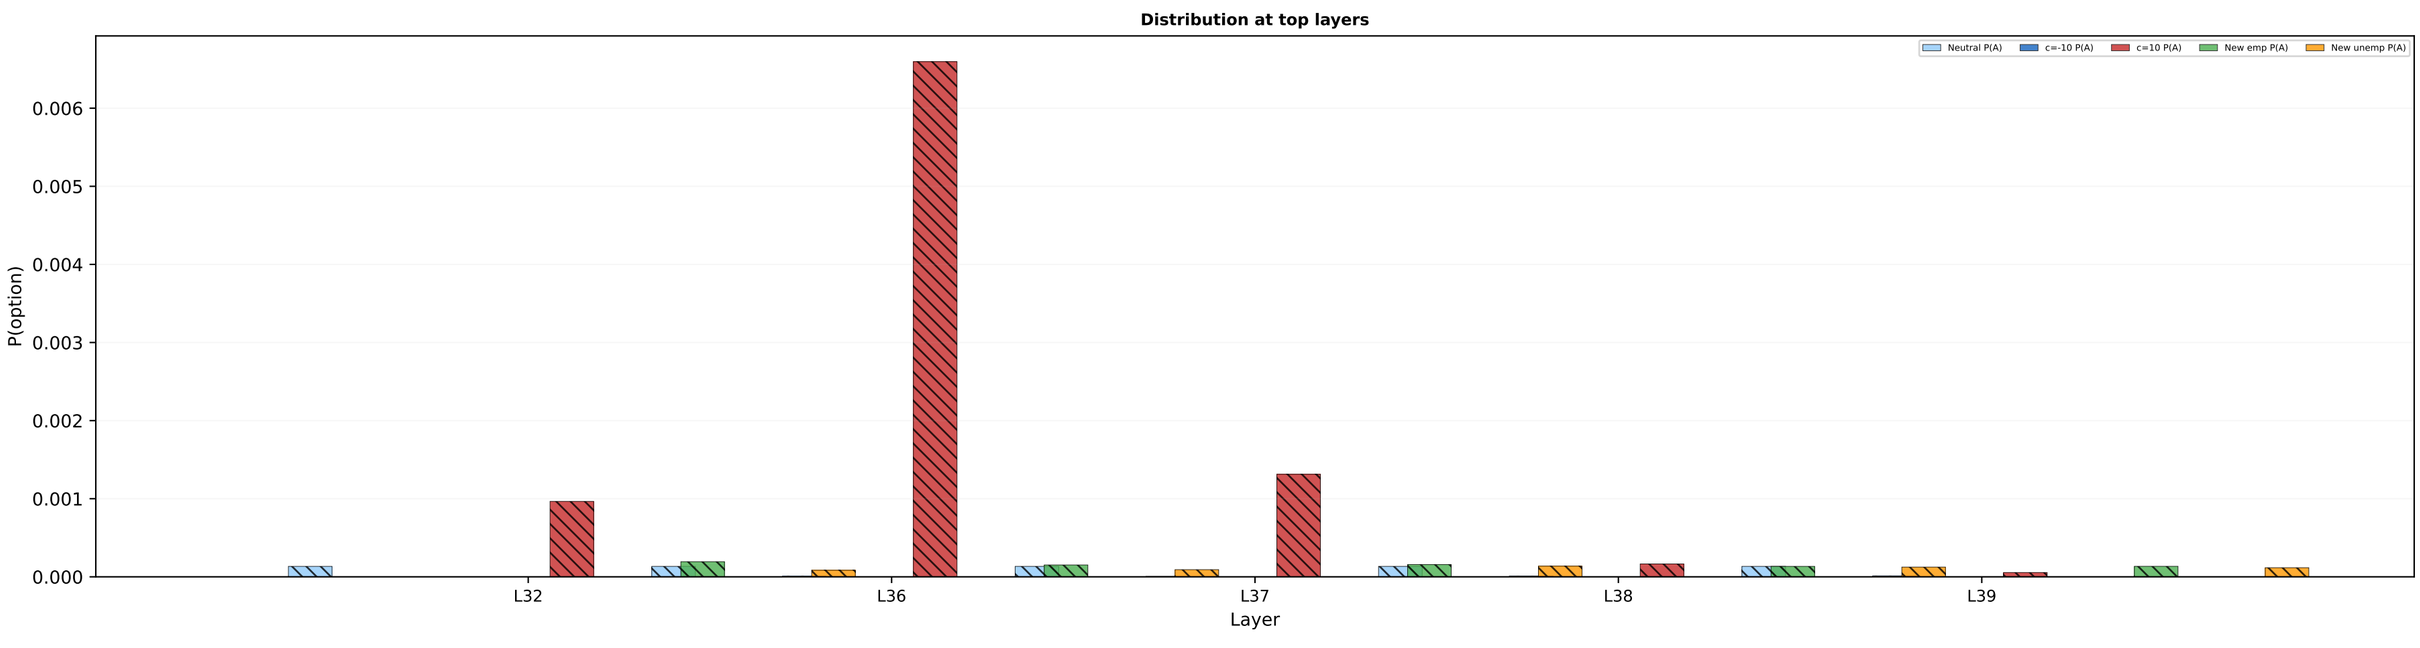


W19: Noon location consistency | V7/cfg2

Is an individual at the same non-home location at noon today as they were at noon last week? | (A) No, they are at home today | (B) They are out, but at a different location | (C) Yes, at the same location | Answer: (

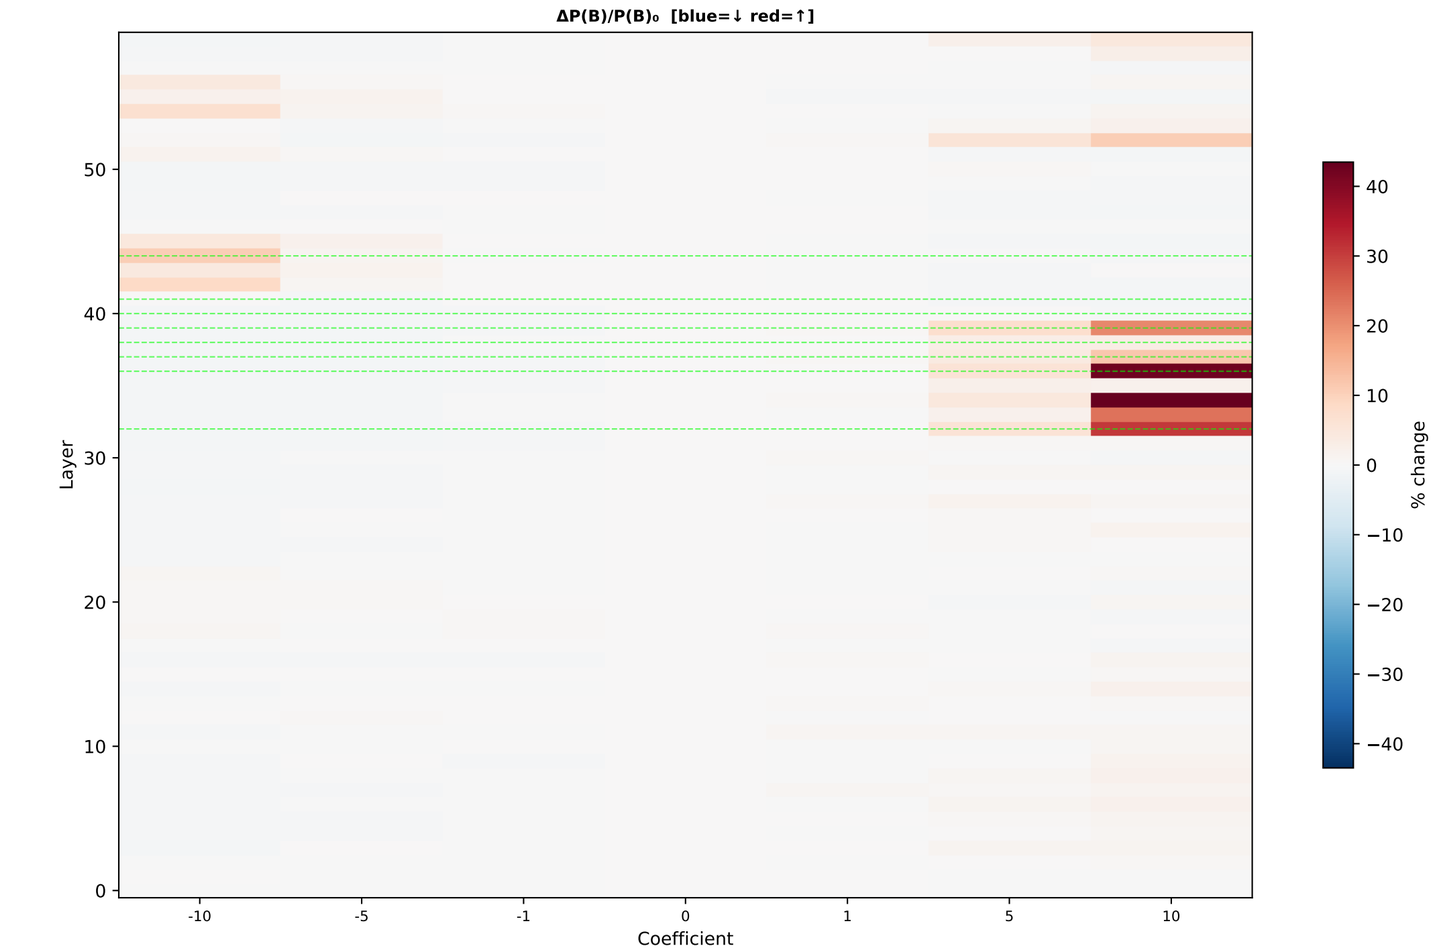


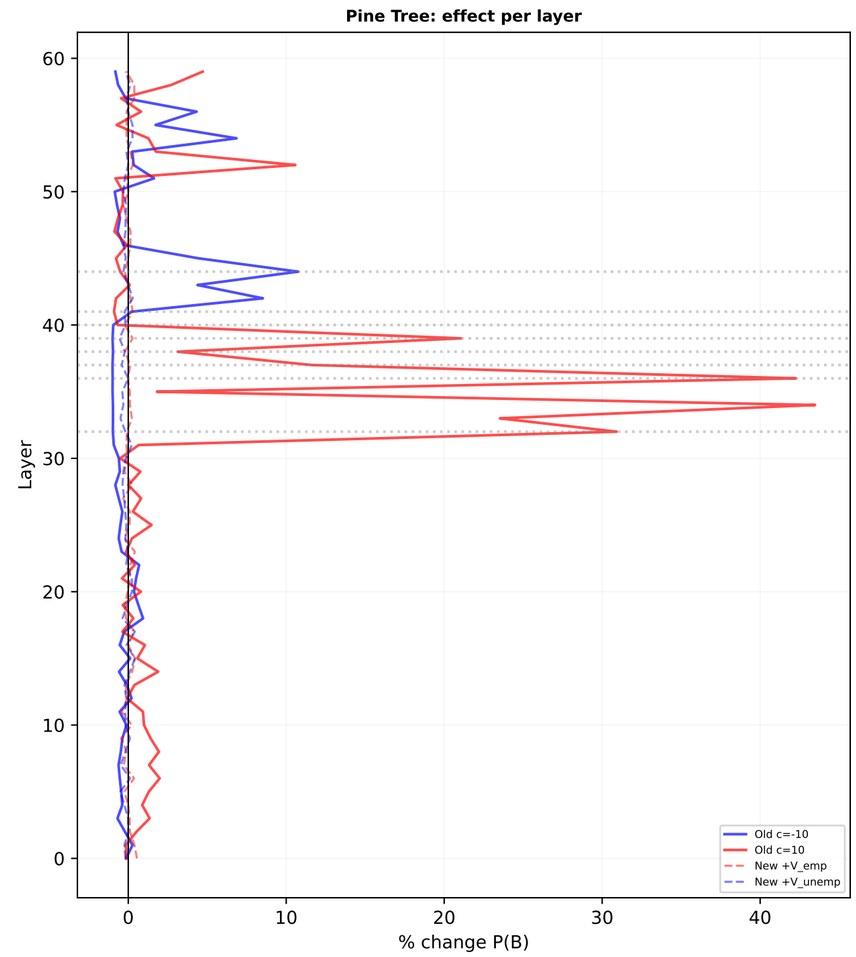


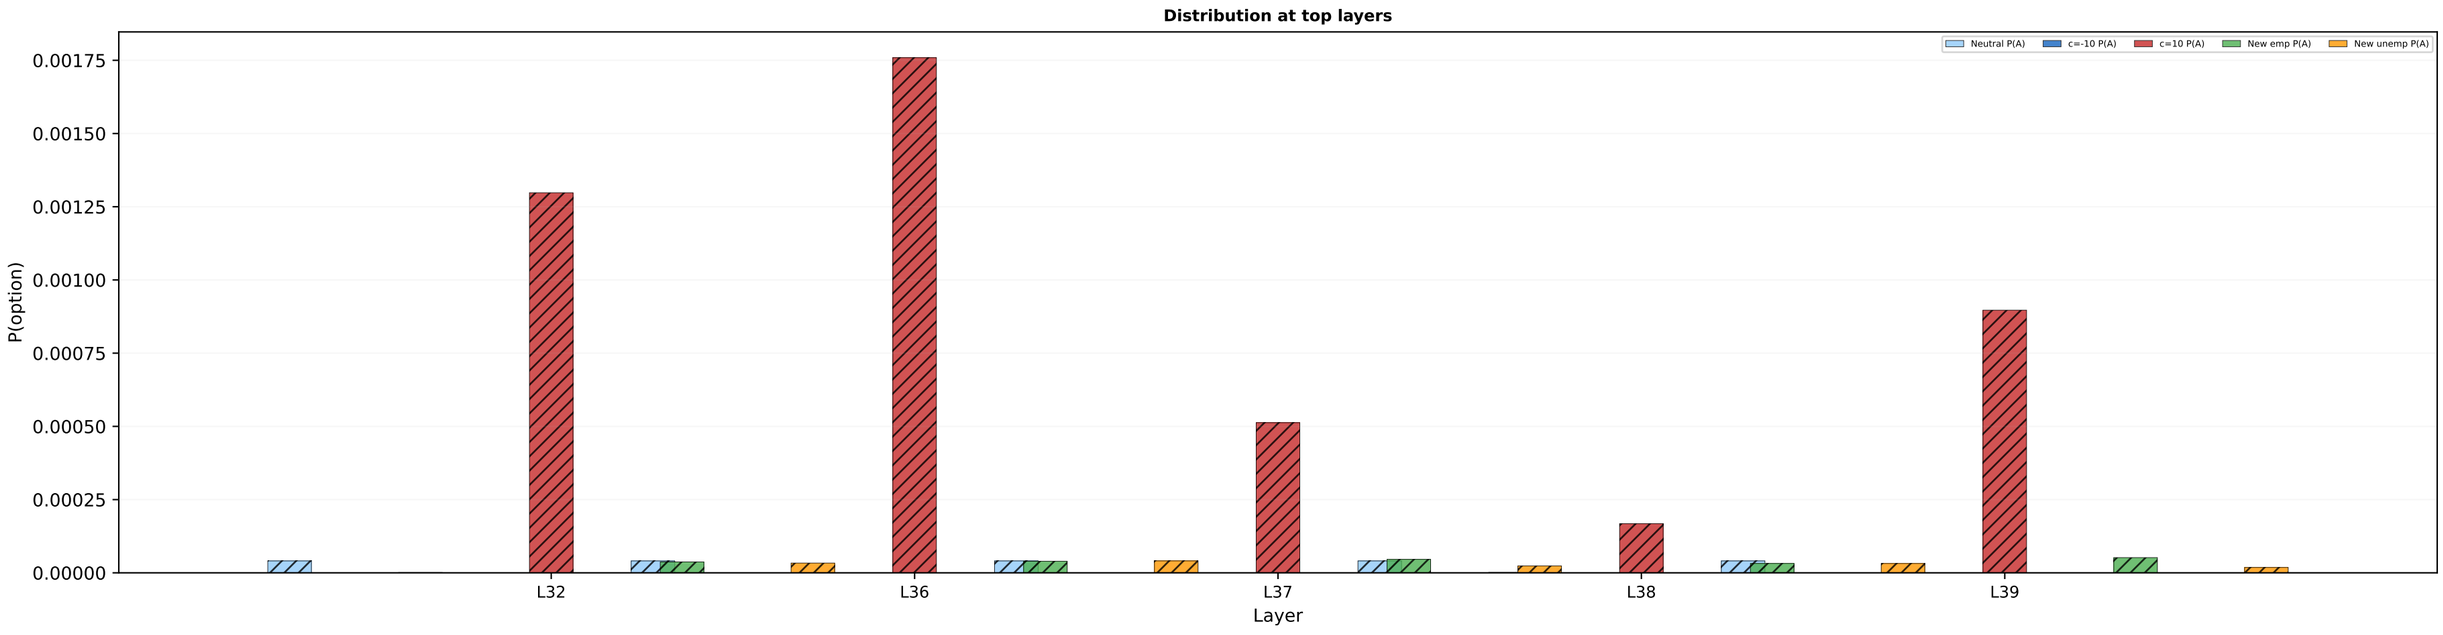


W20: 1 PM location | V7/cfg2

If an individual is asked at 1 PM: "Where are you right now?" | The most likely answer is: | (A) "I am at home." | (B) "I am at a regular place I go to most days." | (C) "I am out, but somewhere different from usual." | Answer: (

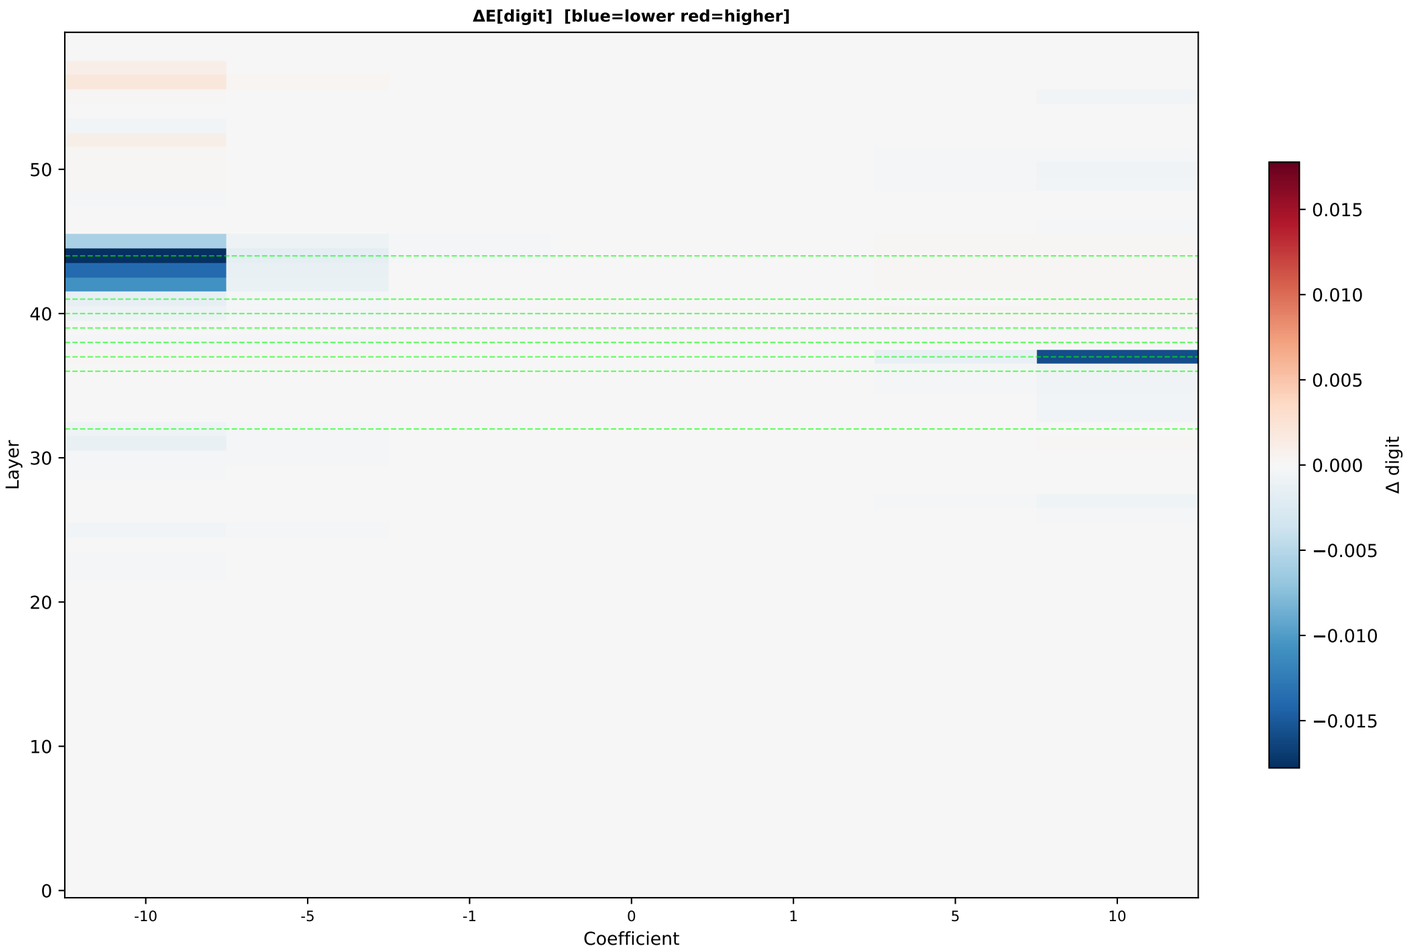


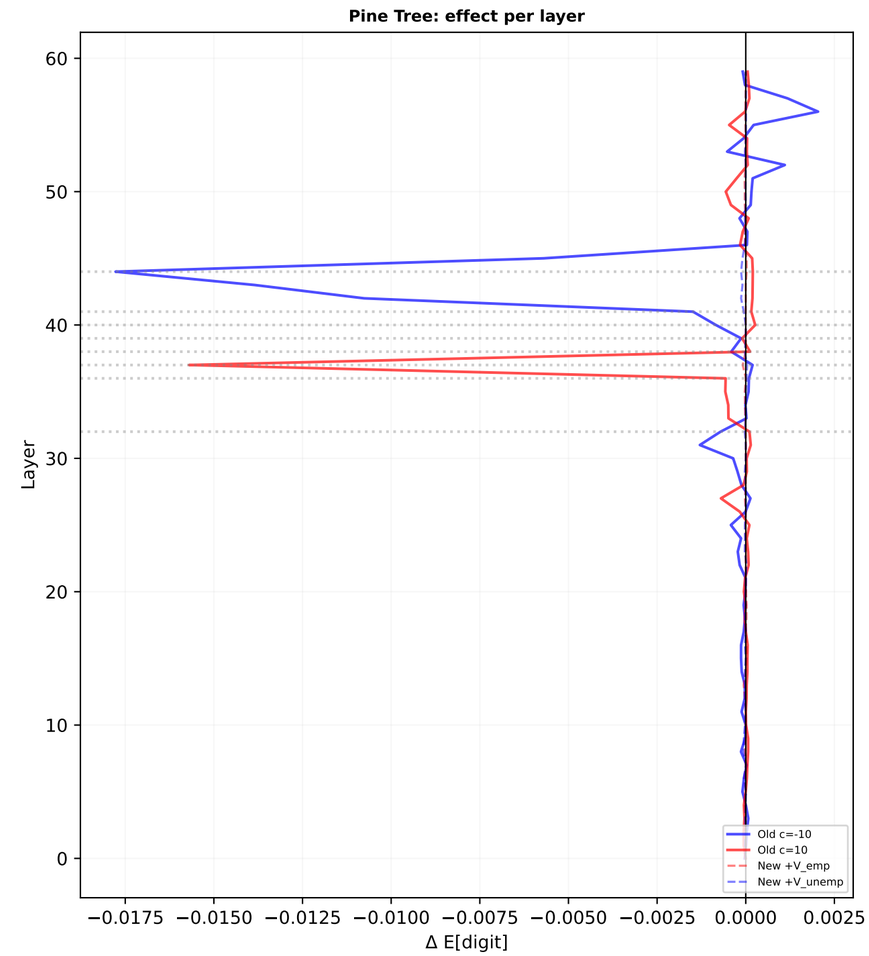


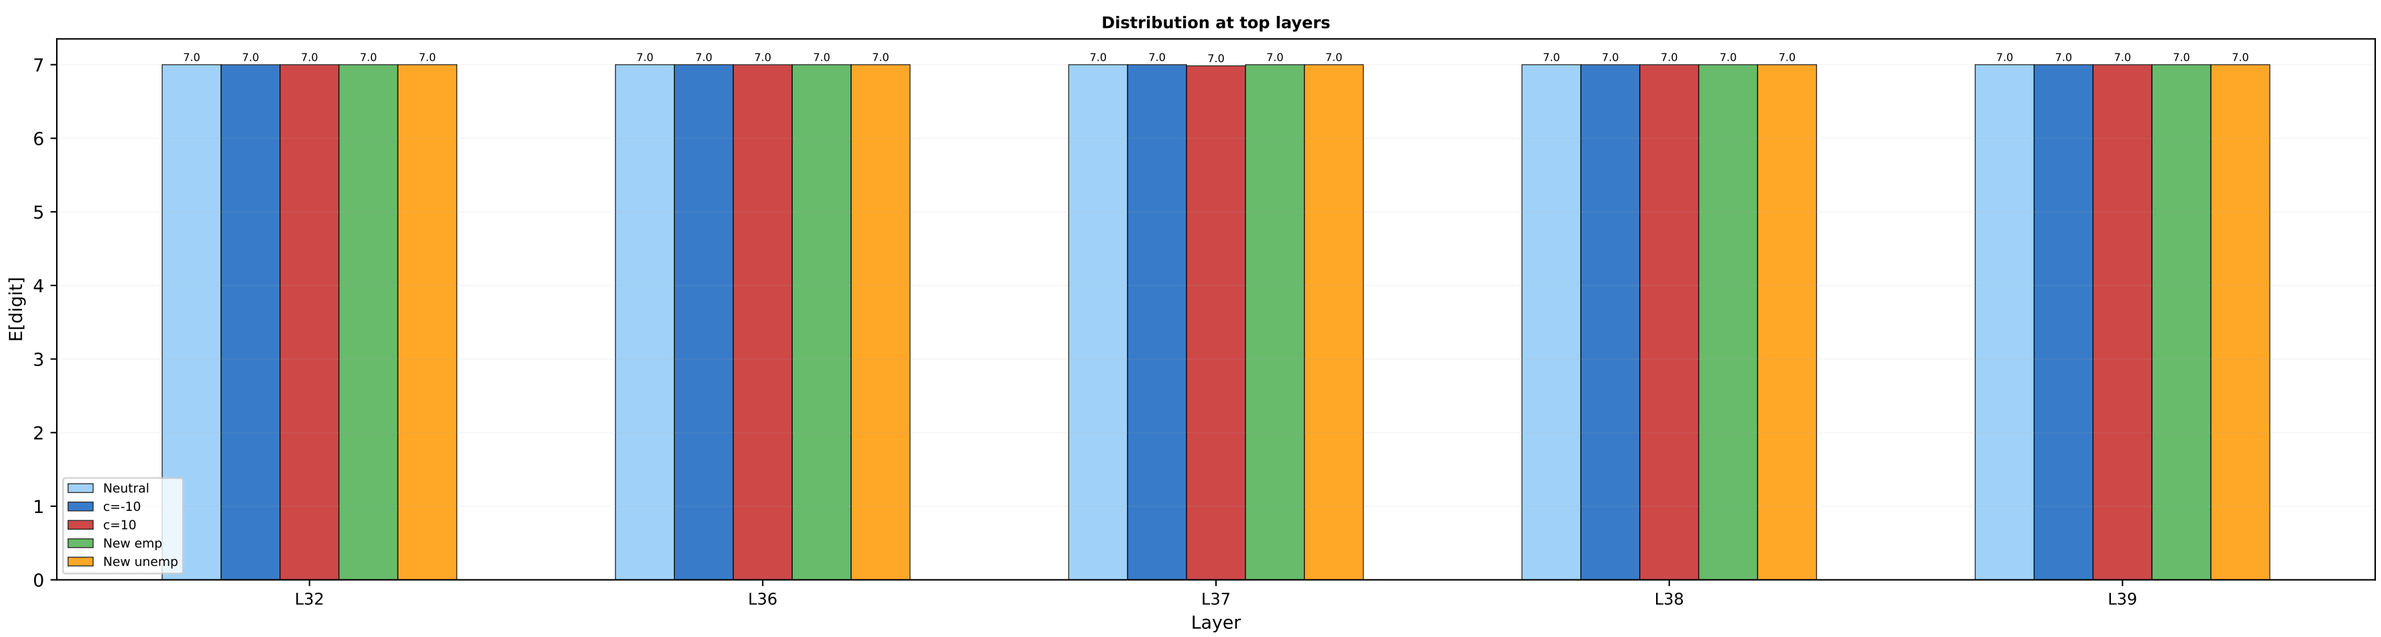


Complete with a single number only. | An individual wakes up at approximately ___:00 AM. |

W1: Wake-up hour | V7/cfg4

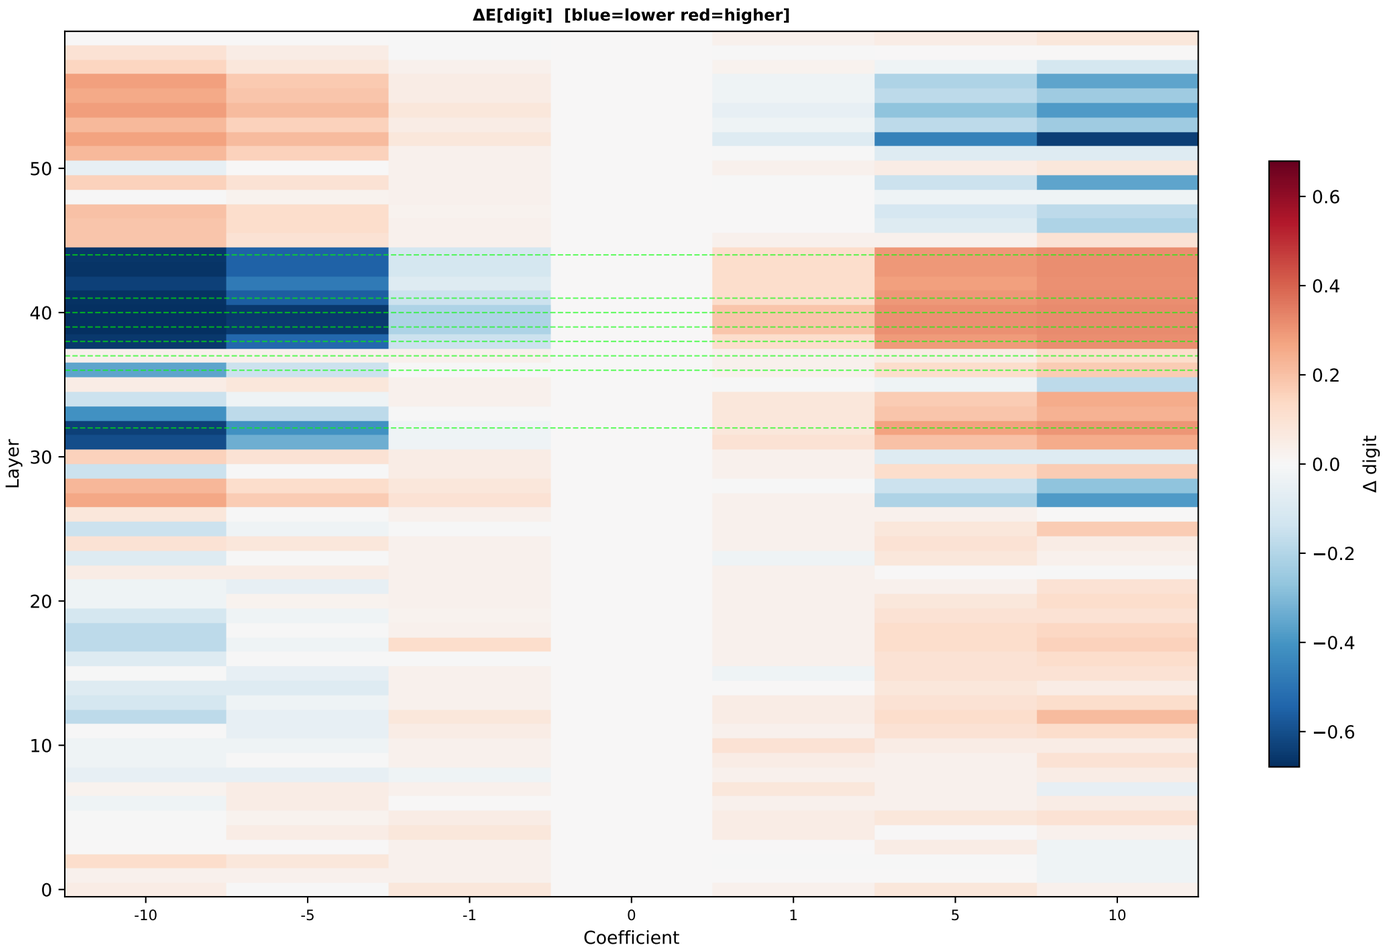


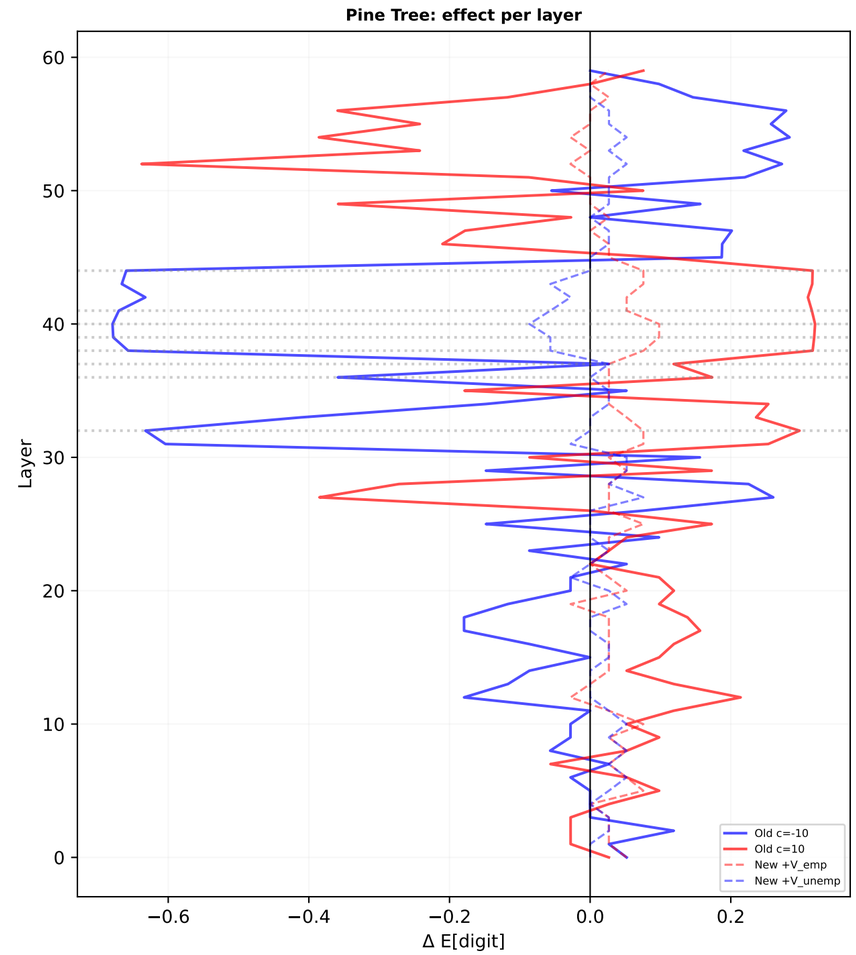


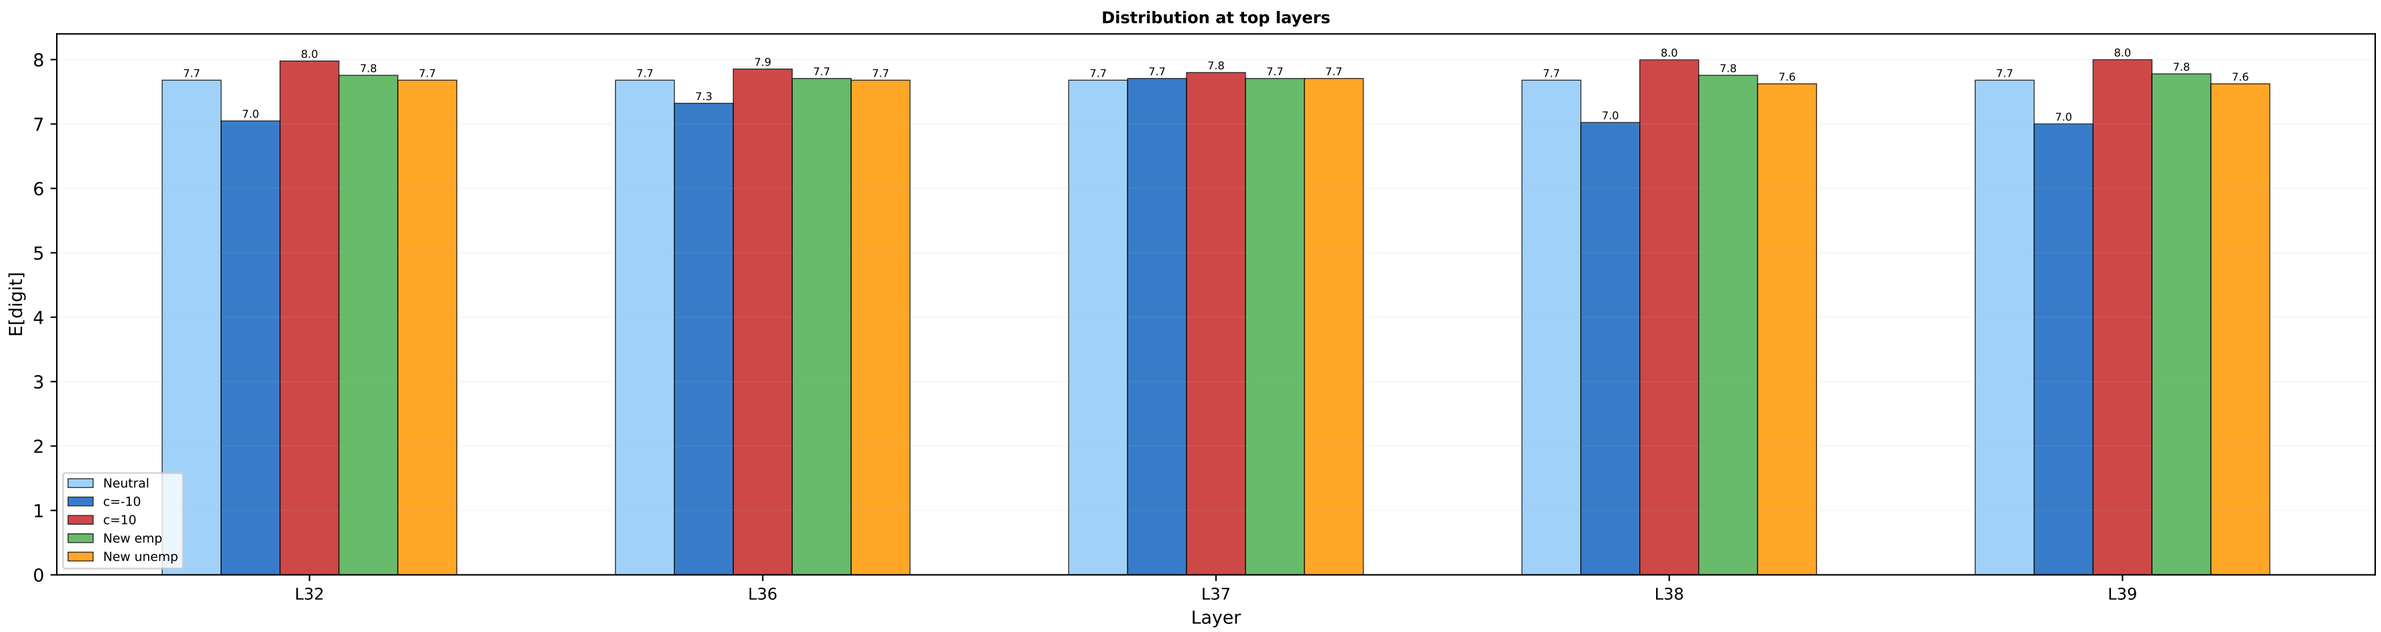


Complete with a single number only. | An individual leaves home at approximately ___:00 AM. |

W2: Leave-home hour | V7/cfg4

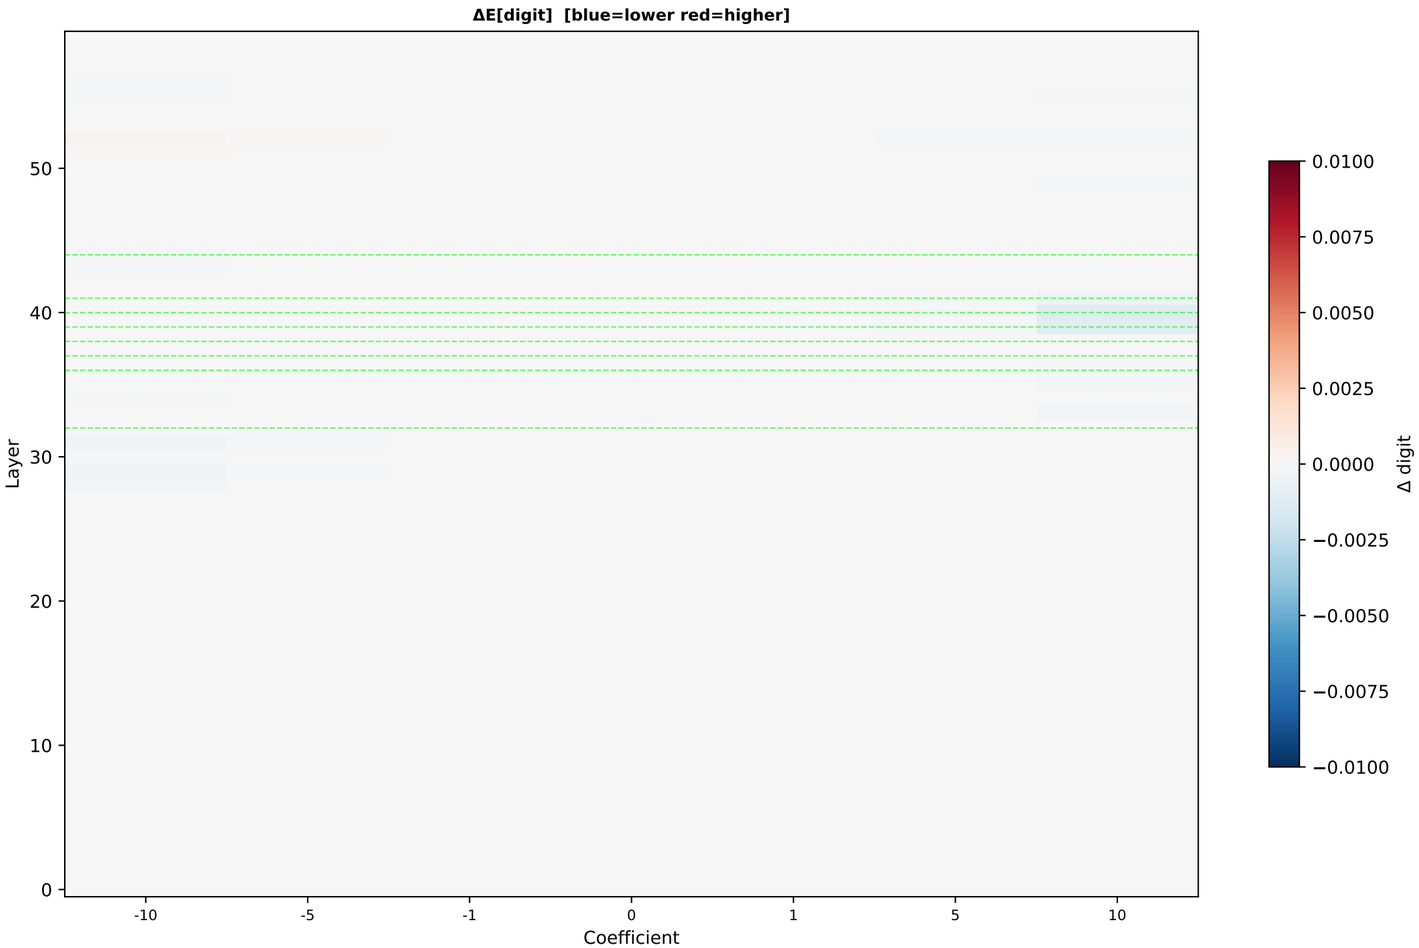


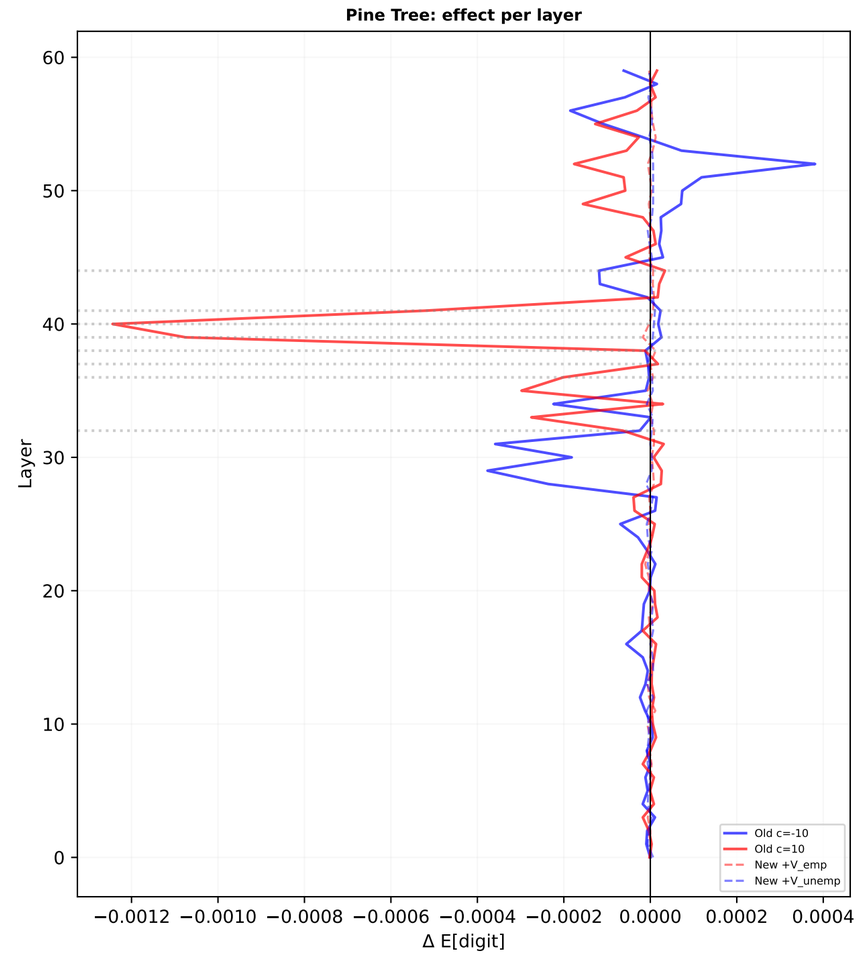


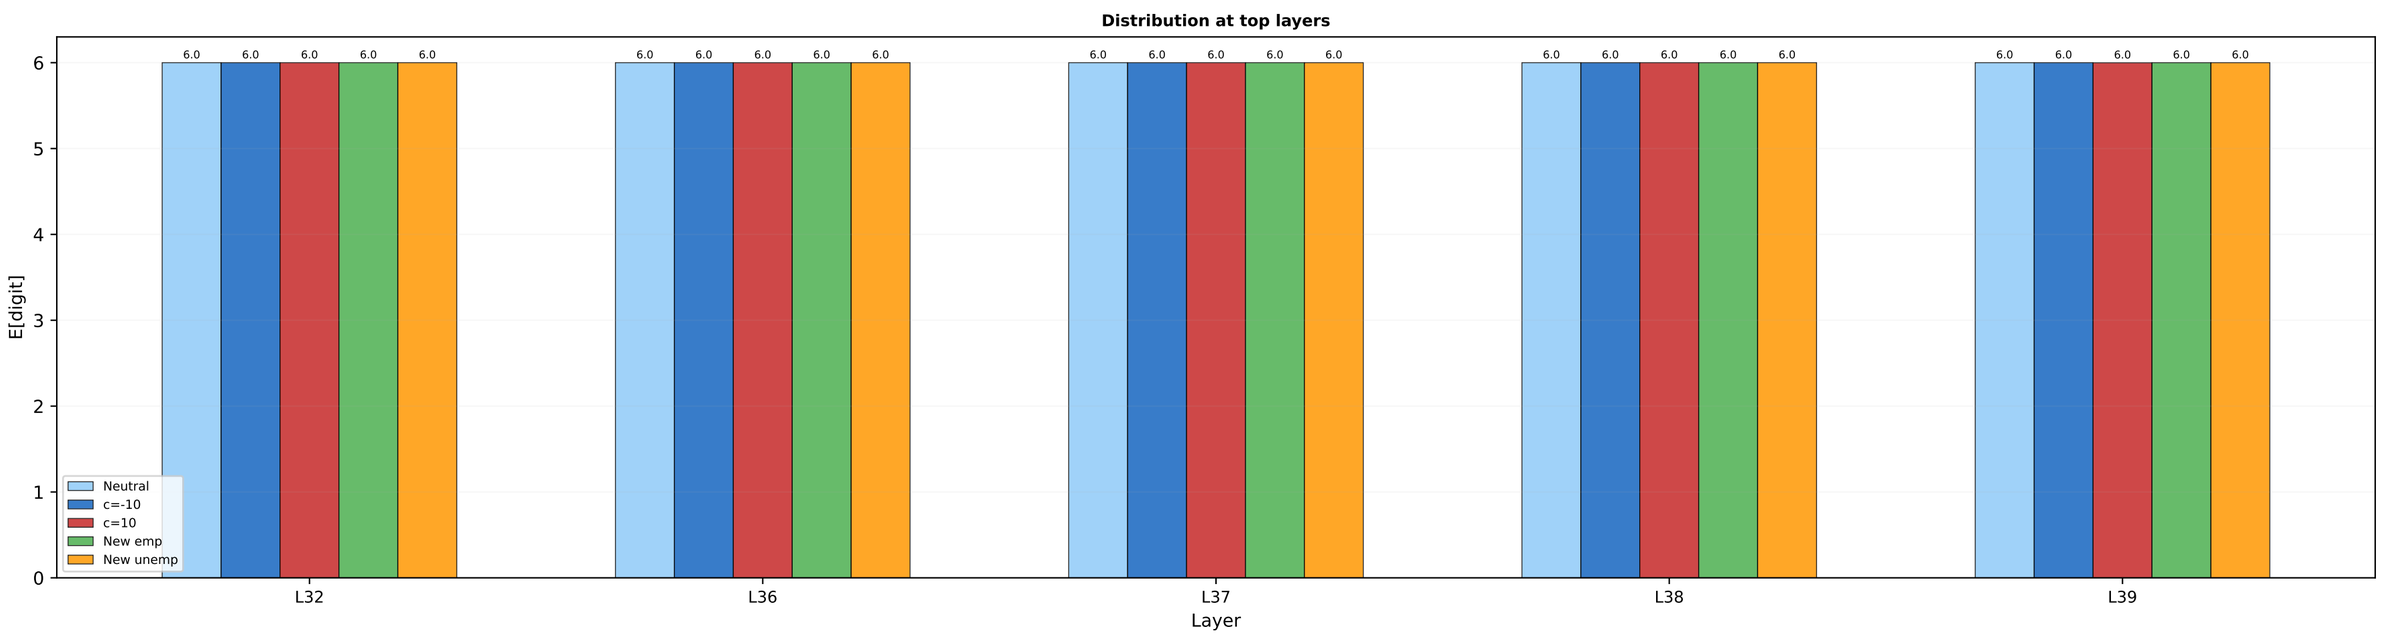


Complete with a single number only. | An individual arrives home at approximately ___:00 PM. |

W3: Arrive-home hour | V7/cfg4

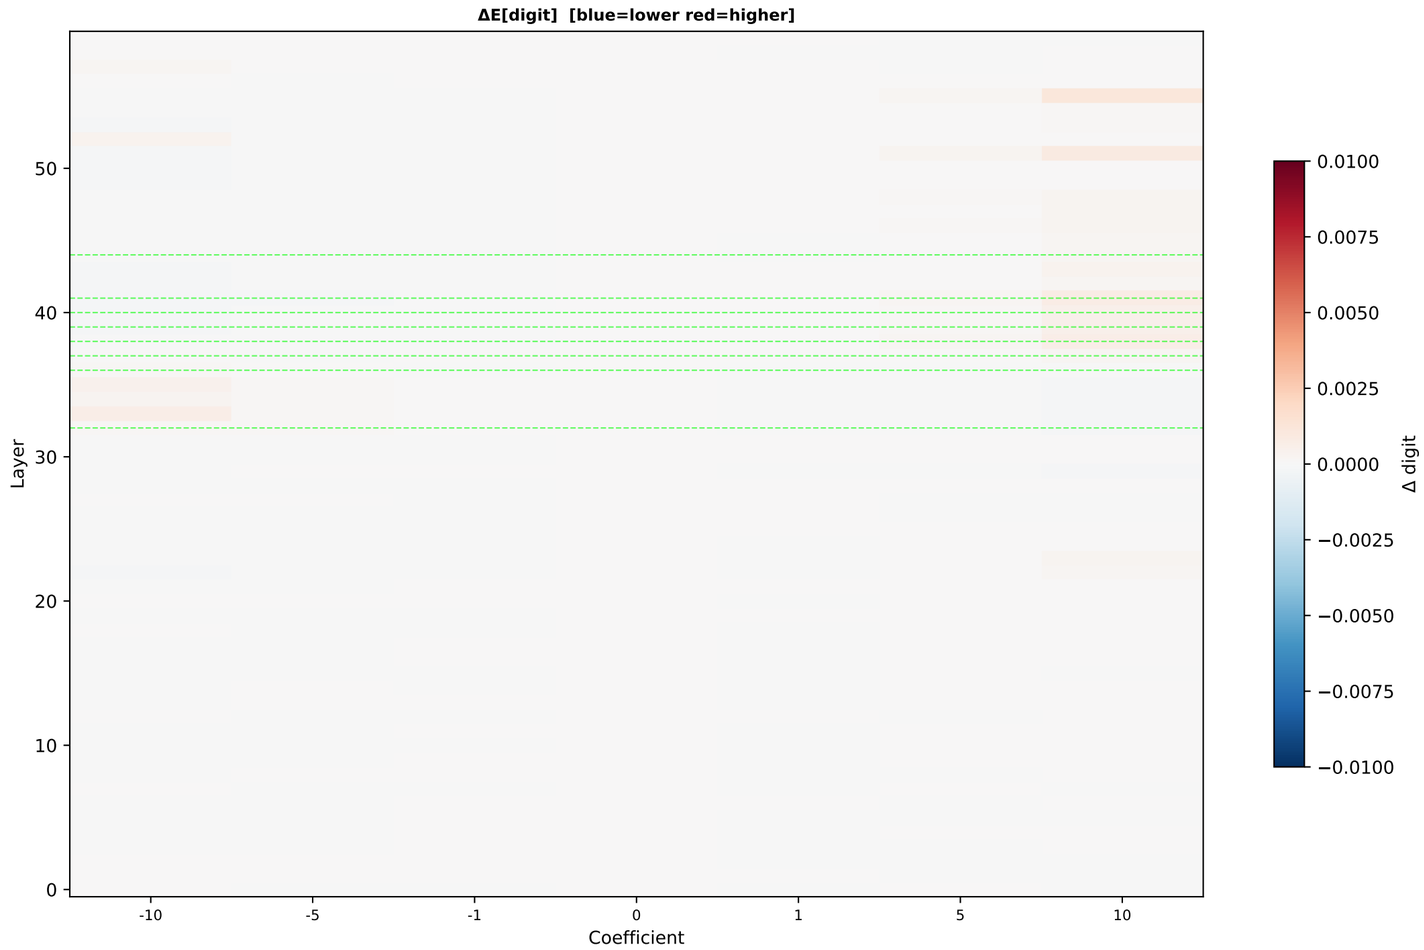


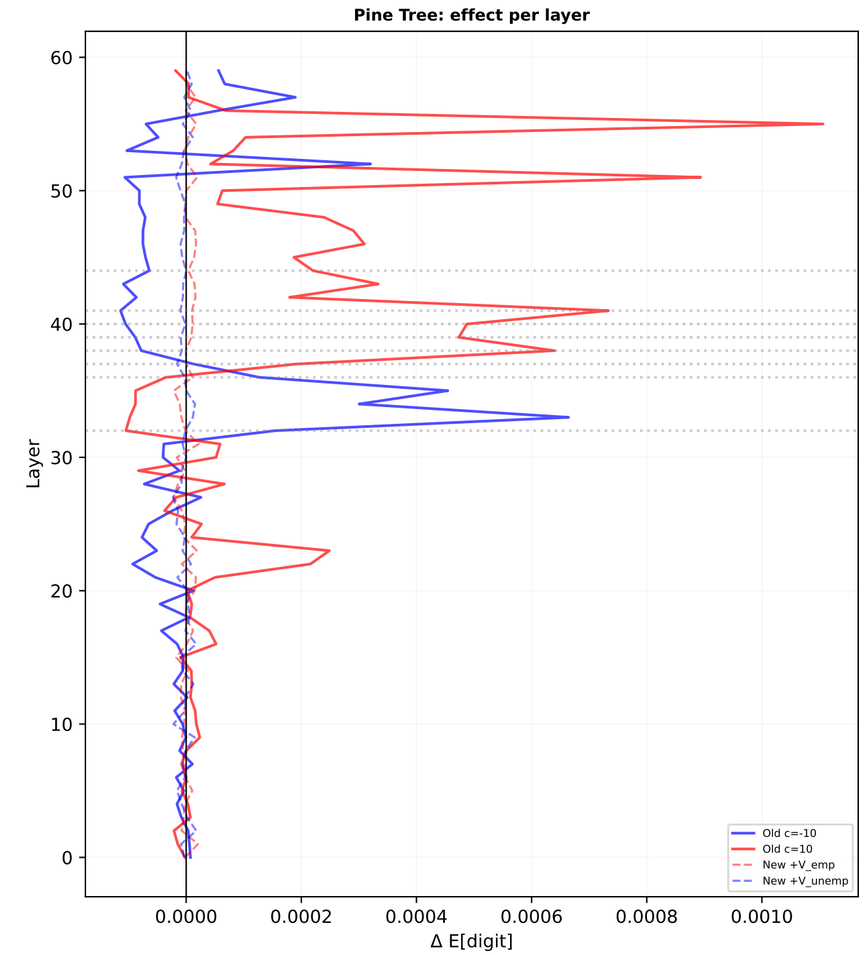


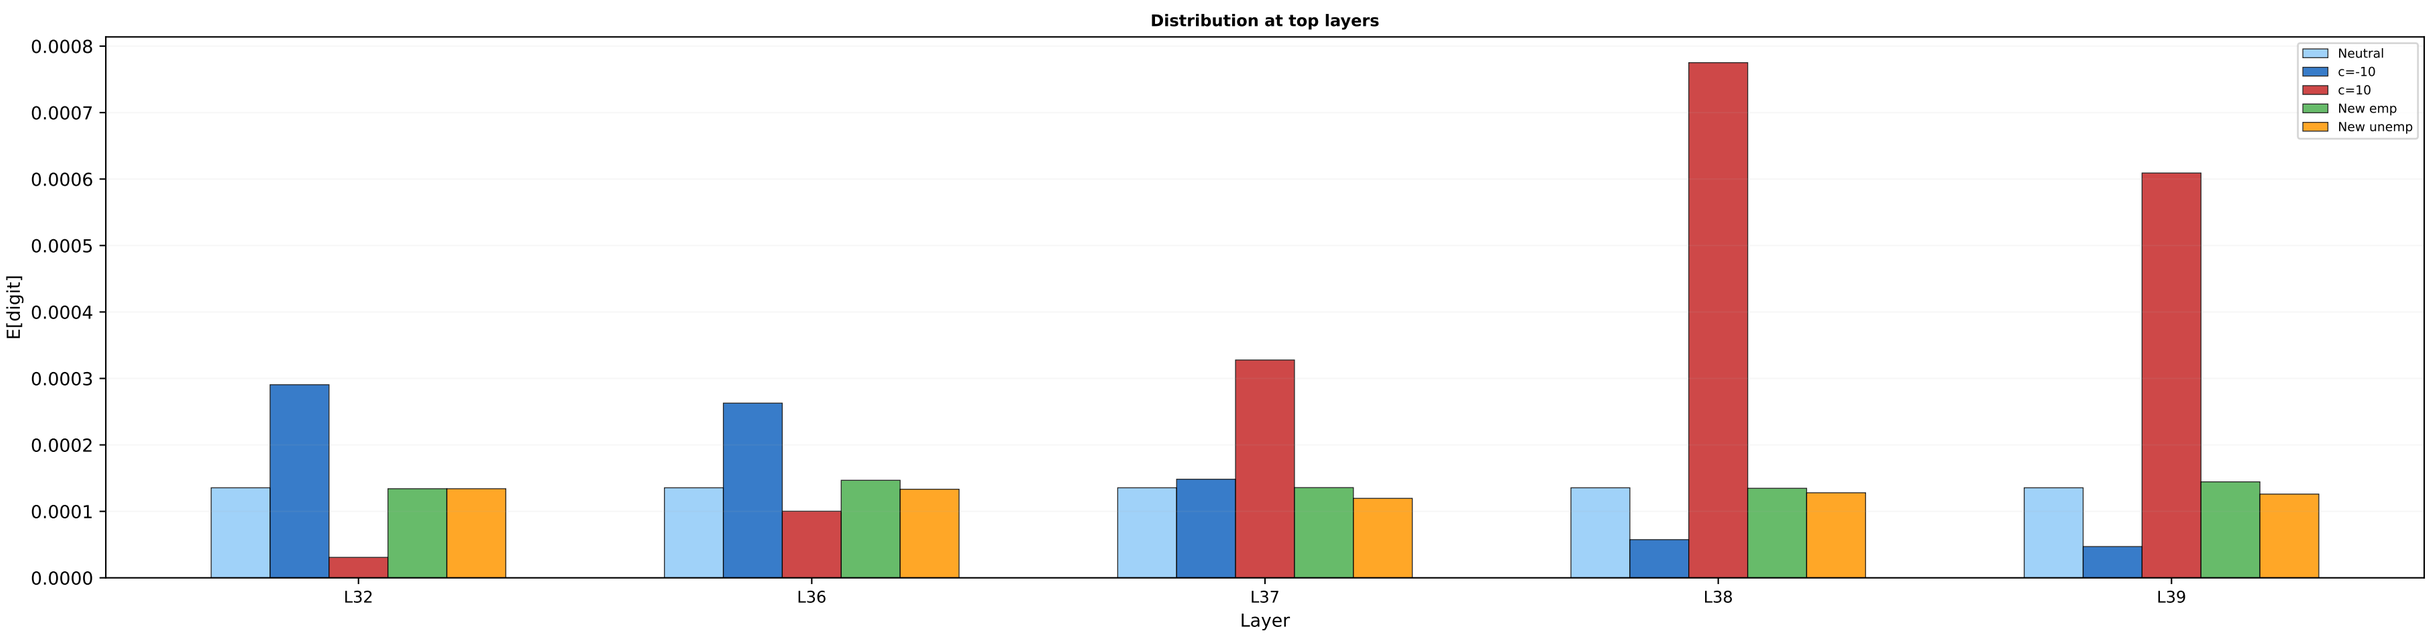


Answer with a single digit from 0 to 9. | How many hours does an individual spend at home between 8 AM and 6 PM? ___ |

W4: Daytime hours at home | V7/cfg4

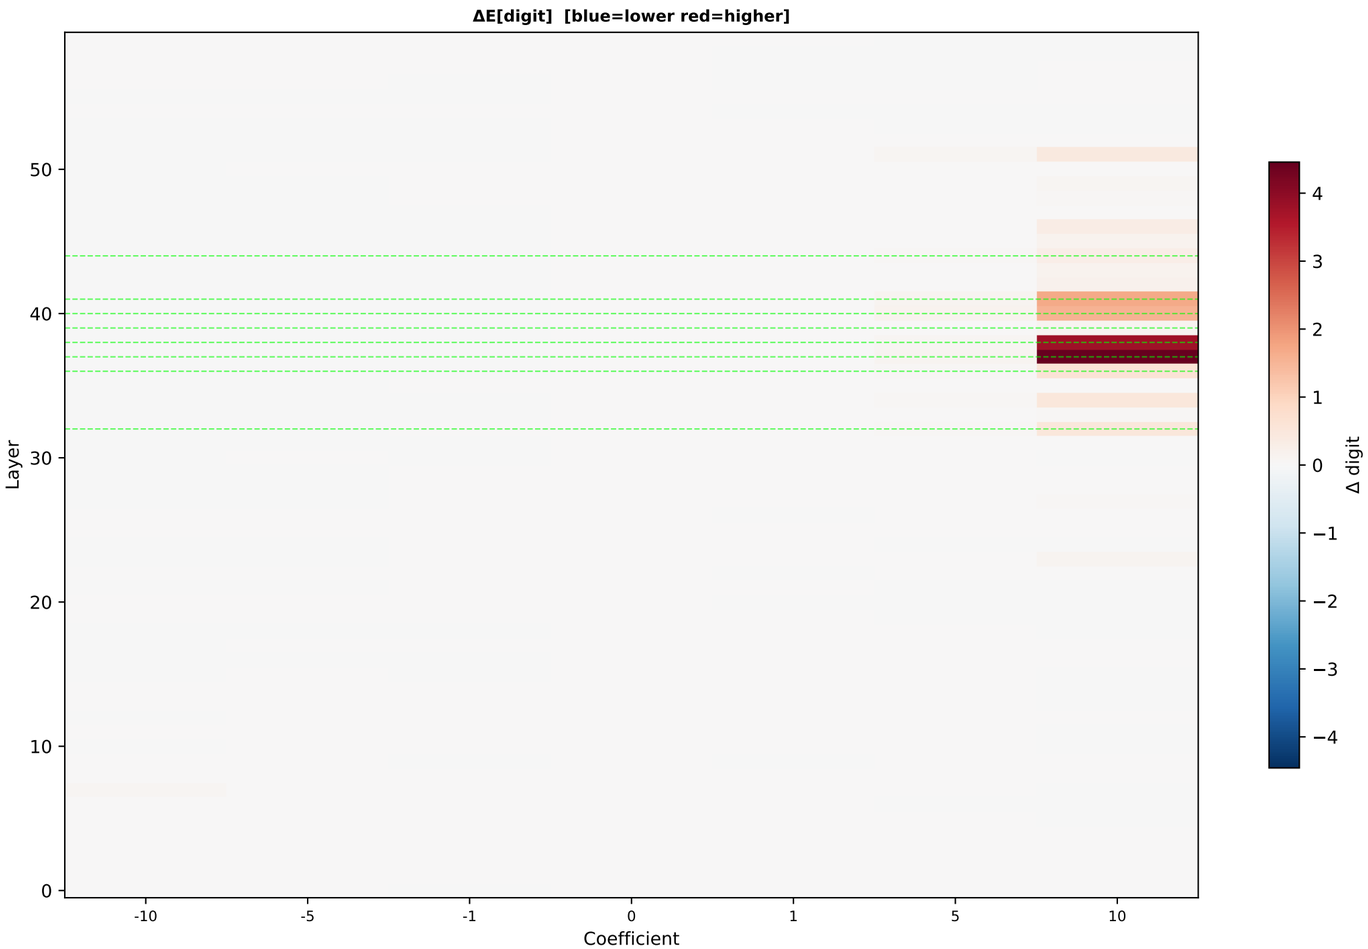


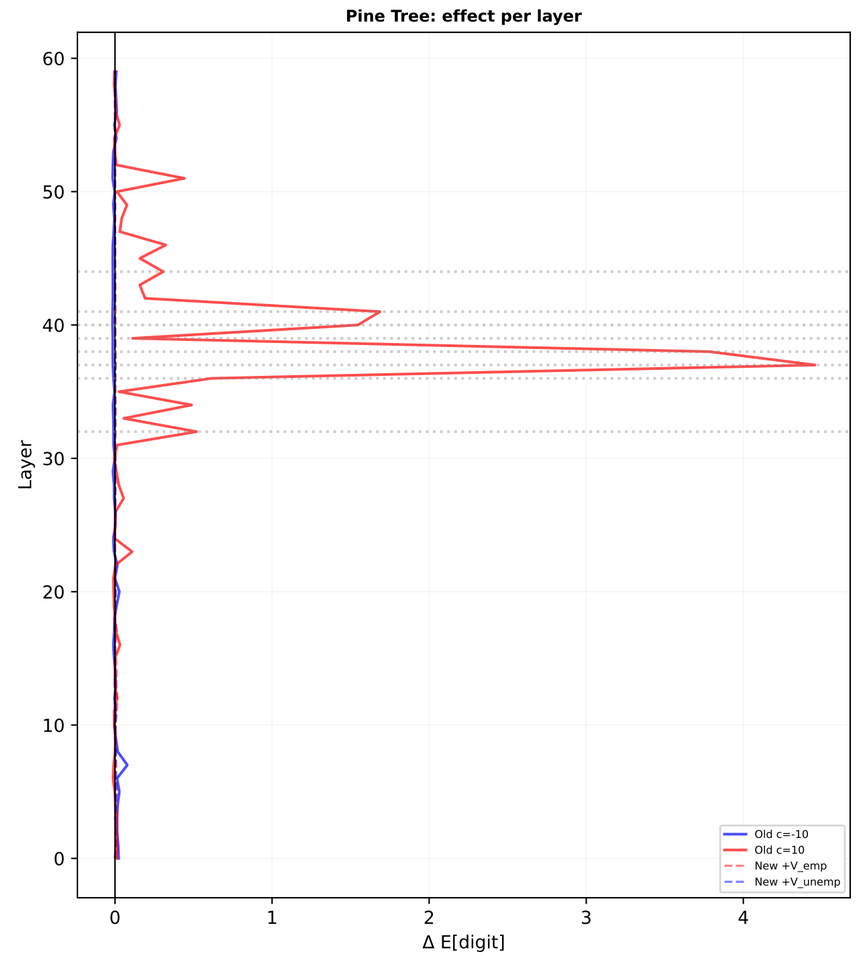


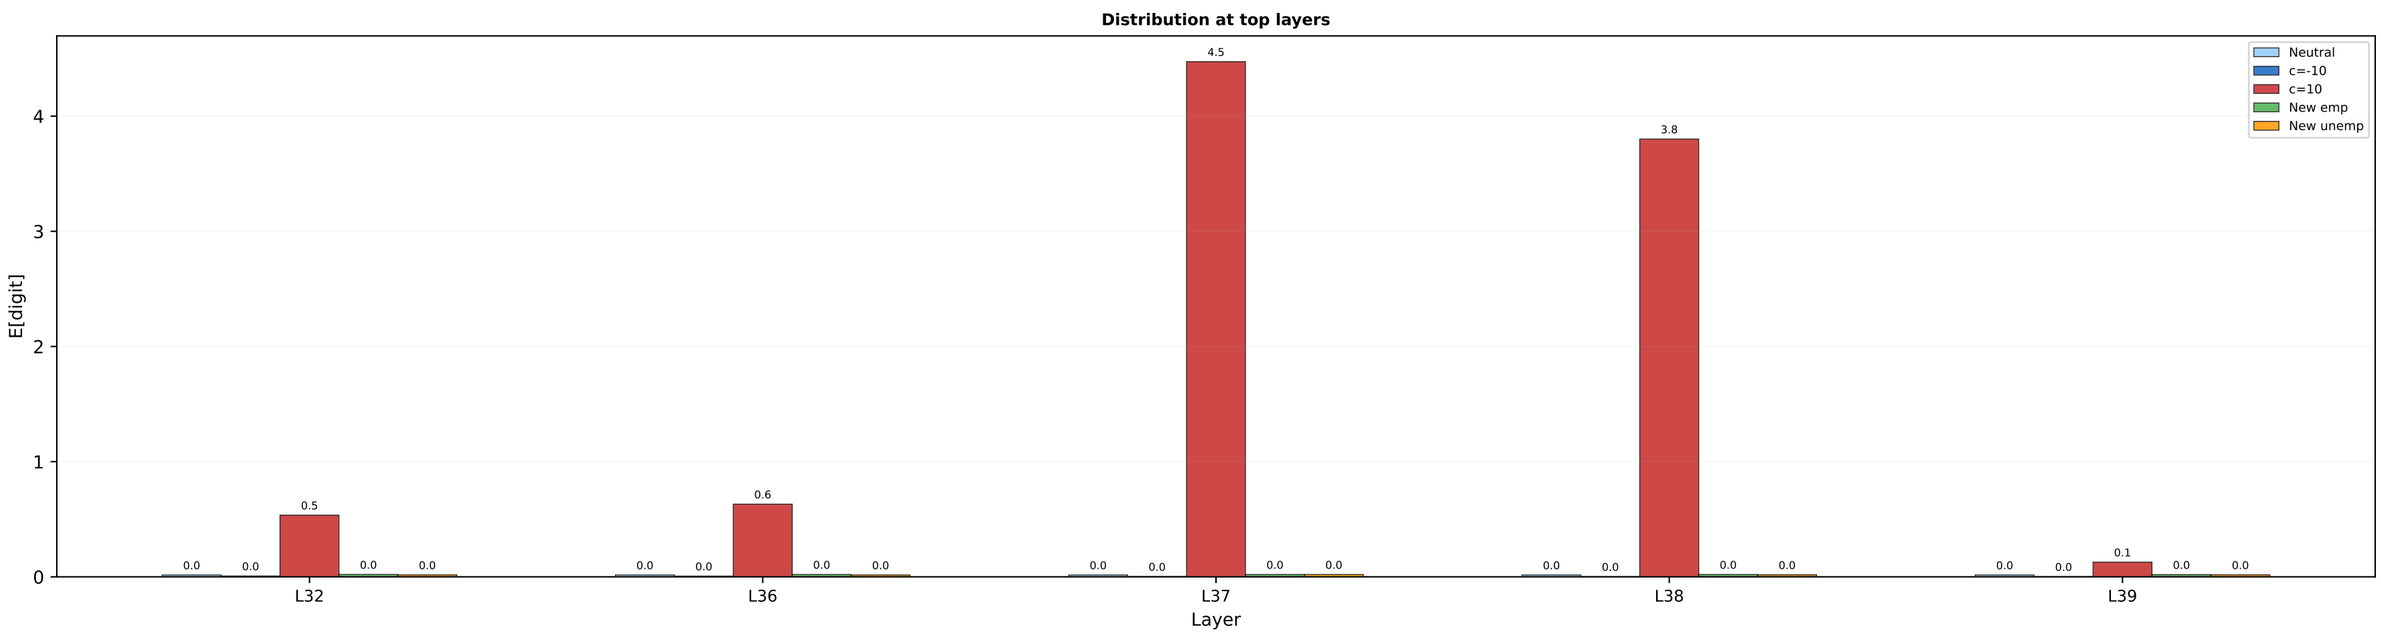


W5: Longest stretch outside | V7/cfg4

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours an individual spends outside the home today? ___ |

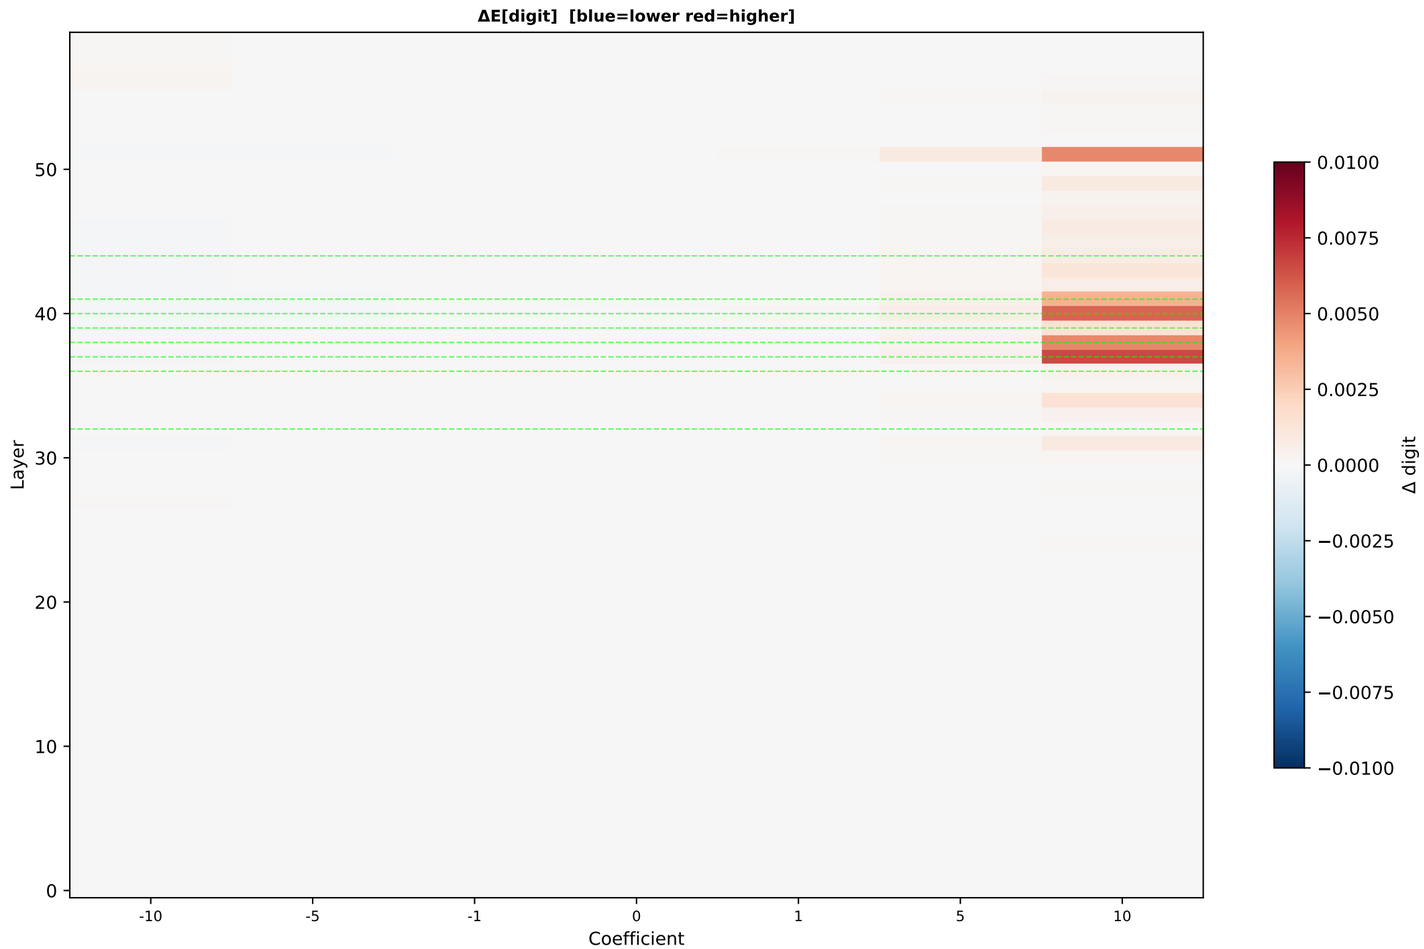


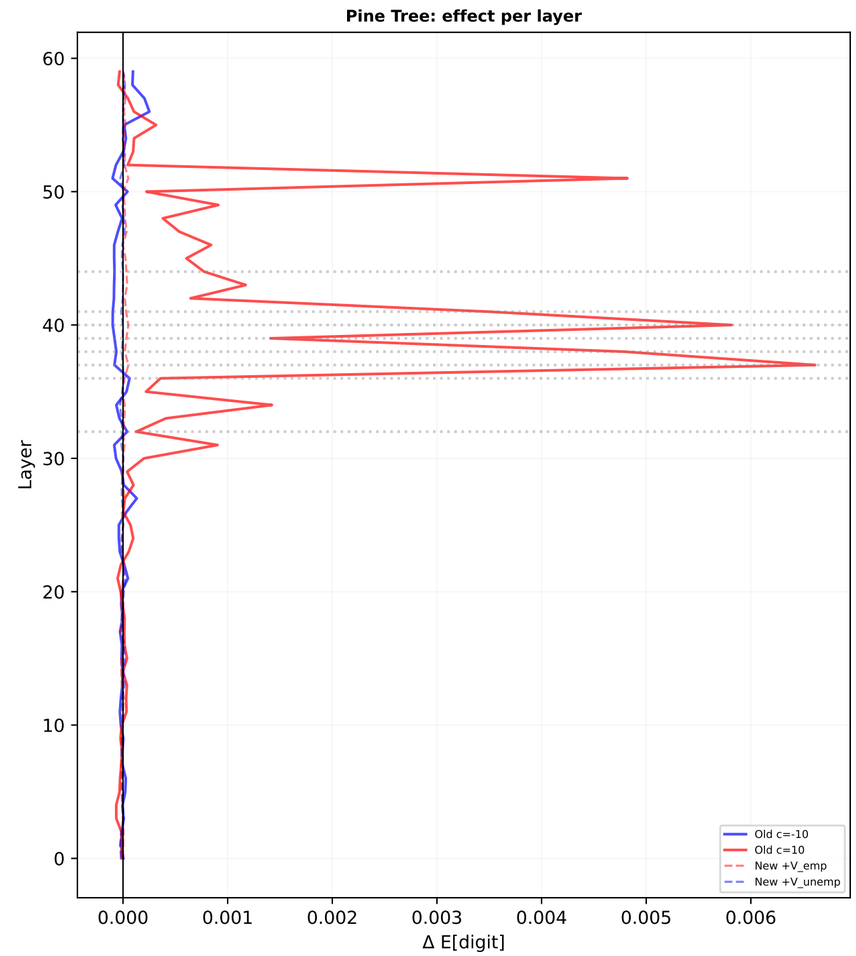


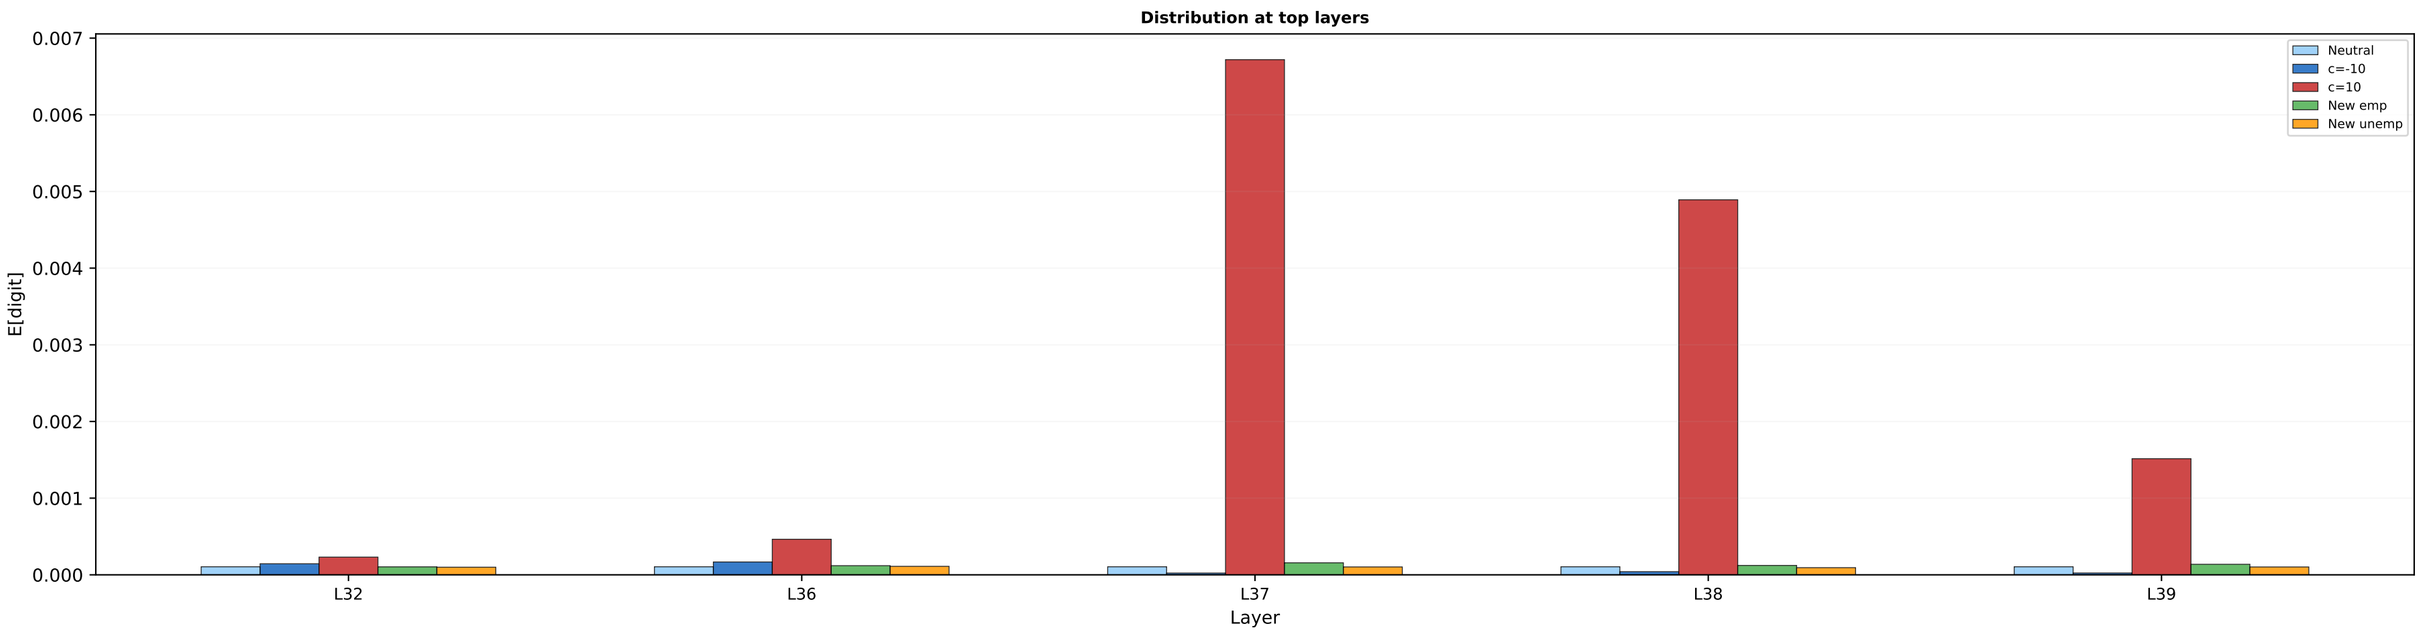


Answer with a single digit from 0 to 9. | How many total hours is an individual away from home today? ___ |

W6: Total hours away | V7/cfg4

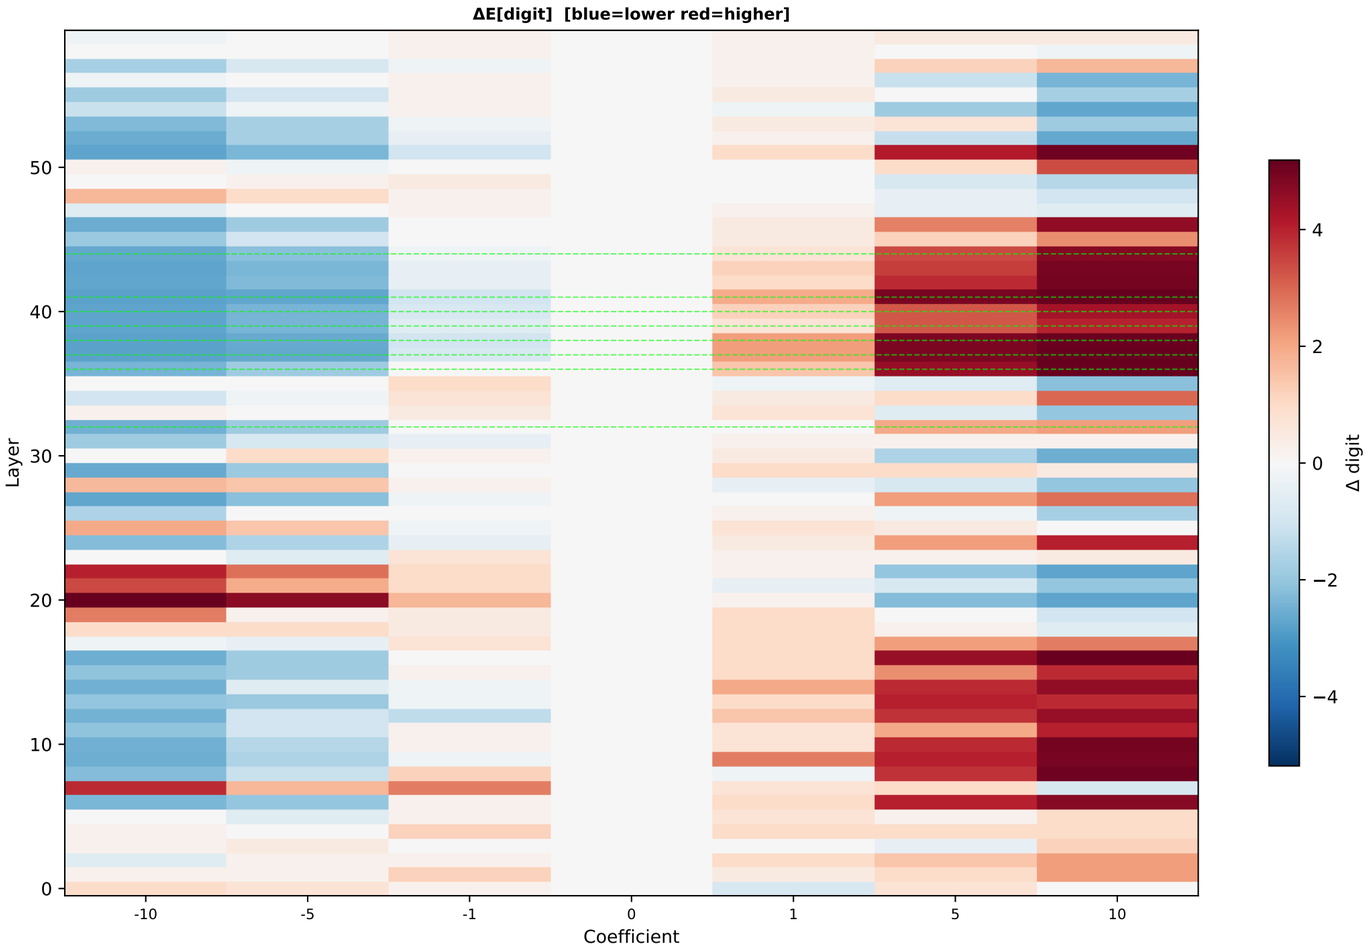


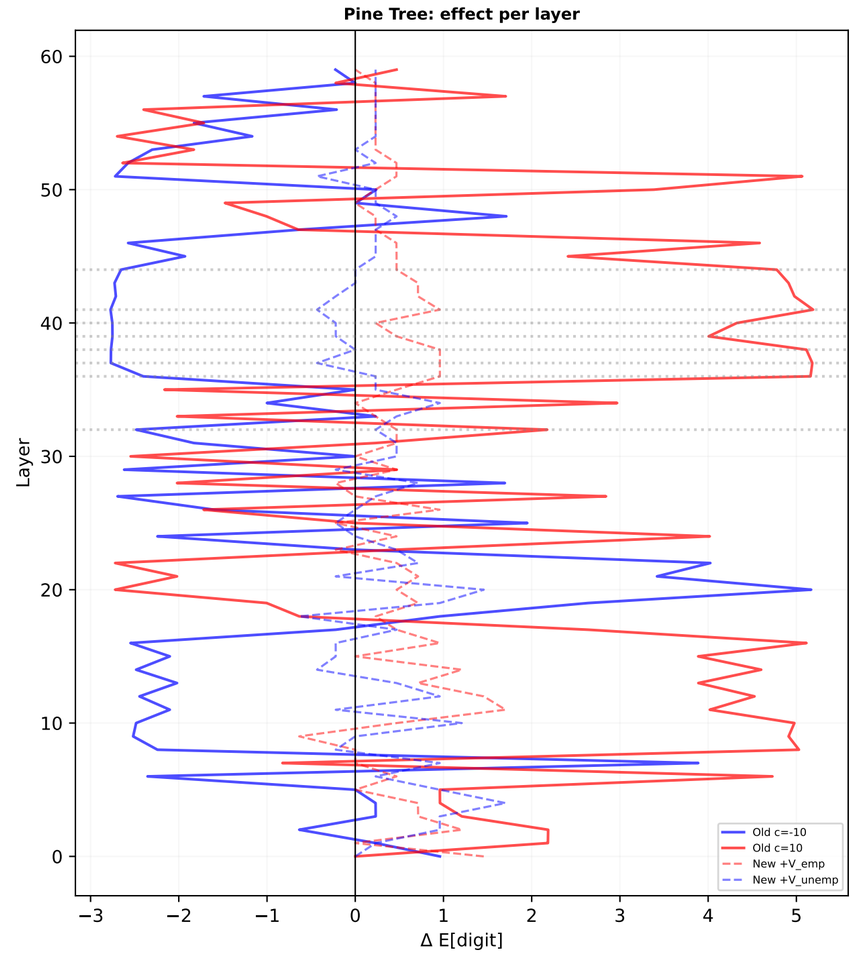


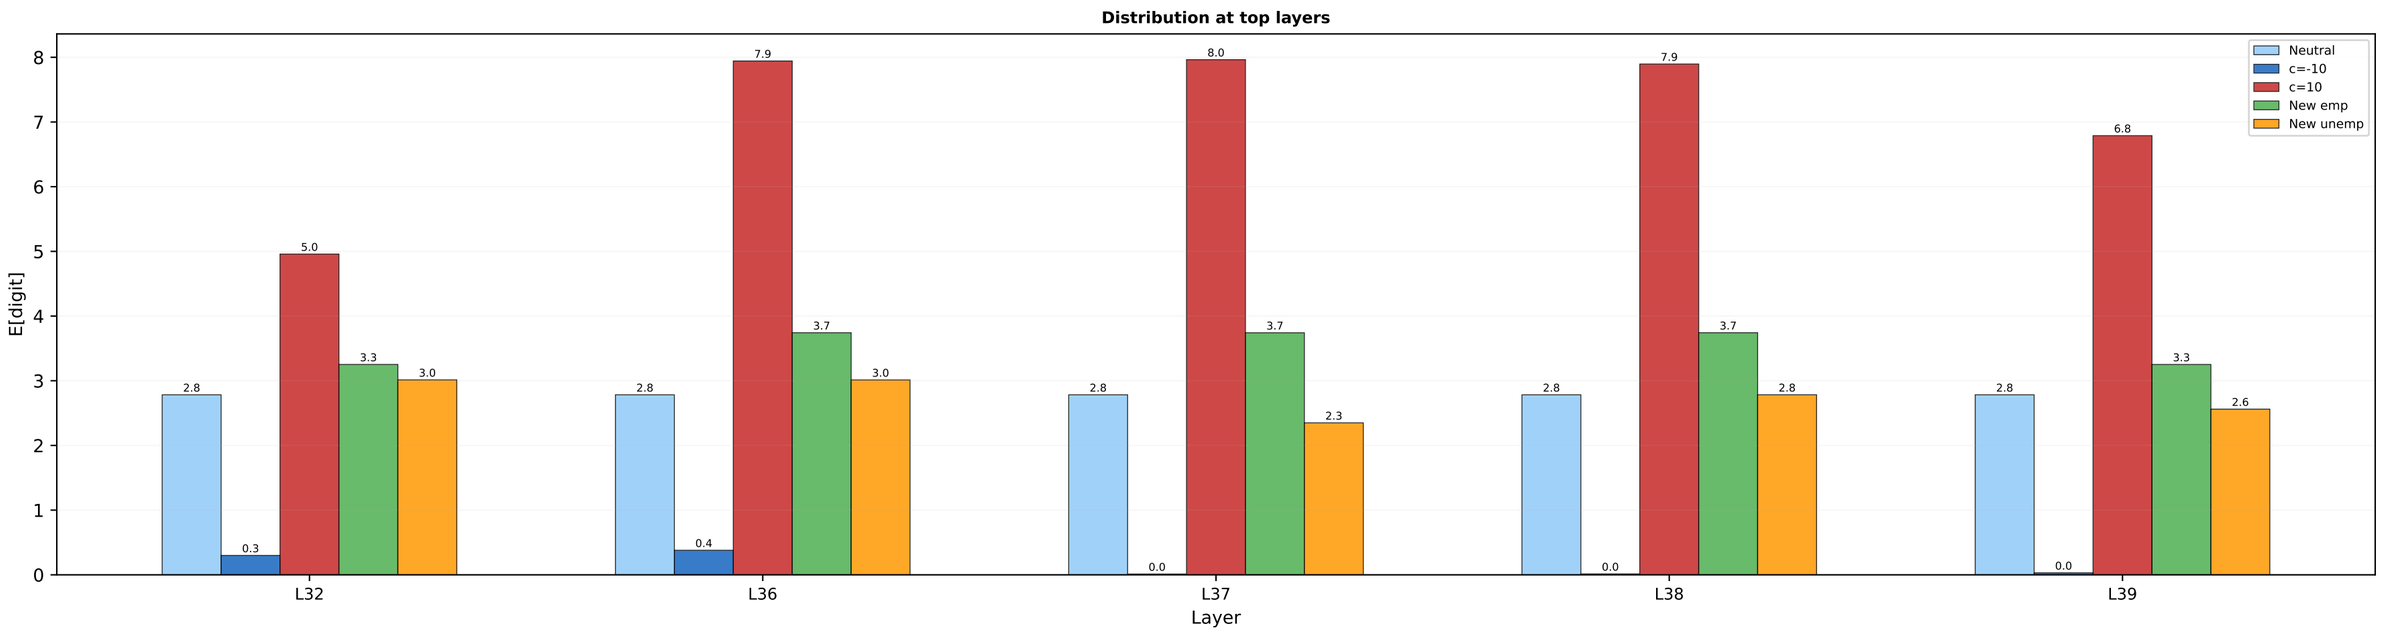


W7: Hours at primary non-home location | V7/cfg4

Answer with a single digit from 0 to 9. | How many hours does an individual spend at their most frequently visited non-home location today? ___ |

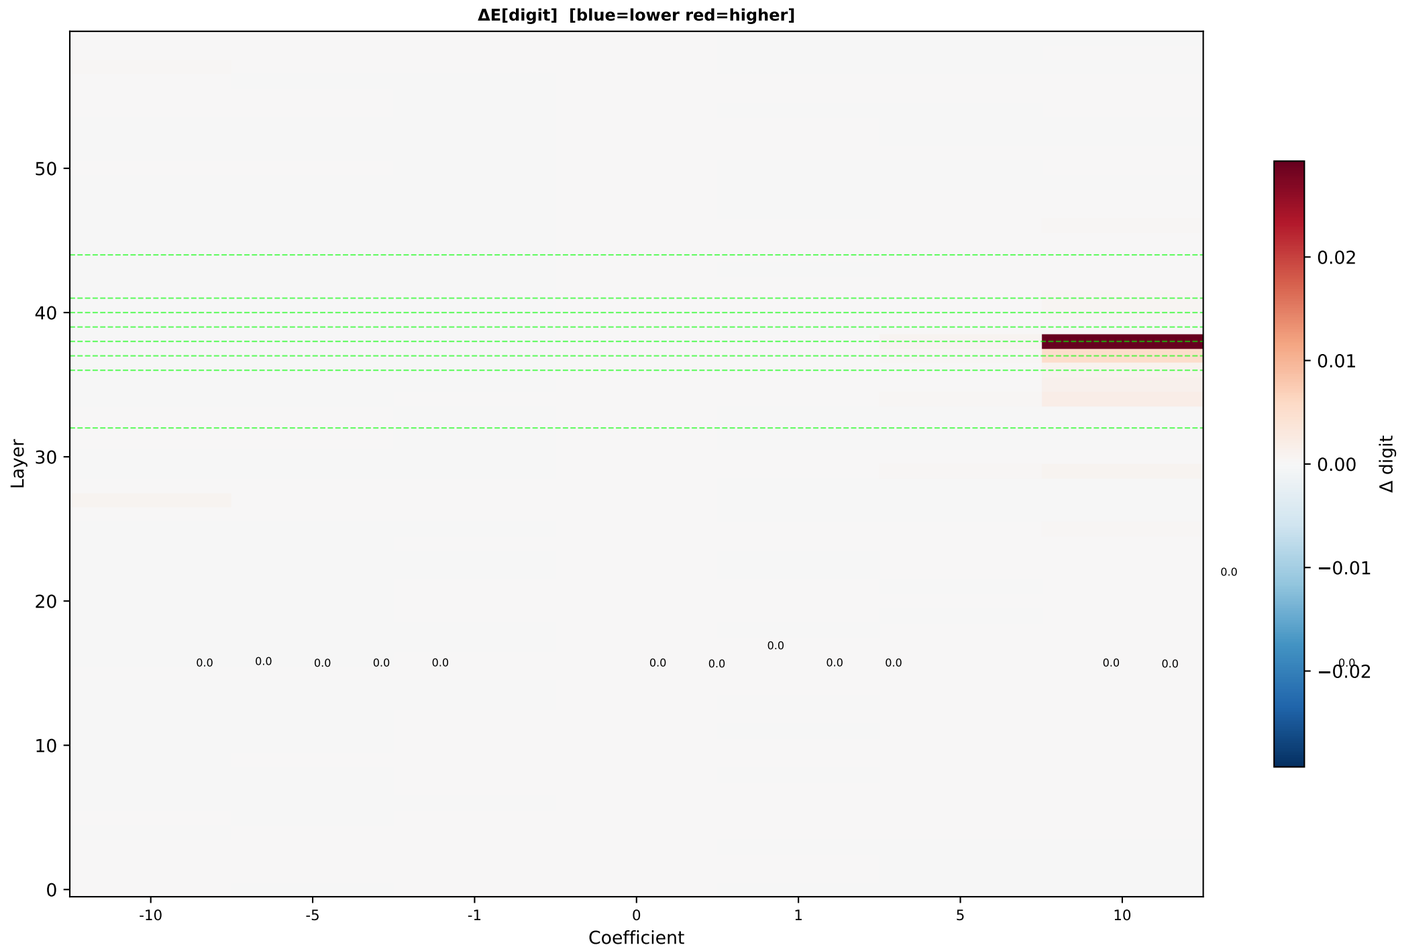


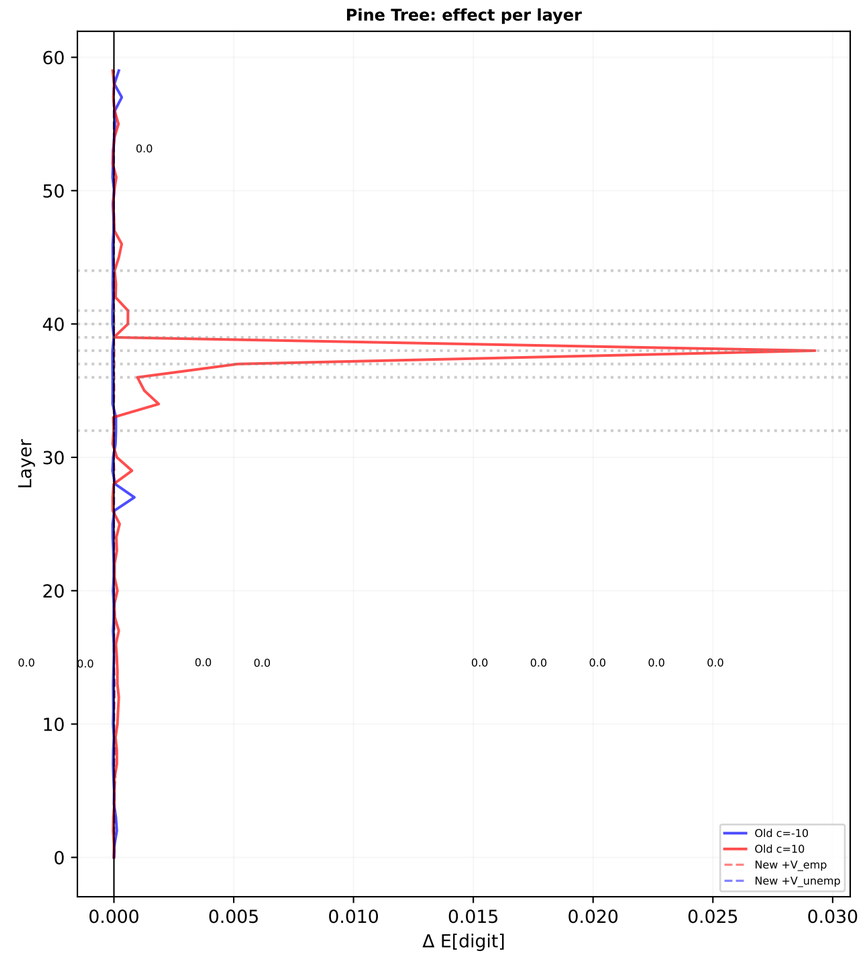


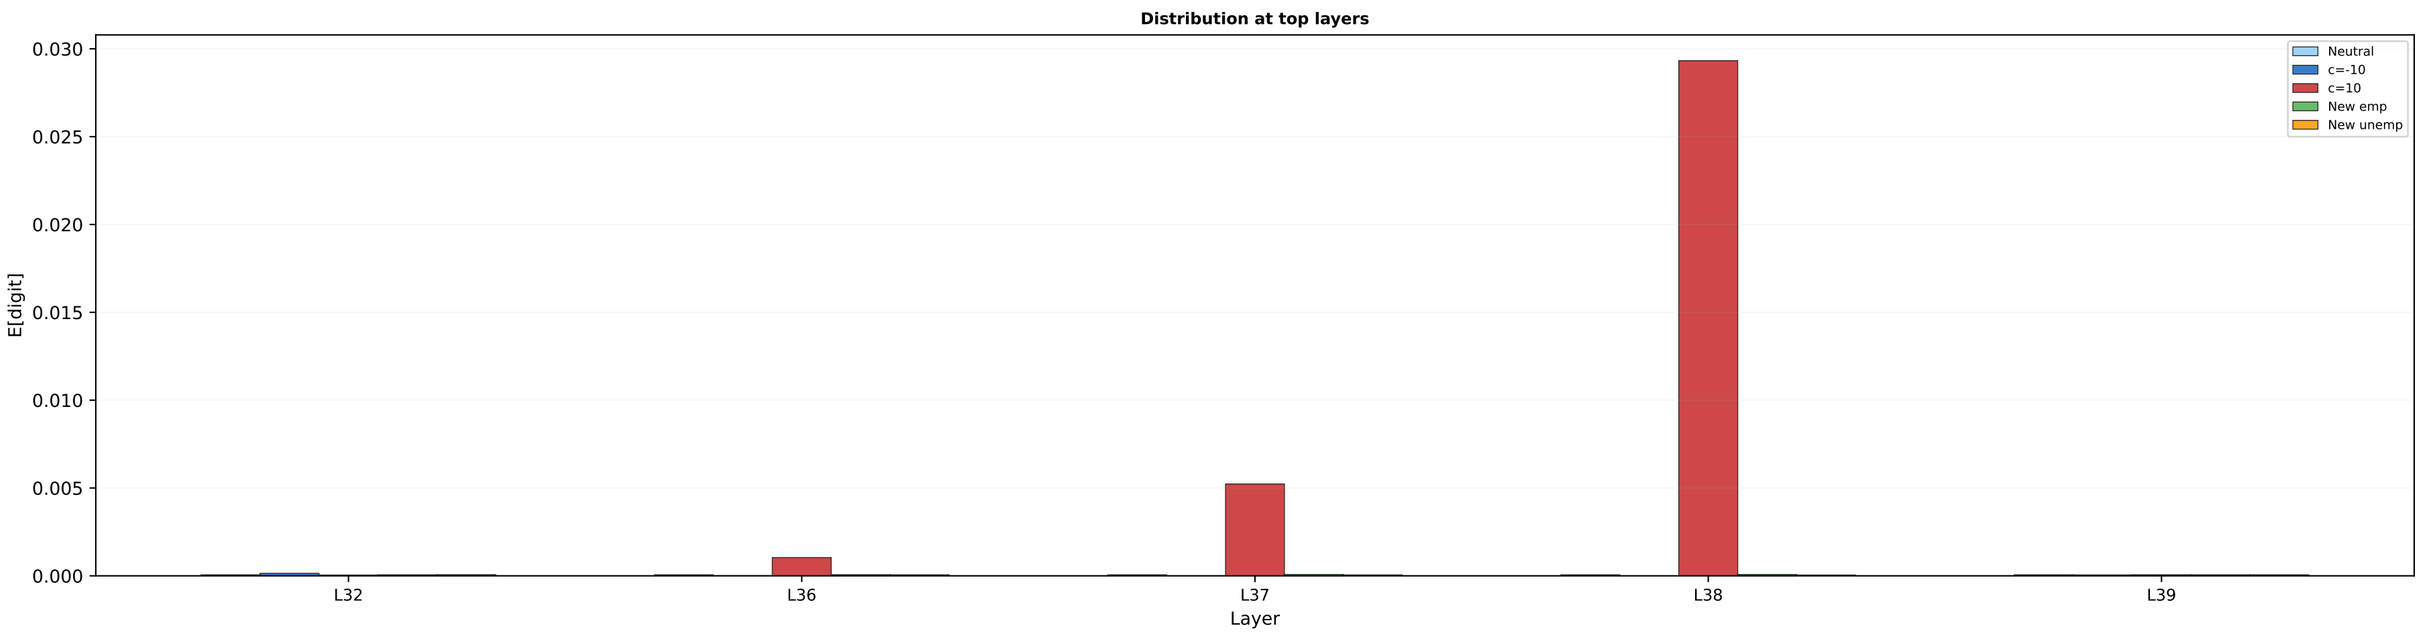


Answer with a single digit from 0 to 9. | How many times does an individual return home during the daytime (8 AM to 6 PM) today? ___ |

W8: Daytime home returns | V7/cfg4

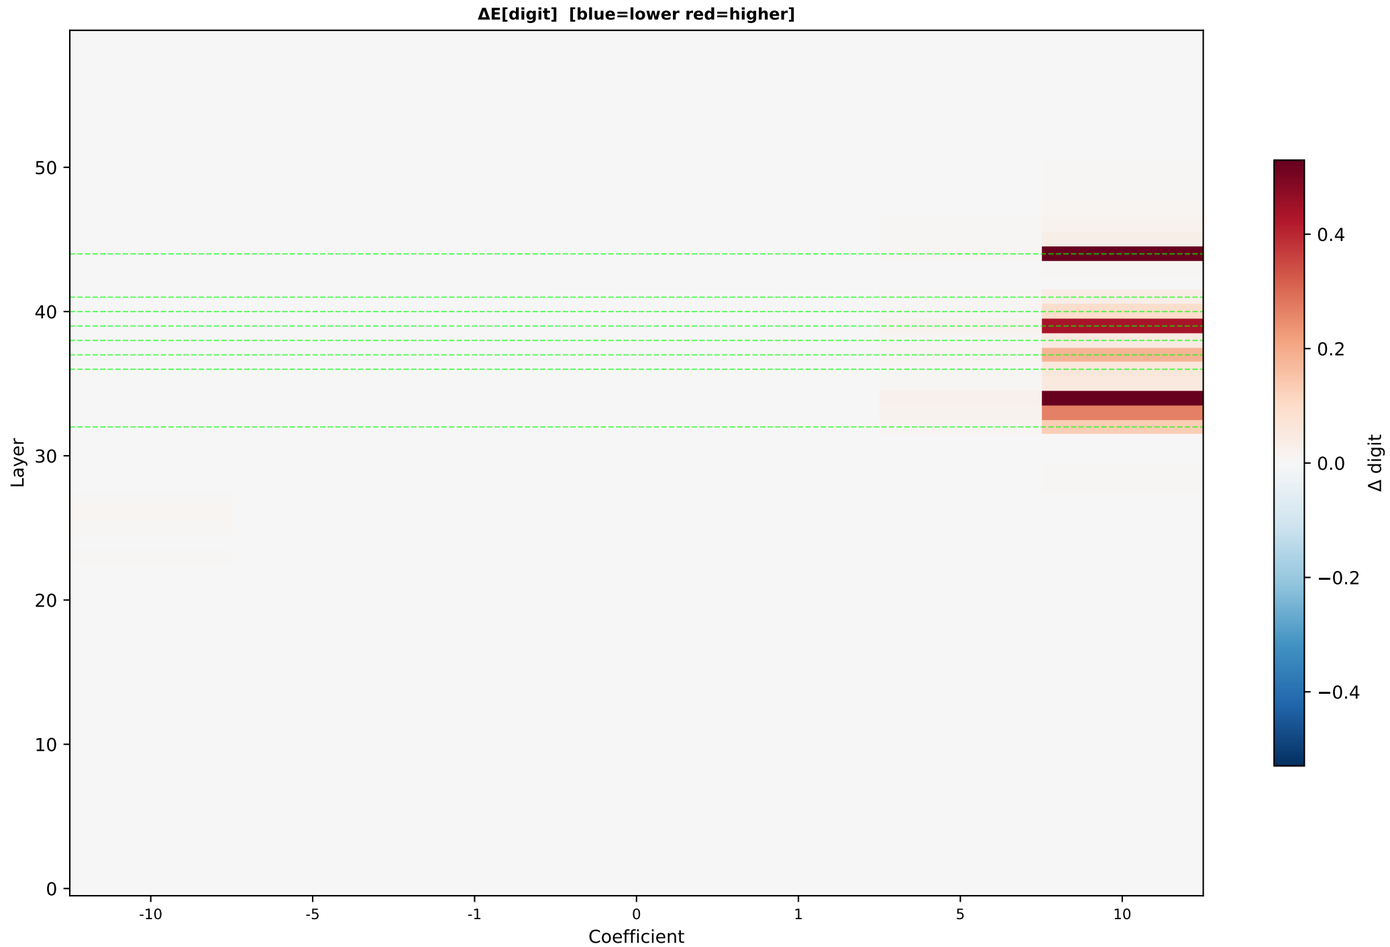


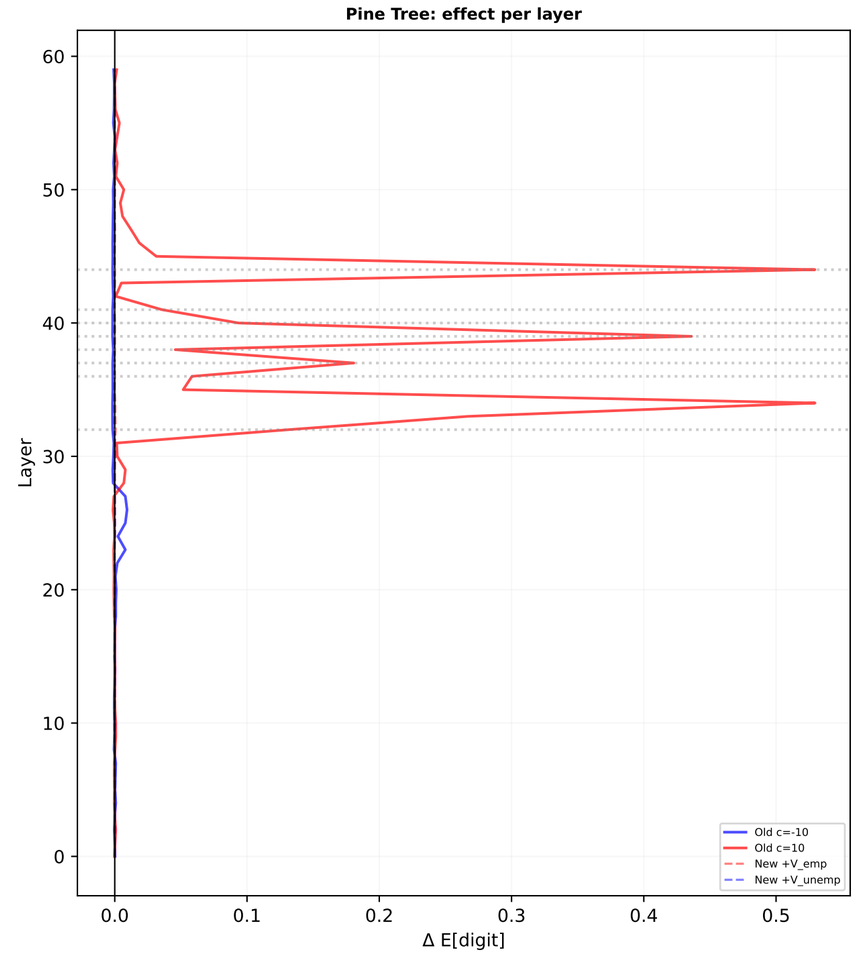


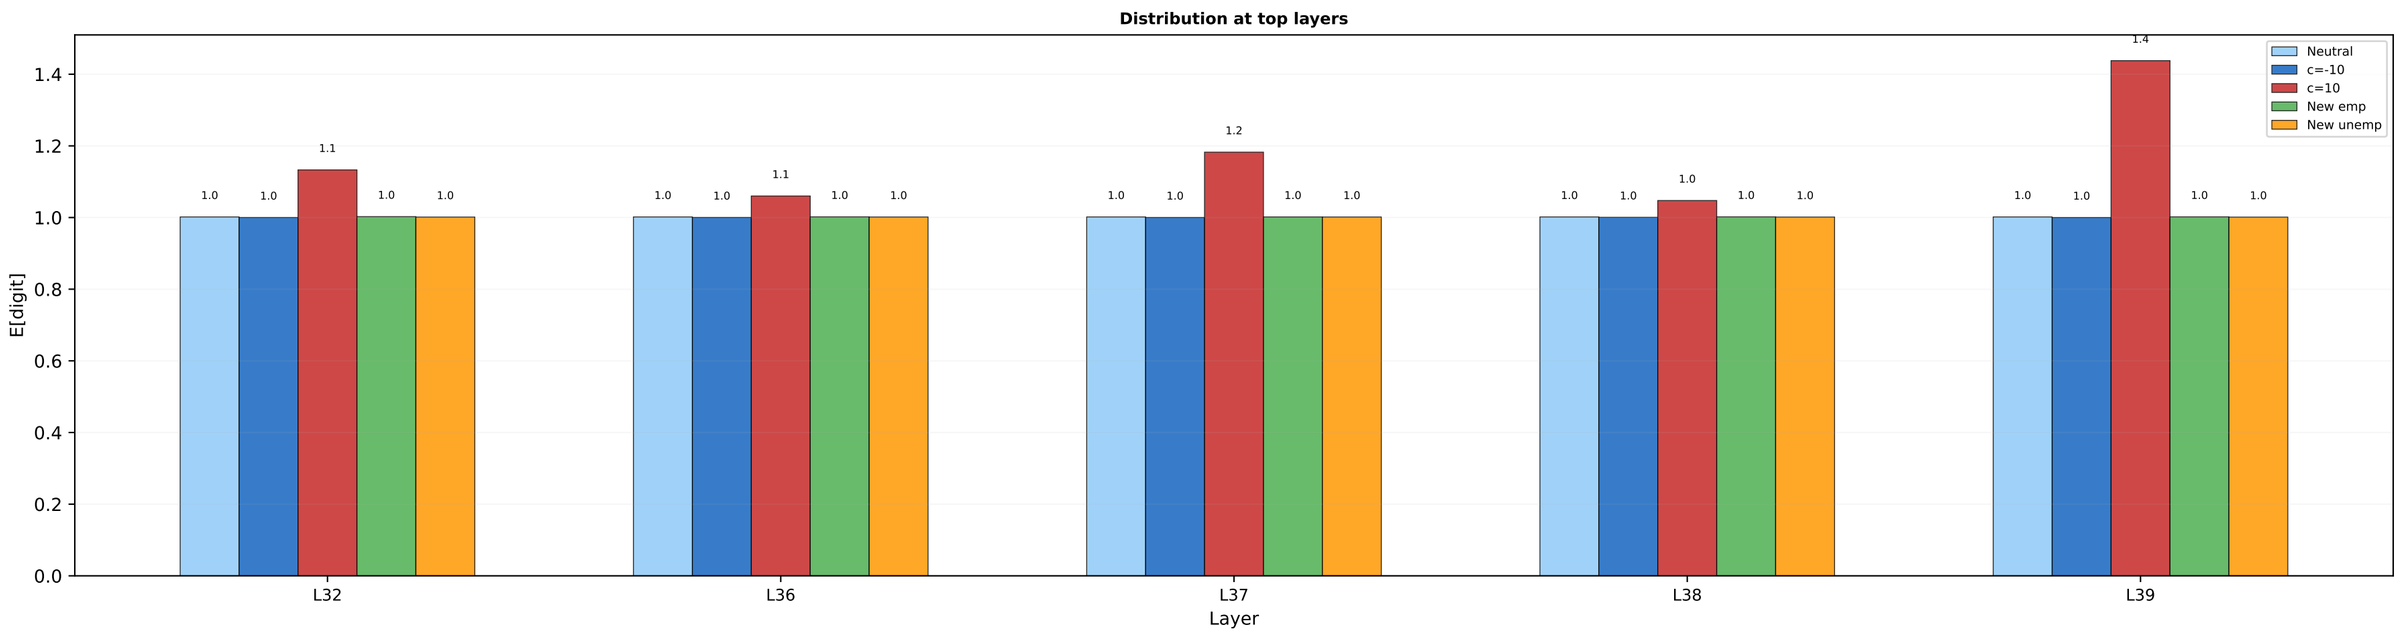


Answer with a single digit from 0 to 9. | How many hours does an individual spend commuting or in transit today? ___ |

W9: Commute/transit hours | V7/cfg4

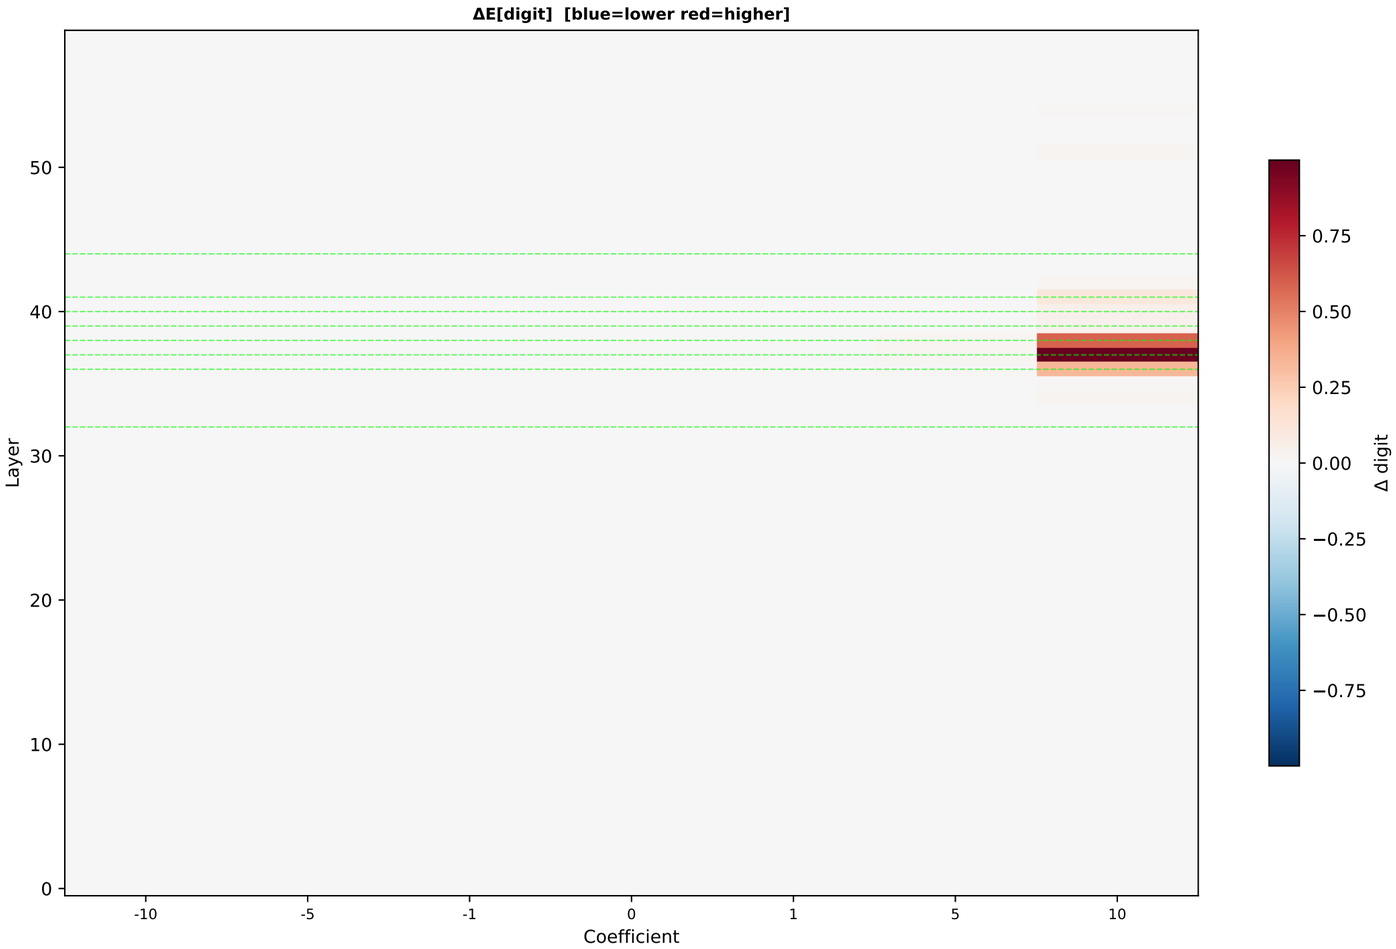


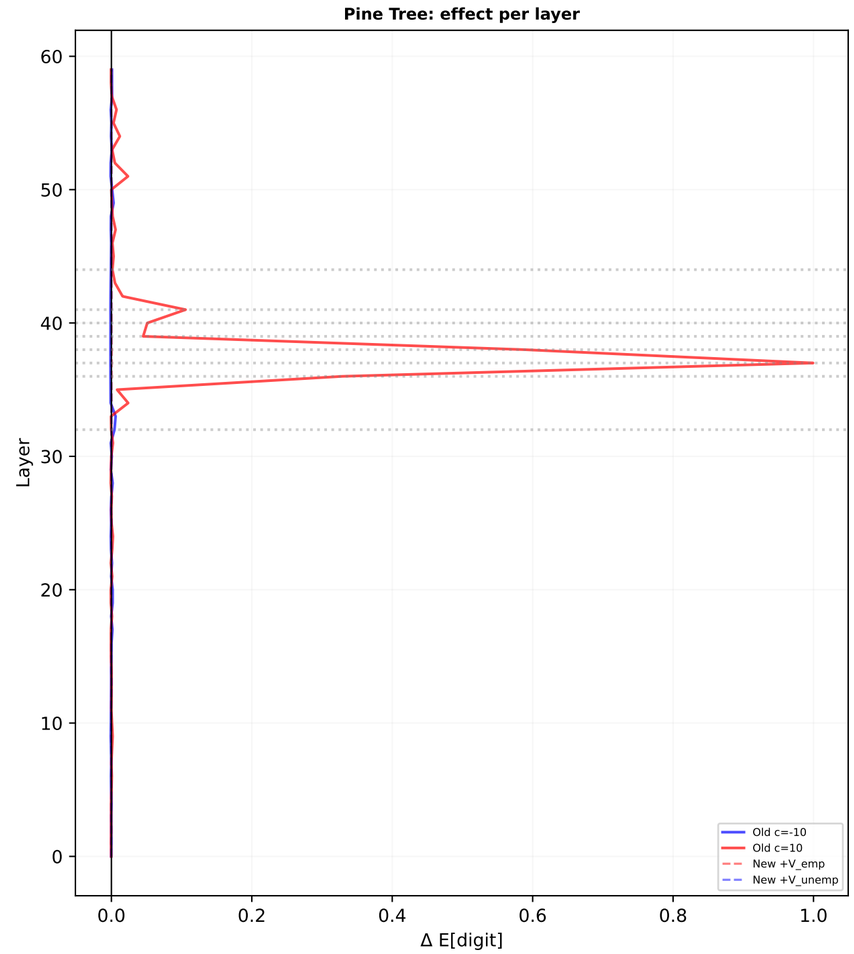


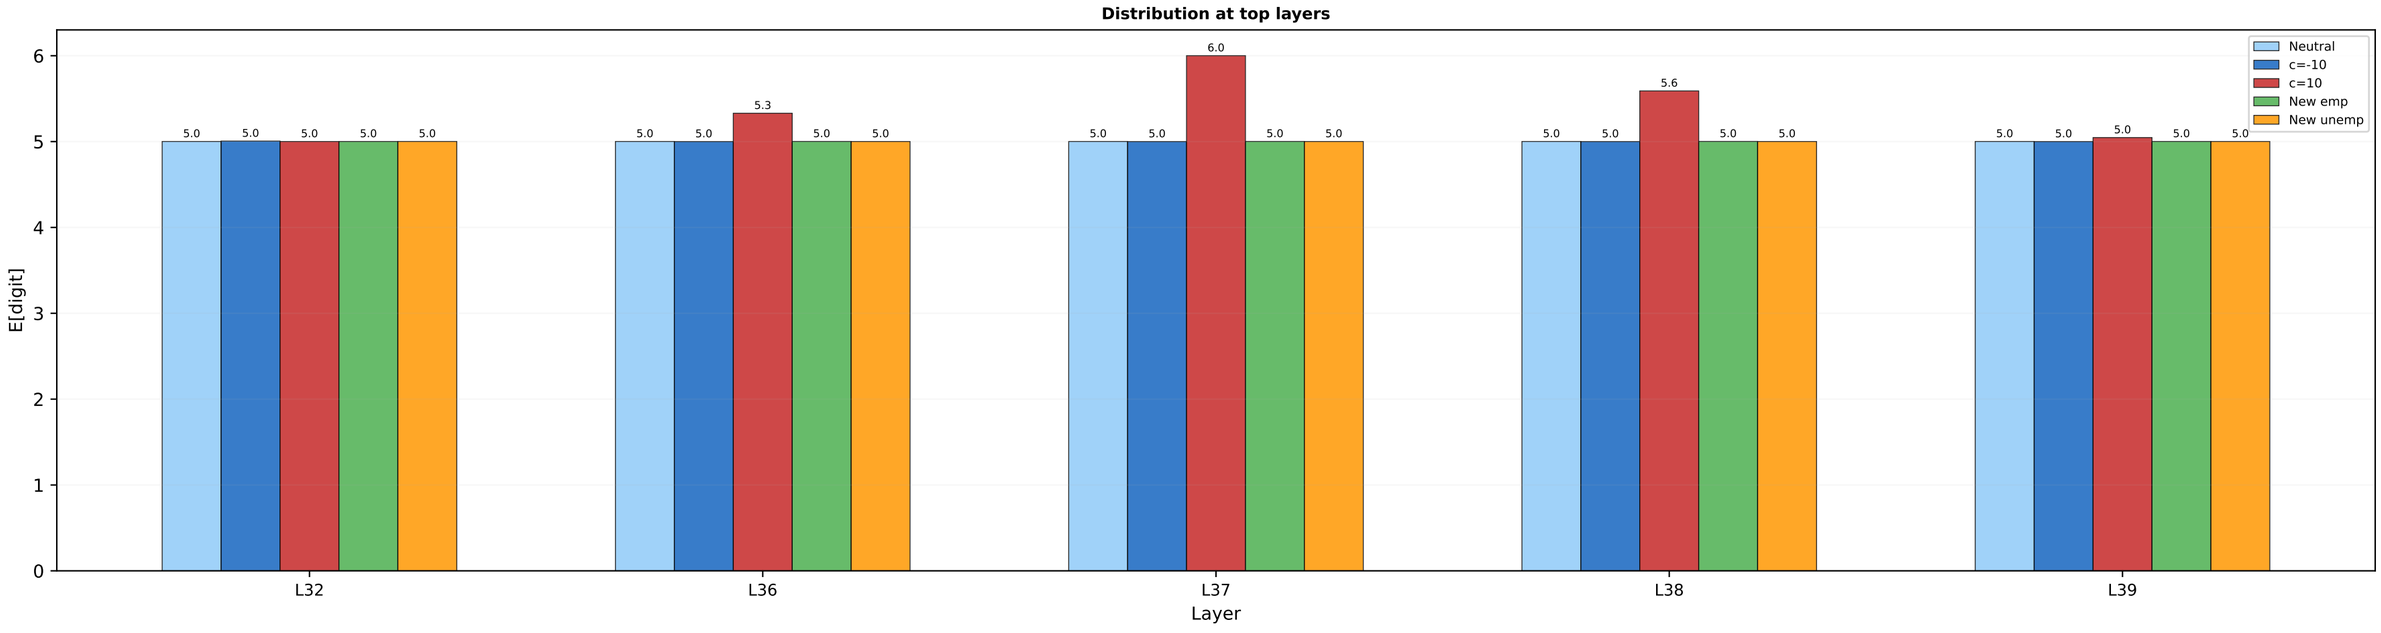


W10: Week-to-week consistency | V7/cfg4

Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is an individual's schedule today compared to the same day last week? (0 = completely different, 9 = identical) ___|

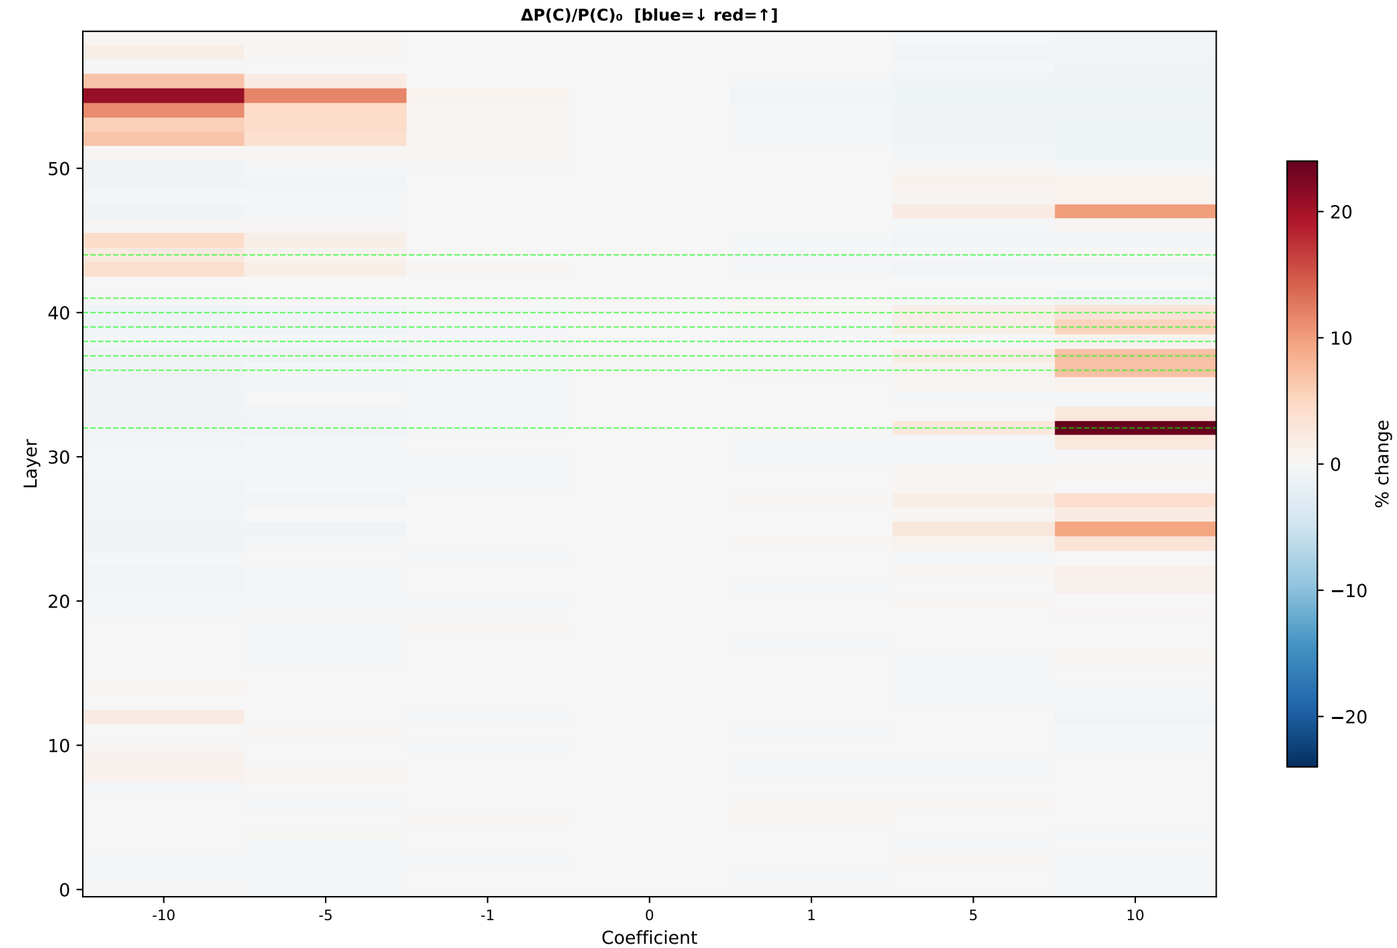


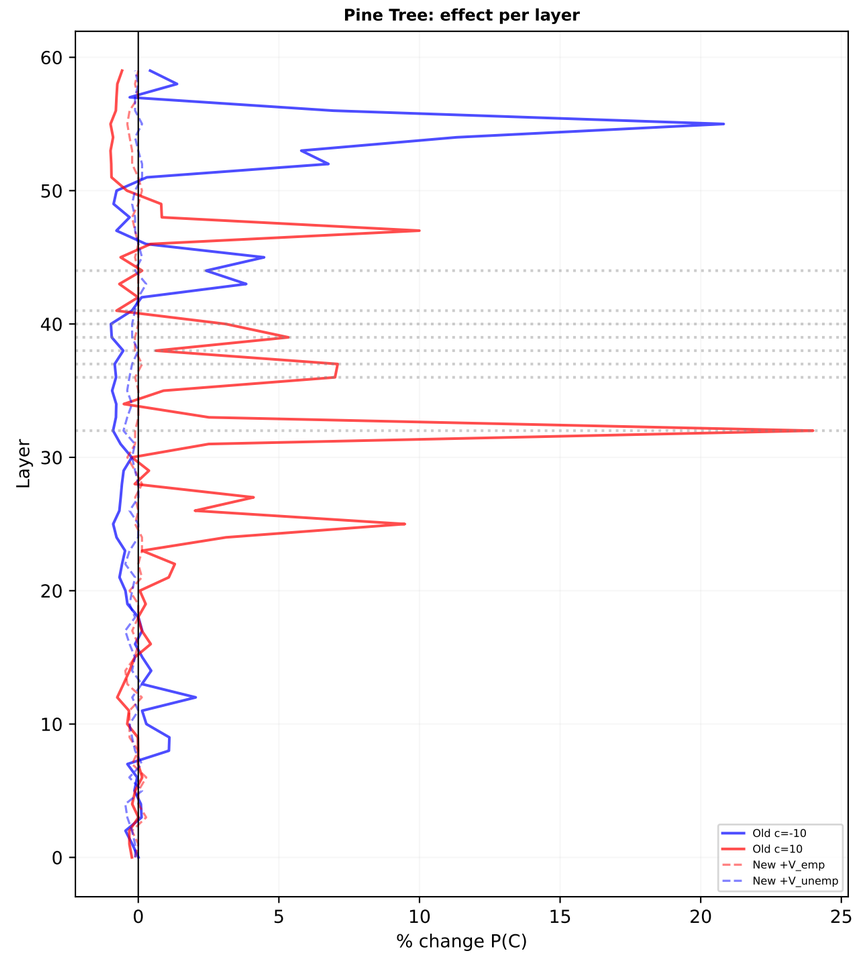


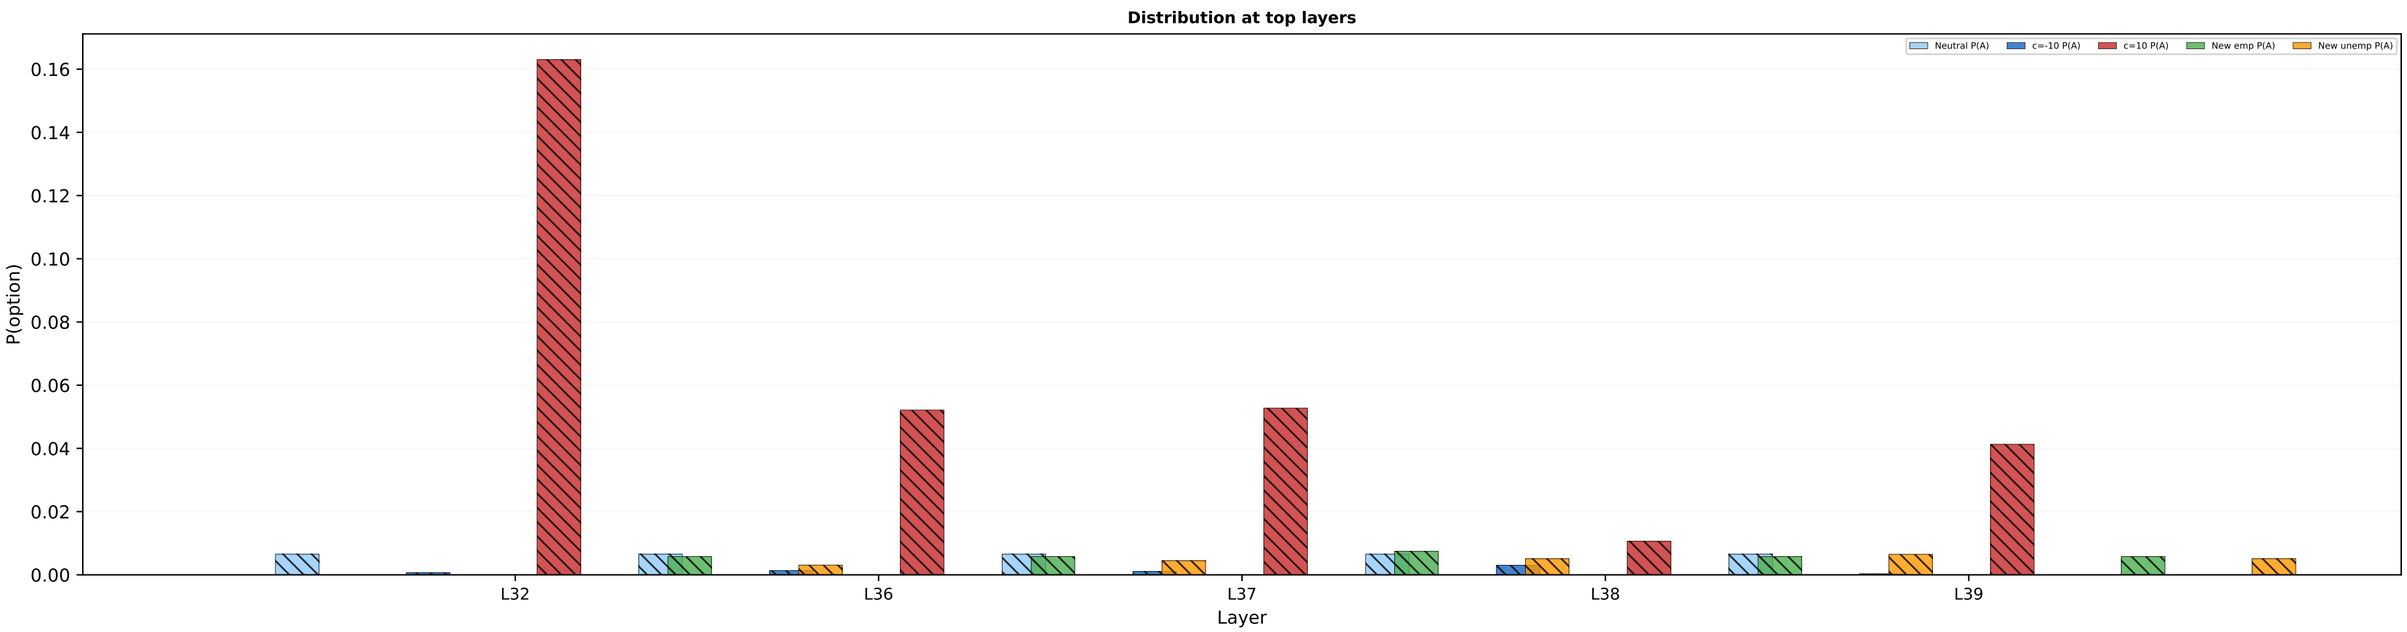


W11: 8 AM status | V7/cfg4

At 8:00 AM, an individual is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

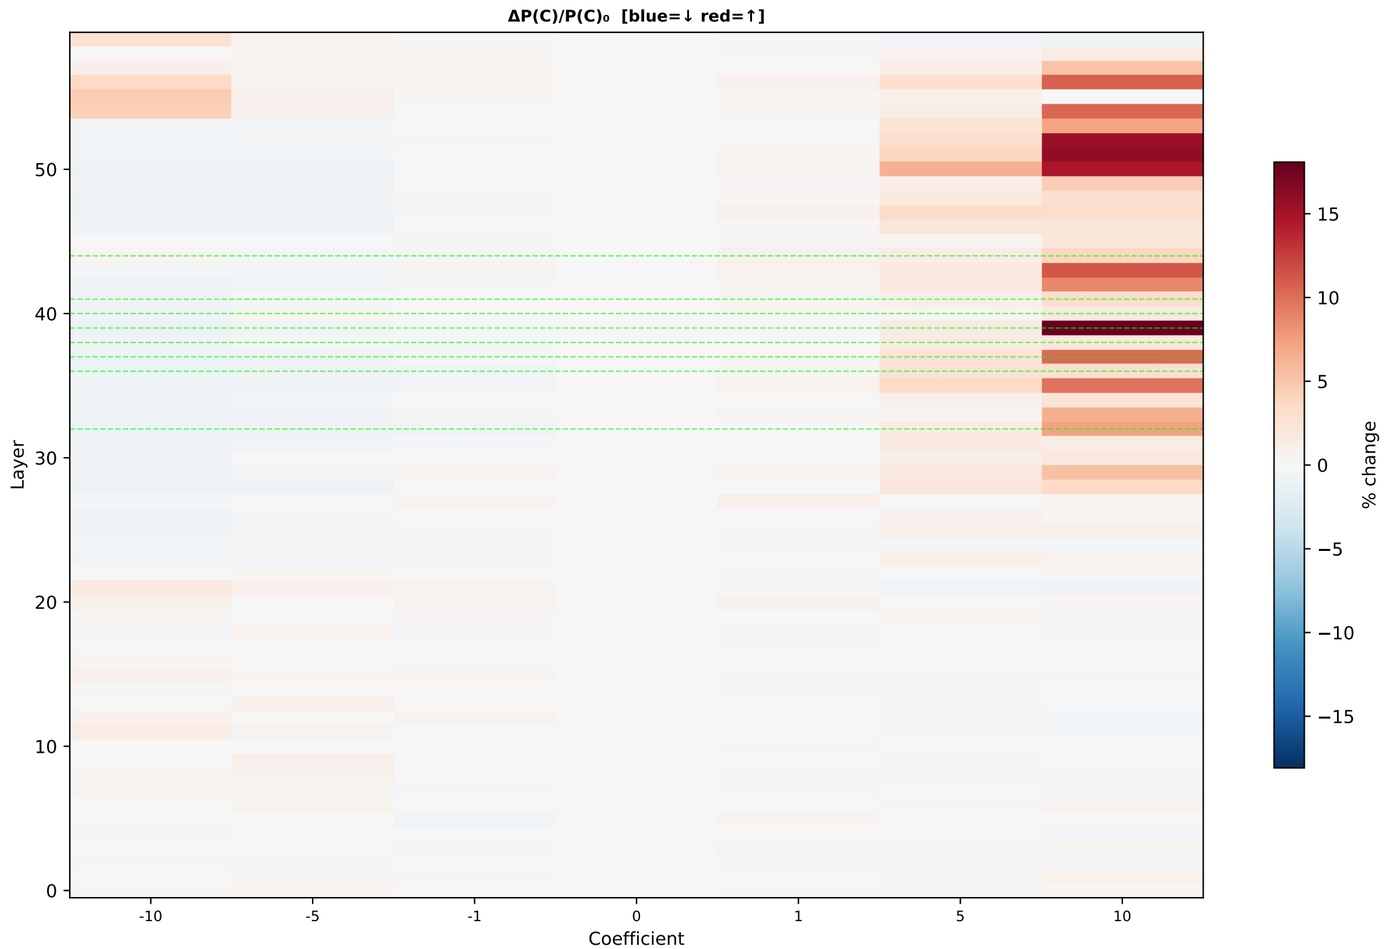


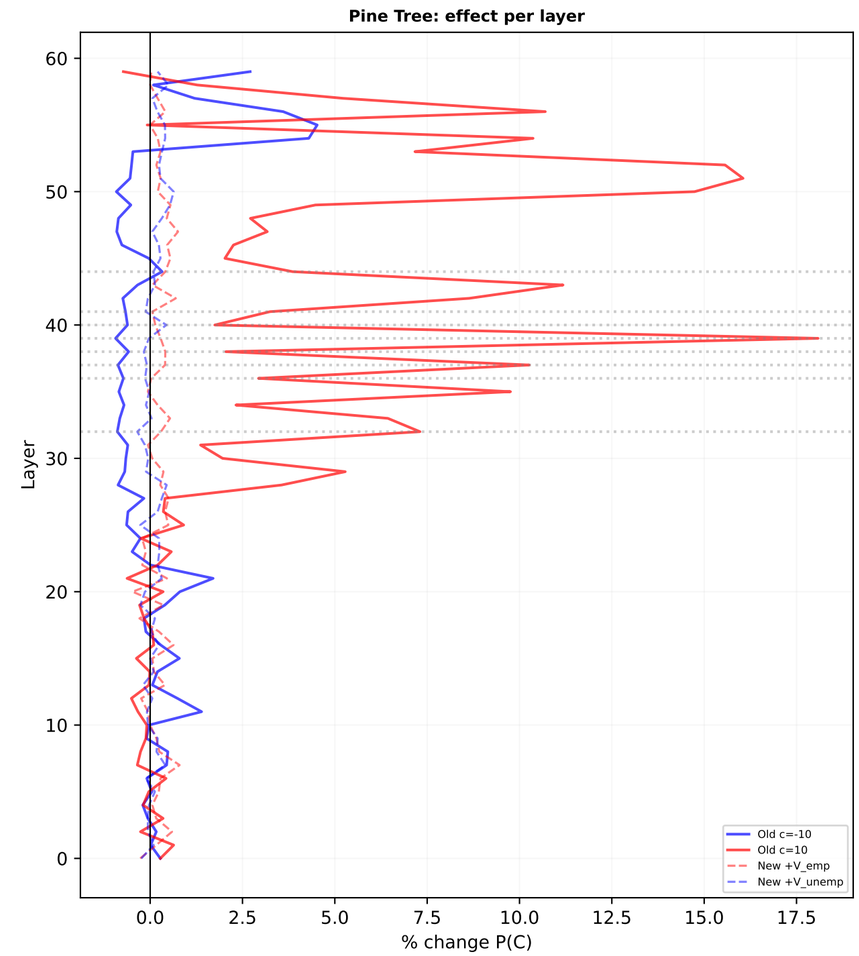


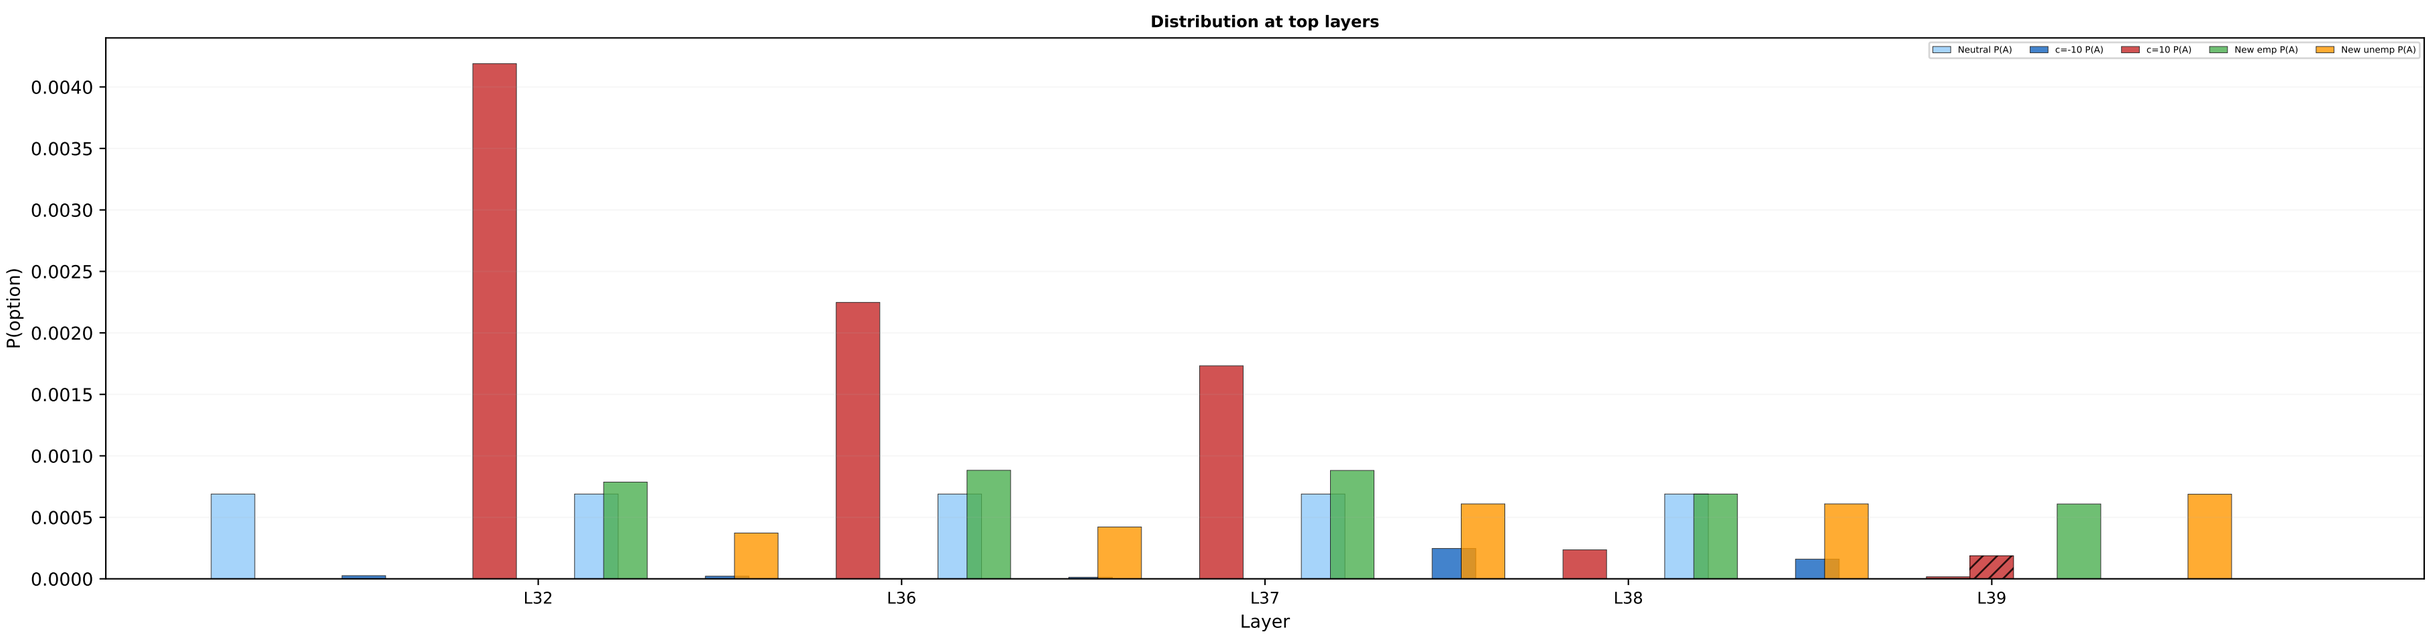


W12: 10:30 AM coffee availability | V7/cfg4

An individual is asked: "Are you usually free to meet for coffee at 10:30 AM?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

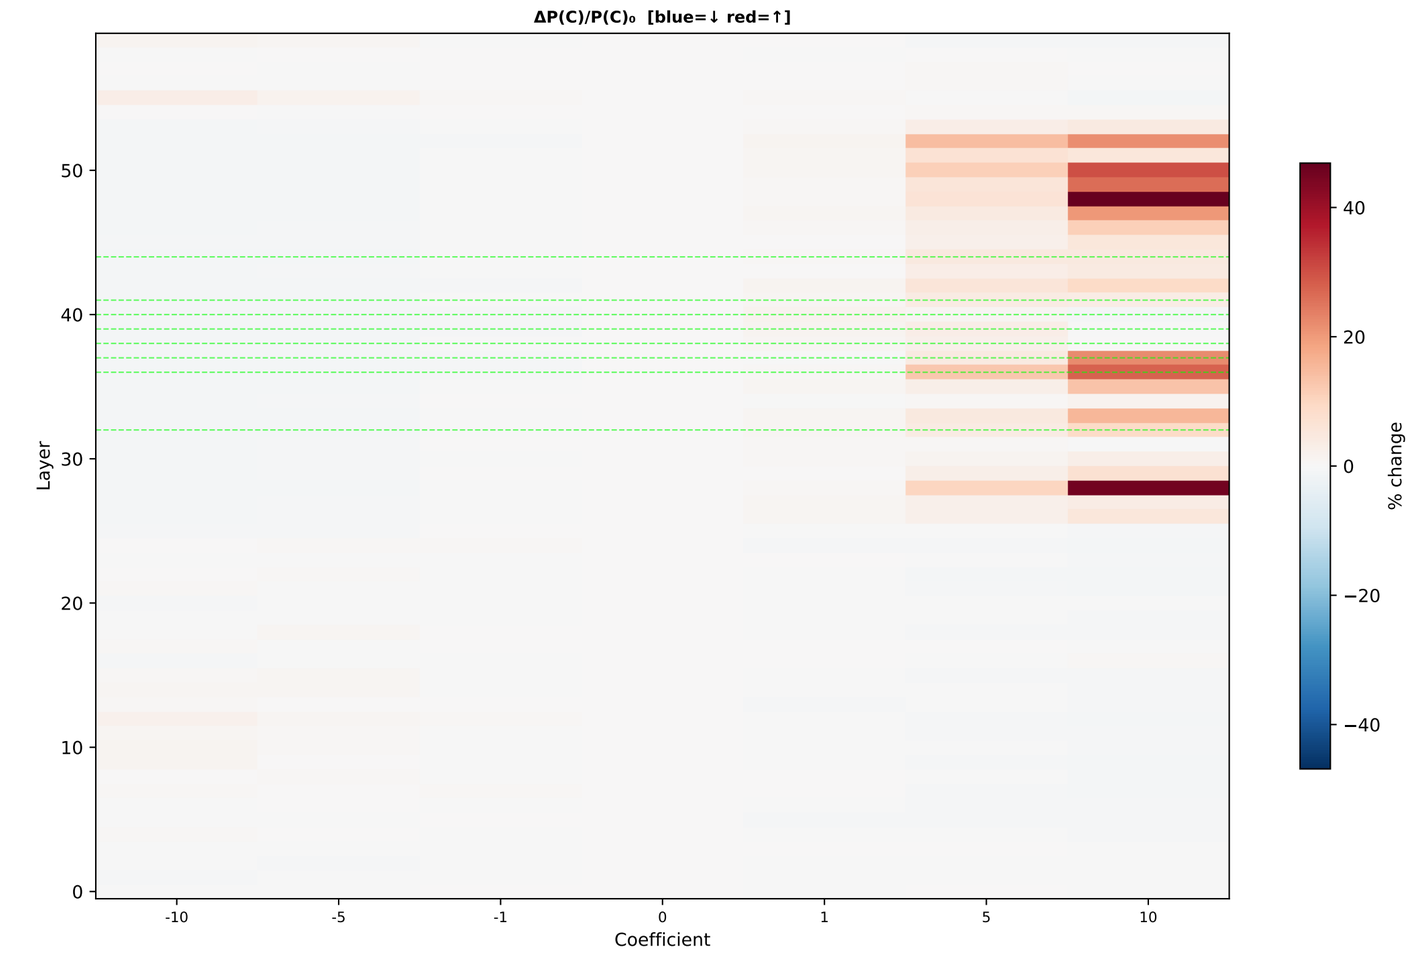


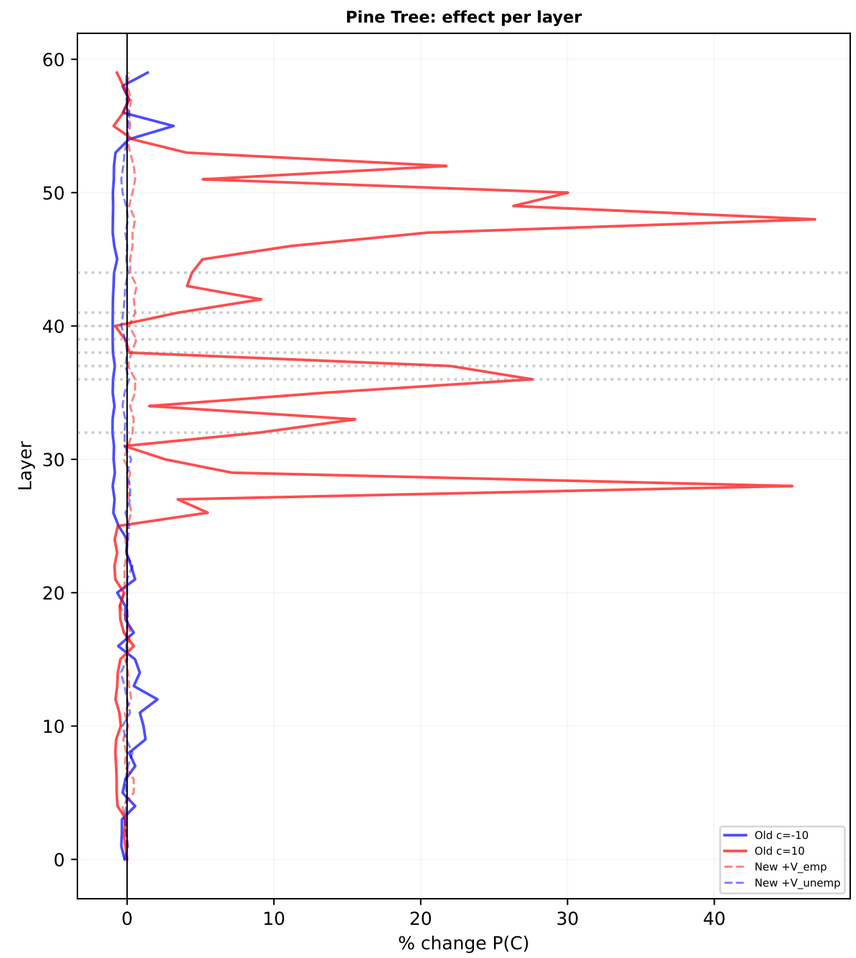


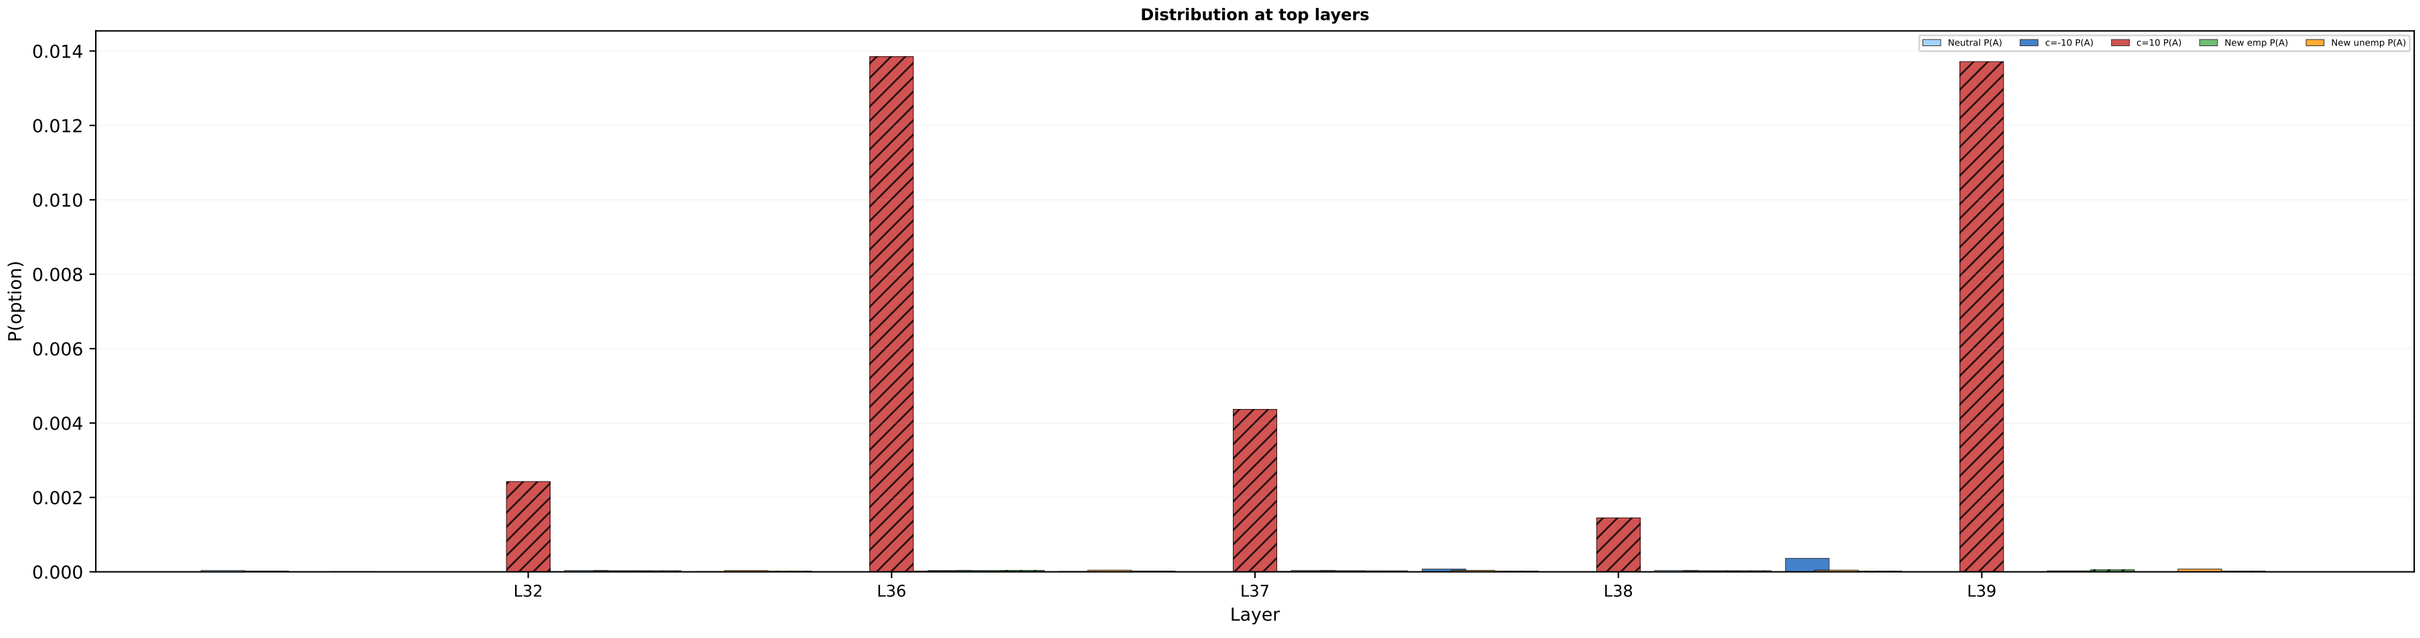


W13: Noon availability | V7/cfg4

An individual is asked: "Can you meet me for lunch at noon?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

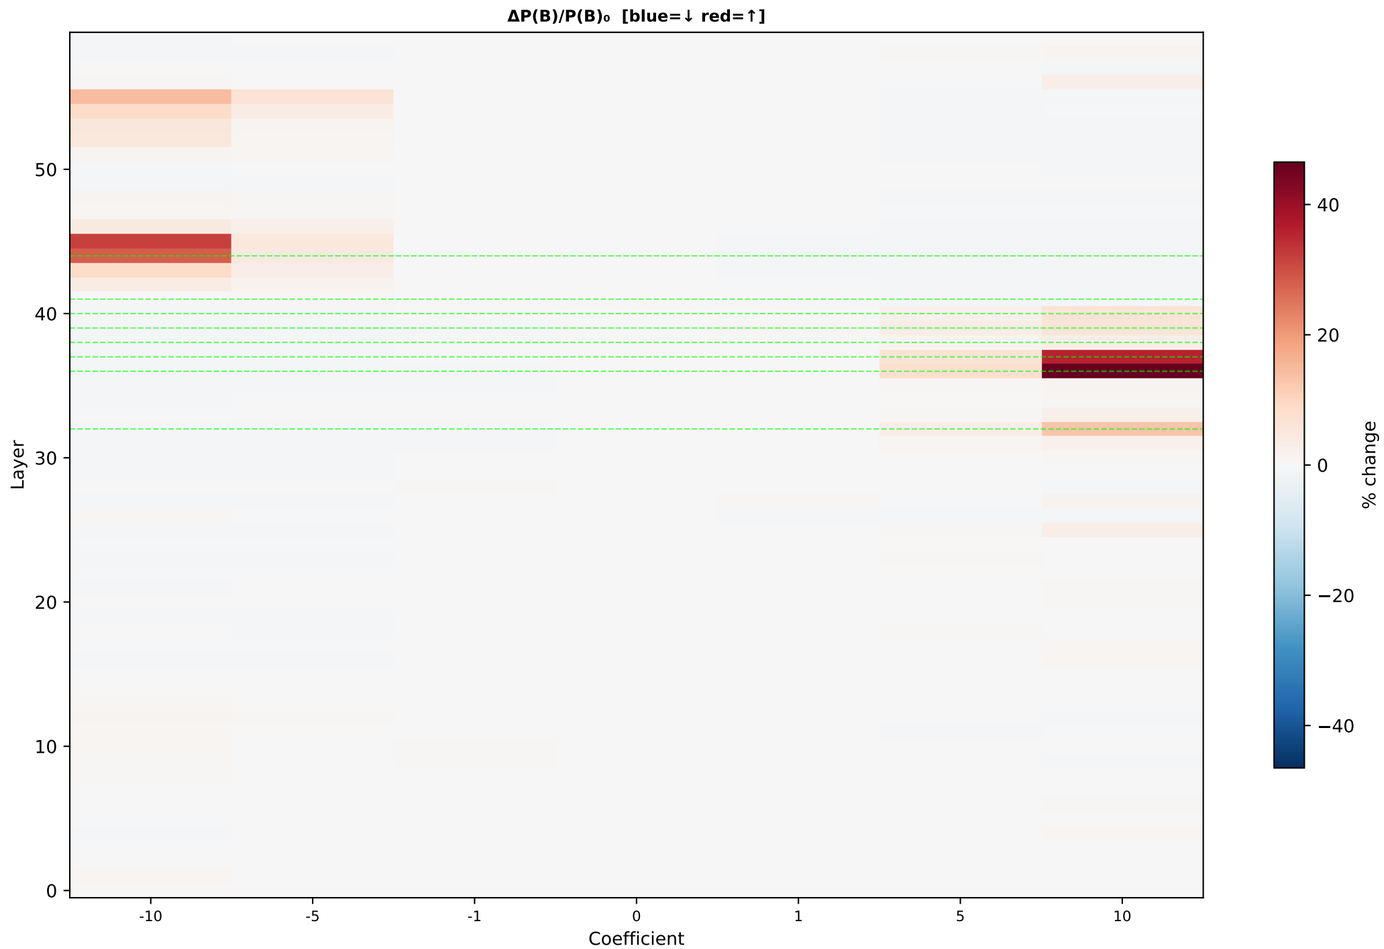


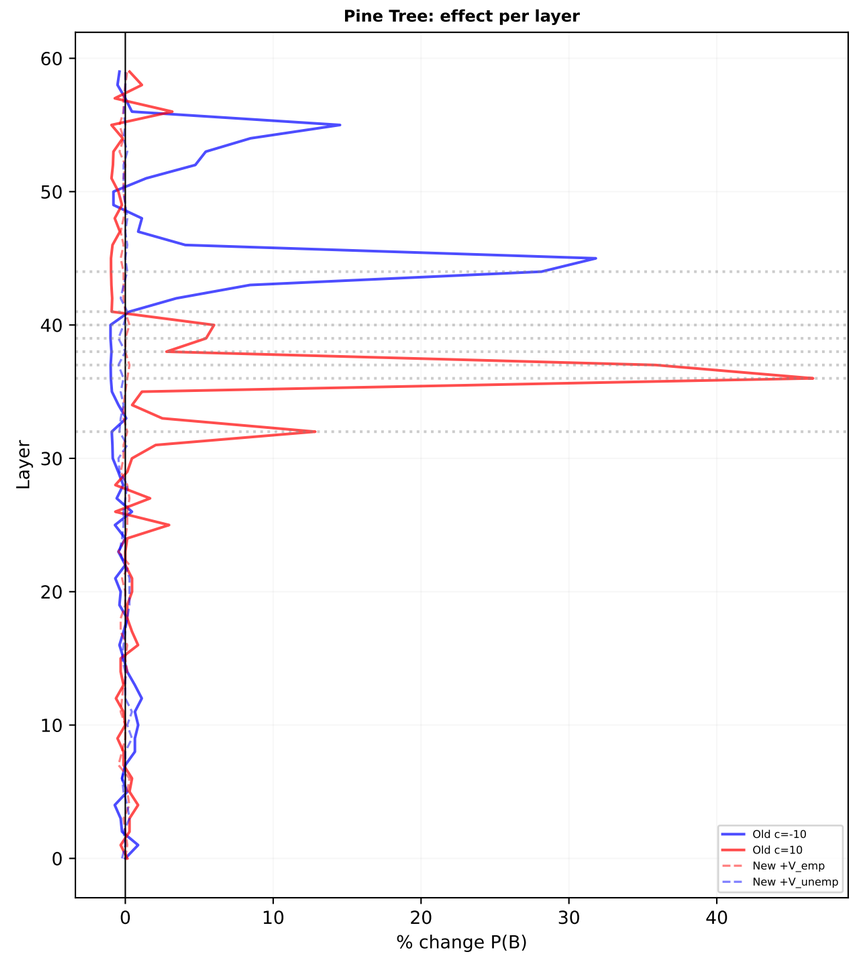


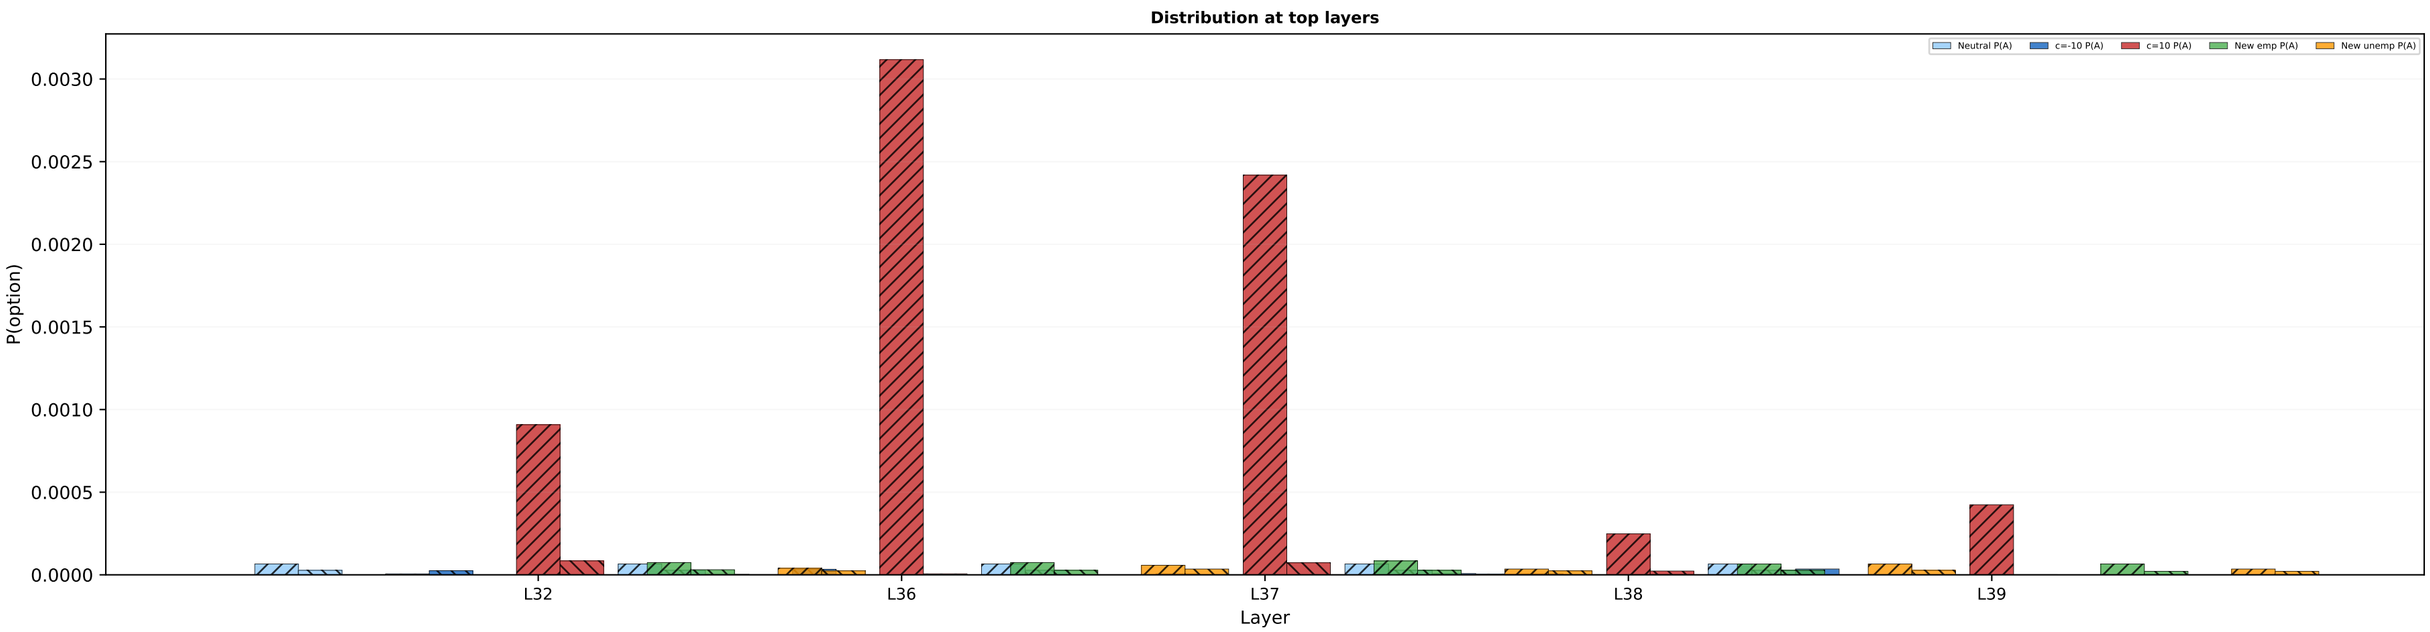


W14: 3 PM location | V7/cfg4

At 3:00 PM, an individual is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

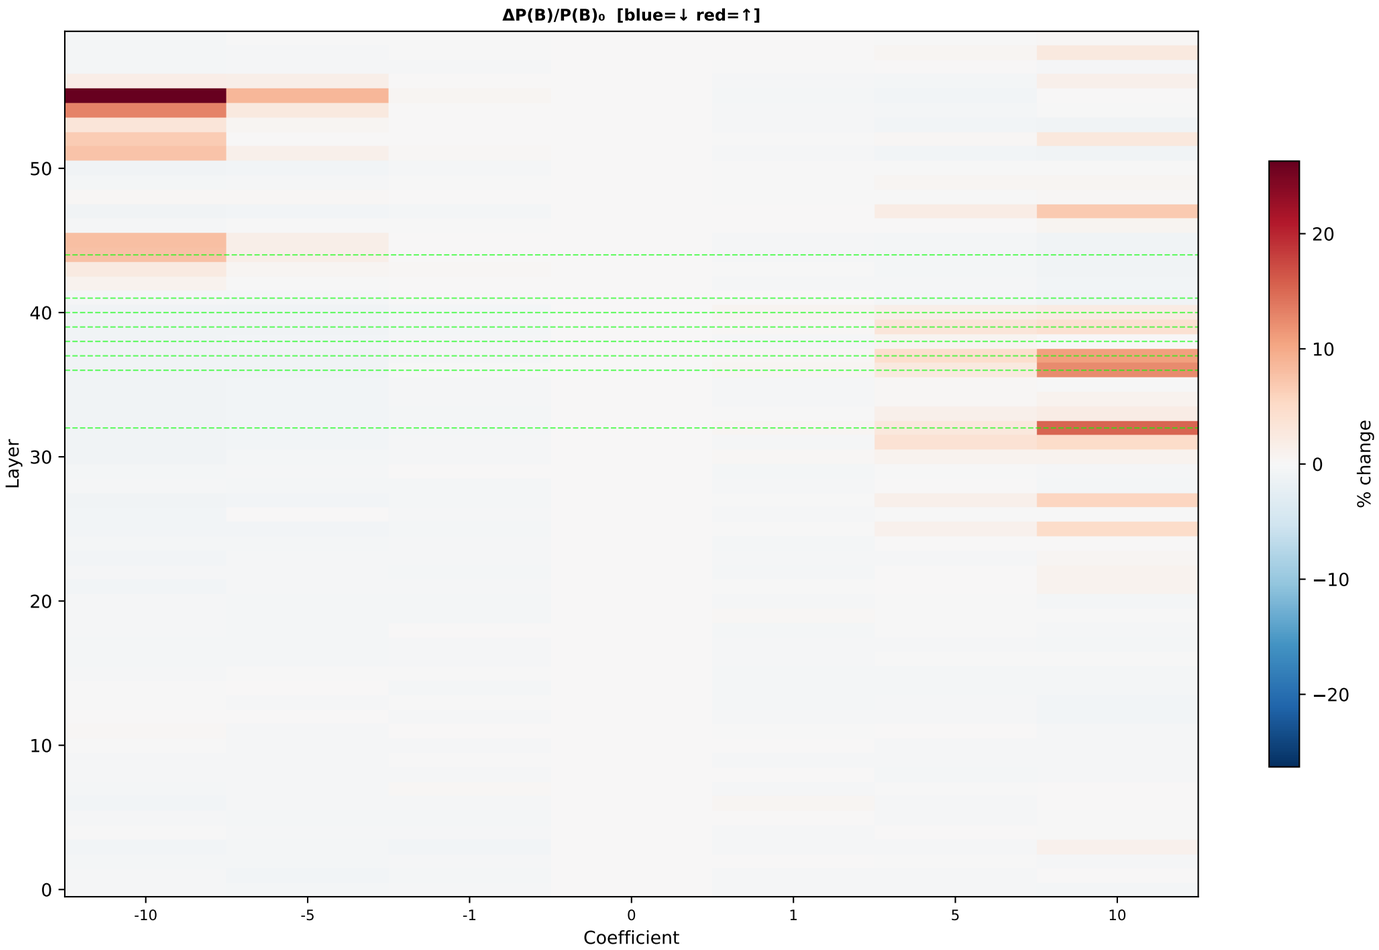


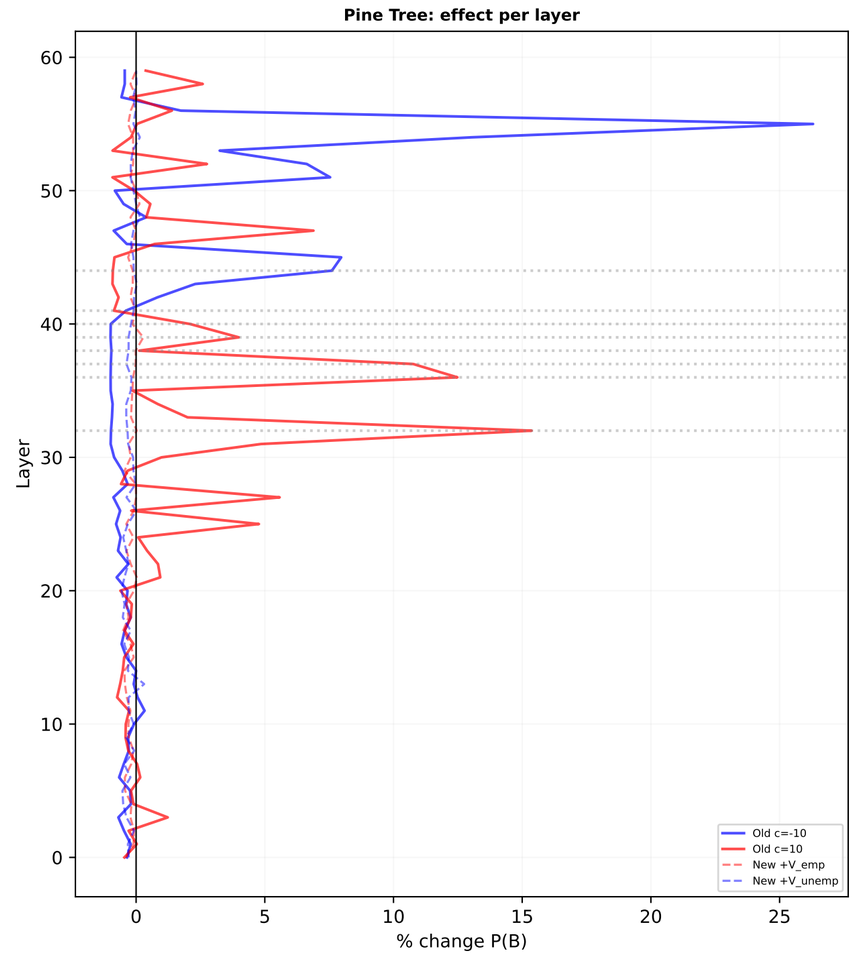


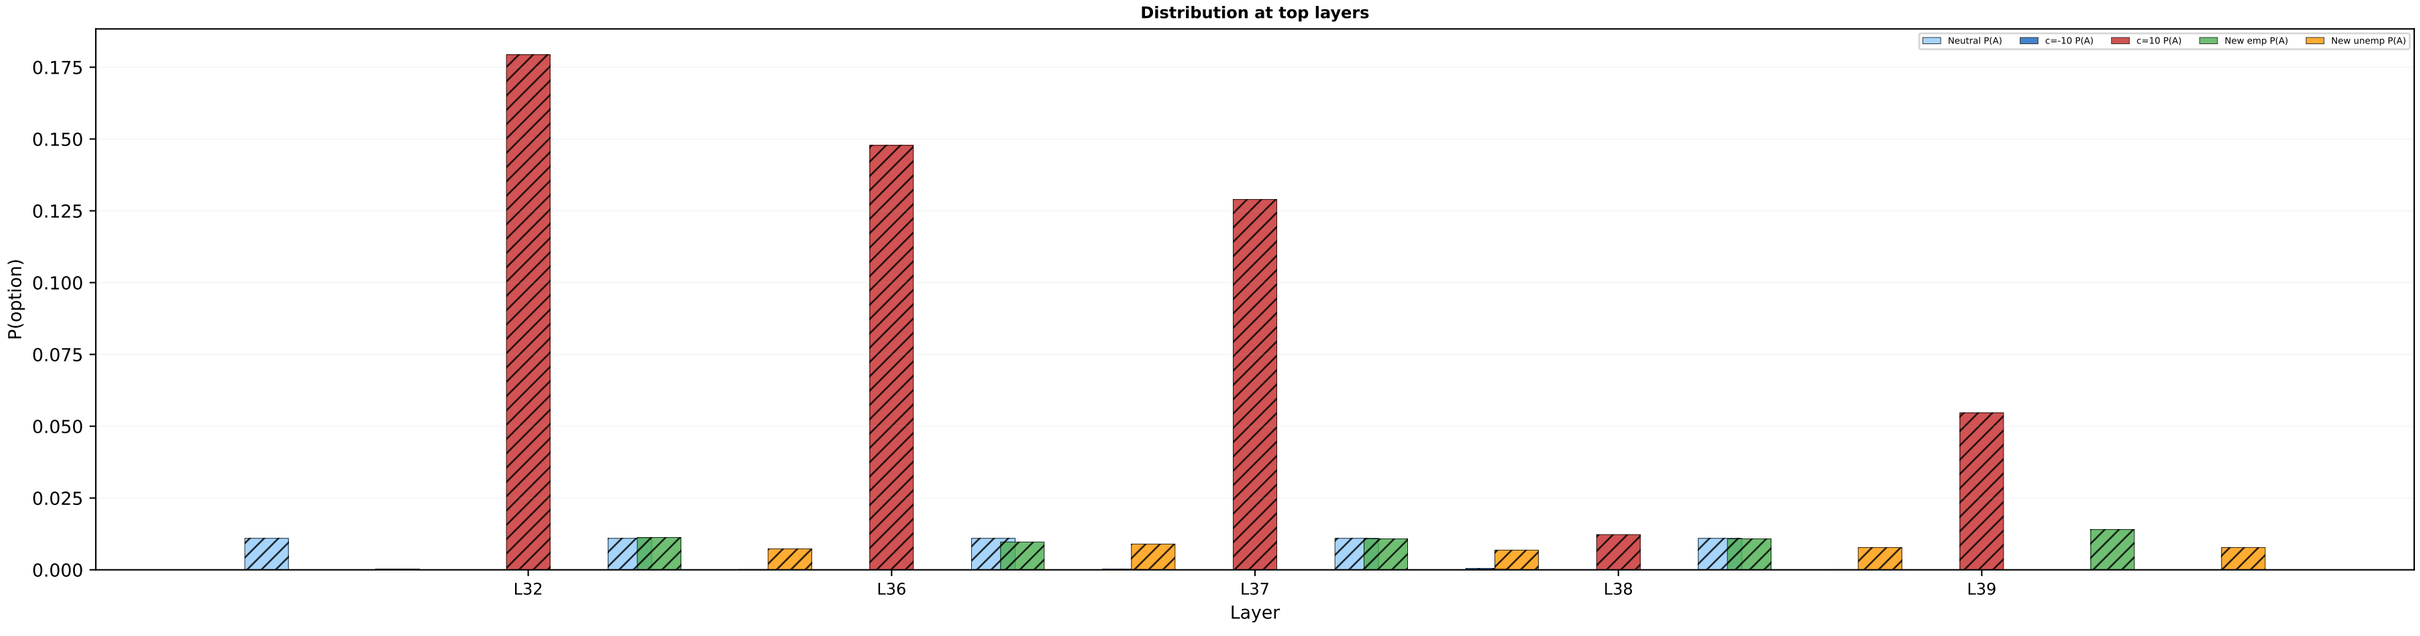


W15: 5 PM status | V7/cfg4

At 5:00 PM, an individual is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

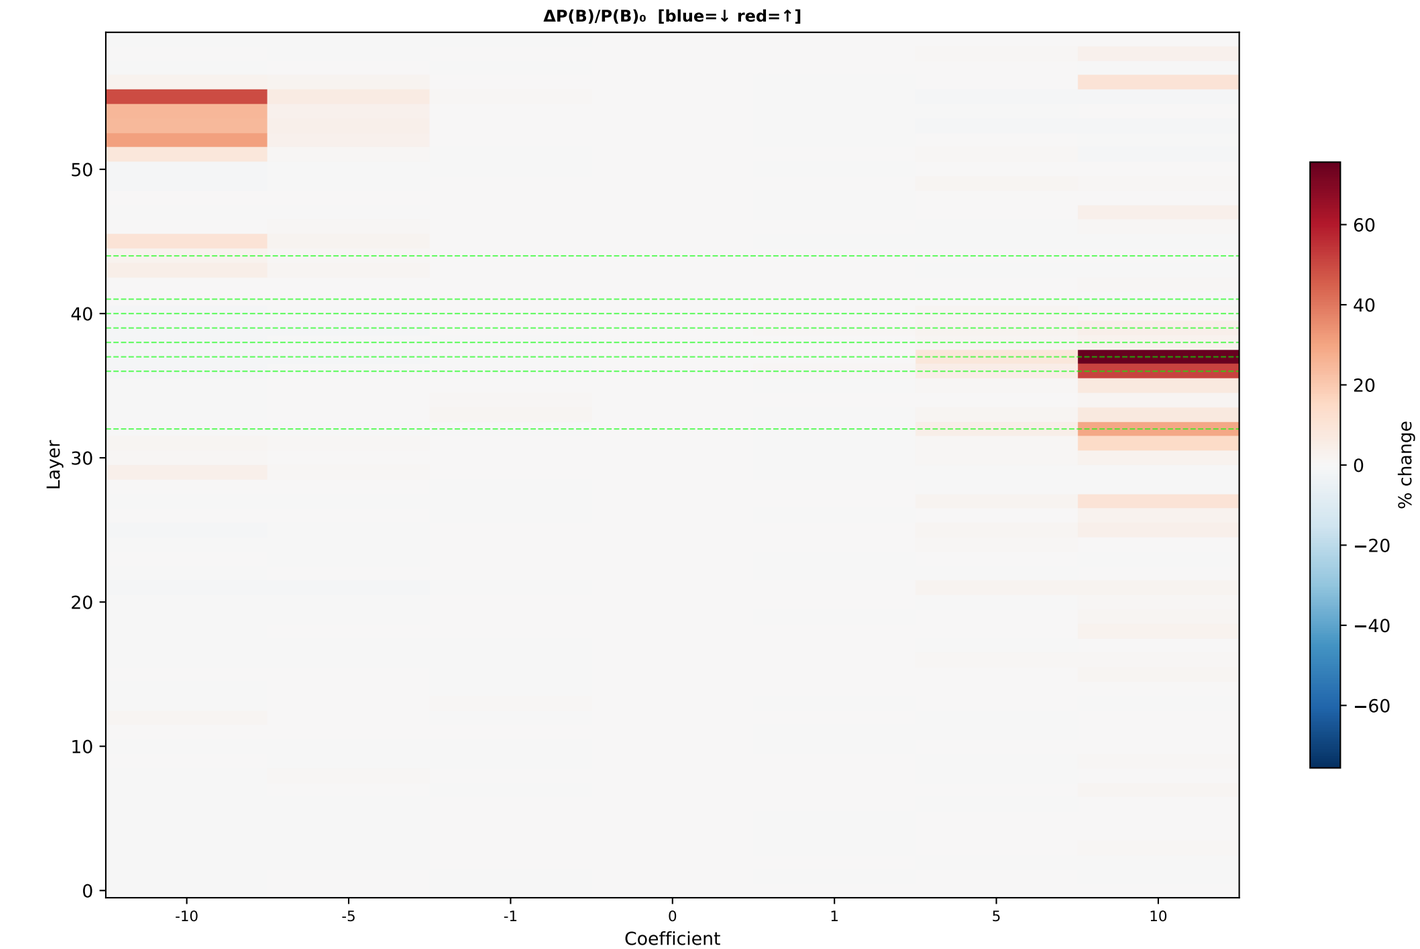


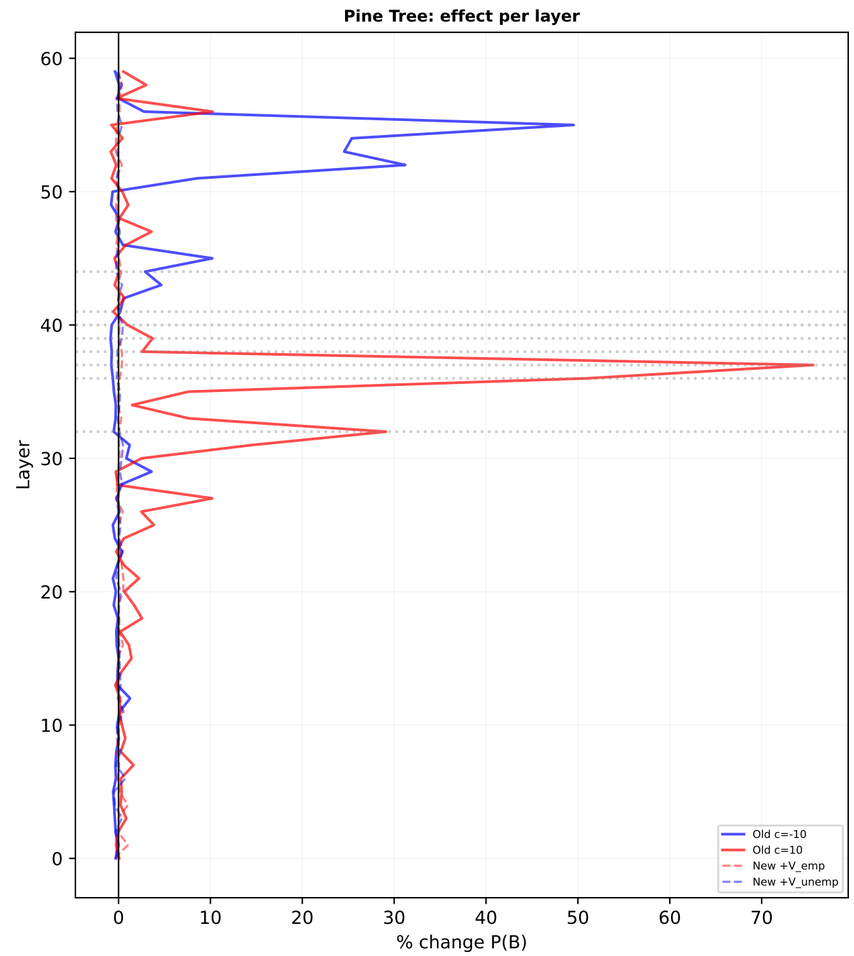


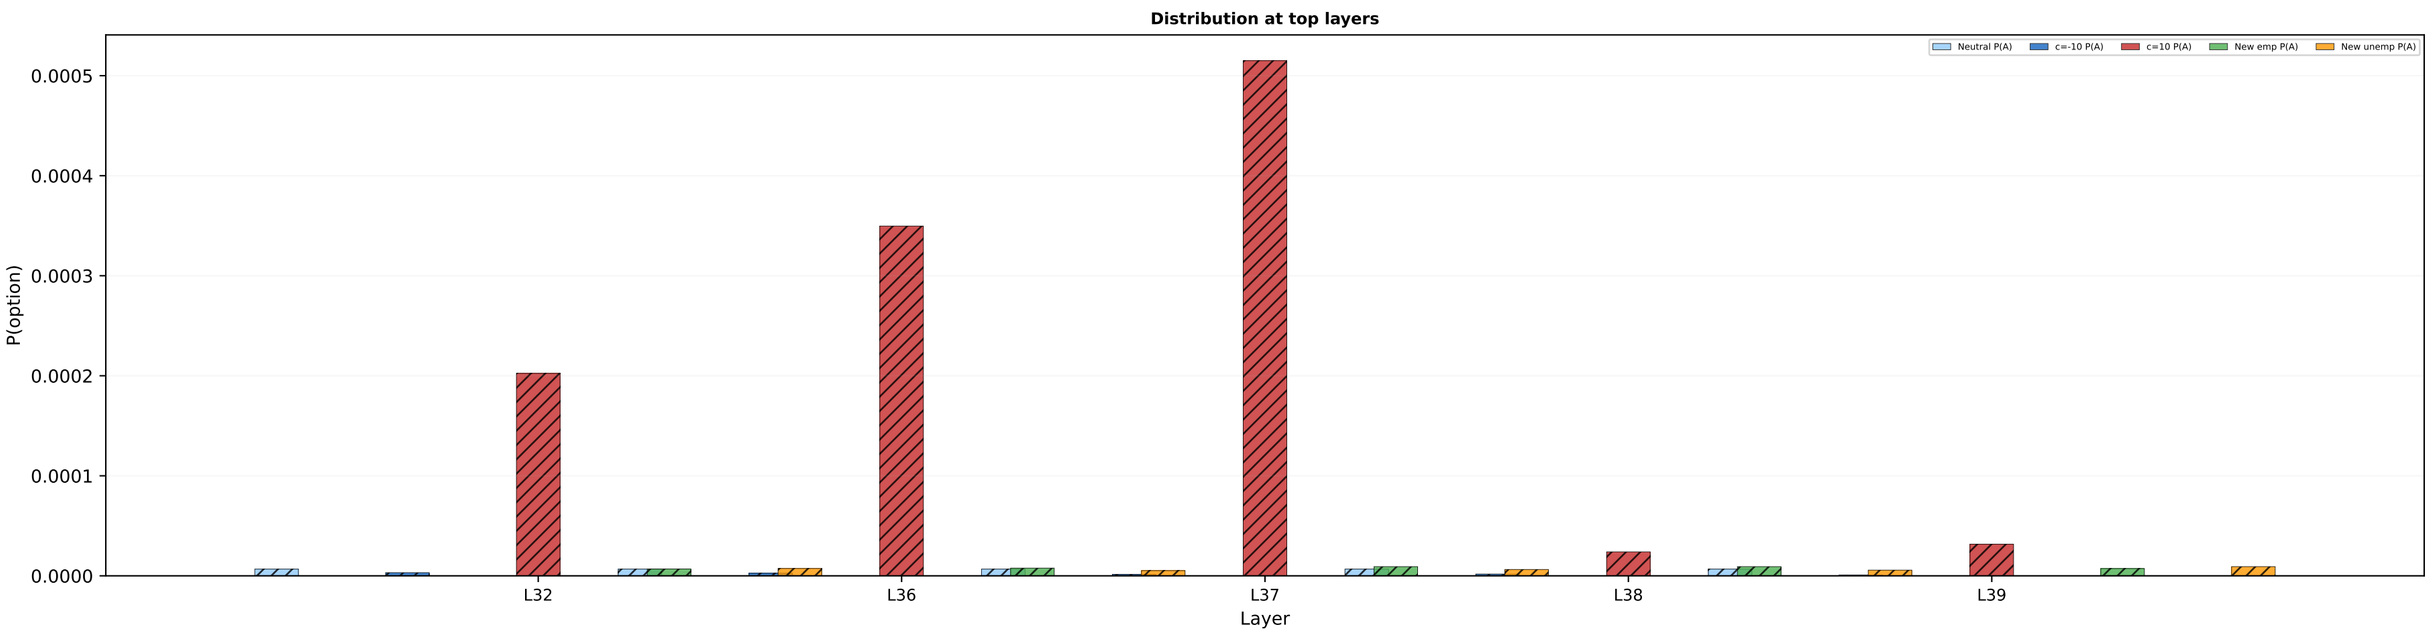


W16: 7 PM status | V7/cfg4

At 7:00 PM, an individual is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

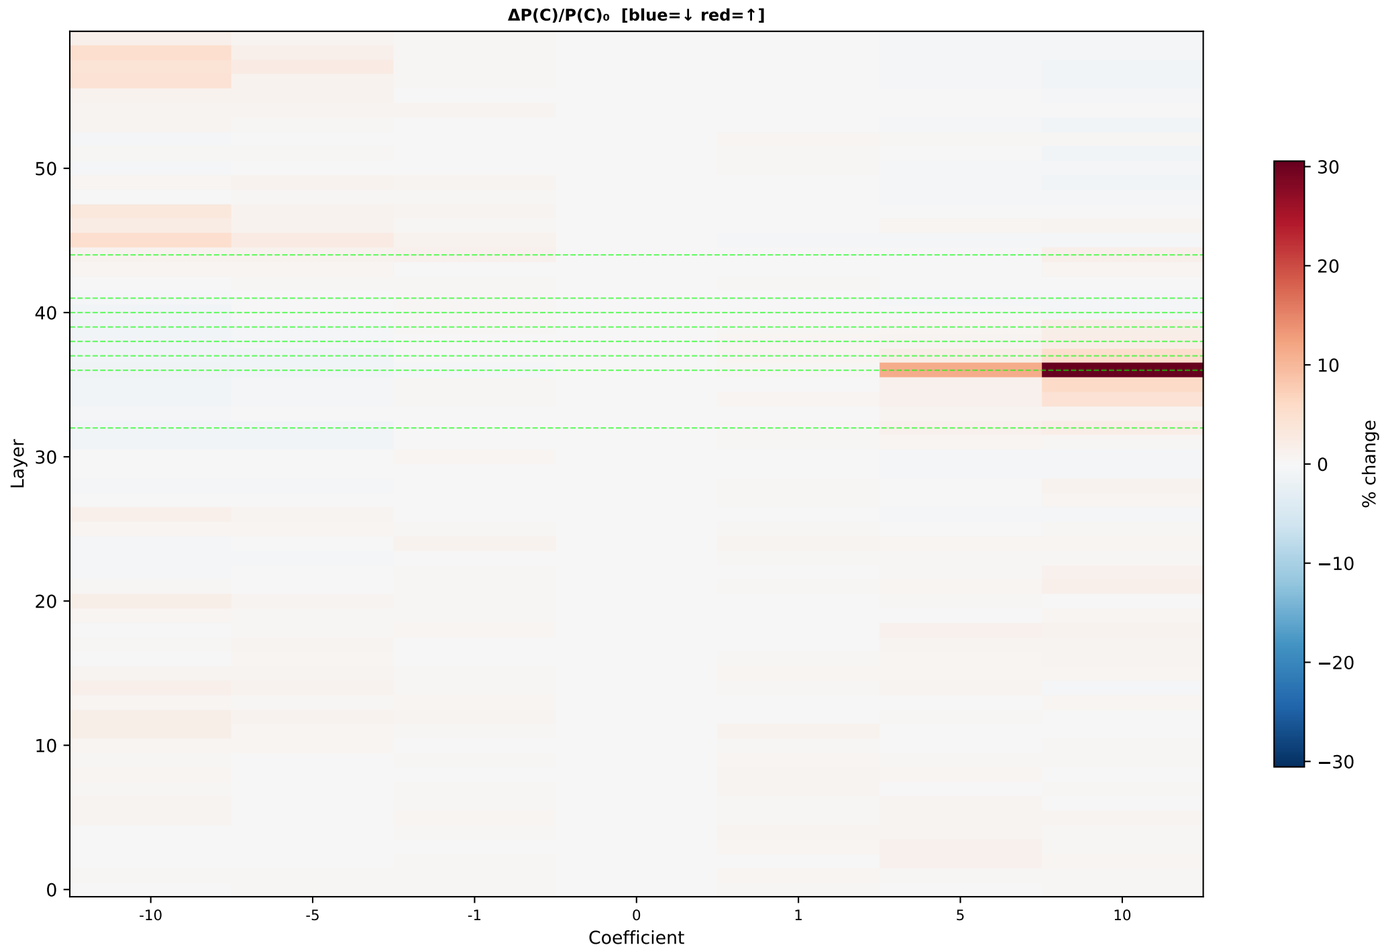


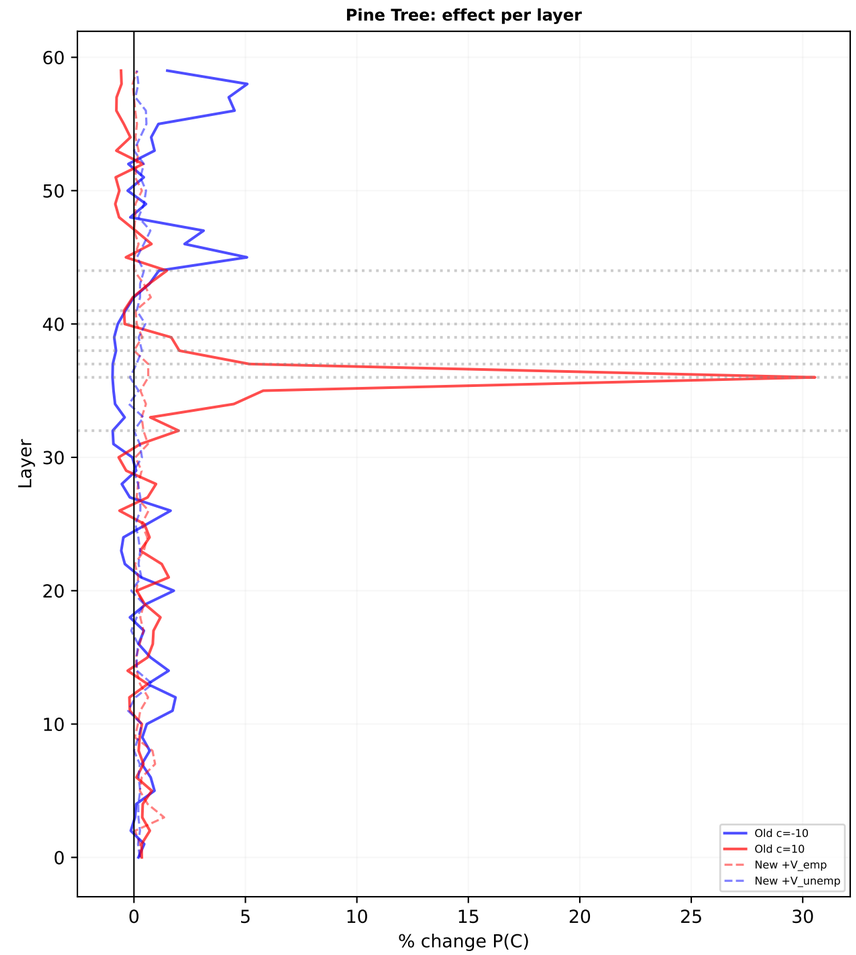


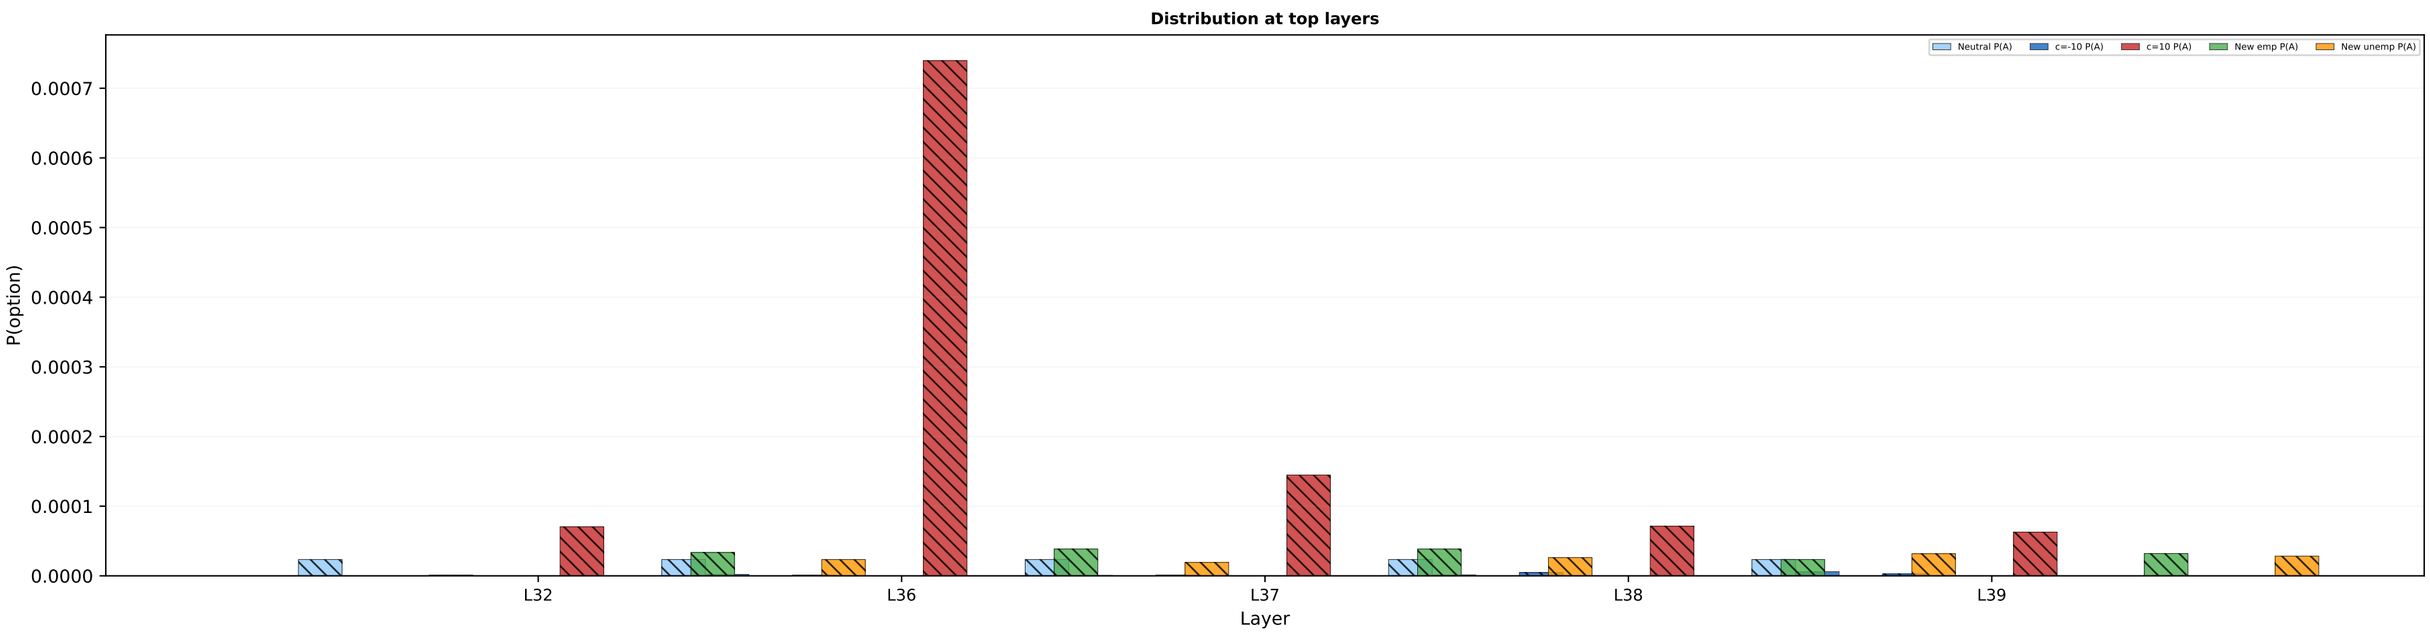


W17: Alarm clock usage | V7/cfg4

Does an individual use an alarm clock this morning? | (A) No, they wake up naturally | (B) Maybe, depending on plans | (C) Yes, set for a specific early time | Answer: (

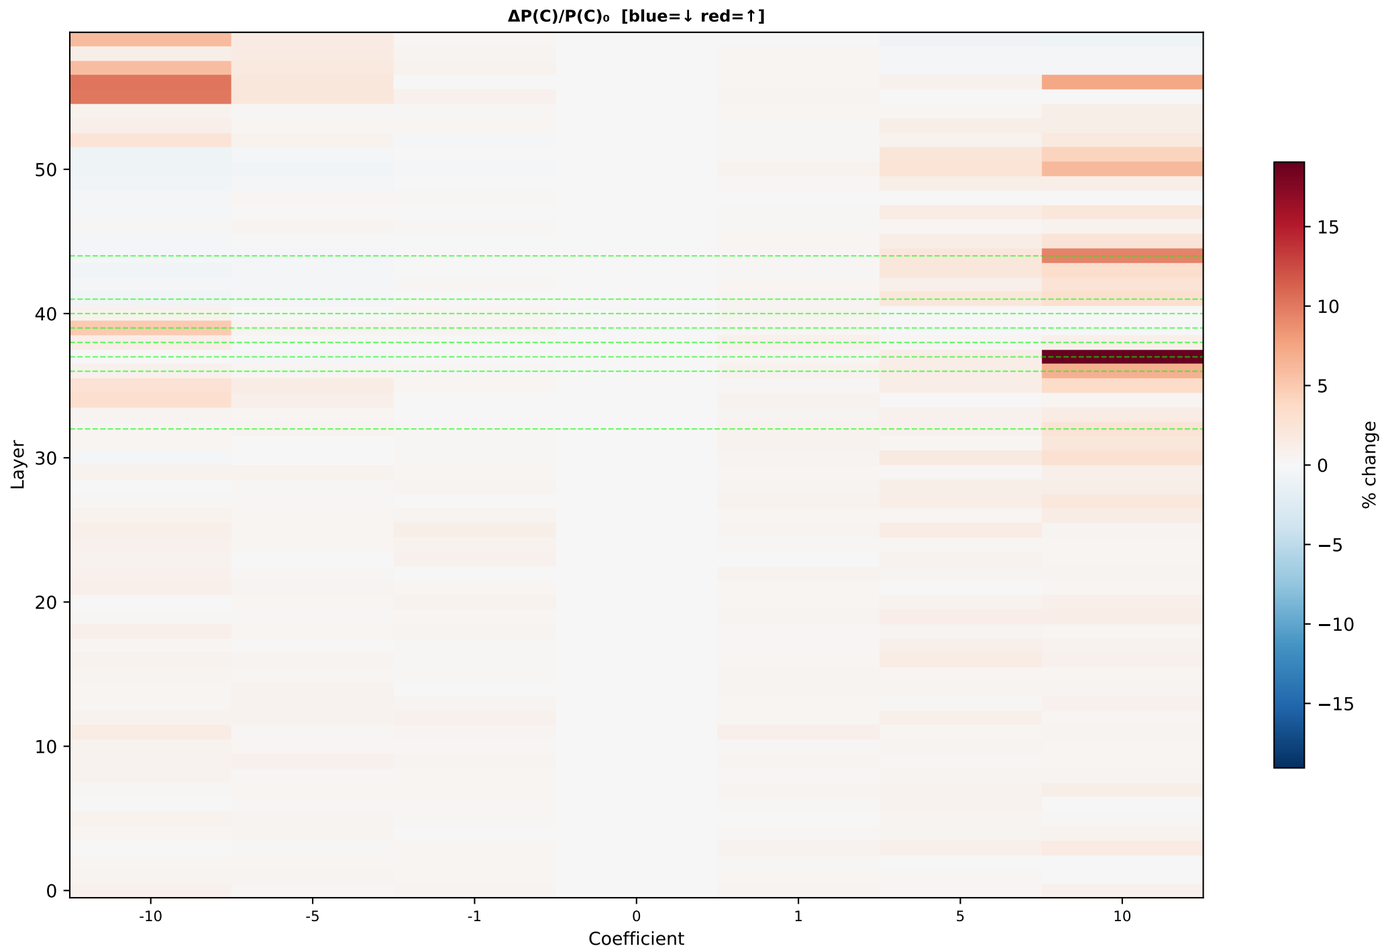


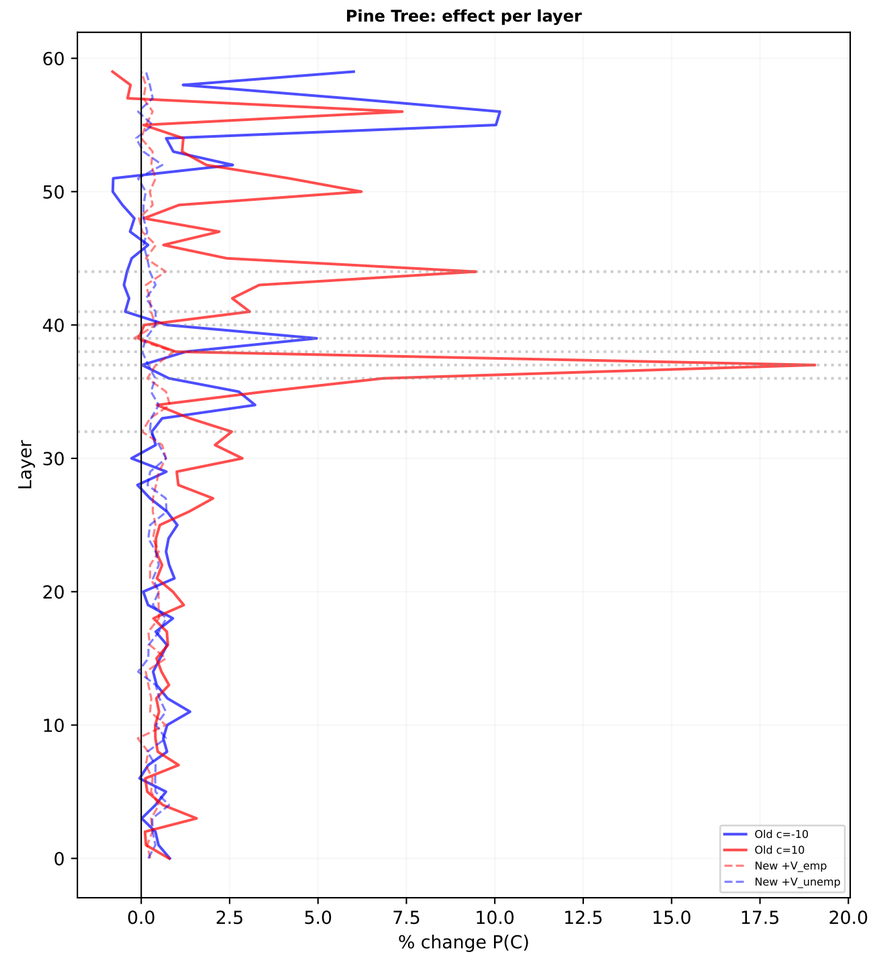


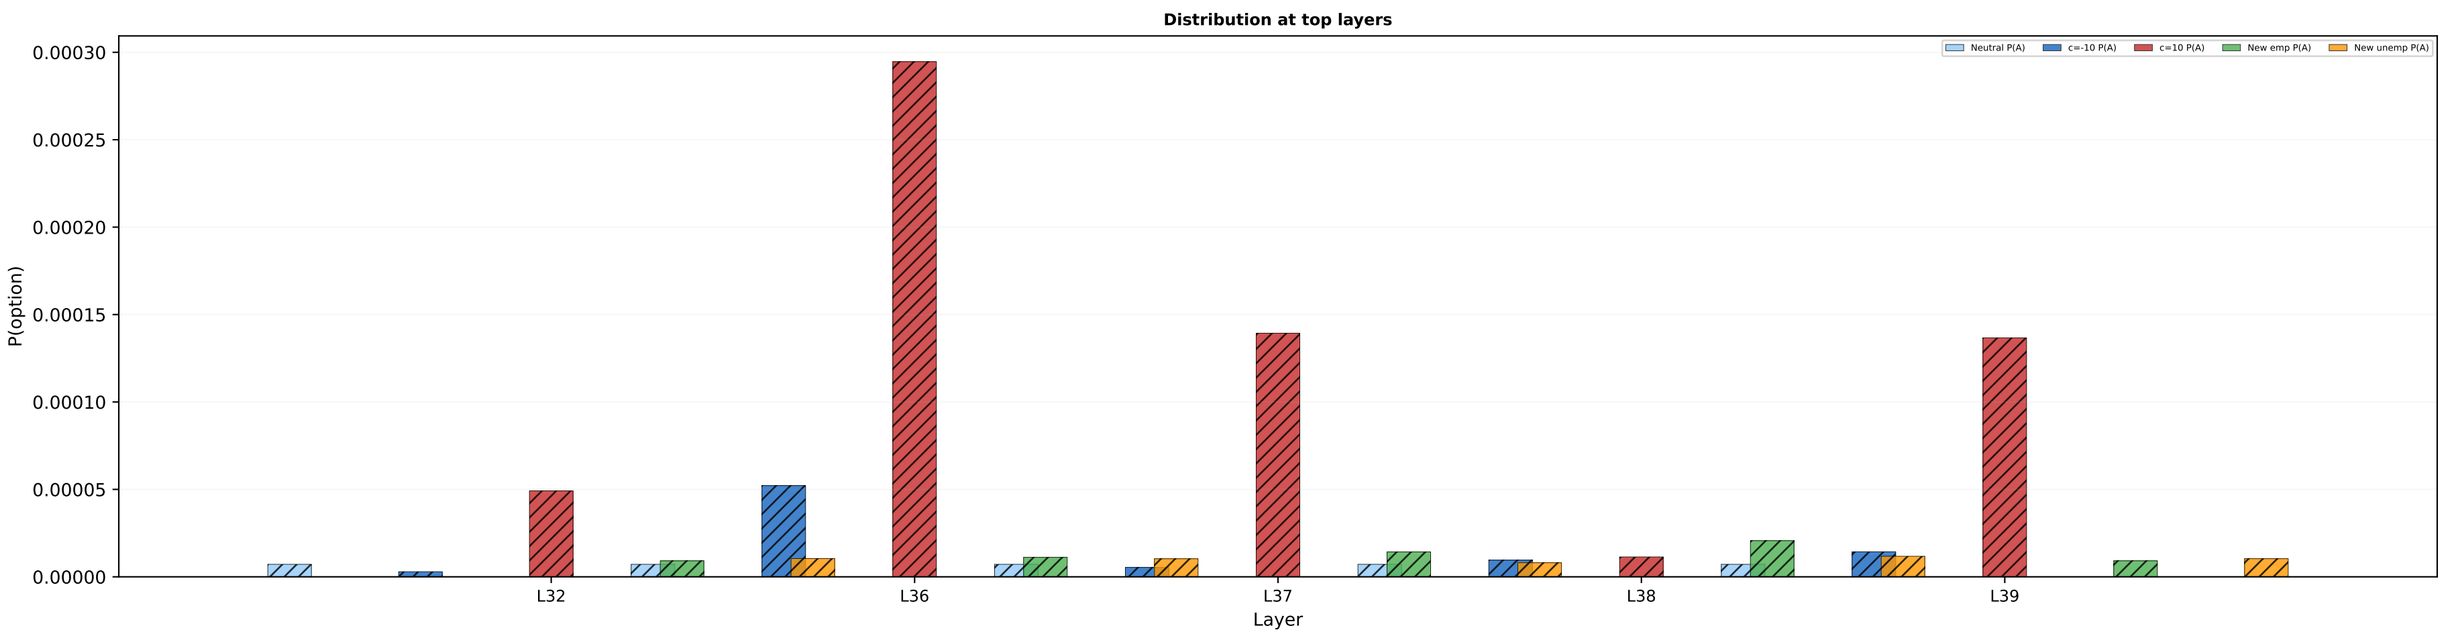


W18: Departure time consistency | V7/cfg4

Does an individual leave home at the same time today as they did the same day last week? | (A) No, the departure time is very different | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

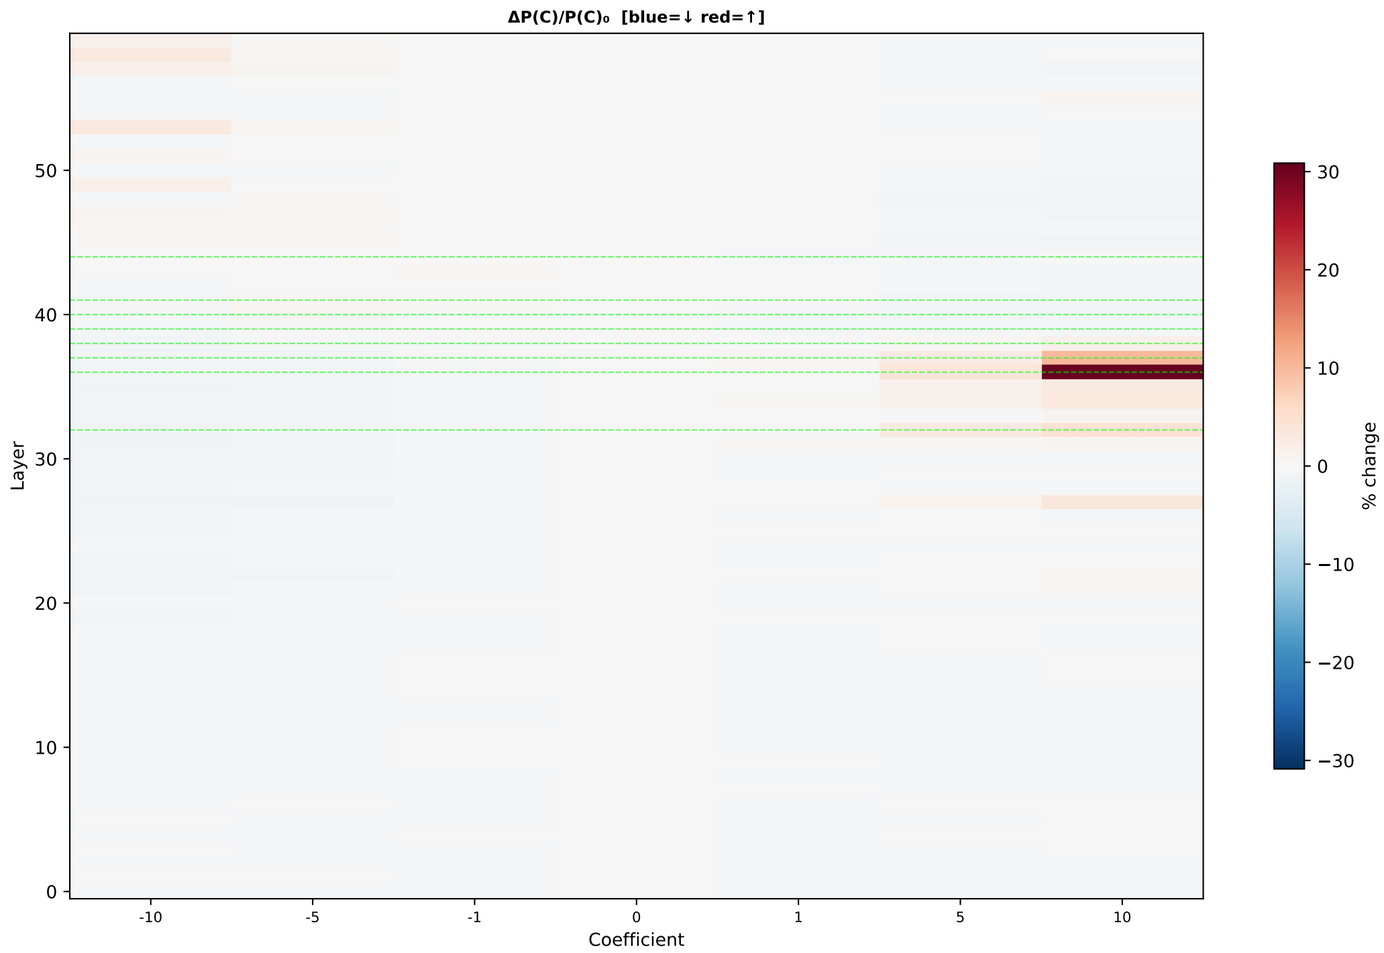


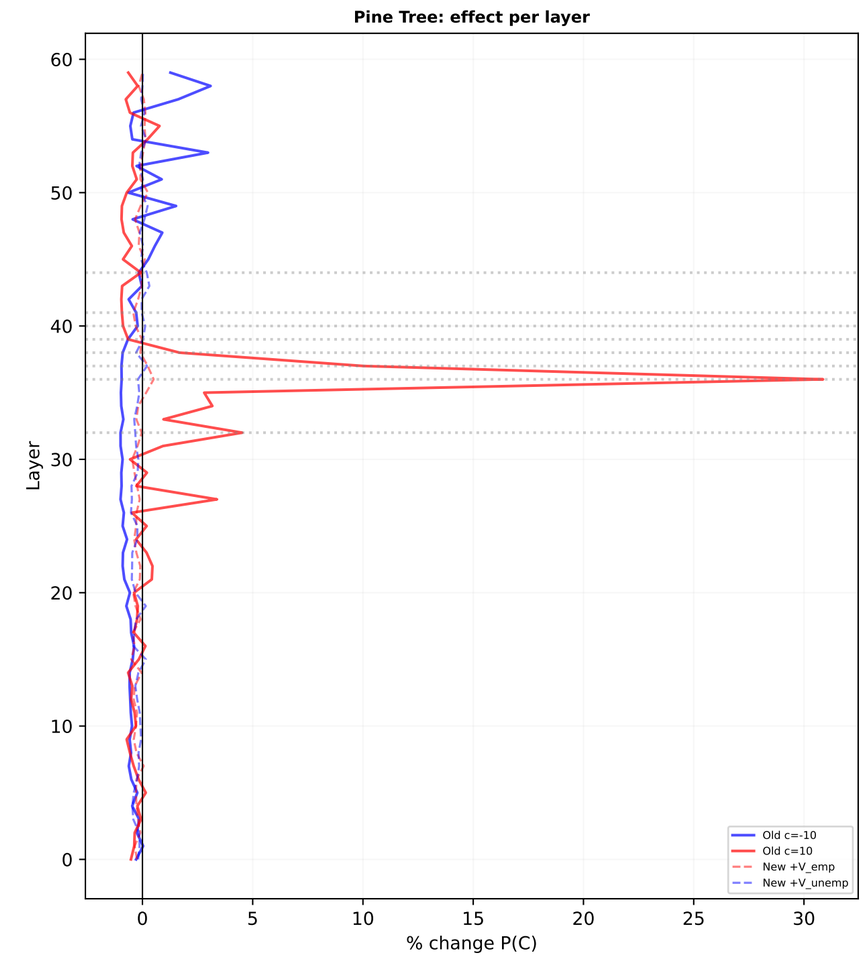


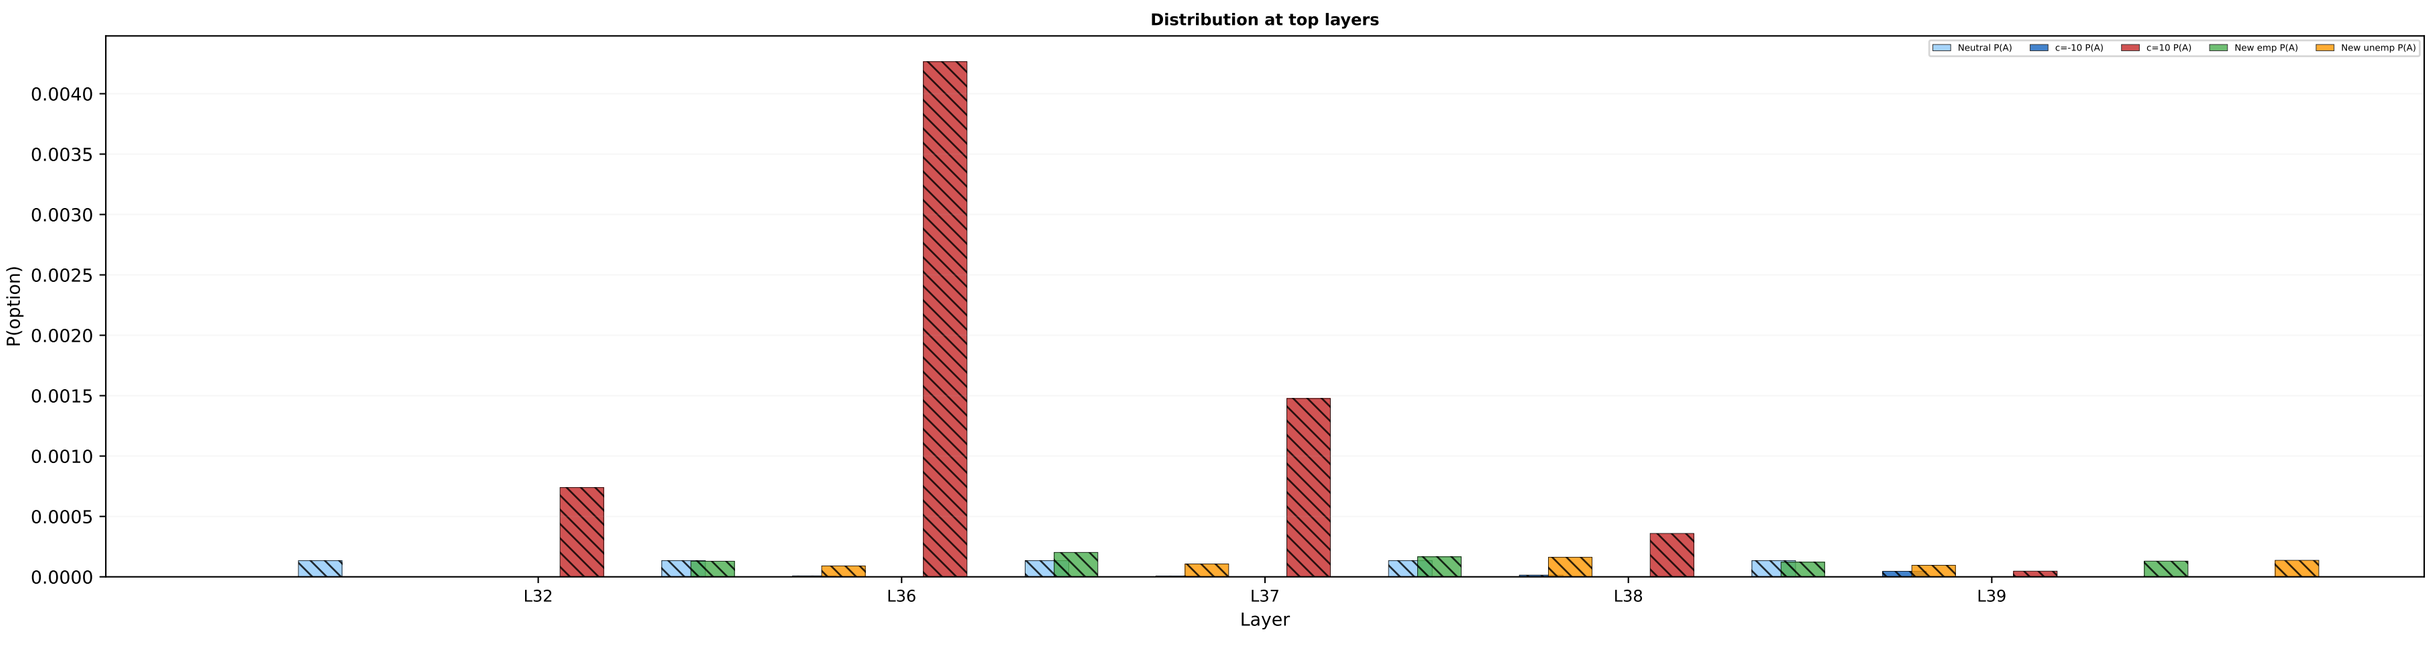


W19: Noon location consistency | V7/cfg4

Is an individual at the same non-home location at noon today as they were at noon last week? | (A) No, they are at home today | (B) They are out, but at a different location | (C) Yes, at the same location | Answer: (

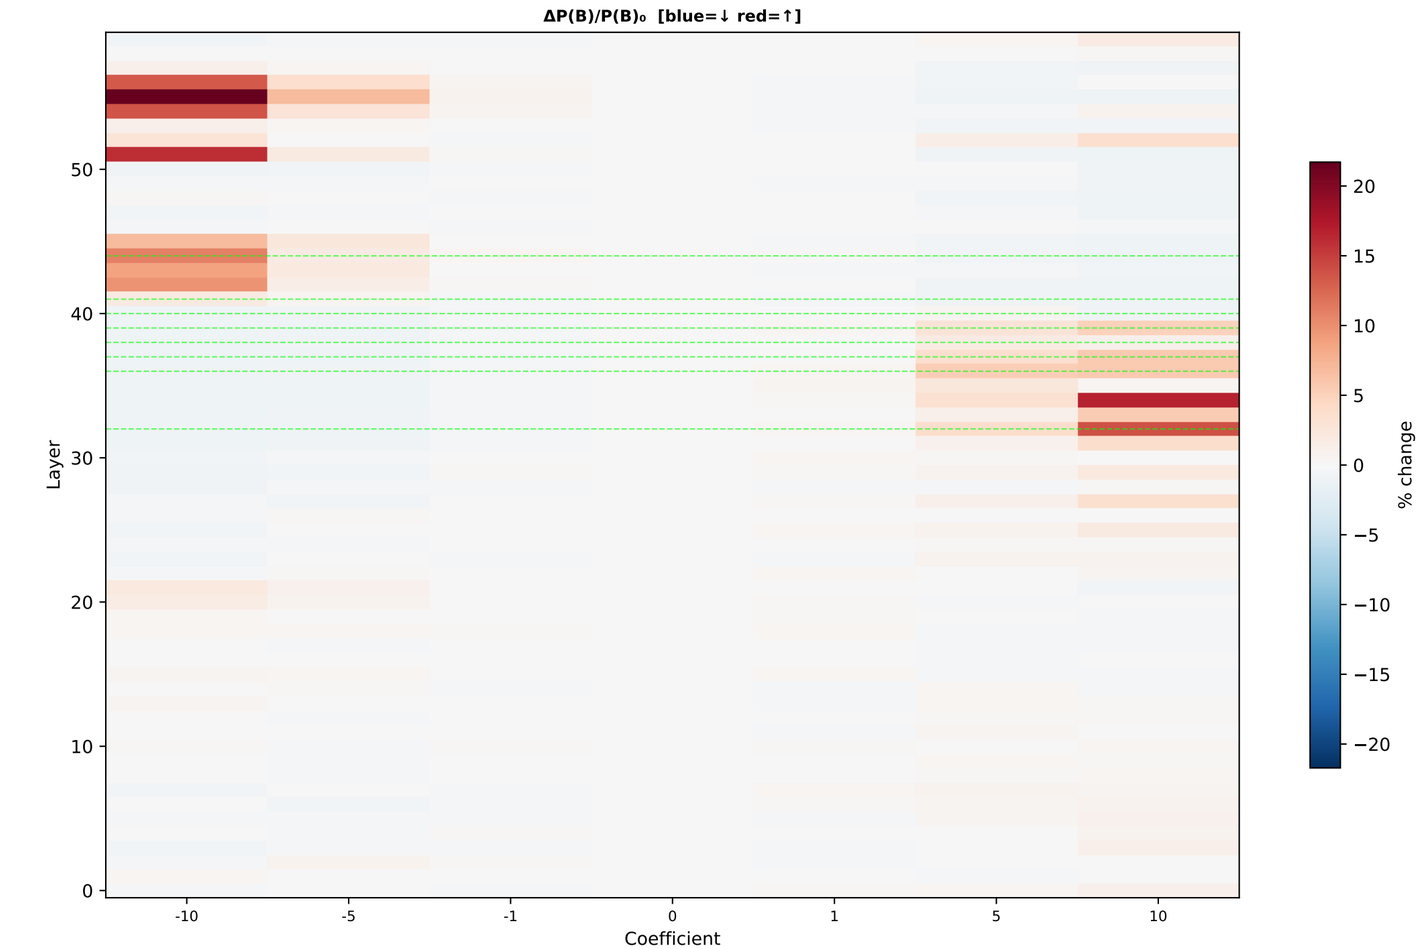


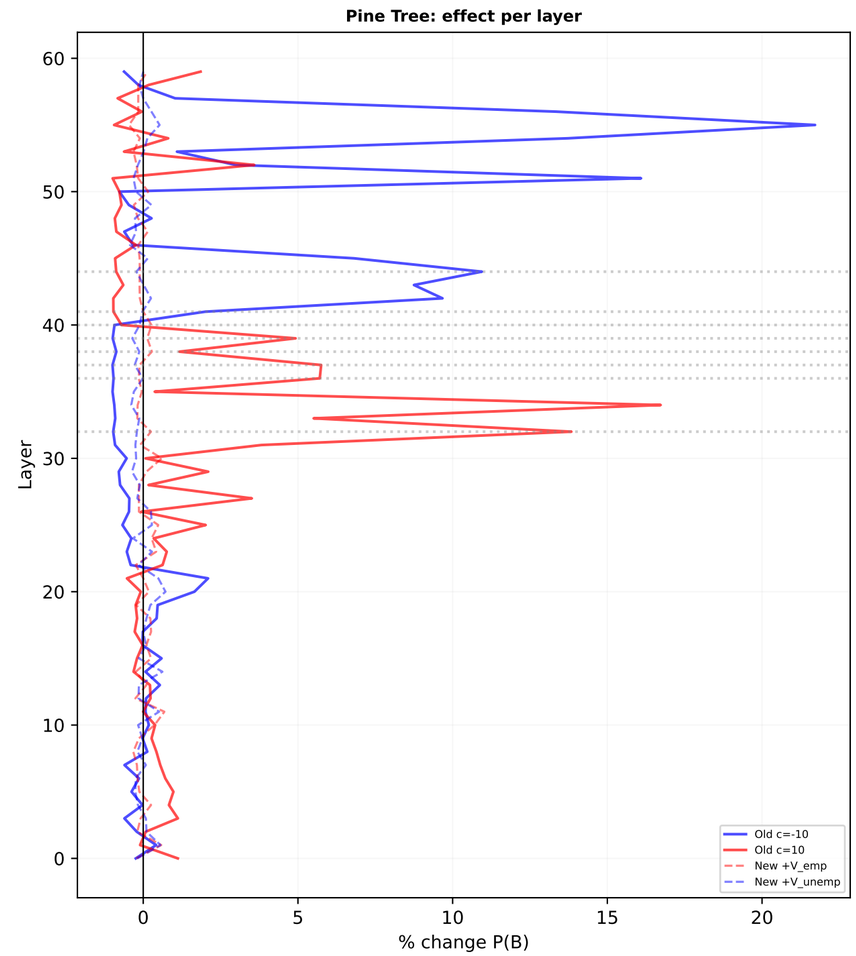


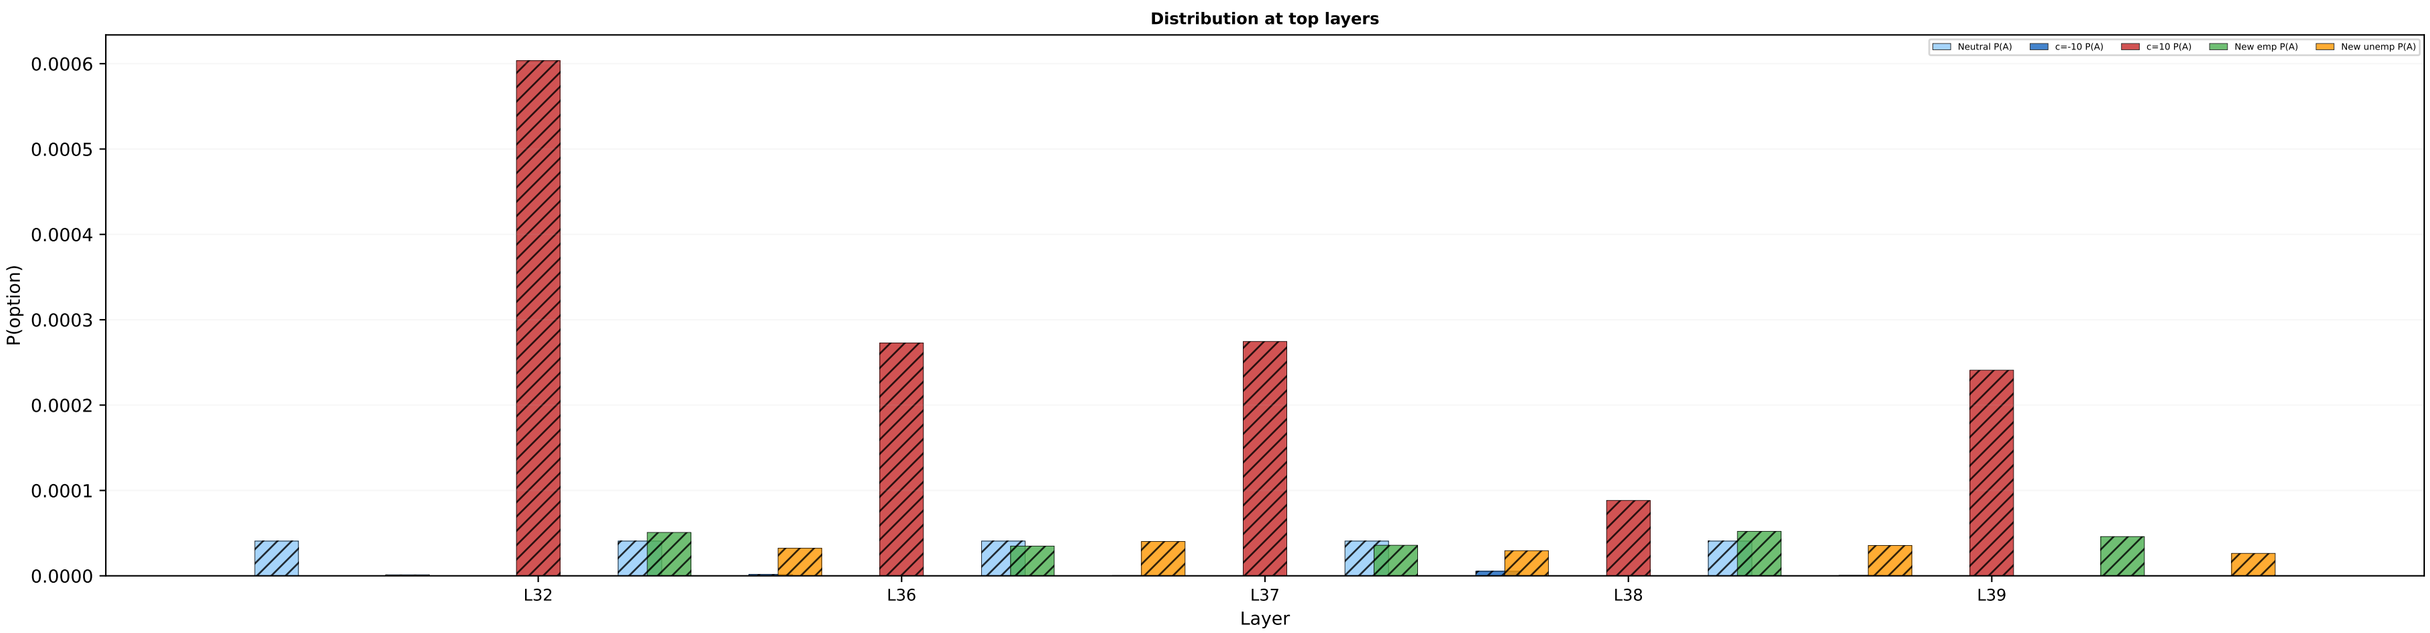


W20: 1 PM location | V7/cfg4

If an individual is asked at 1 PM: "Where are you right now?" | The most likely answer is: | (A) "I am at home." | (B) "I am at a regular place I go to most days." | (C) "I am out, but somewhere different from usual." | Answer: (

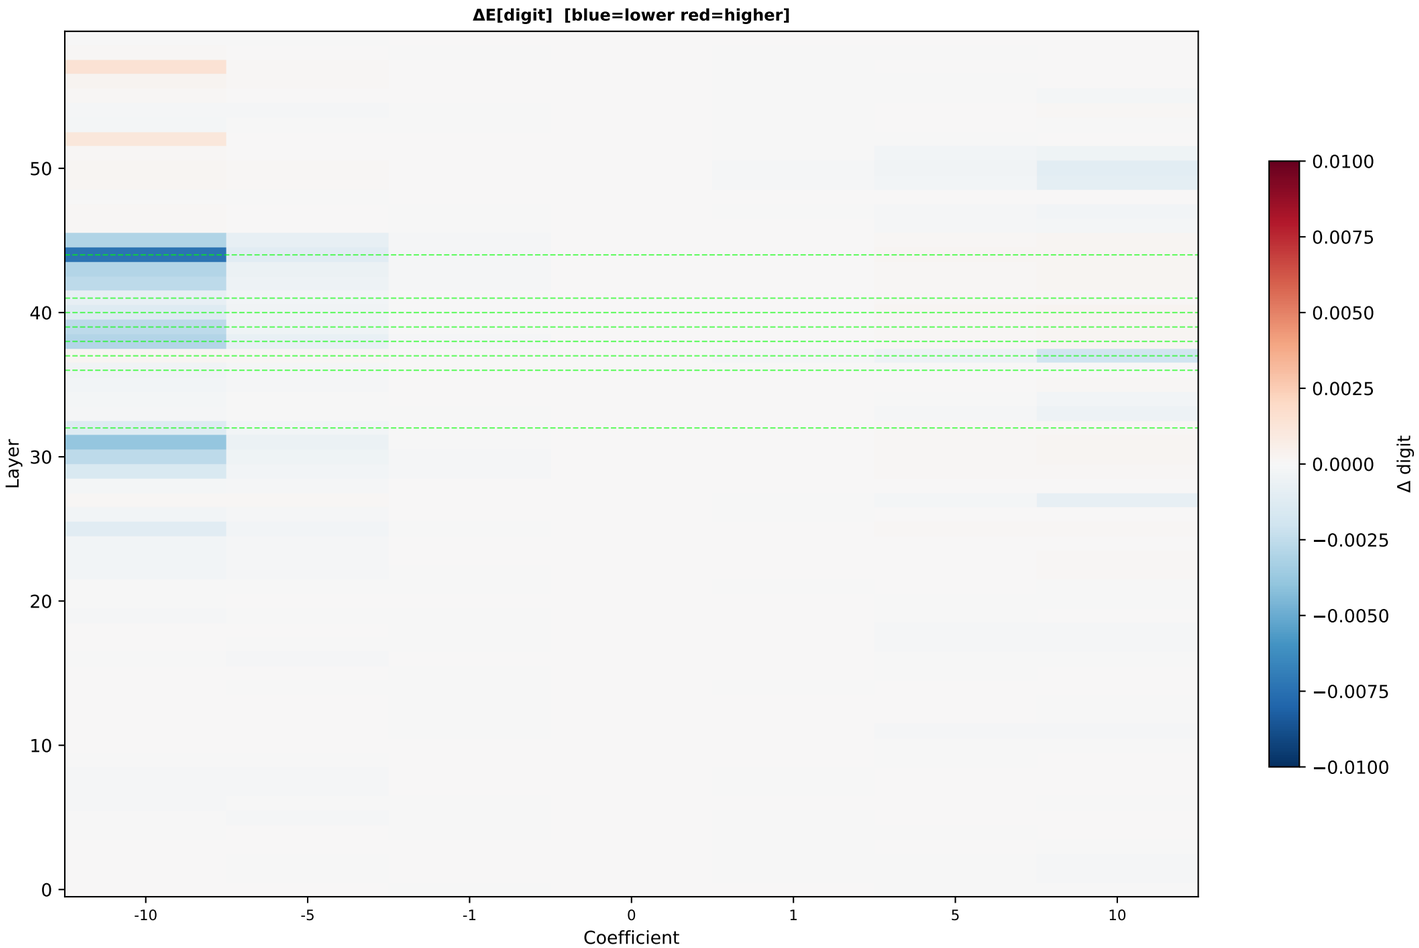


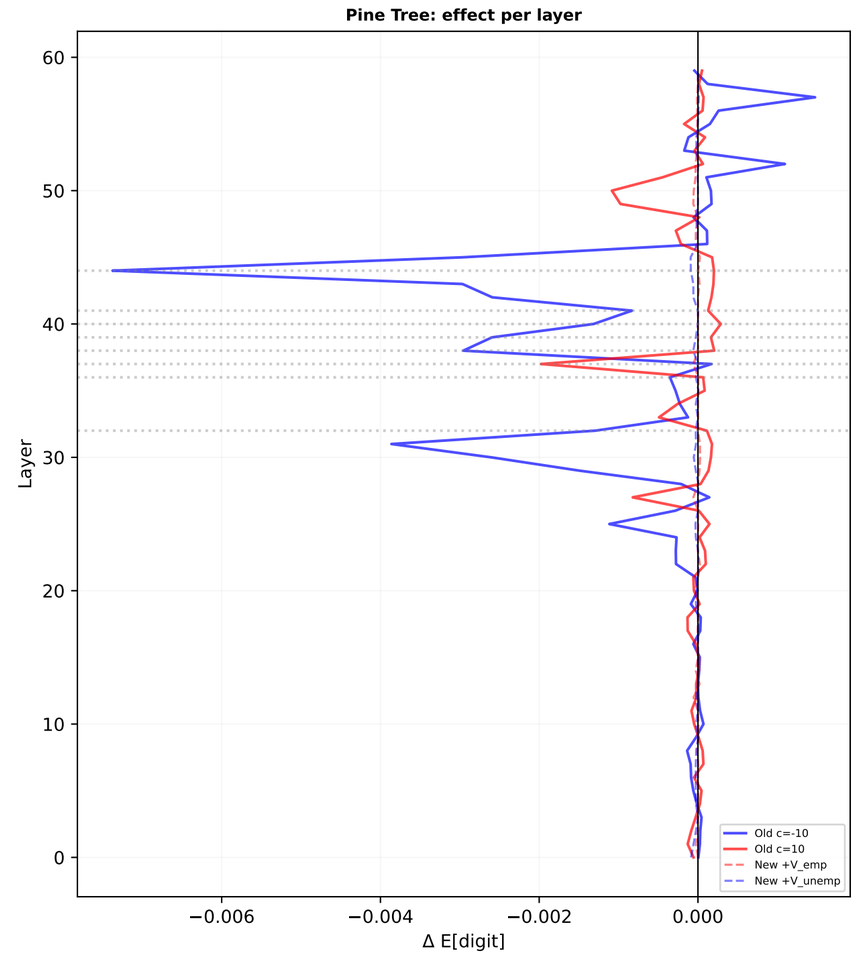


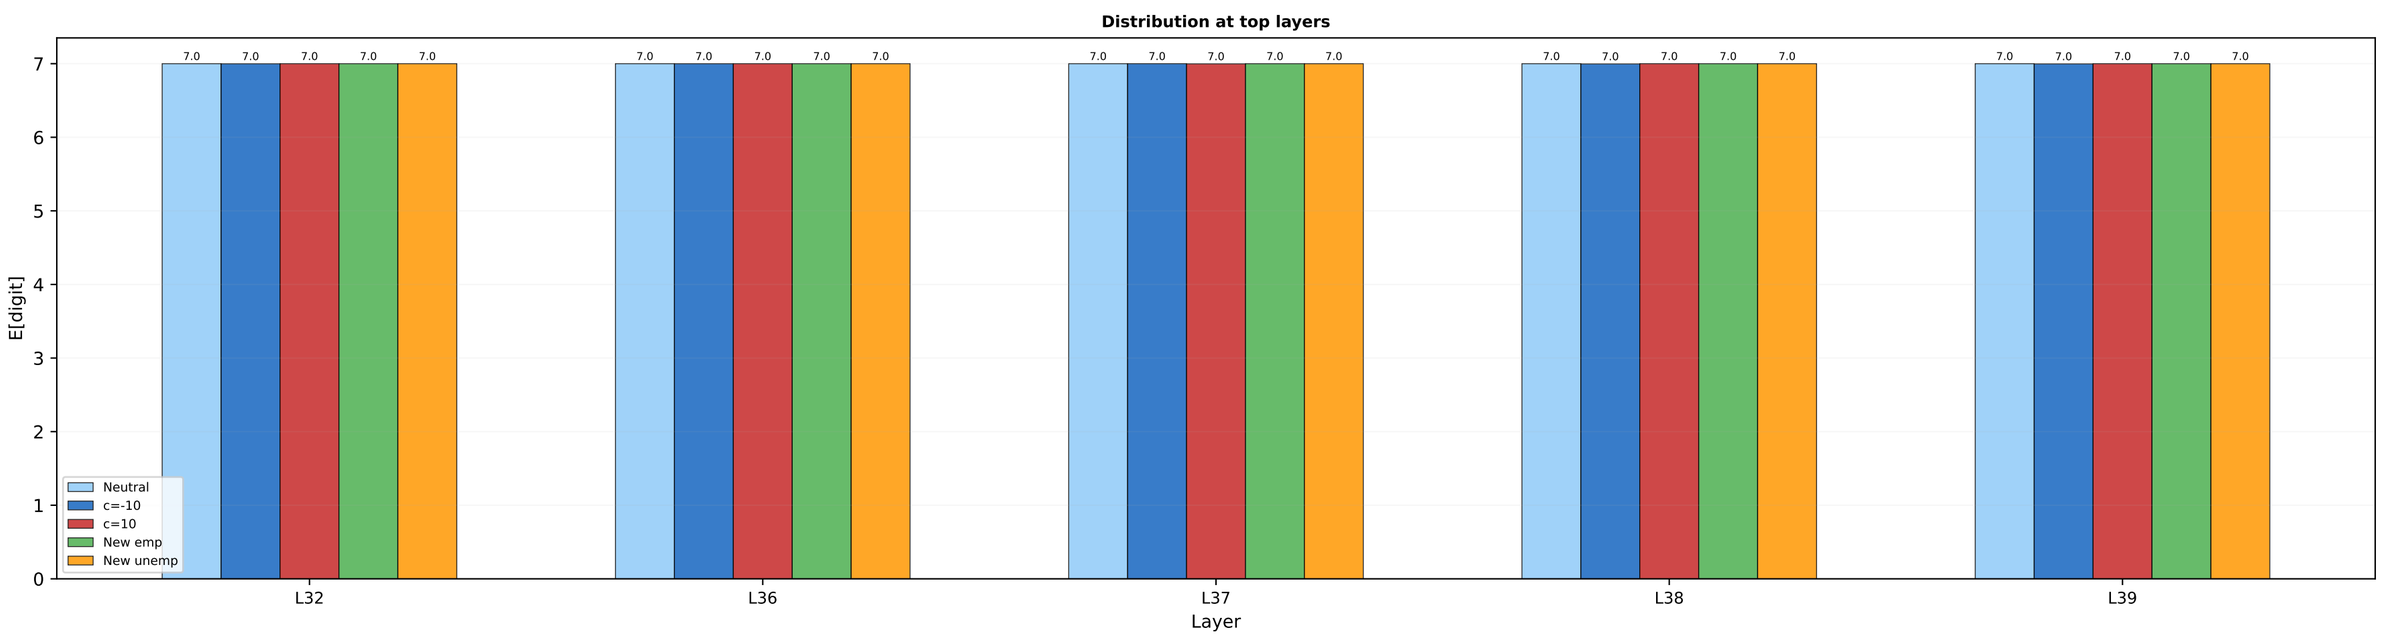


Complete with a single number only. | An individual wakes up at approximately ___:00 AM. |

W1: Wake-up hour | V8/cfg2

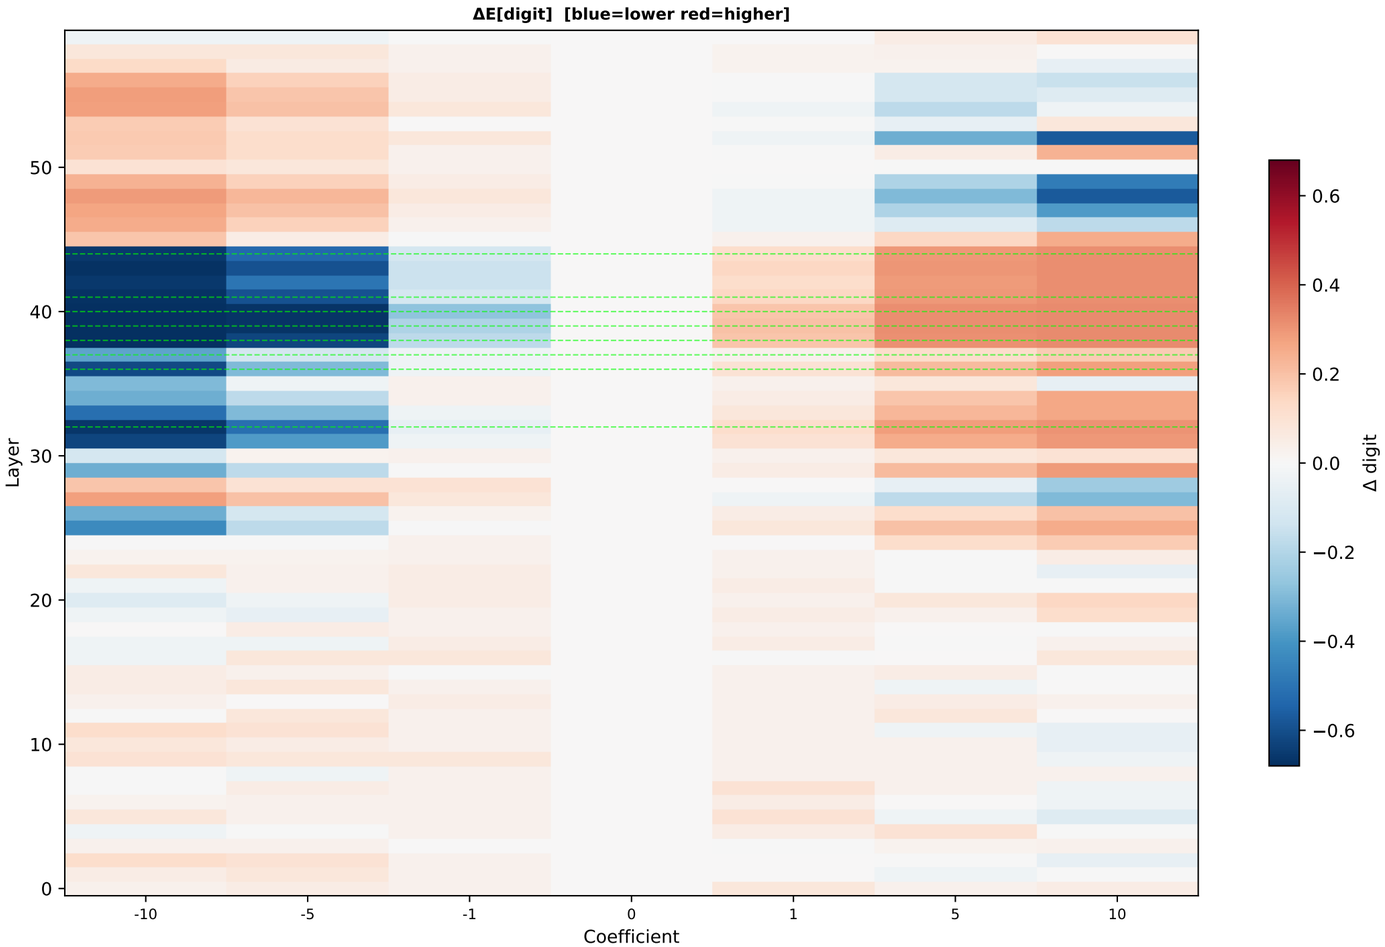


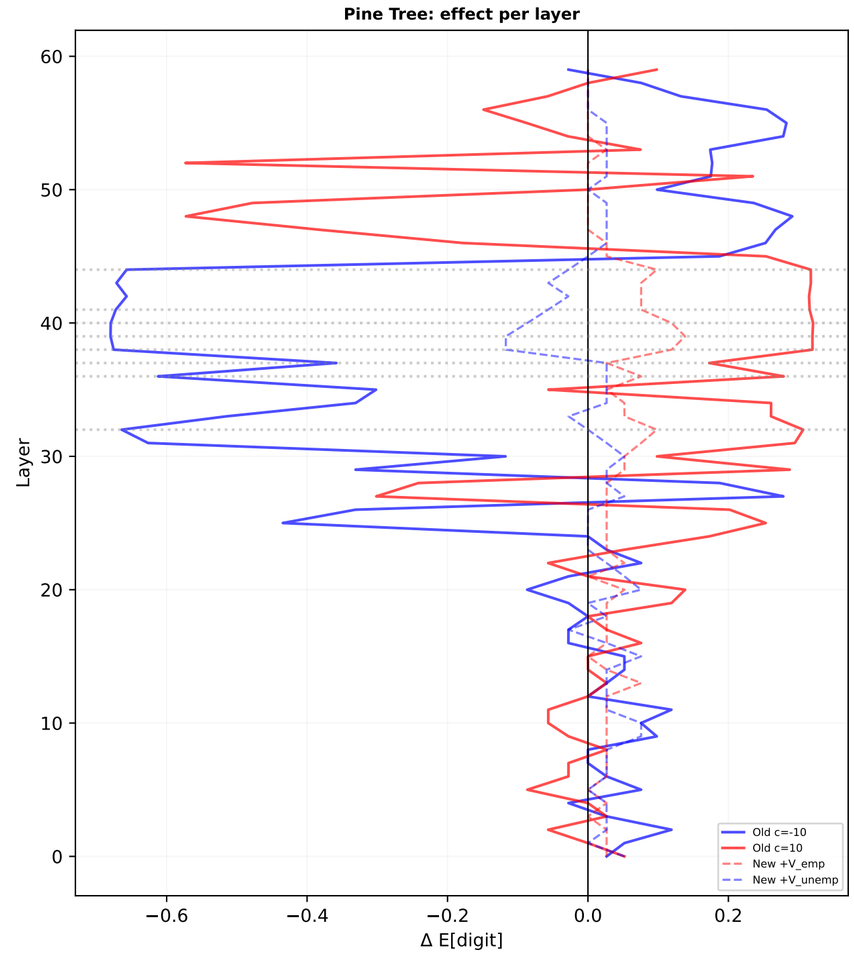


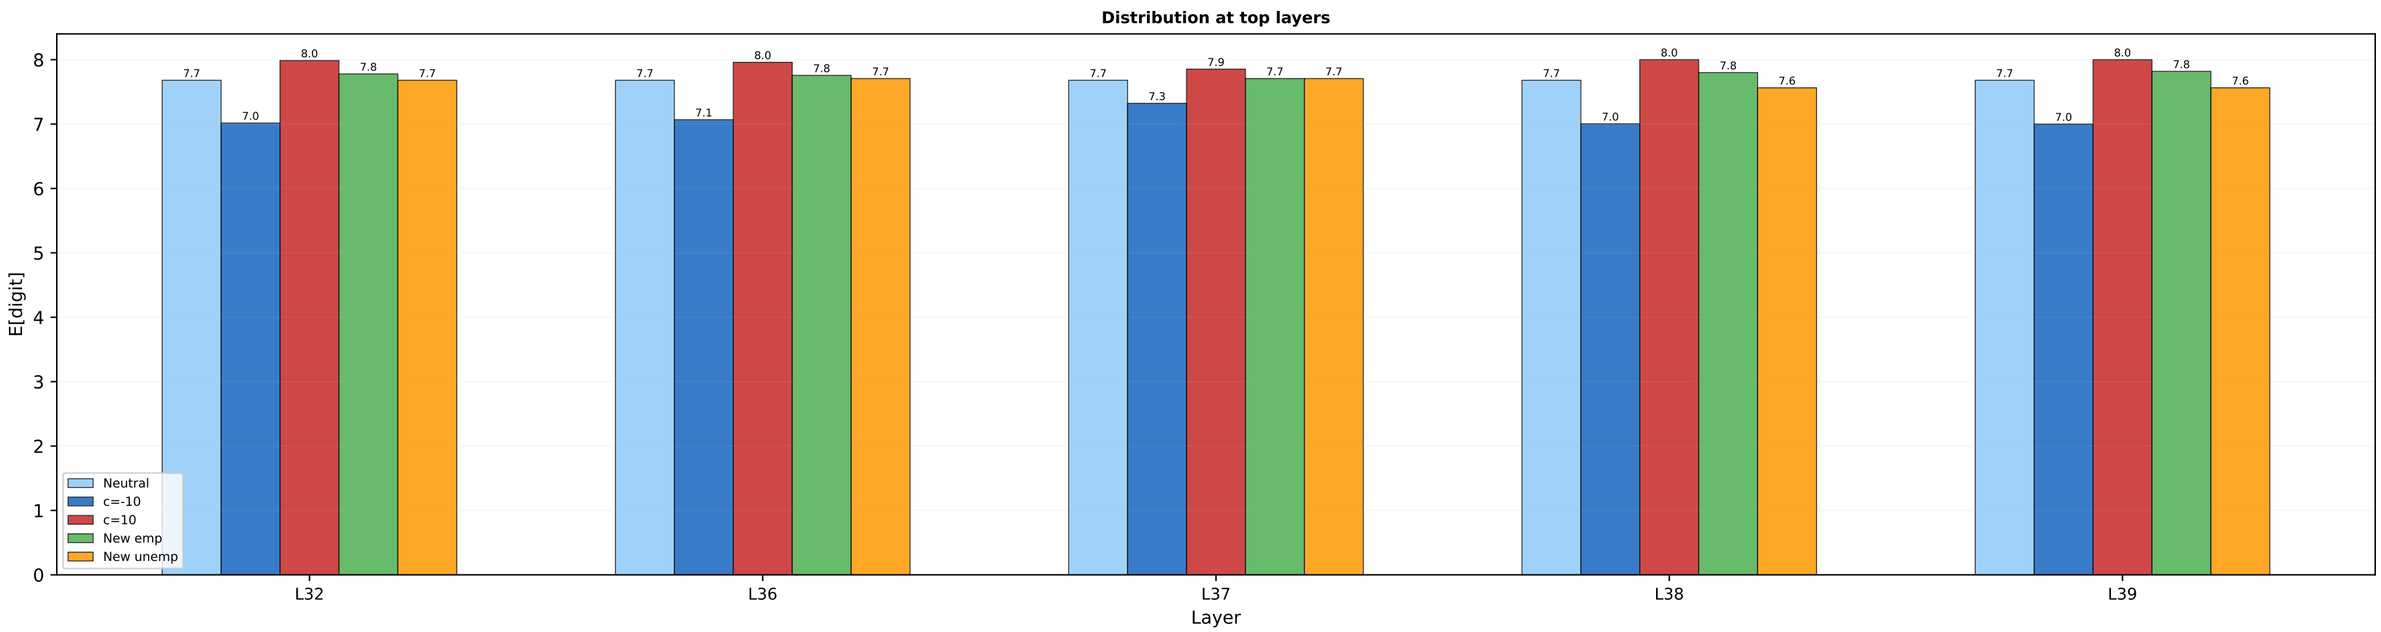


Complete with a single number only. | An individual leaves home at approximately ___:00 AM. |

W2: Leave-home hour | V8/cfg2

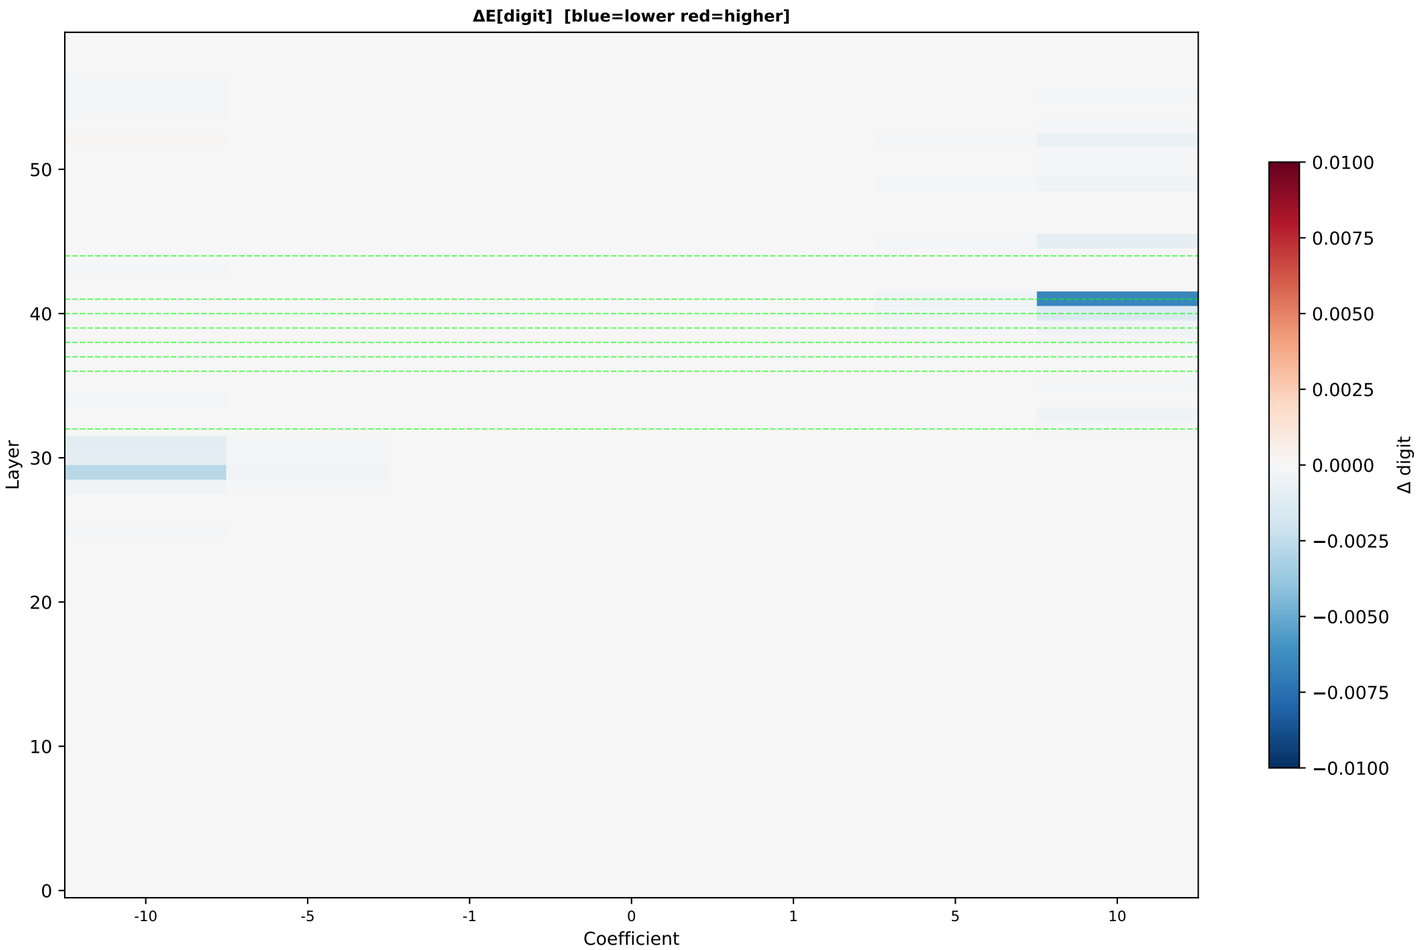


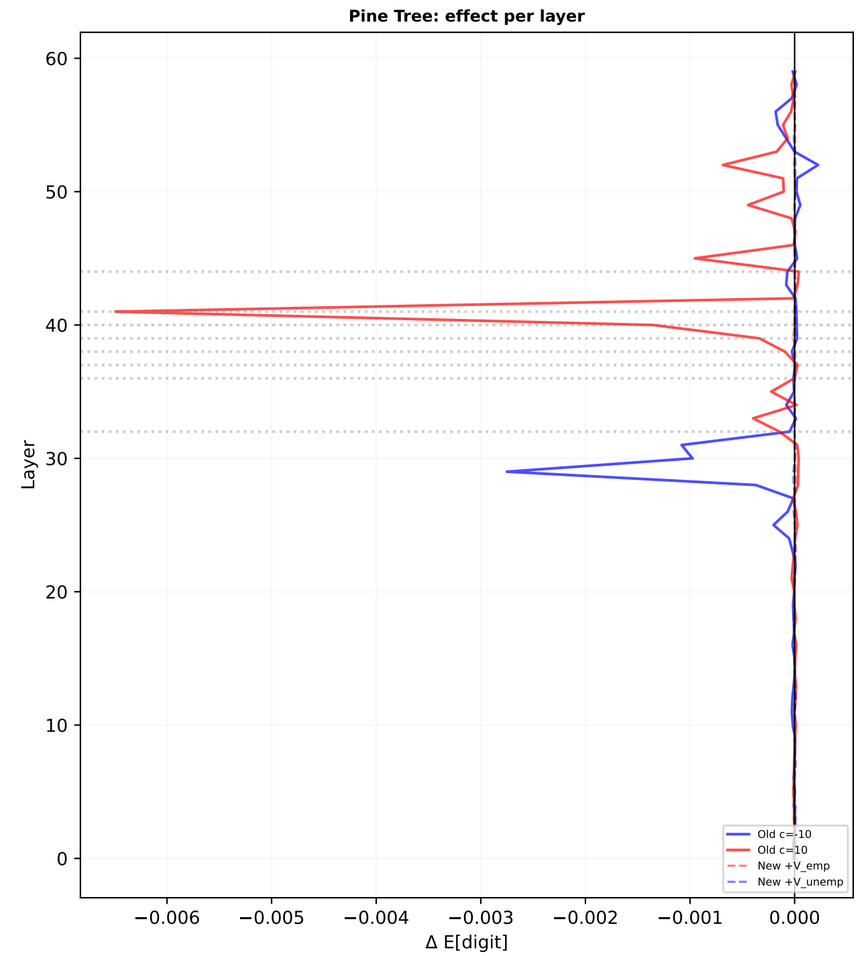


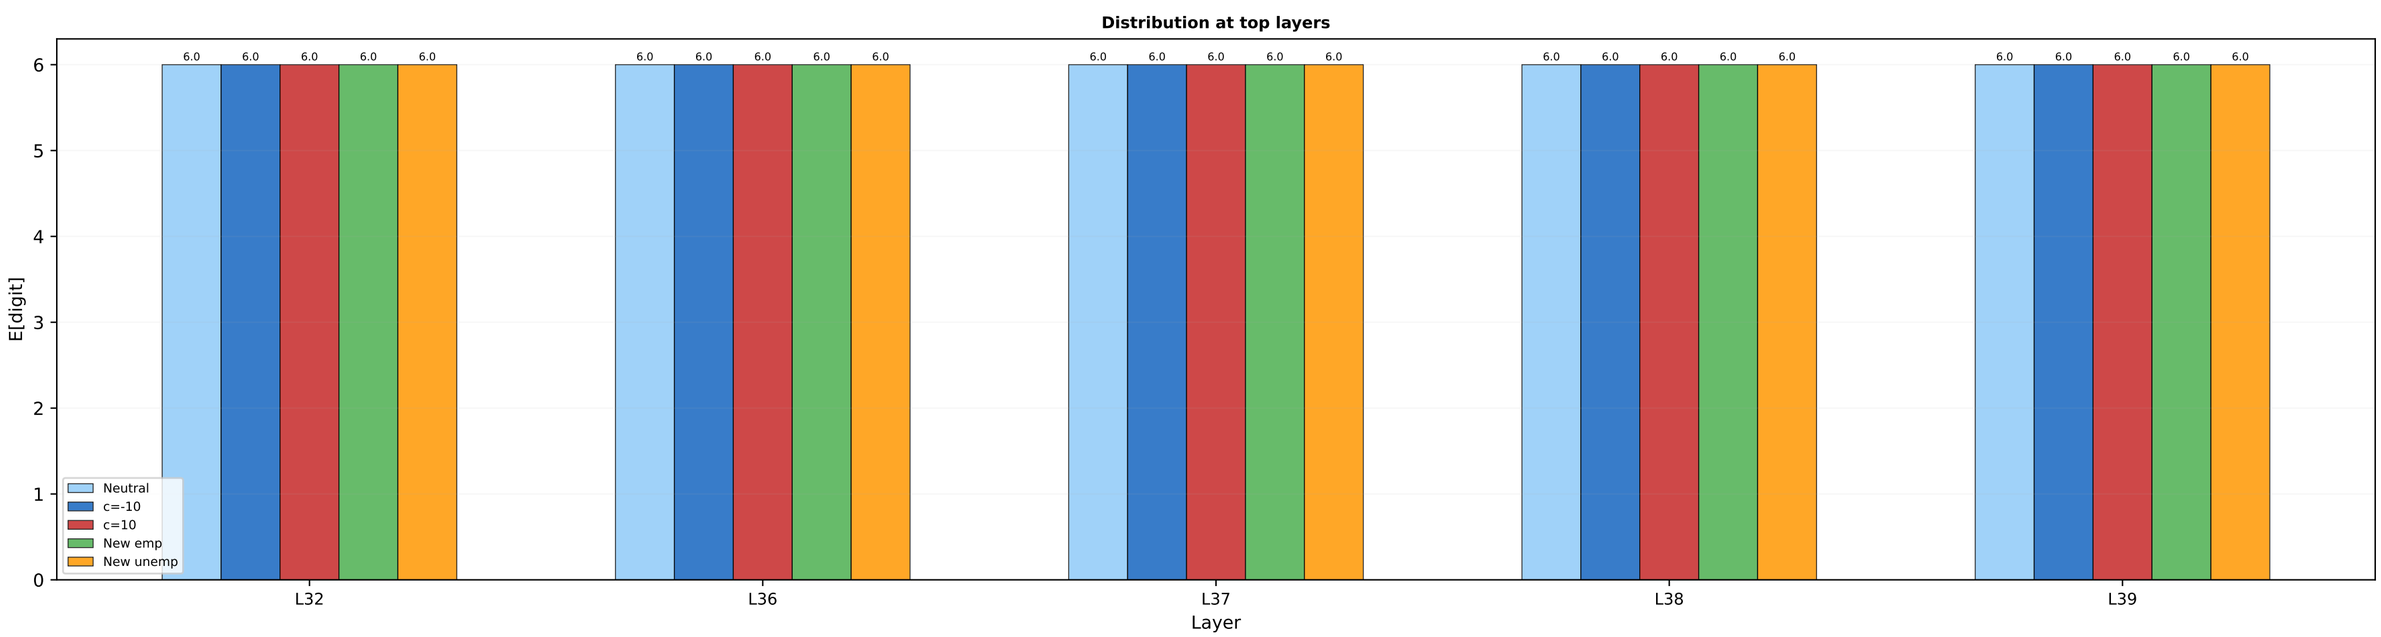


Complete with a single number only. | An individual arrives home at approximately ___:00 PM. |

W3: Arrive-home hour | V8/cfg2

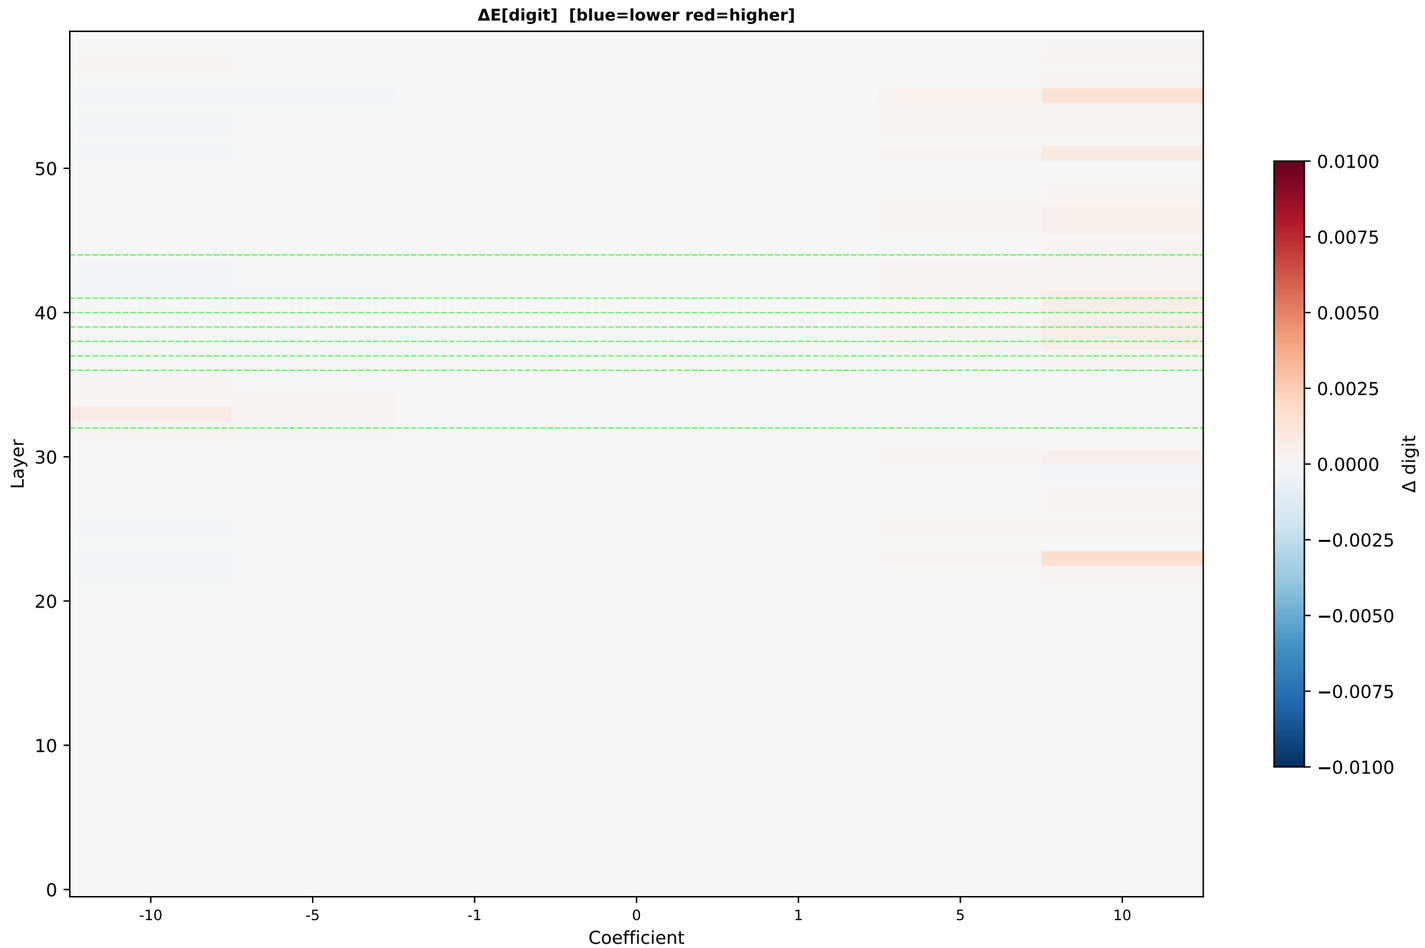


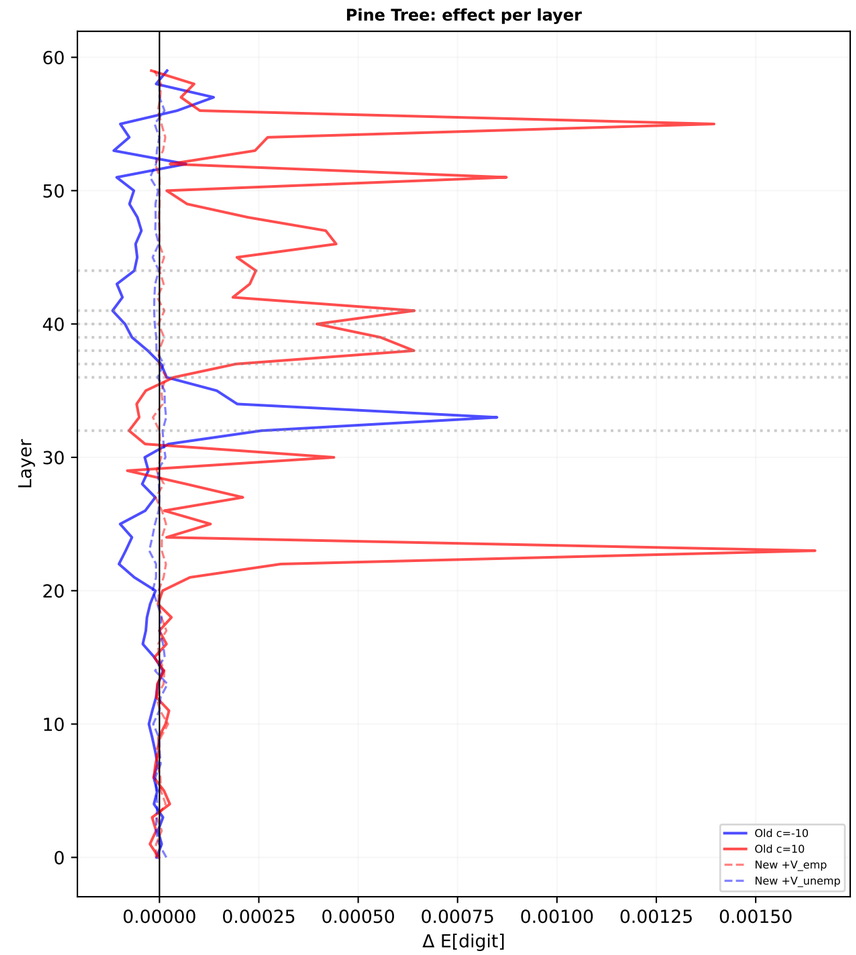


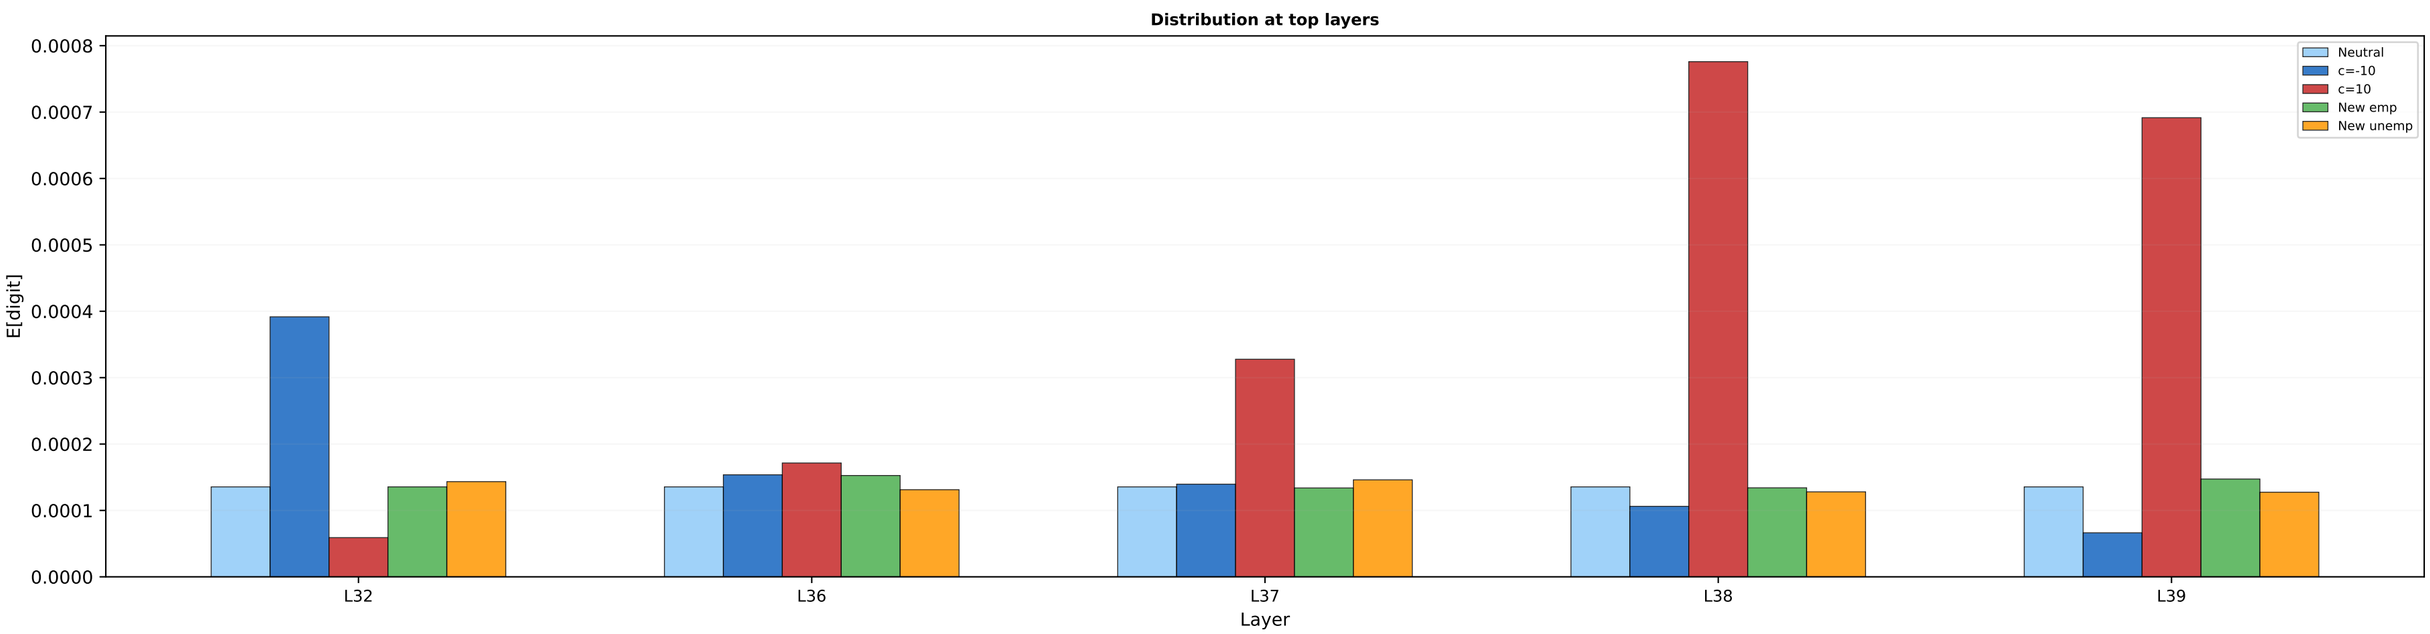


Answer with a single digit from 0 to 9. | How many hours does an individual spend at home between 8 AM and 6 PM? ___ |

W4: Daytime hours at home | V8/cfg2

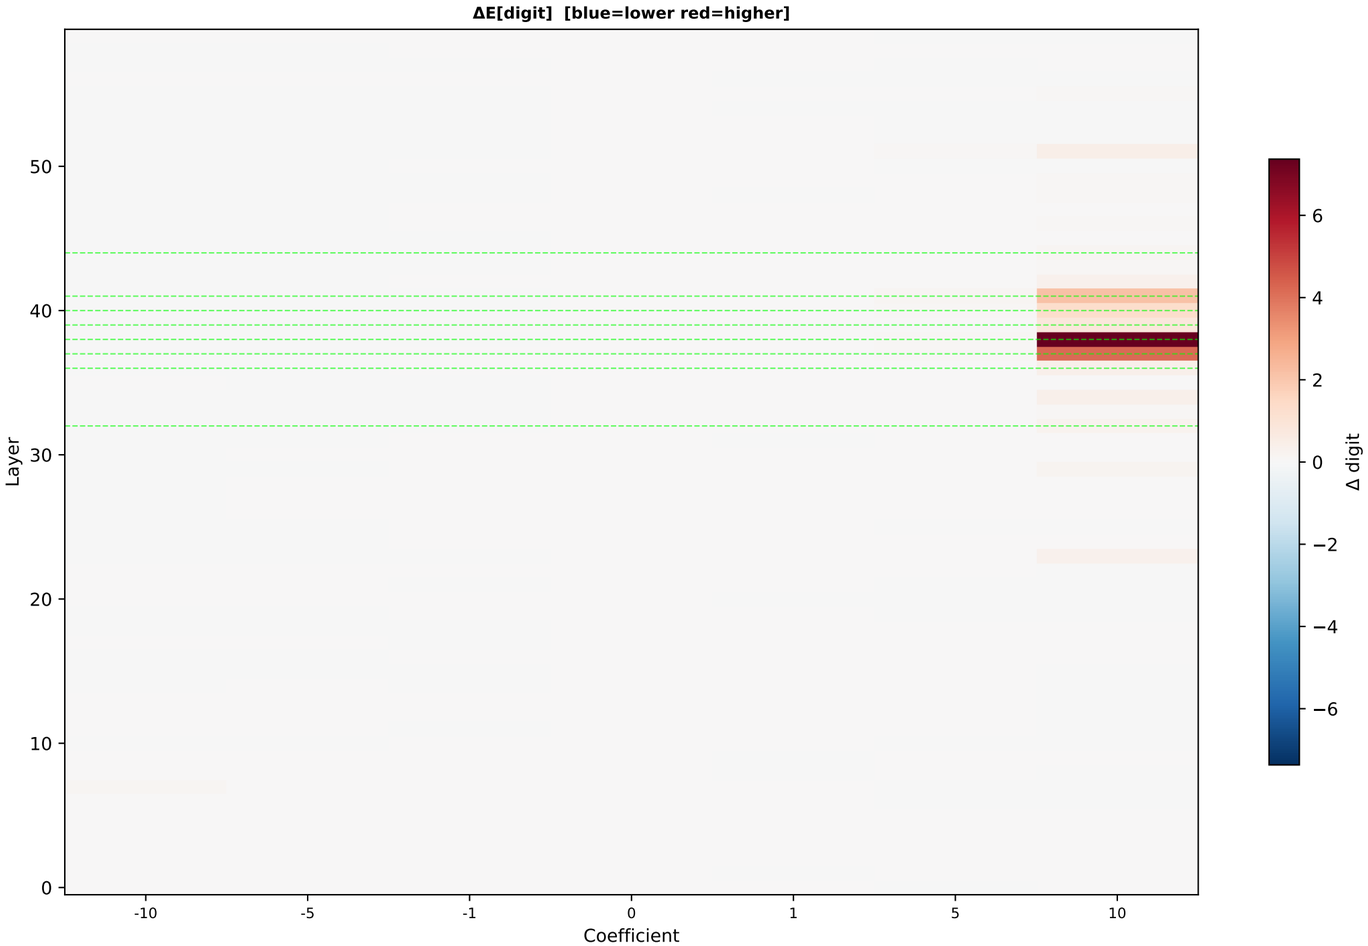


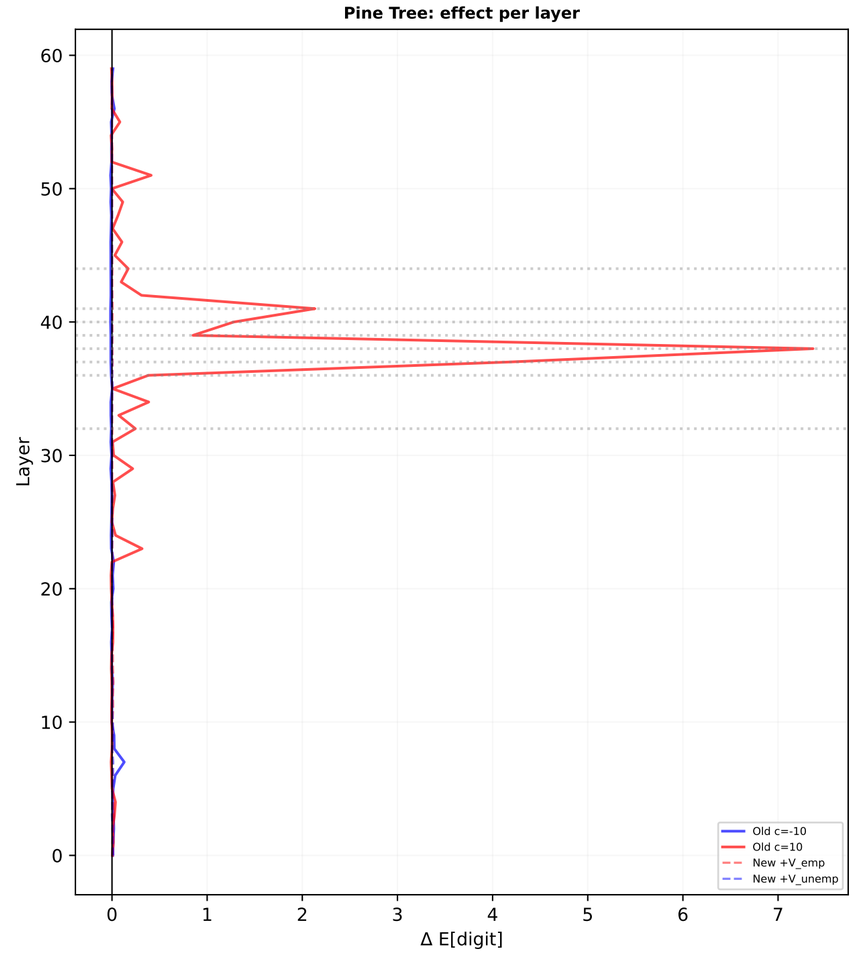


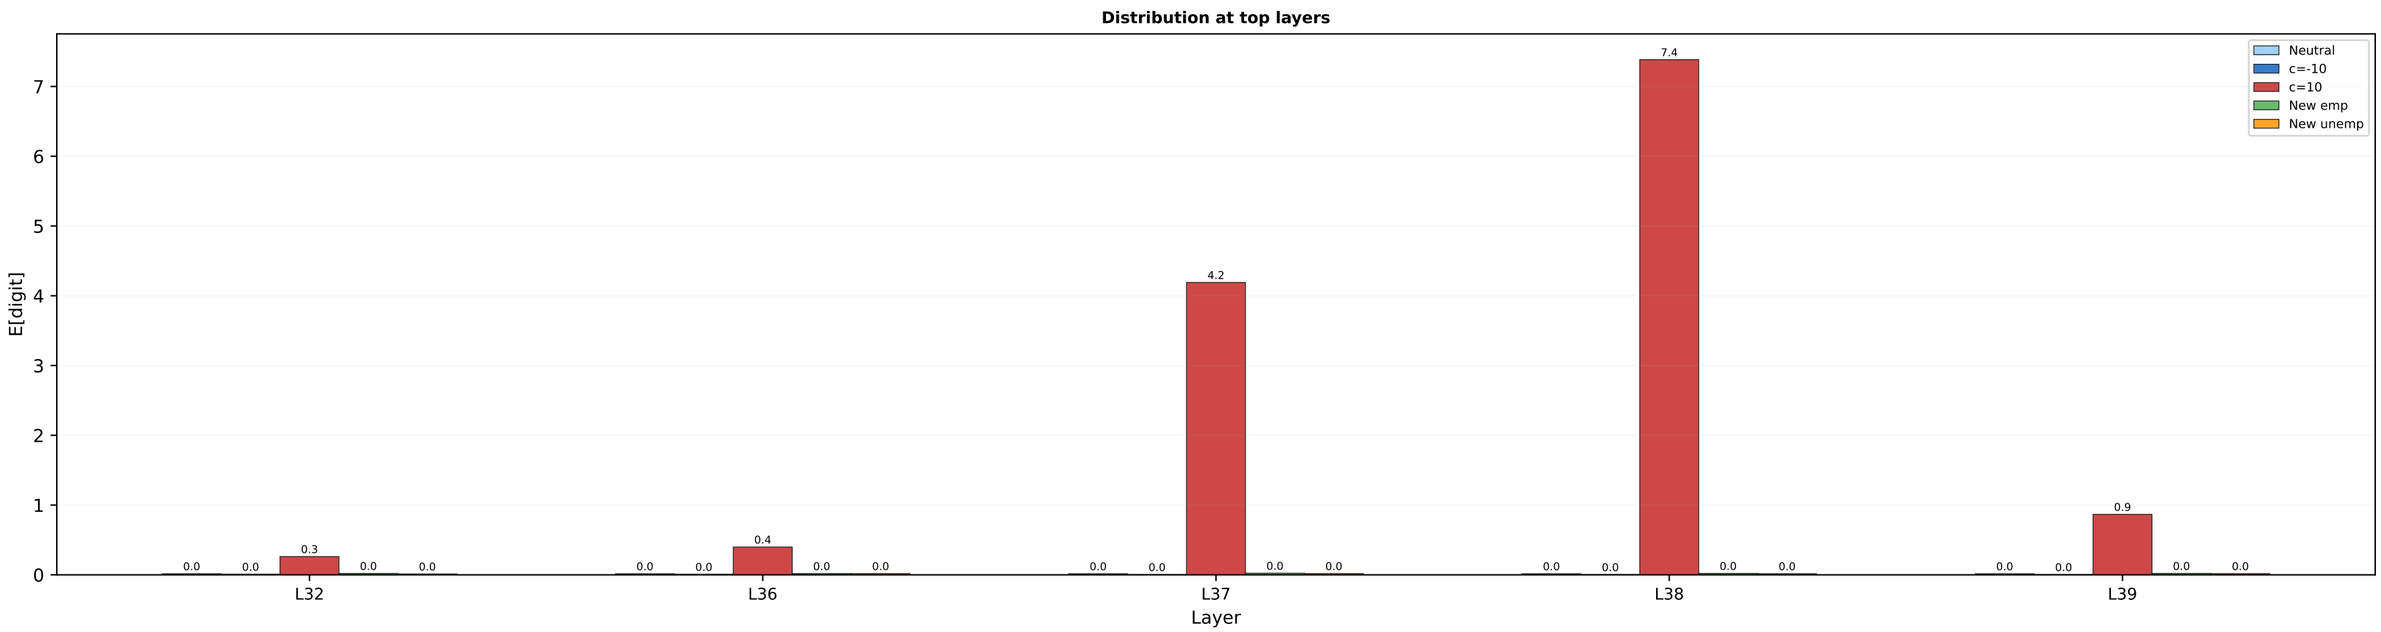


Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours an individual spends outside the home today? ___ |

W5: Longest stretch outside | V8/cfg2

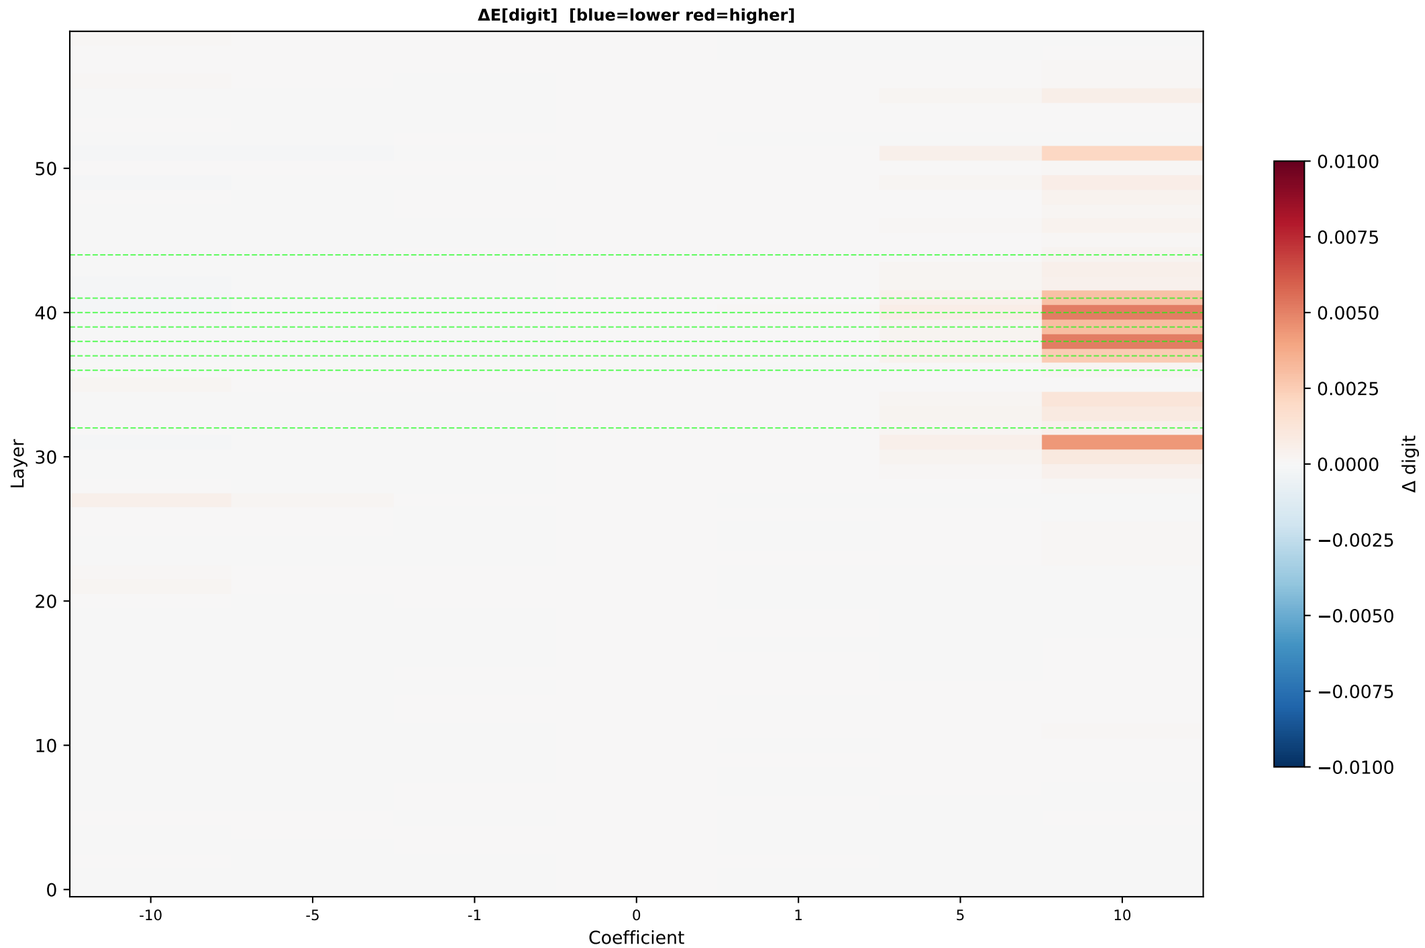


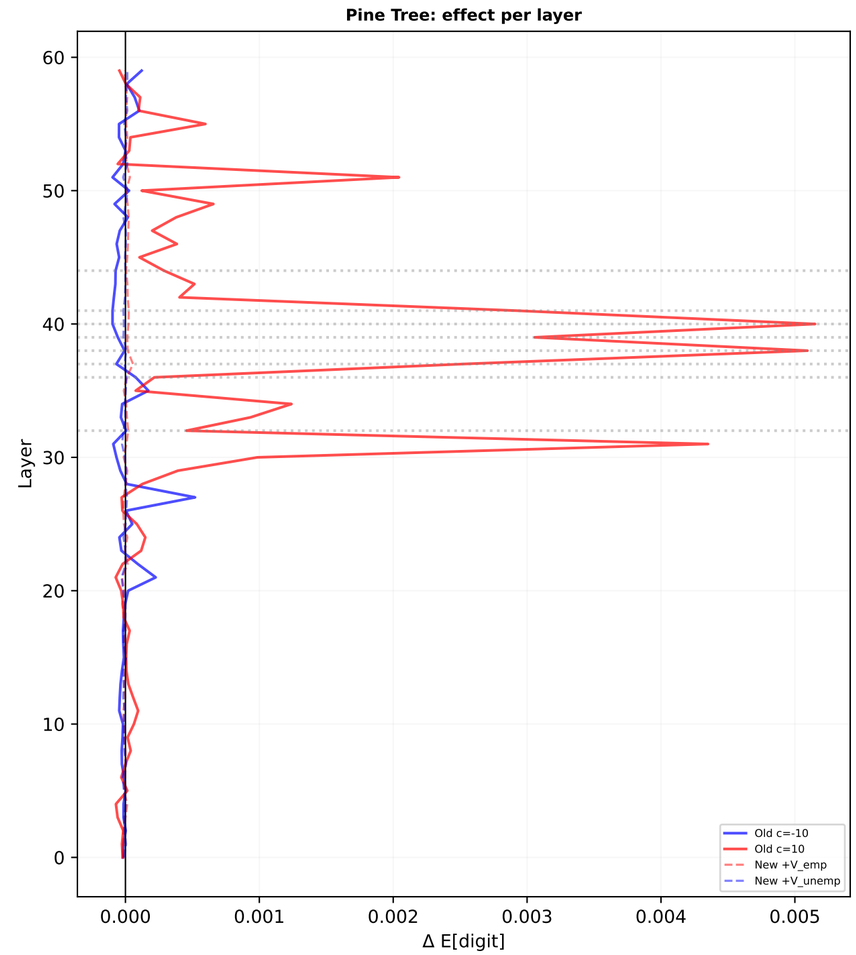


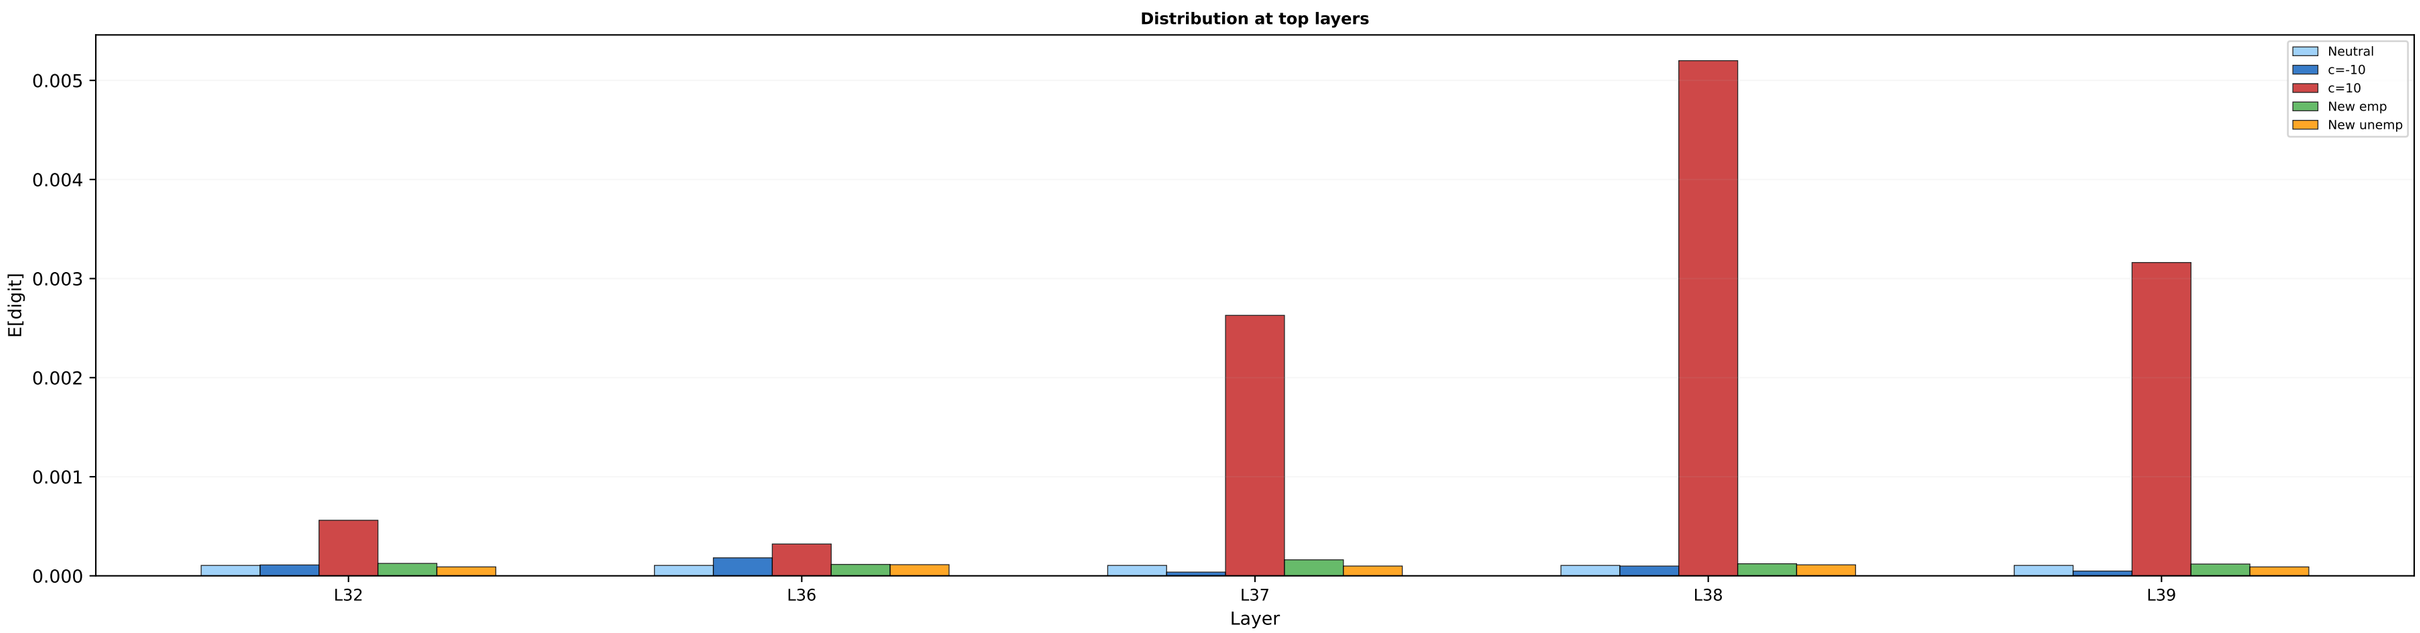


Answer with a single digit from 0 to 9. | How many total hours is an individual away from home today? ___ |

W6: Total hours away | V8/cfg2

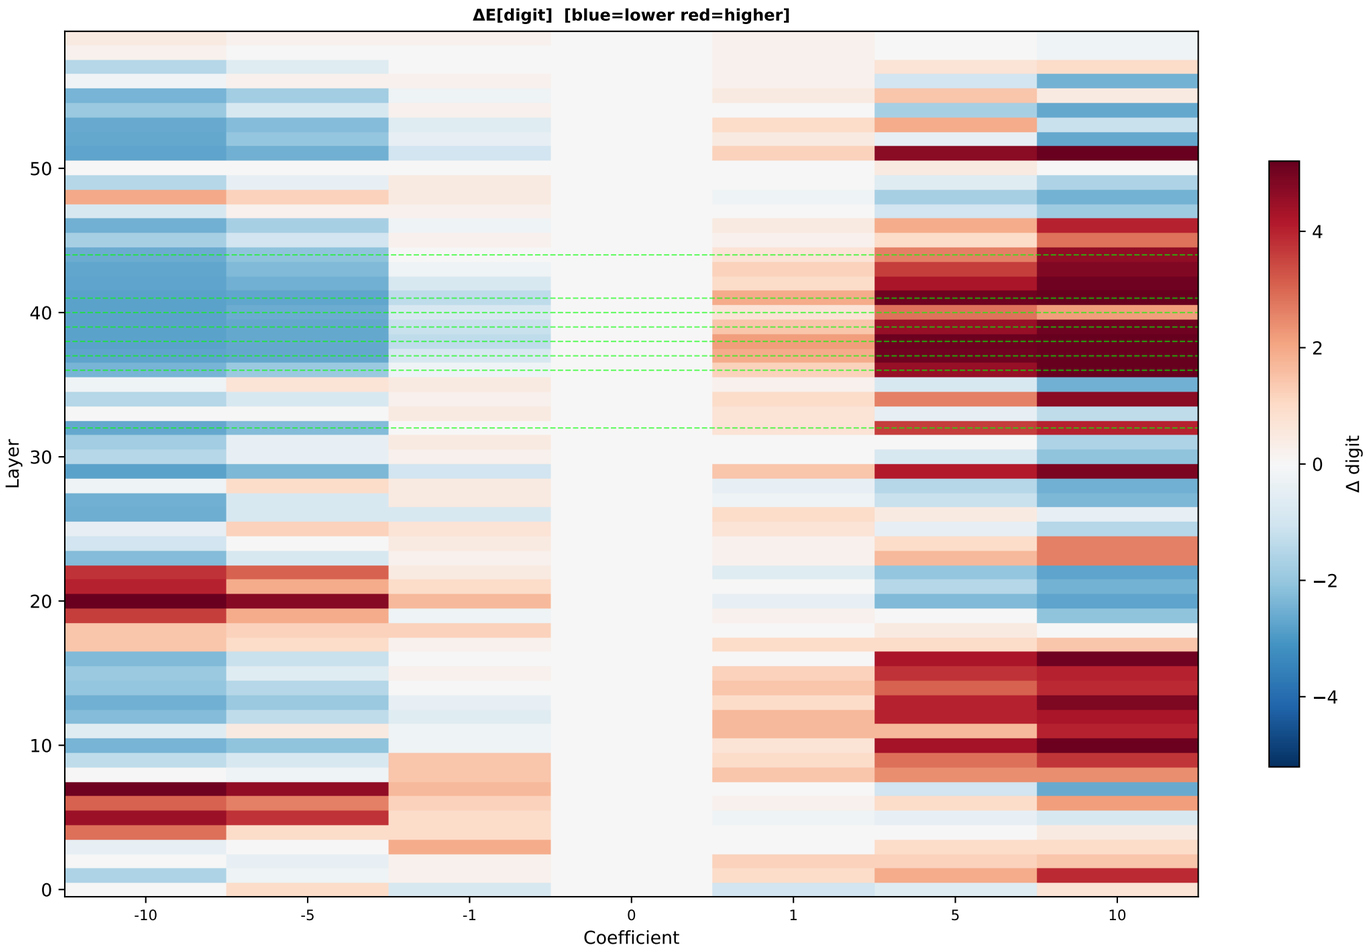


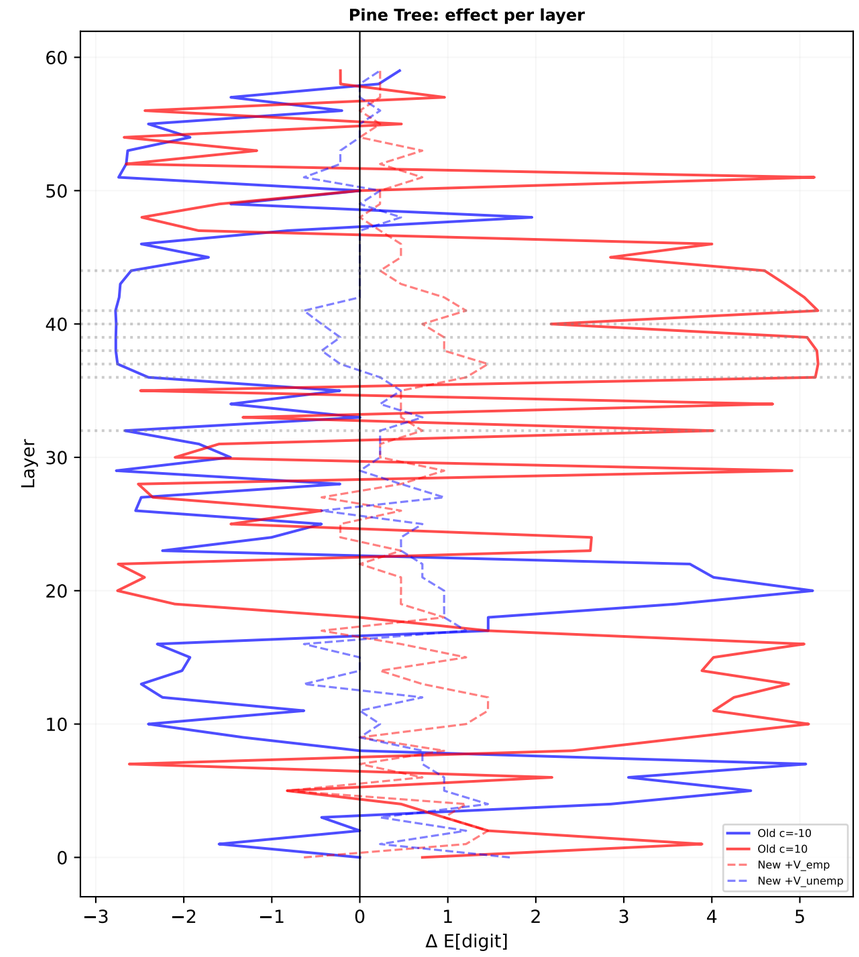


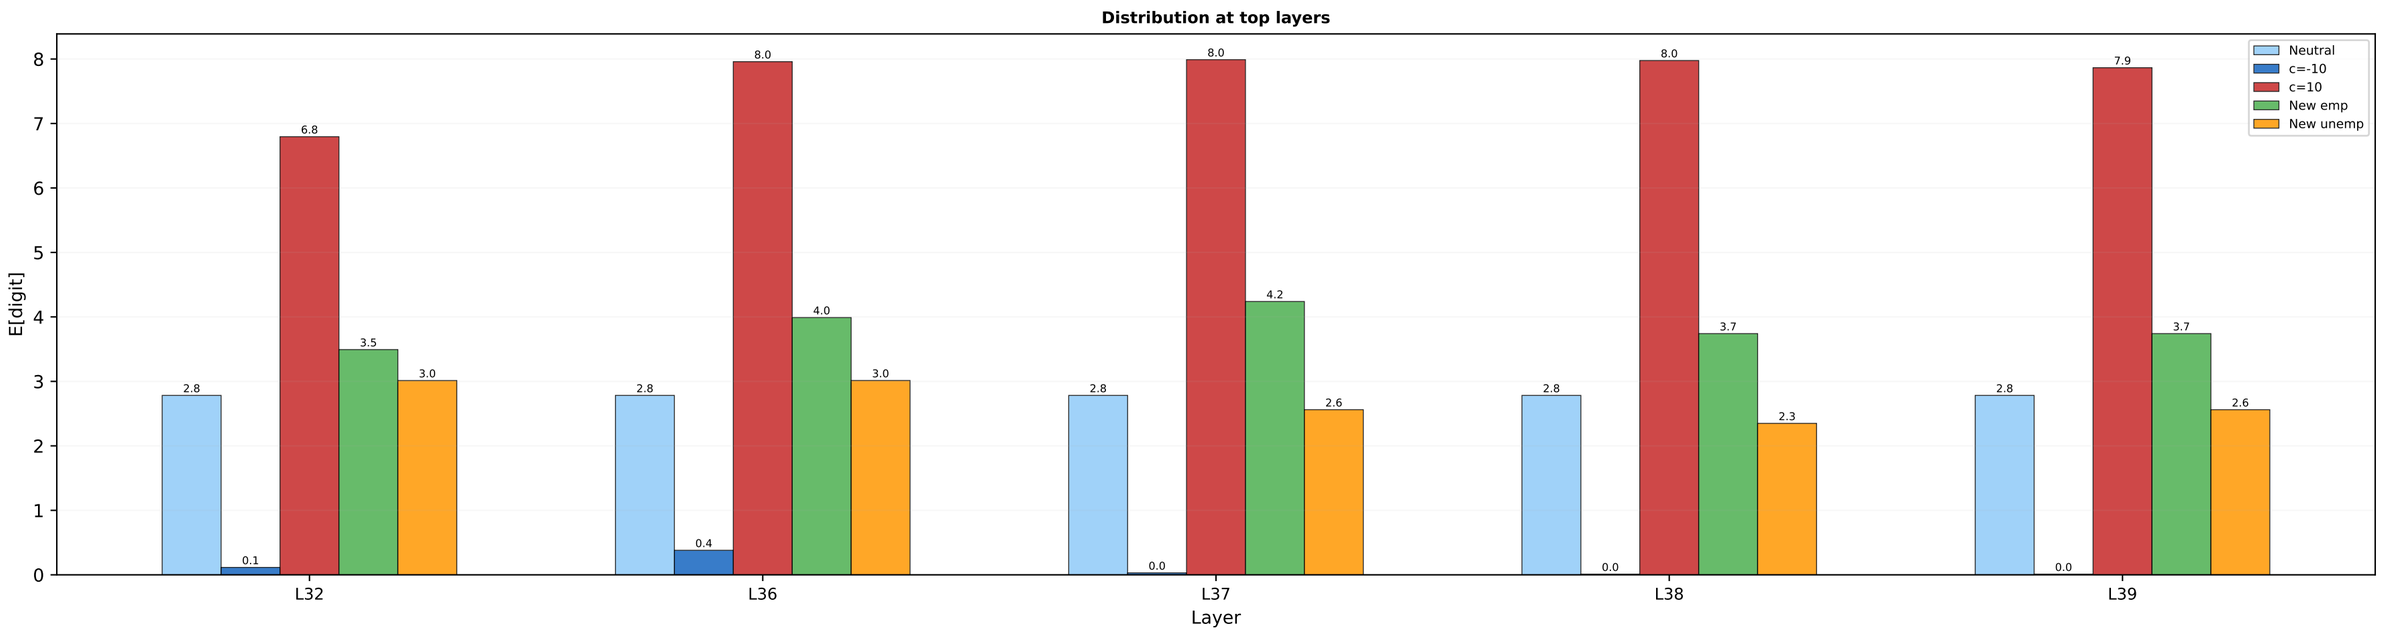


W7: Hours at primary non-home location | V8/cfg2

Answer with a single digit from 0 to 9. | How many hours does an individual spend at their most frequently visited non-home location today? ___ |

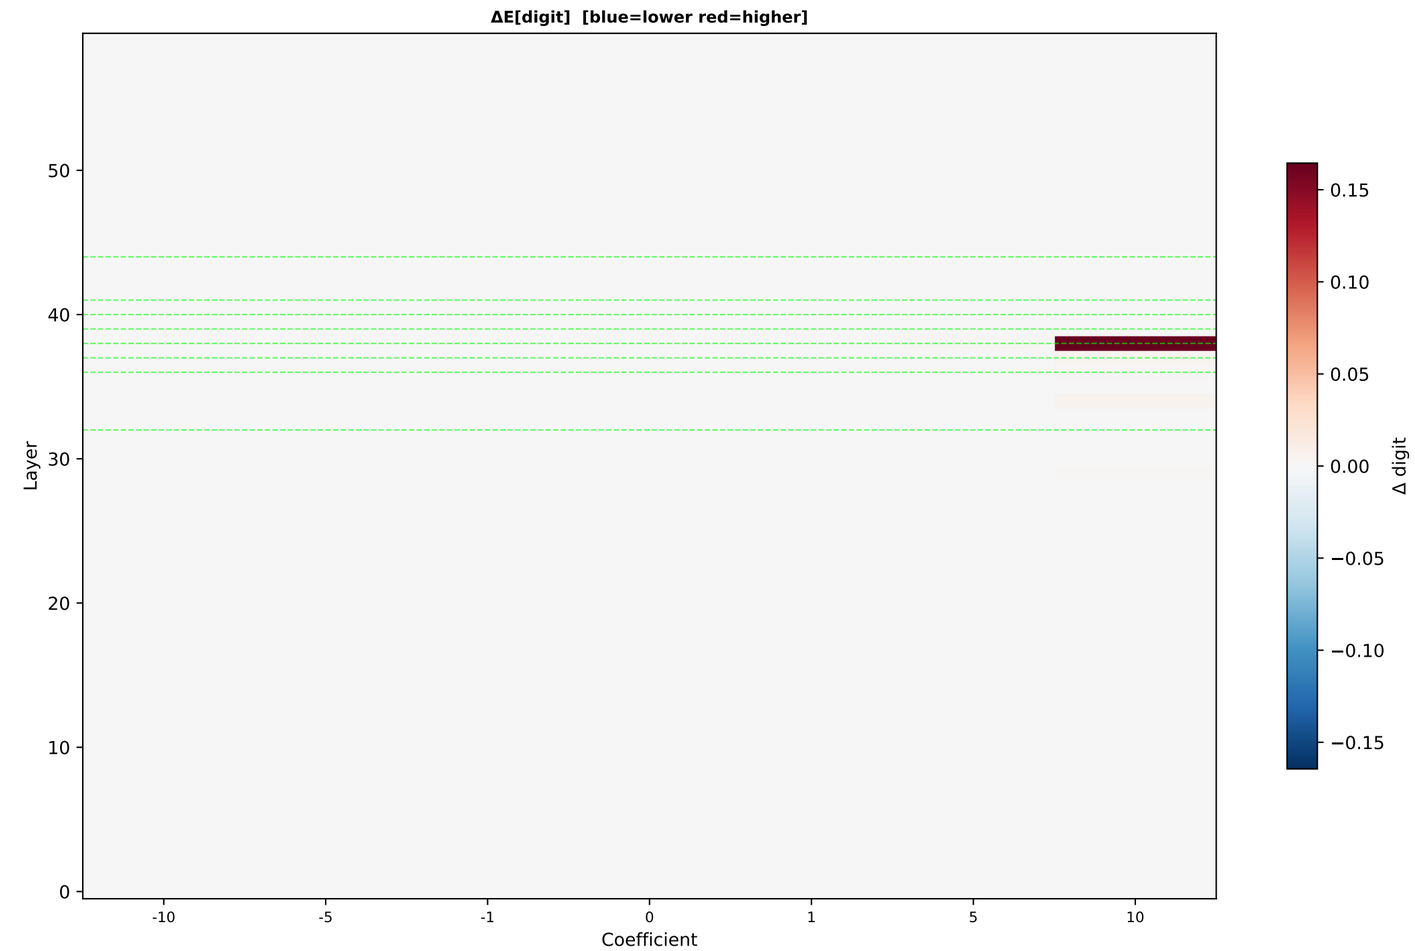


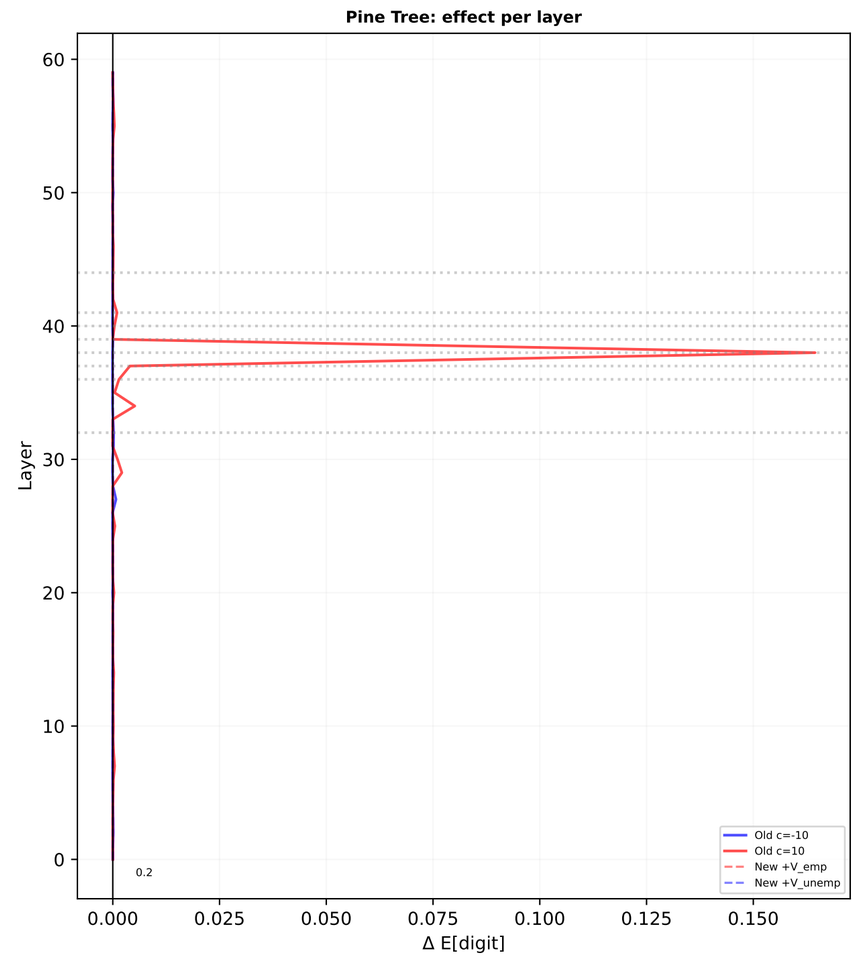


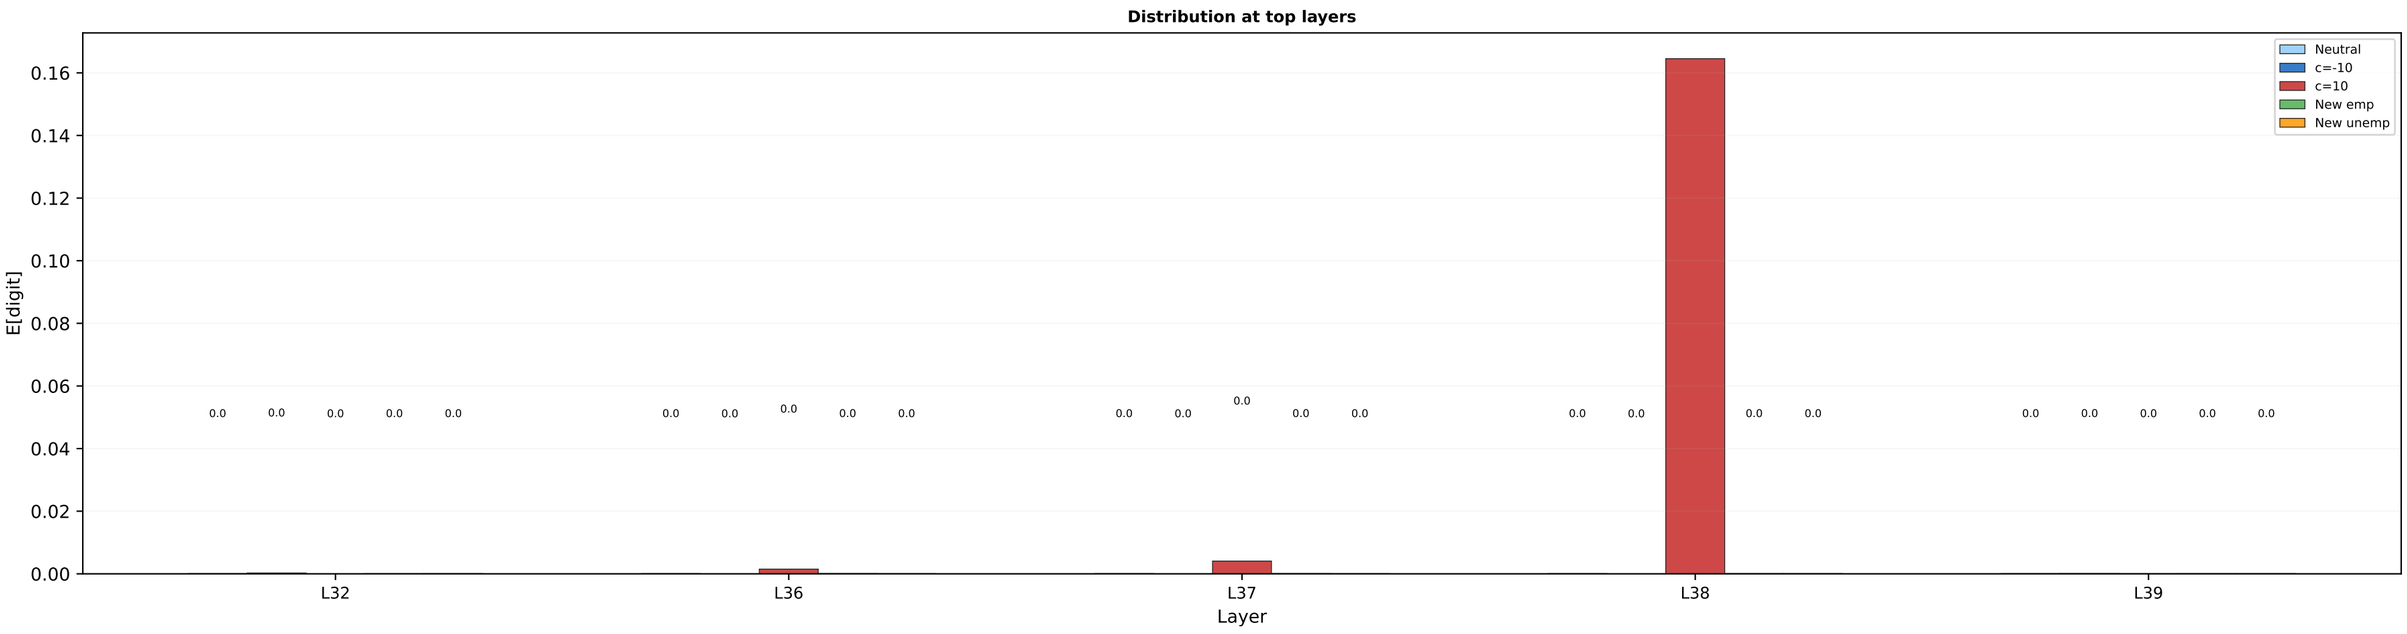


W8: Daytime home returns | V8/cfg2

Answer with a single digit from 0 to 9. | How many times does an individual return home during the daytime (8 AM to 6 PM) today? ___ |

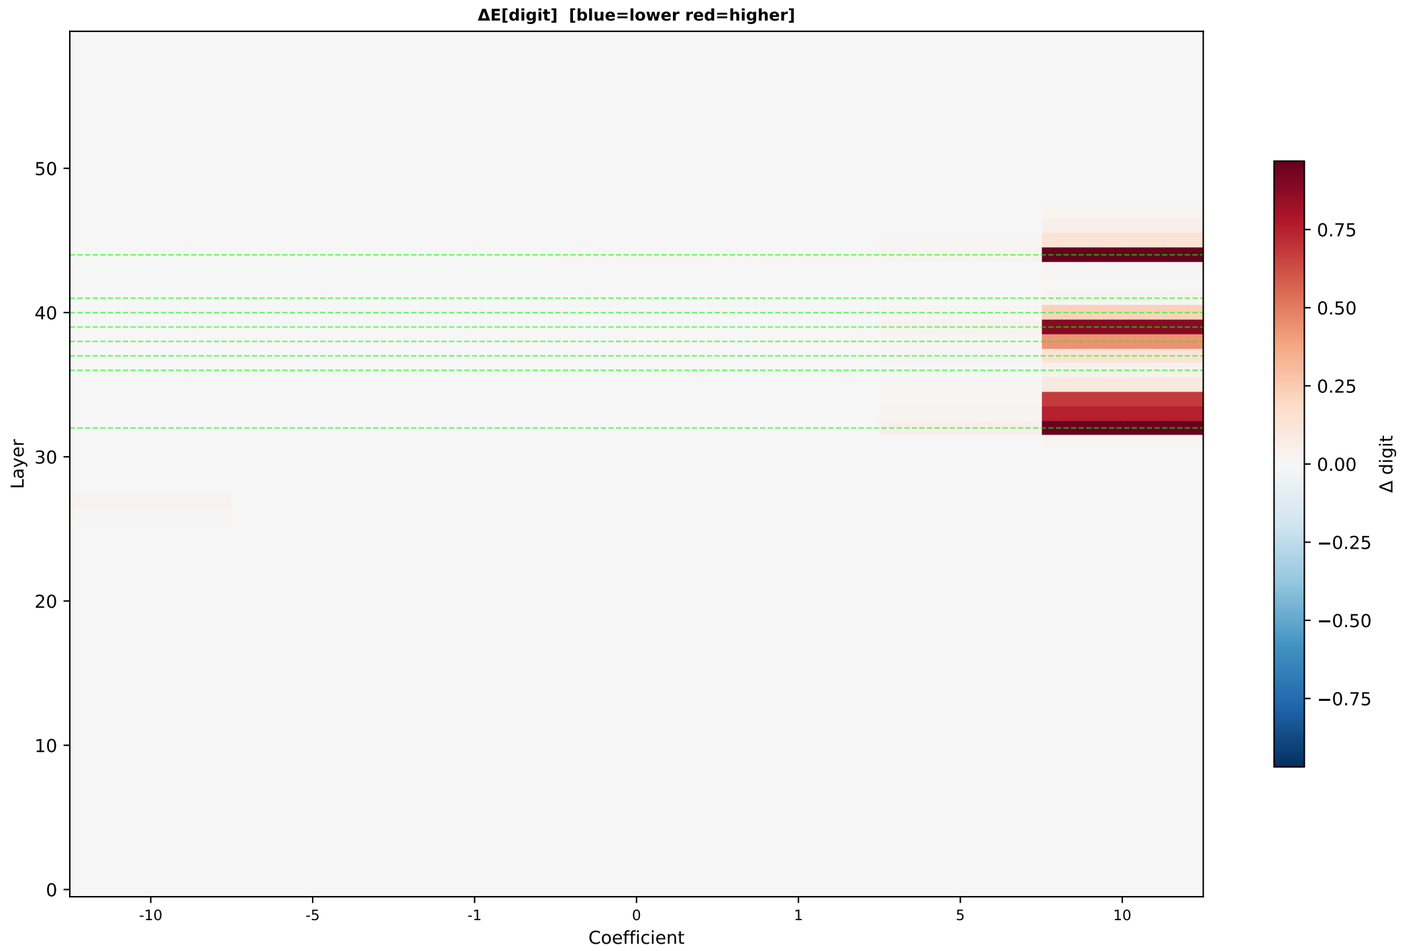


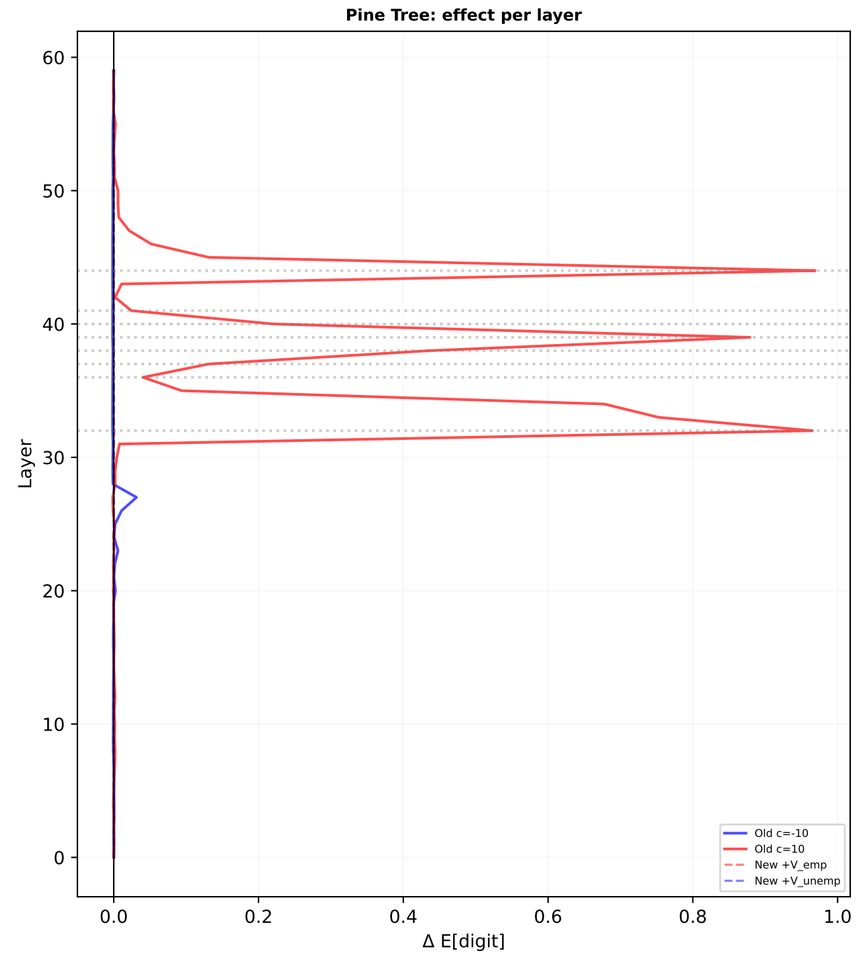


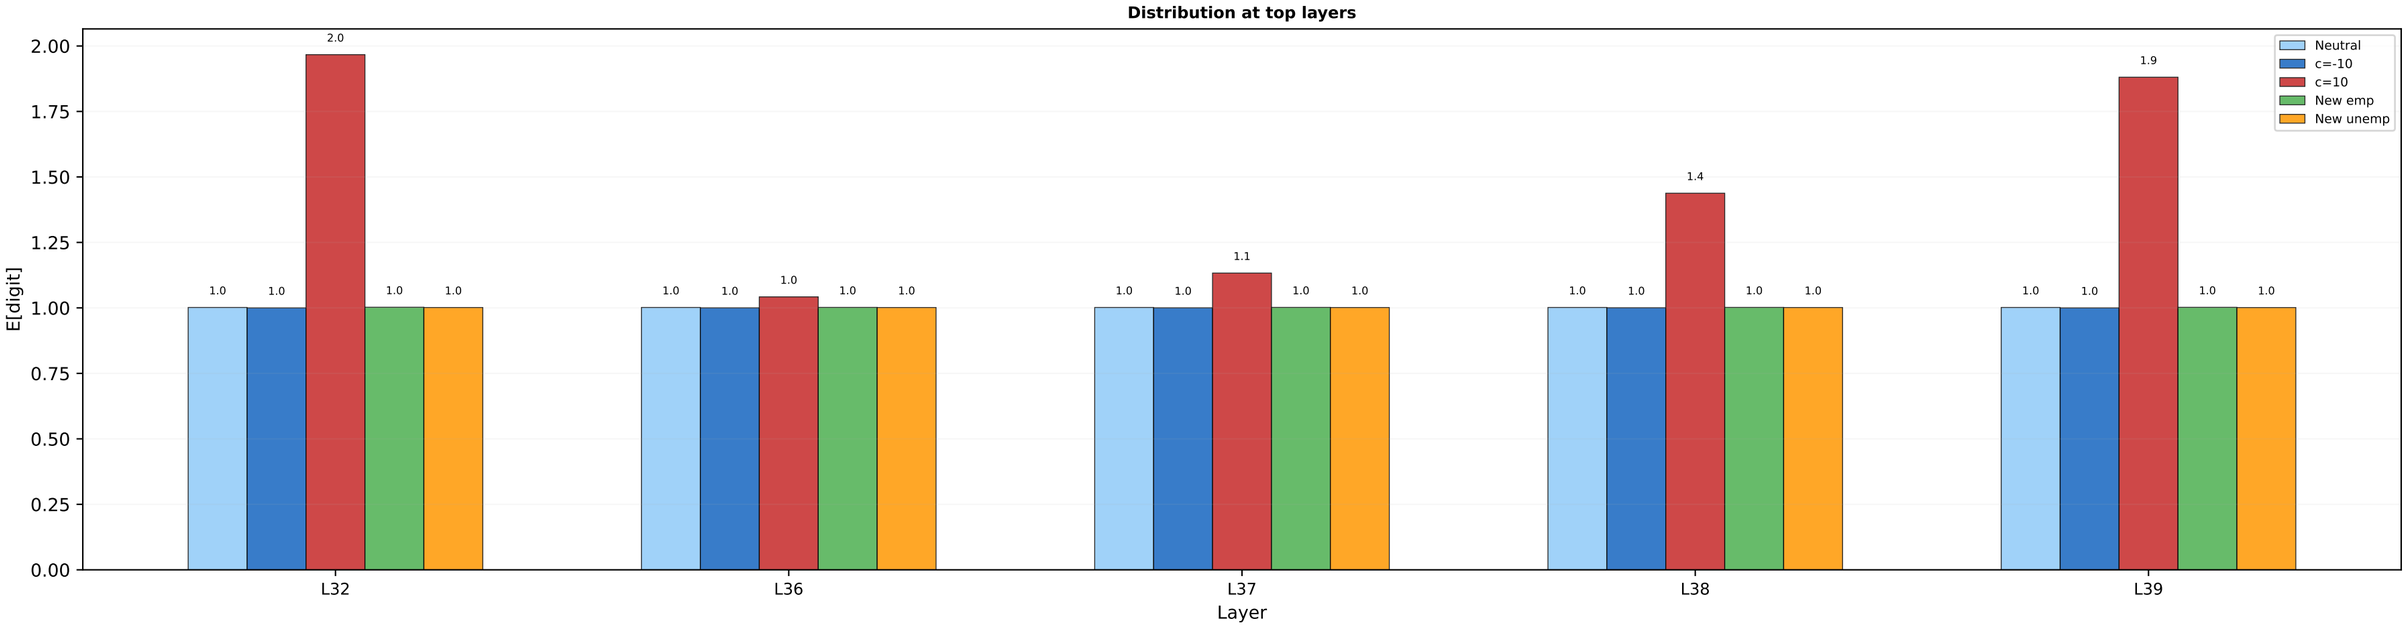


Answer with a single digit from 0 to 9. | How many hours does an individual spend commuting or in transit today? ___ |

W9: Commute/transit hours | V8/cfg2

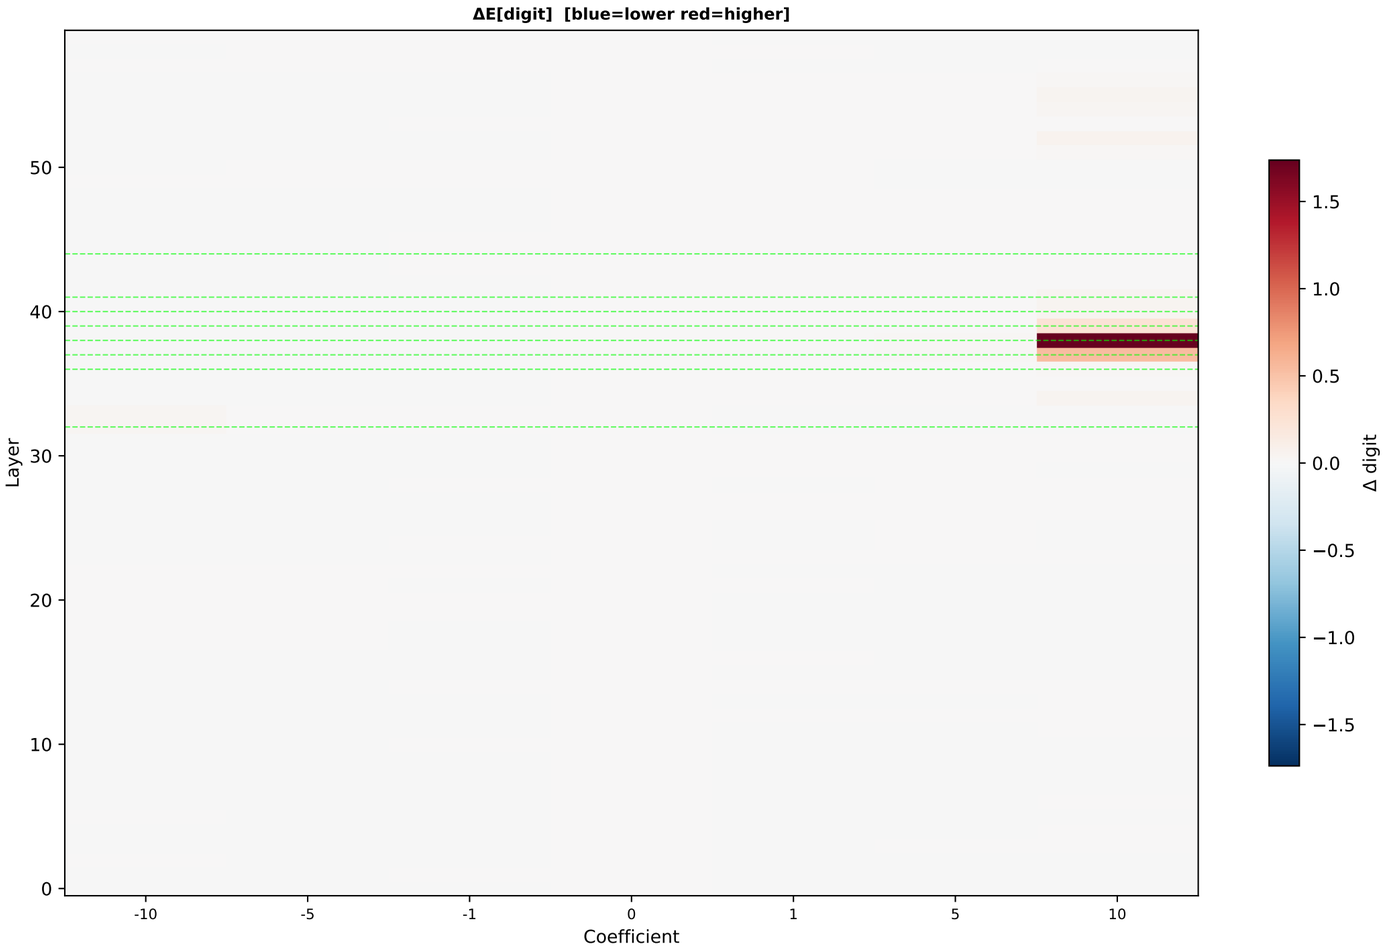


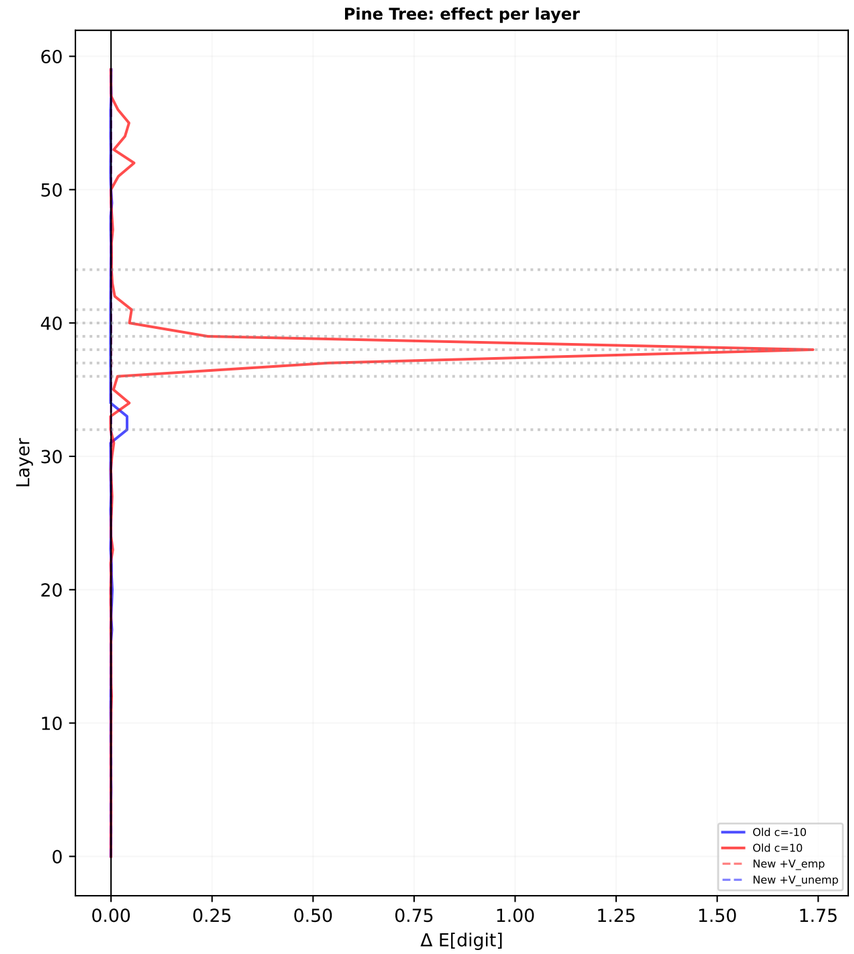


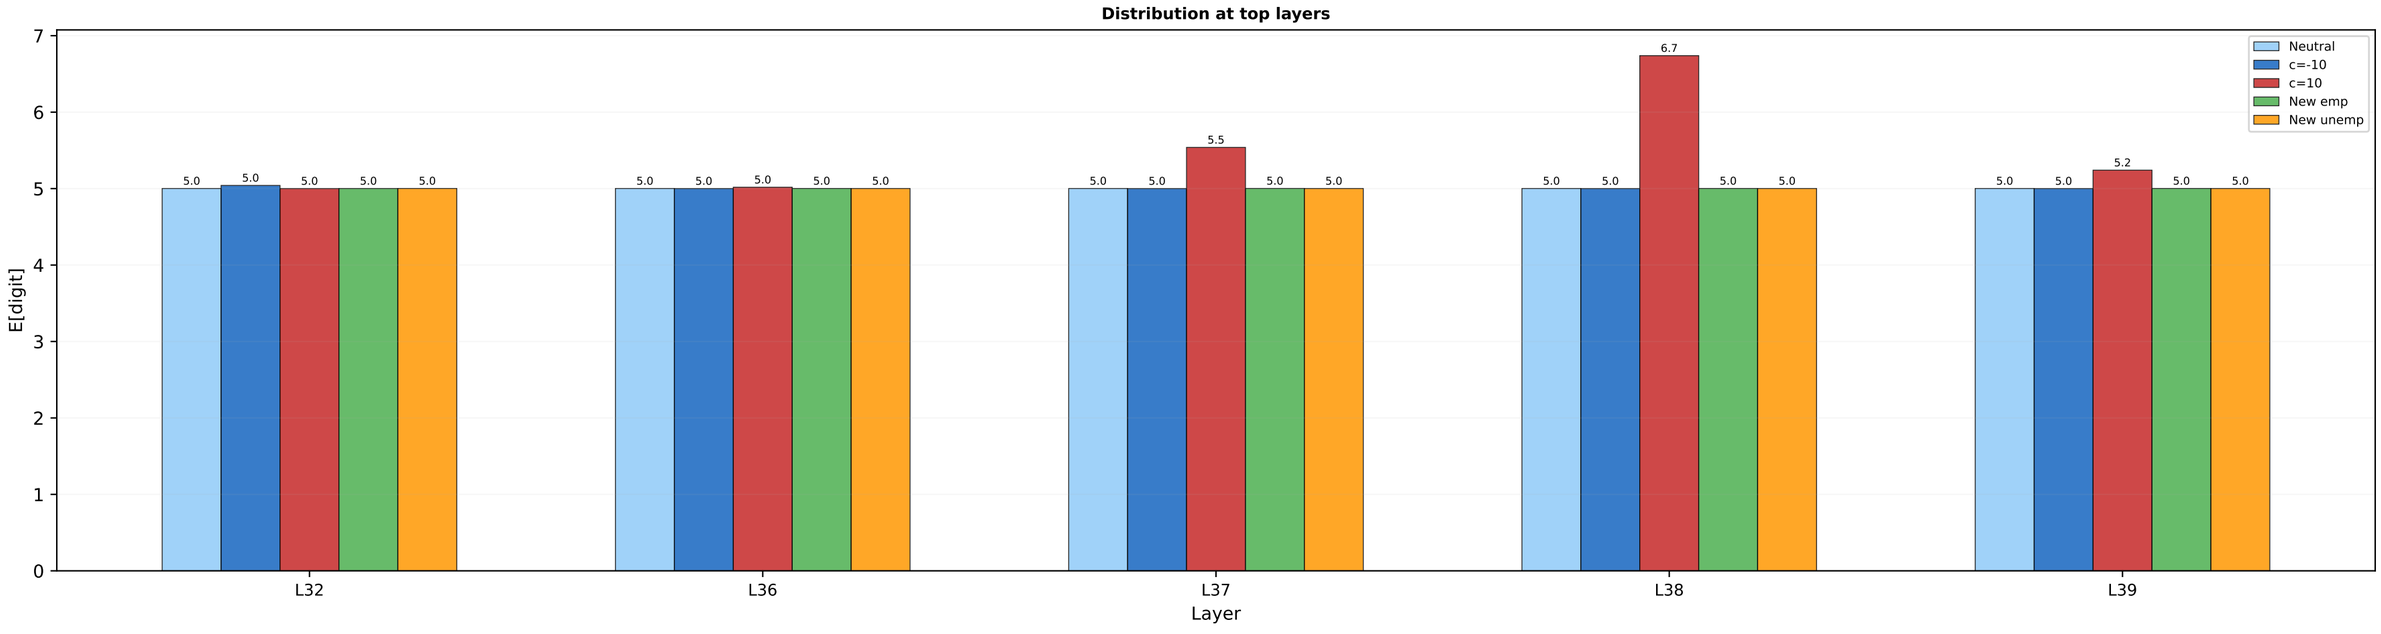


W10: Week-to-week consistency | V8/cfg2

```
Answer with a single digit from 0 to 9. | On a scale of 0 to 9,
how consistent is an individual's schedule today compared to the
same day last week? (0 = completely different, 9 = identical) ___
                                                              |
```

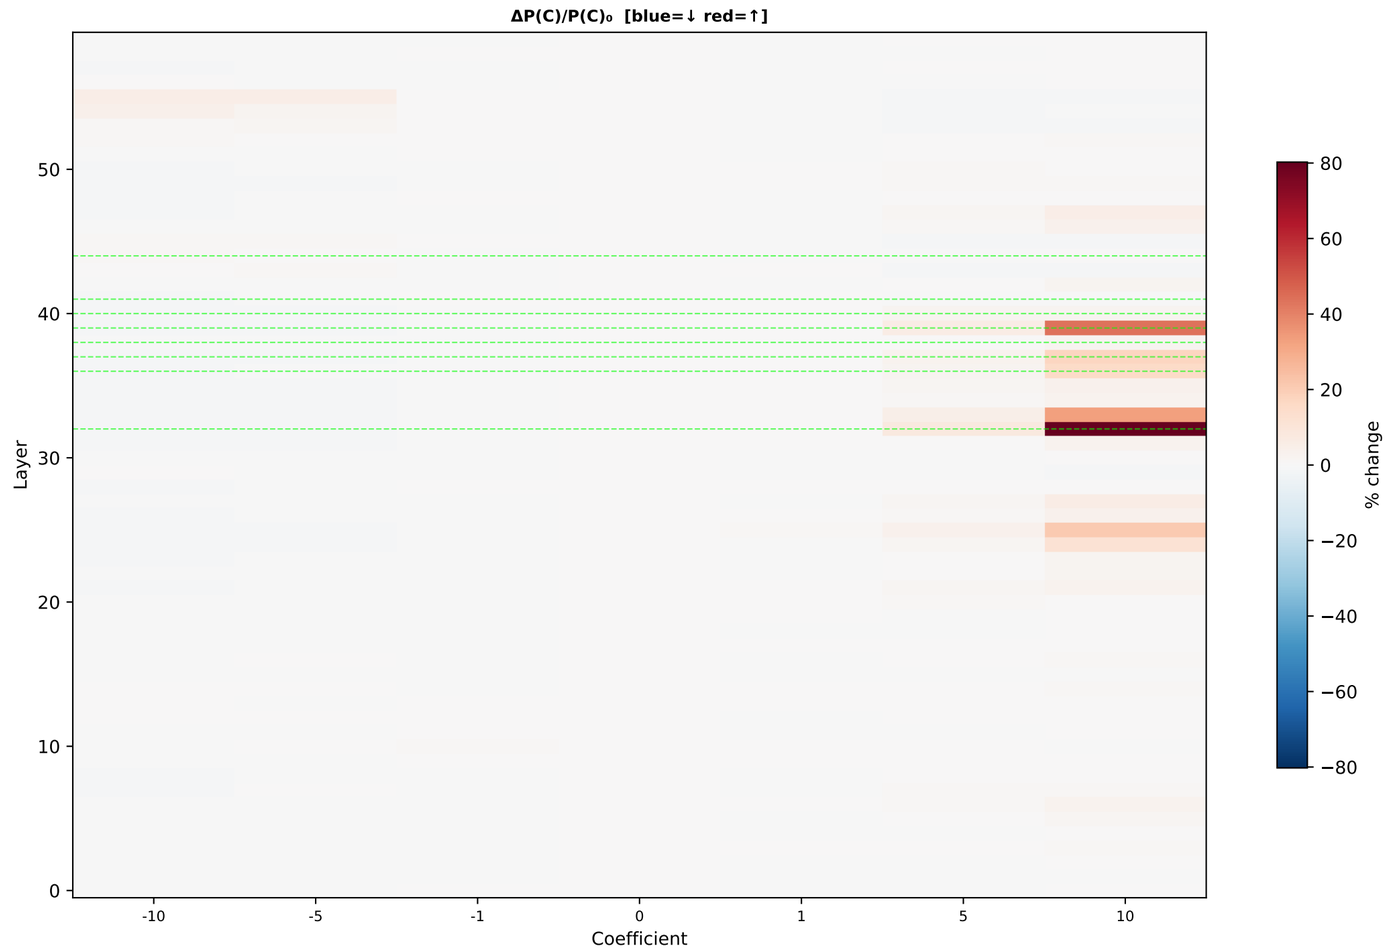


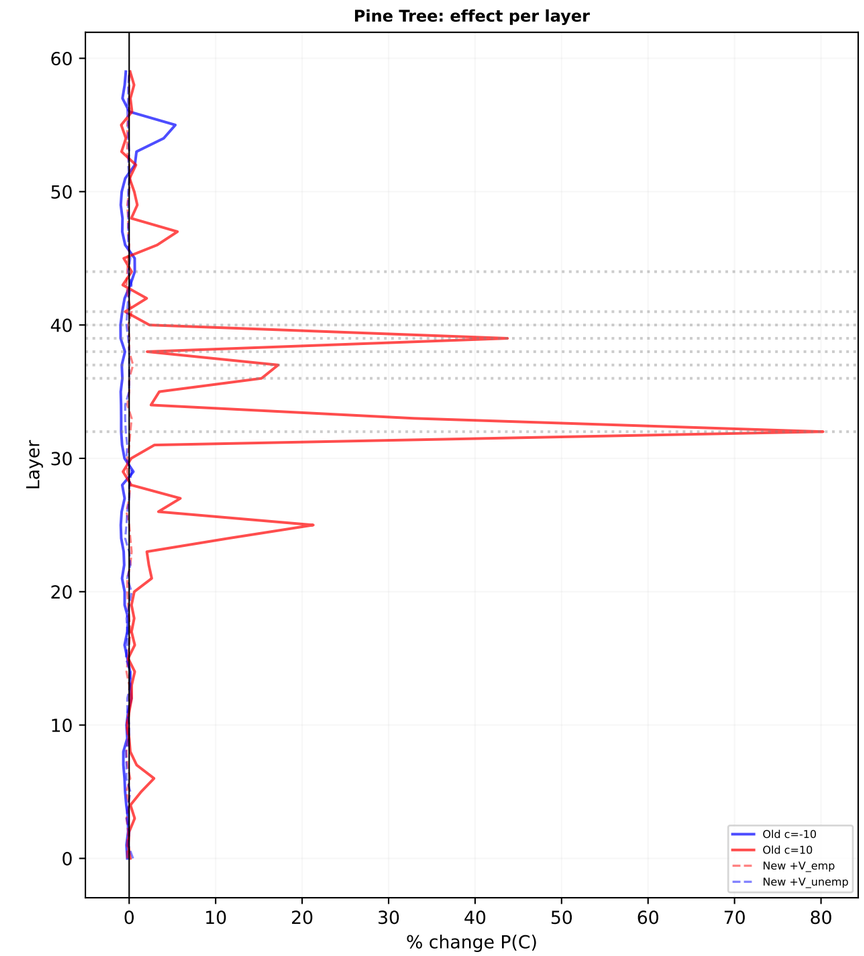


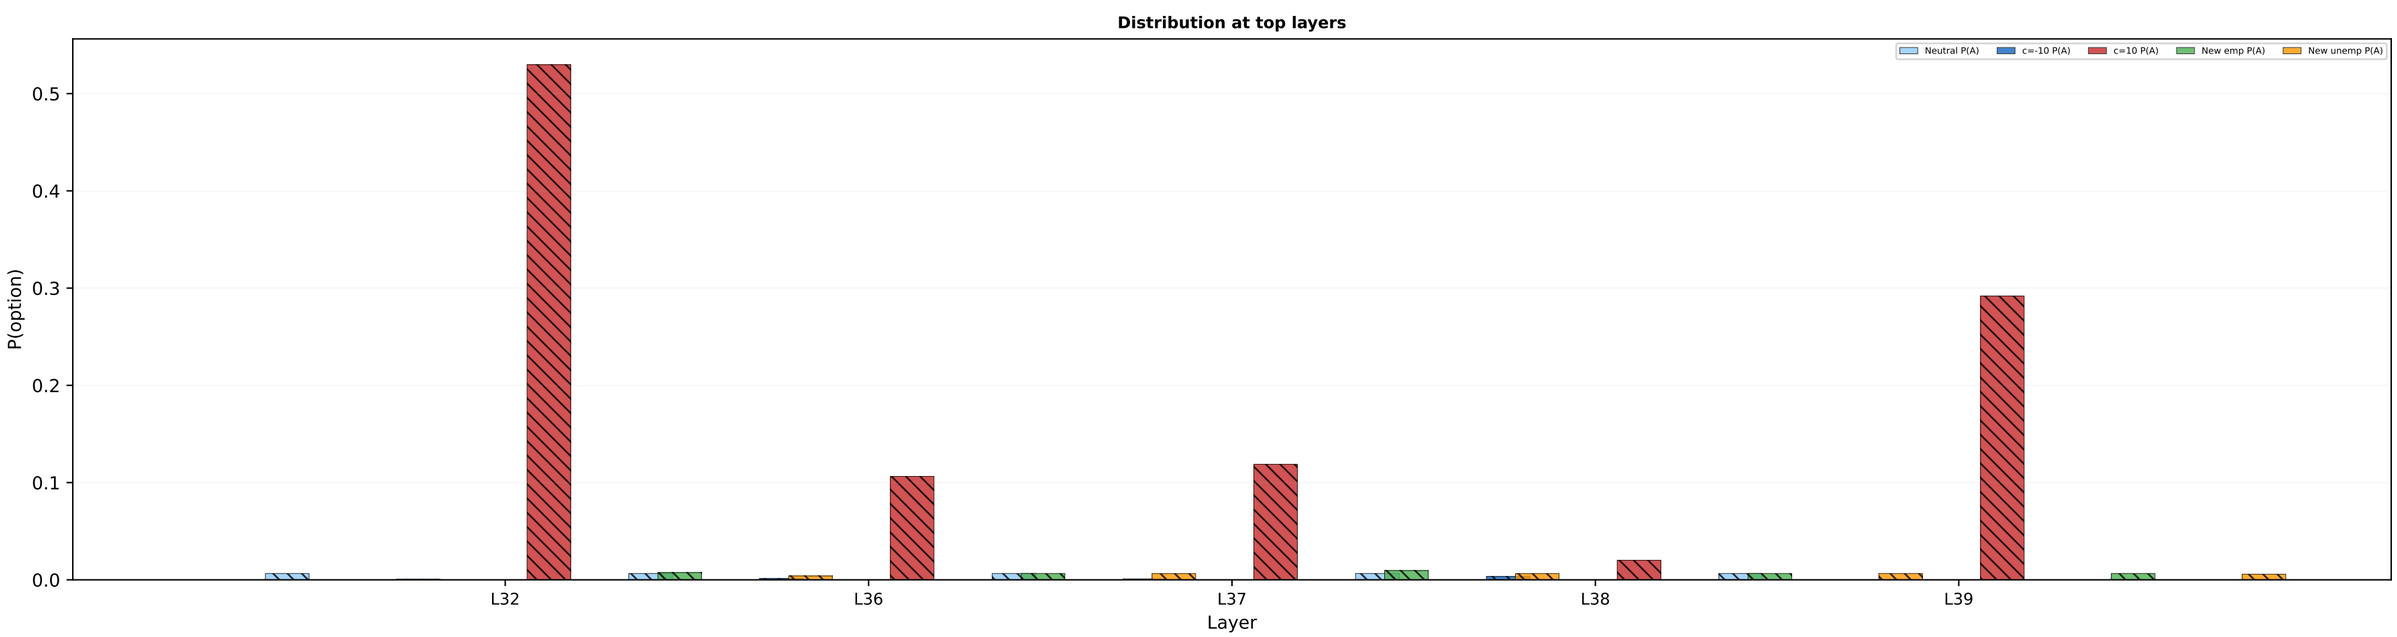


W11: 8 AM status | V8/cfg2

At 8:00 AM, an individual is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

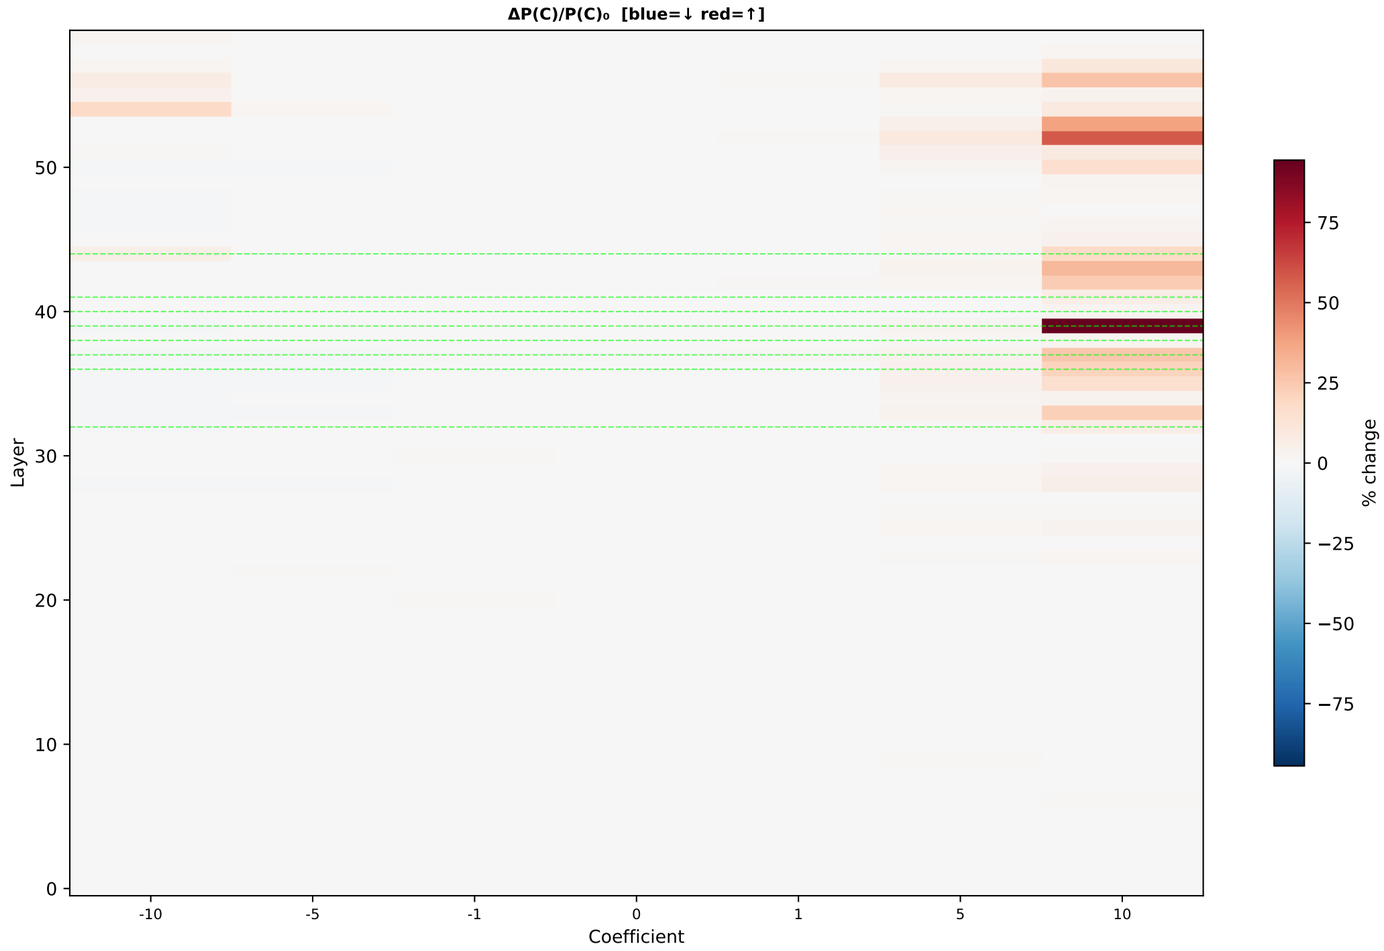


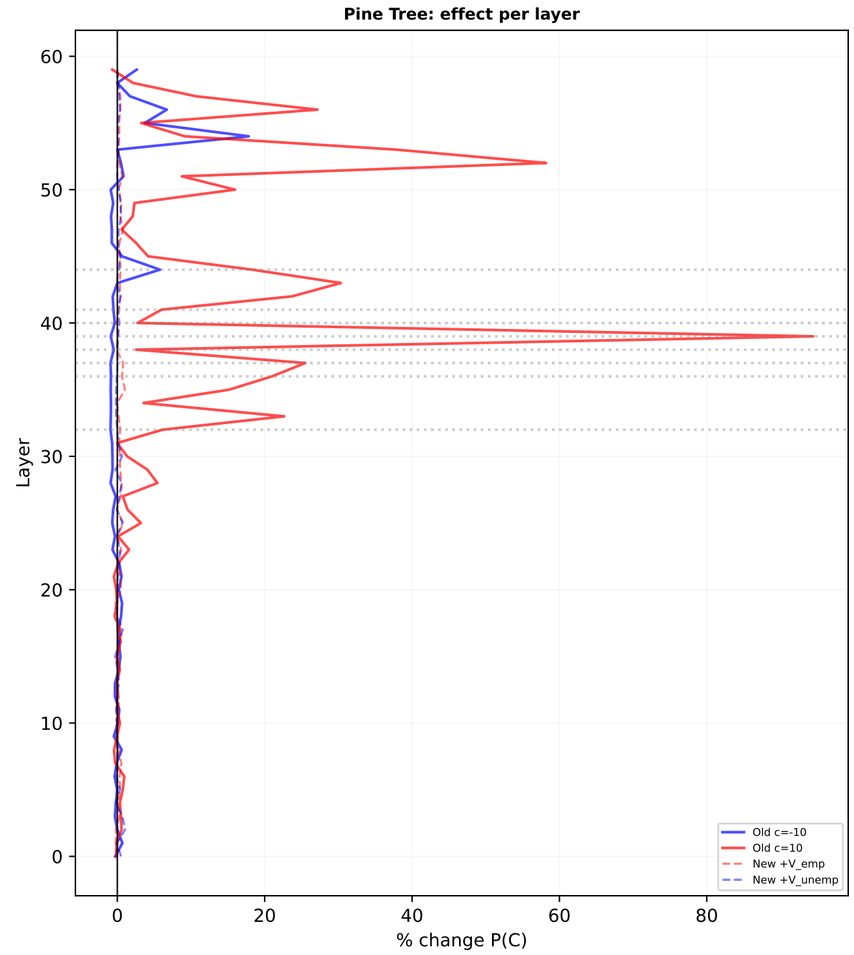


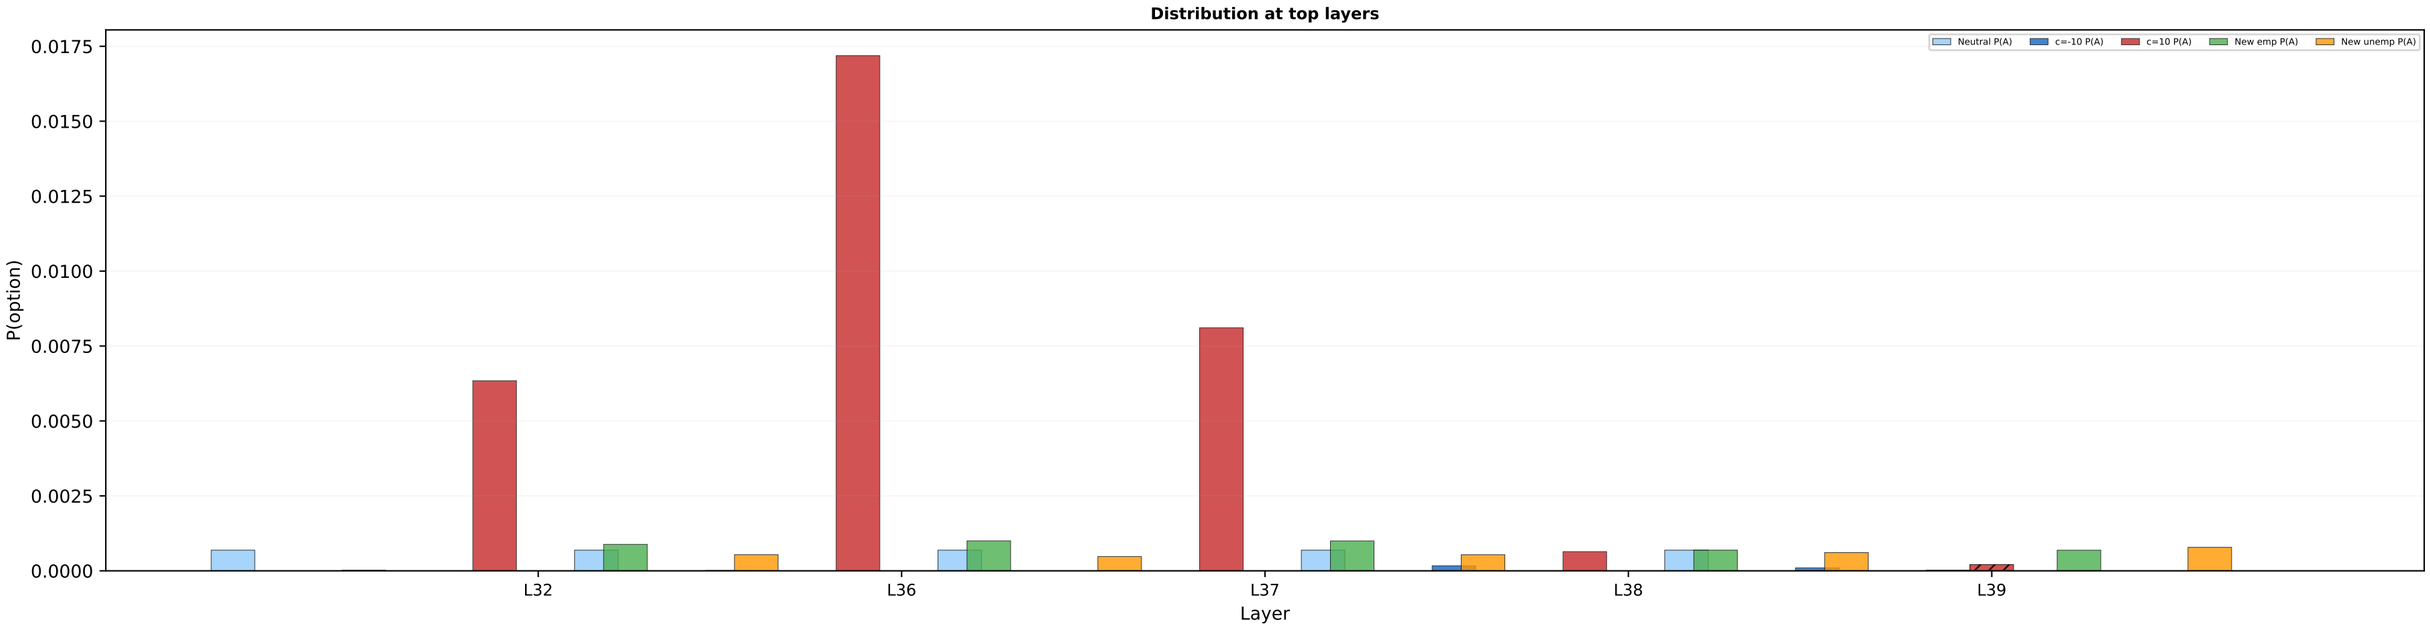


W12: 10:30 AM coffee availability | V8/cfg2

An individual is asked: "Are you usually free to meet for coffee at 10:30 AM?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (







W13: Noon availability | V8/cfg2
