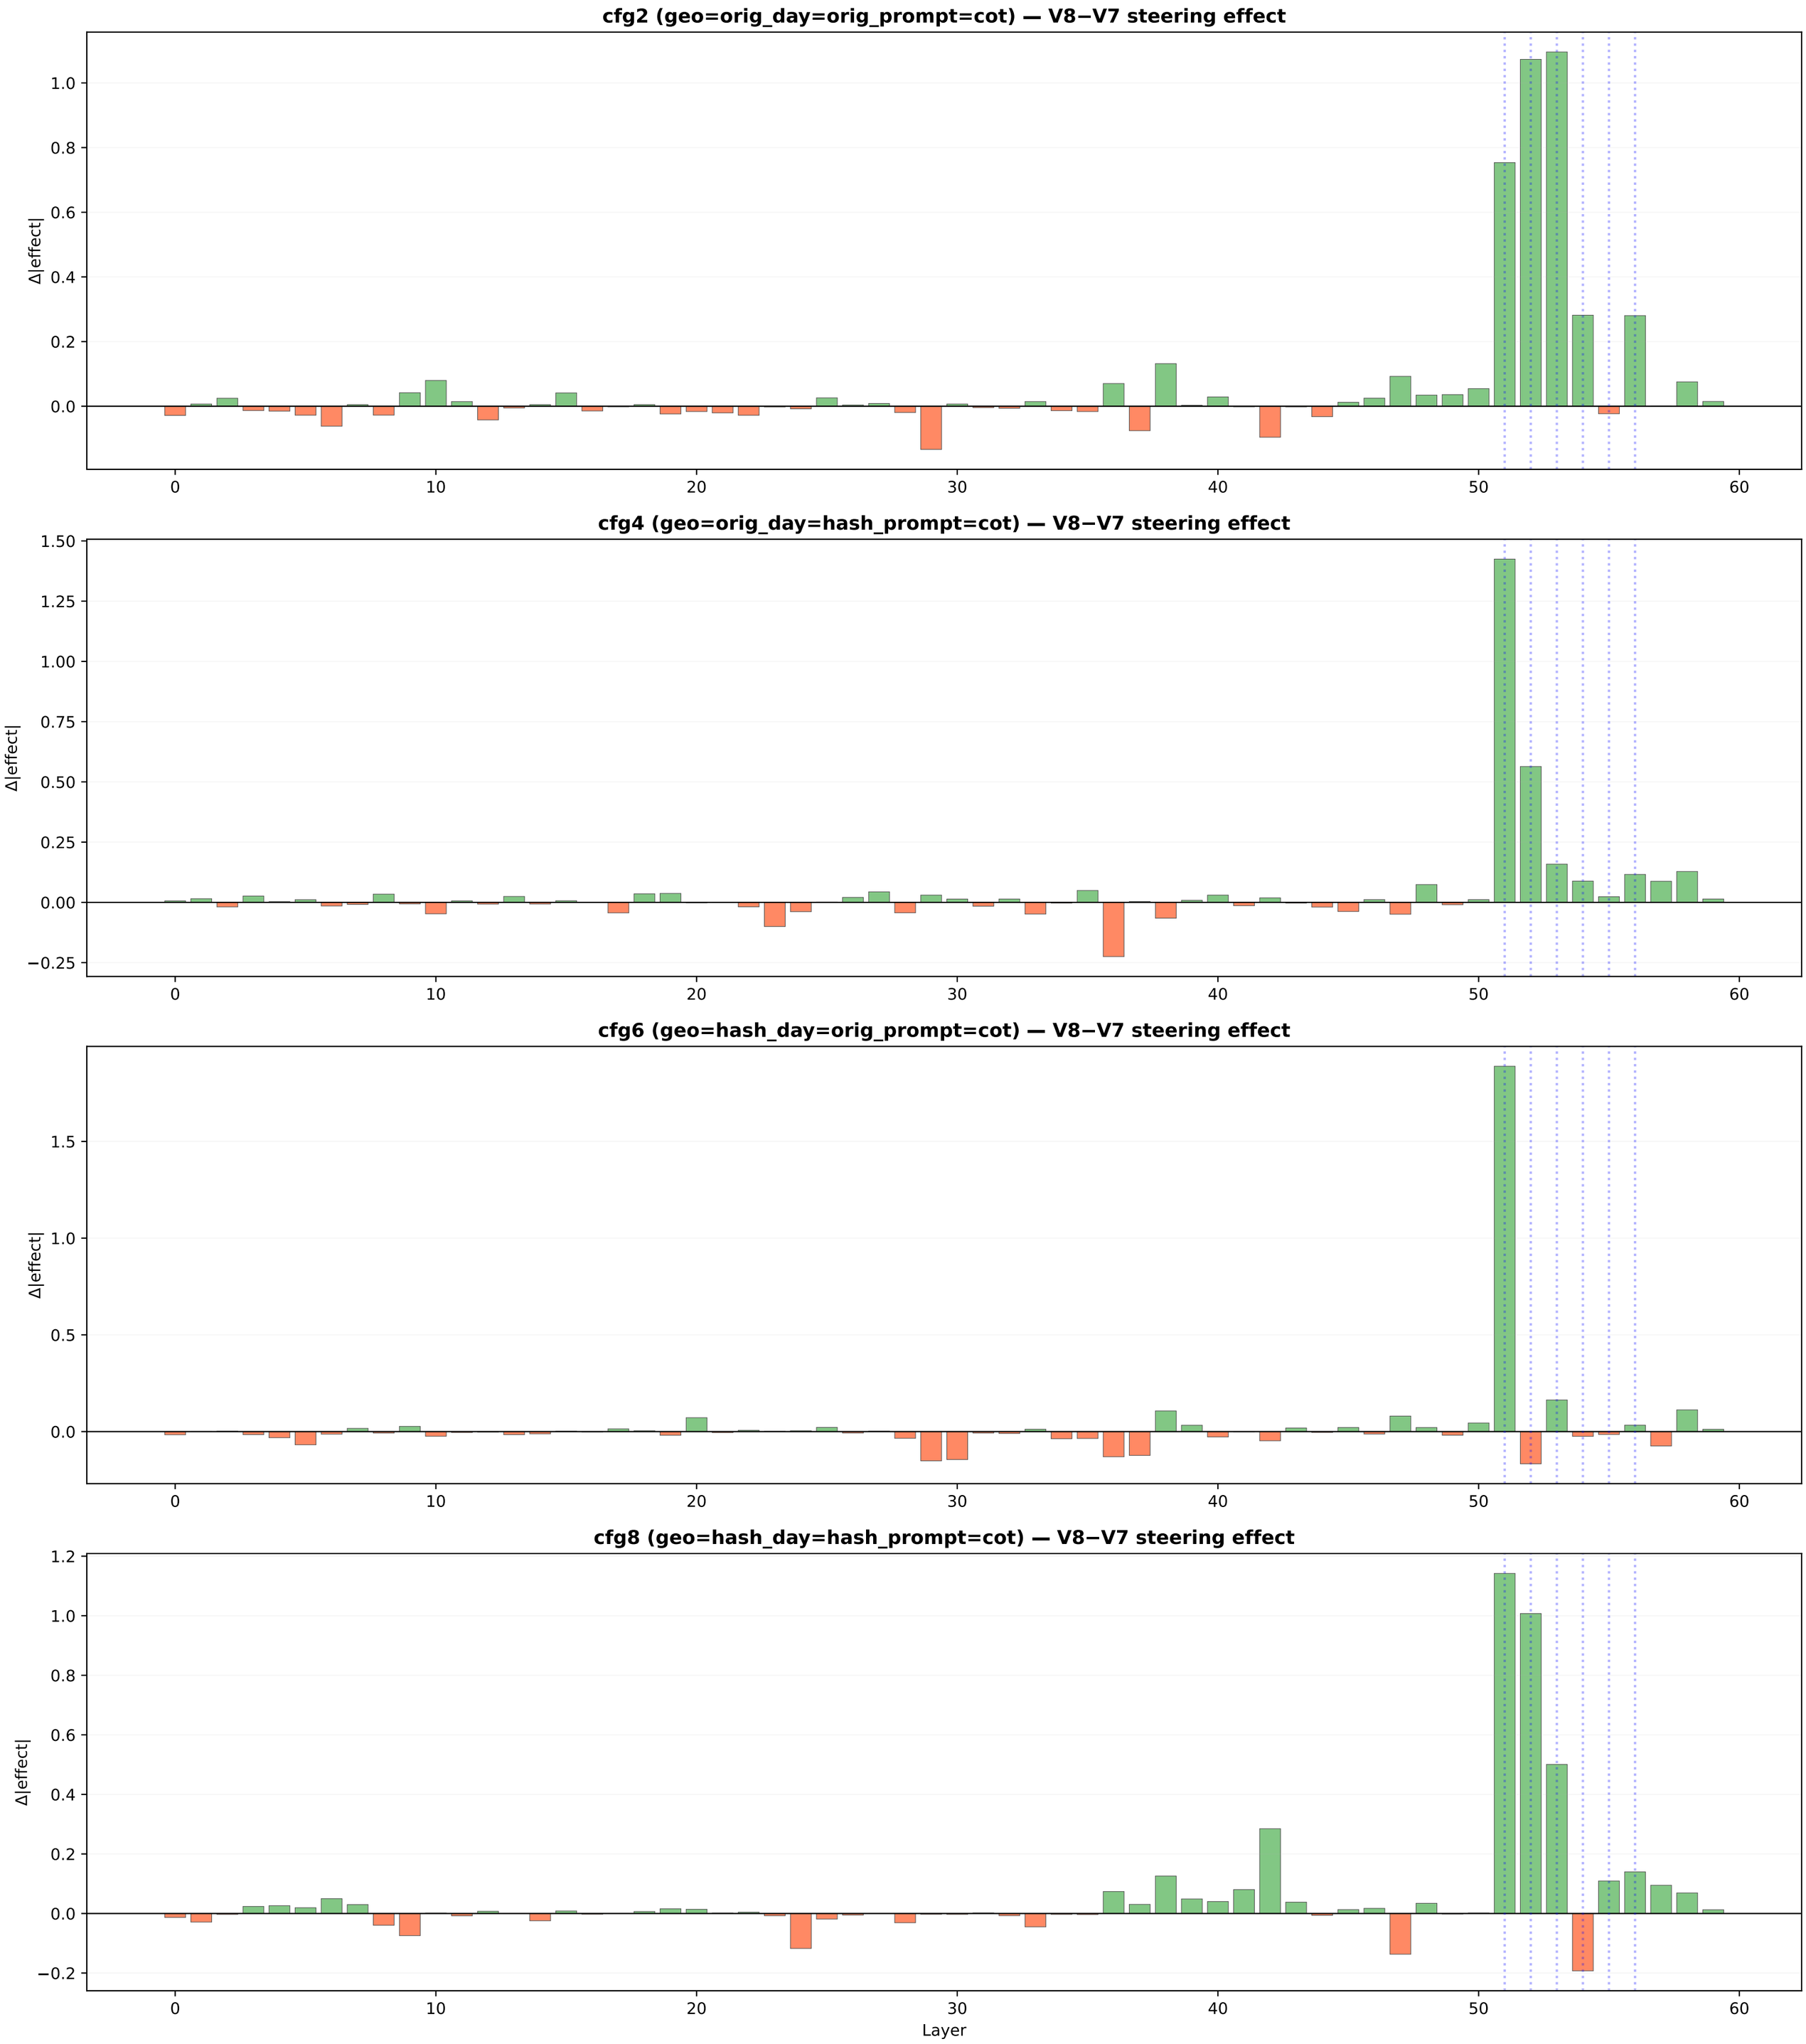
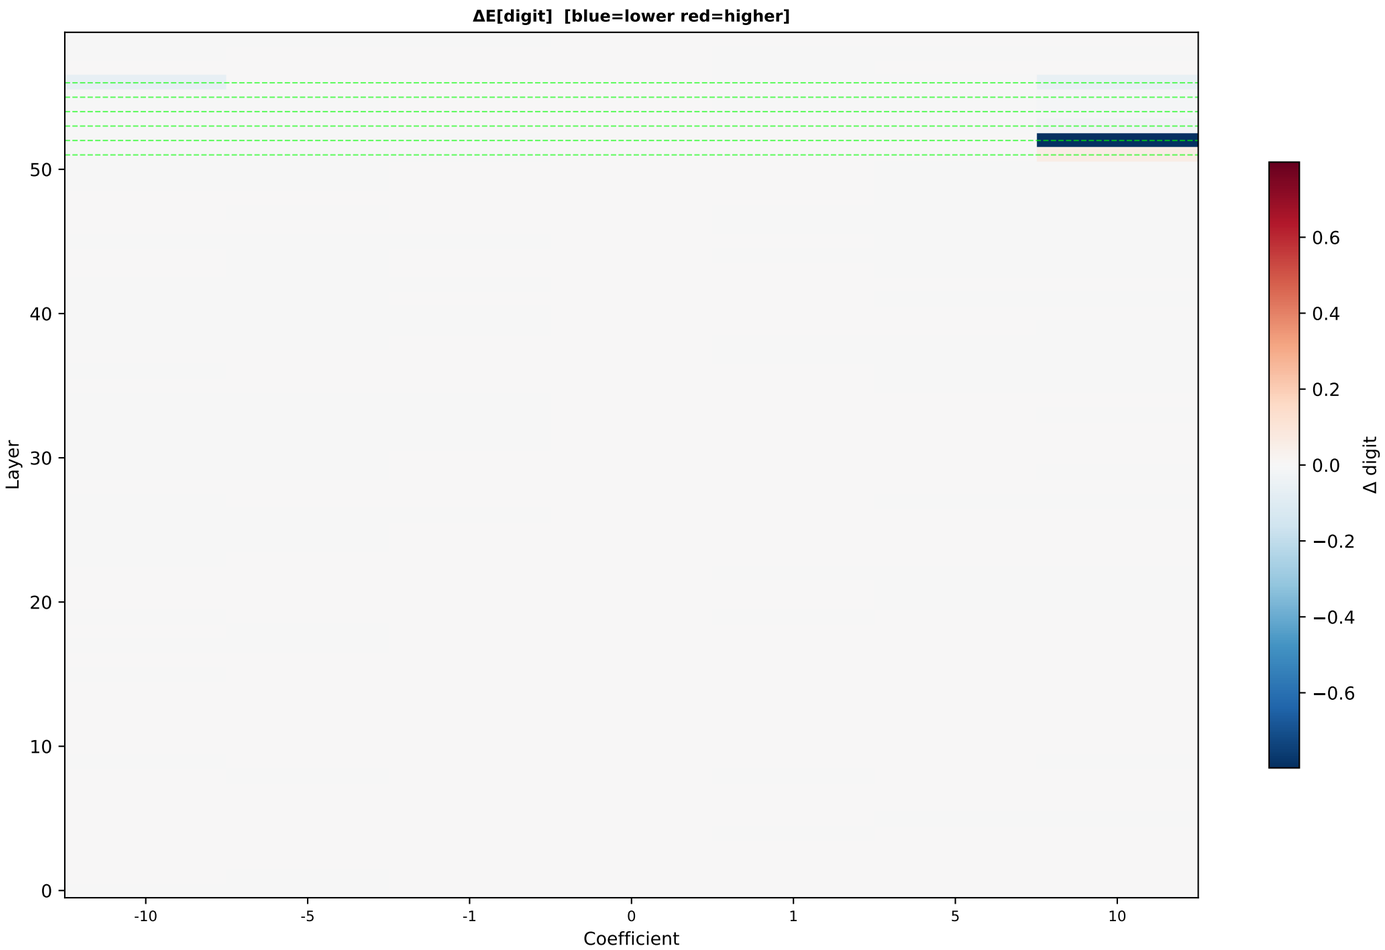
EXP2 — Layer Steering Effectiveness
(mean |ΔP(target)| across all questions, old method ±10)

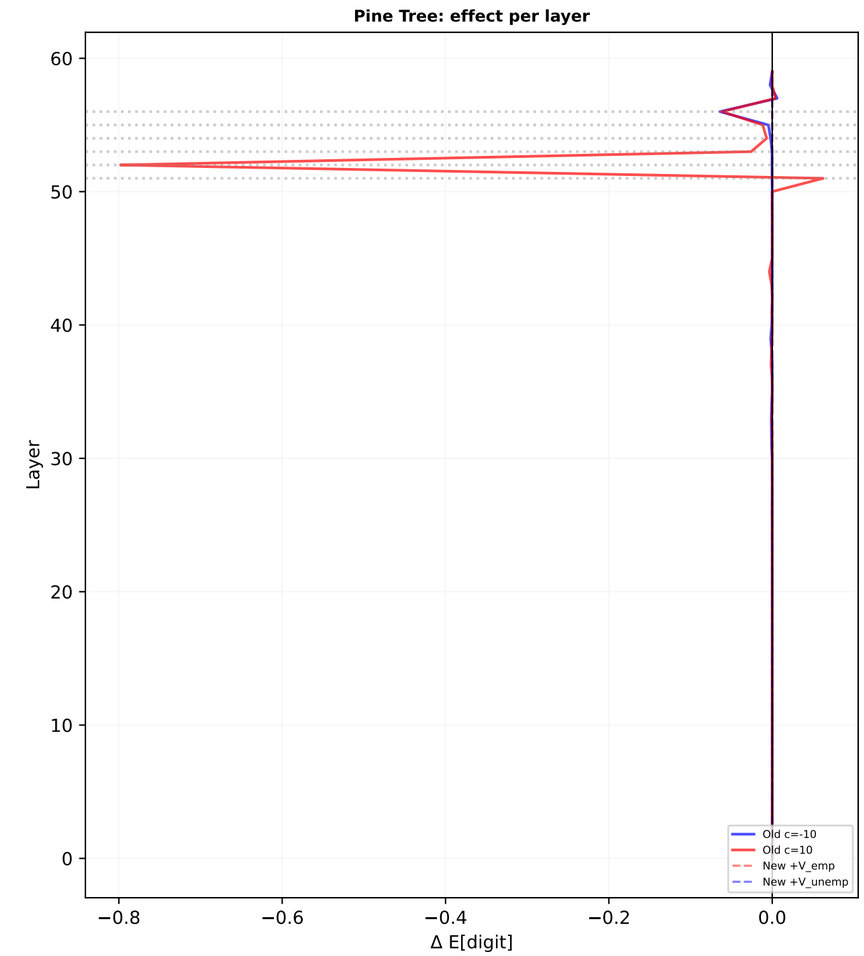
EXP2 — Hint Direction: V8 − V7
Green = hint ↑ steerability, Red = hint ↓

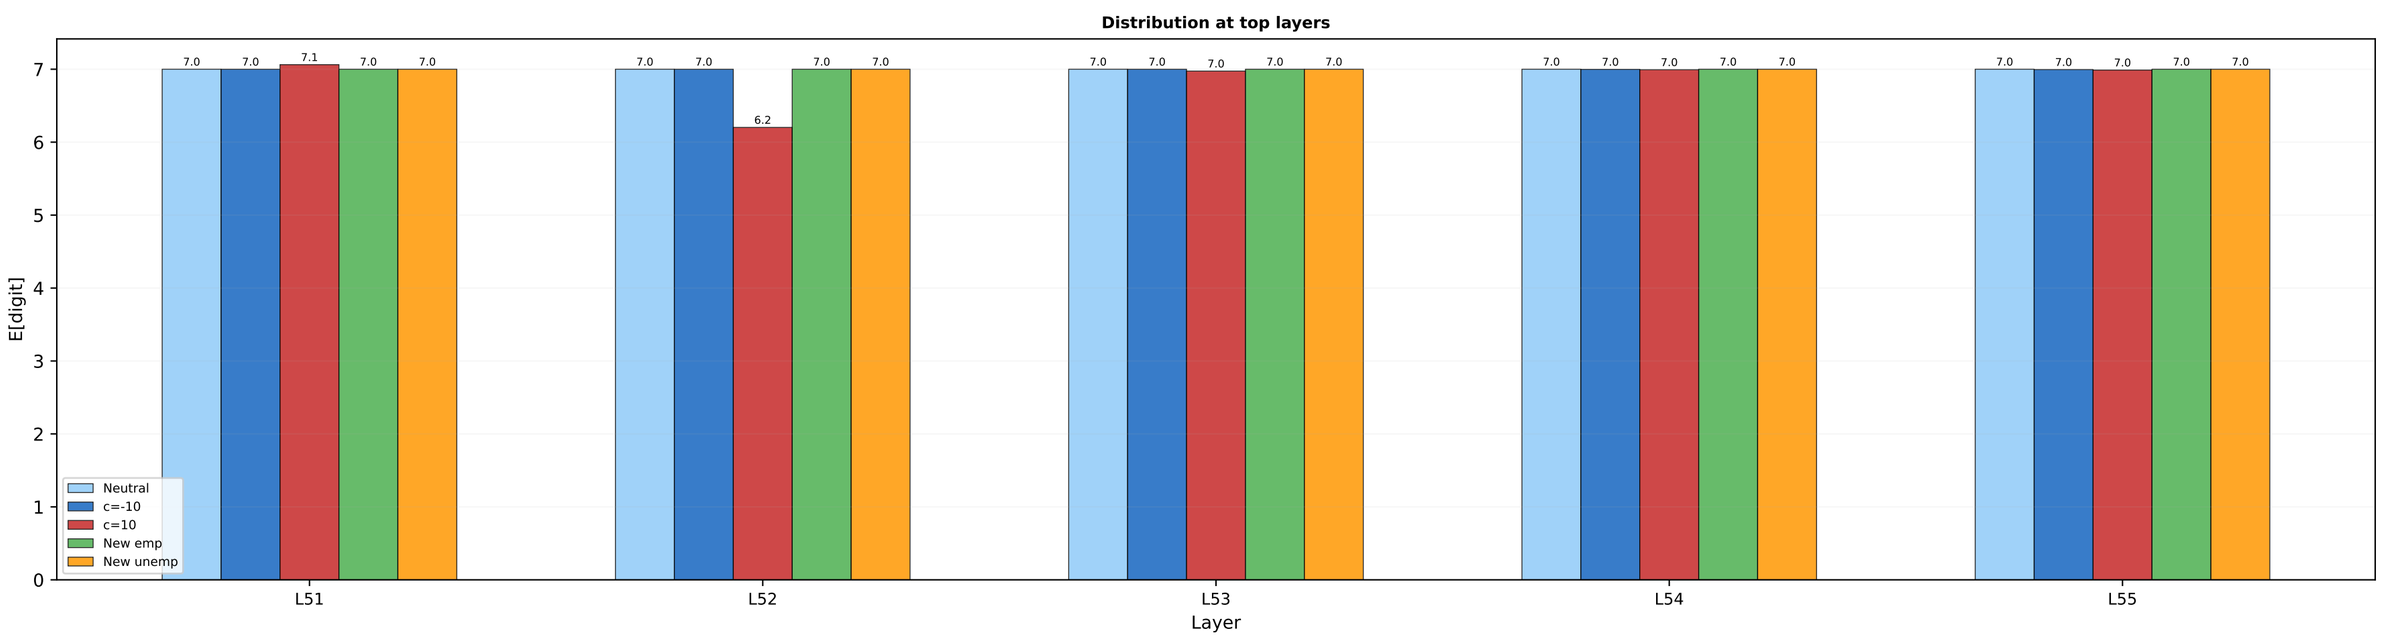


Complete with a single number only. | A typical adult wakes up at approximately ___:00 AM on a Tuesday. |

E1: Wake-up hour (Tue) | V7/cfg2

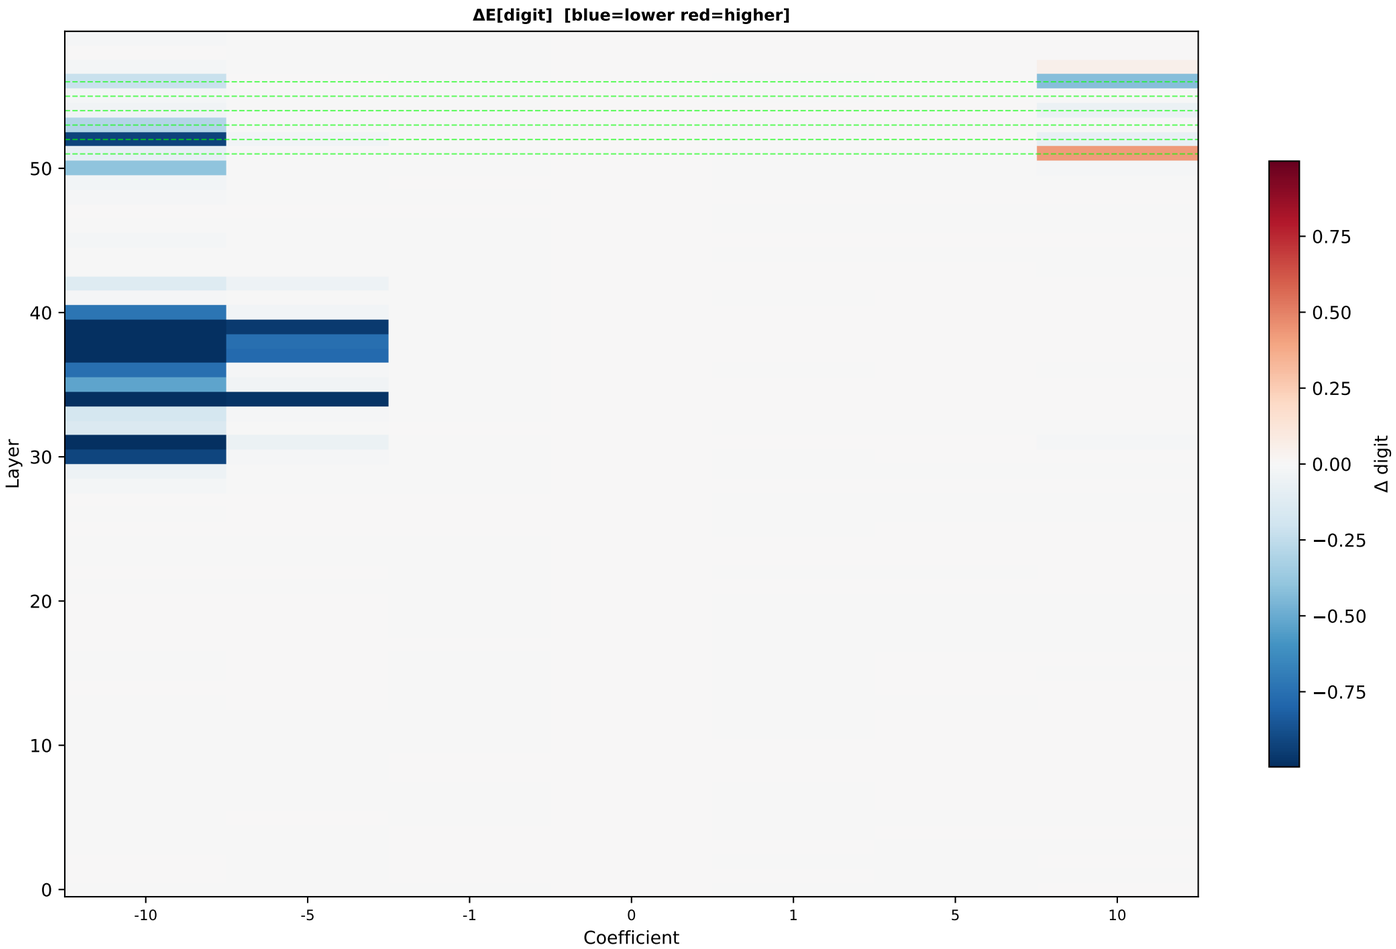


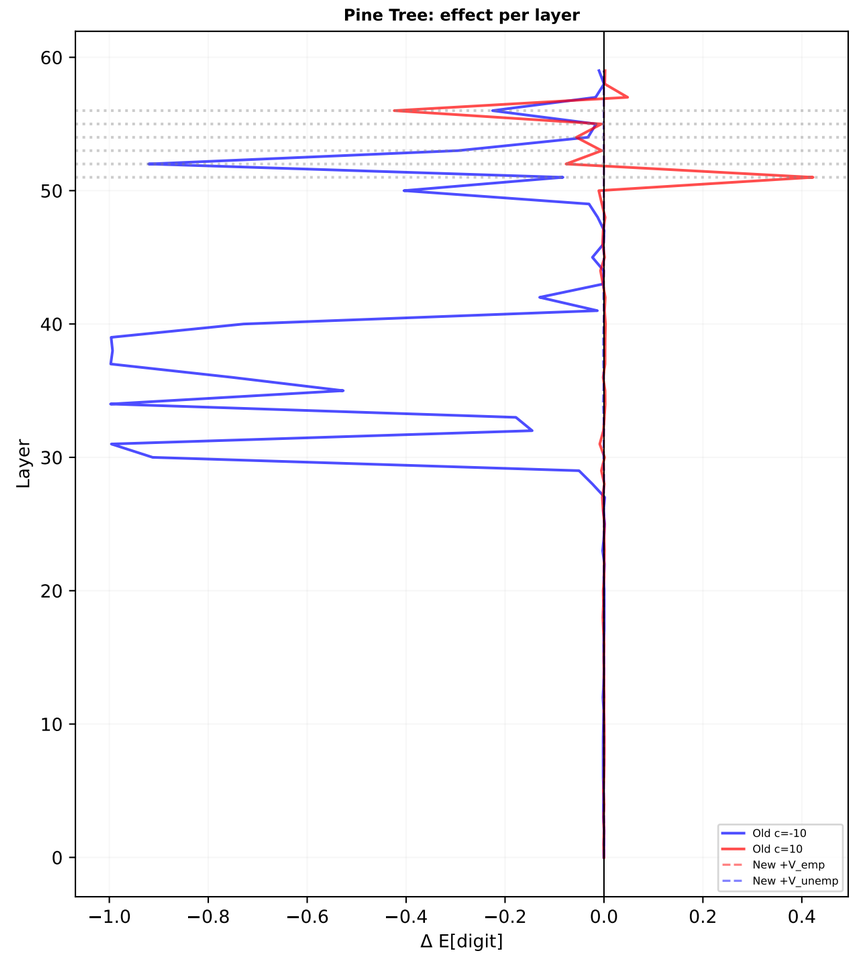


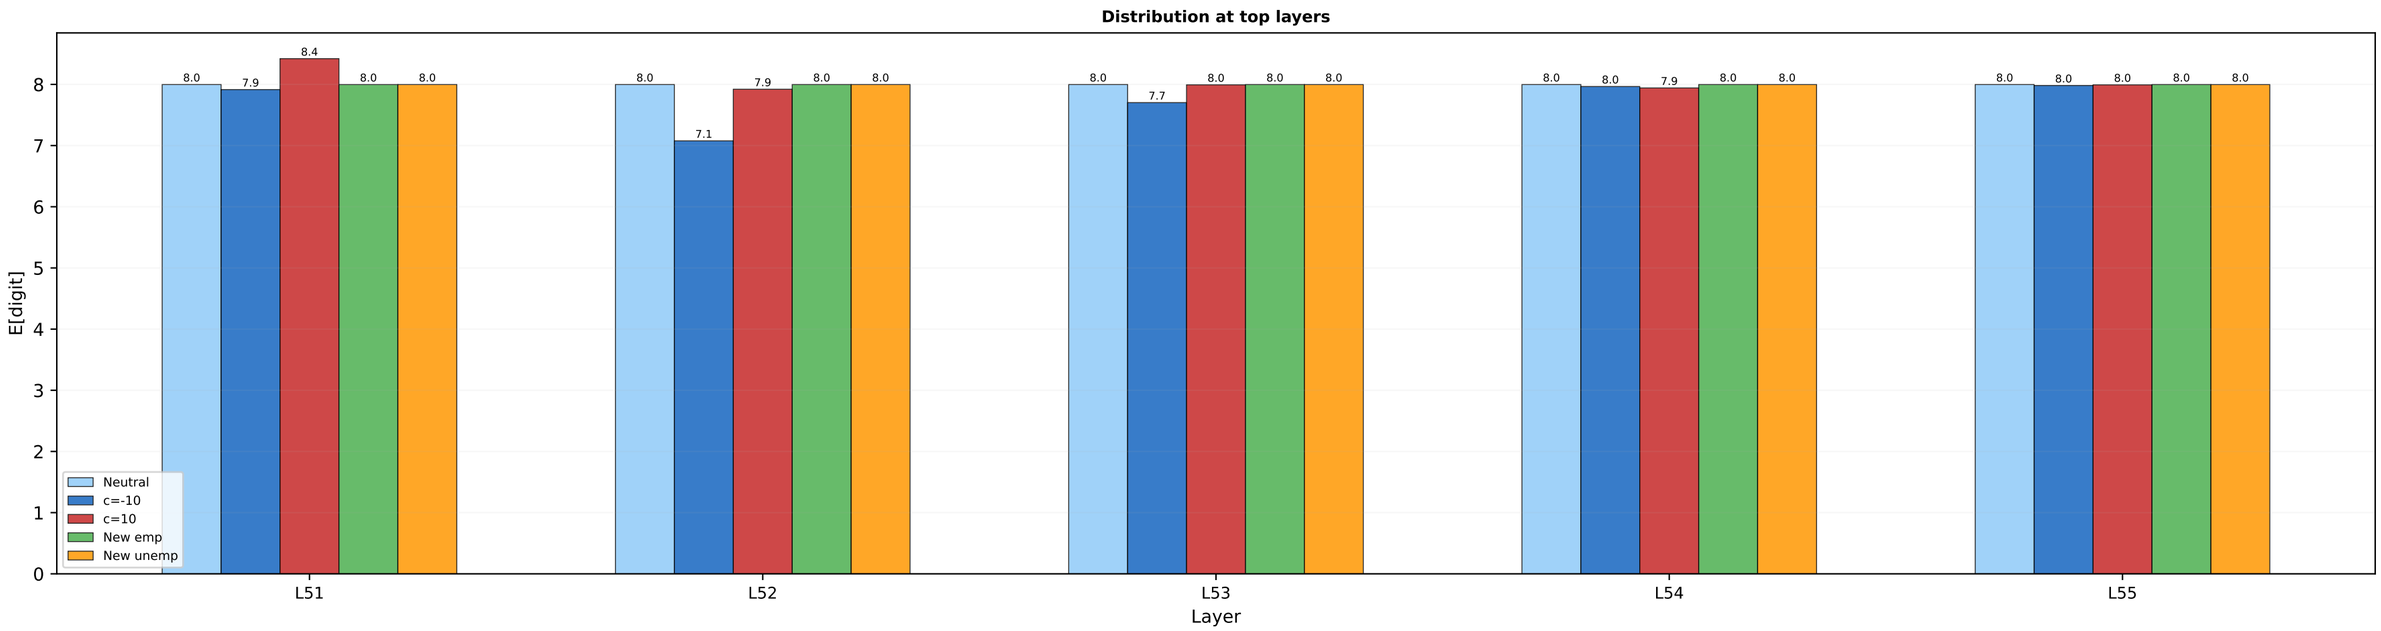


Complete with a single number only. | A typical adult leaves home at approximately ___:00 AM on a Tuesday. |

E2: Leave-home hour (Tue) | V7/cfg2

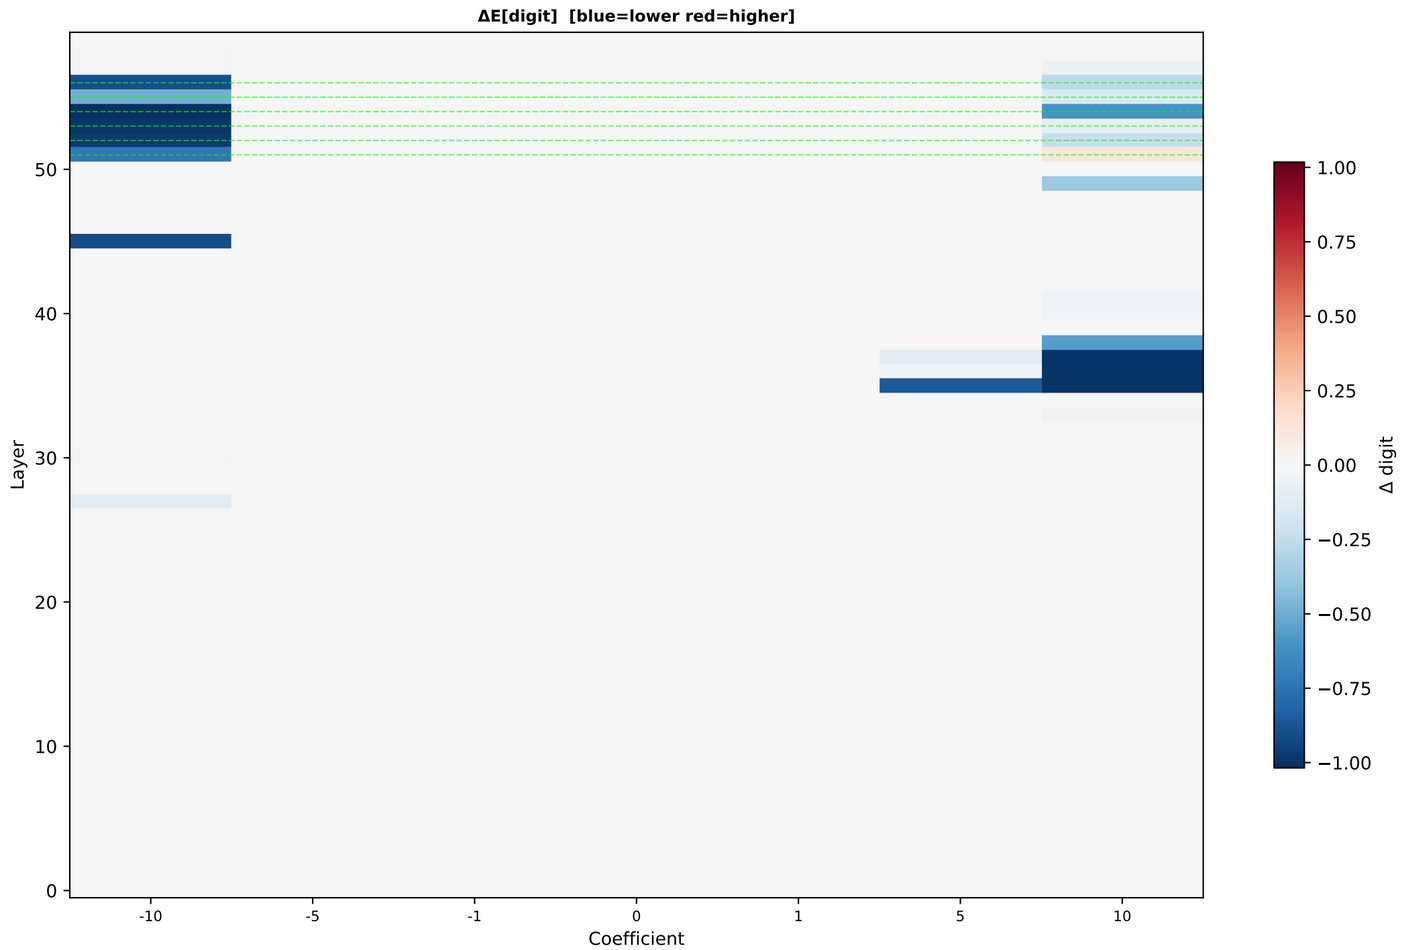


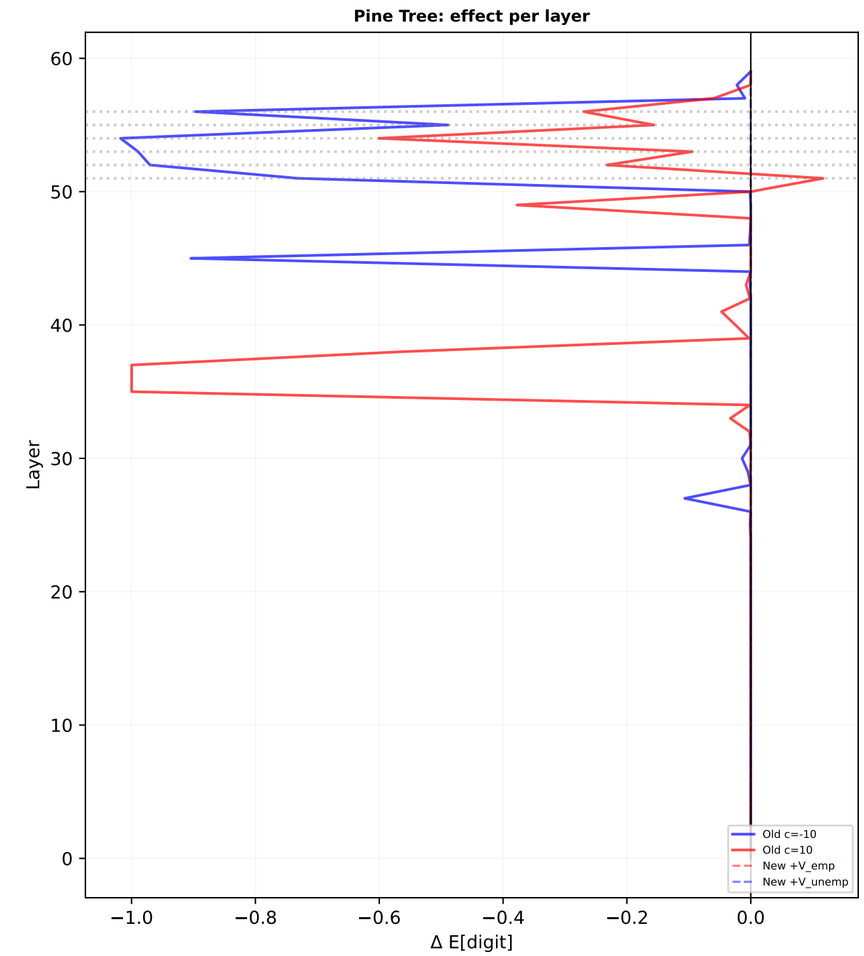


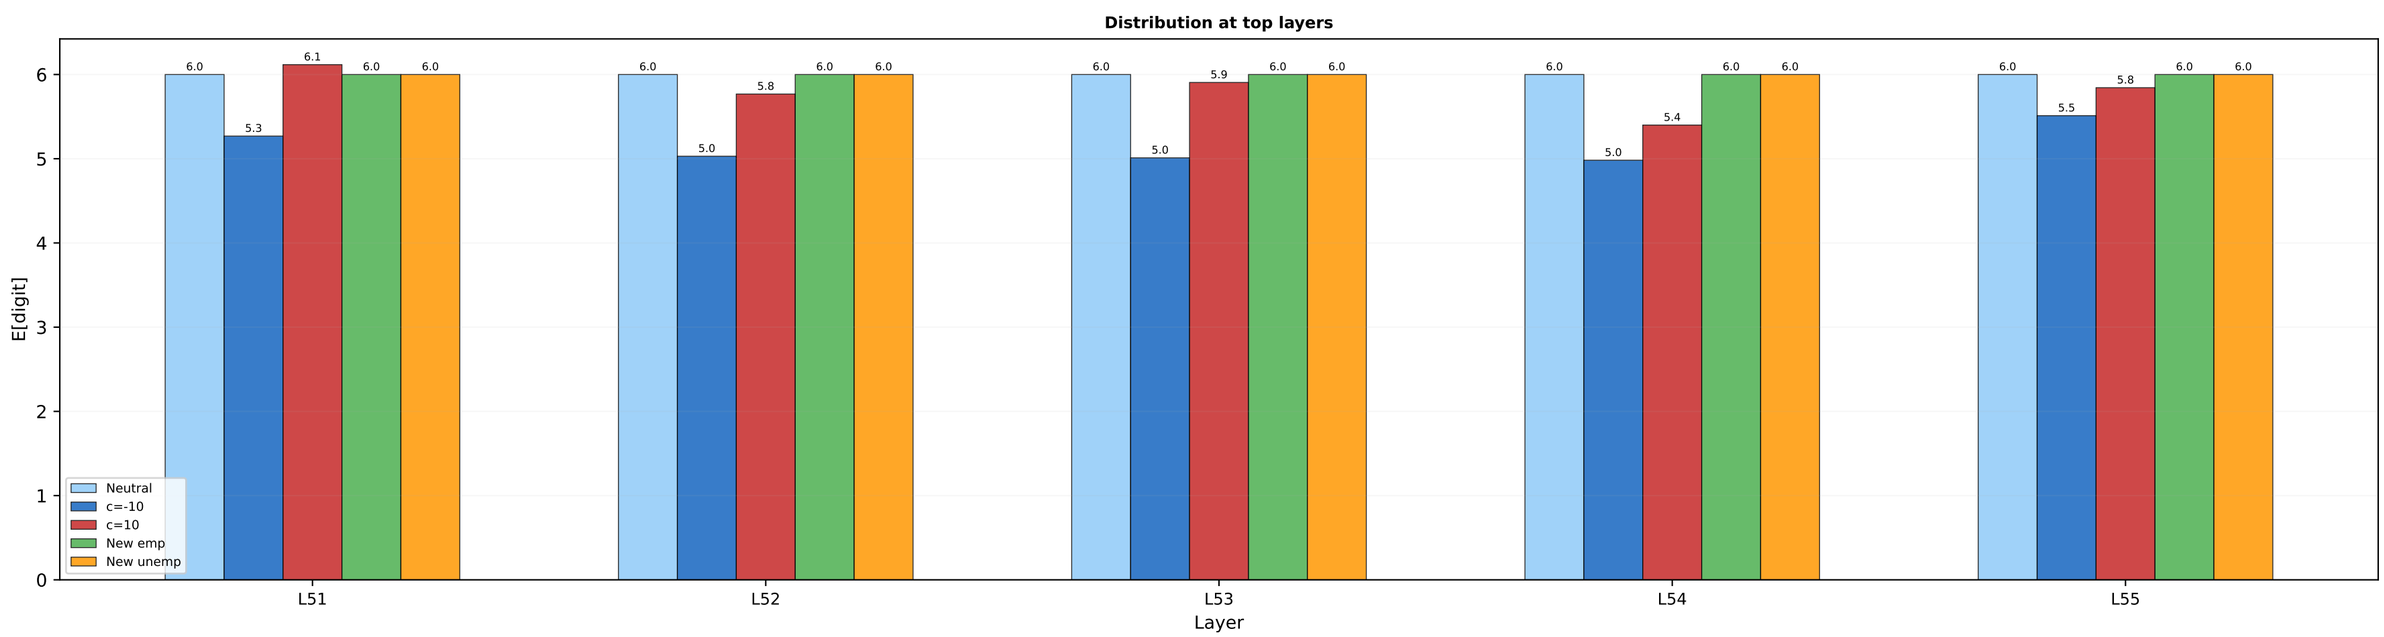


Complete with a single number only. | A typical adult arrives home at approximately ___:00 PM on a Tuesday. |

E3: Arrive-home hour (Tue) | V7/cfg2

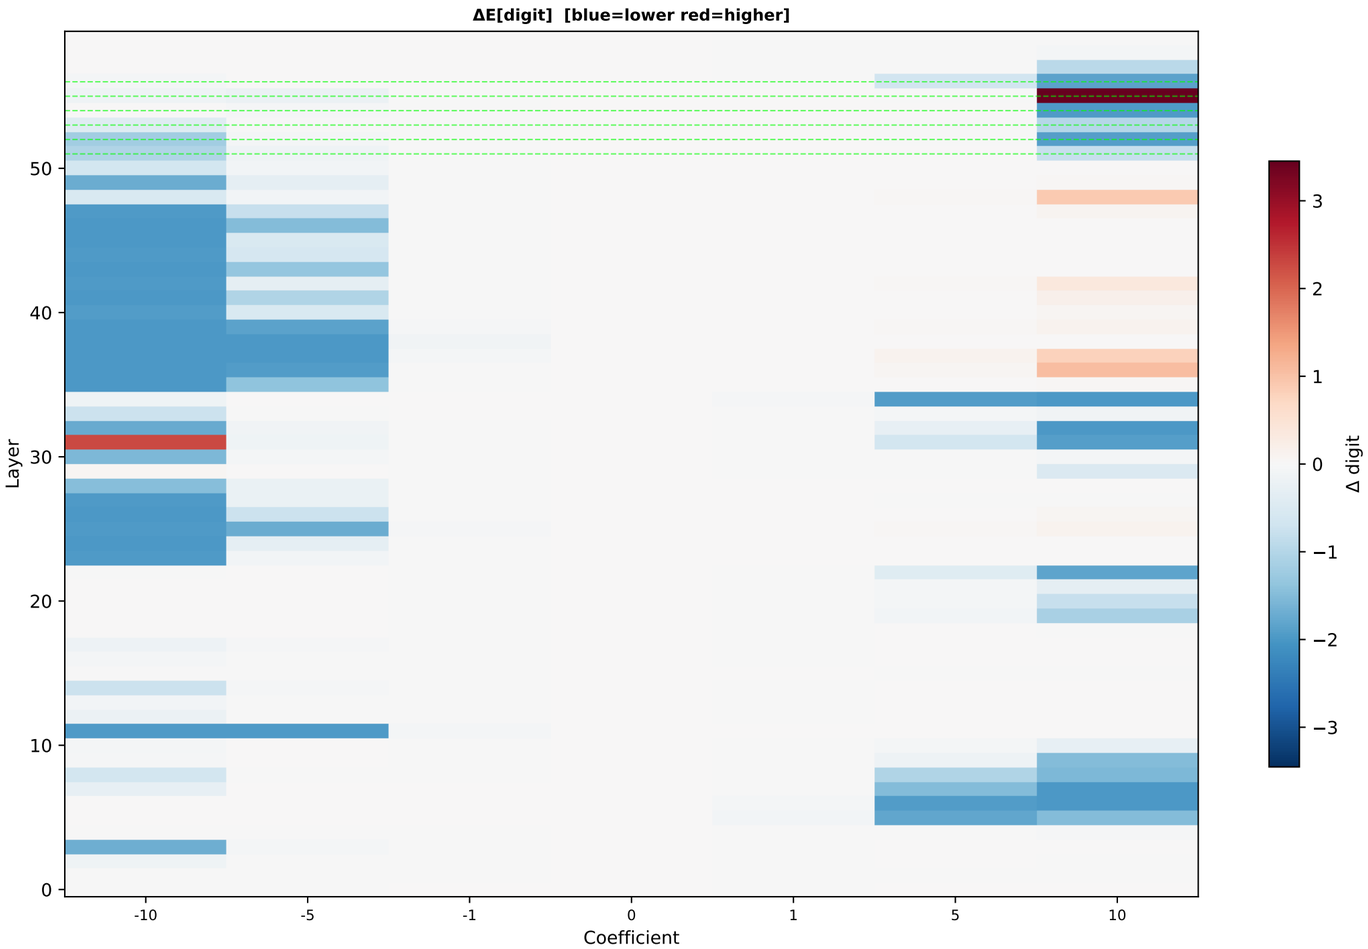


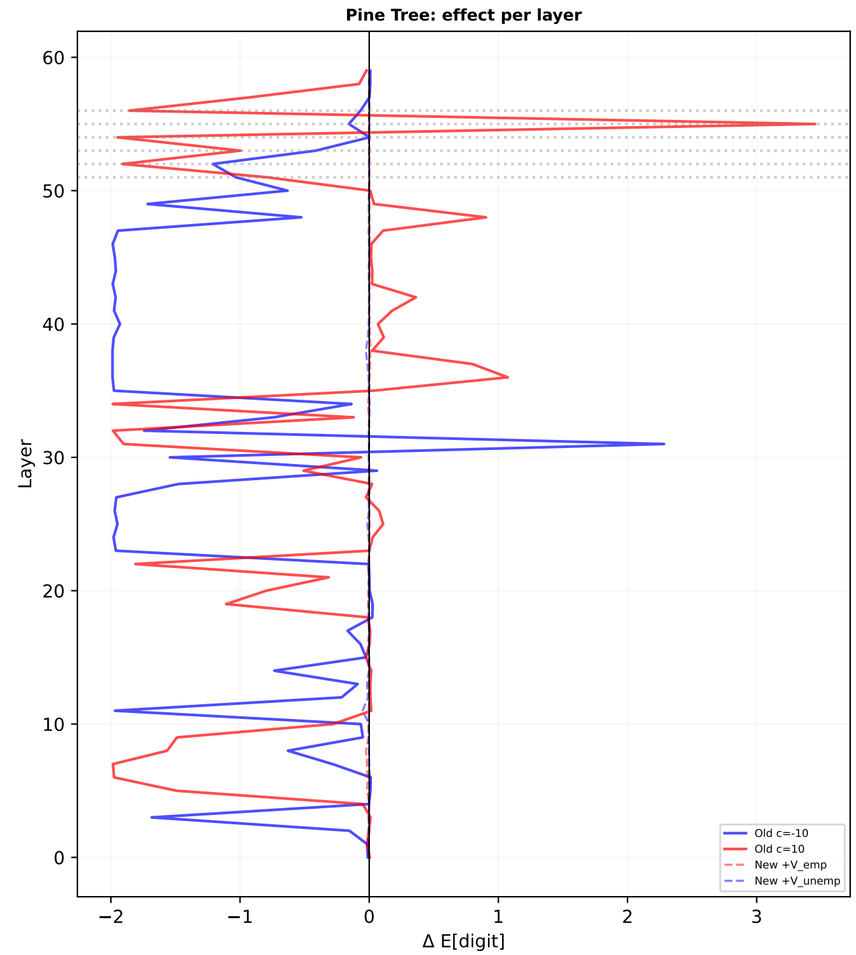


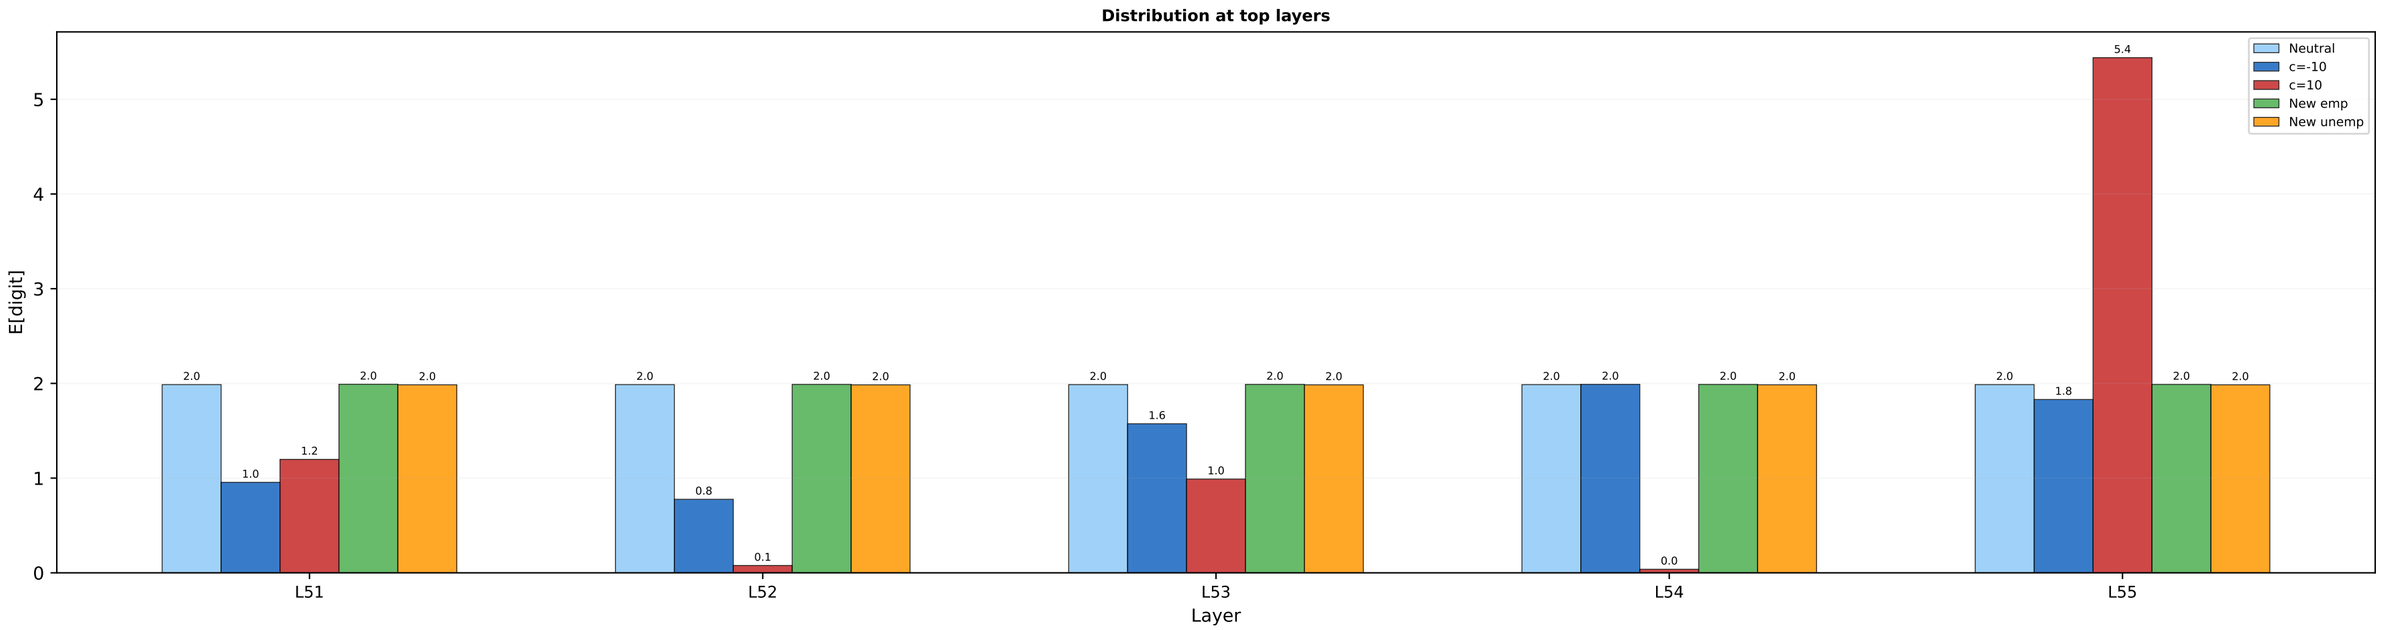


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at home between 8 AM and 6 PM on a Tuesday? ___ |

E4: Daytime hours at home (Tue) | V7/cfg2

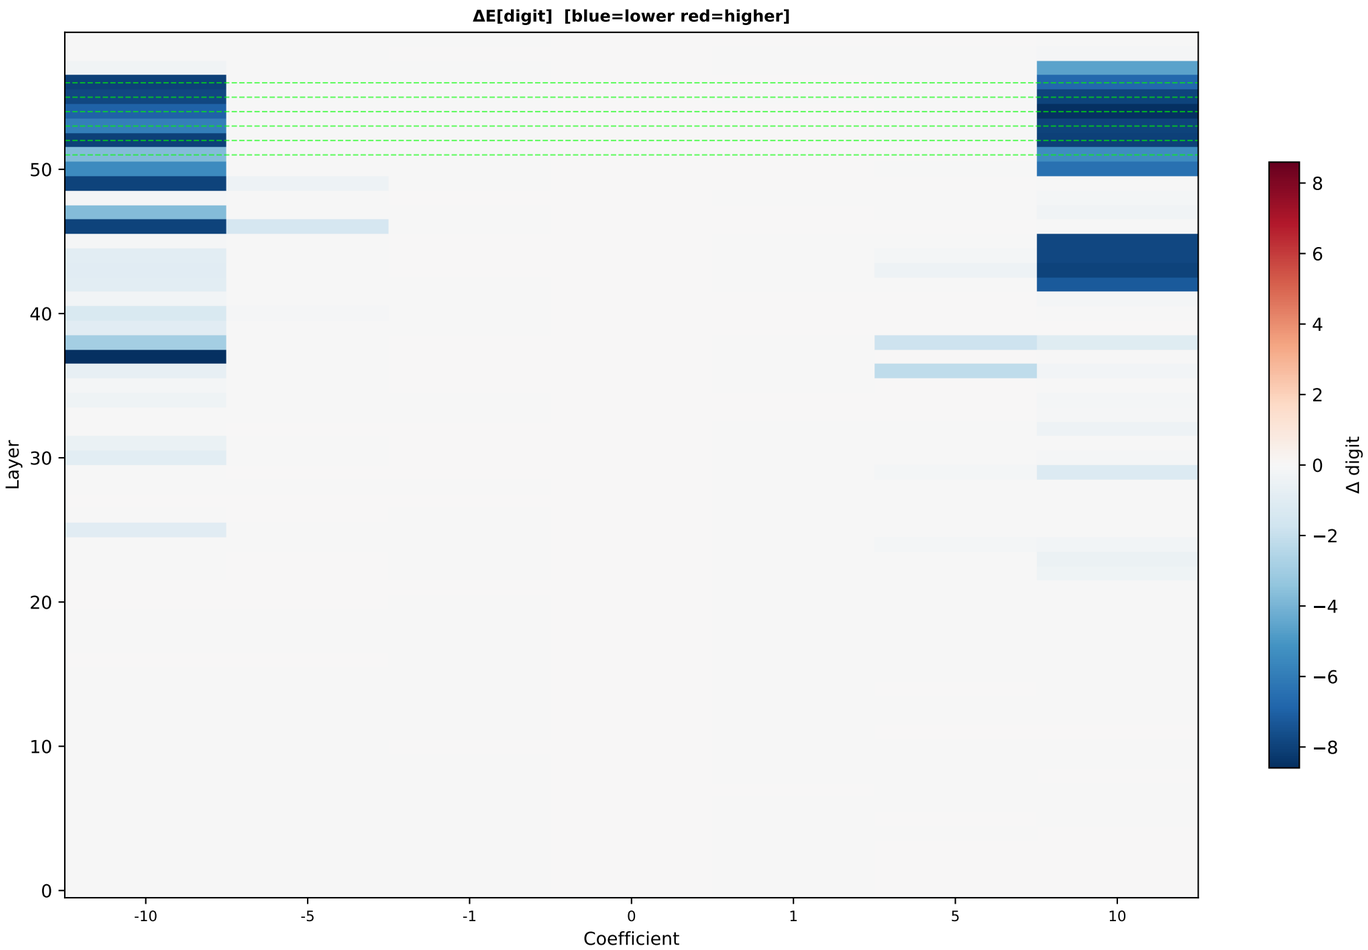


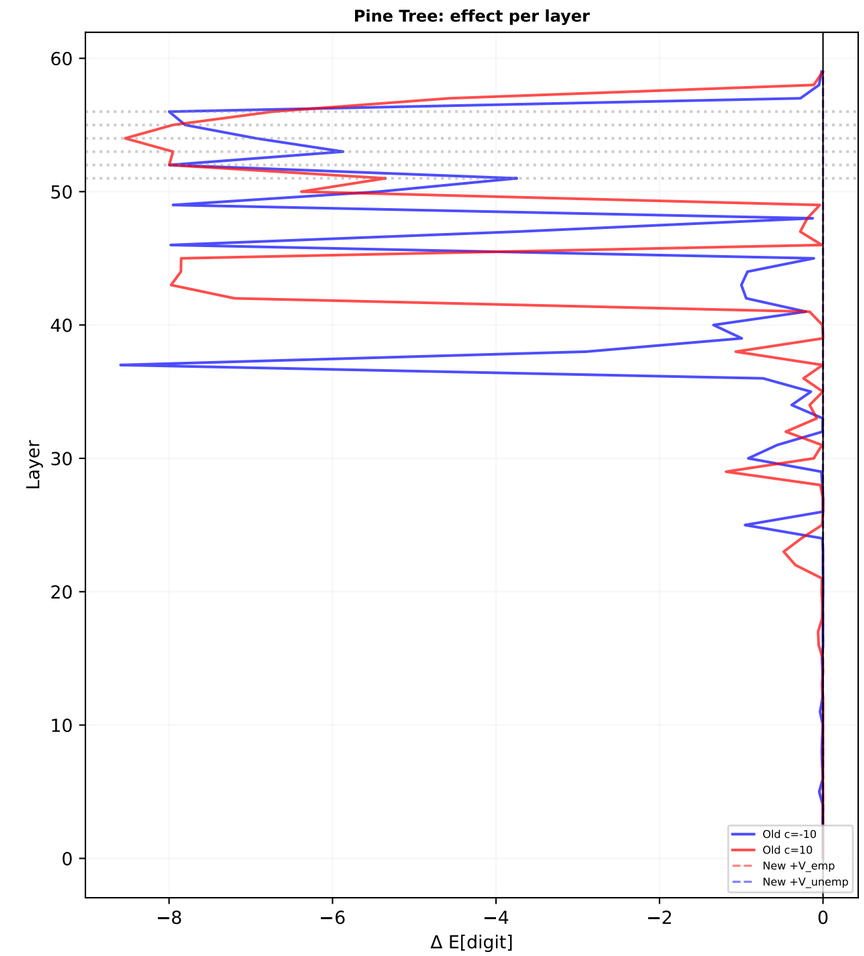


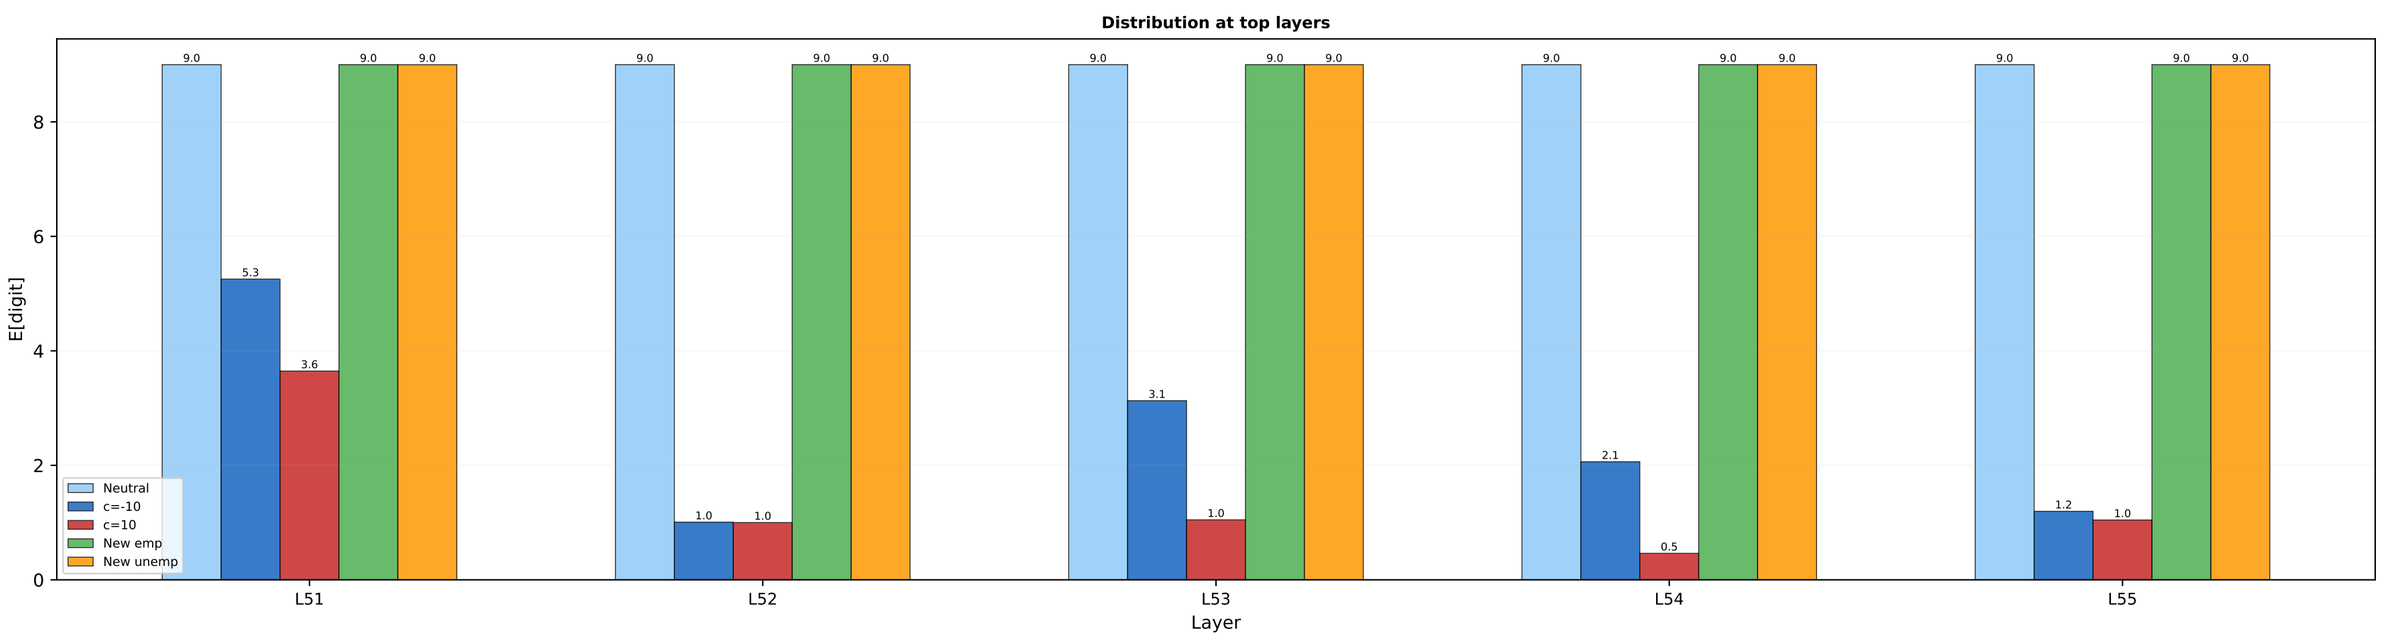


E5: Longest stretch outside (Tue) | V7/cfg2

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours a typical adult spends outside the home on a Tuesday? ___ |

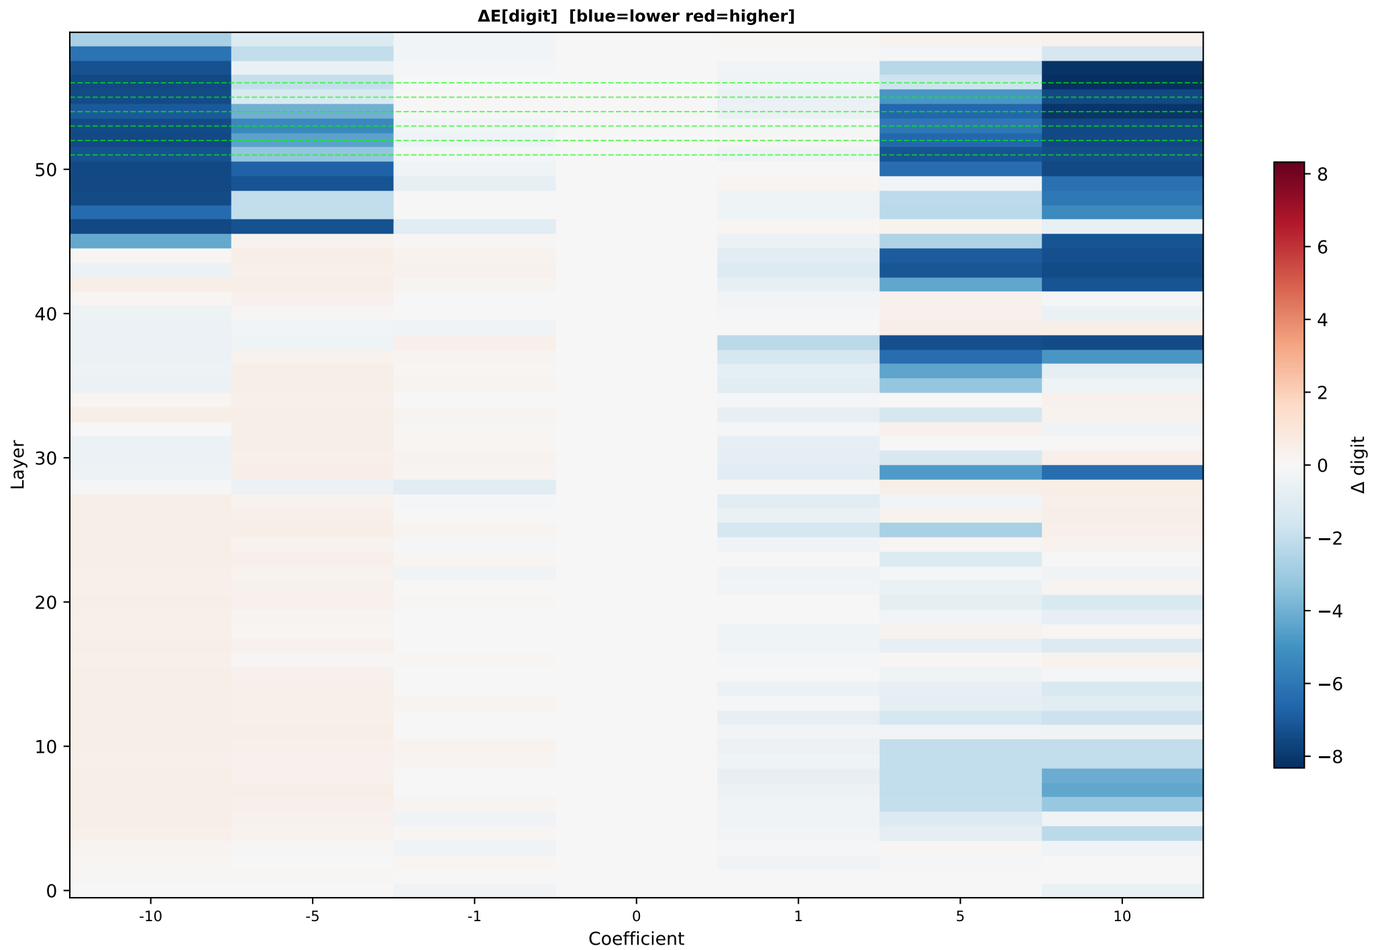


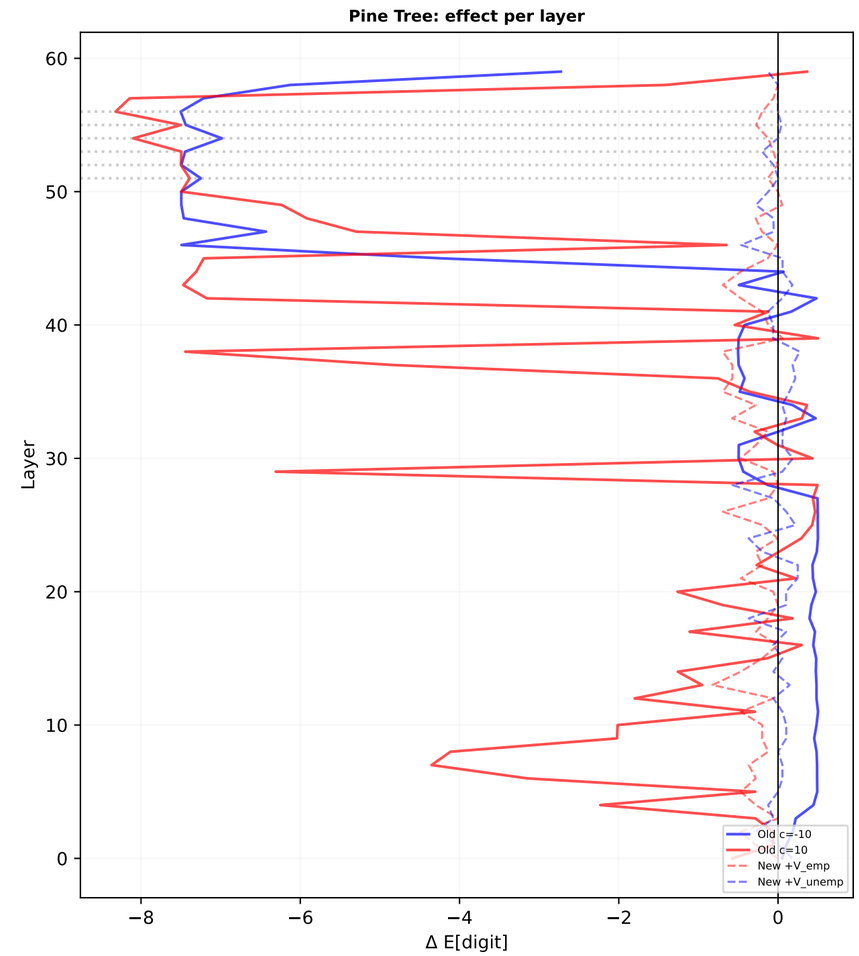


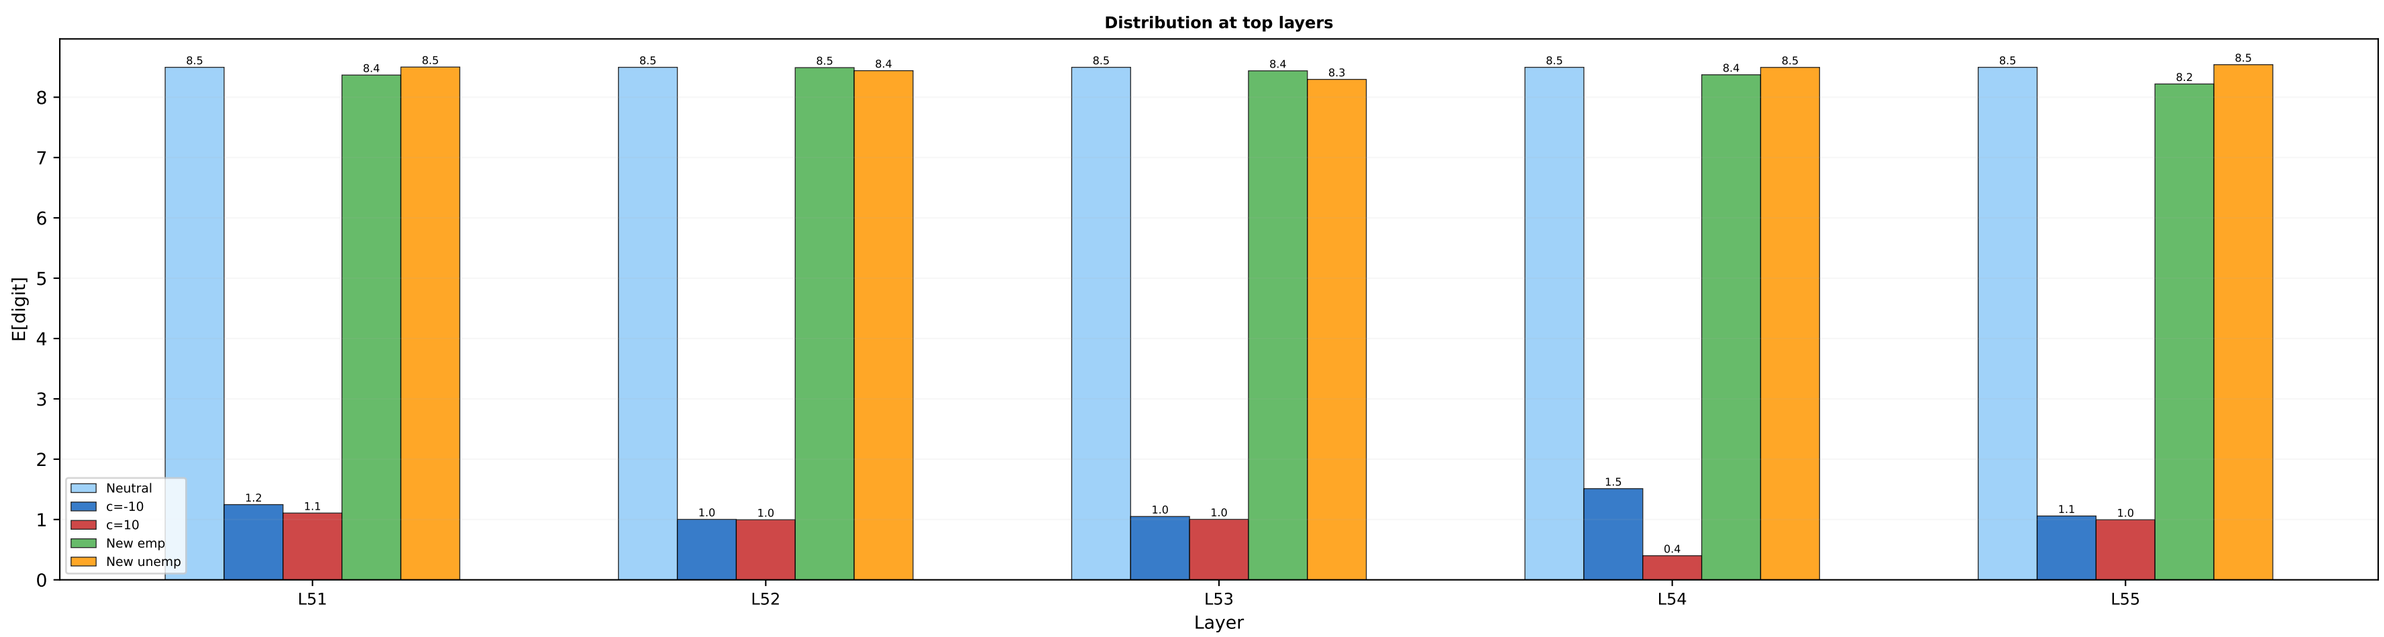


Answer with a single digit from 0 to 9. | How many total hours is a typical adult away from home on a Tuesday? ___ |

E6: Total hours away (Tue) | V7/cfg2

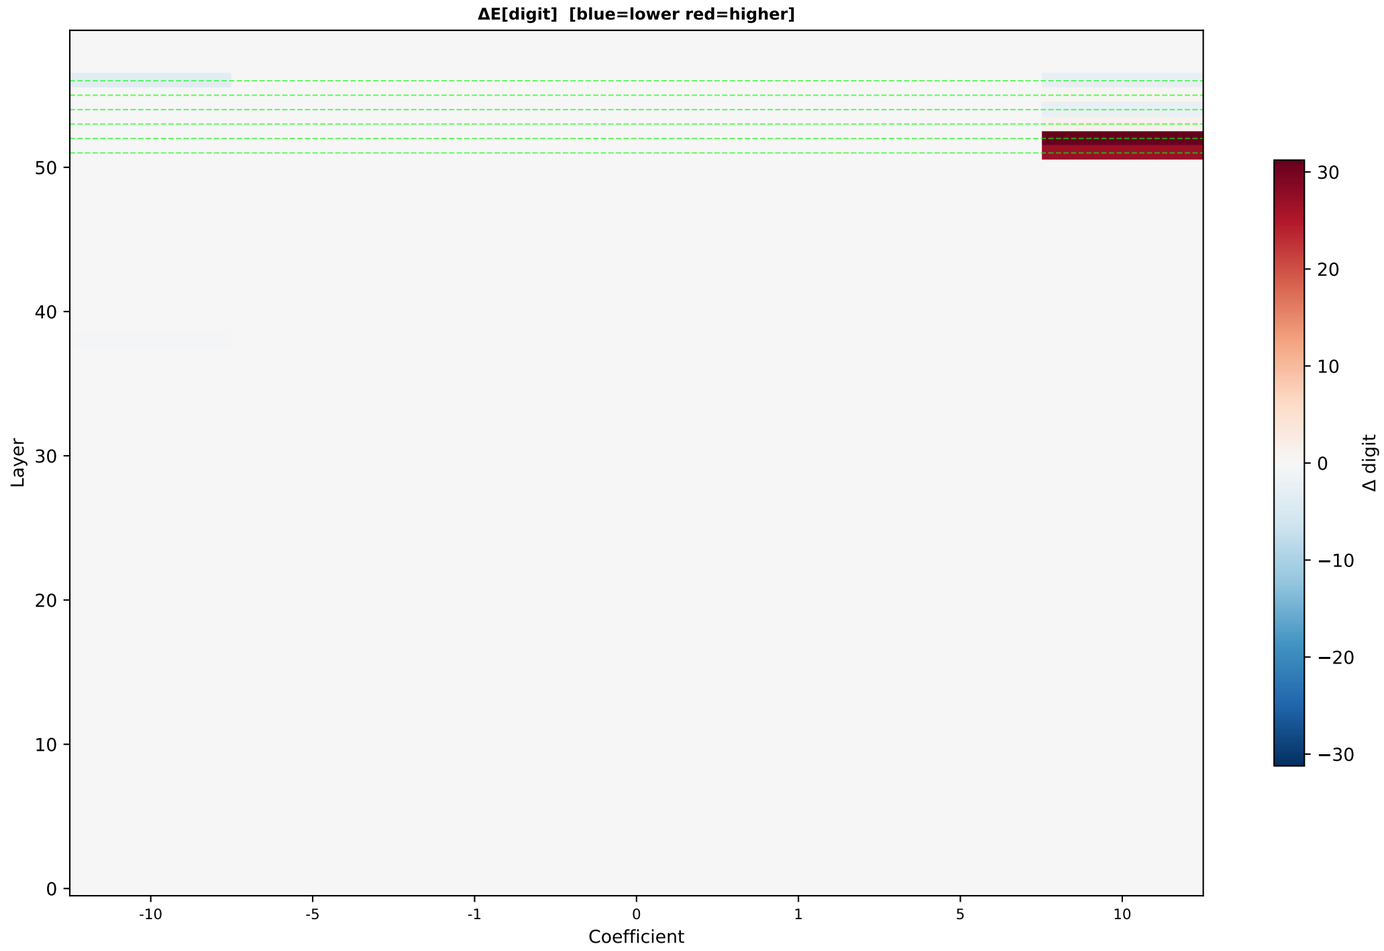


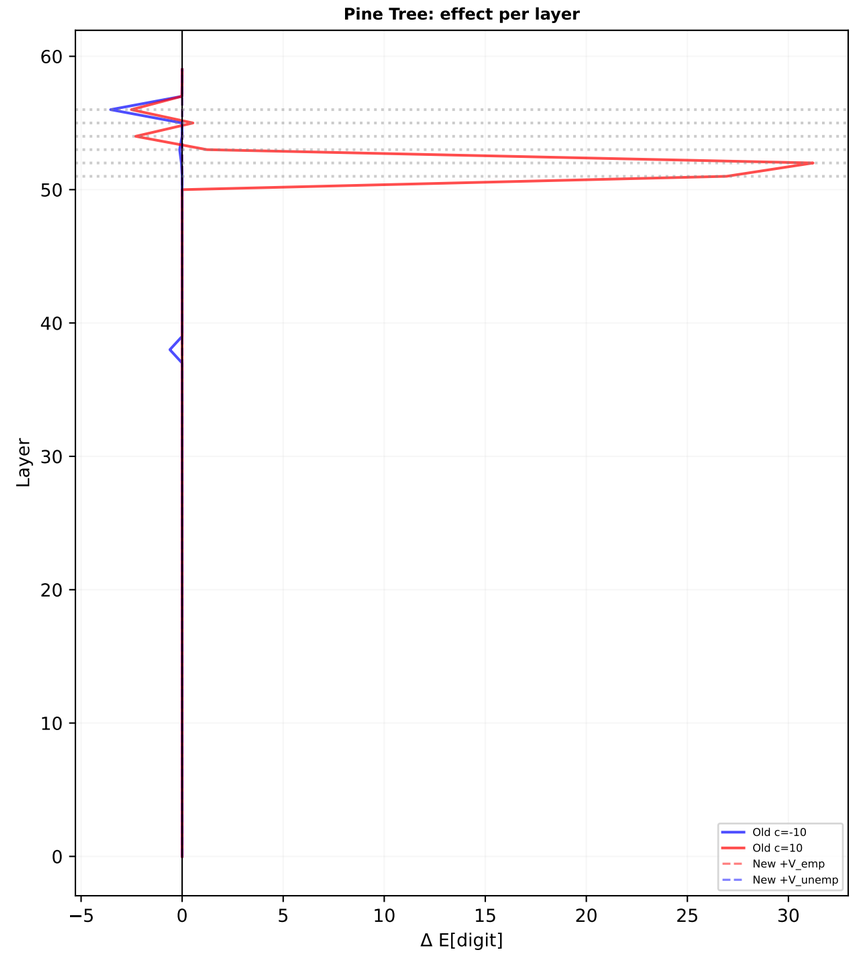


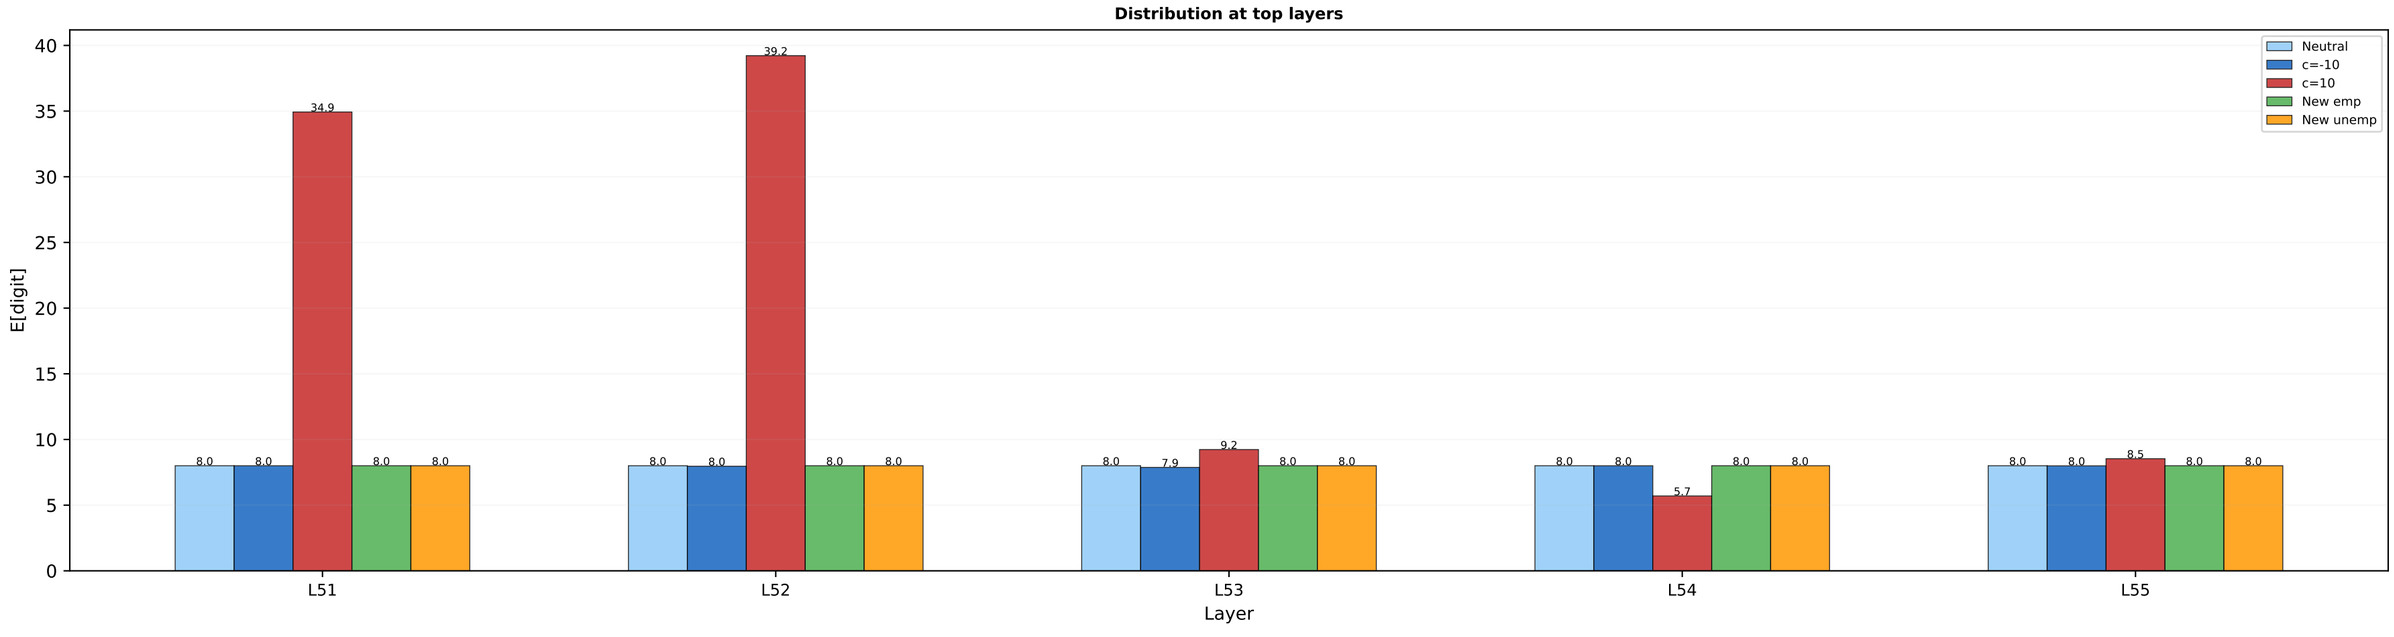


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at their most frequently visited non-home location on a Tuesday? ___ |

E7: Hours at primary non-home location (Tue) | V7/cfg2

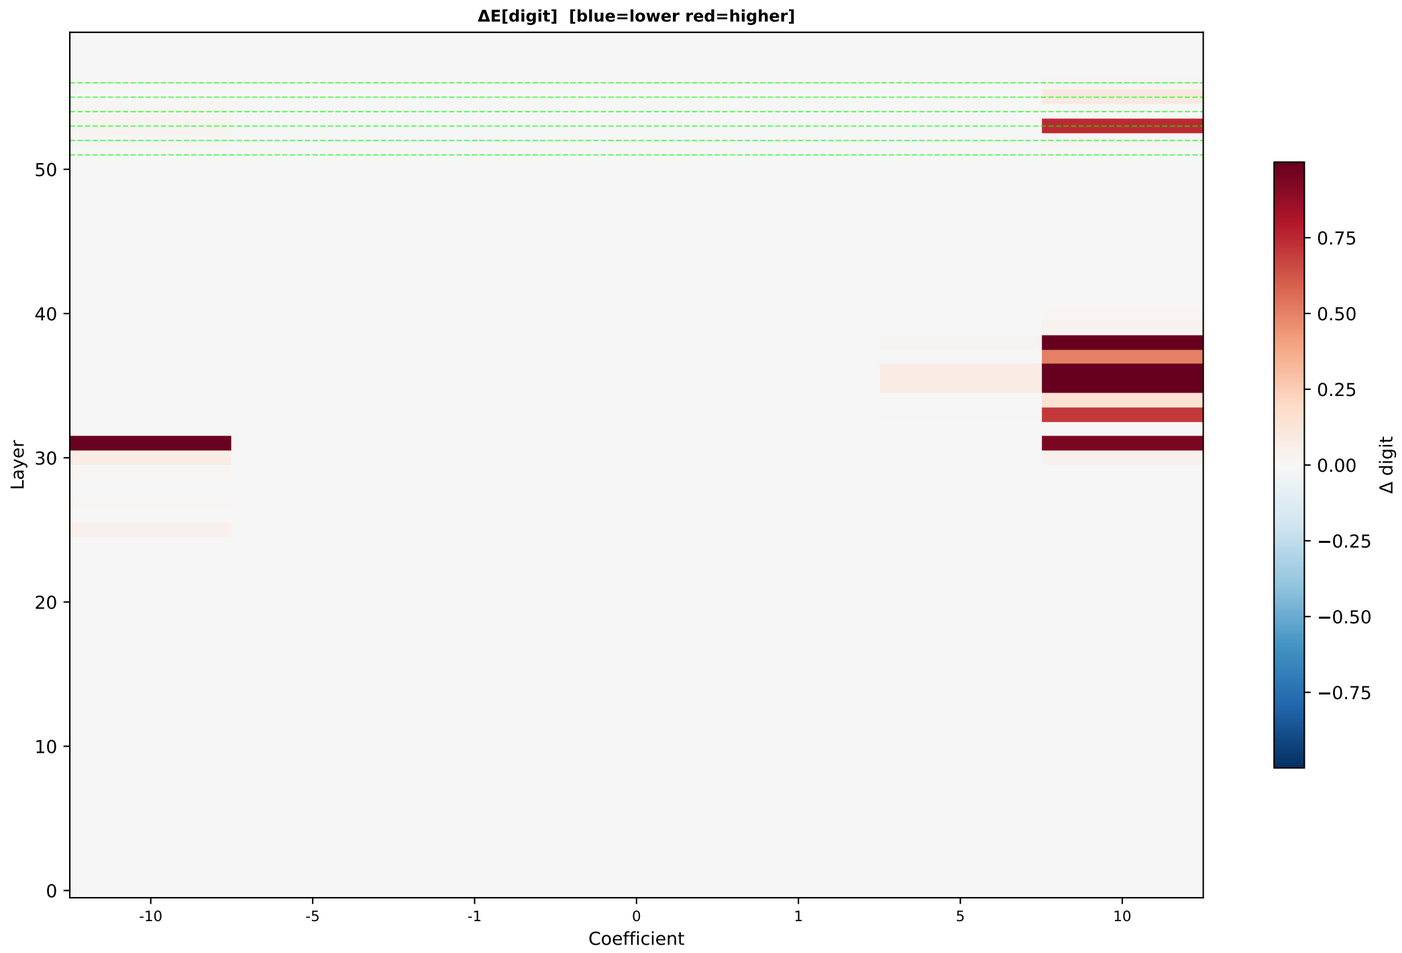


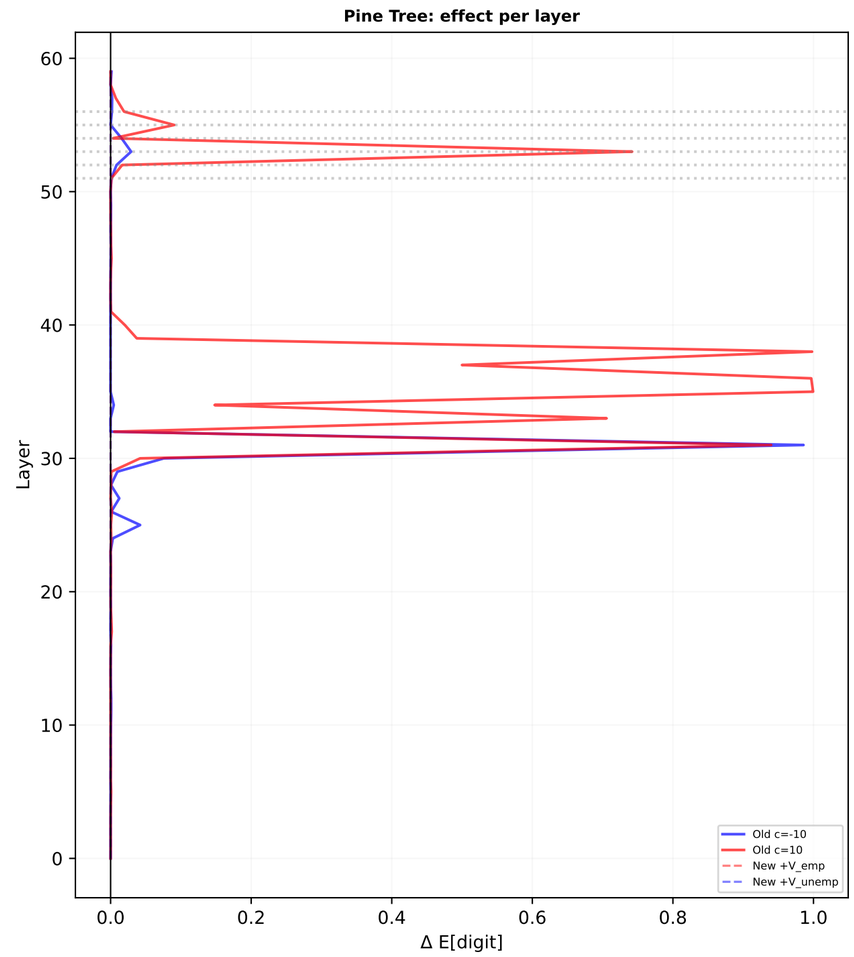


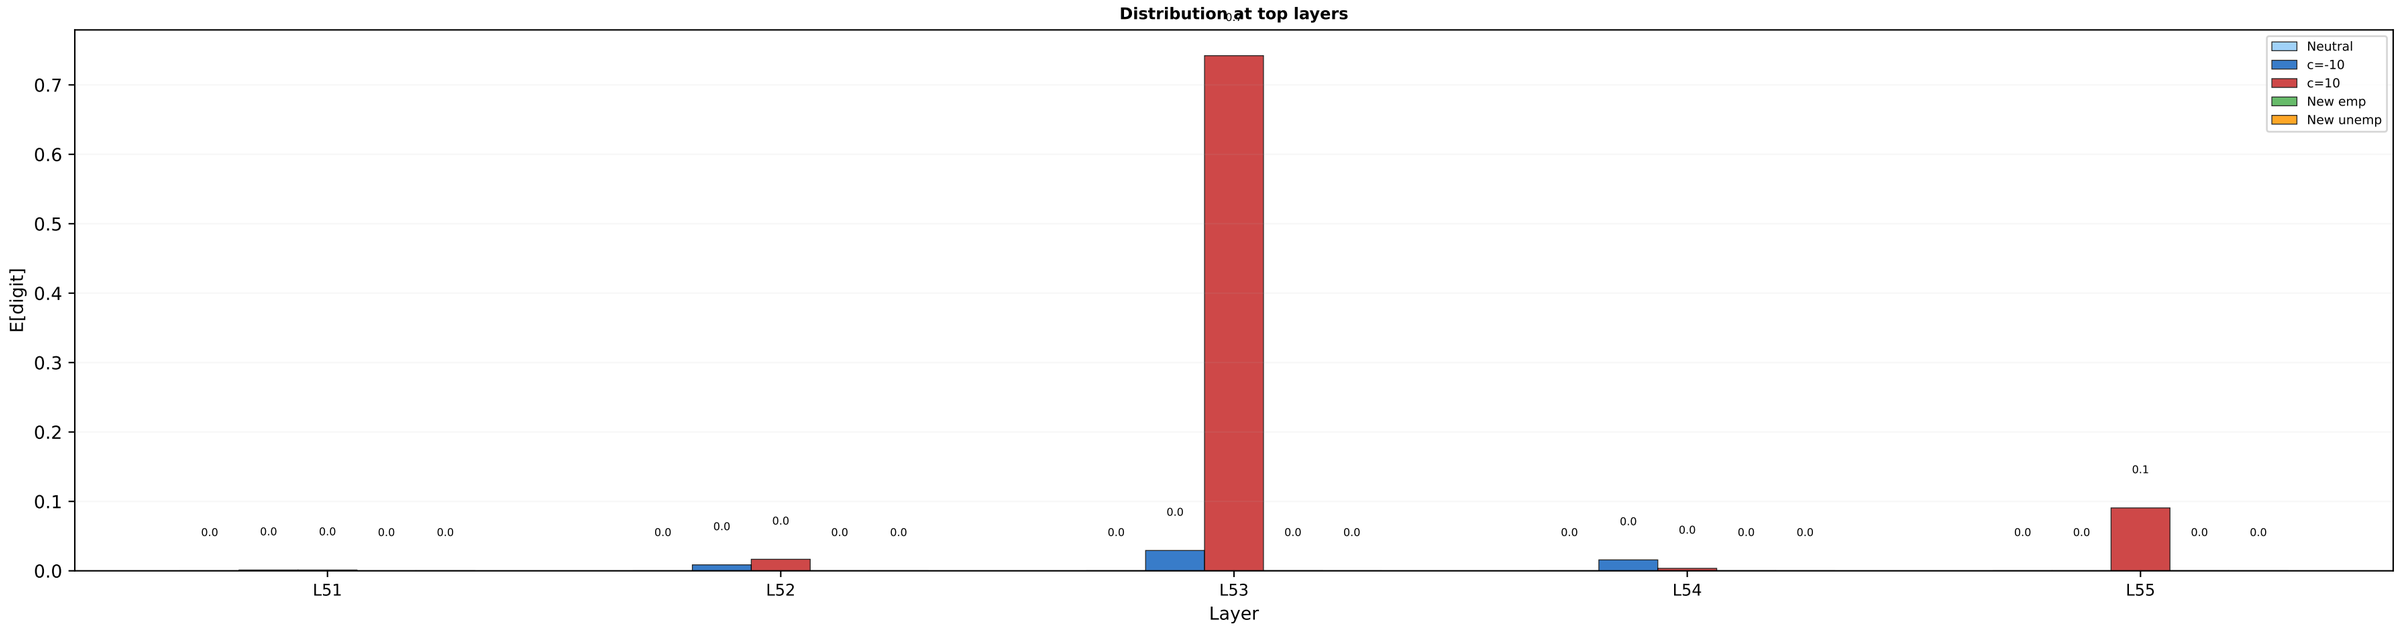


Answer with a single digit from 0 to 9. | How many times does a typical adult return home during the daytime (8 AM to 6 PM) on a Tuesday? ___ |

E8: Daytime home returns (Tue) | V7/cfg2

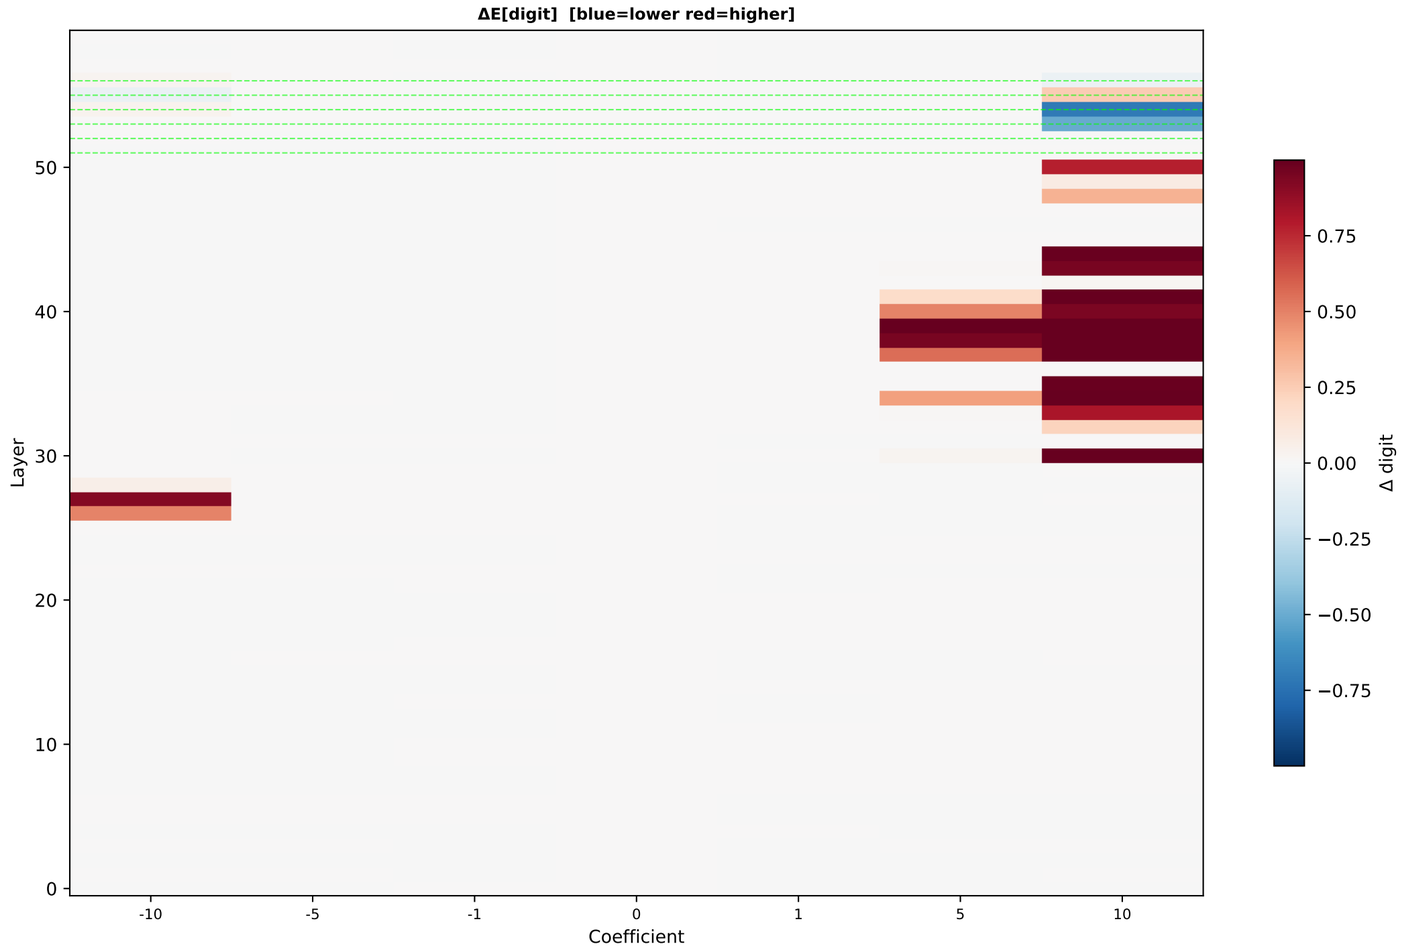


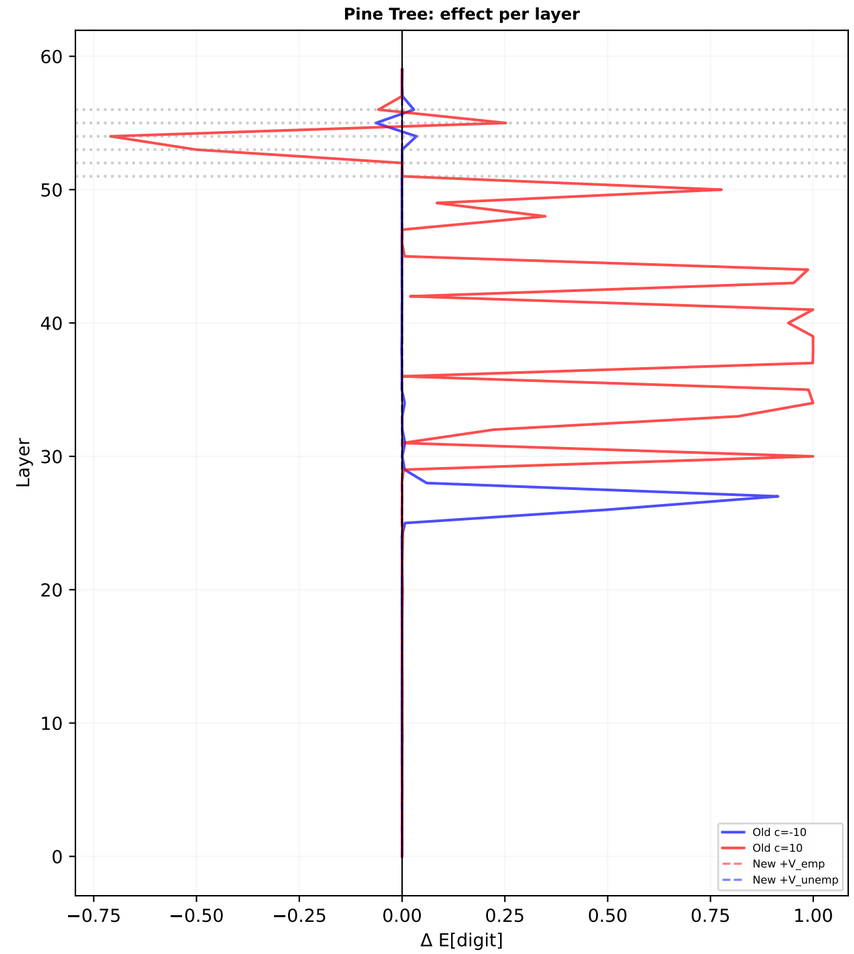


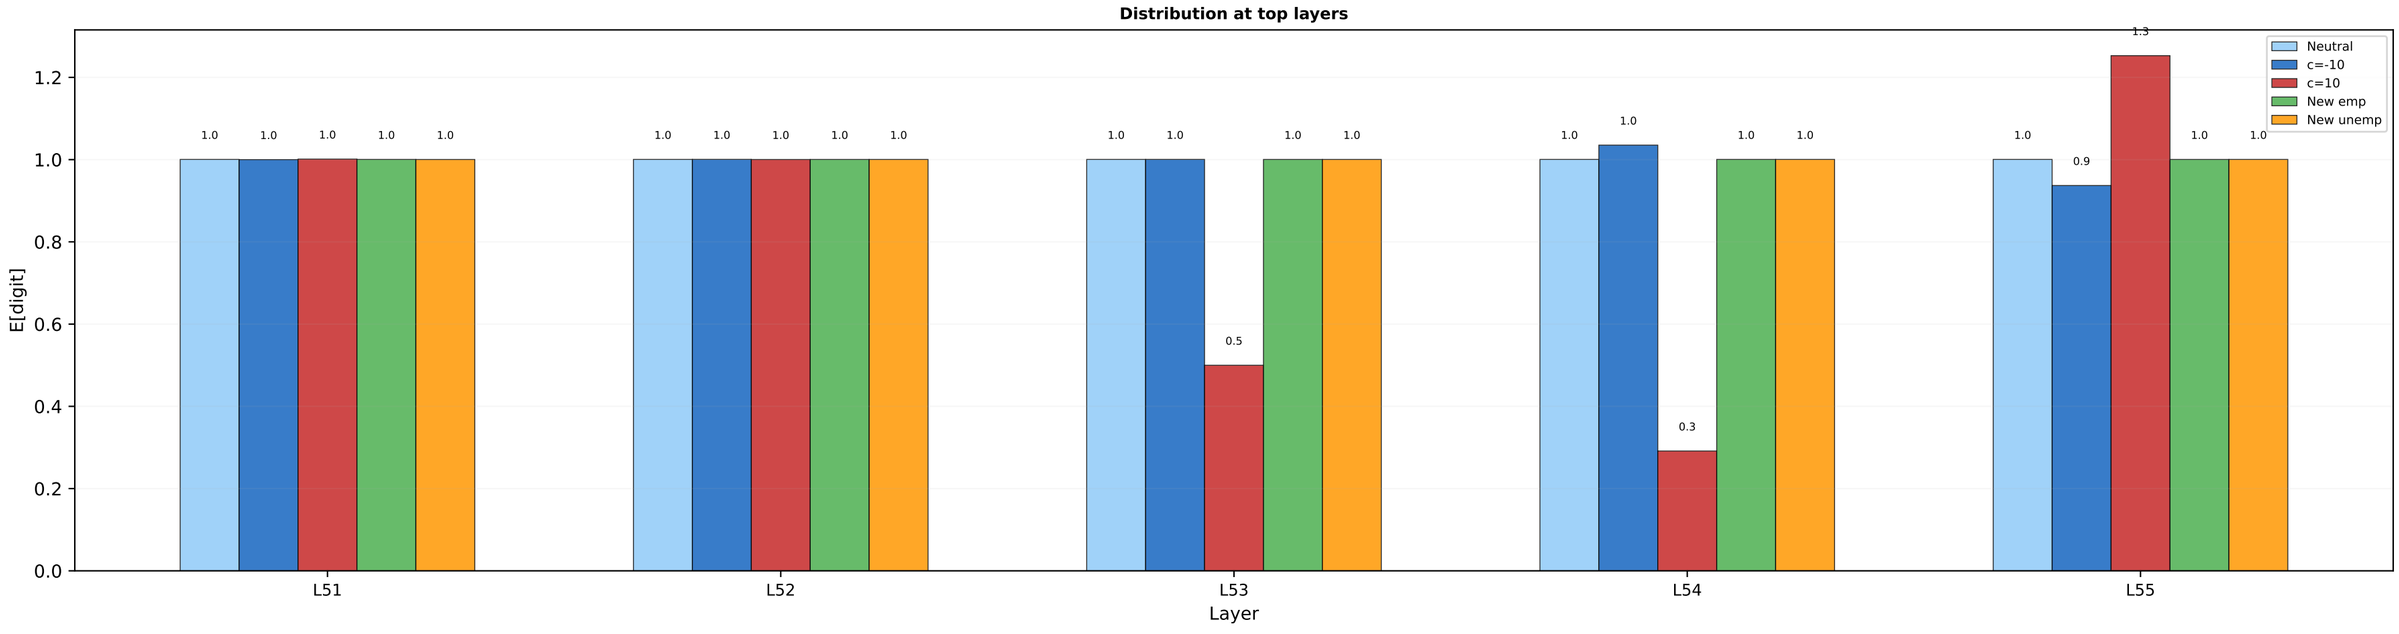


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend commuting or in transit on a Tuesday? ___ |

E9: Commute/transit hours (Tue) | V7/cfg2

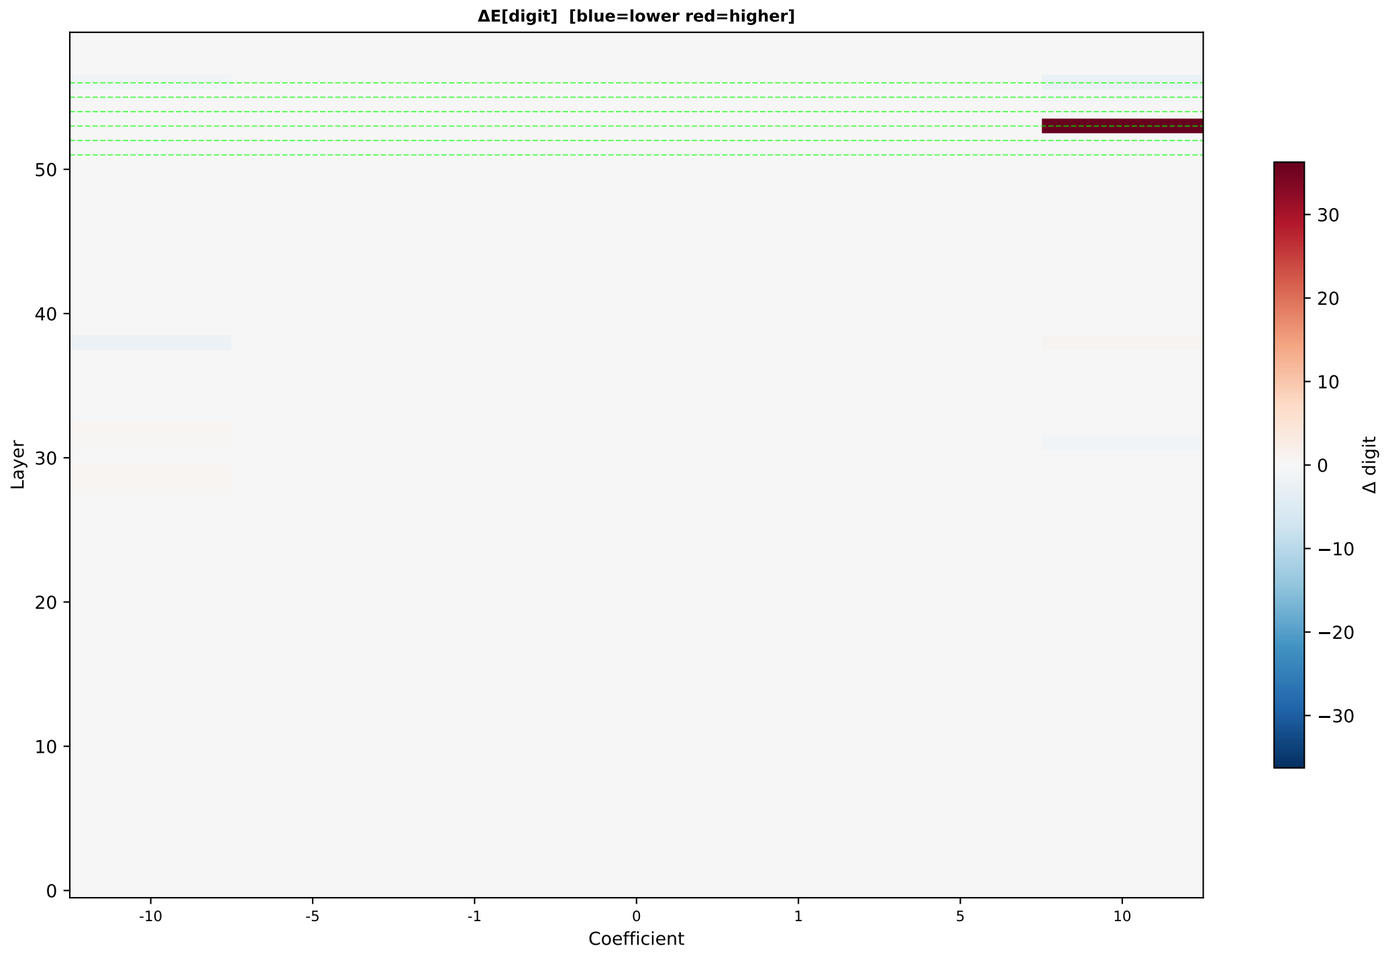


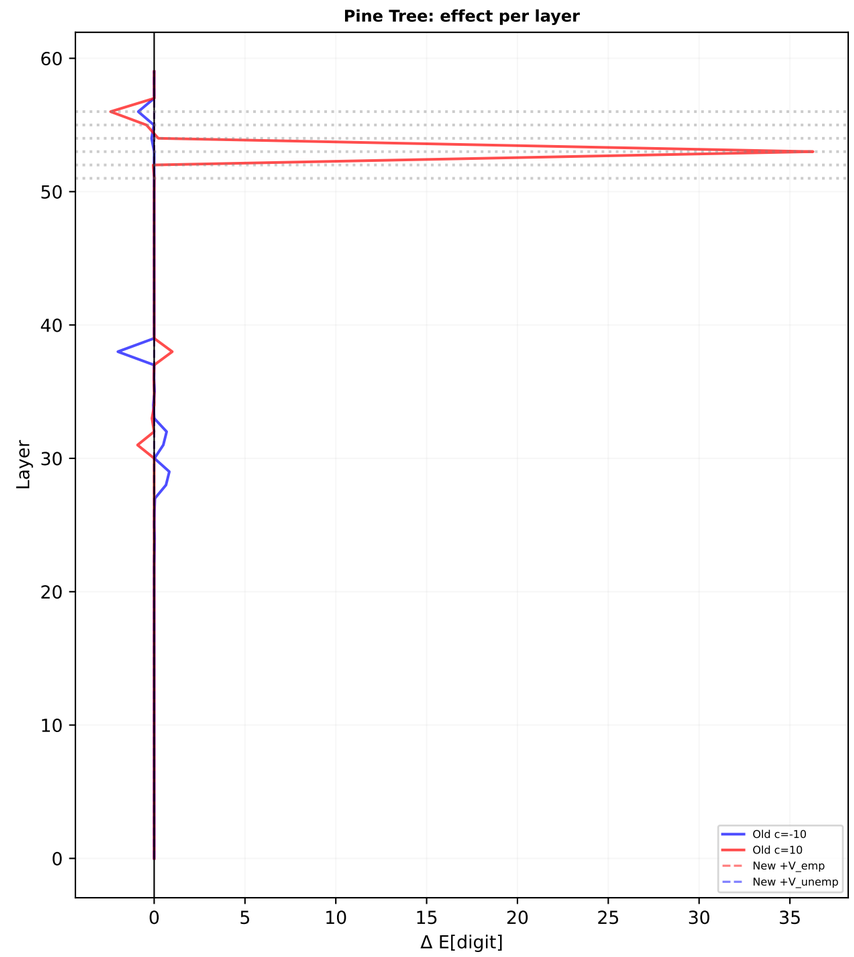


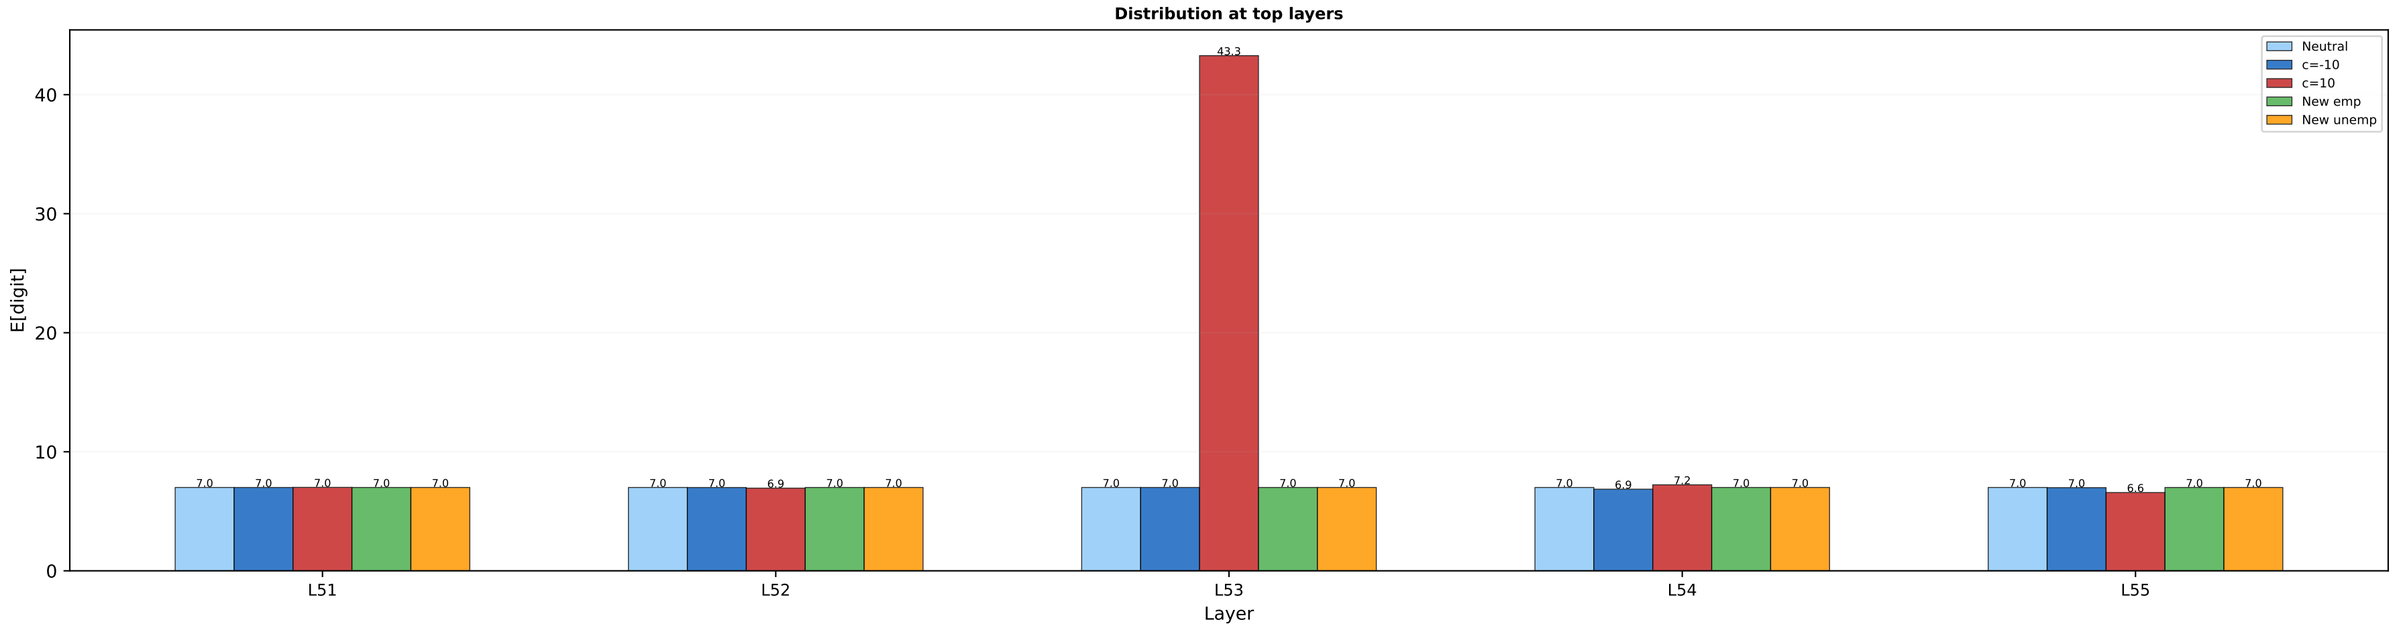


Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is a typical adult's Tuesday schedule from week to week? (0 = completely different, 9 = identical every week) ___ |

E10: Week-to-week consistency (Tue) | V7/cfg2

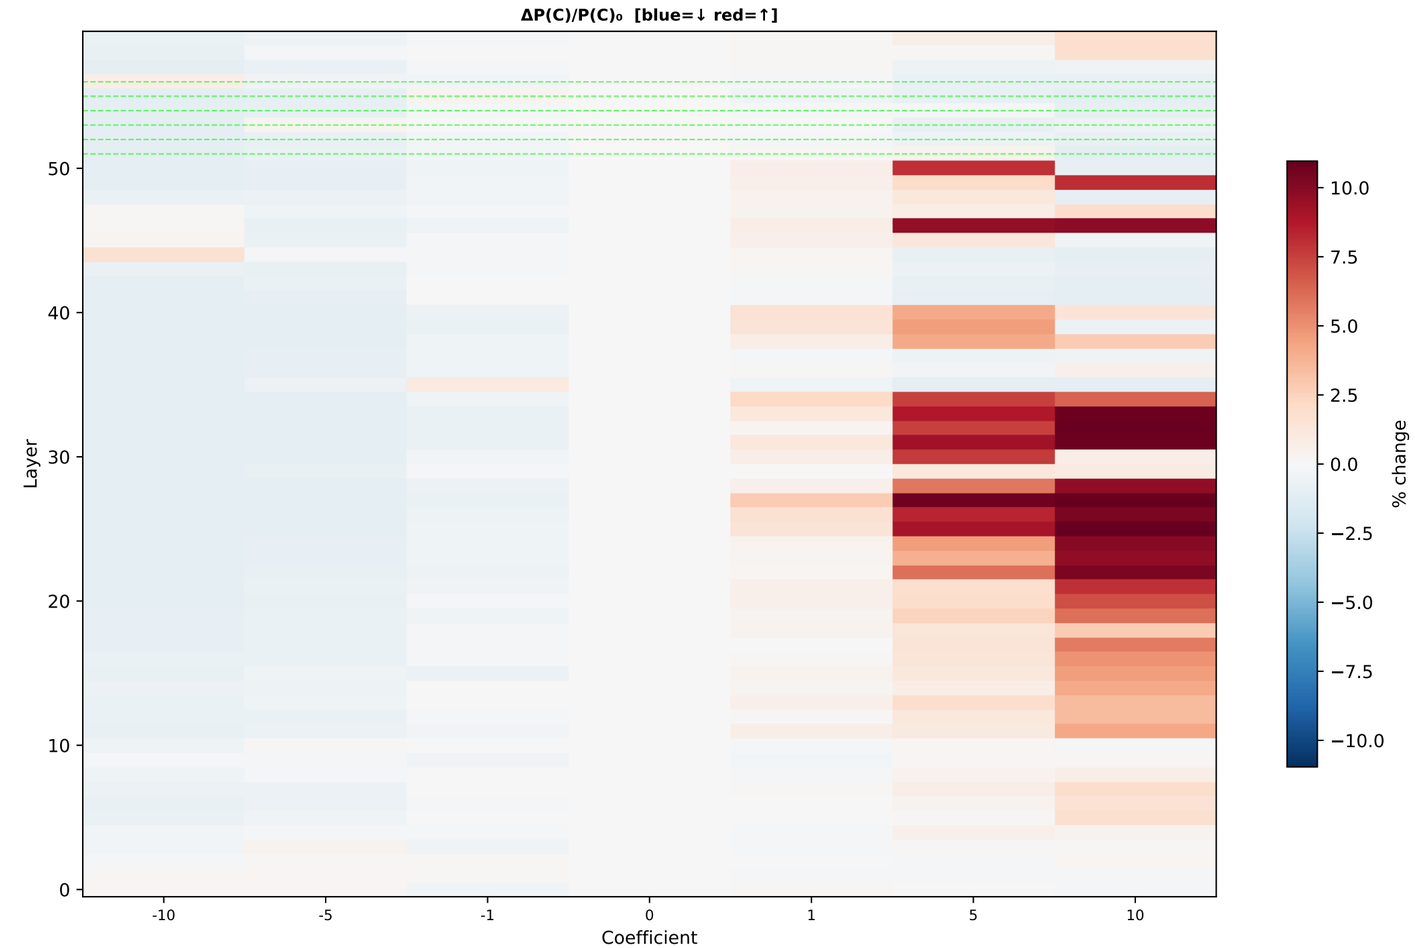


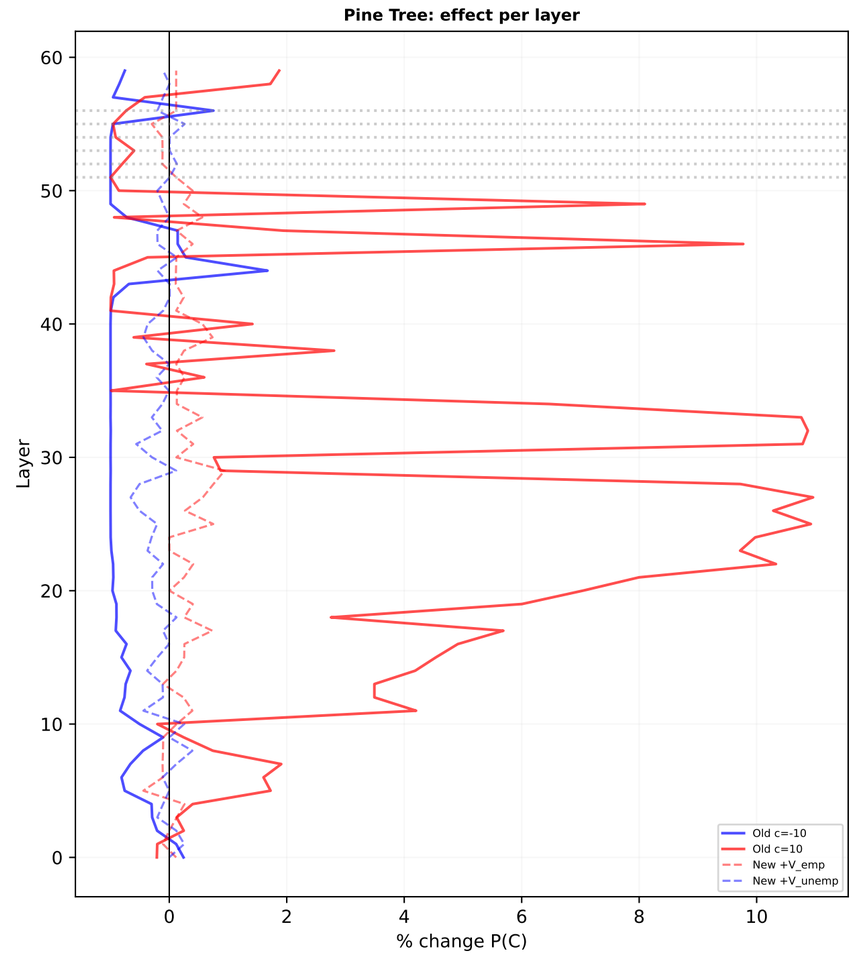


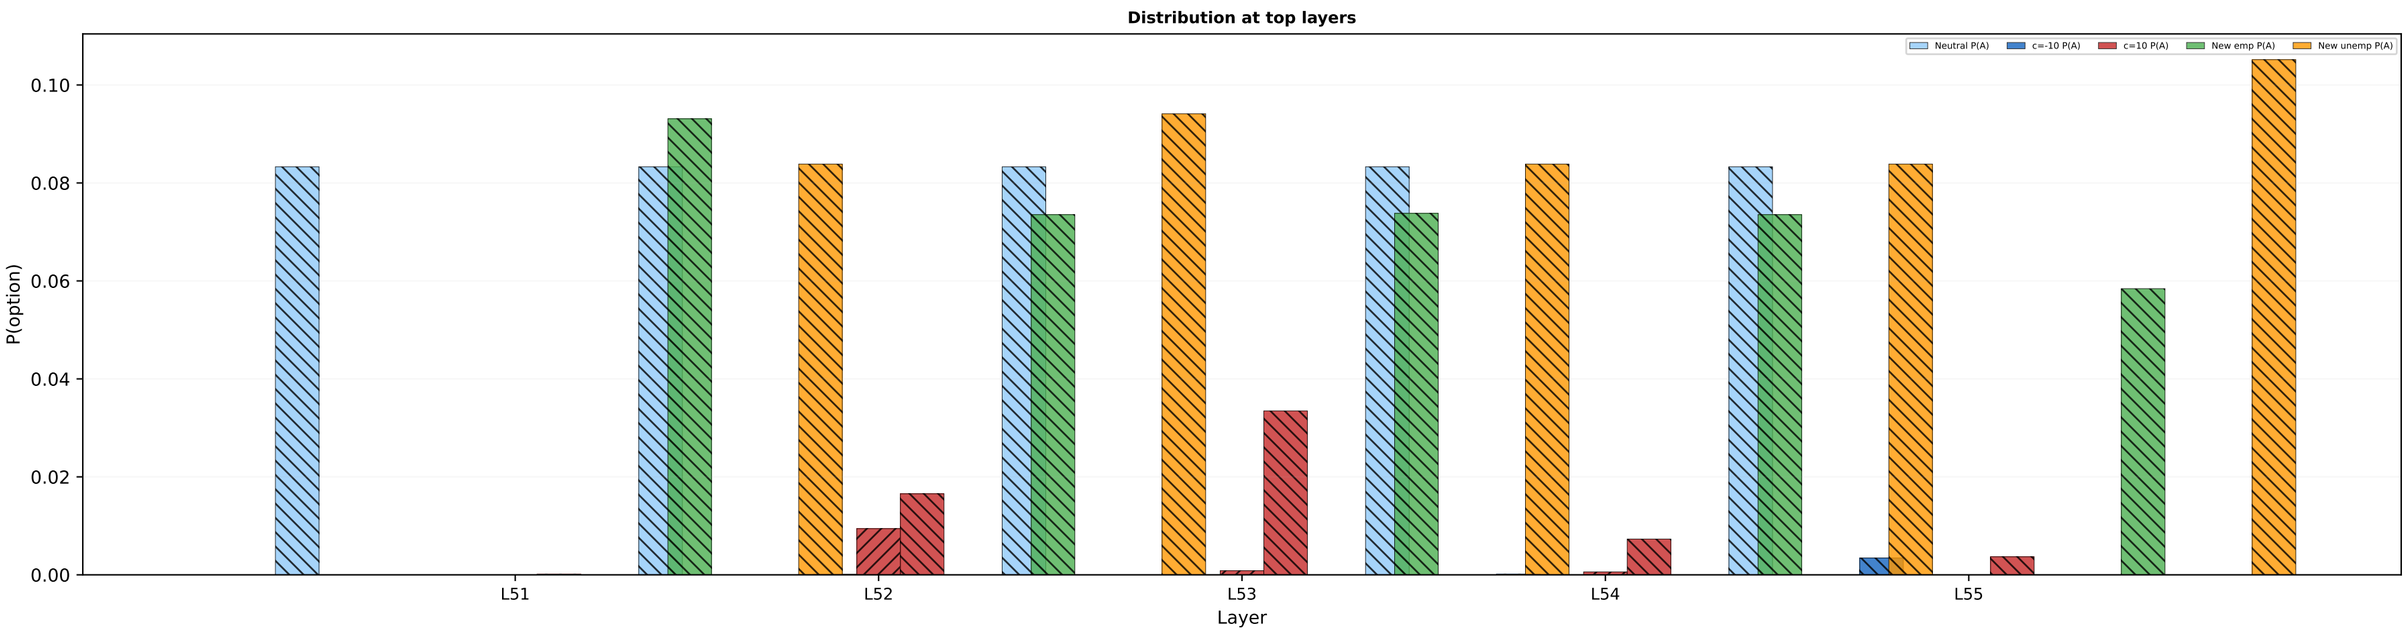


E11: 8 AM Tuesday status | V7/cfg2

At 8:00 AM on a Tuesday, a typical adult is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

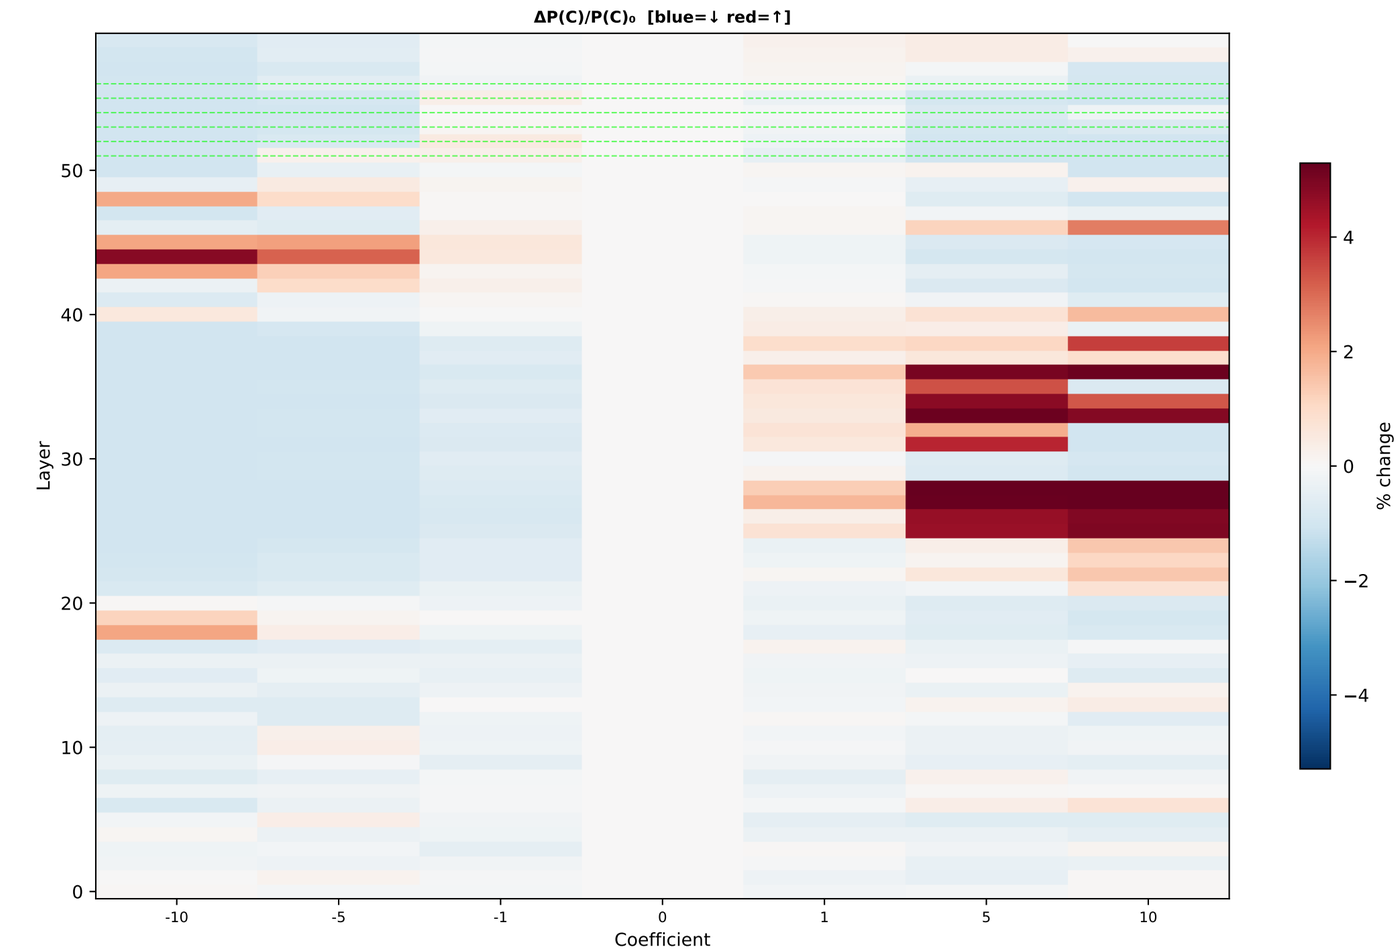


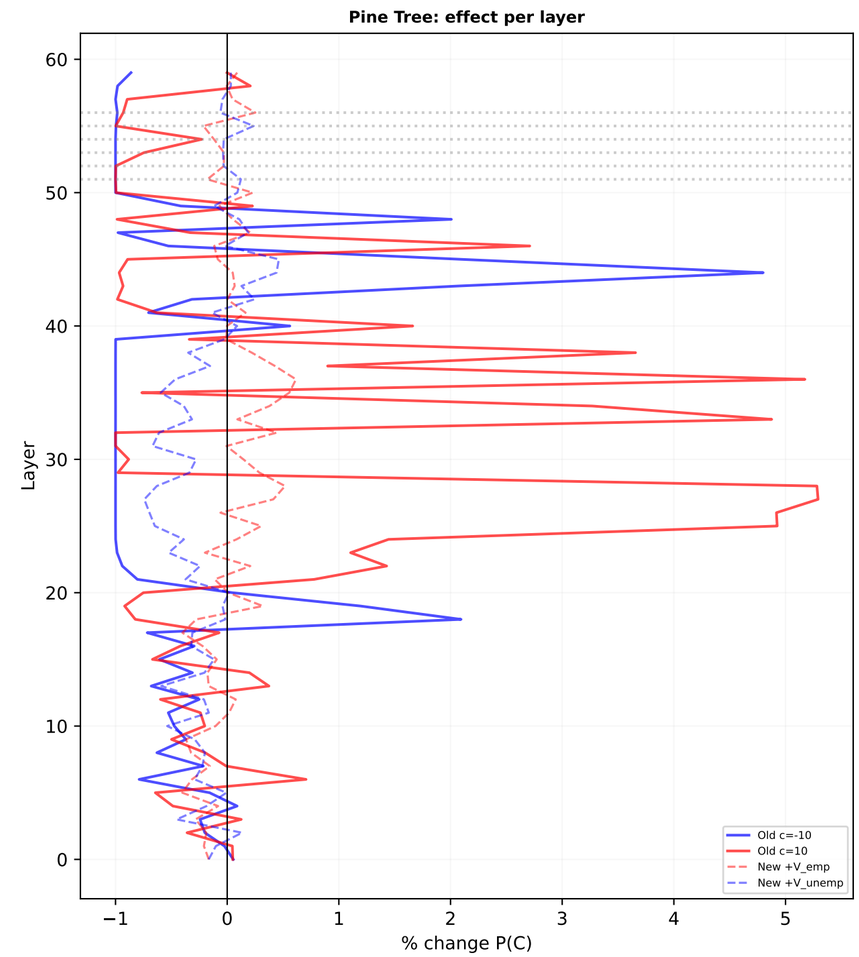


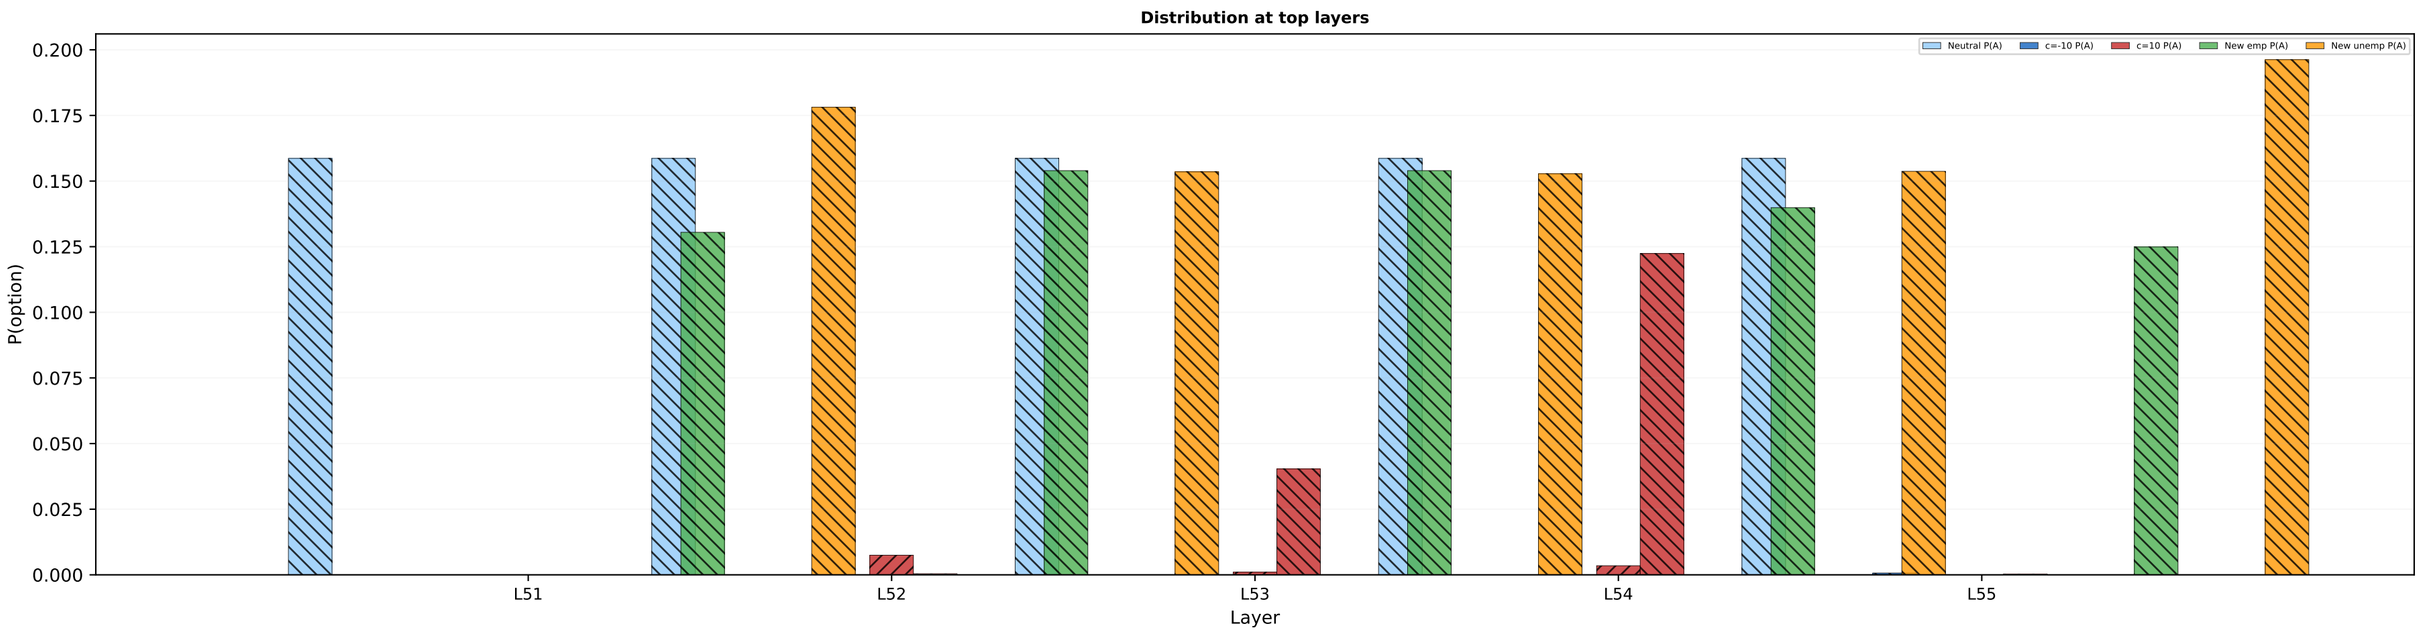


E12: 10:30 AM coffee availability | V7/cfg2

A typical adult is asked: "Are you usually free to meet for coffee at 10:30 AM on a Tuesday?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends on the week; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

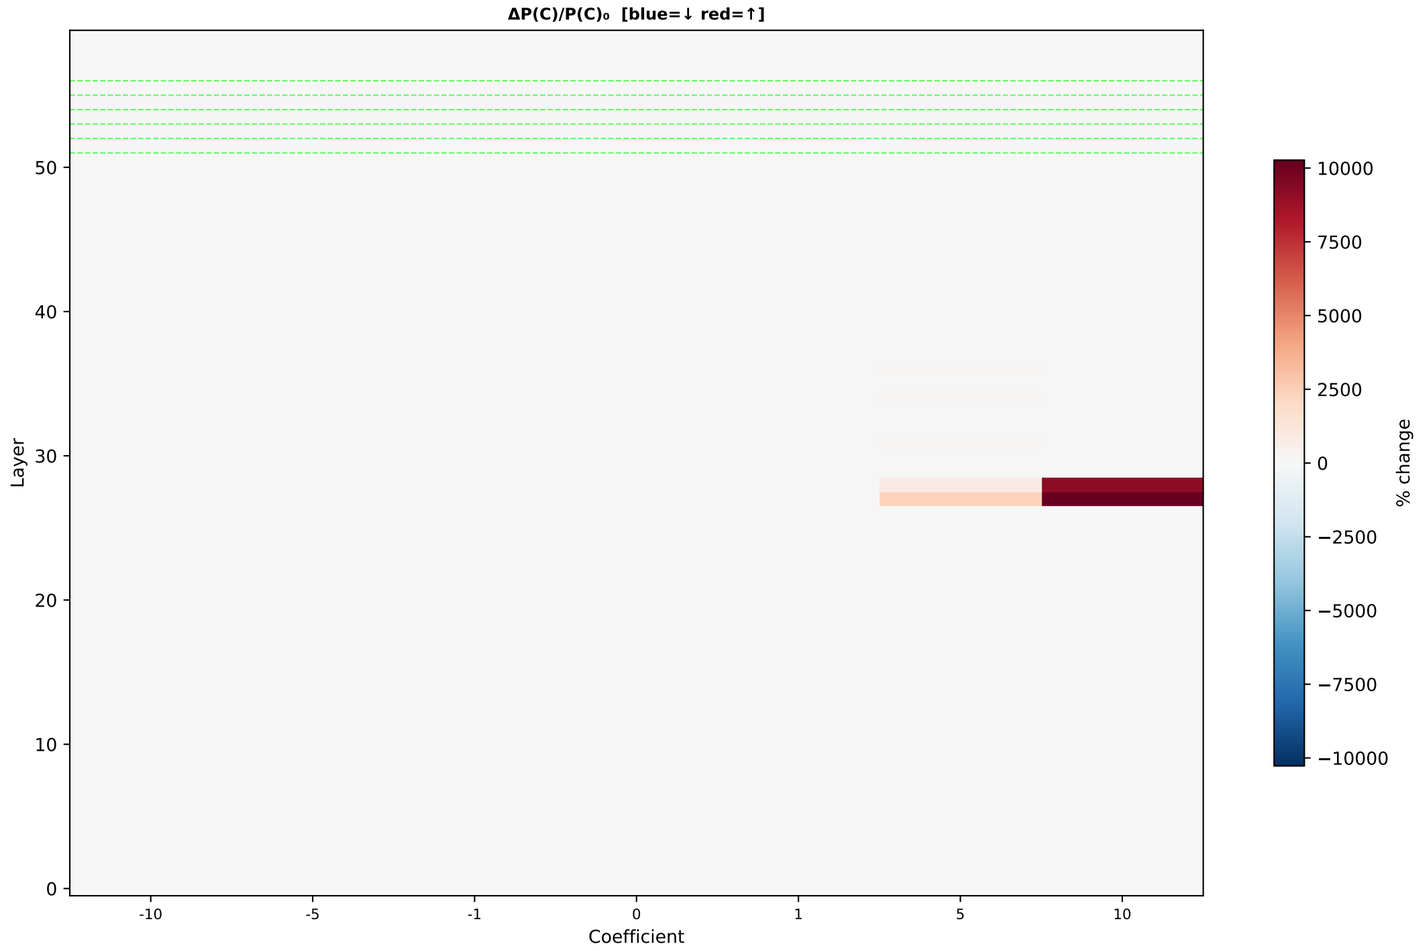


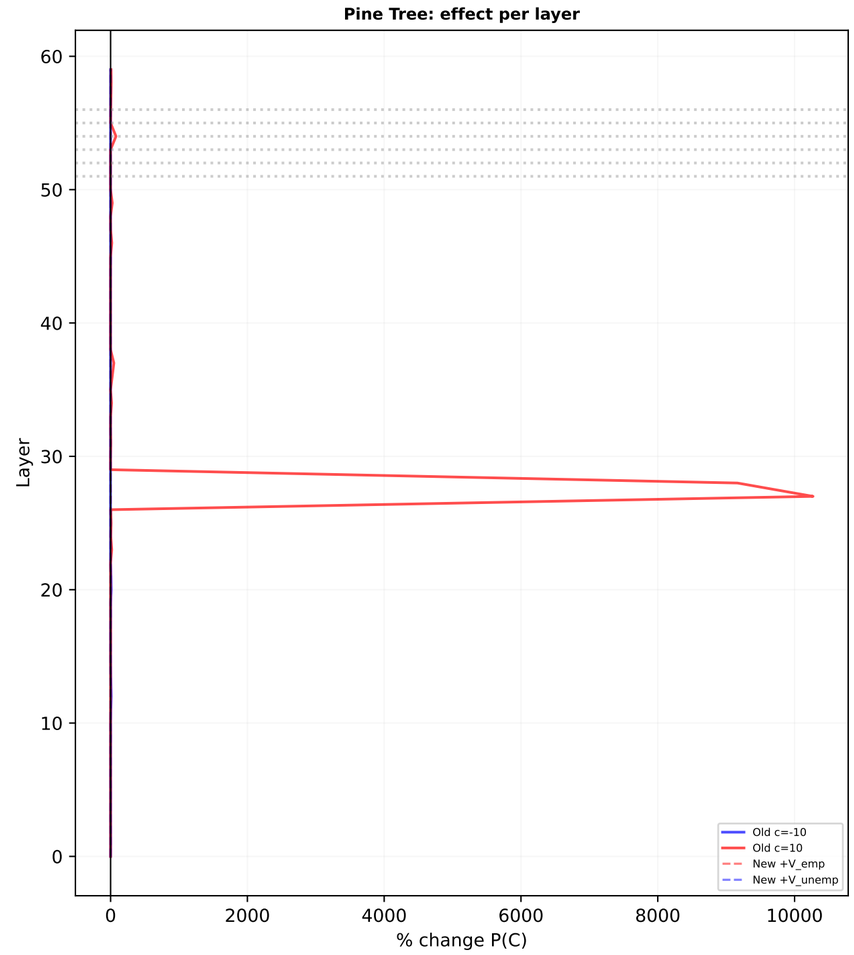


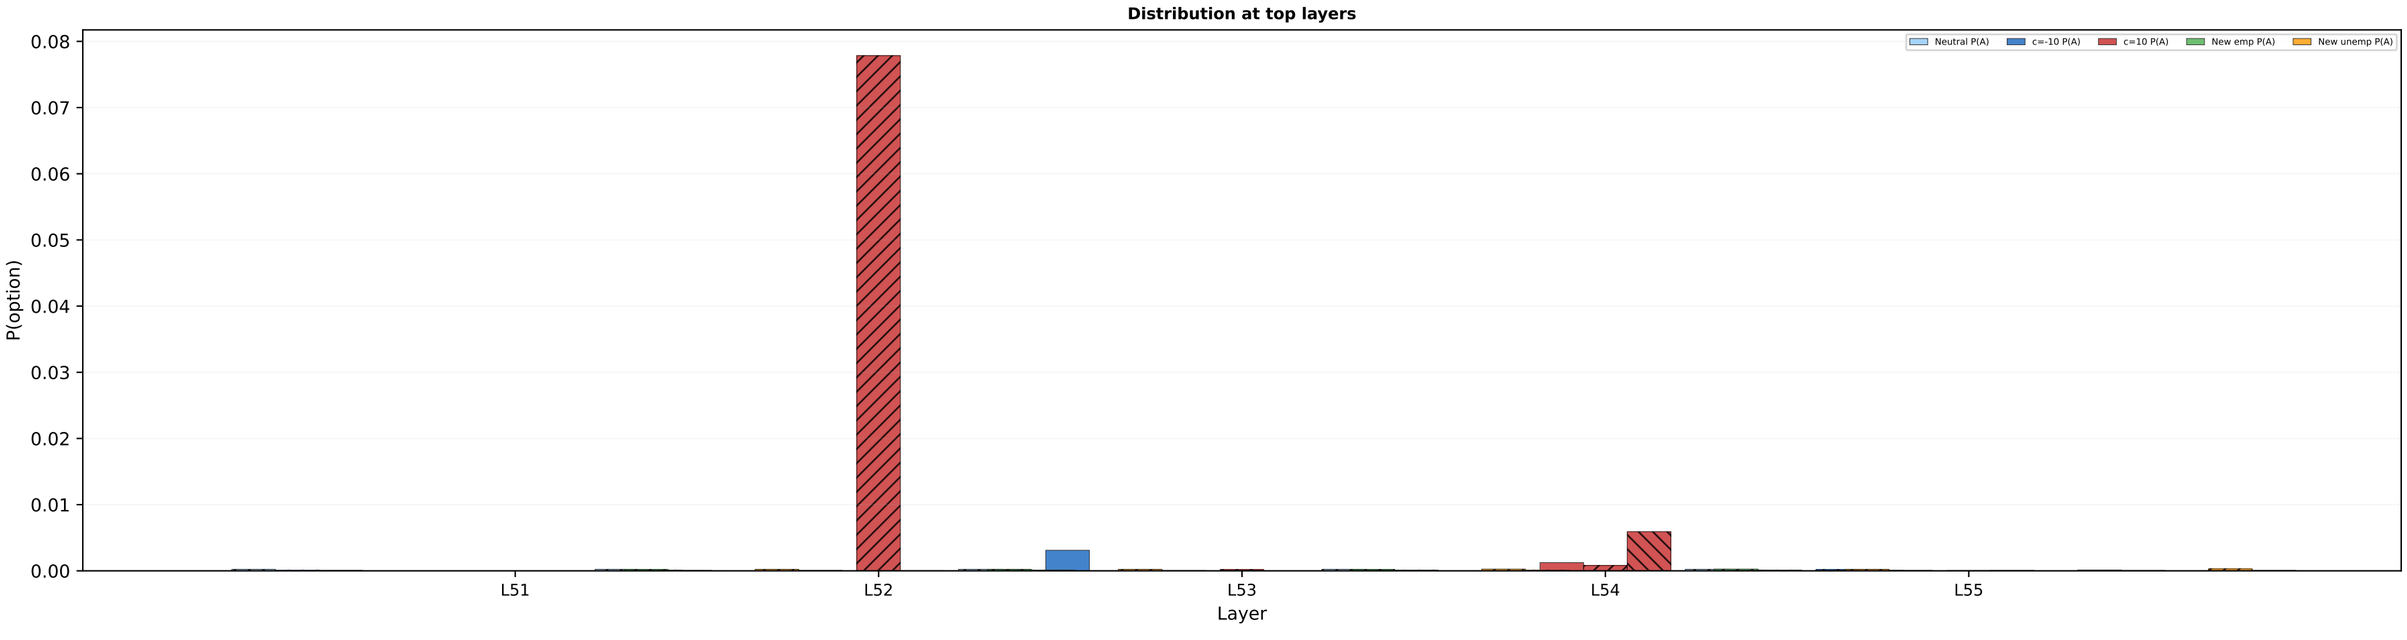


E13: Noon Tuesday availability | V7/cfg2

A typical adult is asked: "Can you meet me for lunch at noon on a Tuesday?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

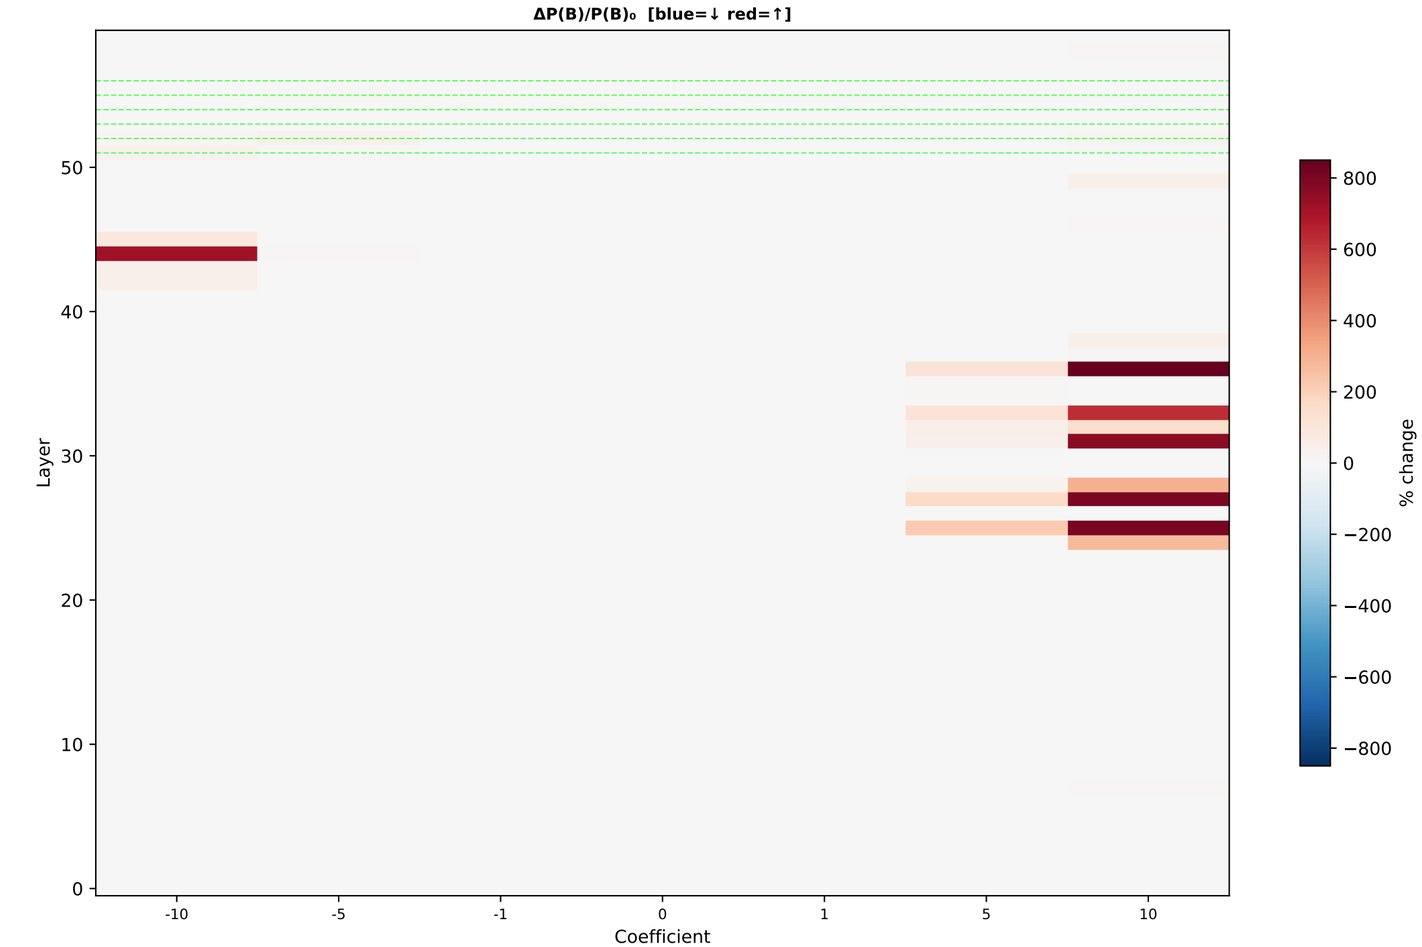


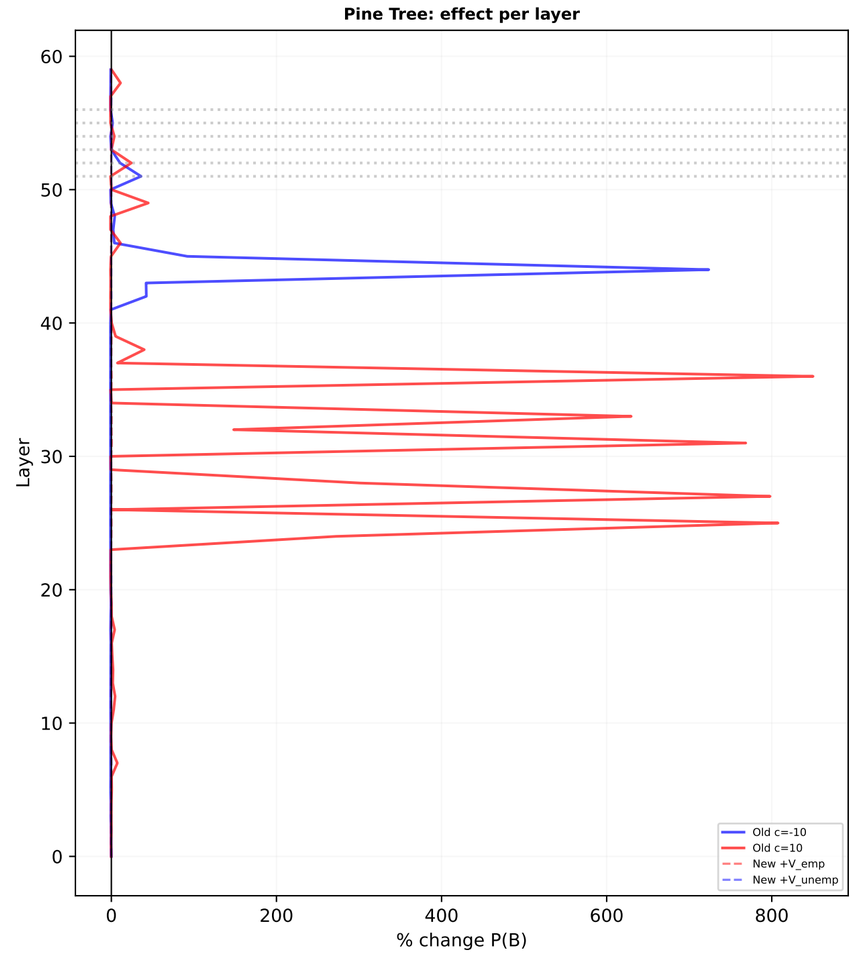


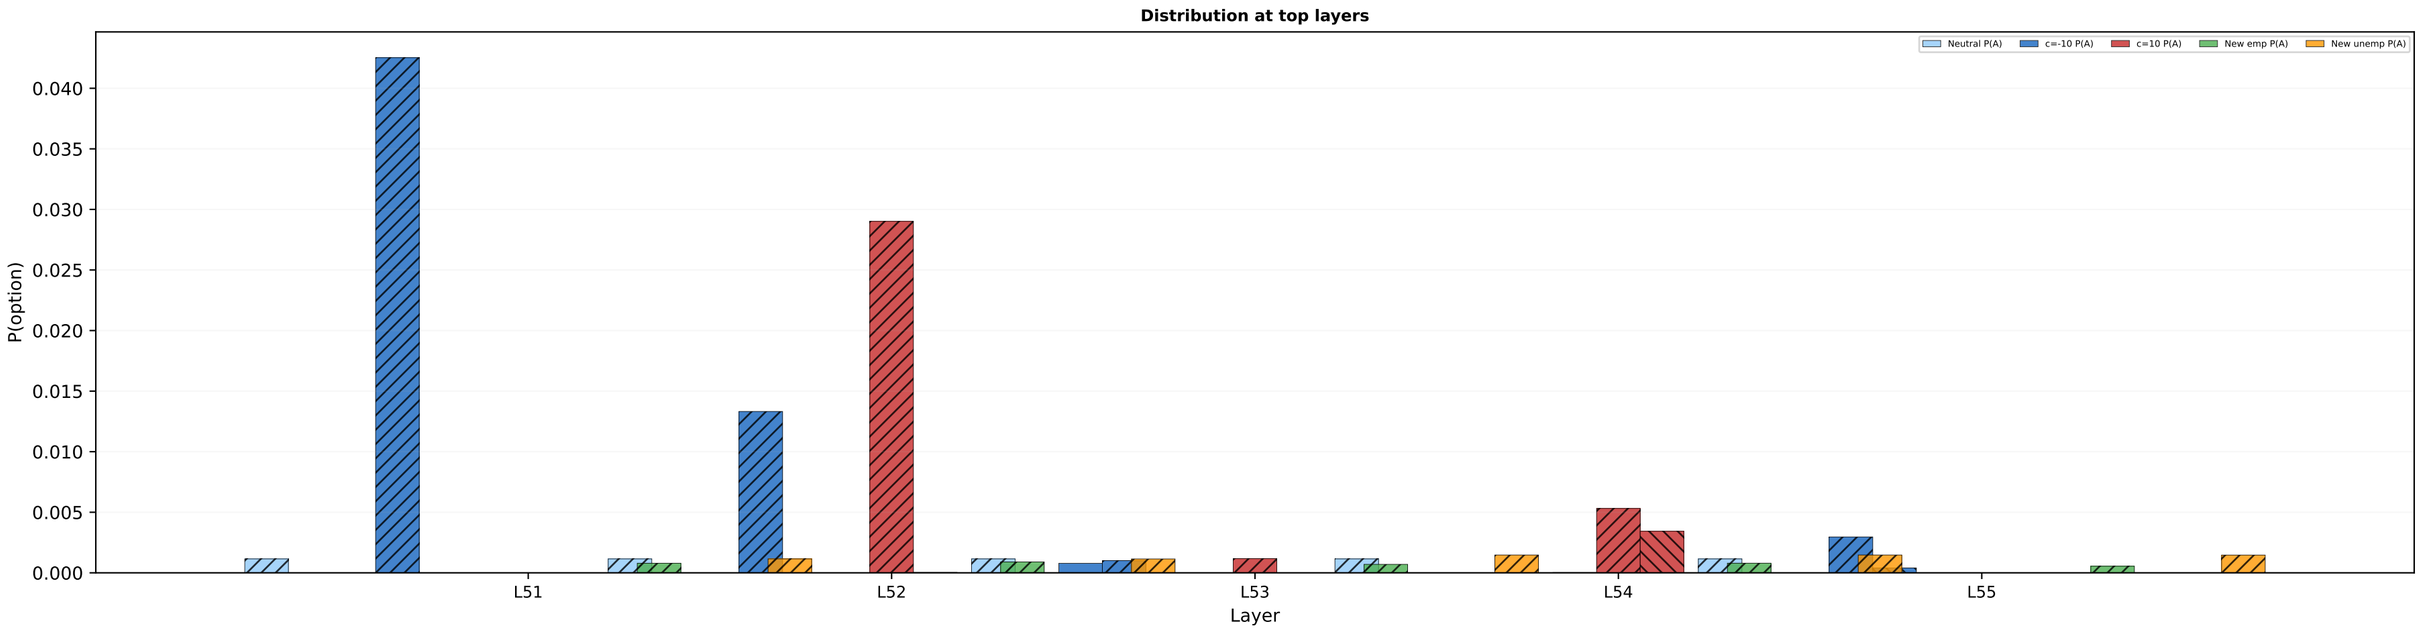


E14: 1 PM Tuesday availability | V7/cfg2

If you wanted to visit a typical adult at 1 PM on a Tuesday, which reply would be most likely? | (A) "I am usually at home around then." | (B) "I am usually at a regular daytime commitment then." | (C) "It varies; I might be in different places." | Answer: (

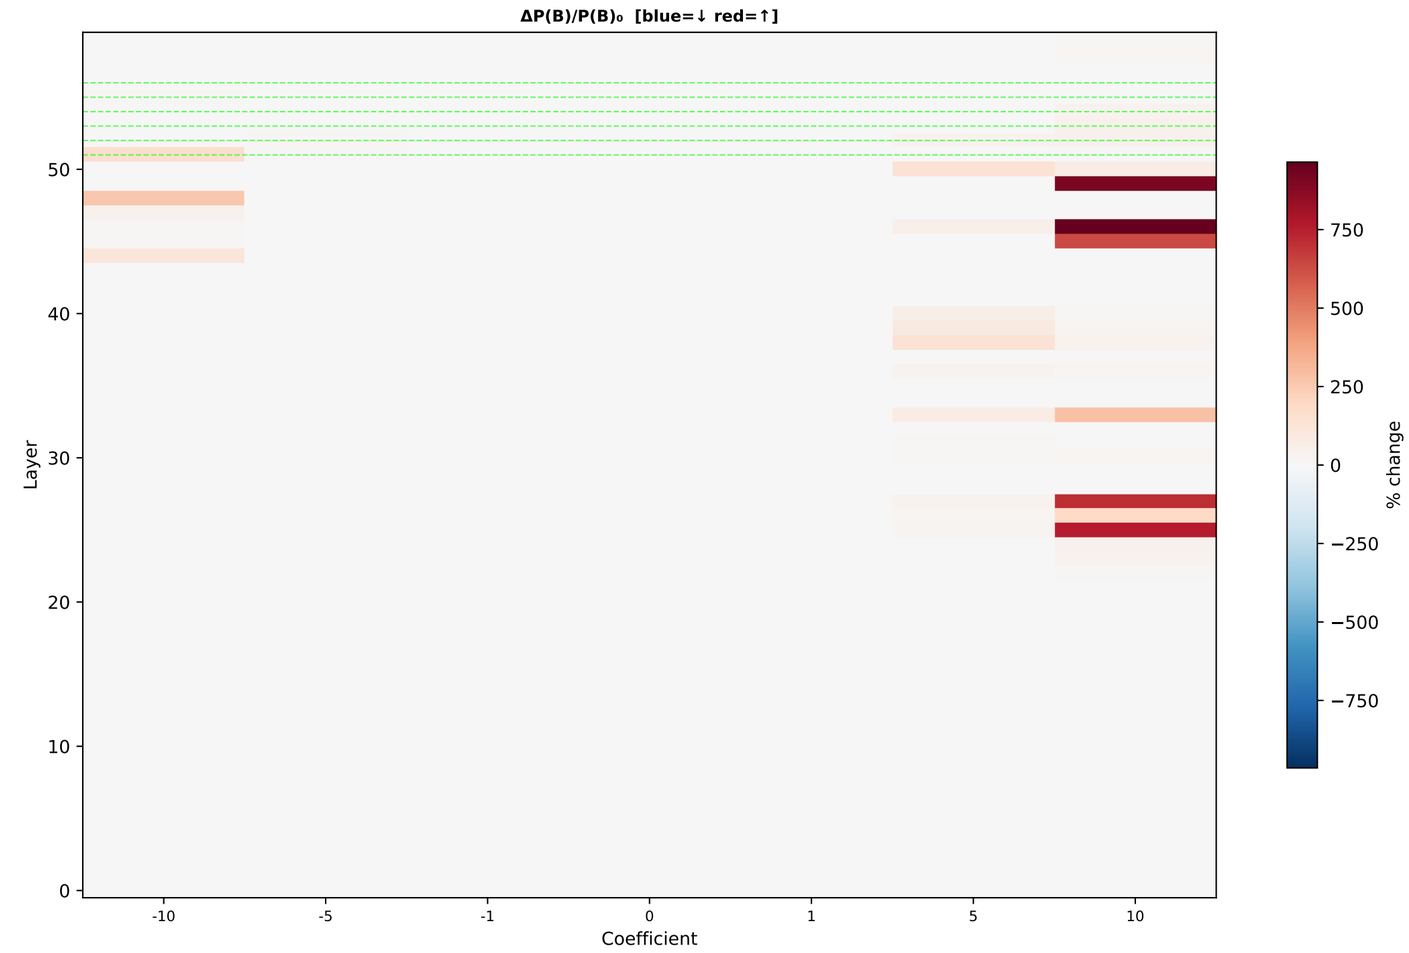


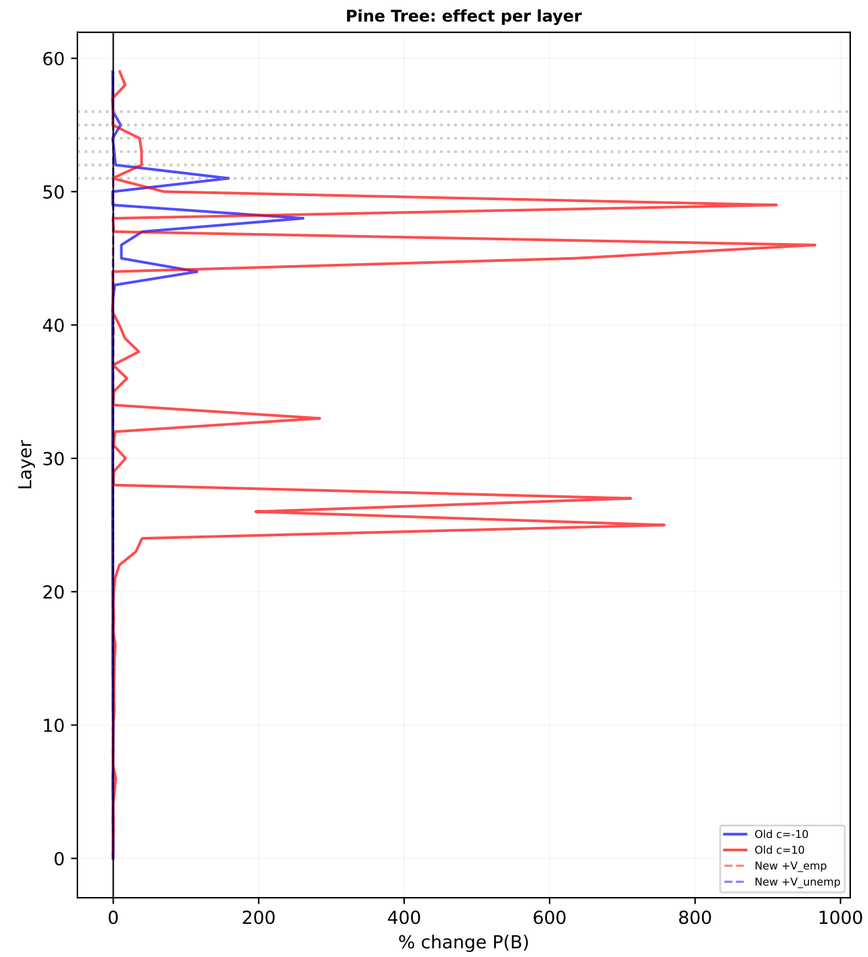


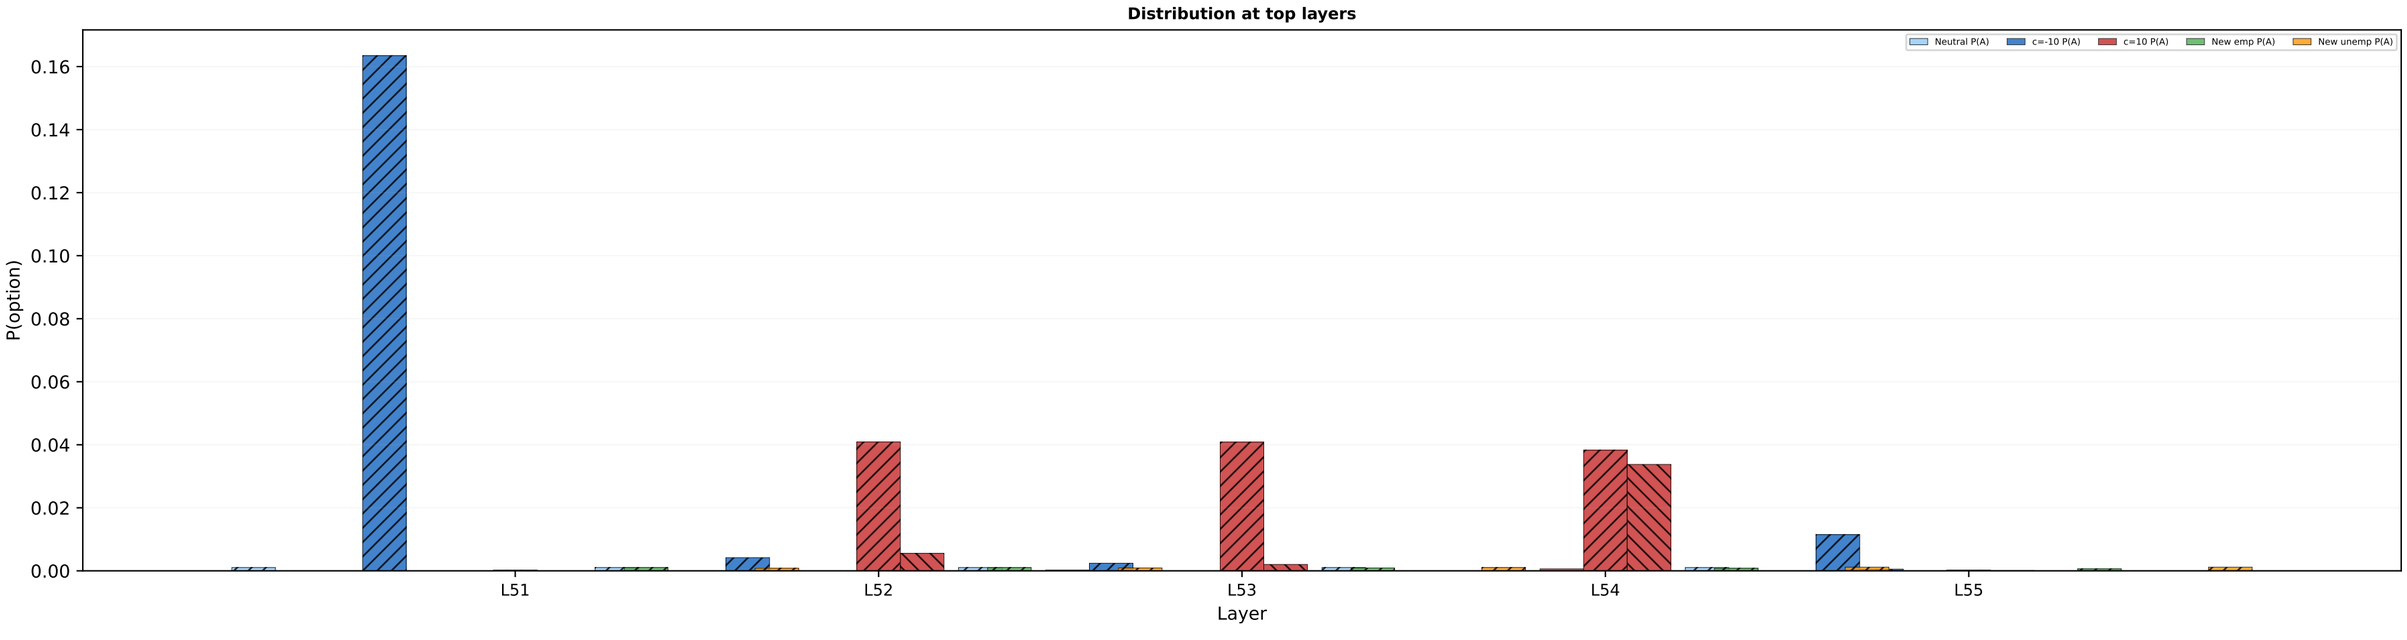


E15: 3 PM Tuesday location | V7/cfg2

At 3:00 PM on a Tuesday, a typical adult is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

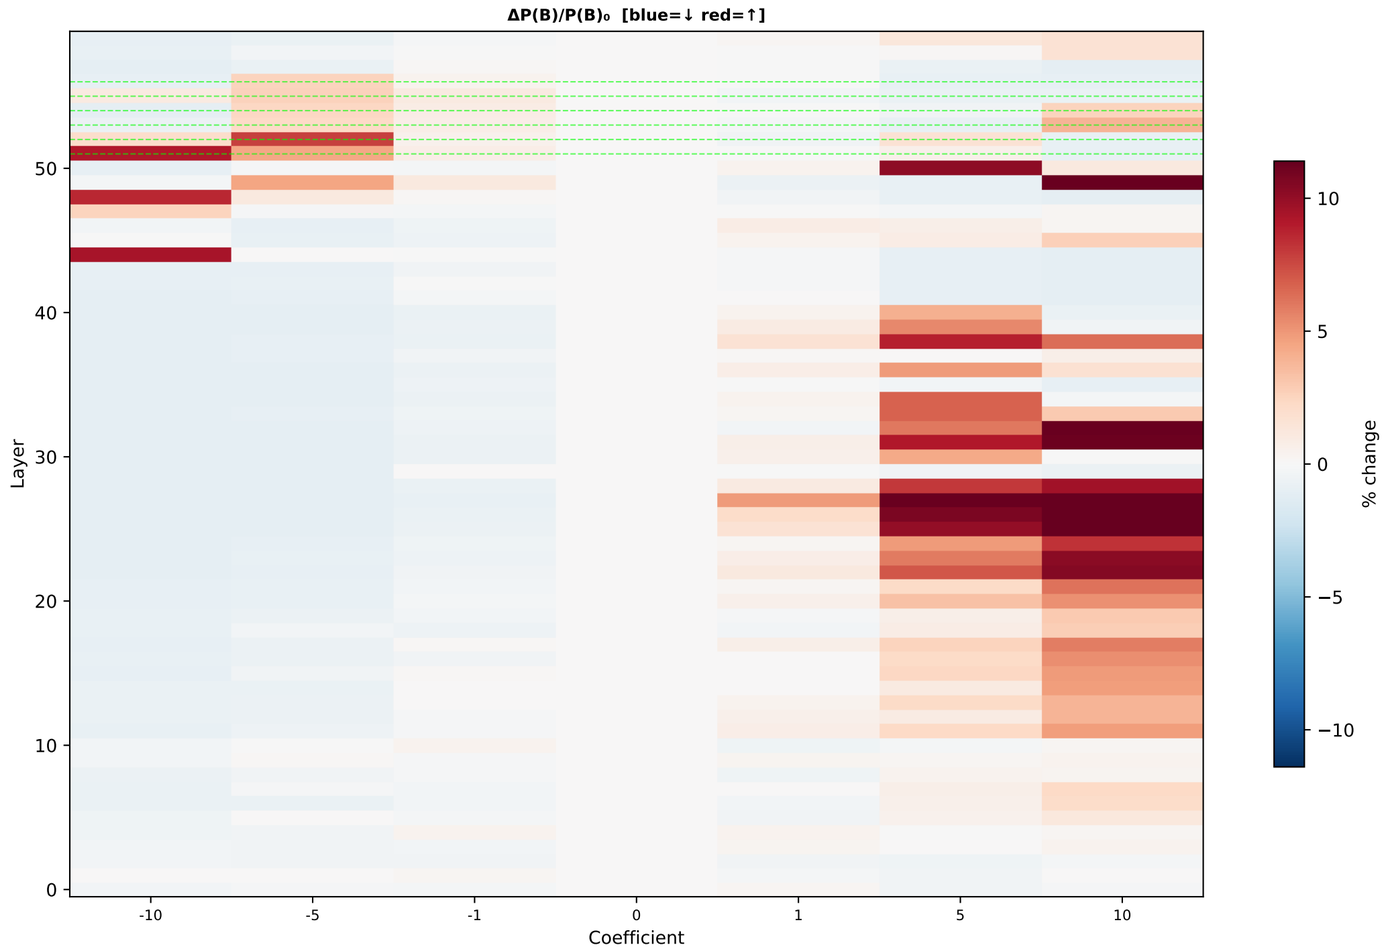


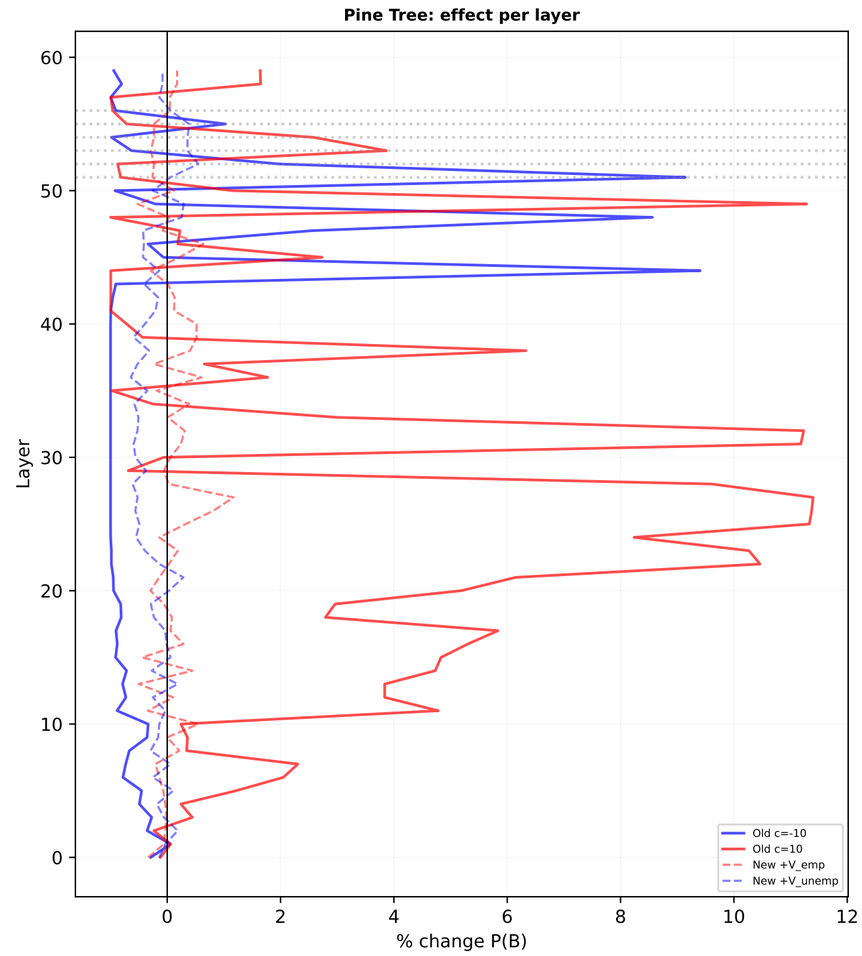


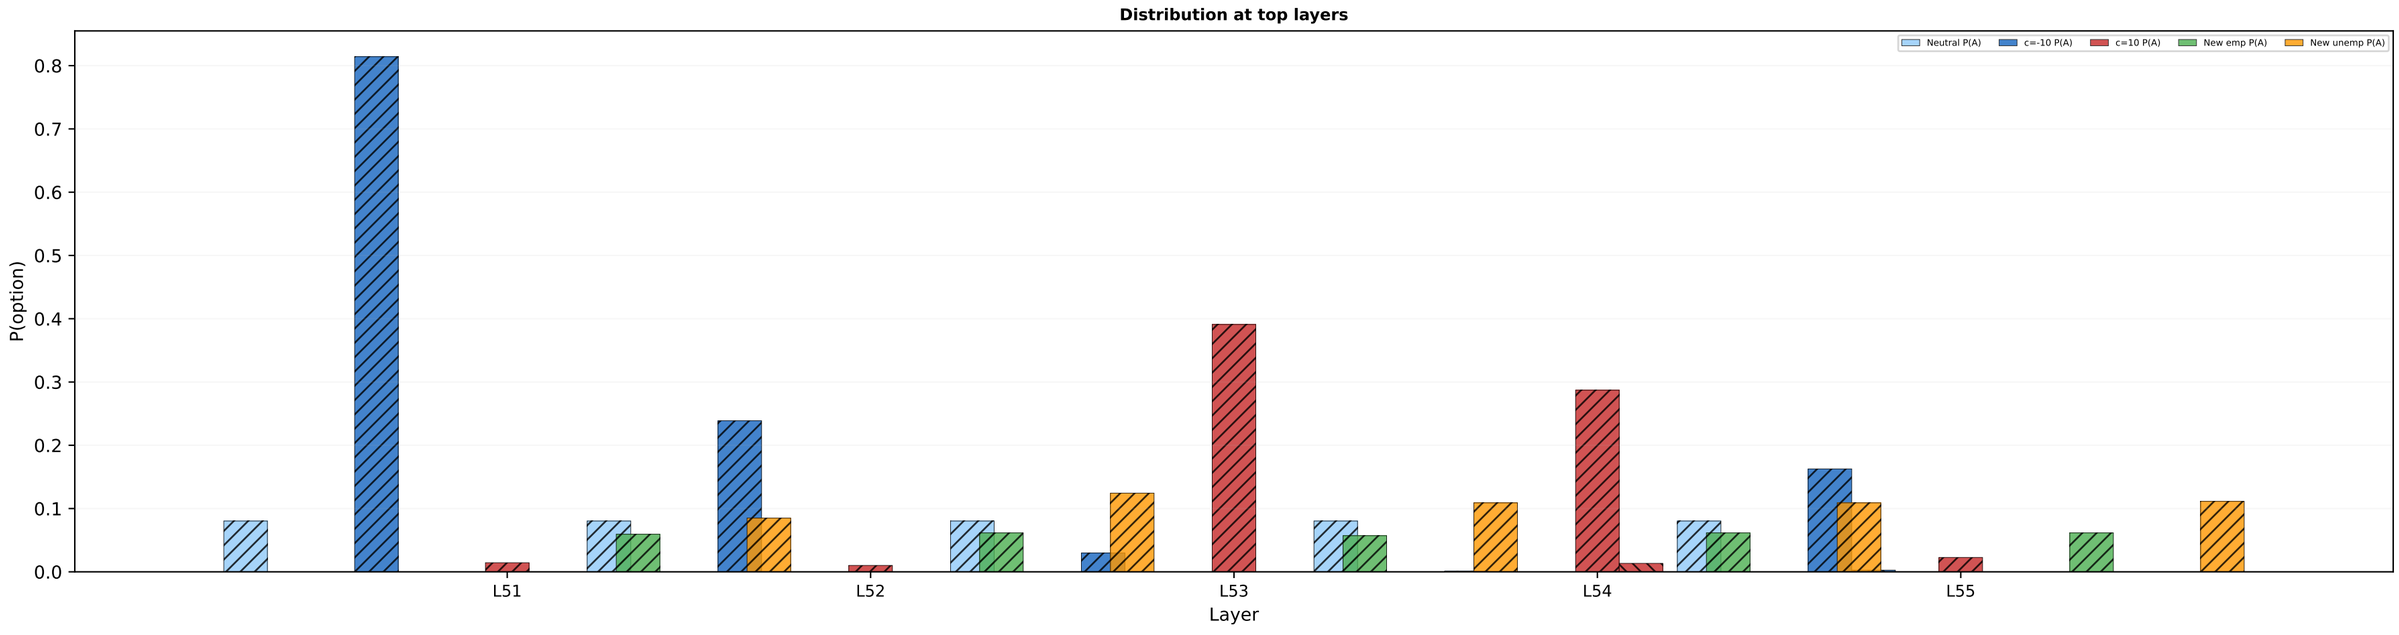


E16: 5 PM Tuesday status | V7/cfg2

At 5:00 PM on a Tuesday, a typical adult is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

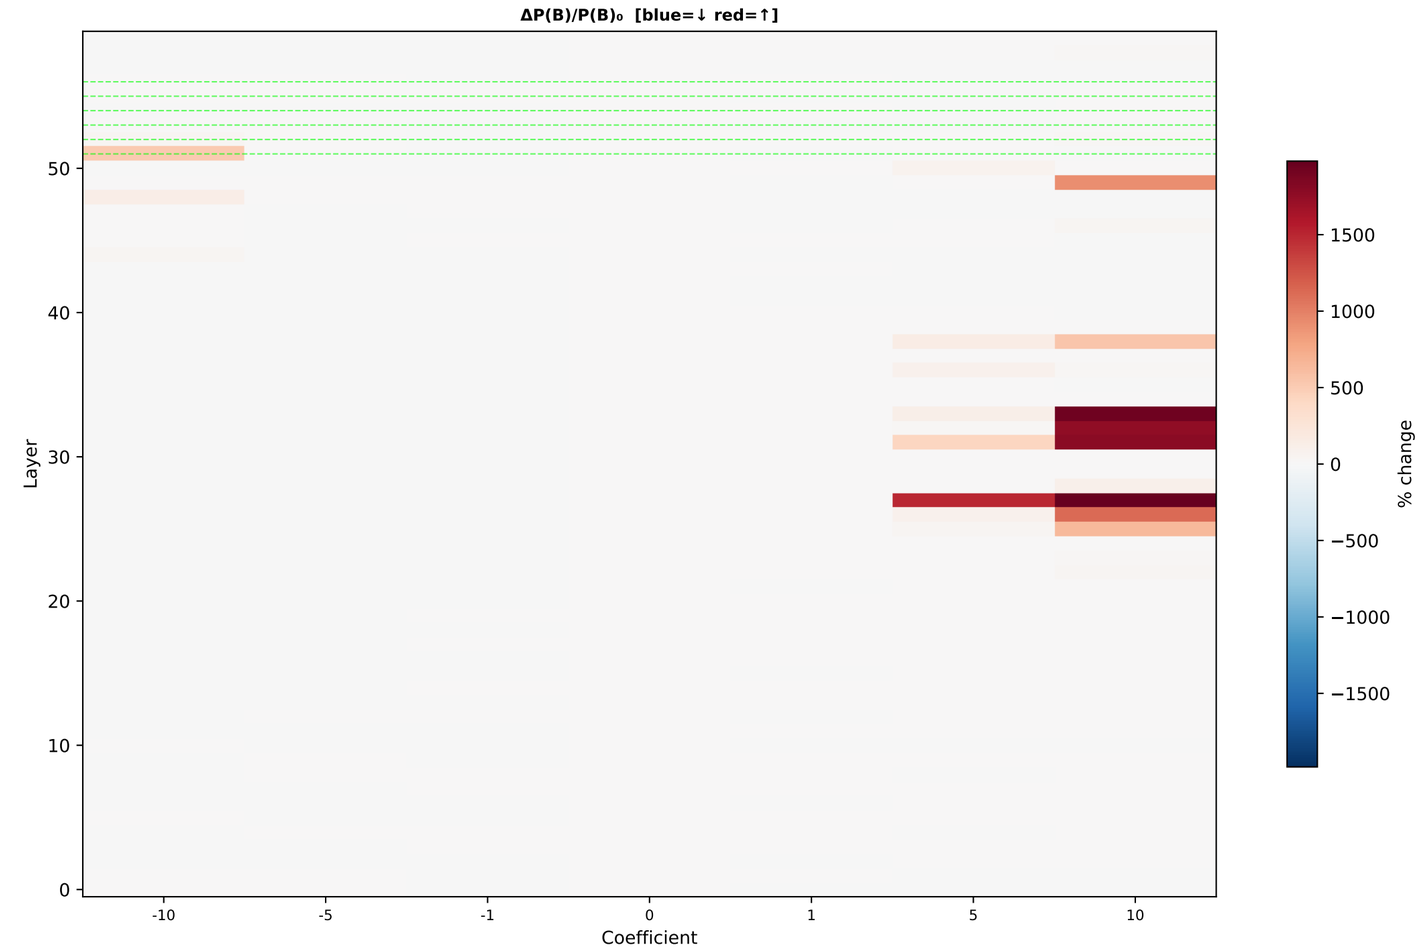


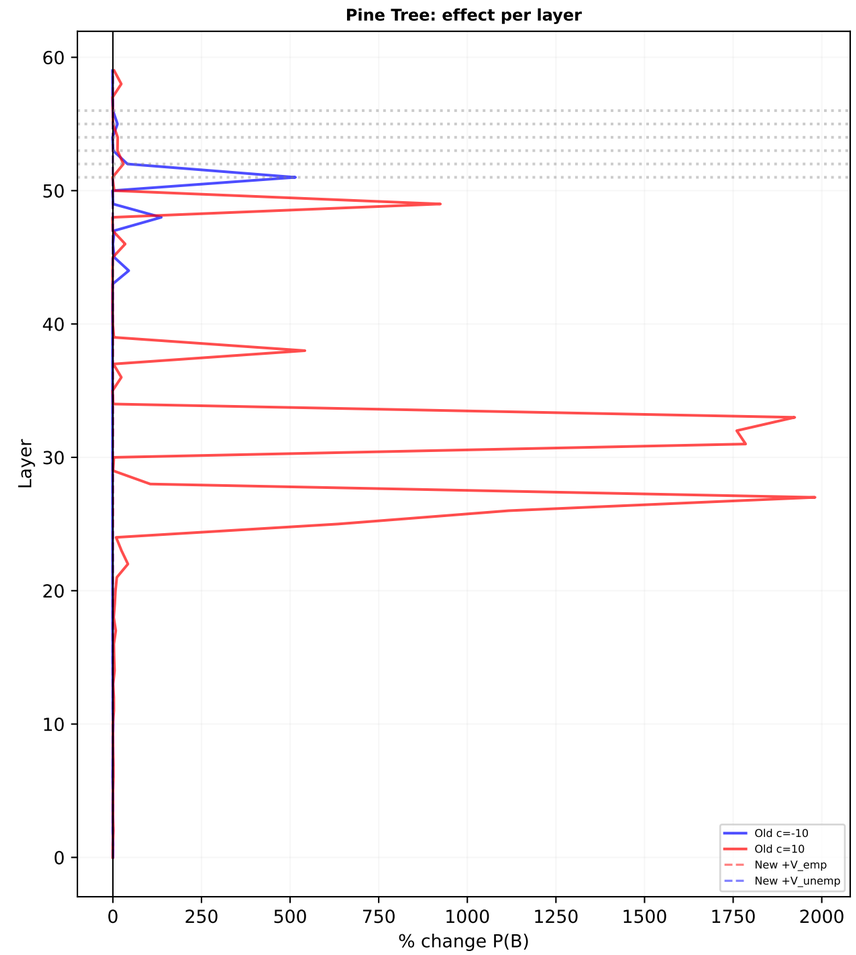


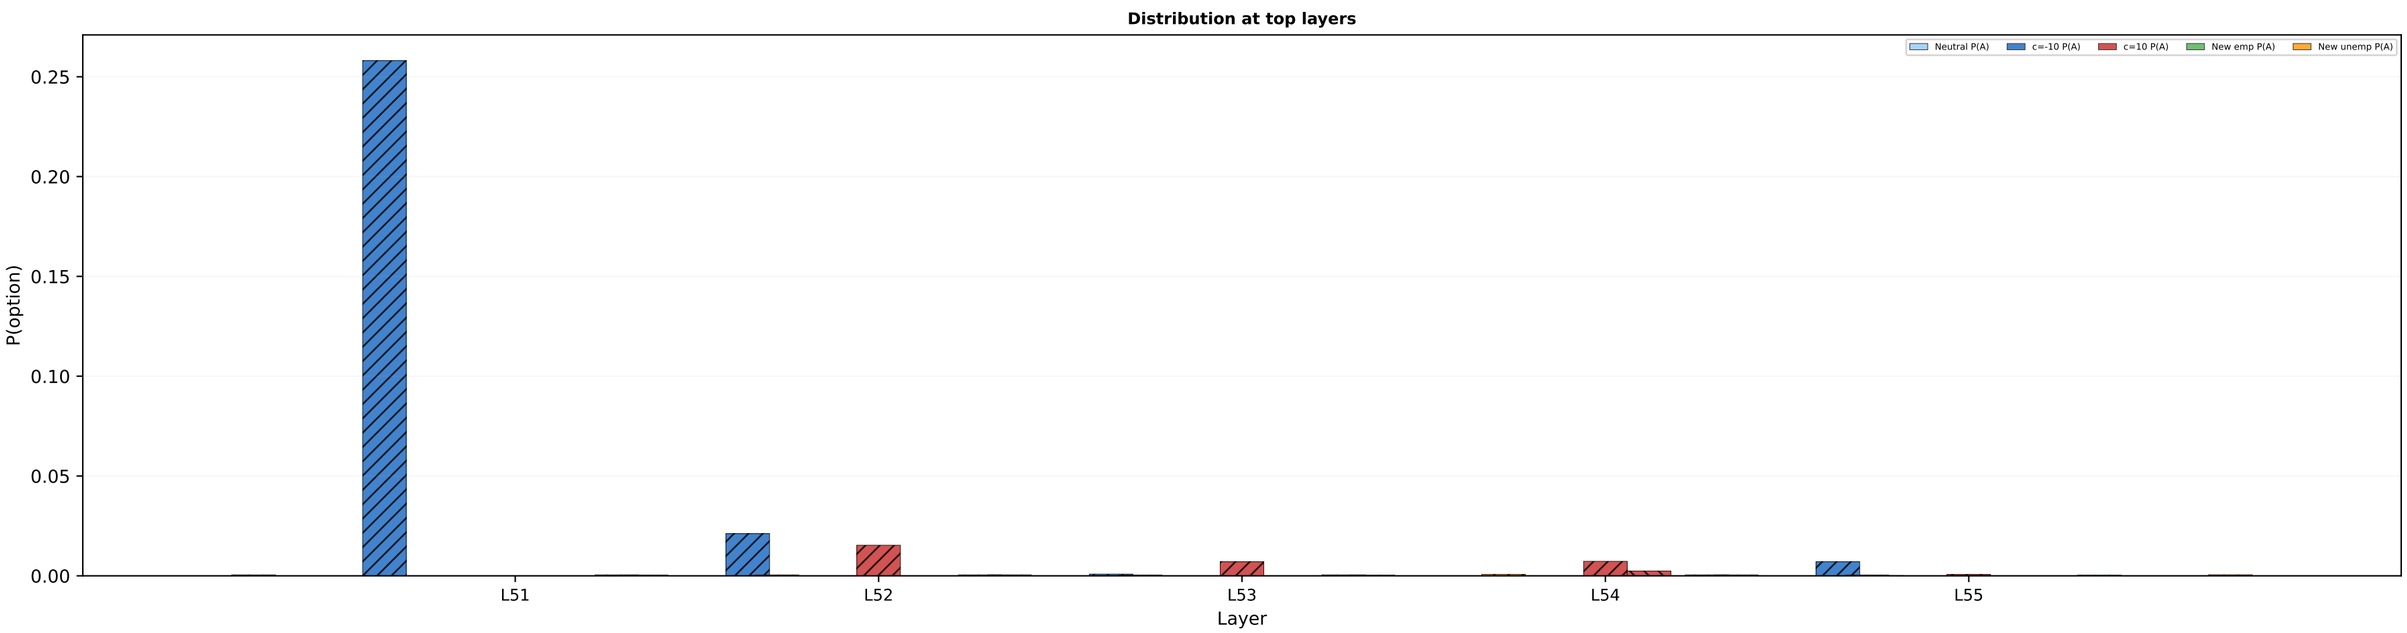


E17: 7 PM Tuesday status | V7/cfg2

At 7:00 PM on a Tuesday, a typical adult is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

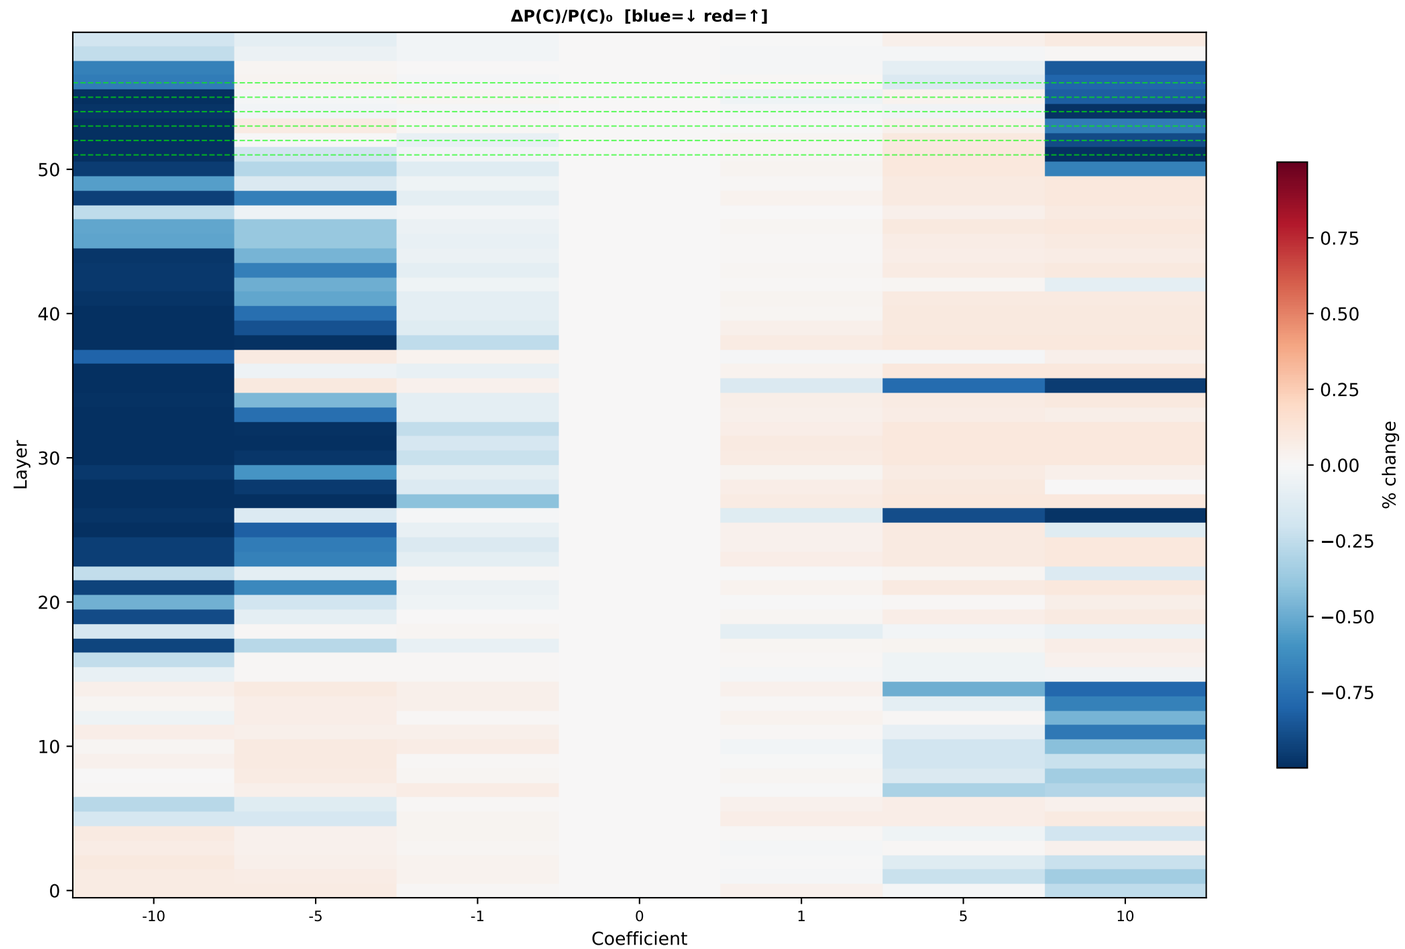


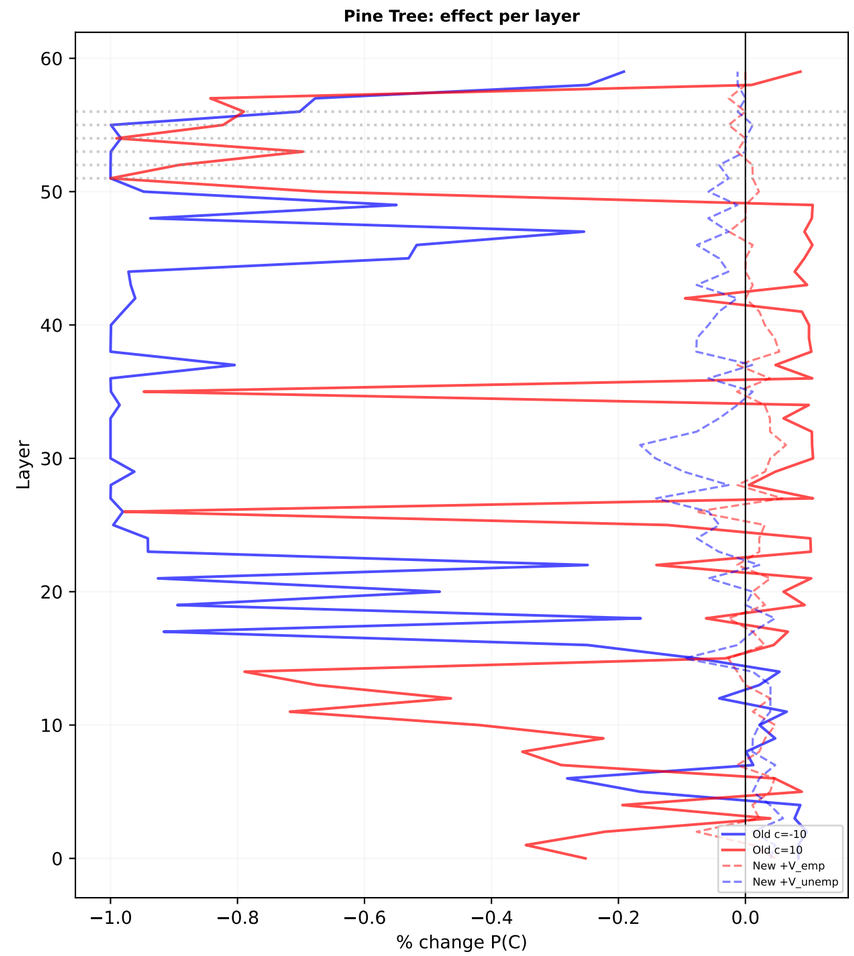


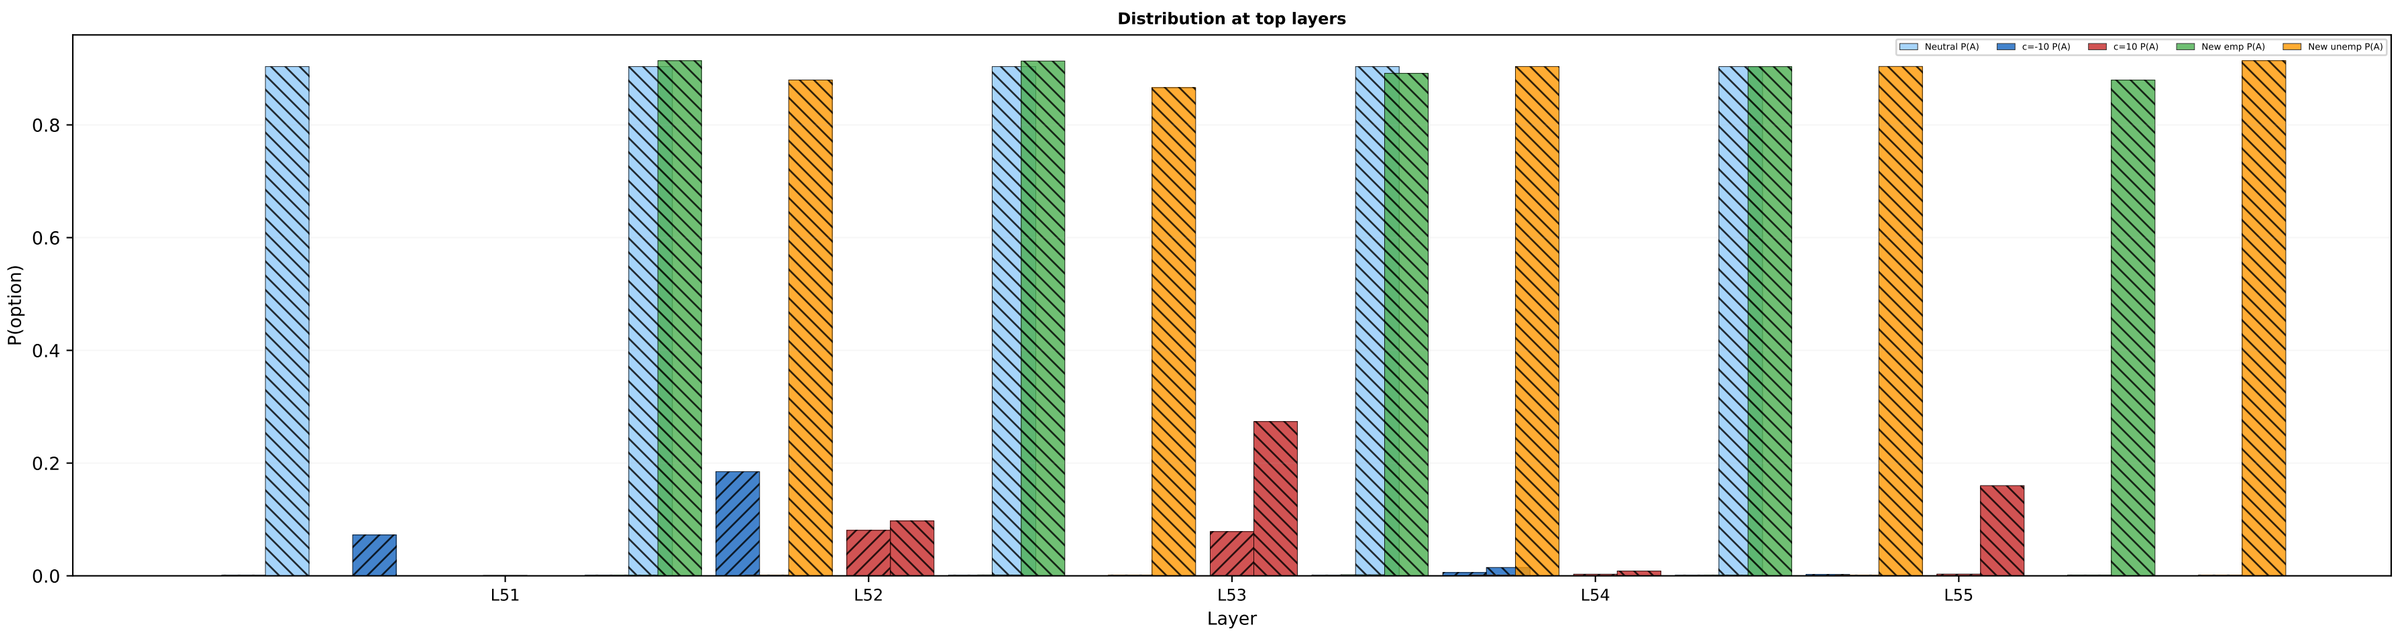


E18: Alarm clock habit (Tue) | V7/cfg2

Does a typical adult use an alarm clock on Tuesday mornings? | (A) No, they wake up naturally whenever they feel like it | (B) Sometimes, depending on whether they have plans | (C) Yes, they set an alarm at the same time every Tuesday | Answer: (

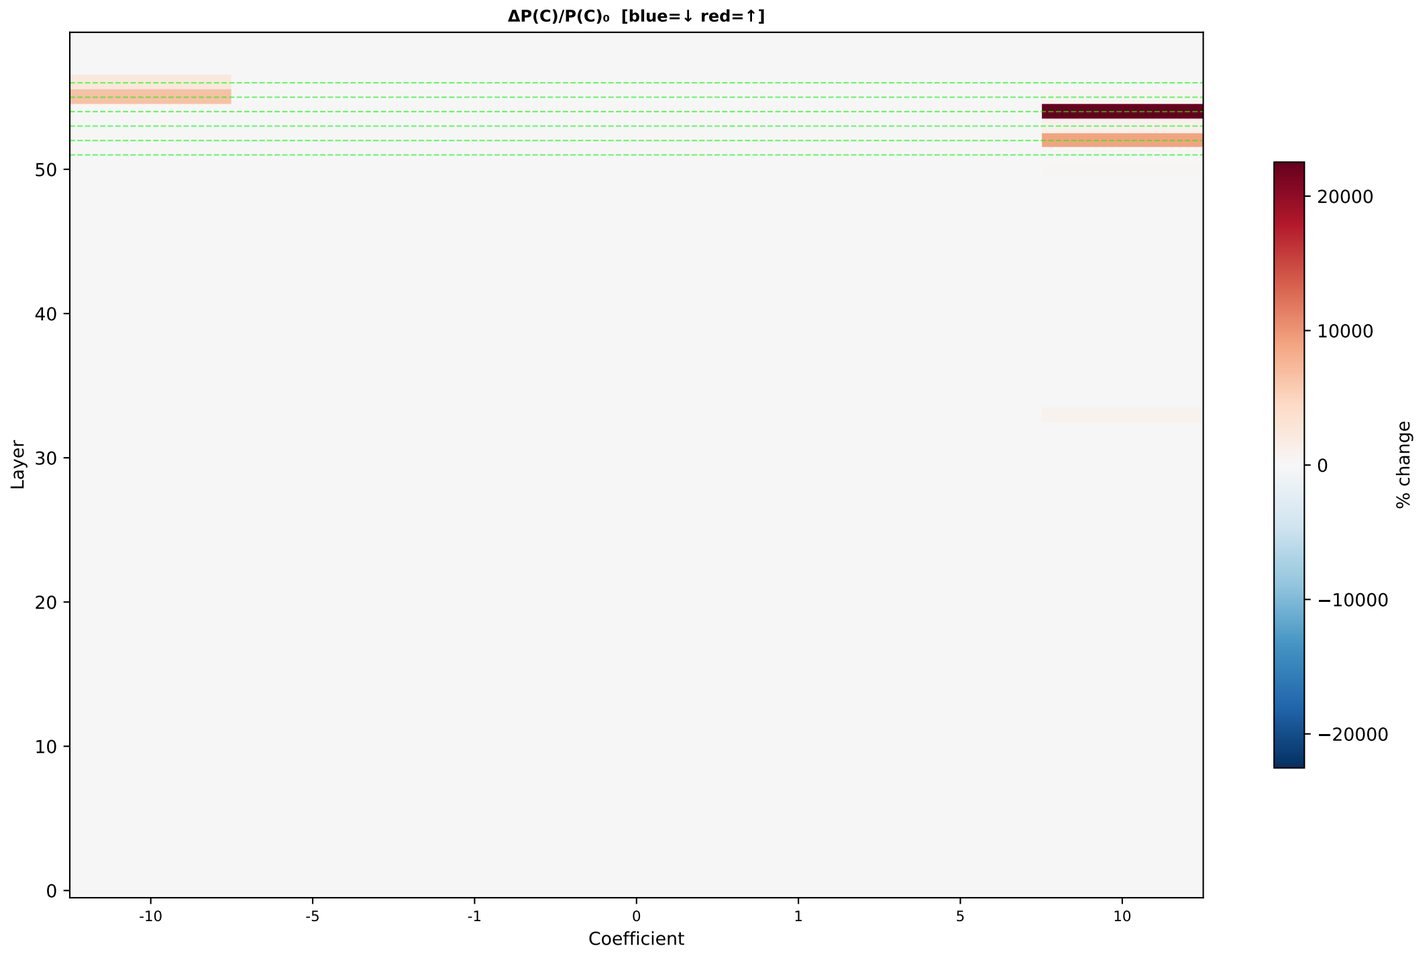


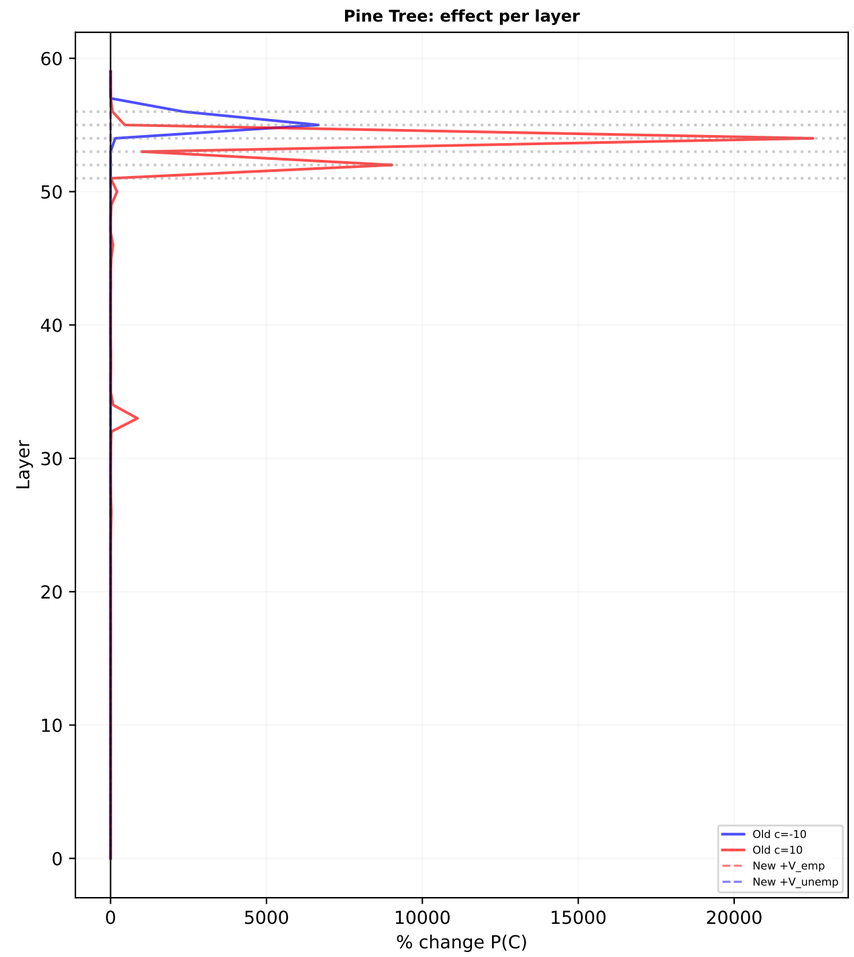


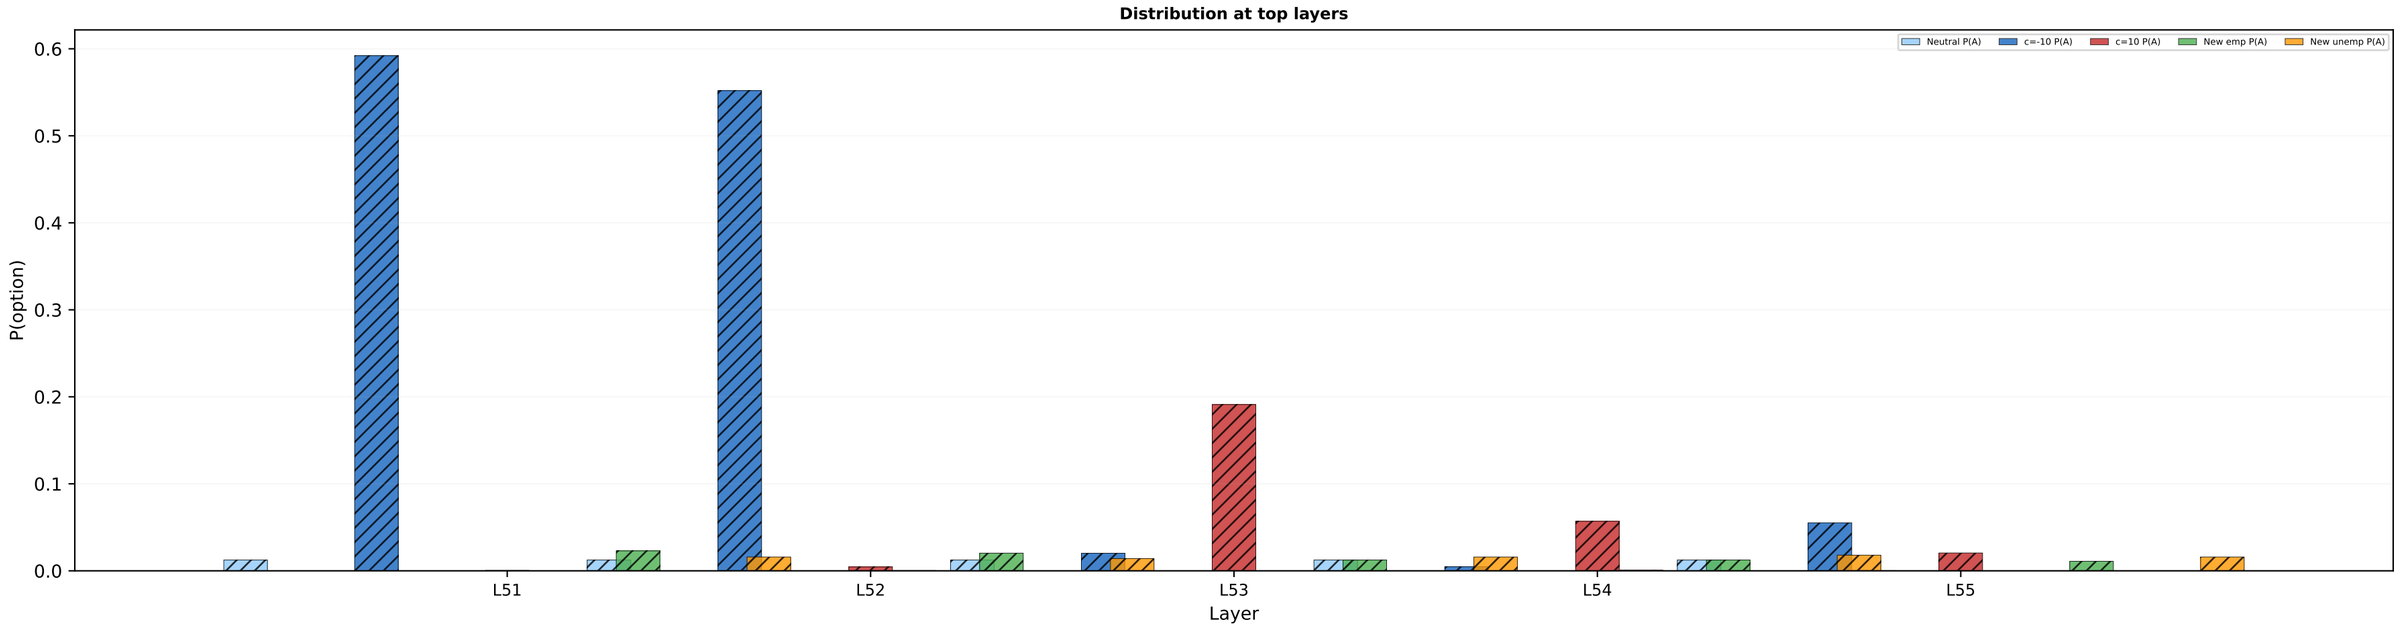


E19: Departure time consistency (Tue) | V7/cfg2

Does a typical adult leave home at the same time every Tuesday? | (A) No, the departure time varies a lot | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

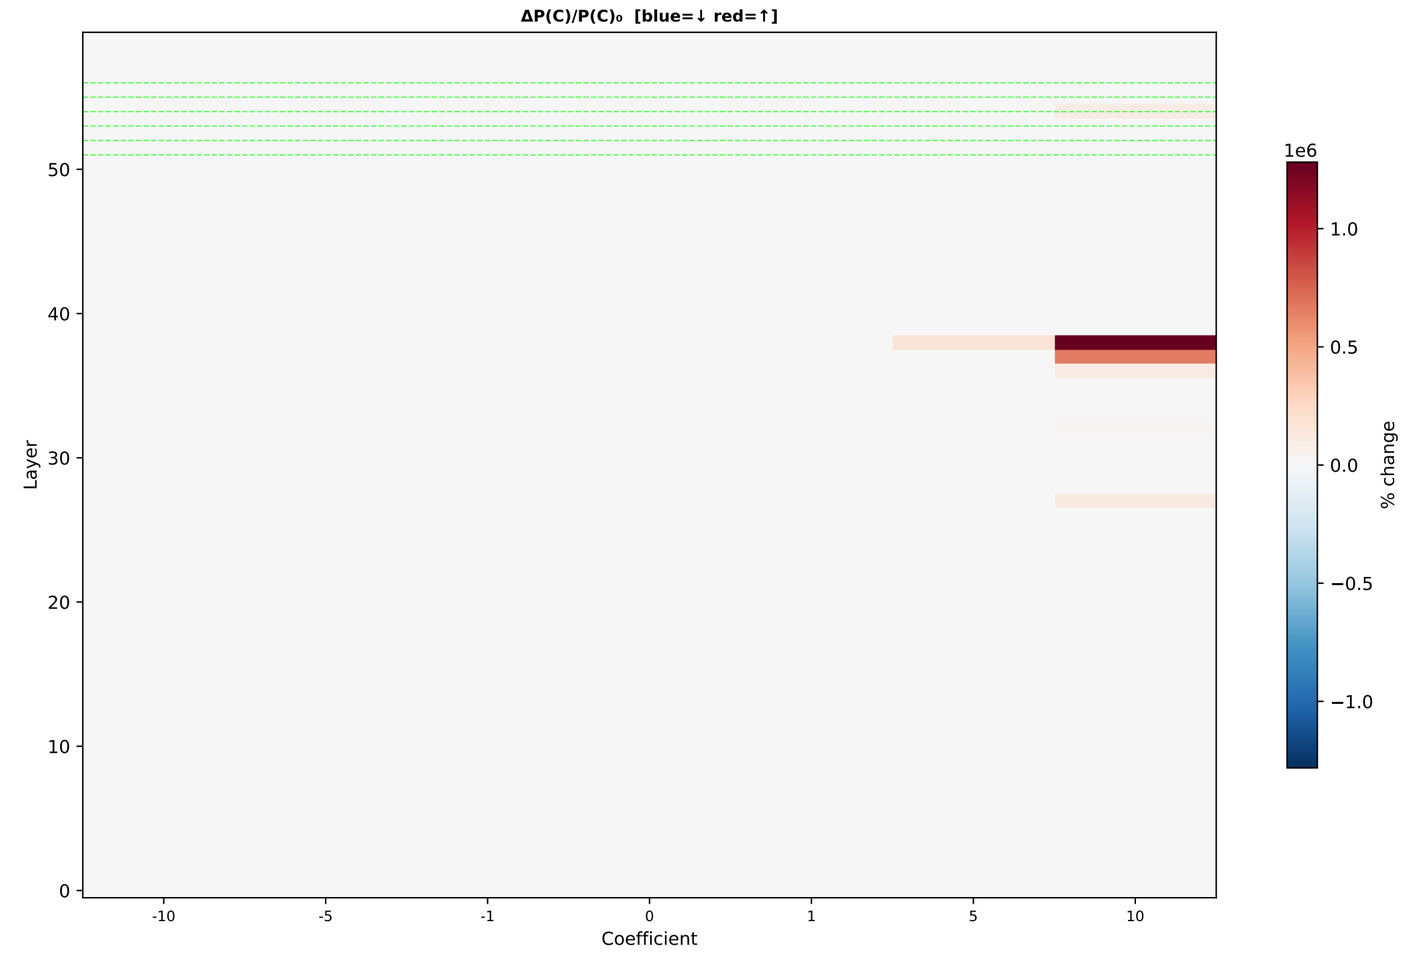


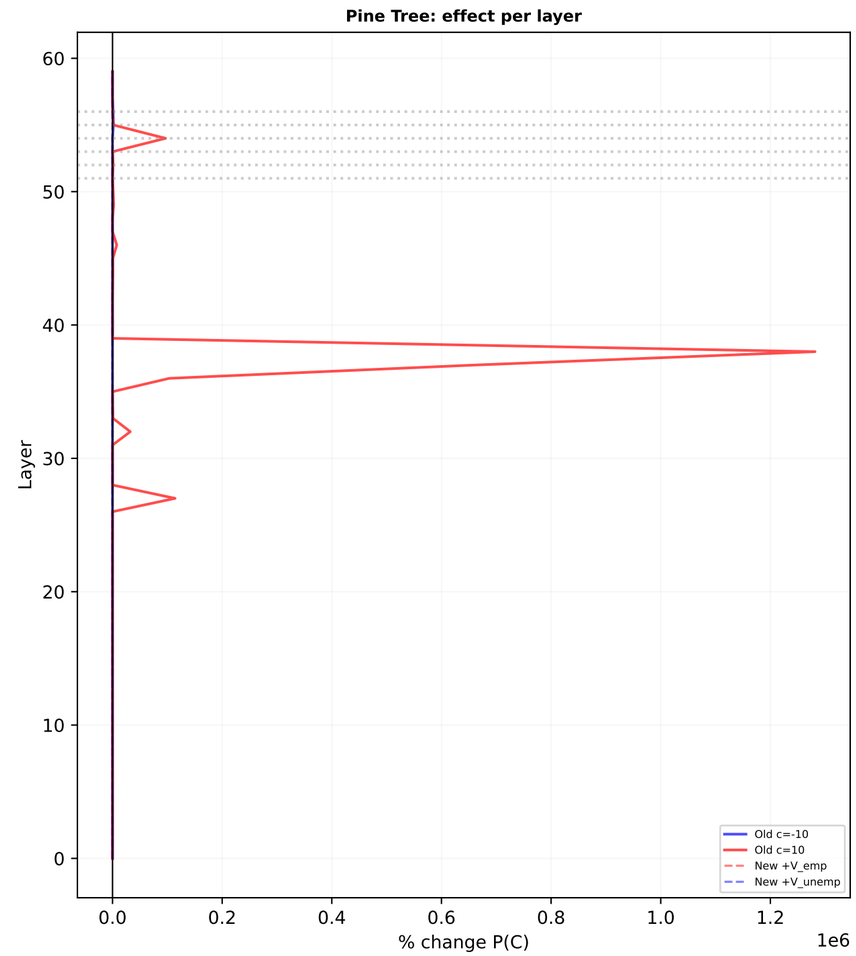


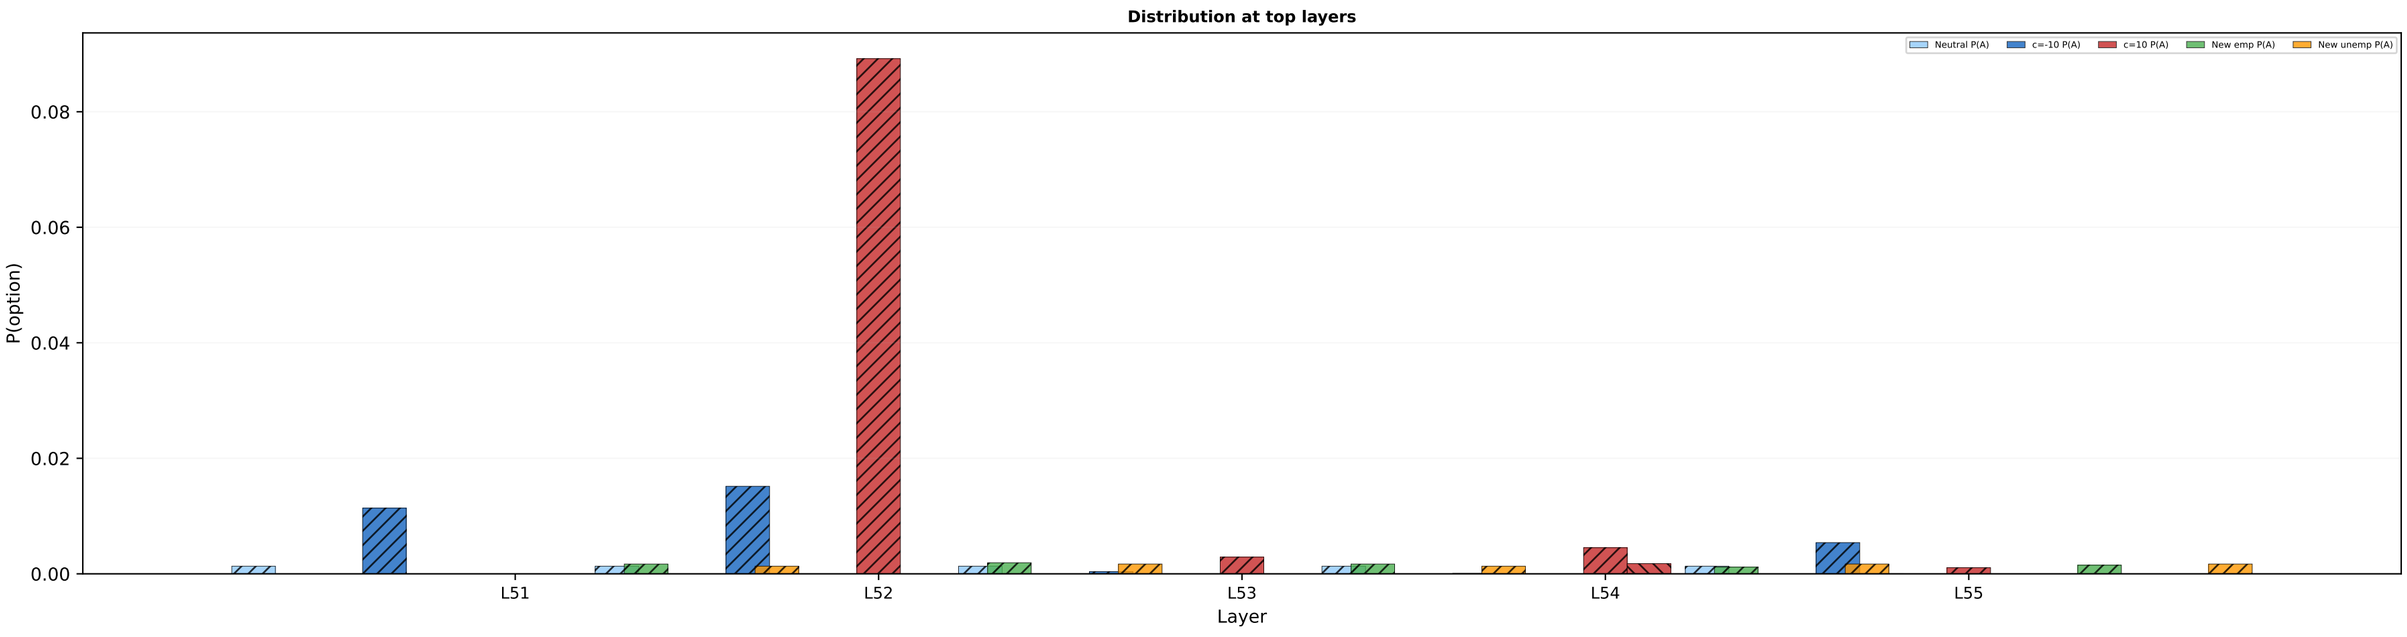


E20: Noon location consistency (Tue) | V7/cfg2

Is a typical adult at the same non-home location at noon every Tuesday? | (A) No, they are usually at home at noon | (B) Sometimes the same place, sometimes not | (C) Yes, almost always at the same location | Answer: (

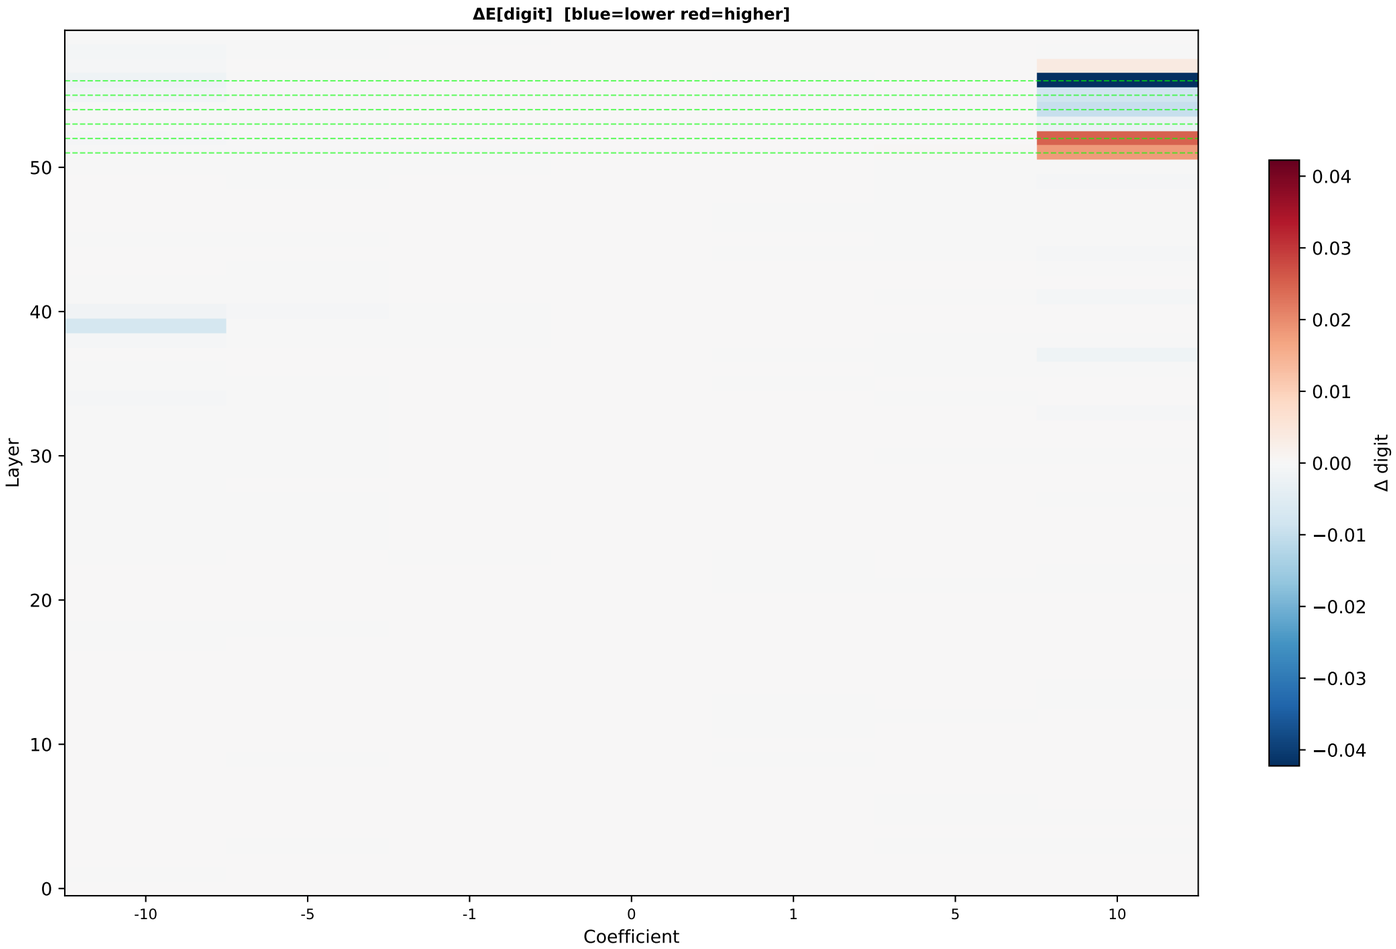


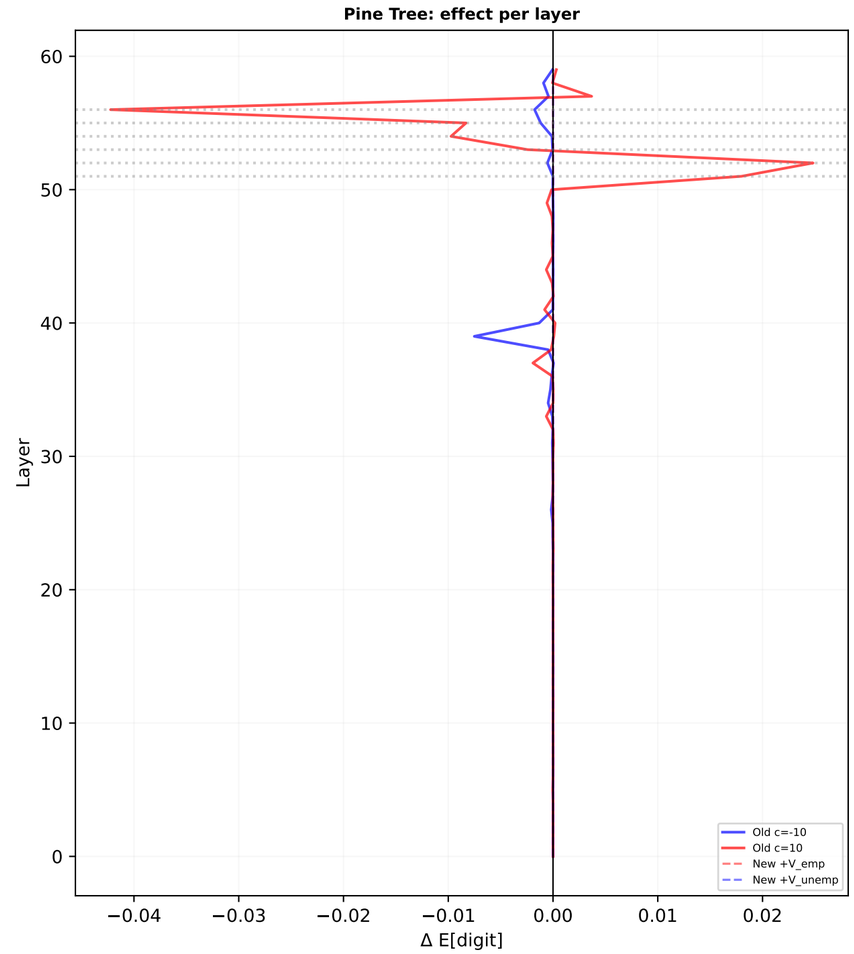


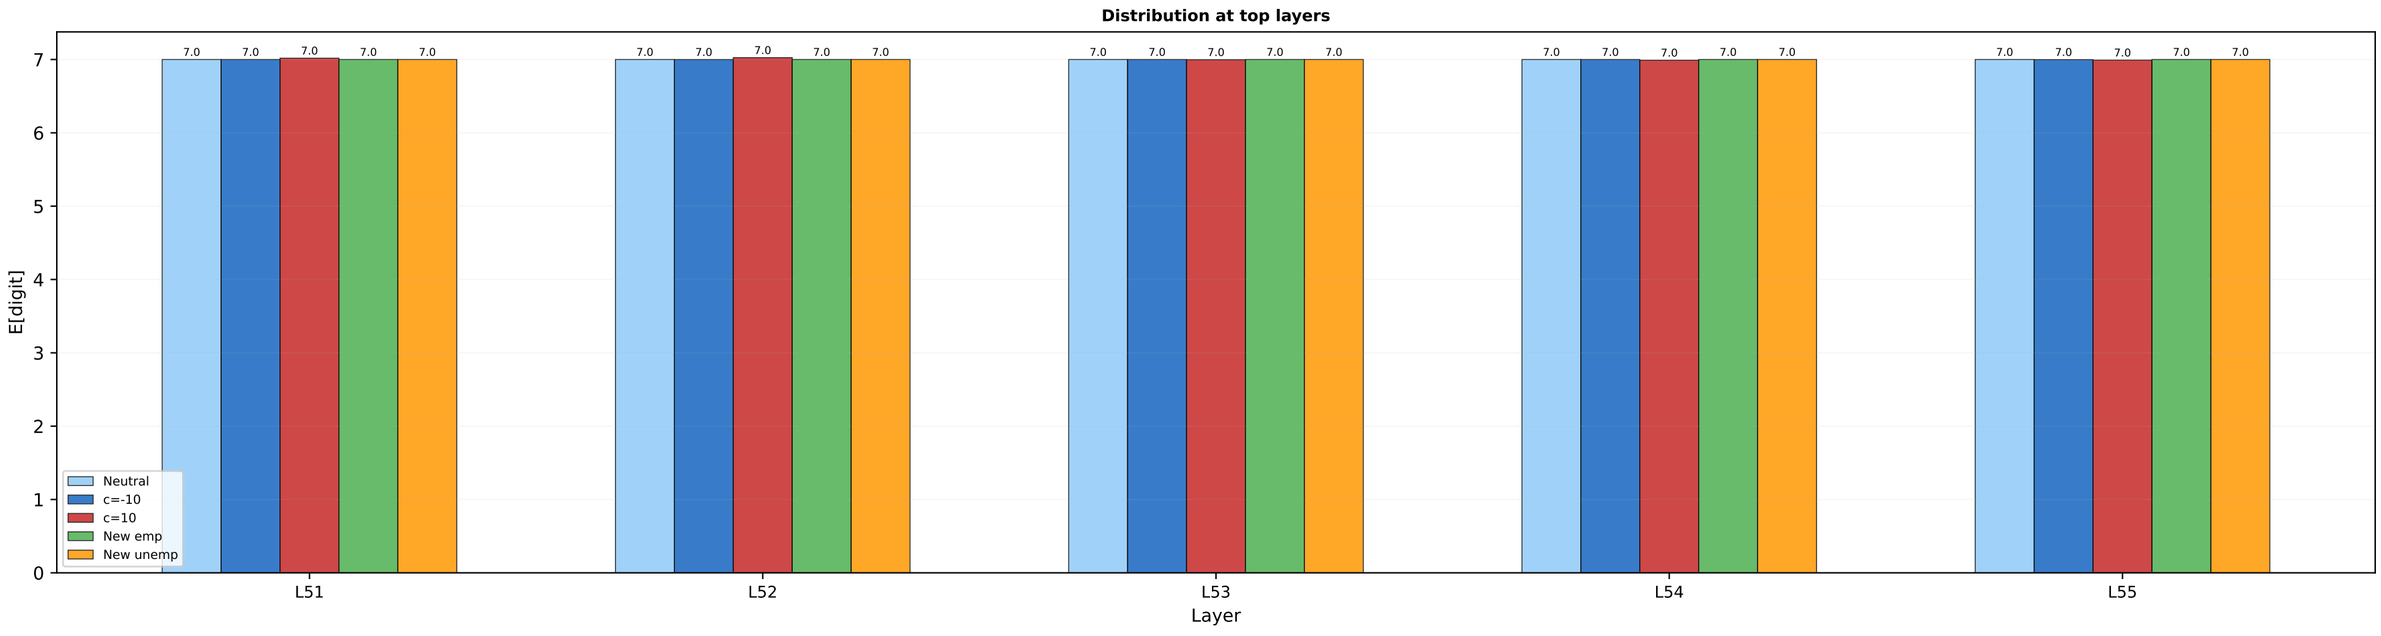


Complete with a single number only. | A typical adult wakes up at approximately ___:00 AM on a Tuesday. |

E1: Wake-up hour (Tue) | V7/cfg4

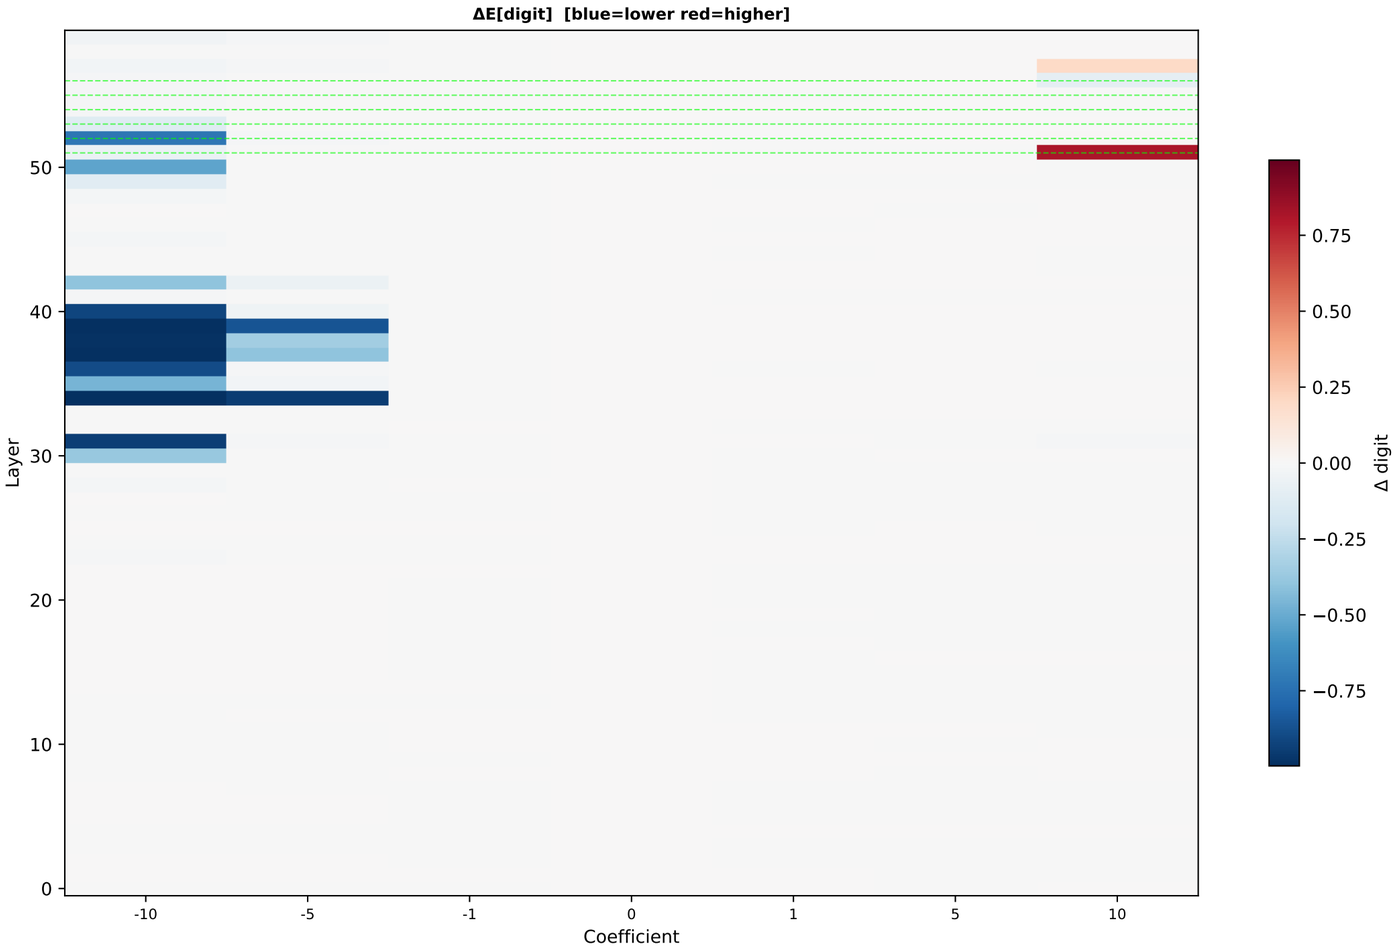


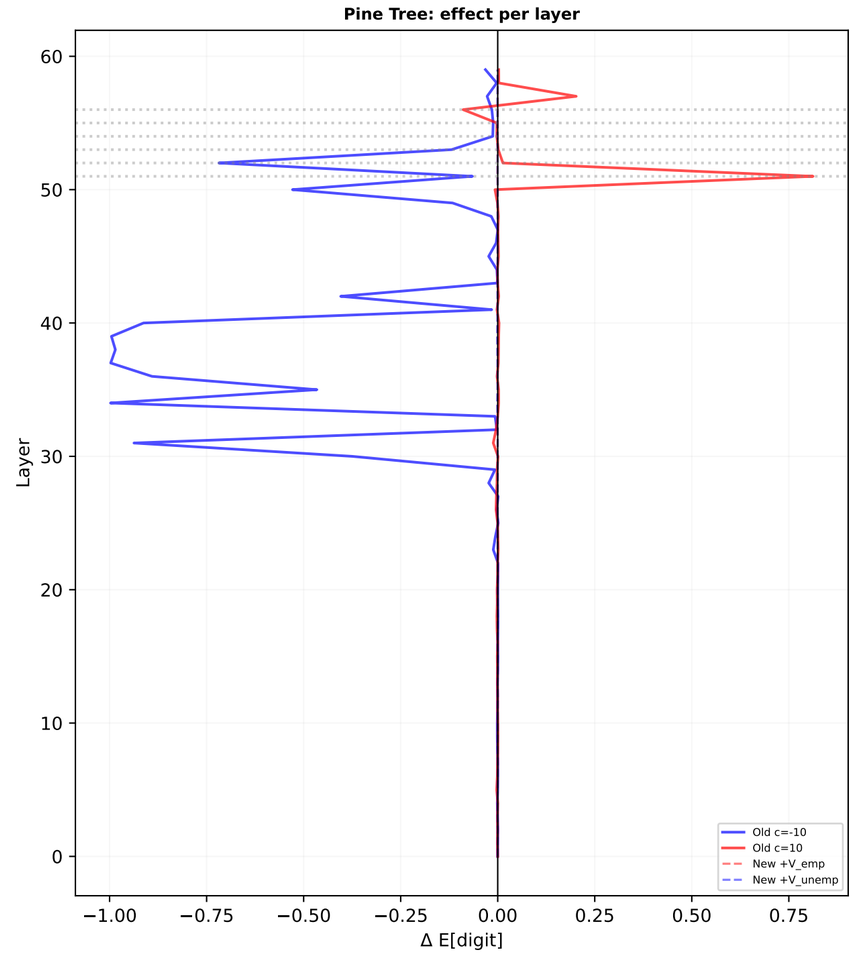


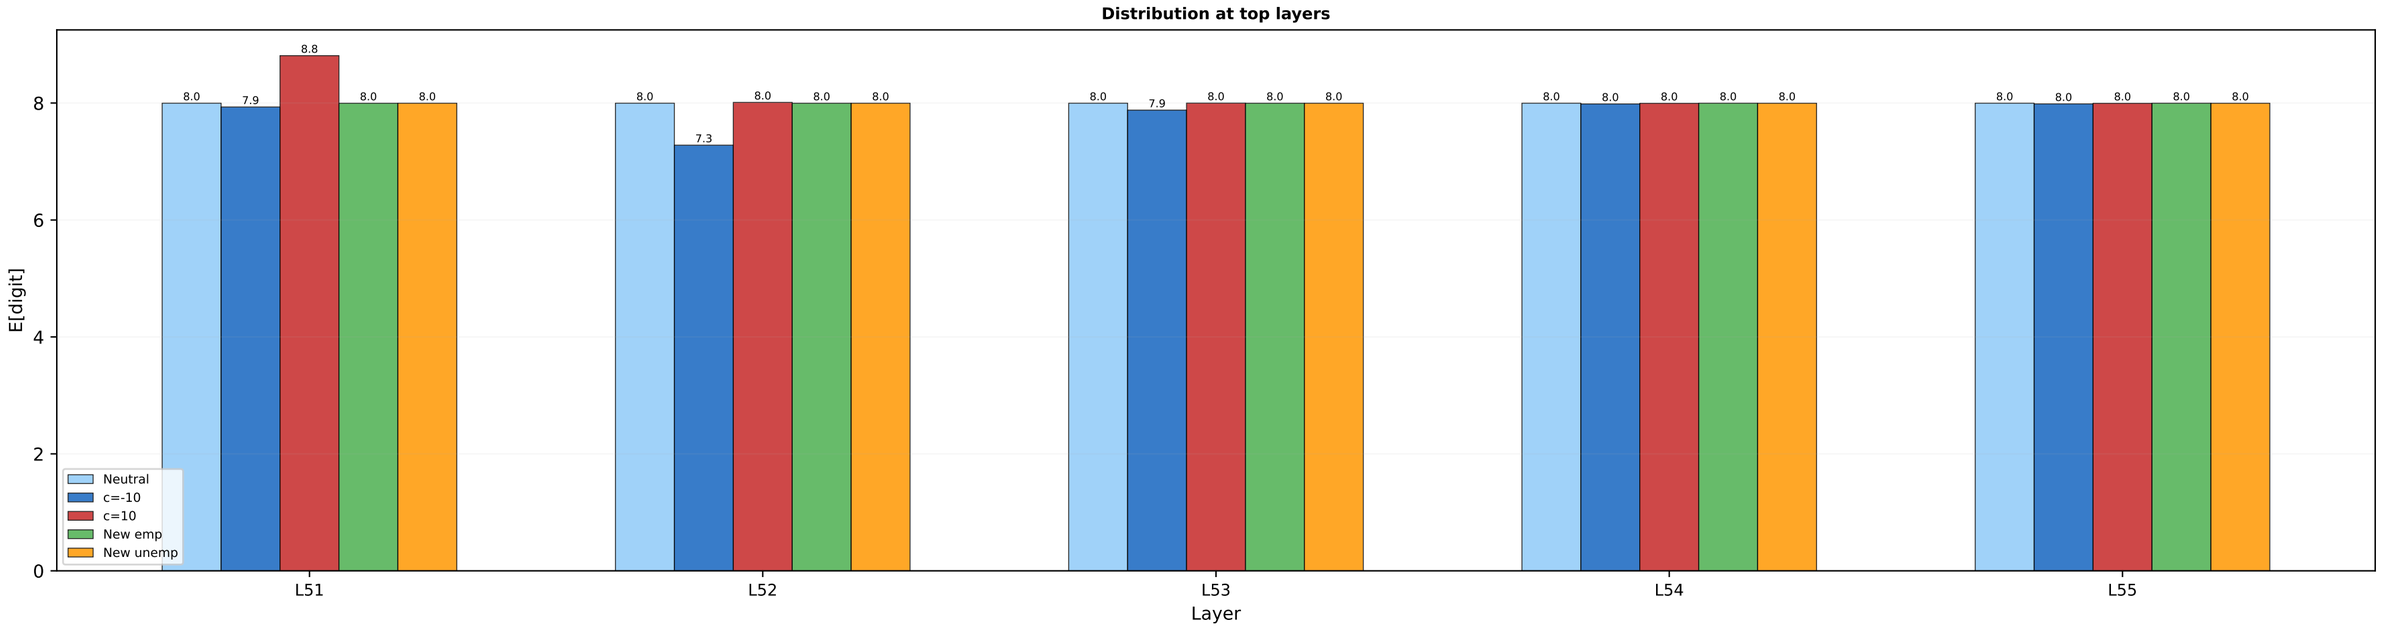


Complete with a single number only. | A typical adult leaves home at approximately ___:00 AM on a Tuesday. |

E2: Leave-home hour (Tue) | V7/cfg4

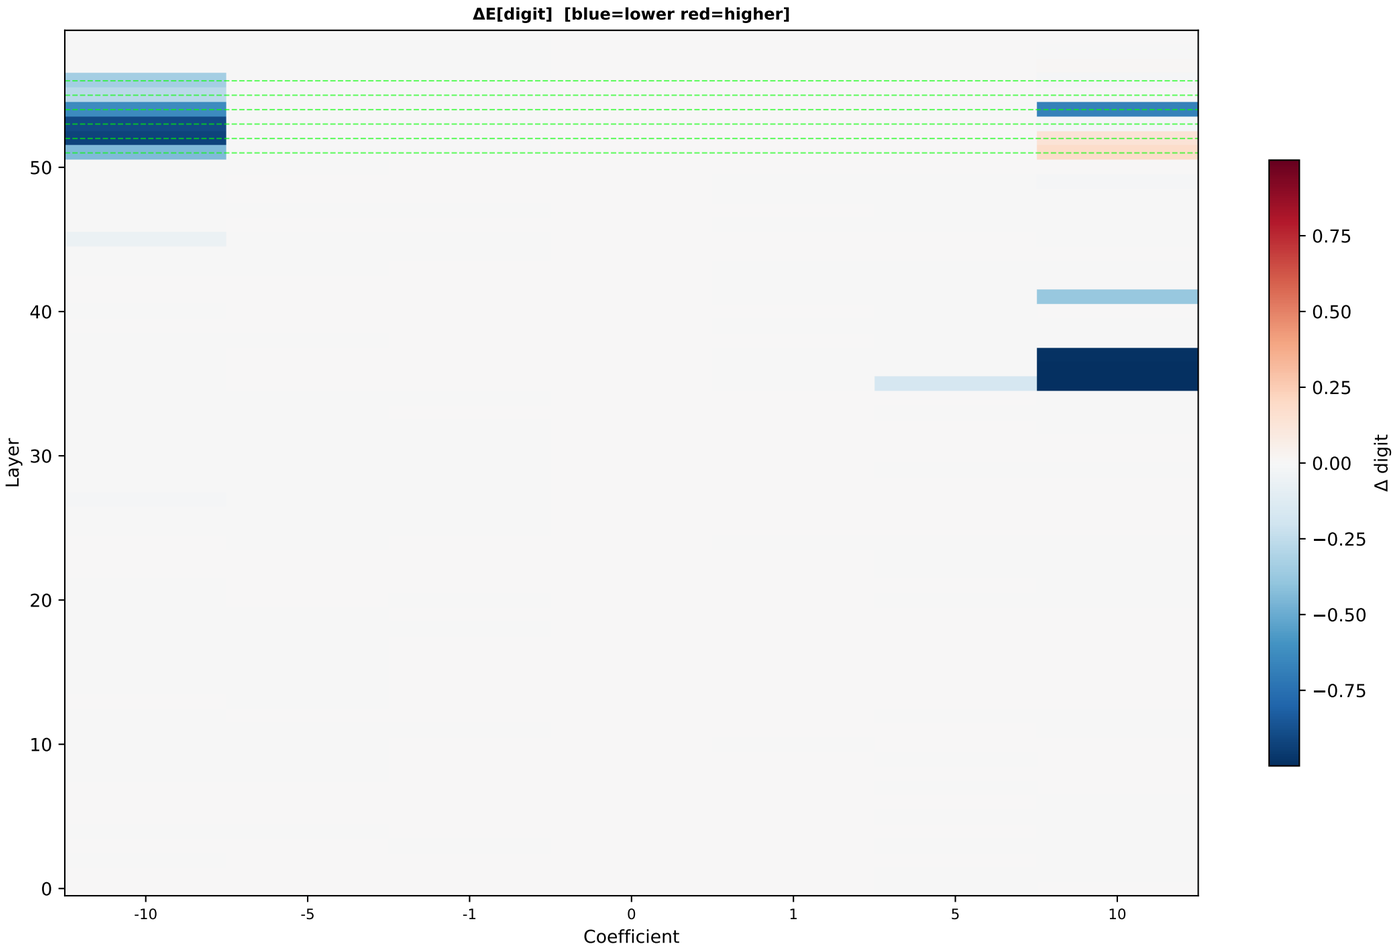


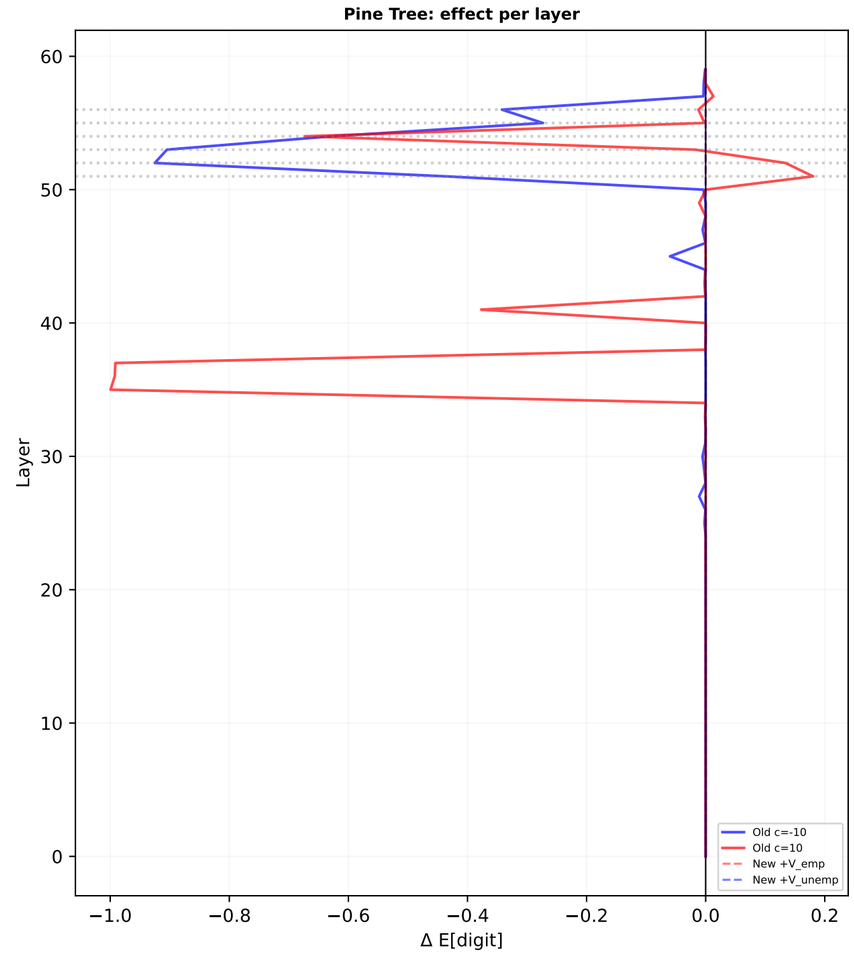


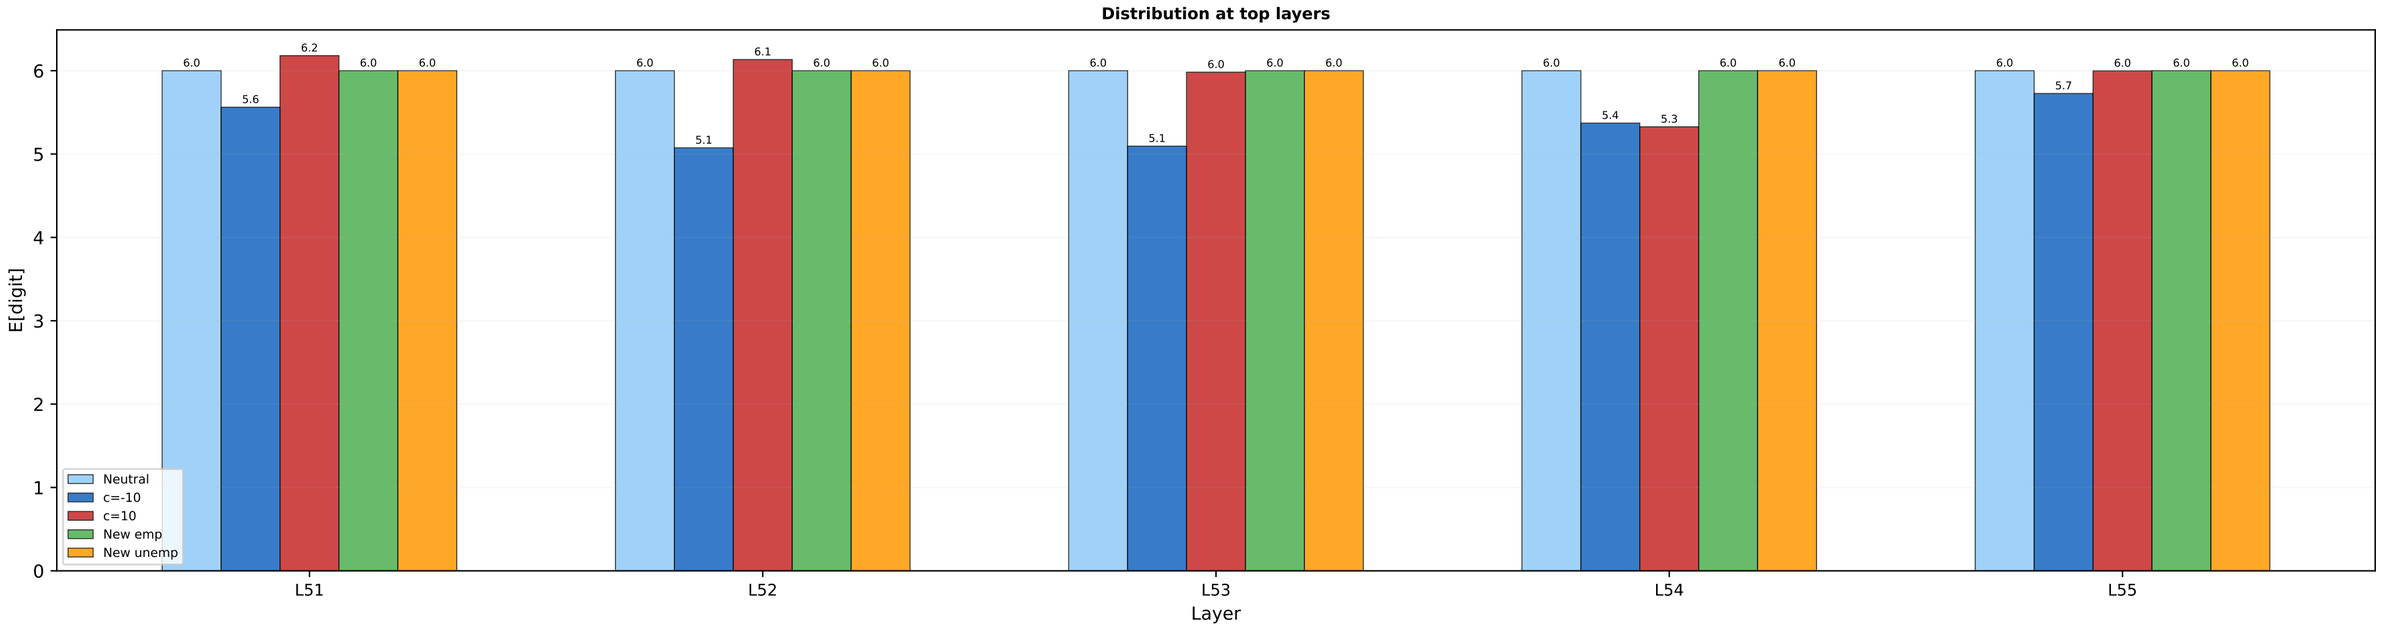


Complete with a single number only. | A typical adult arrives home at approximately ___:00 PM on a Tuesday. |

E3: Arrive-home hour (Tue) | V7/cfg4

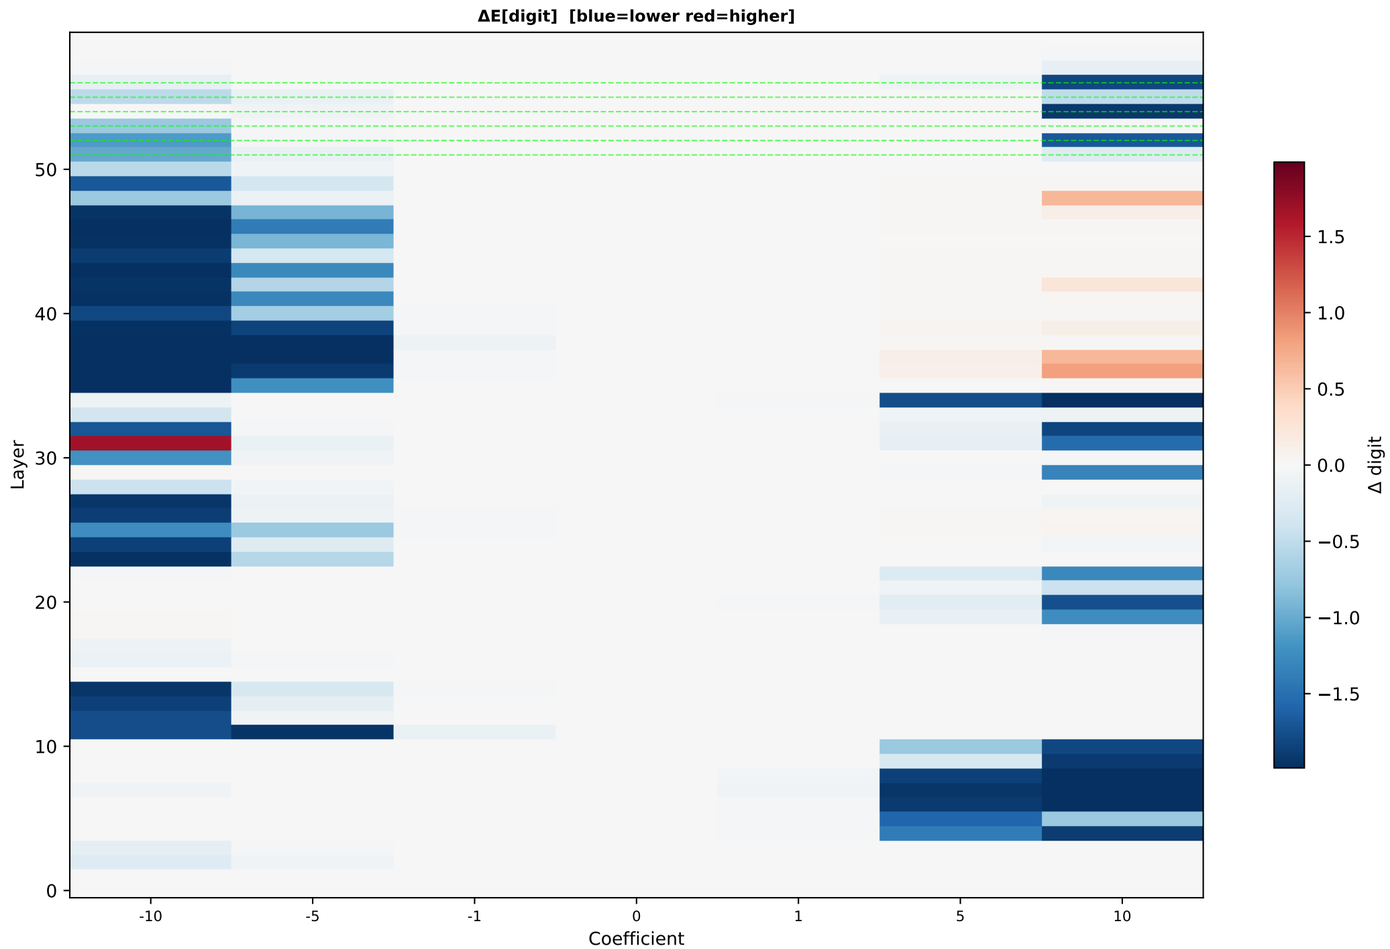


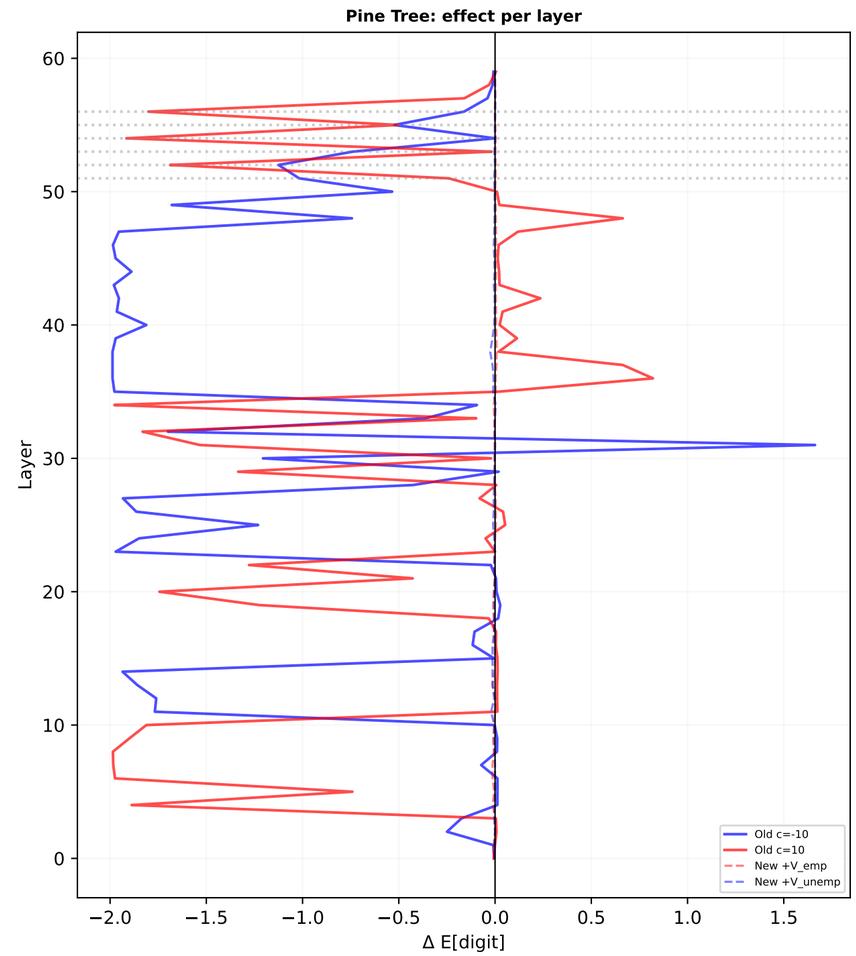


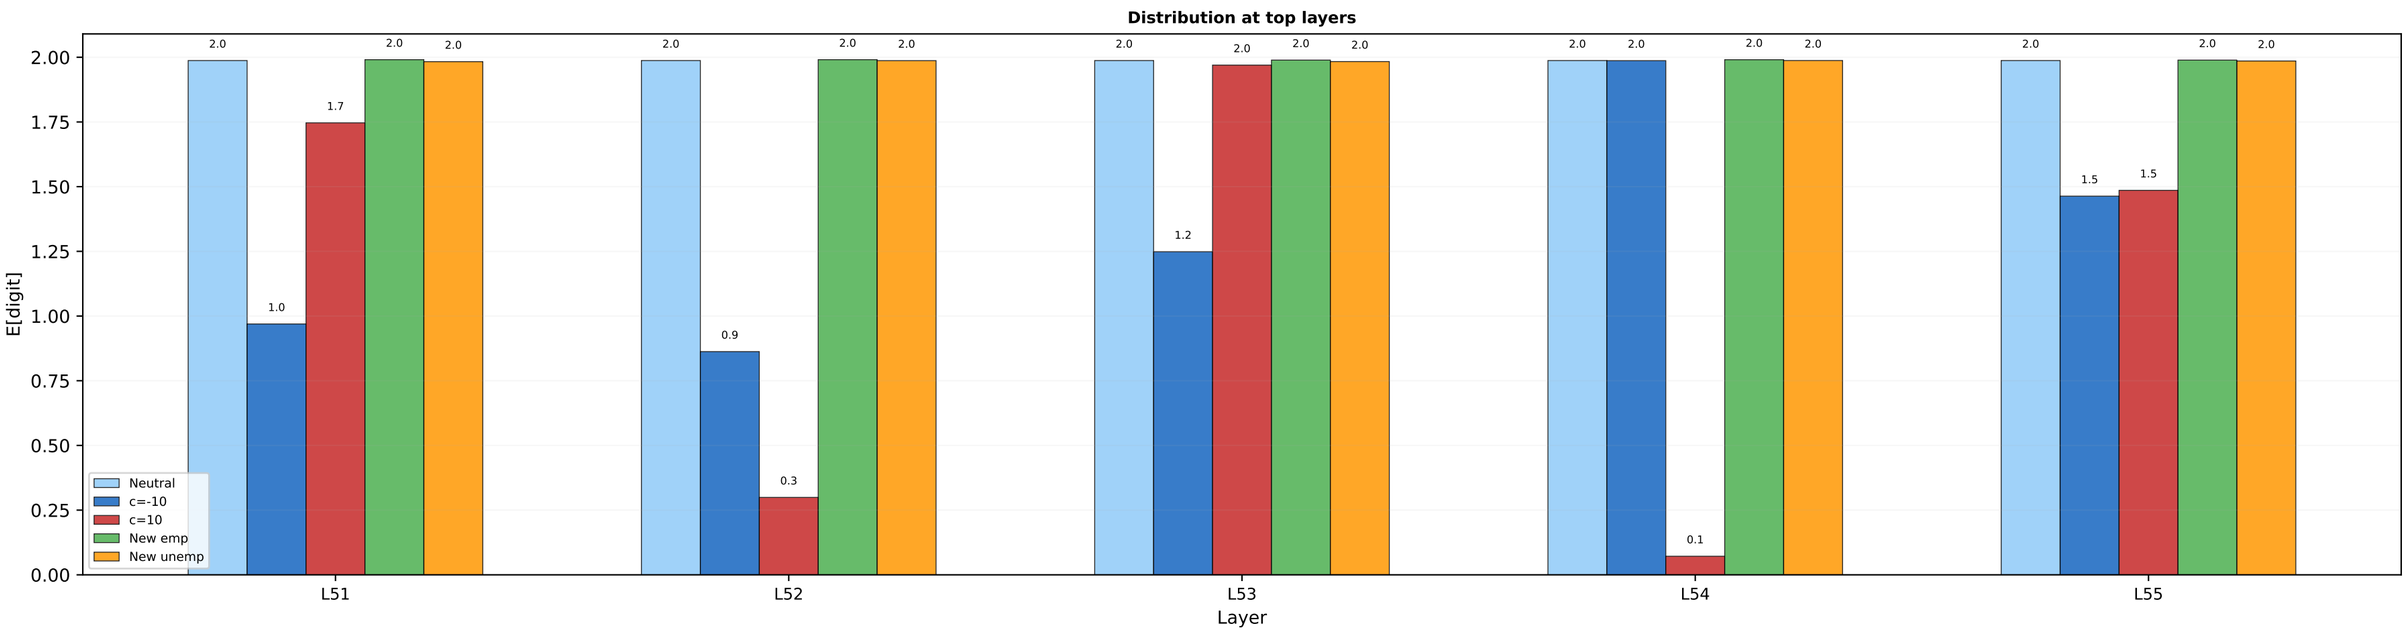


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at home between 8 AM and 6 PM on a Tuesday? ___ |

E4: Daytime hours at home (Tue) | V7/cfg4

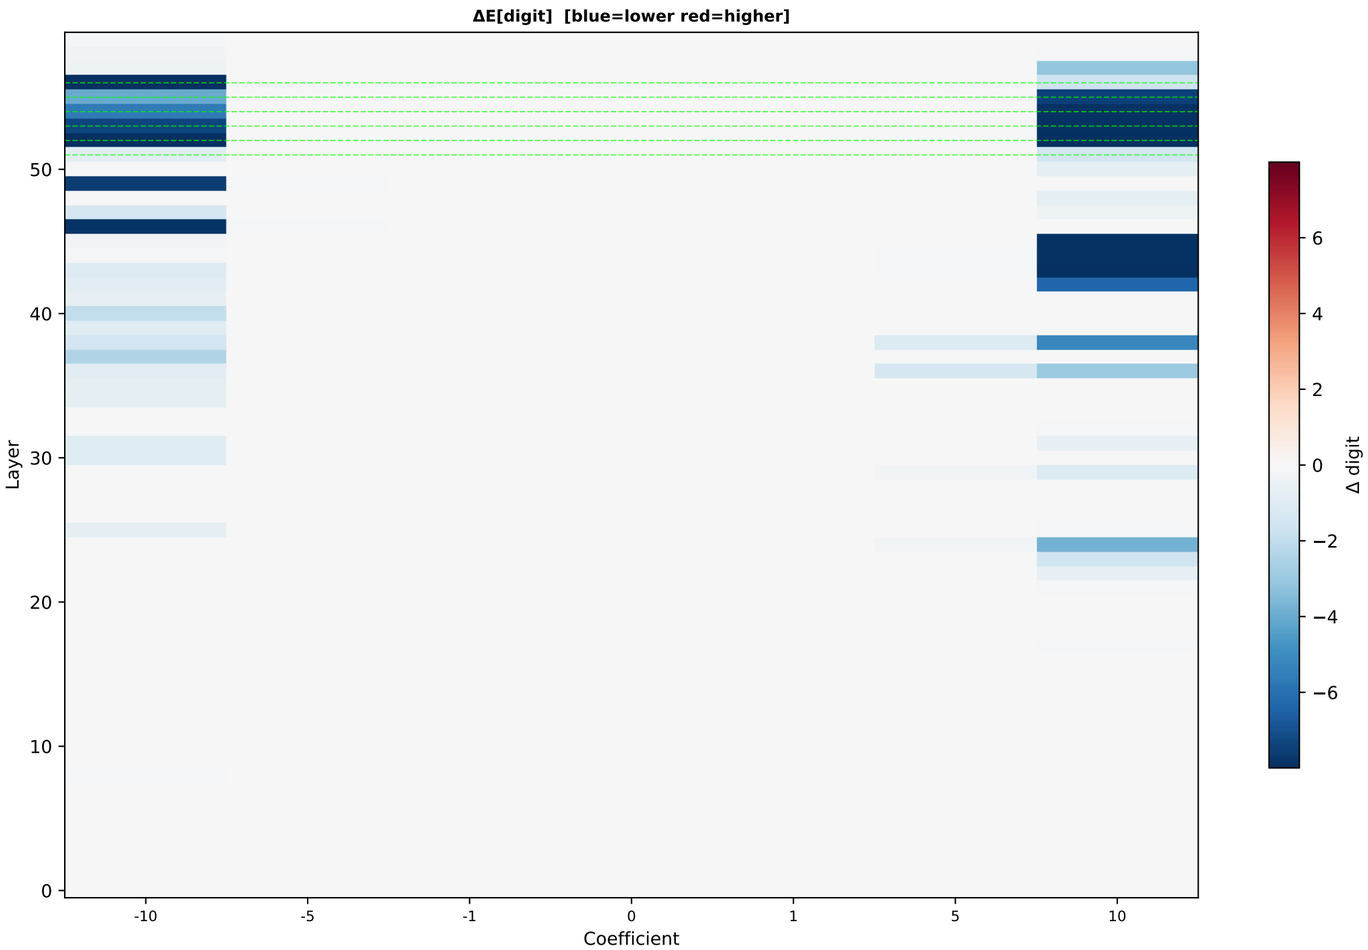


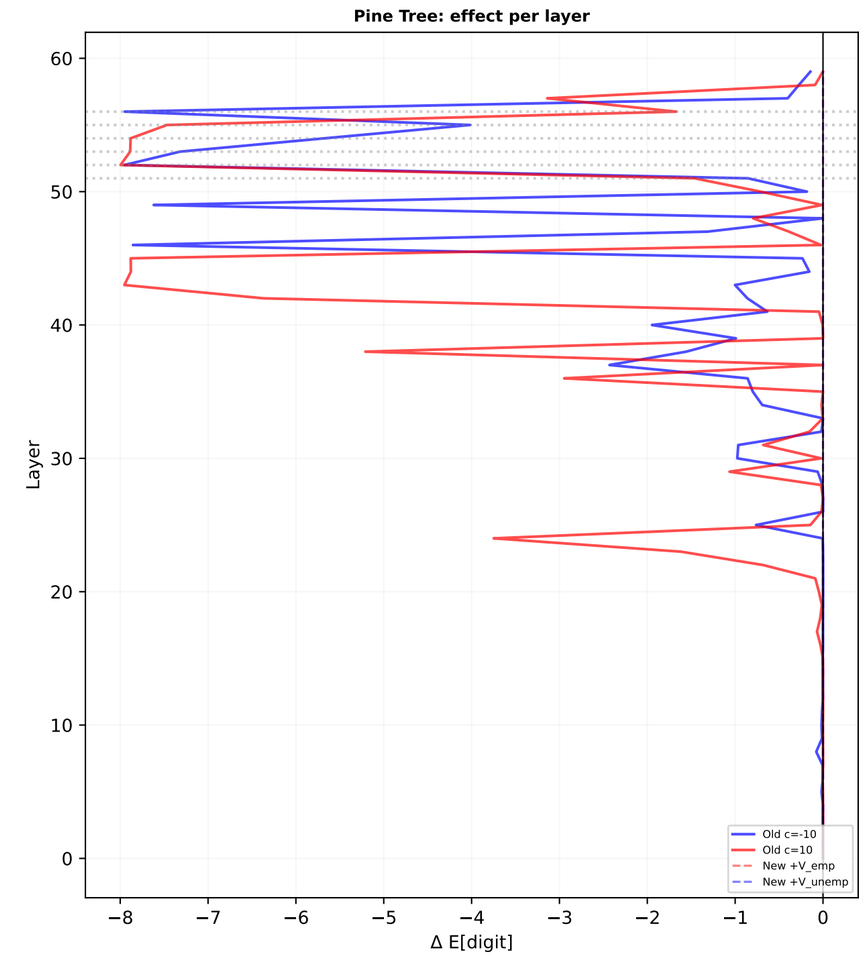


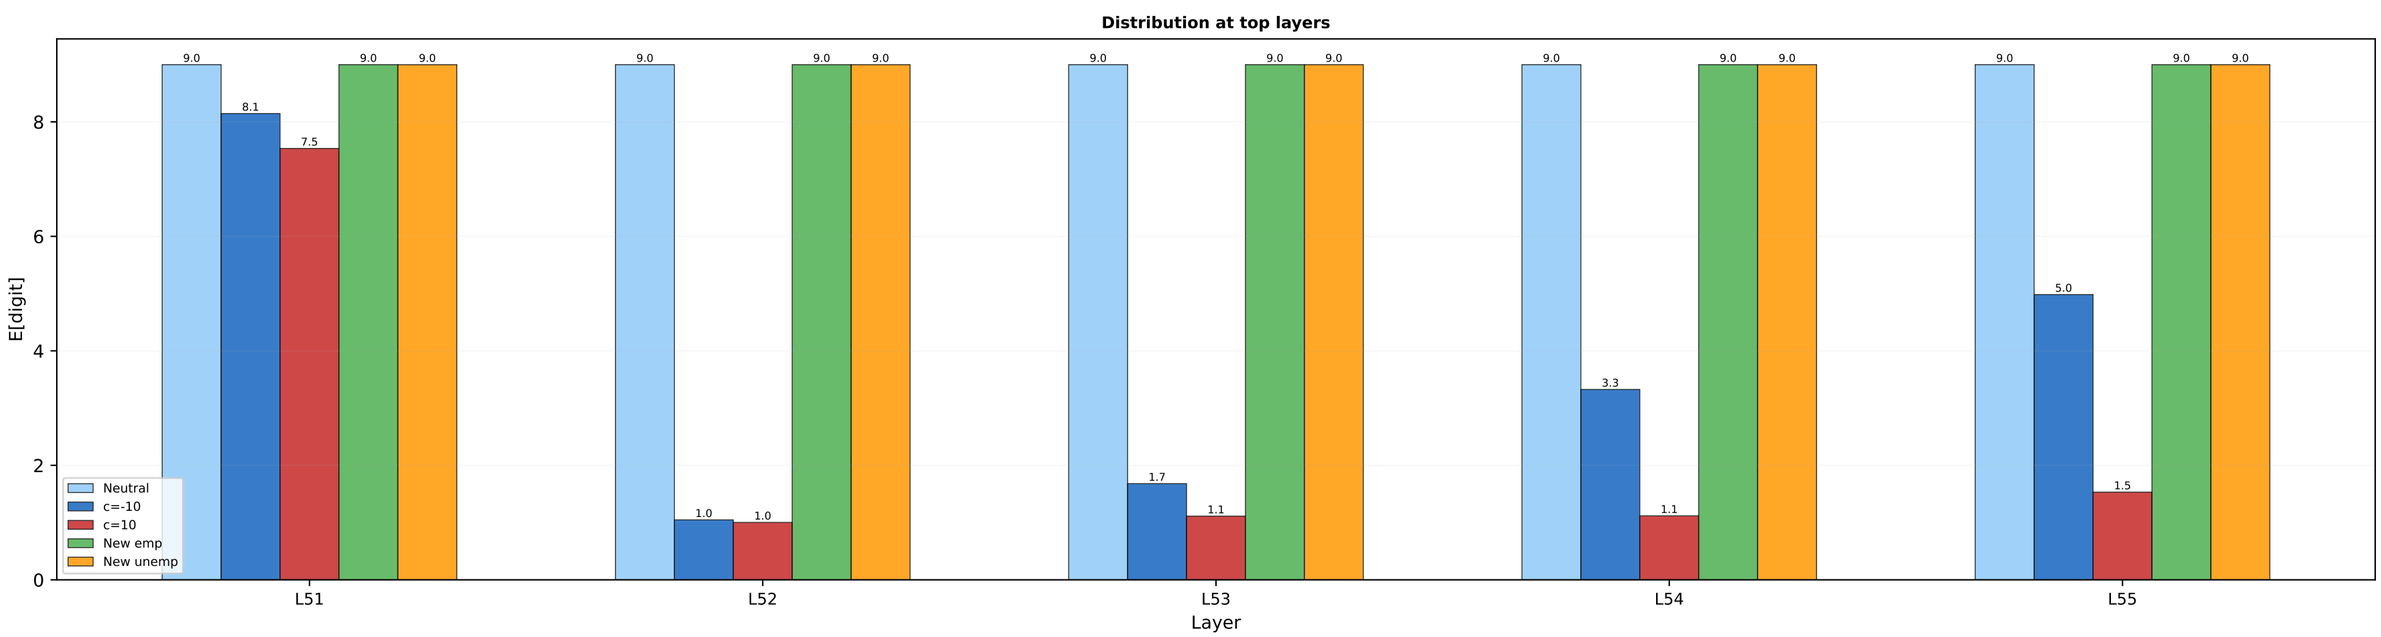


E5: Longest stretch outside (Tue) | V7/cfg4

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours a typical adult spends outside the home on a Tuesday? ___ |

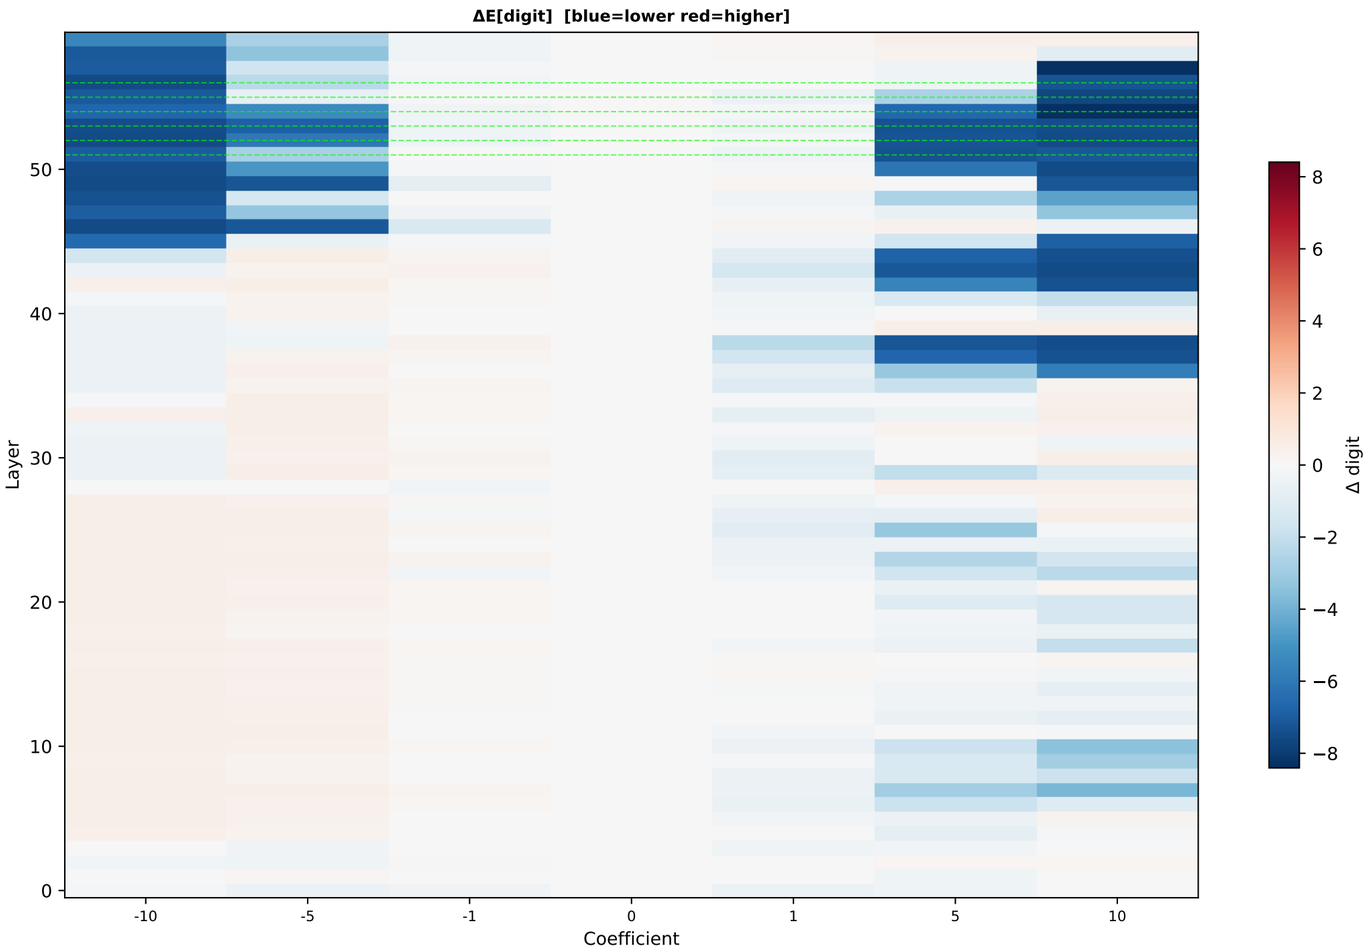


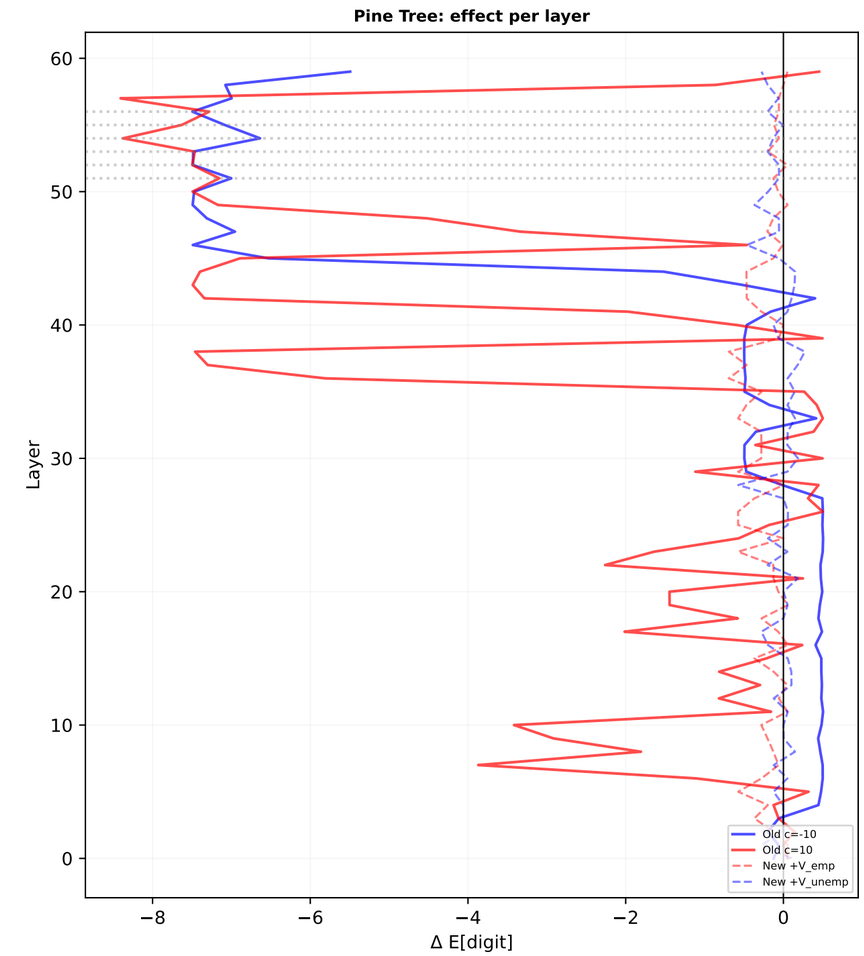


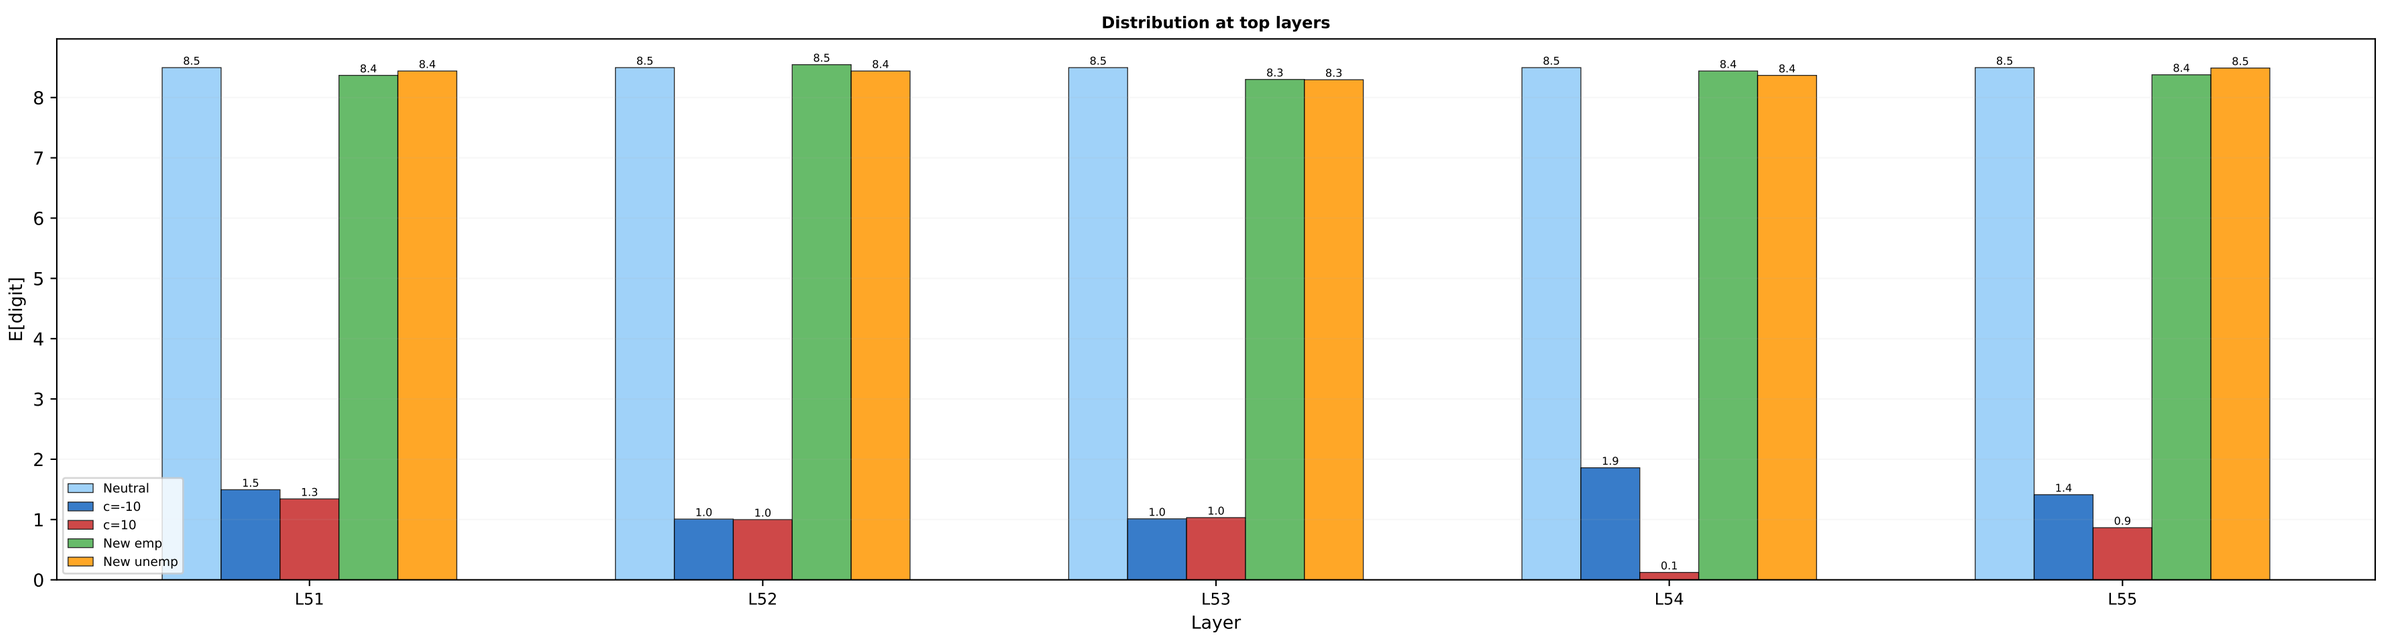


Answer with a single digit from 0 to 9. | How many total hours is a typical adult away from home on a Tuesday? ___ |

E6: Total hours away (Tue) | V7/cfg4

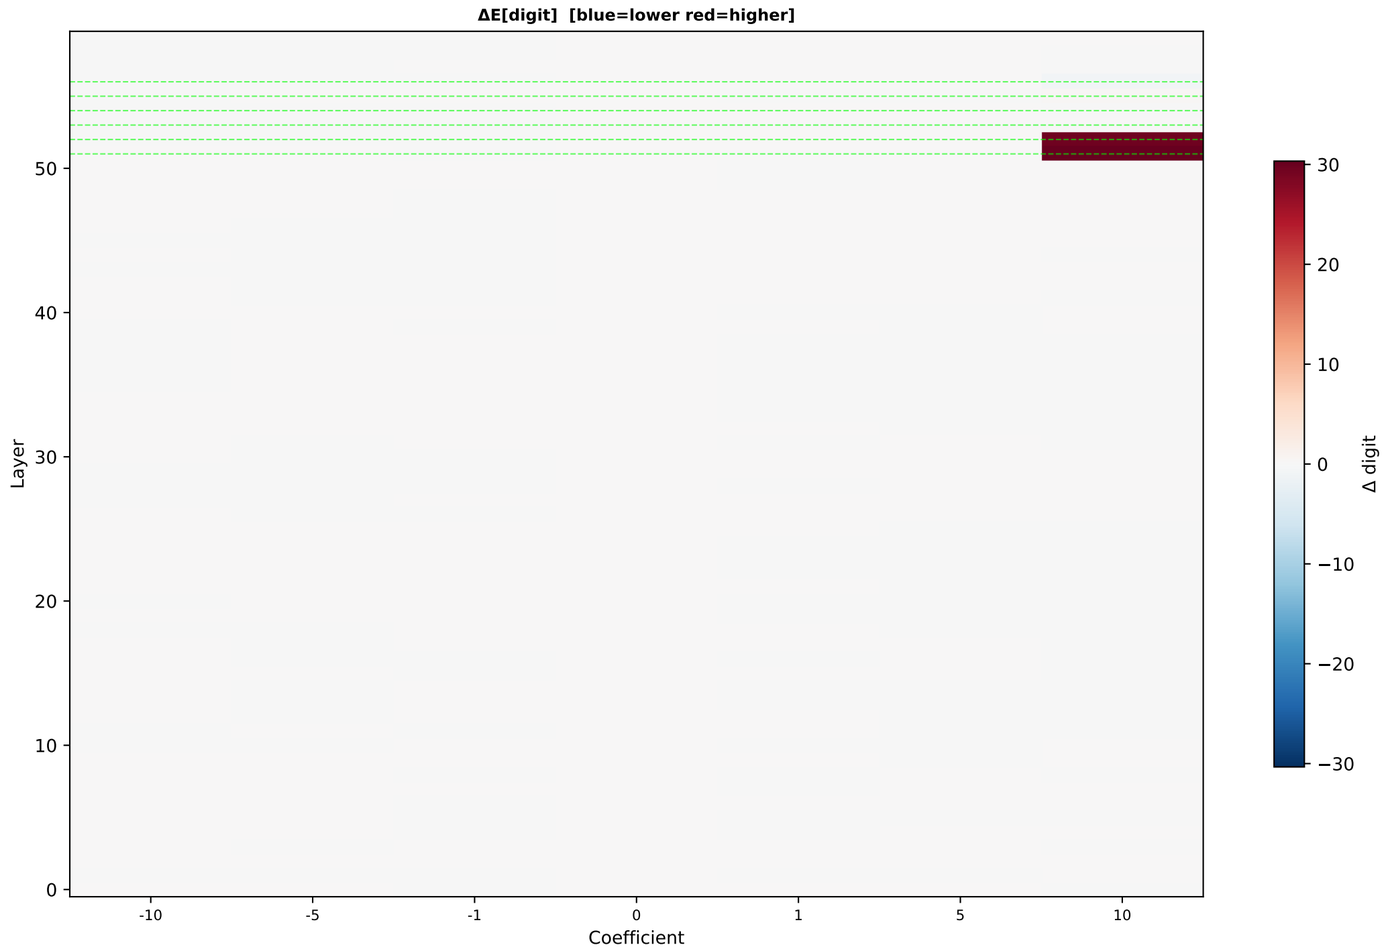


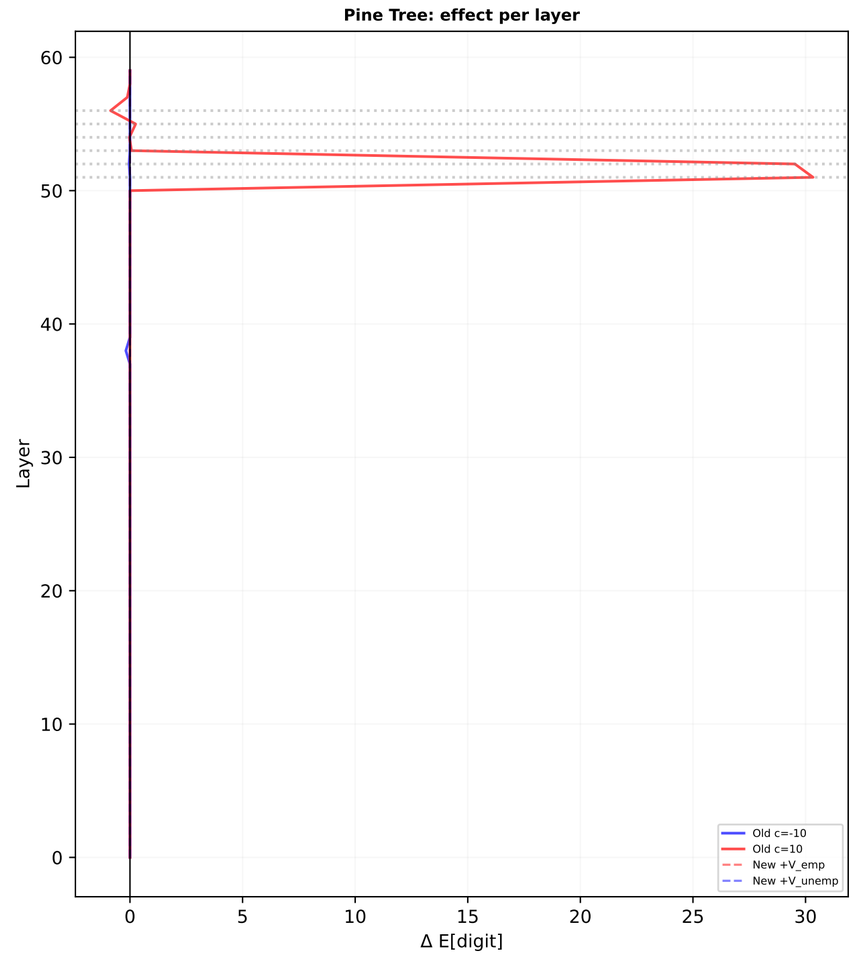


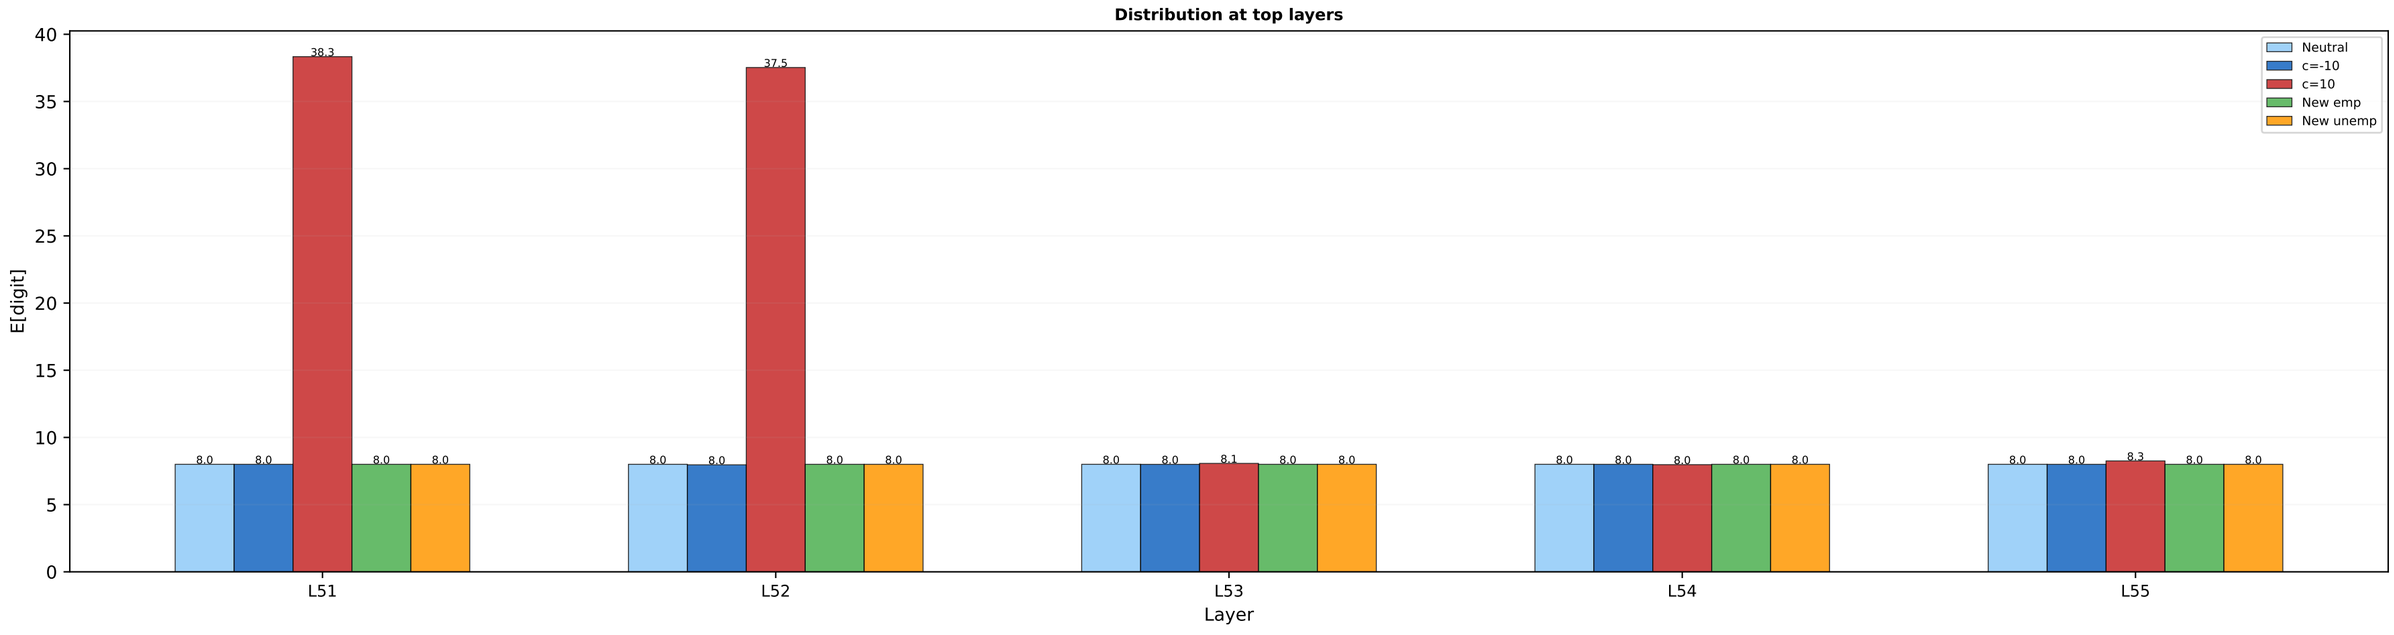


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at their most frequently visited non-home location on a Tuesday? ___ |

E7: Hours at primary non-home location (Tue) | V7/cfg4

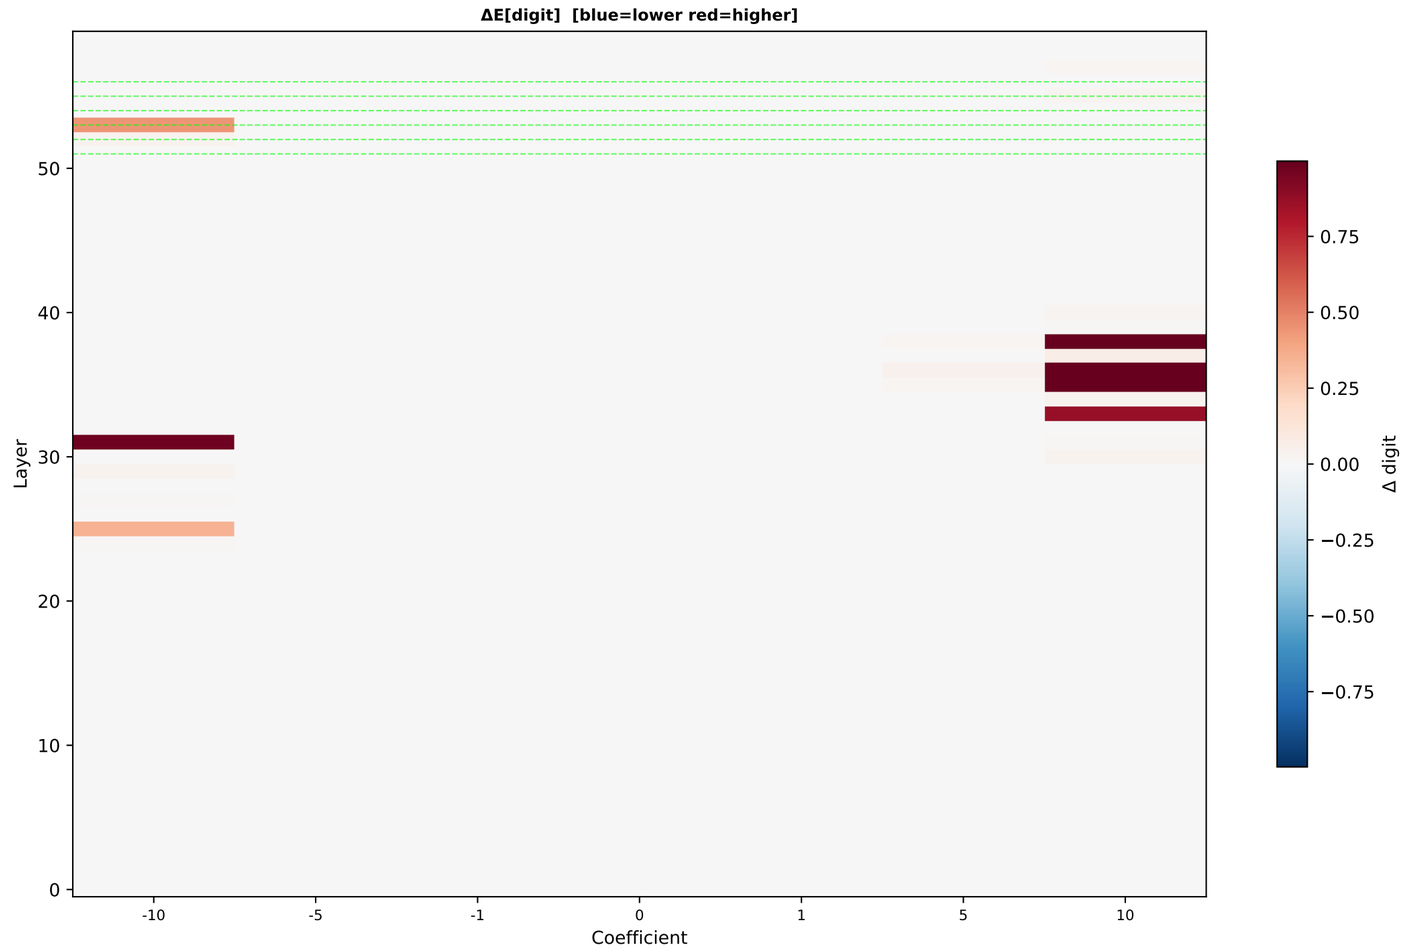


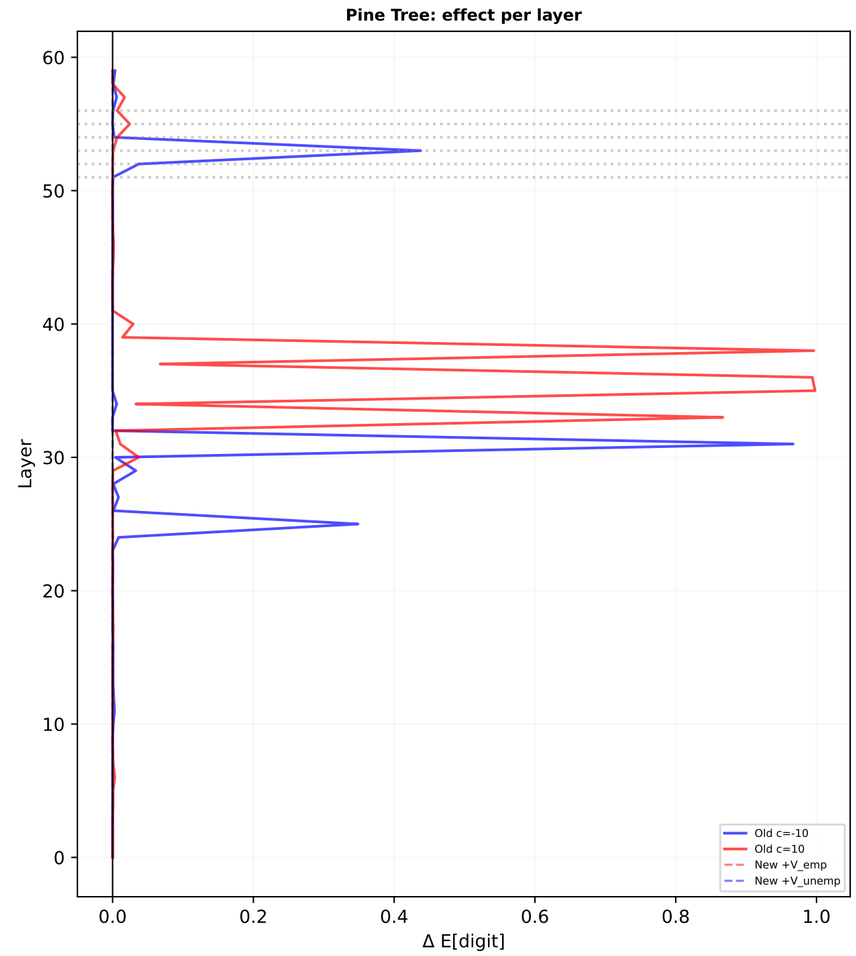


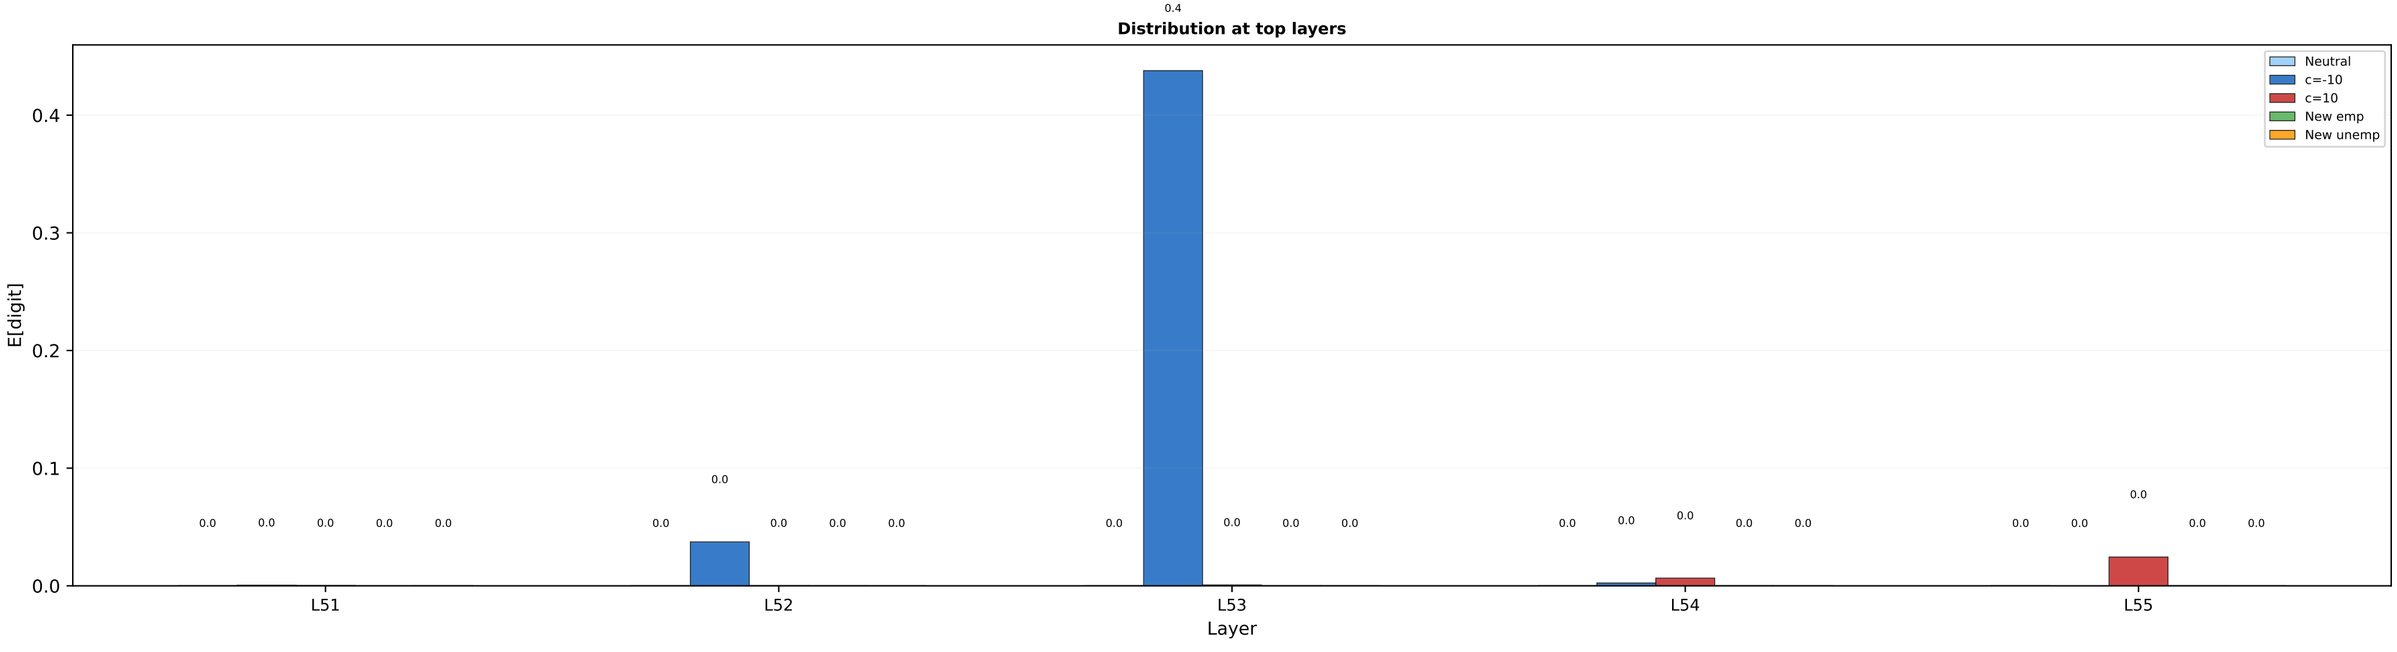


Answer with a single digit from 0 to 9. | How many times does a typical adult return home during the daytime (8 AM to 6 PM) on a Tuesday? ___ |

E8: Daytime home returns (Tue) | V7/cfg4

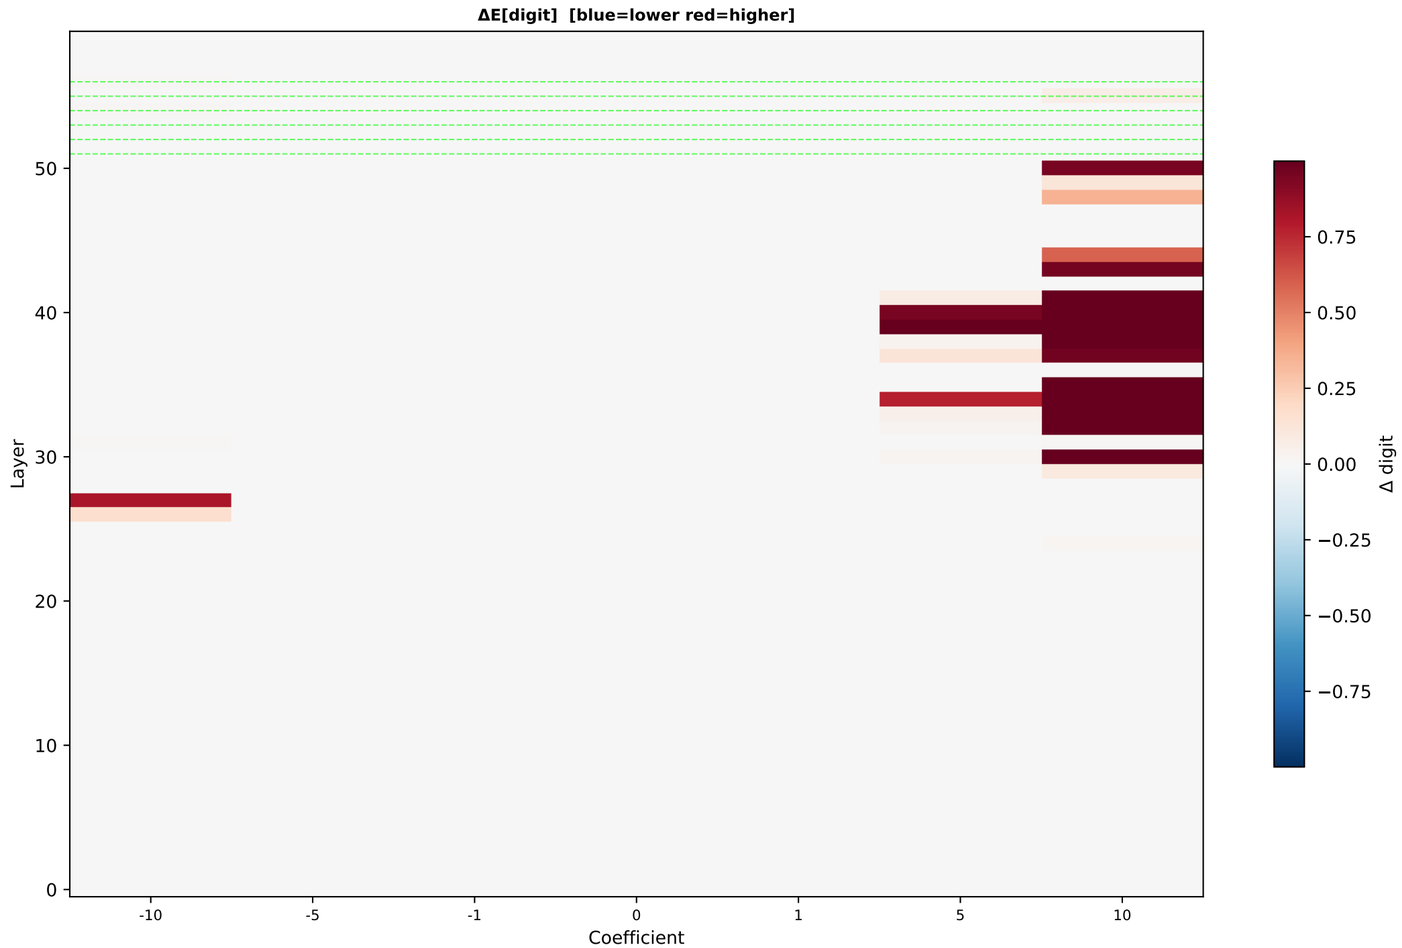


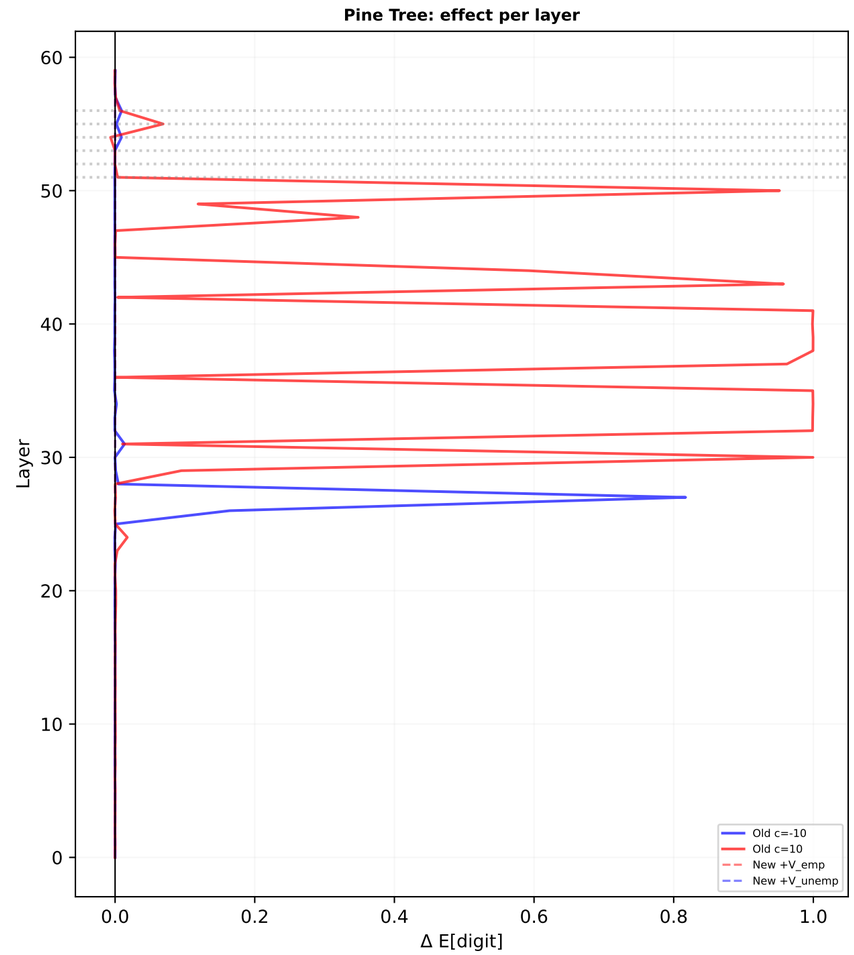


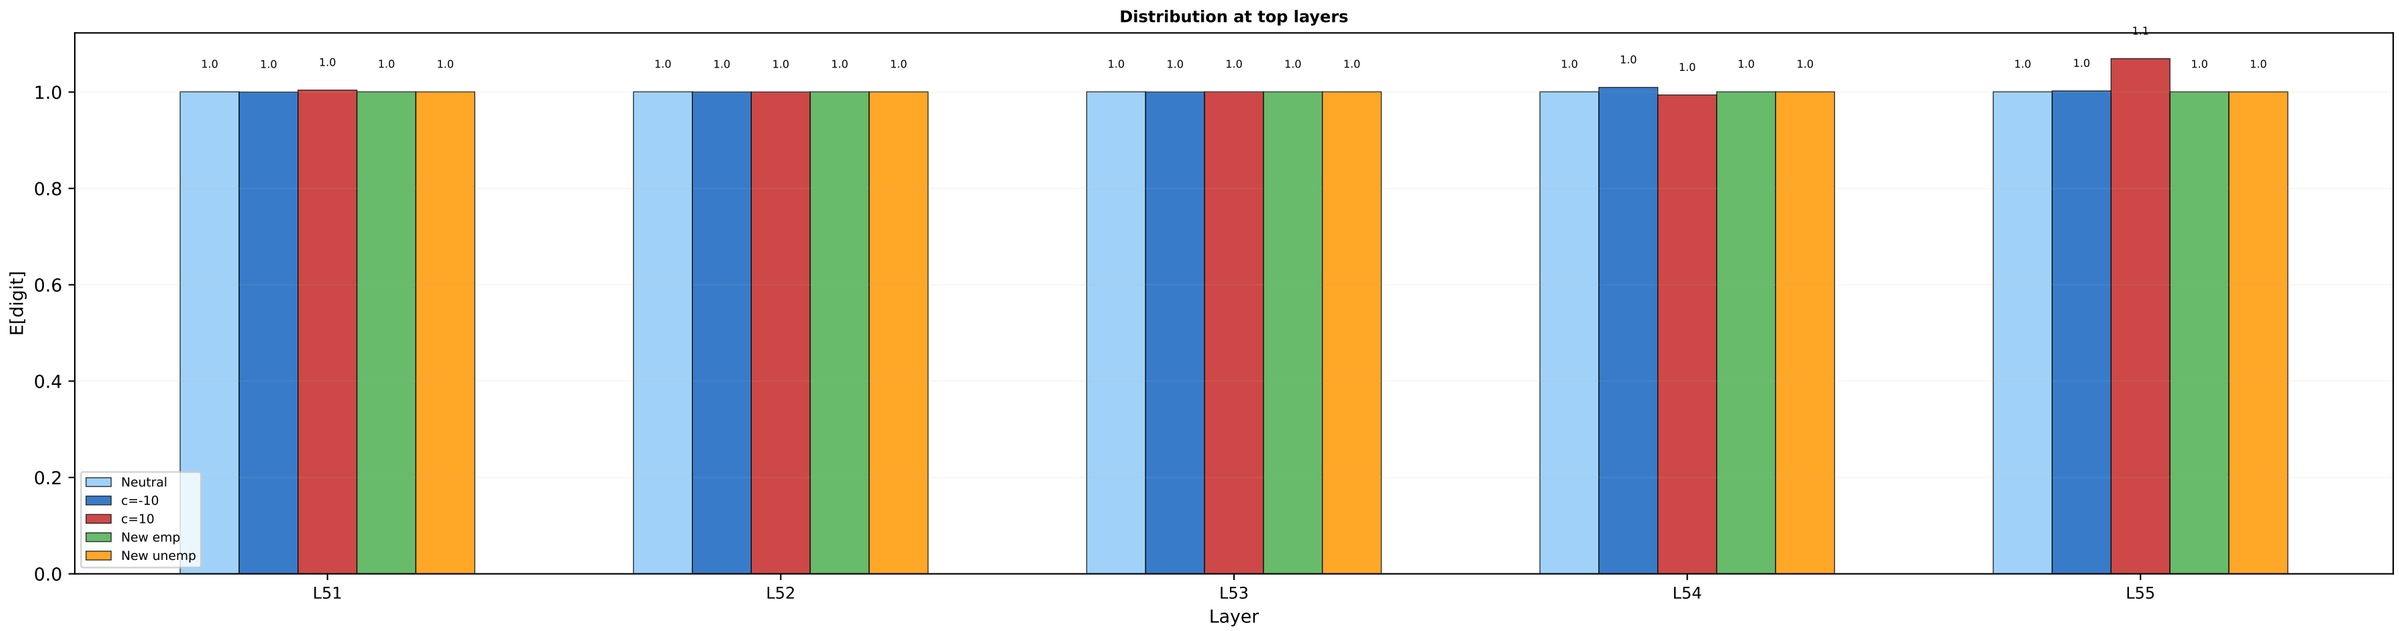


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend commuting or in transit on a Tuesday? ___ |

E9: Commute/transit hours (Tue) | V7/cfg4

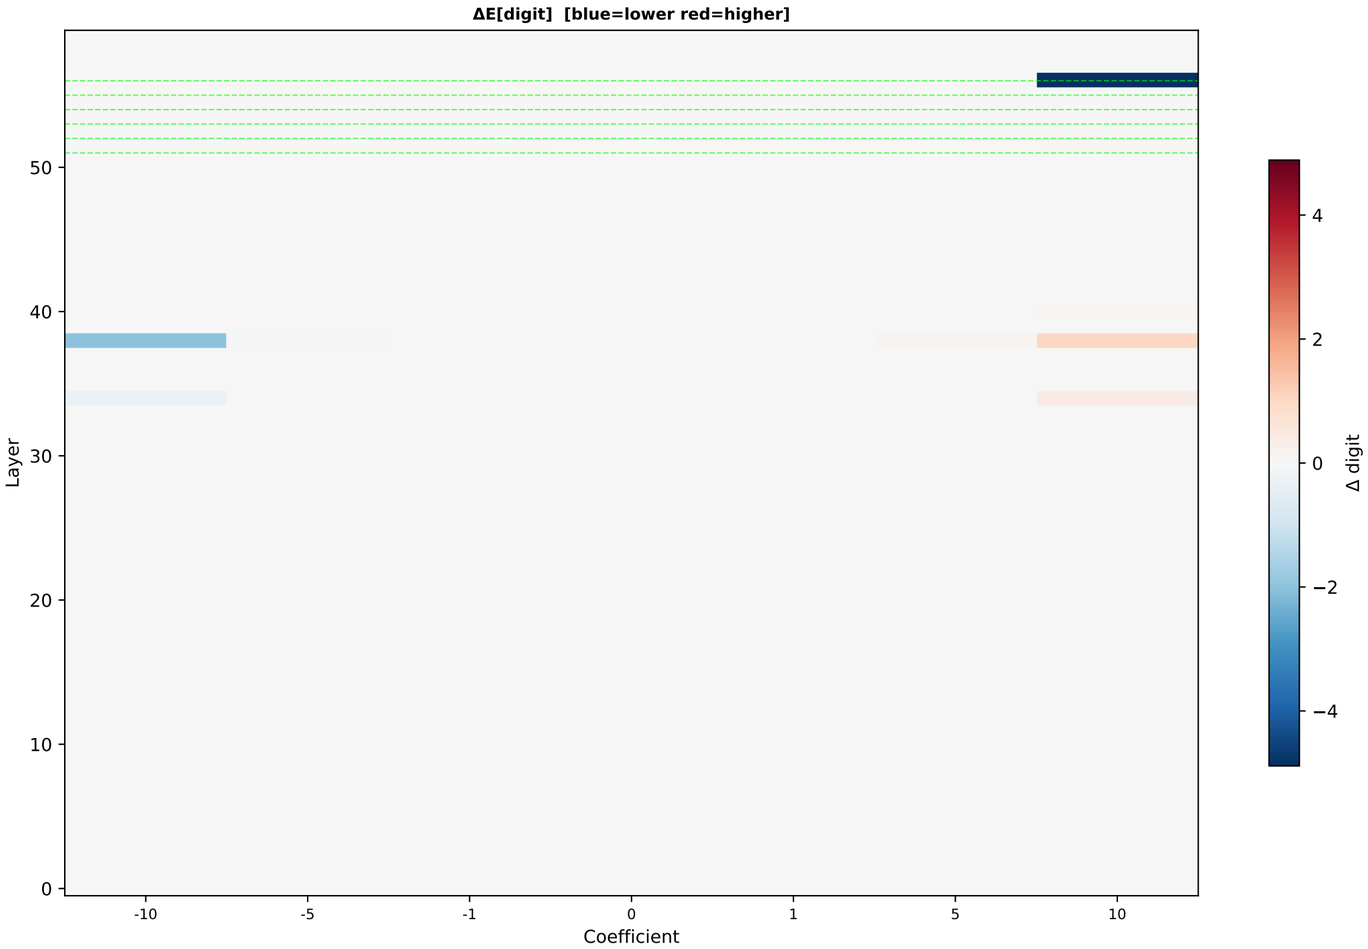


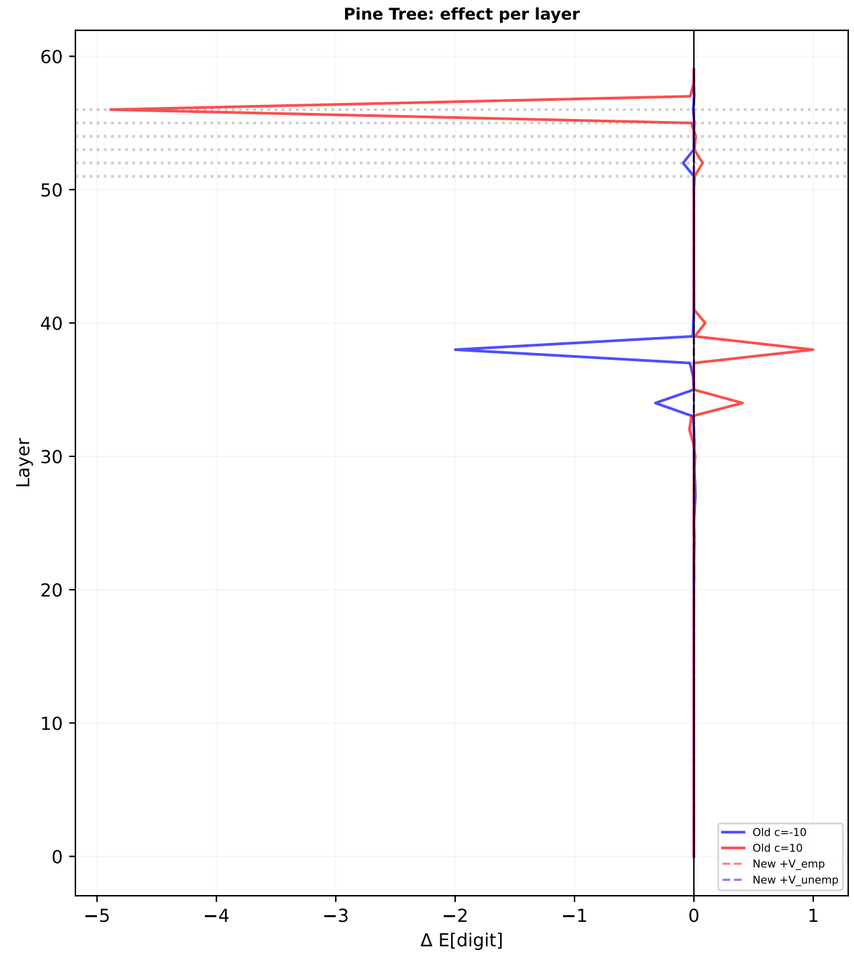


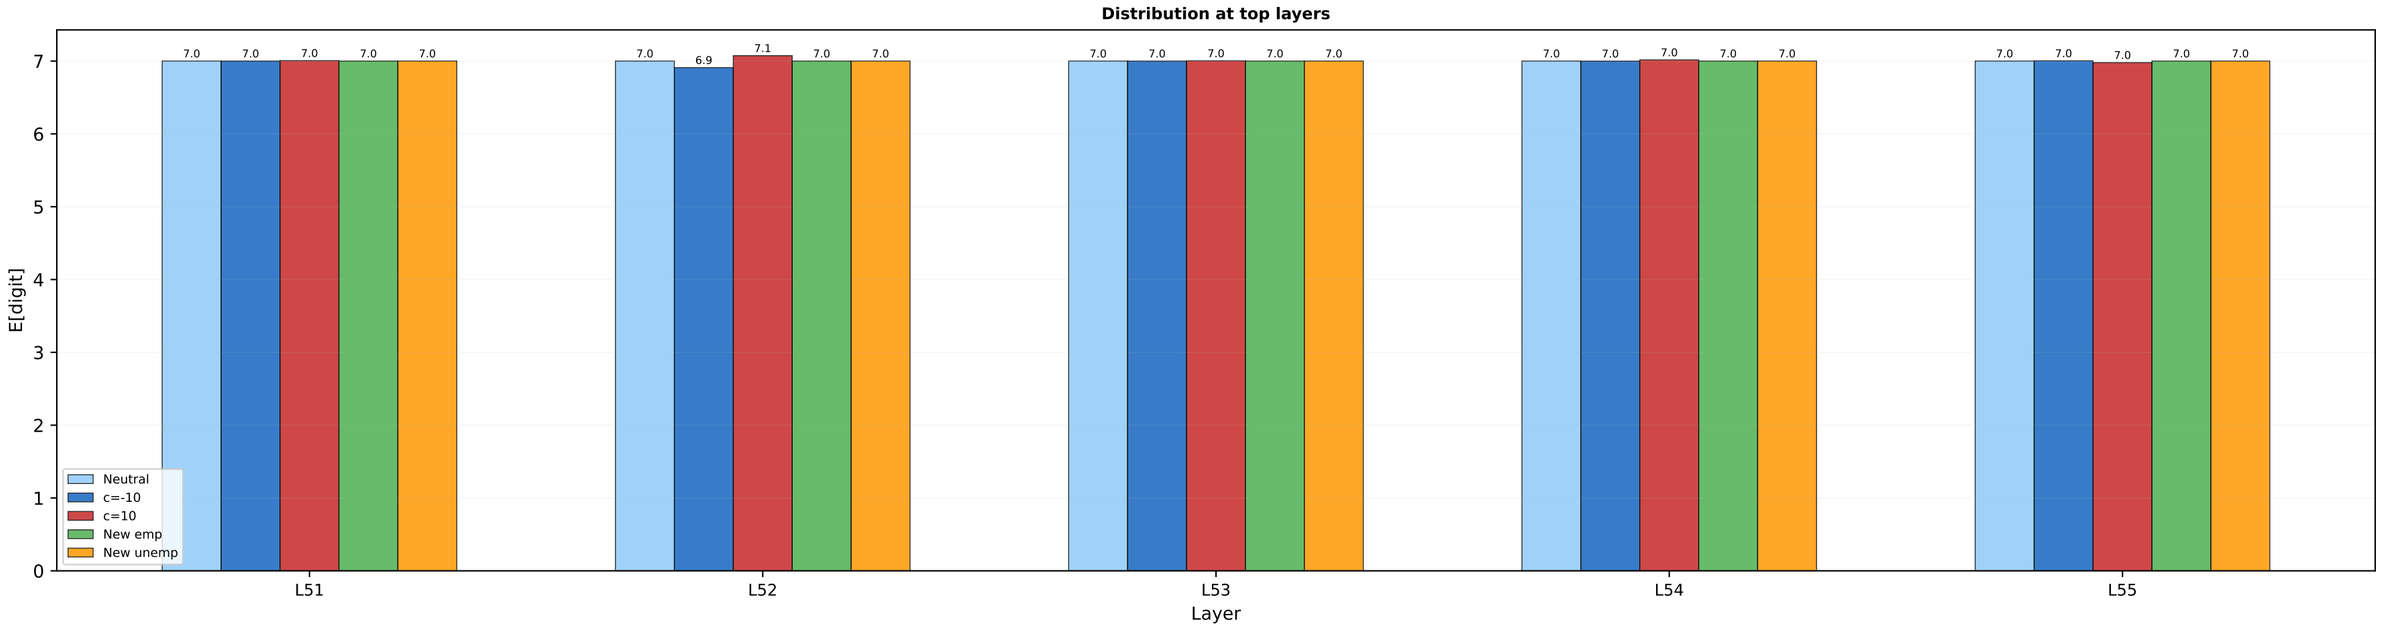


E10: Week-to-week consistency (Tue) | V7/cfg4

Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is a typical adult's Tuesday schedule from week to week? (0 = completely different, 9 = identical every week) ___ |

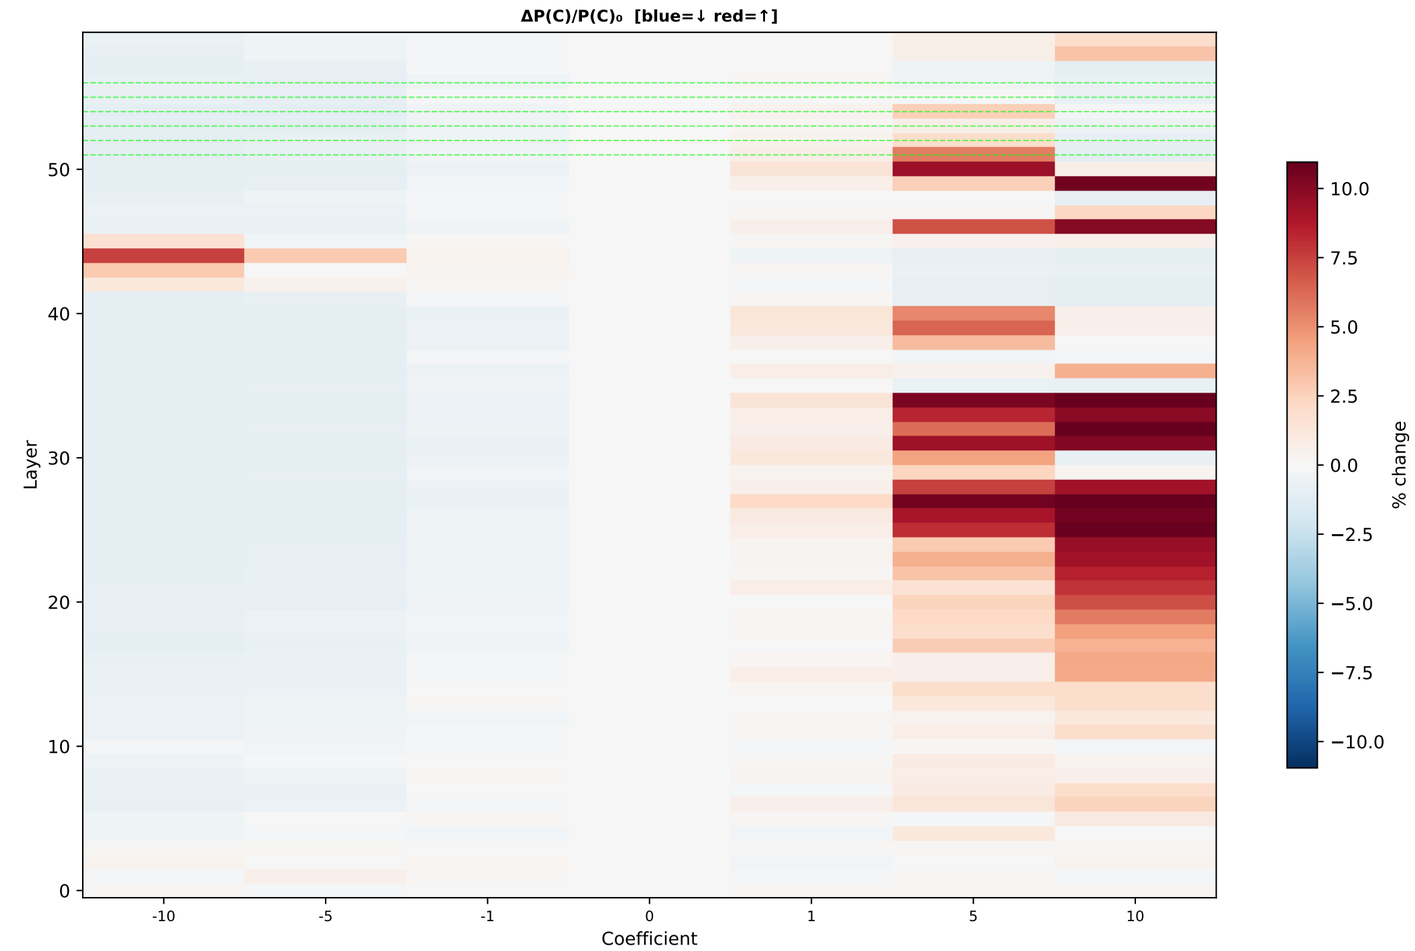


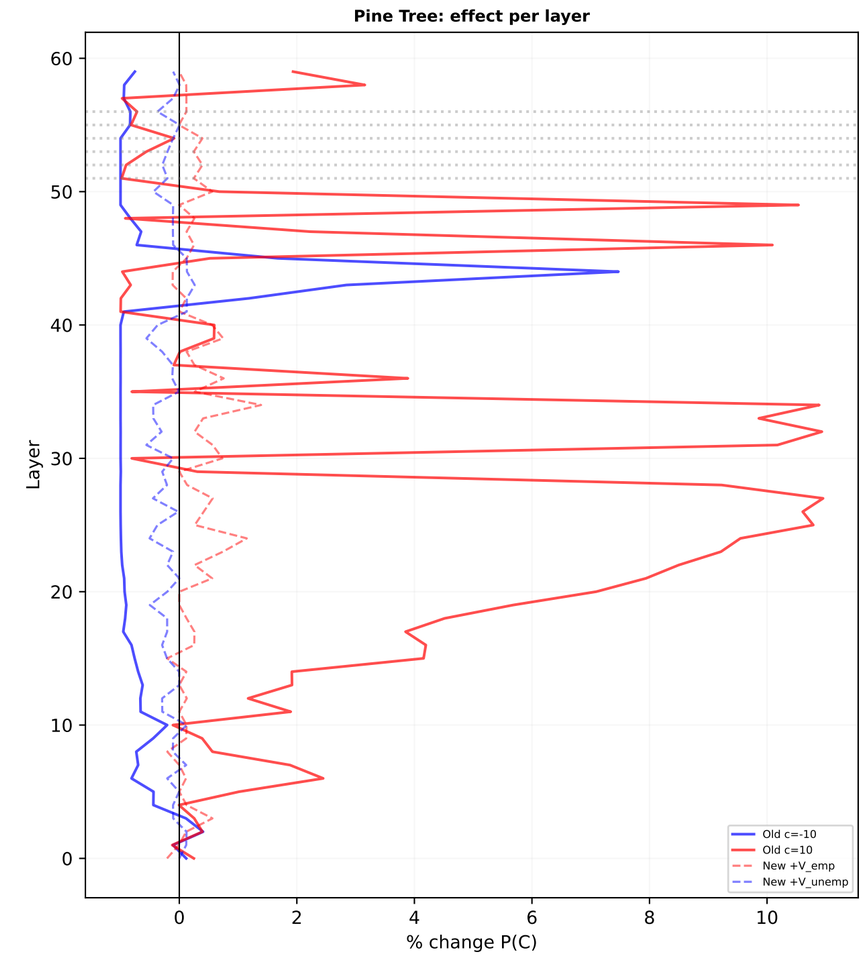


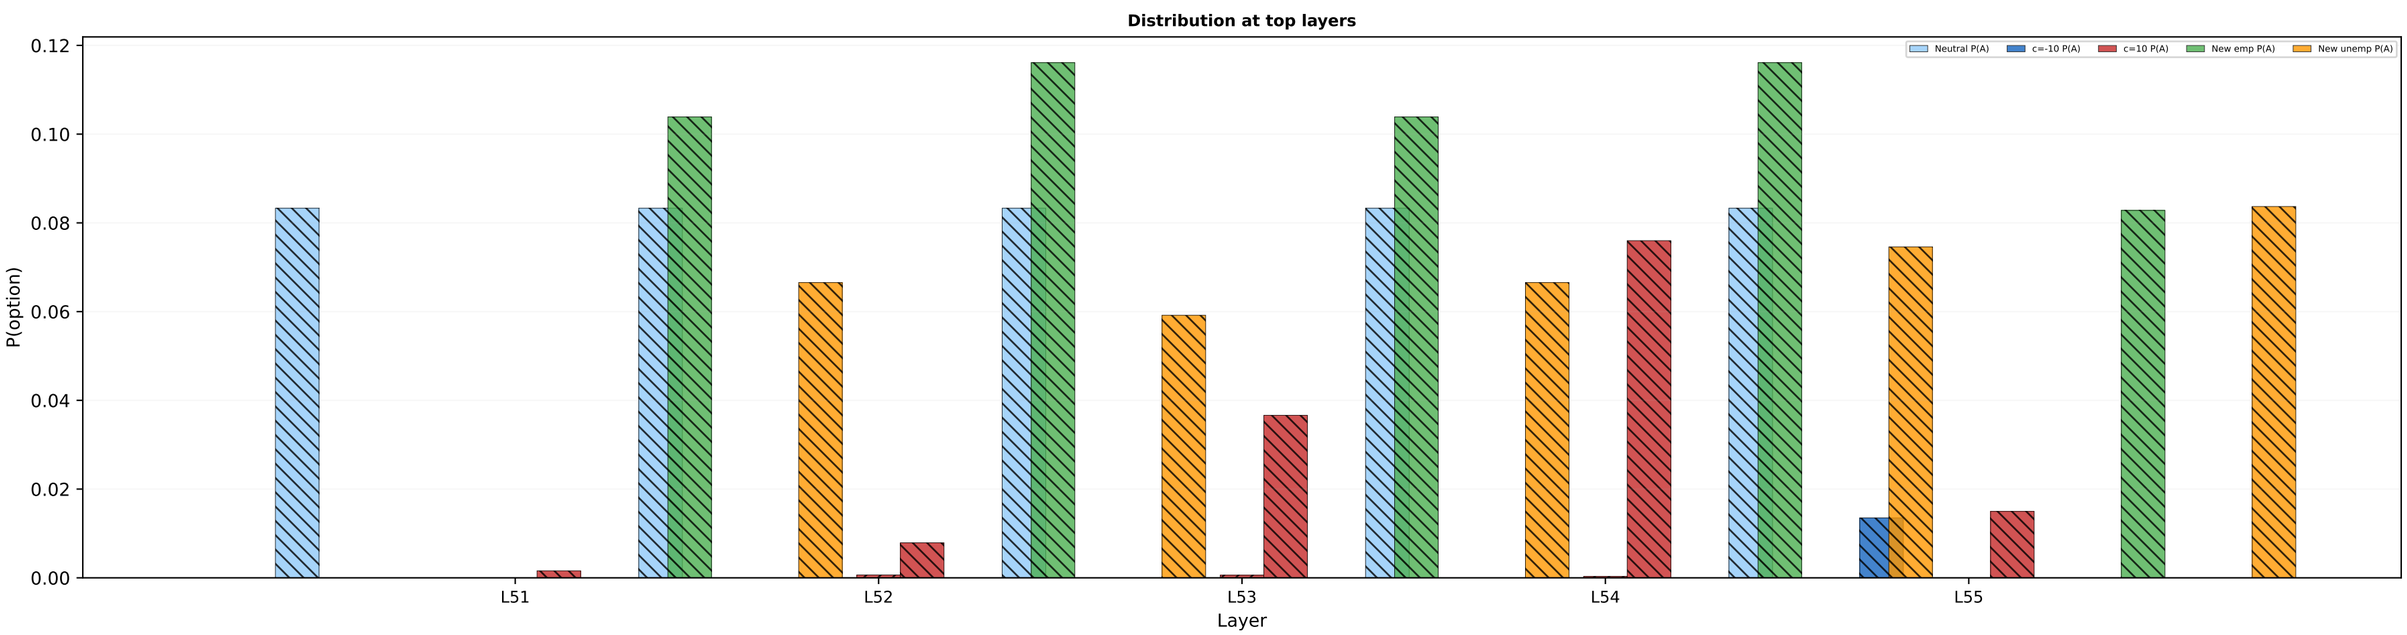


E11: 8 AM Tuesday status | V7/cfg4

```
At 8:00 AM on a Tuesday, a typical adult is most likely: | (A)
Still sleeping or just waking up | (B) Awake at home, starting
the day slowly | (C) Already out of the house or about to leave |
Answer: (
```

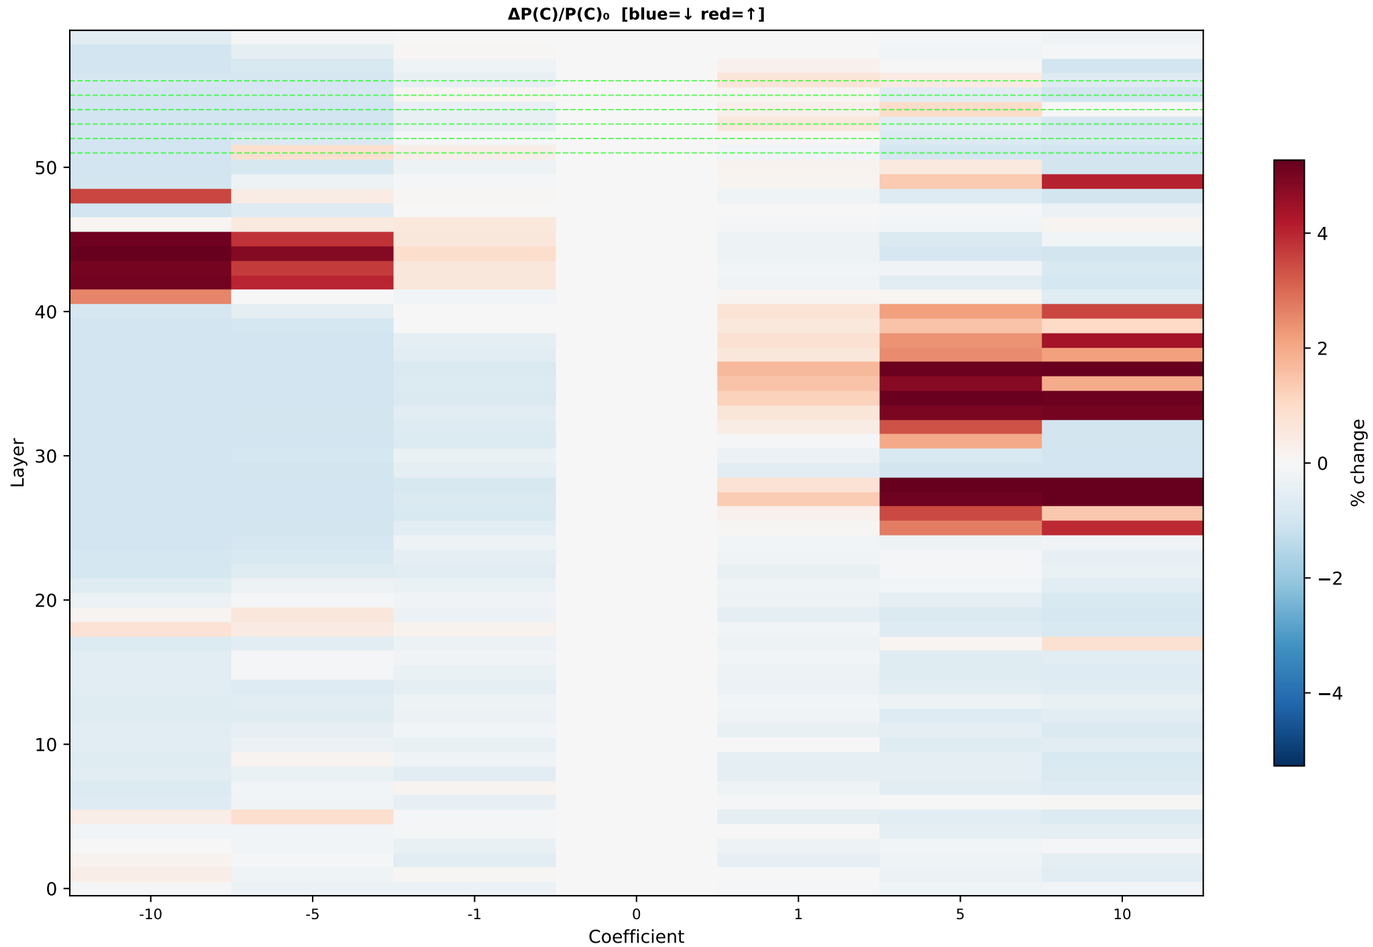


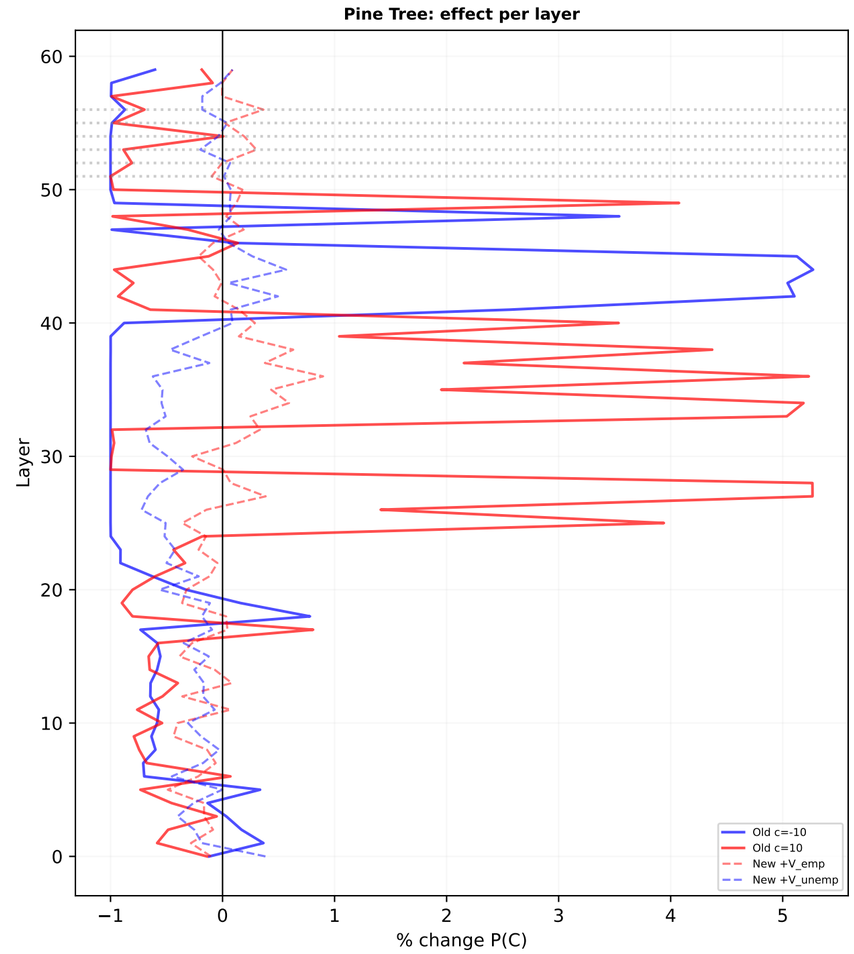


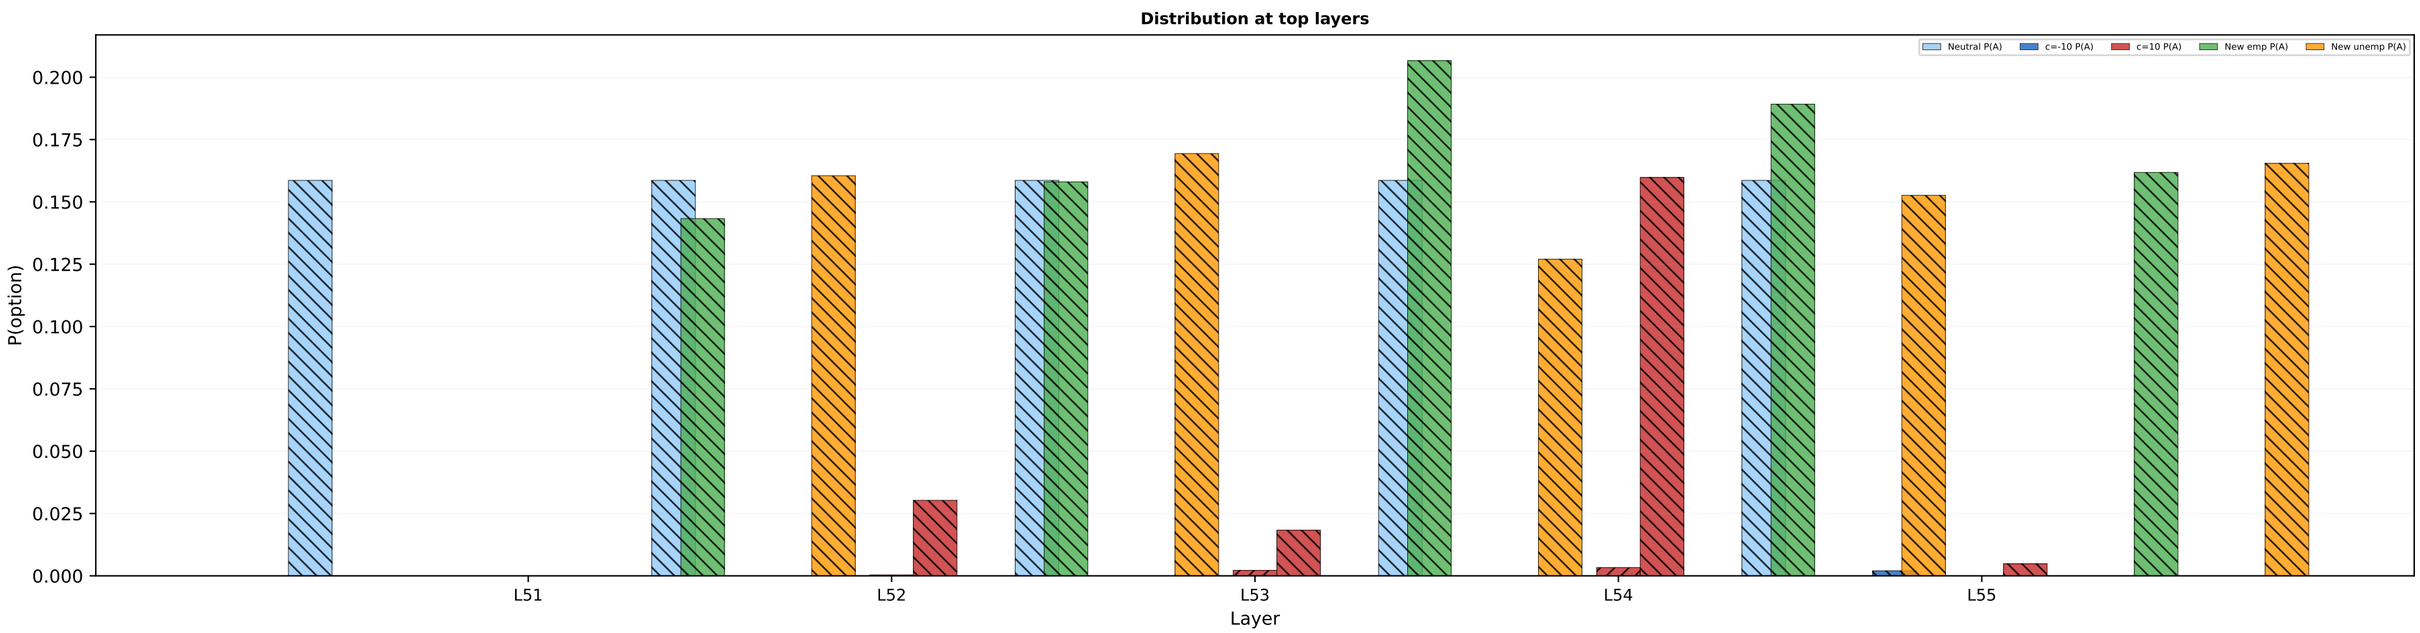


E12: 10:30 AM coffee availability | V7/cfg4

A typical adult is asked: "Are you usually free to meet for coffee at 10:30 AM on a Tuesday?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends on the week; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

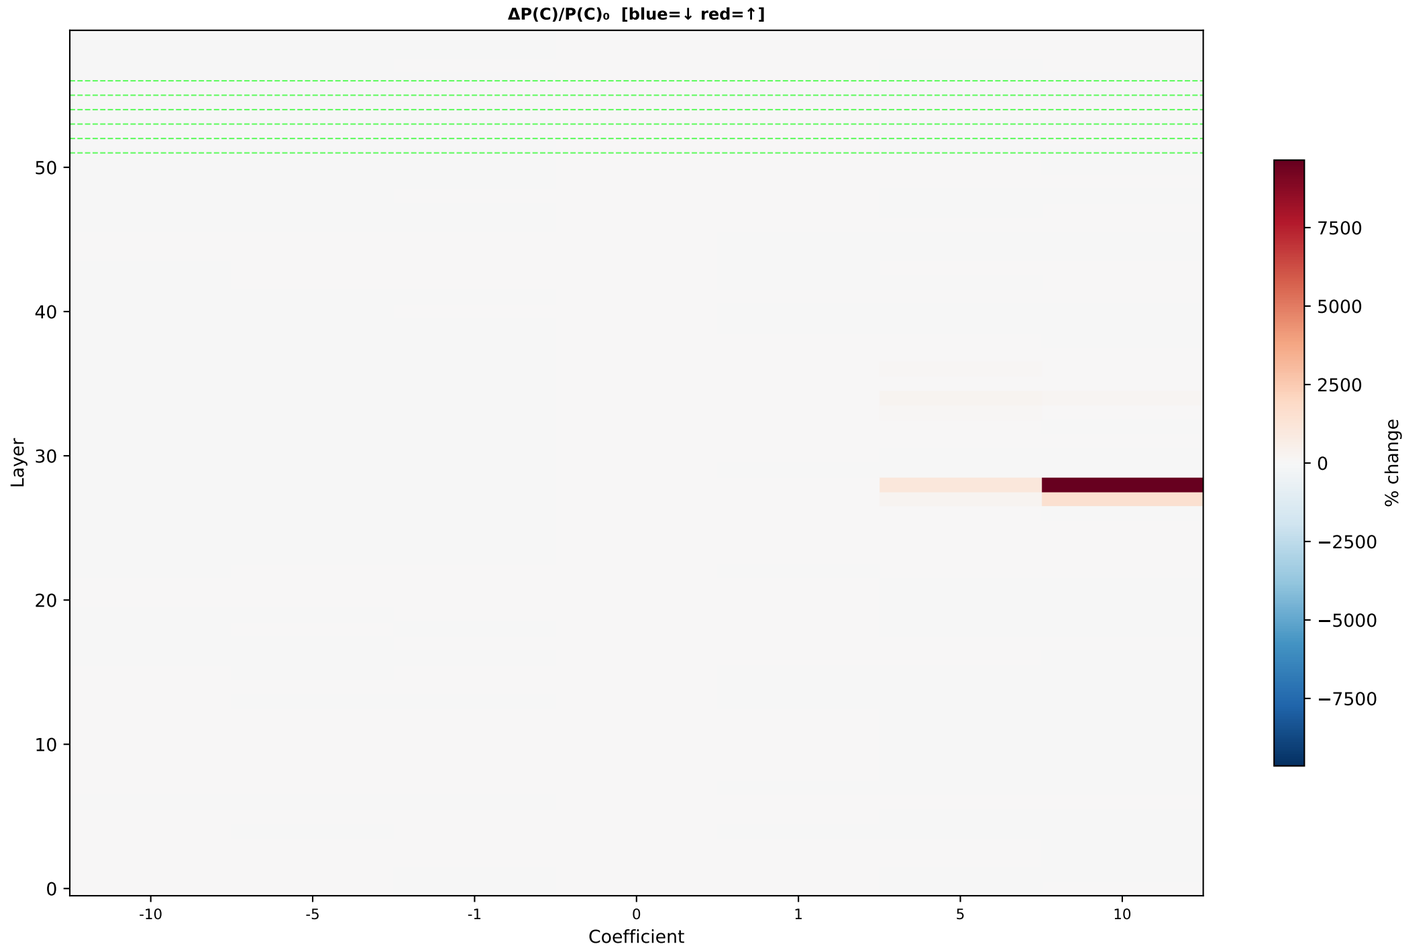


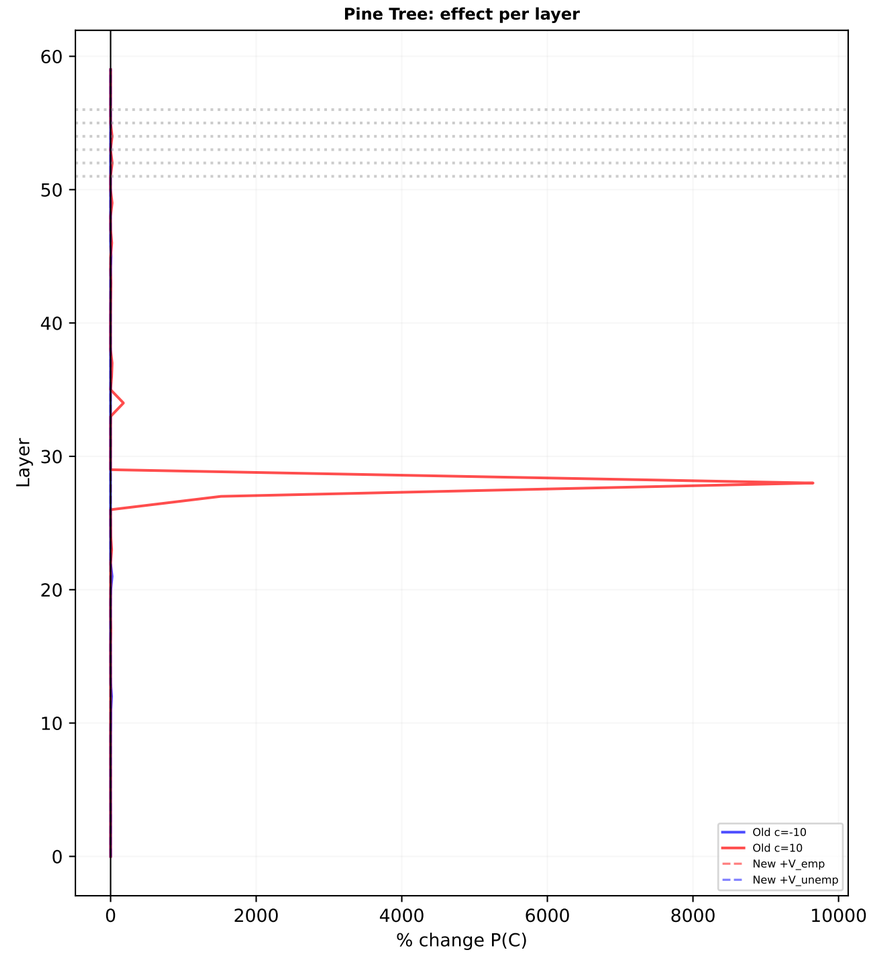


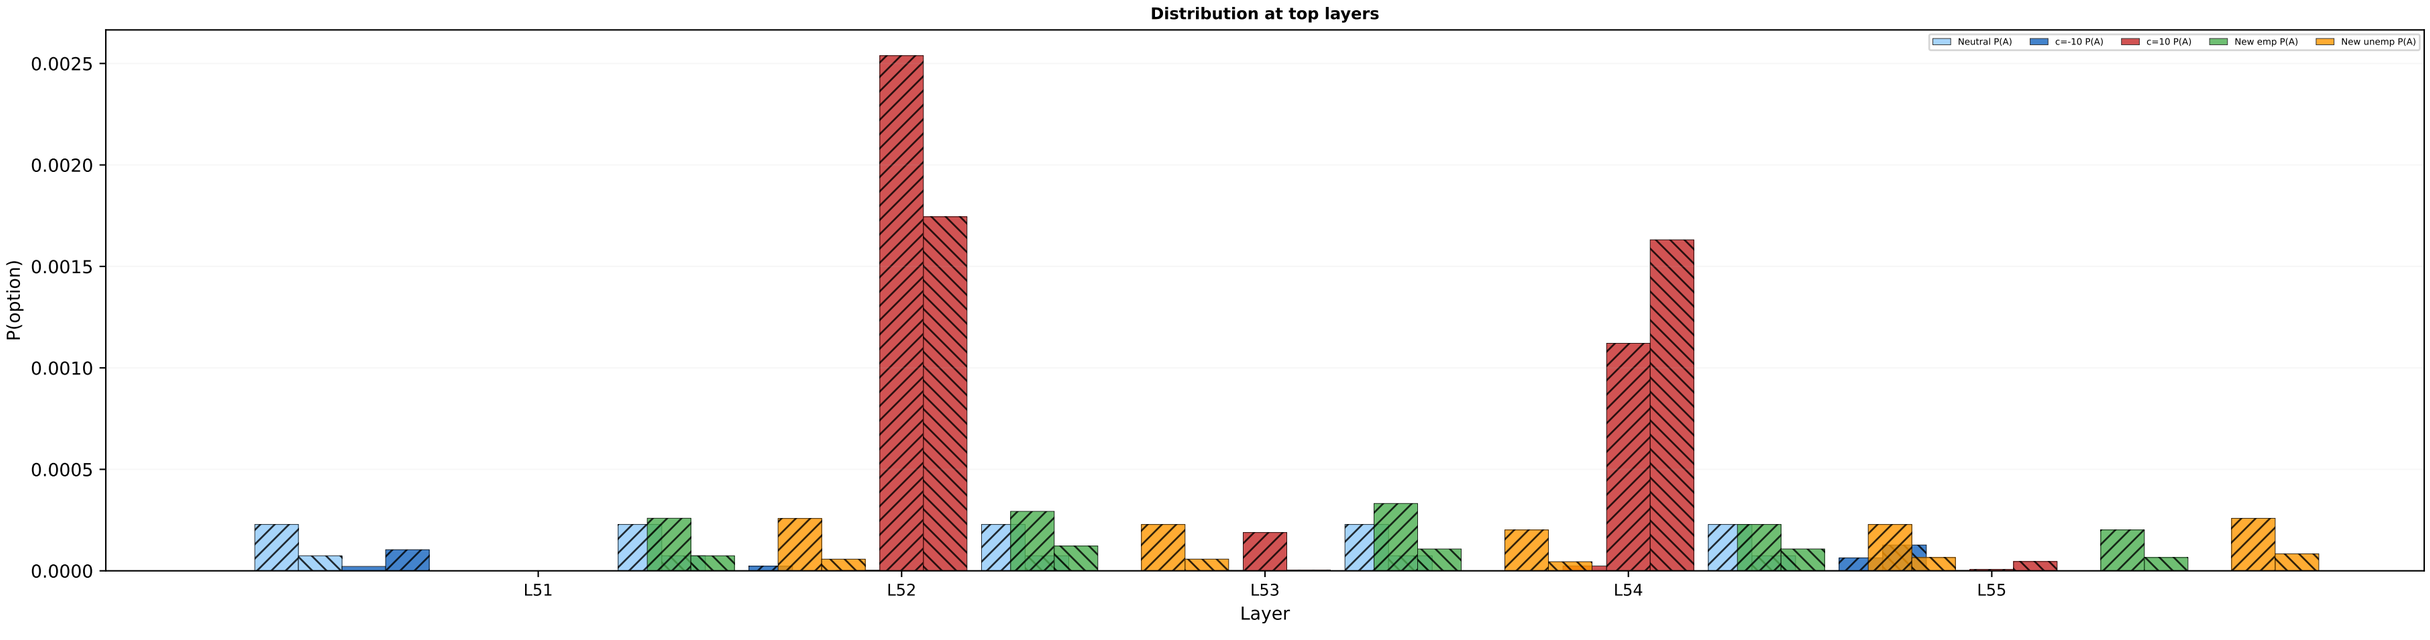


E13: Noon Tuesday availability | V7/cfg4

A typical adult is asked: "Can you meet me for lunch at noon on a Tuesday?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

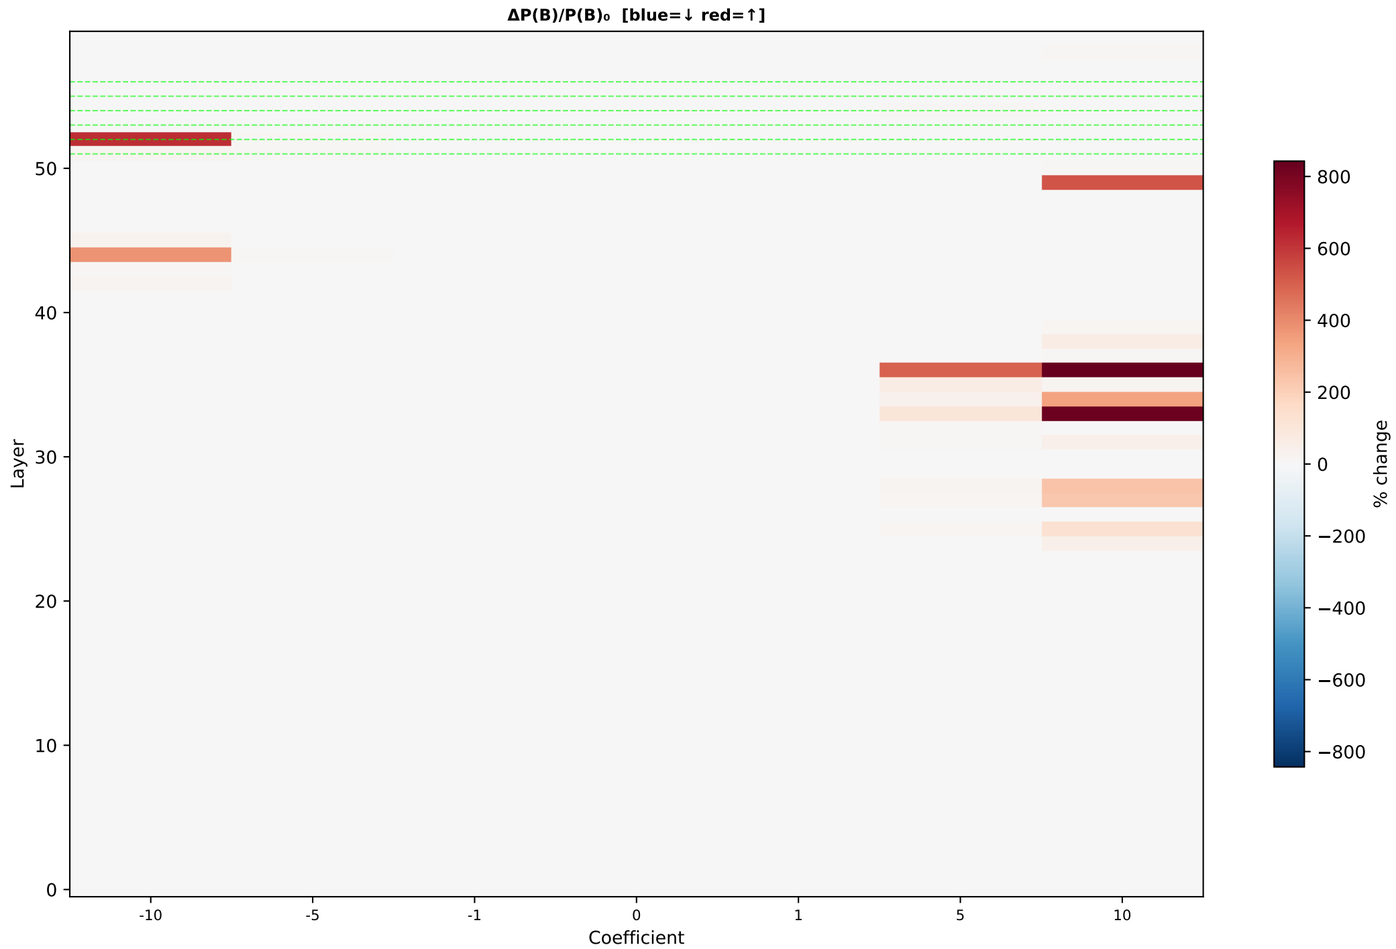


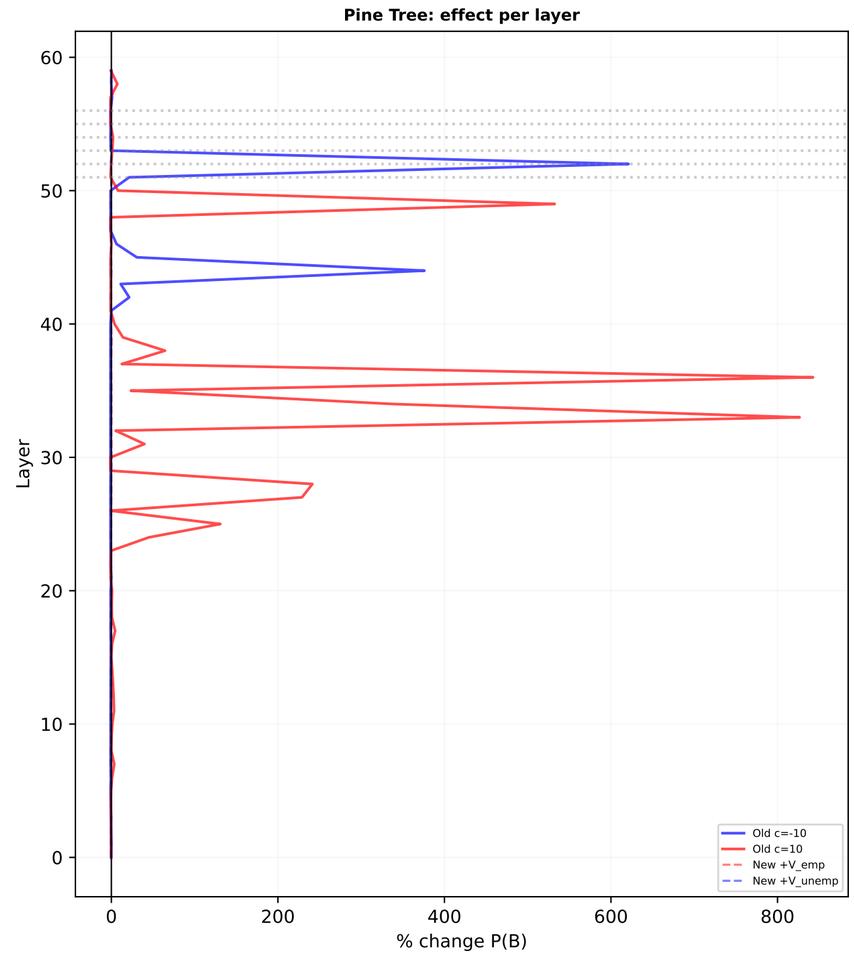


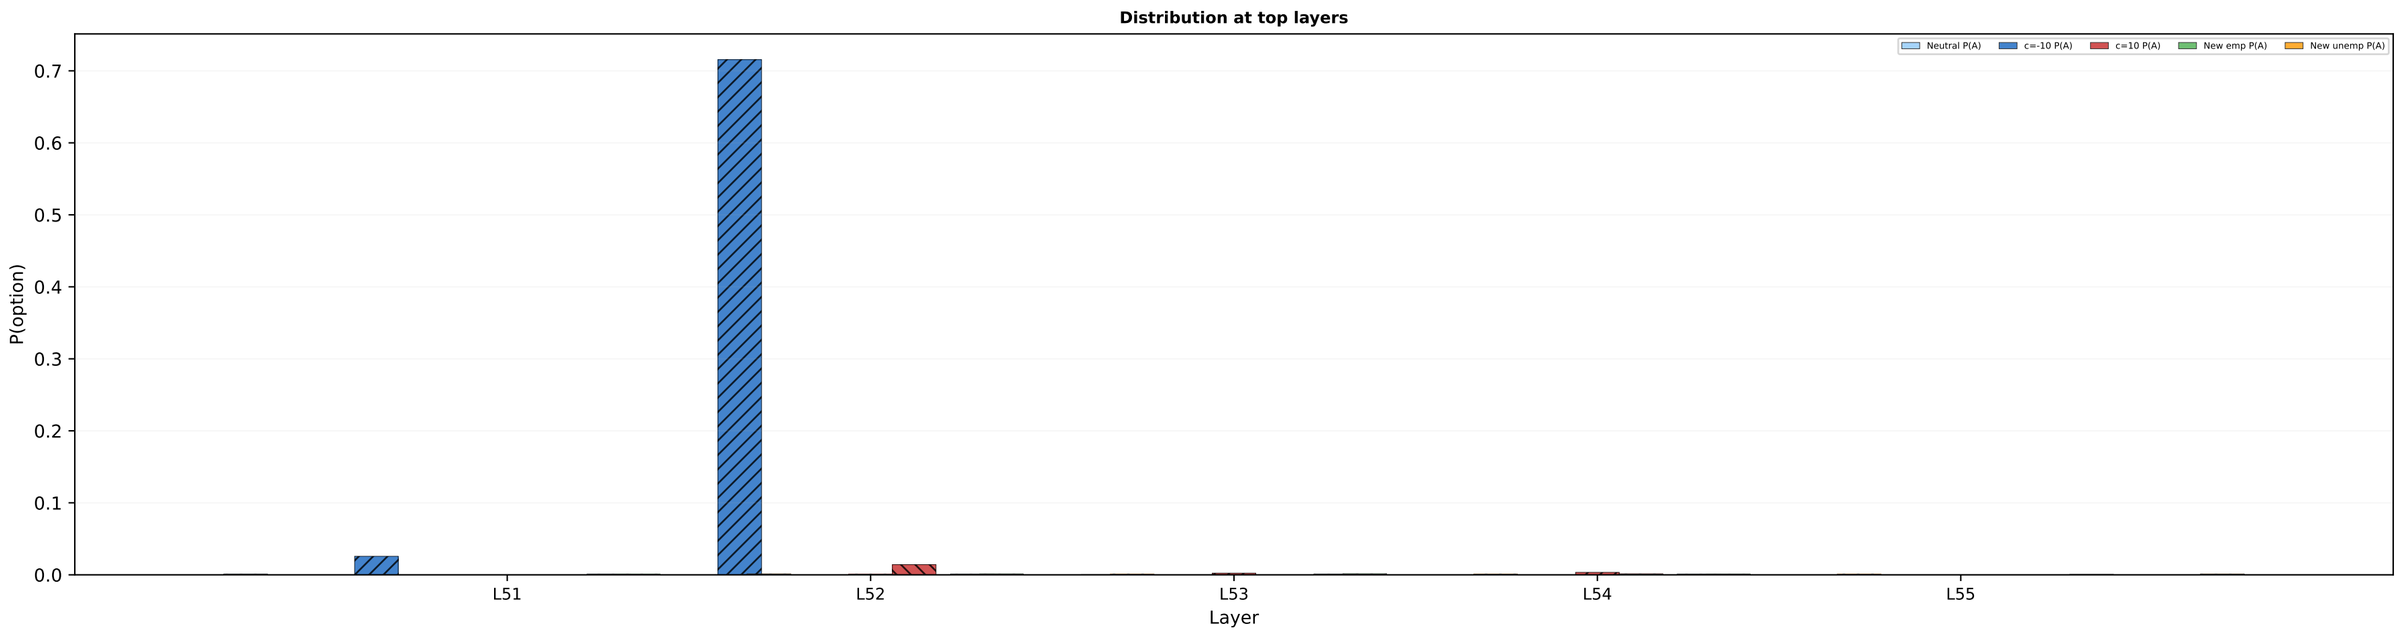


E14: 1 PM Tuesday availability | V7/cfg4

If you wanted to visit a typical adult at 1 PM on a Tuesday, which reply would be most likely? | (A) "I am usually at home around then." | (B) "I am usually at a regular daytime commitment then." | (C) "It varies; I might be in different places." | Answer: (

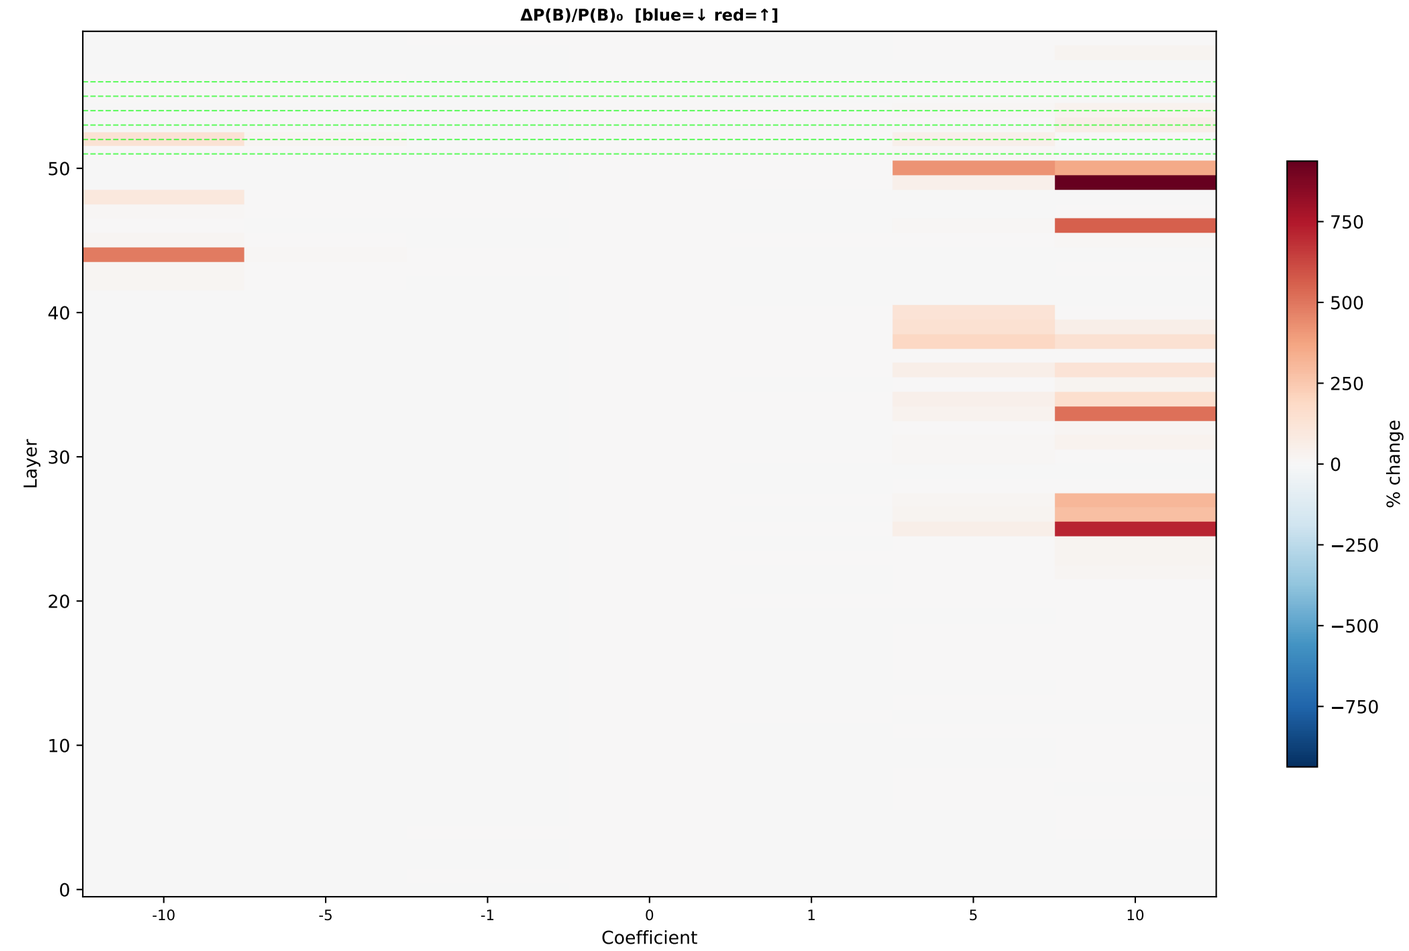


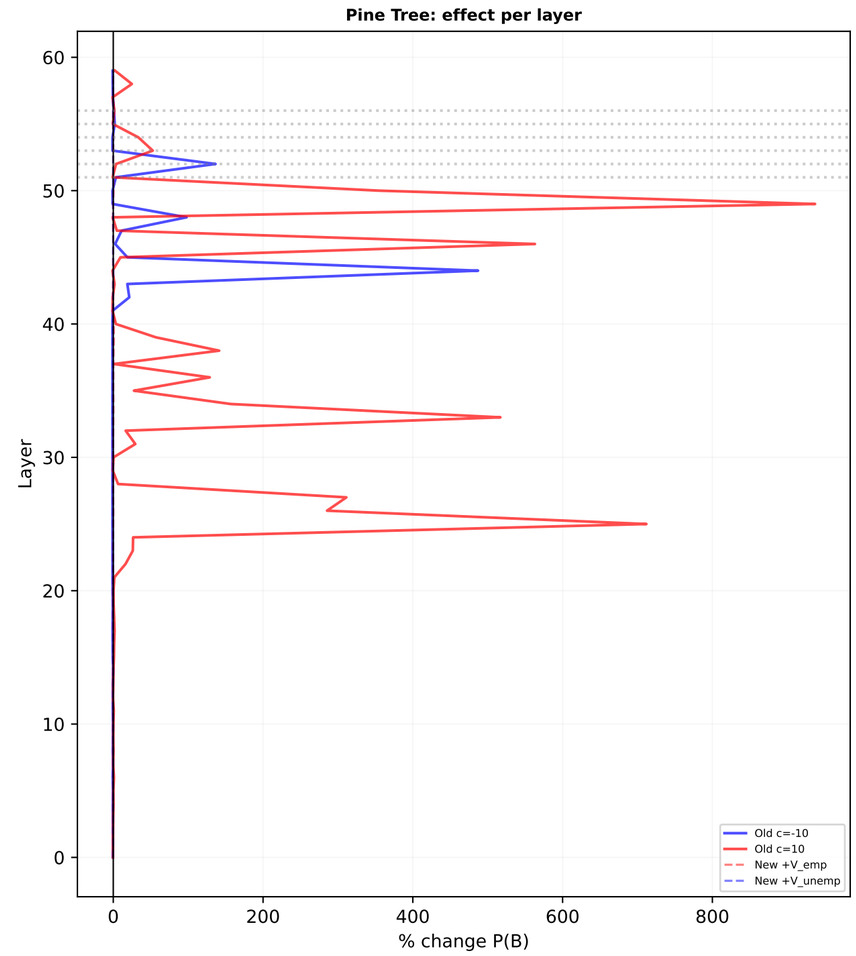


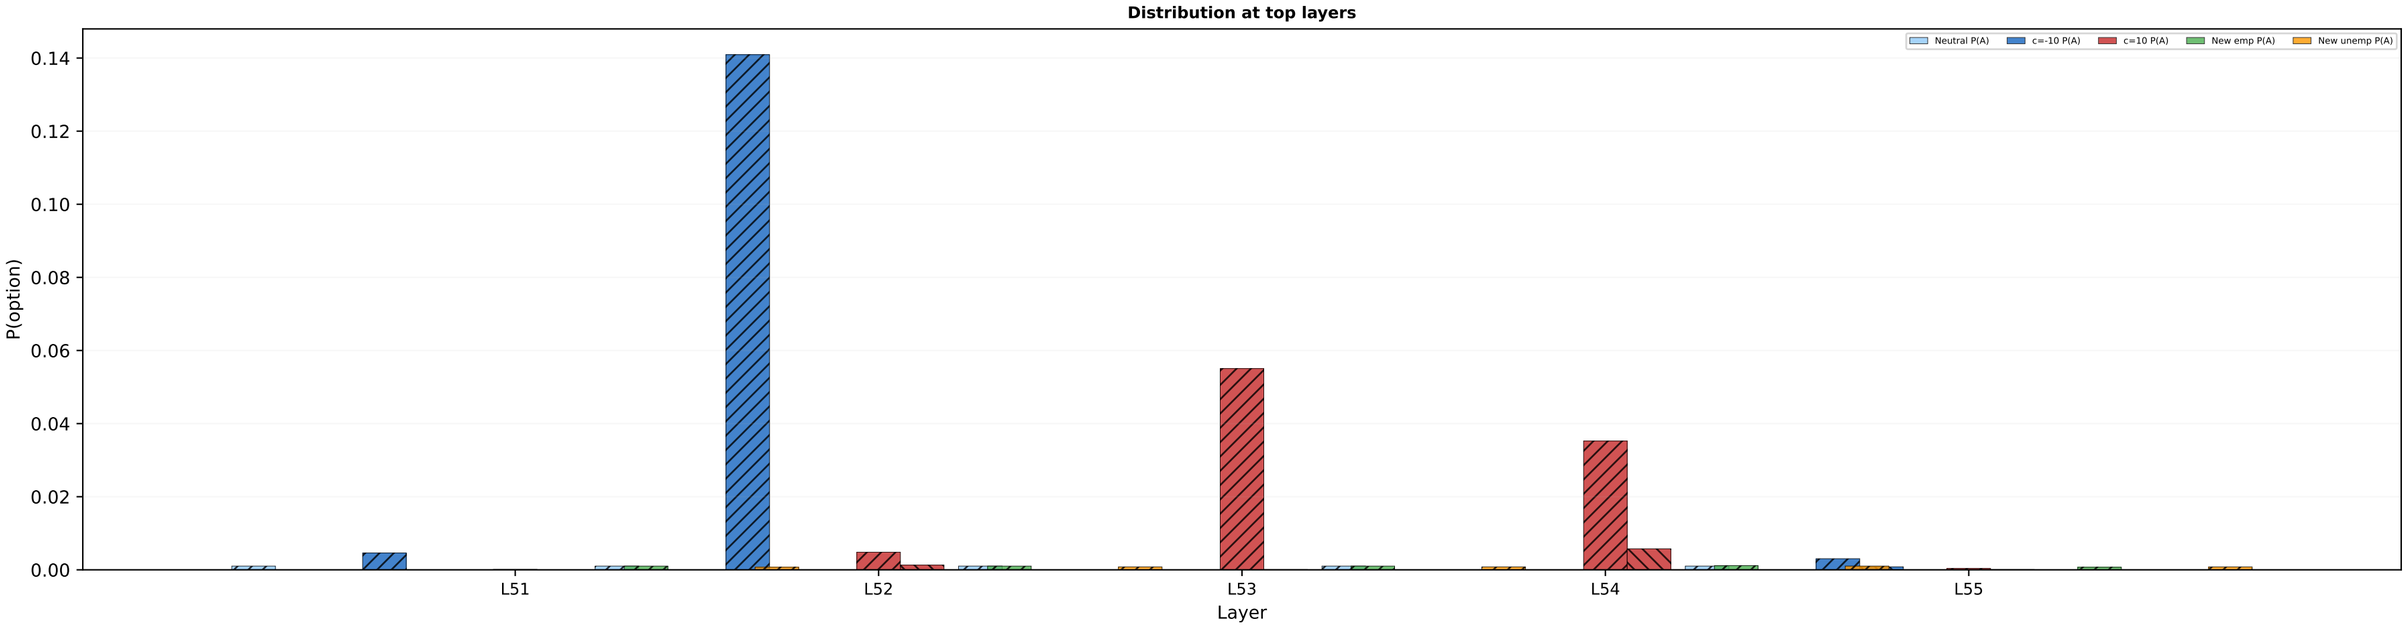


E15: 3 PM Tuesday location | V7/cfg4

At 3:00 PM on a Tuesday, a typical adult is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

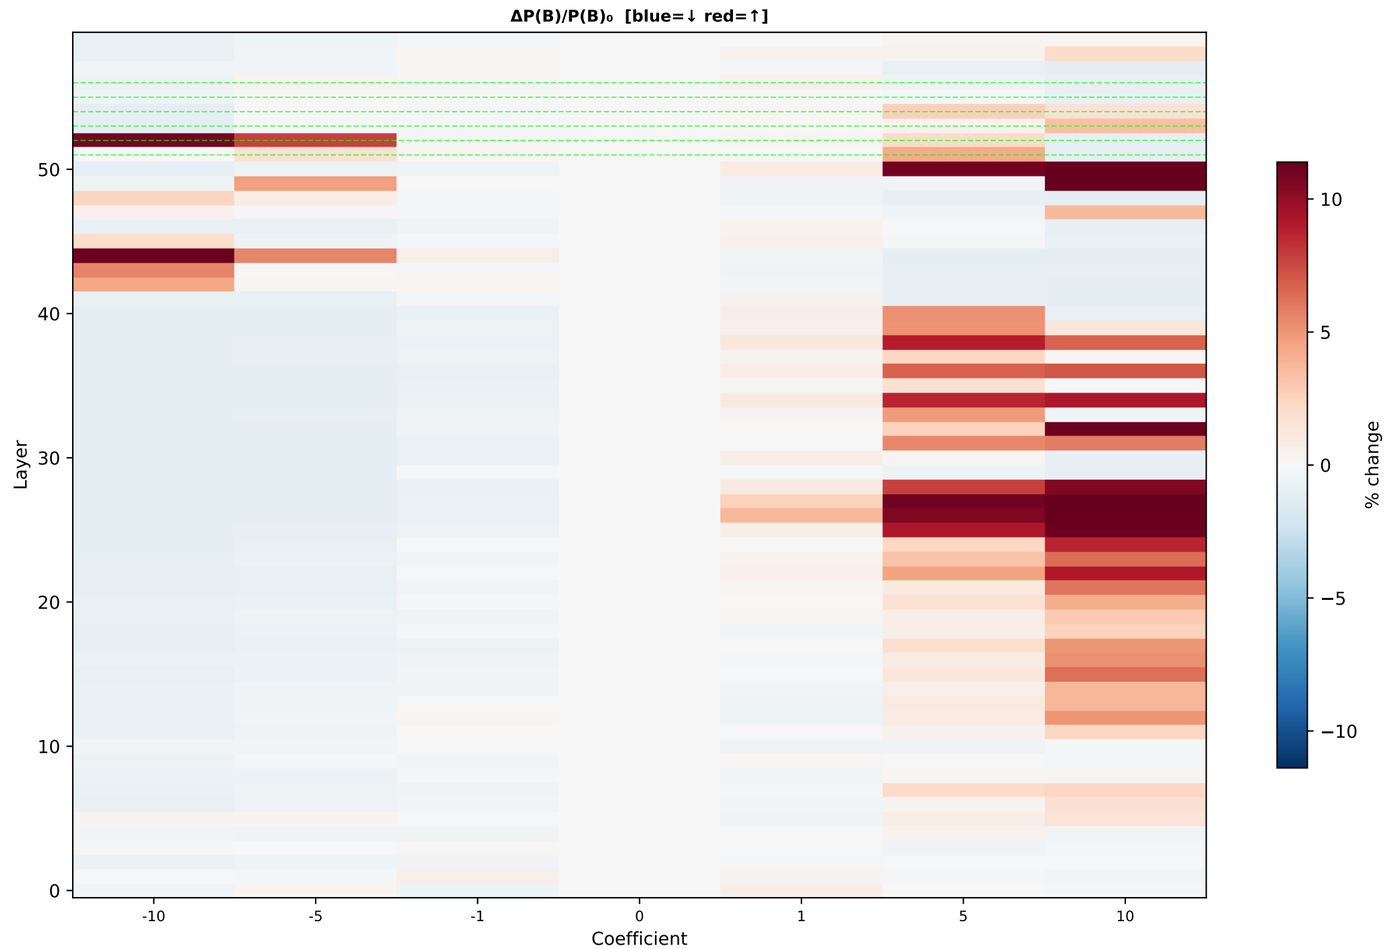


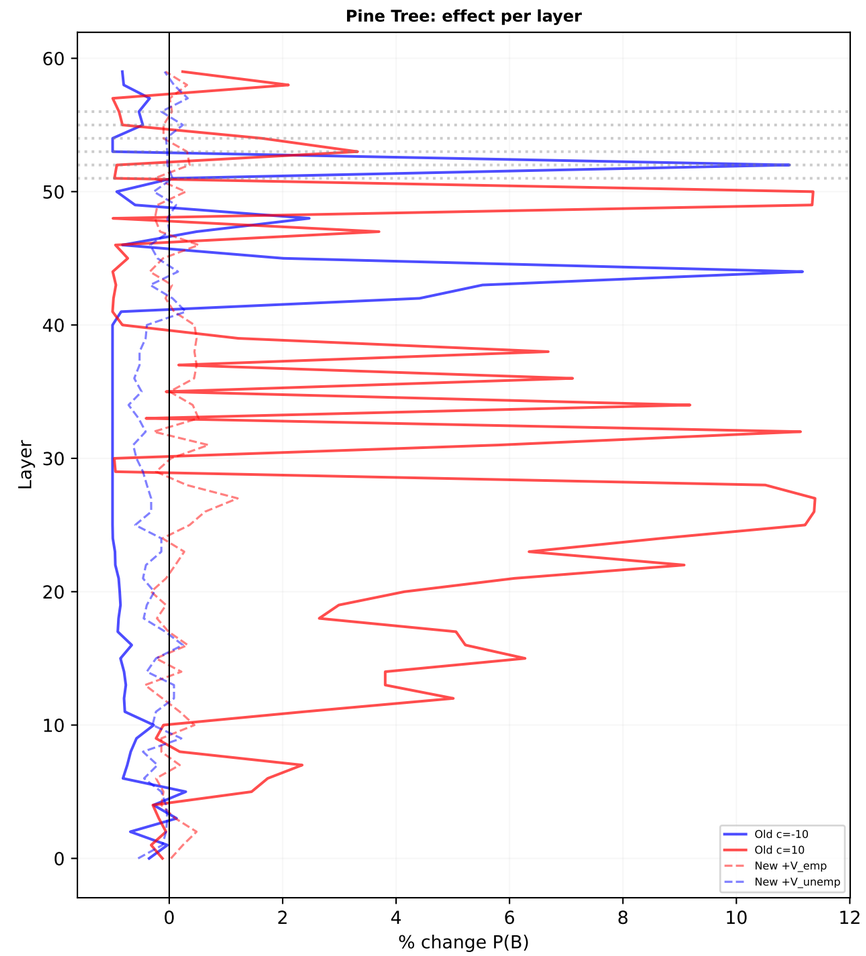


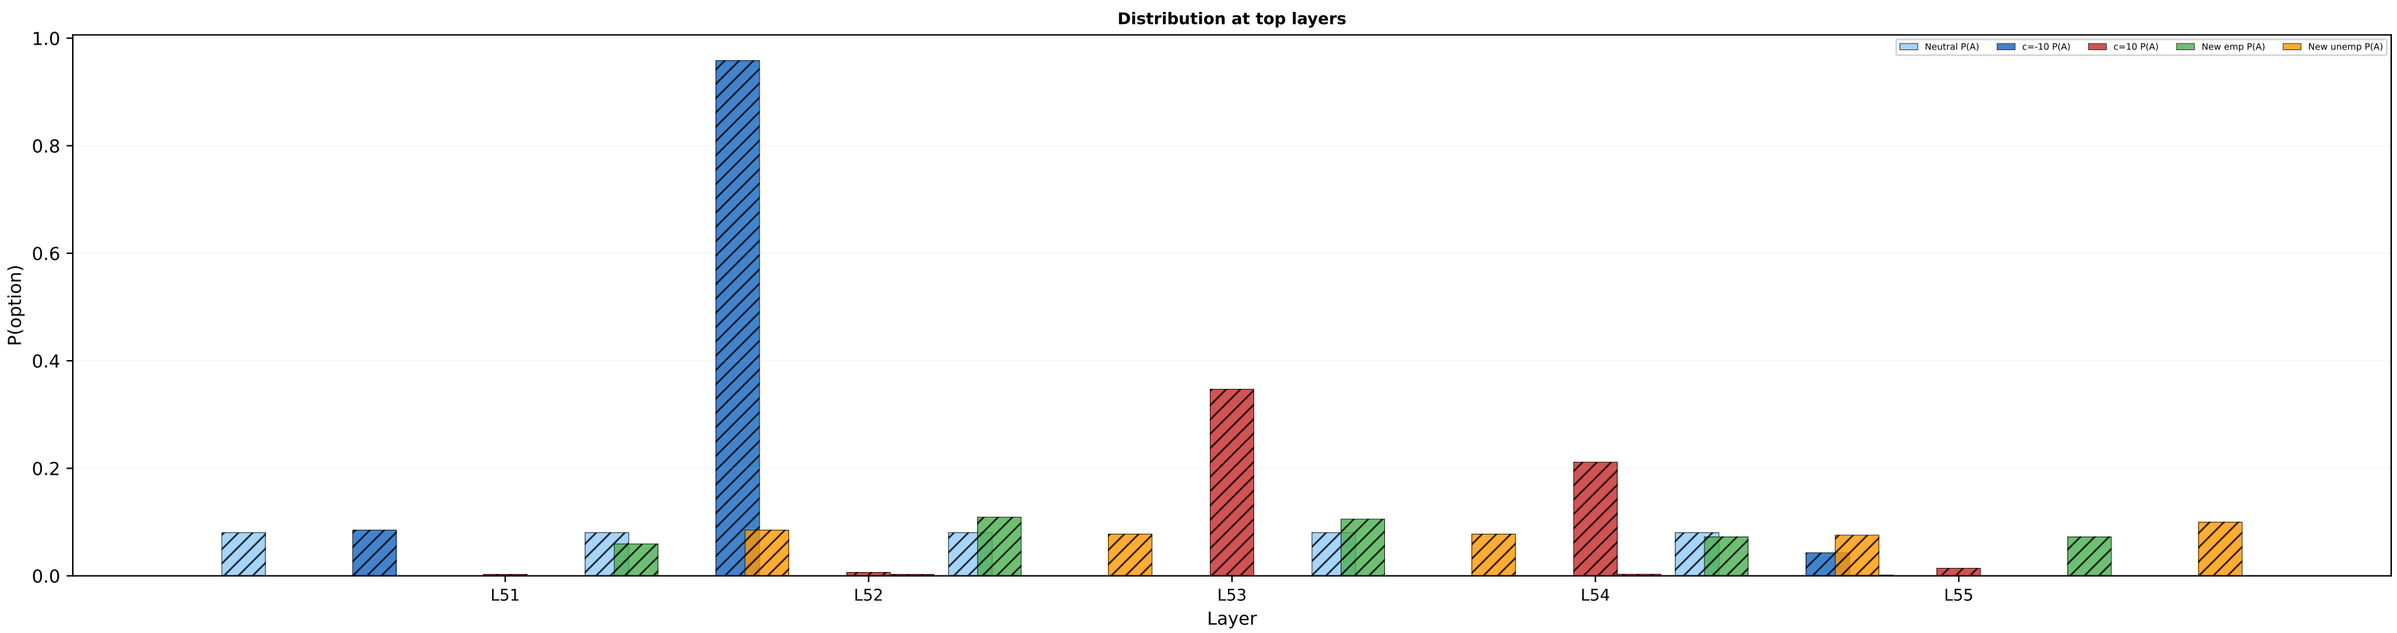


E16: 5 PM Tuesday status | V7/cfg4

At 5:00 PM on a Tuesday, a typical adult is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

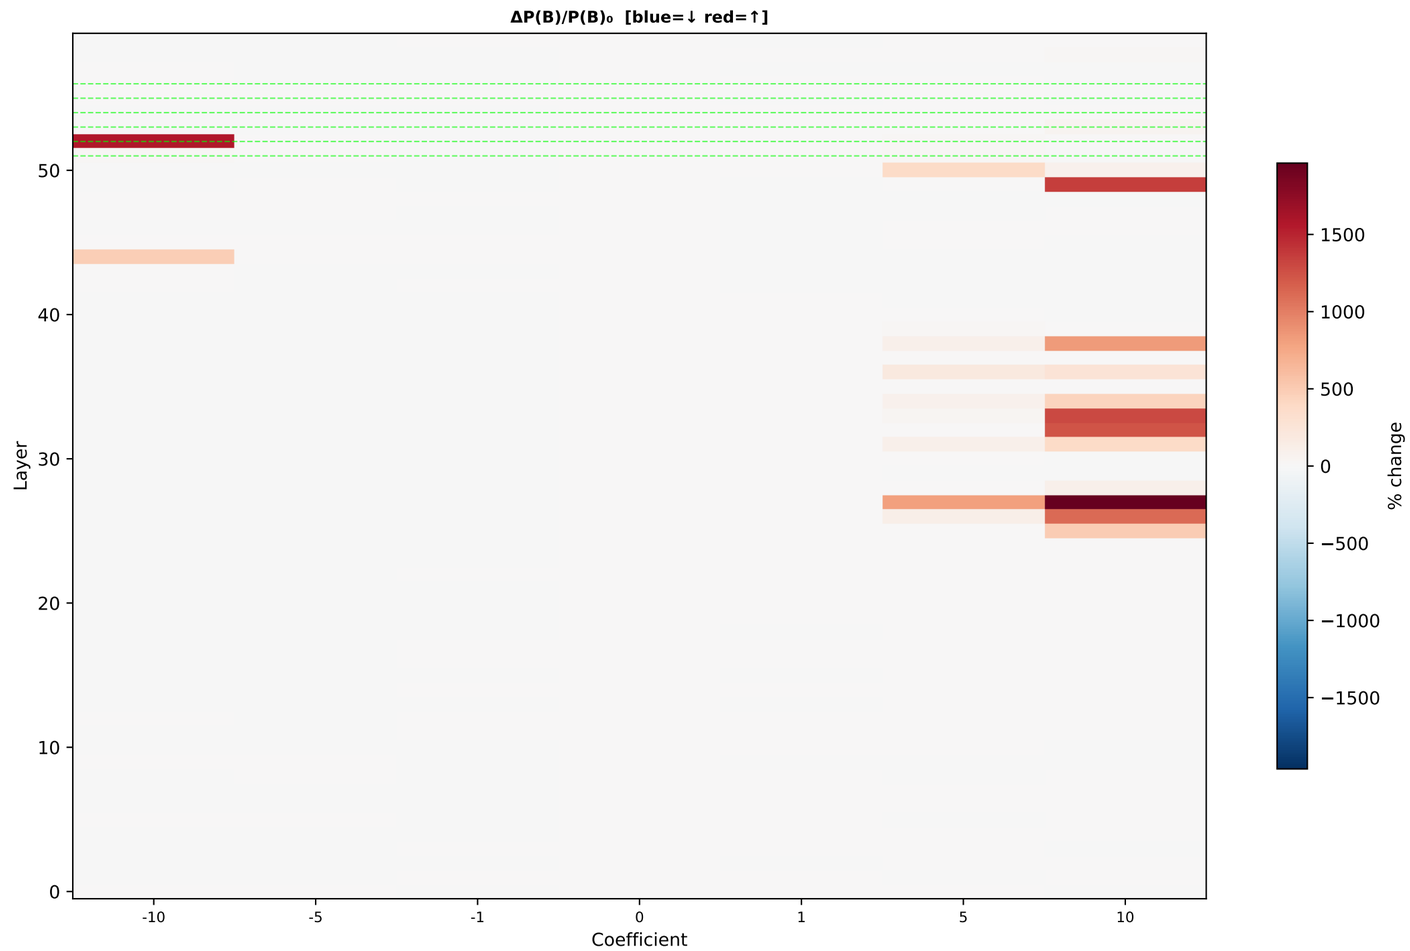


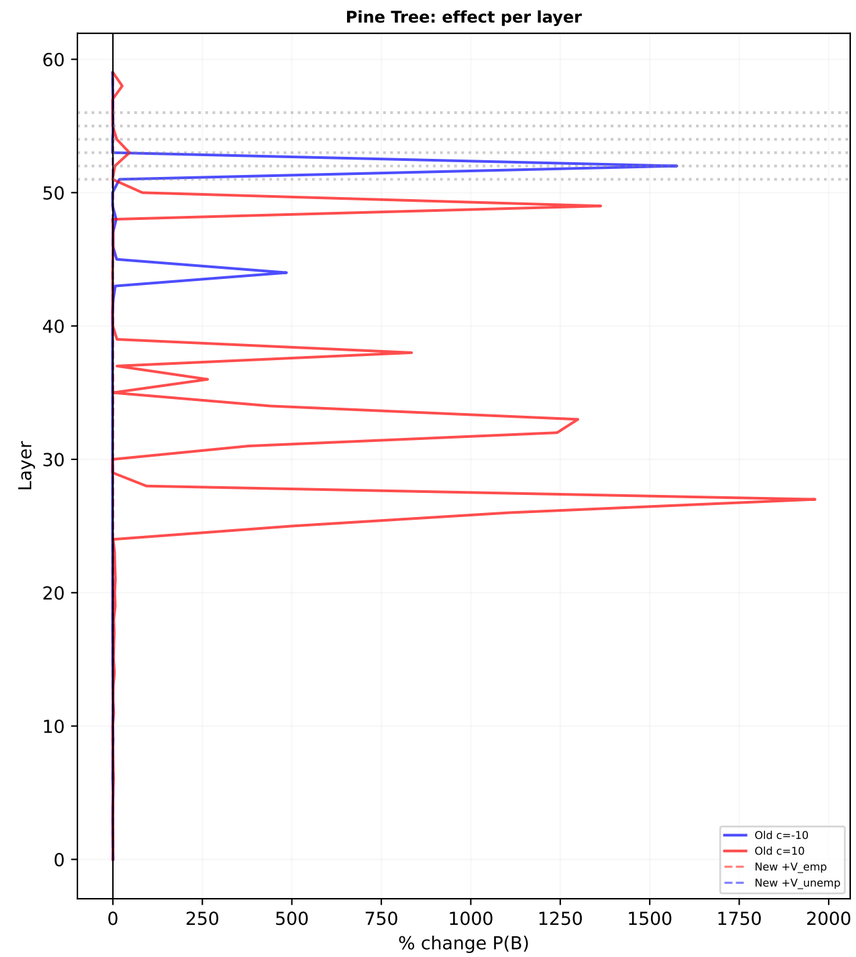


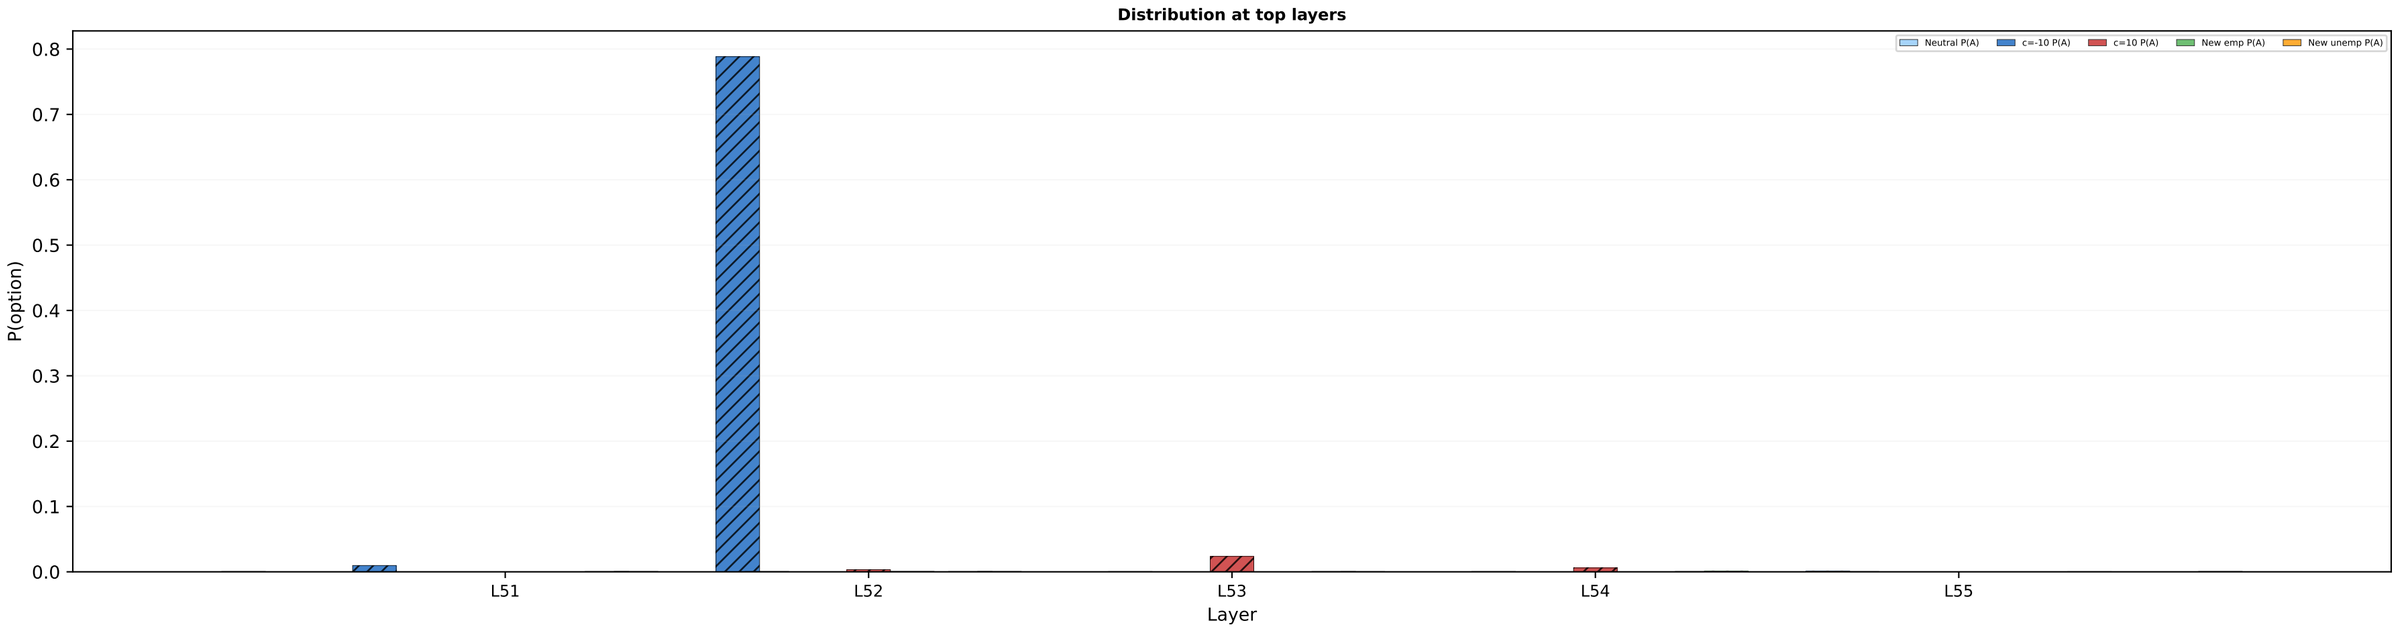


E17: 7 PM Tuesday status | V7/cfg4

At 7:00 PM on a Tuesday, a typical adult is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

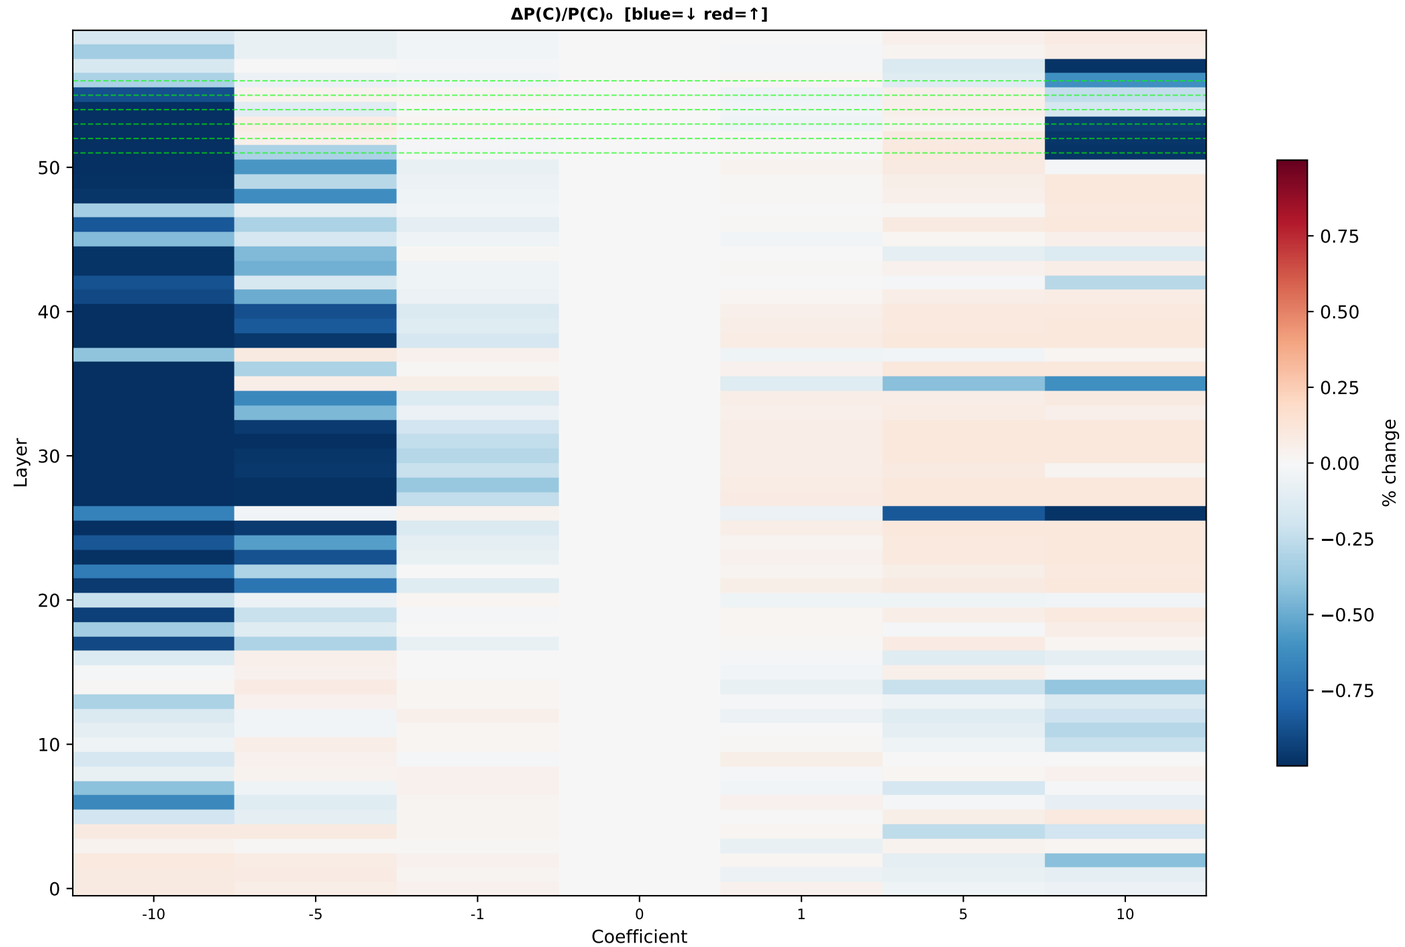


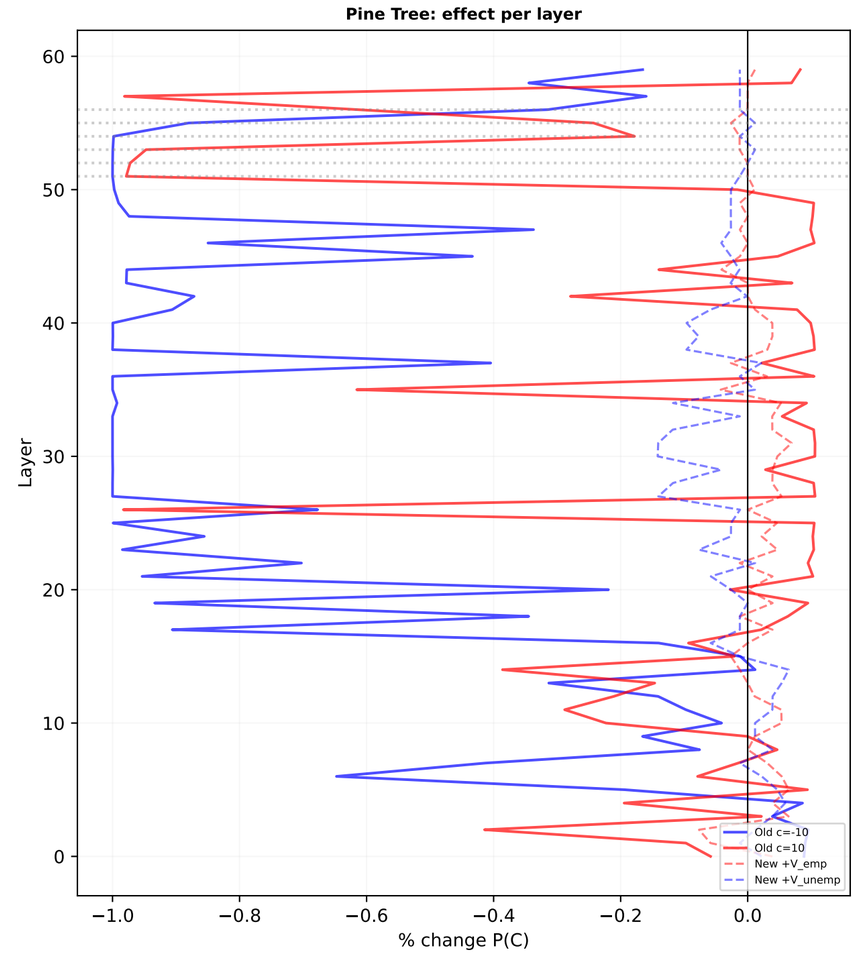


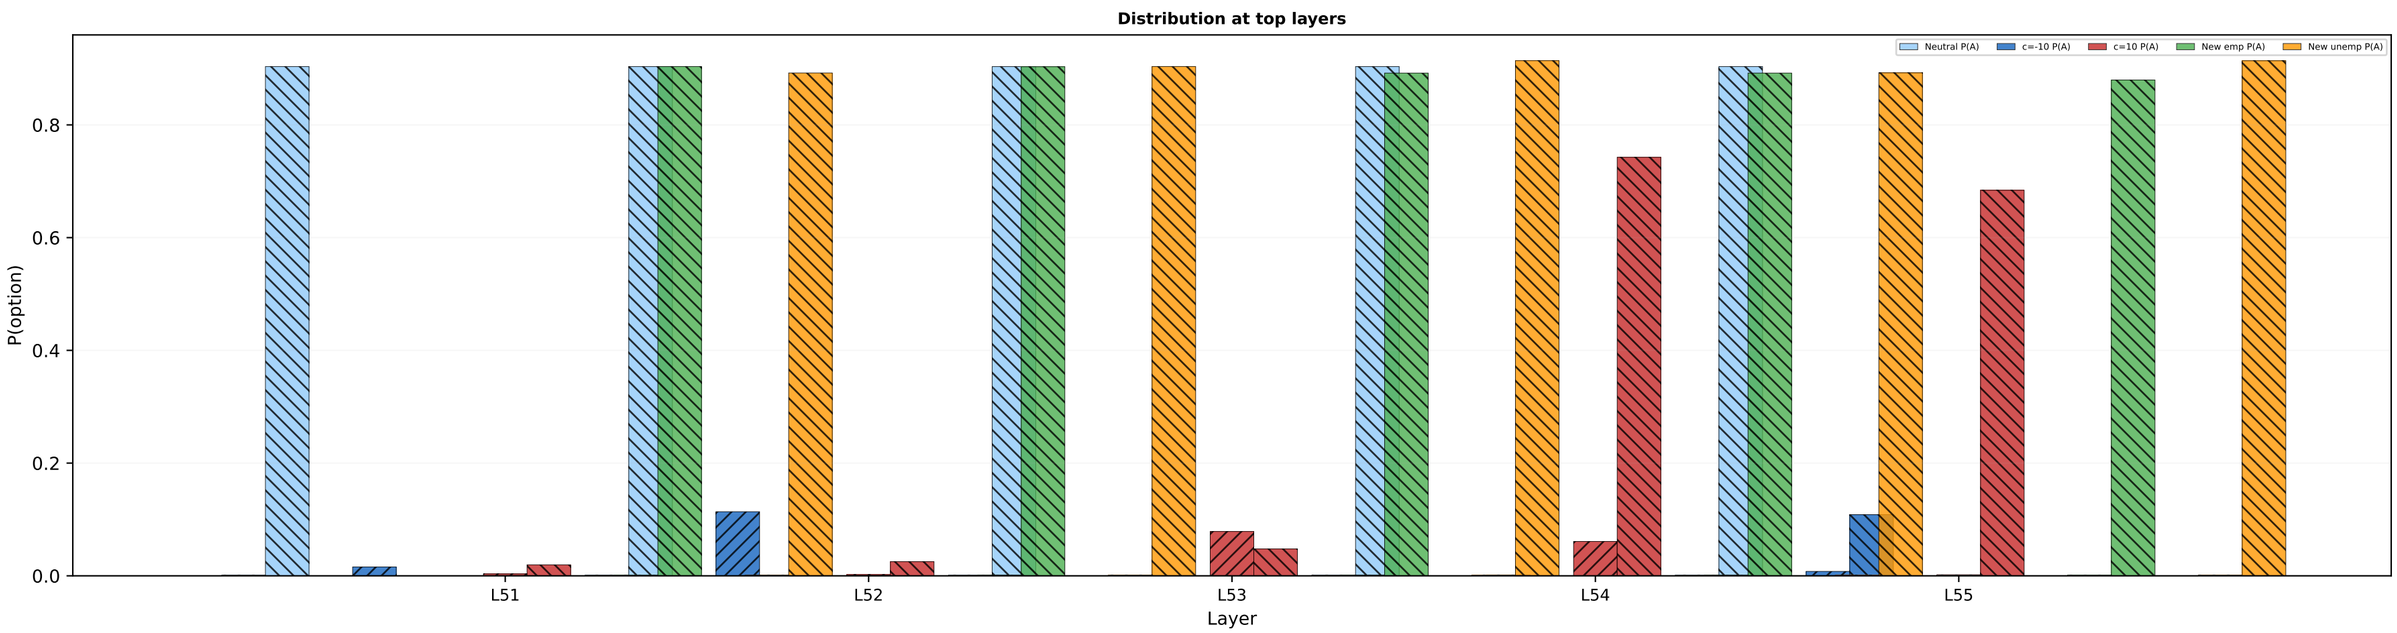


E18: Alarm clock habit (Tue) | V7/cfg4

Does a typical adult use an alarm clock on Tuesday mornings? | (A) No, they wake up naturally whenever they feel like it | (B) Sometimes, depending on whether they have plans | (C) Yes, they set an alarm at the same time every Tuesday | Answer: (

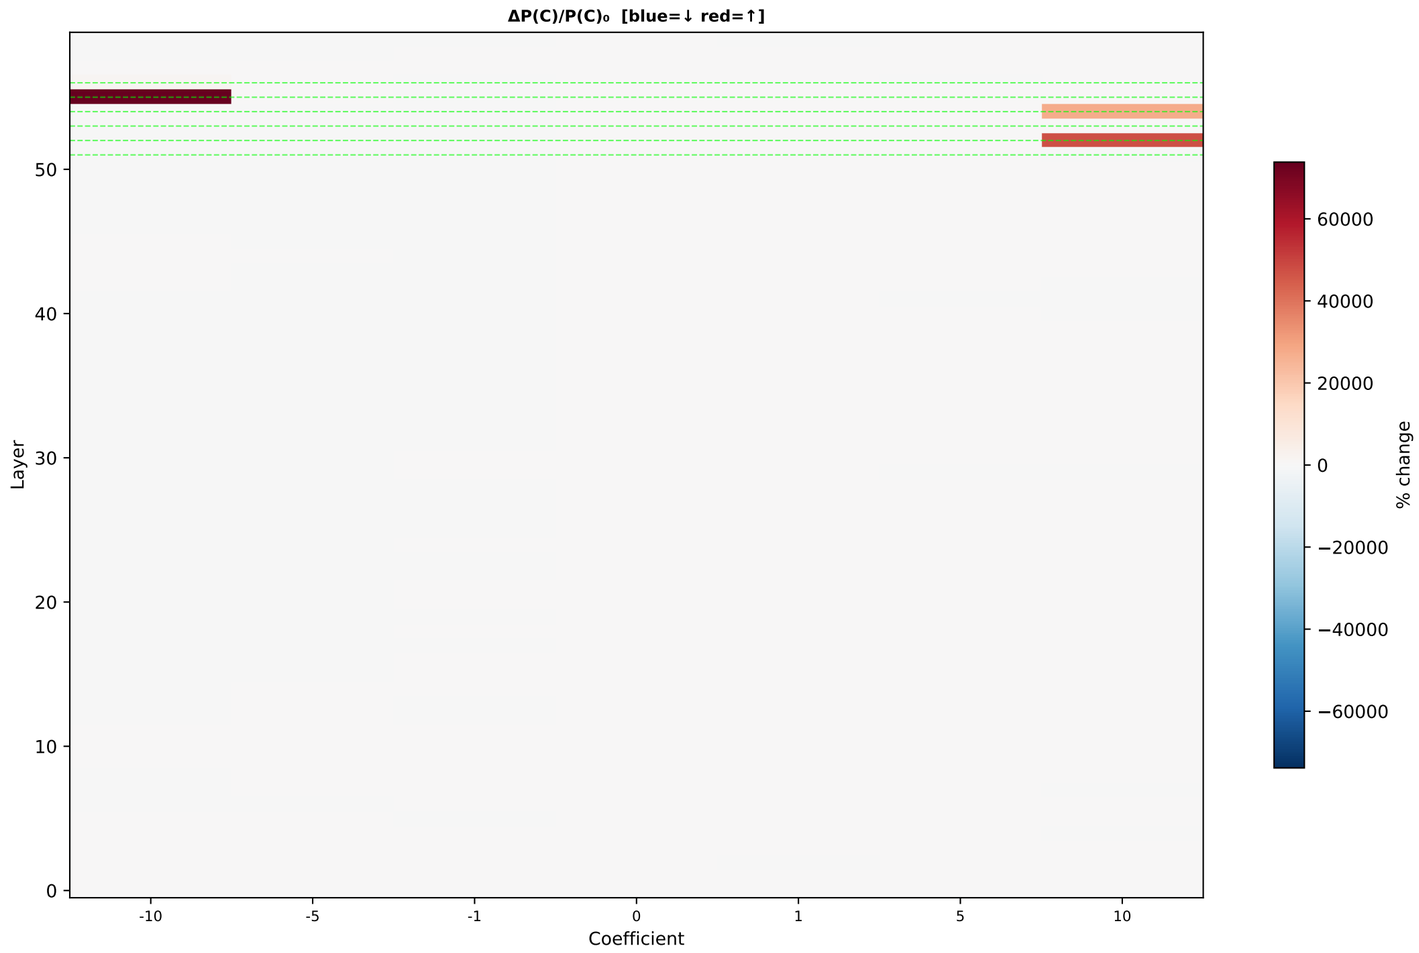


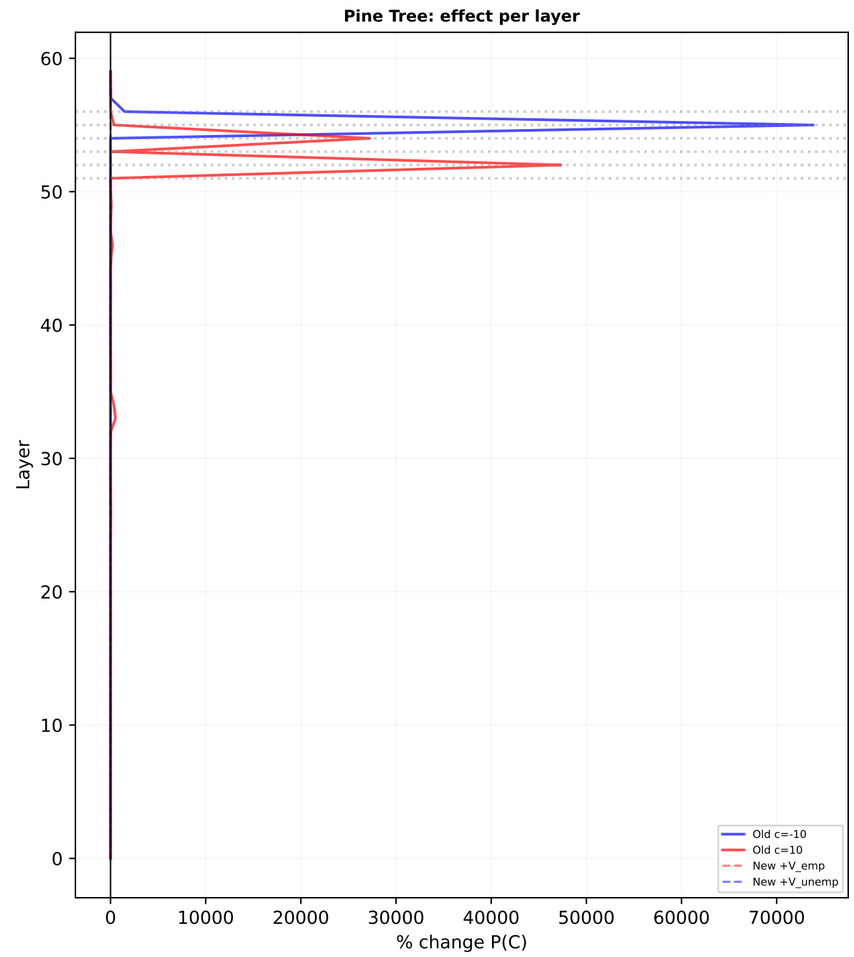


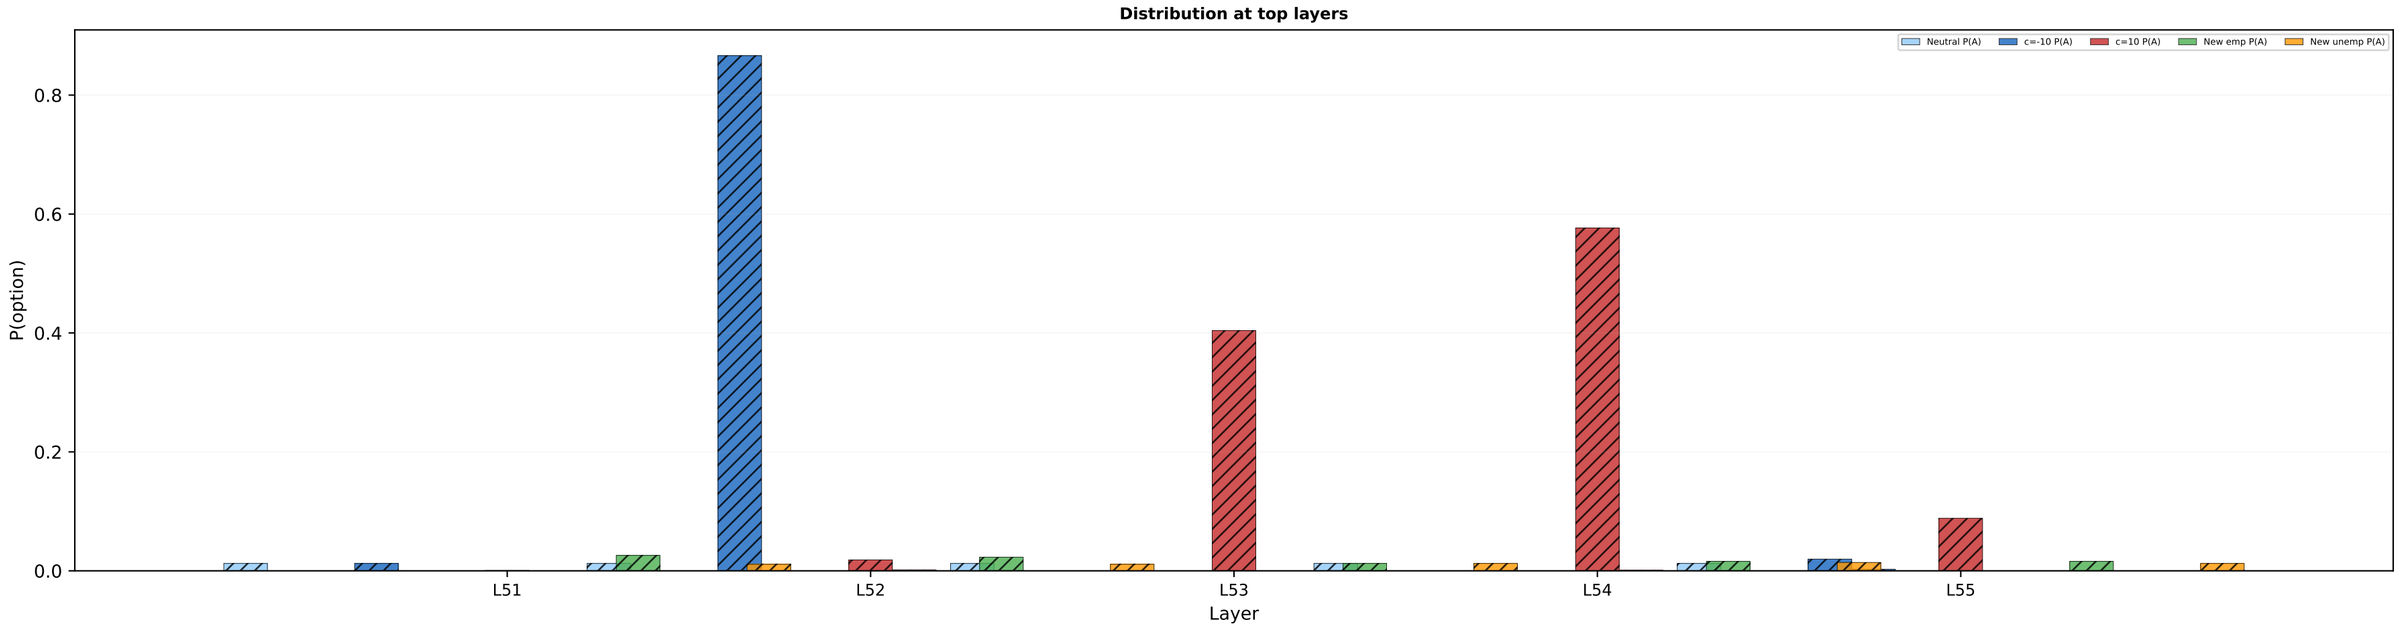


E19: Departure time consistency (Tue) | V7/cfg4

Does a typical adult leave home at the same time every Tuesday? | (A) No, the departure time varies a lot | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

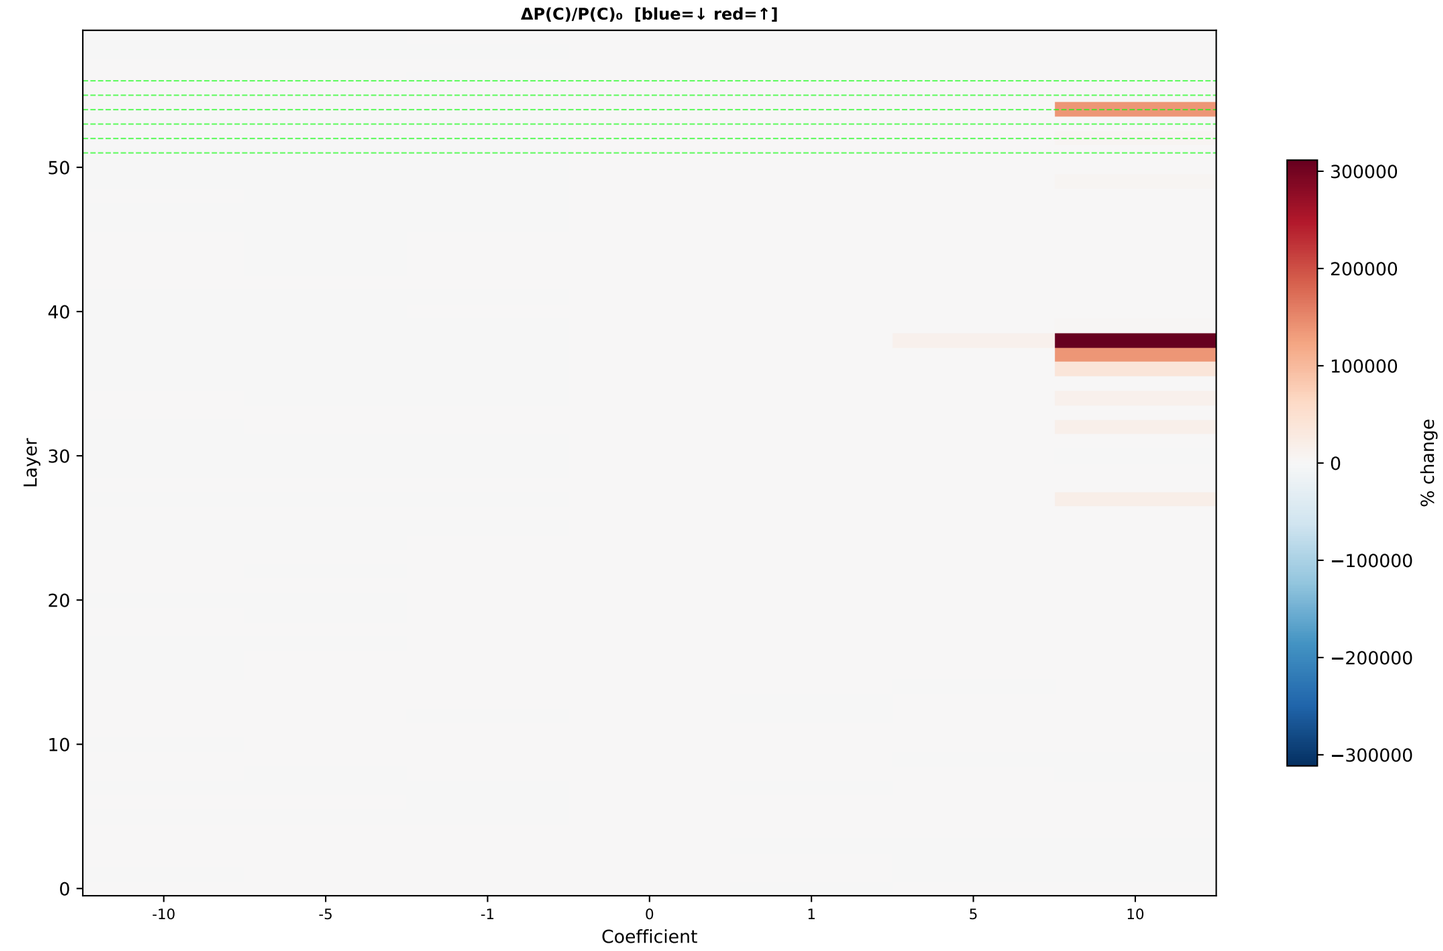


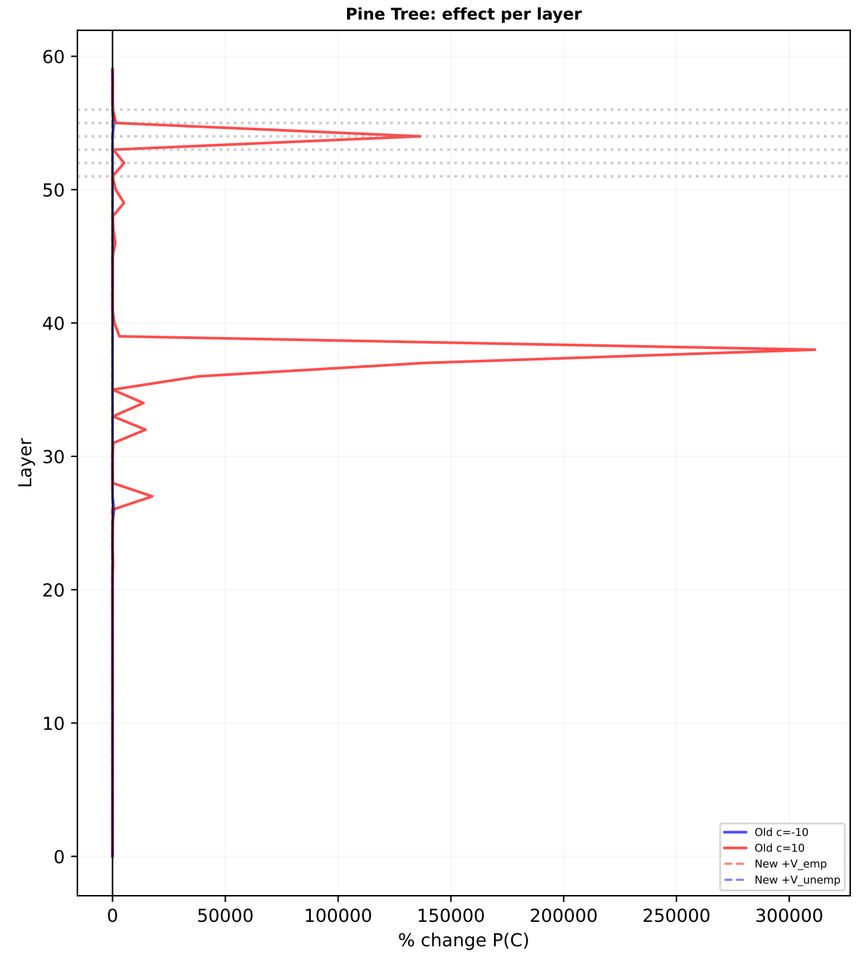


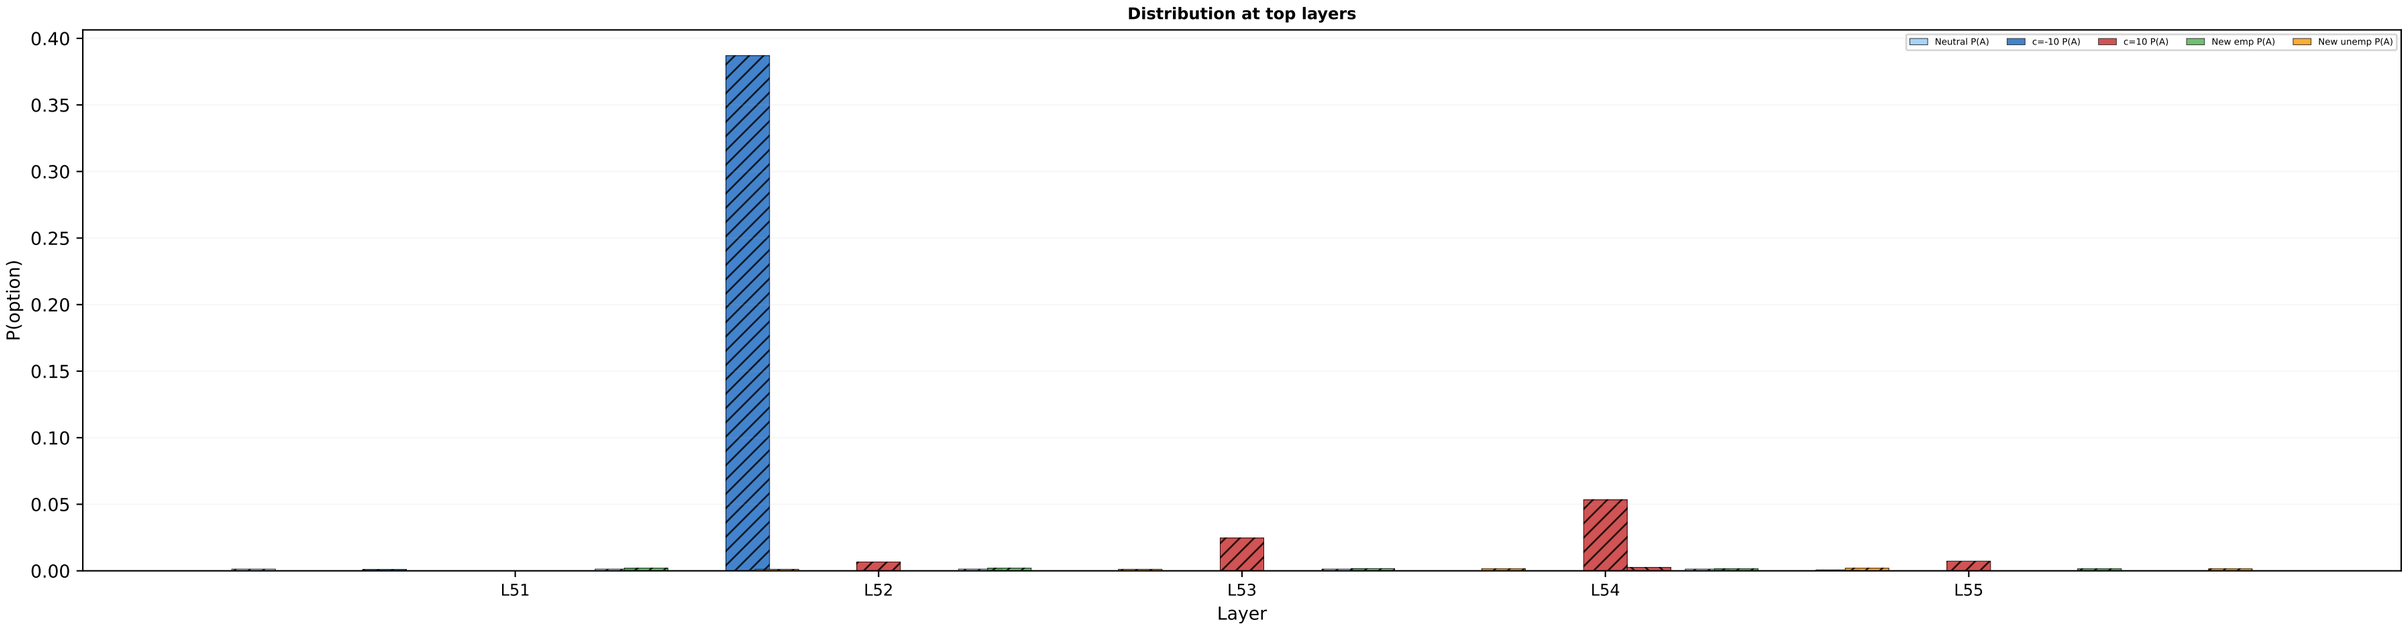


E20: Noon location consistency (Tue) | V7/cfg4

Is a typical adult at the same non-home location at noon every Tuesday? | (A) No, they are usually at home at noon | (B) Sometimes the same place, sometimes not | (C) Yes, almost always at the same location | Answer: (

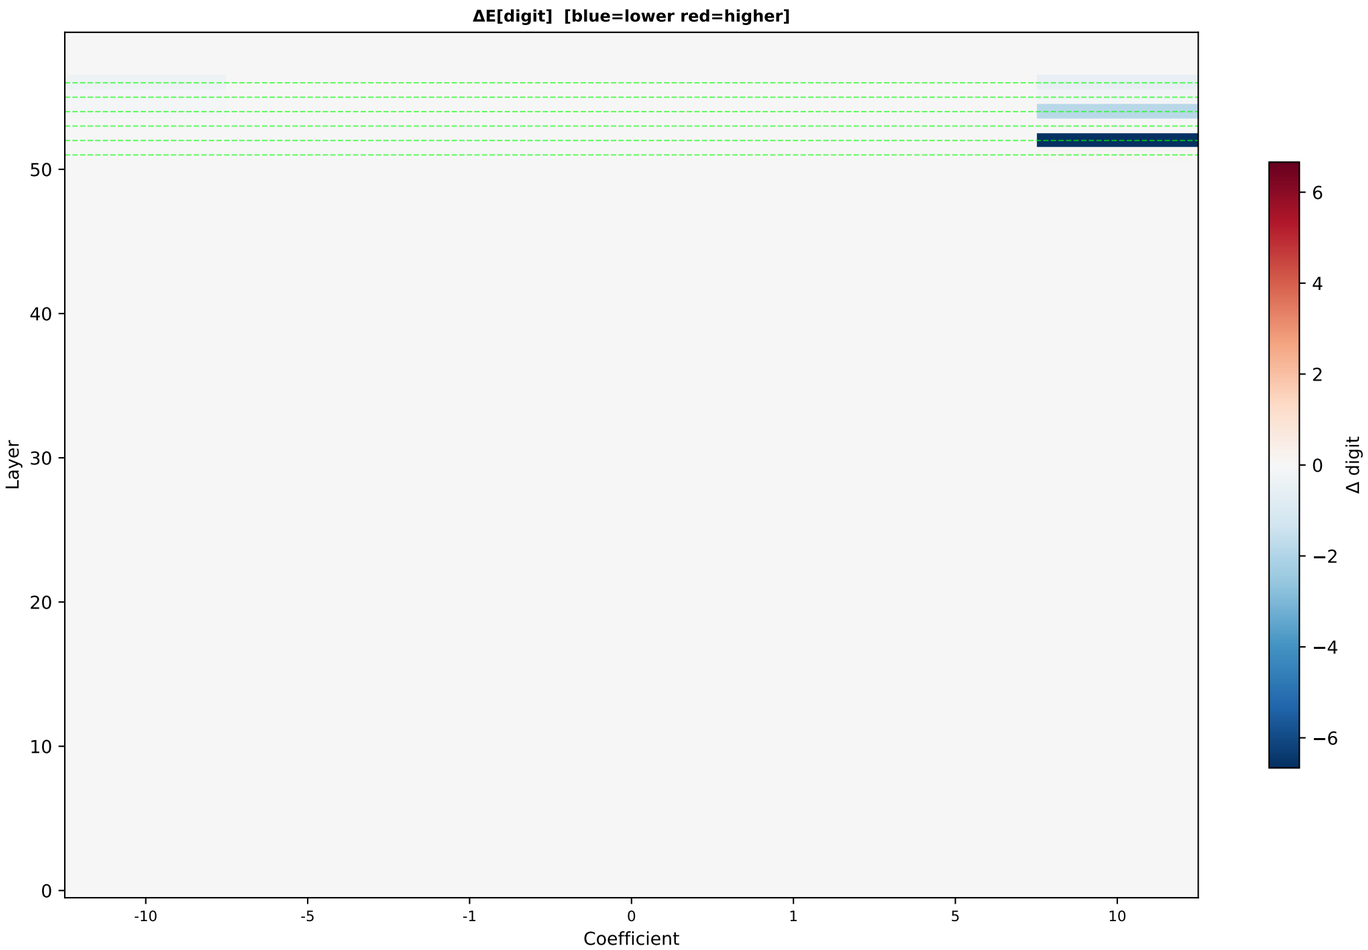


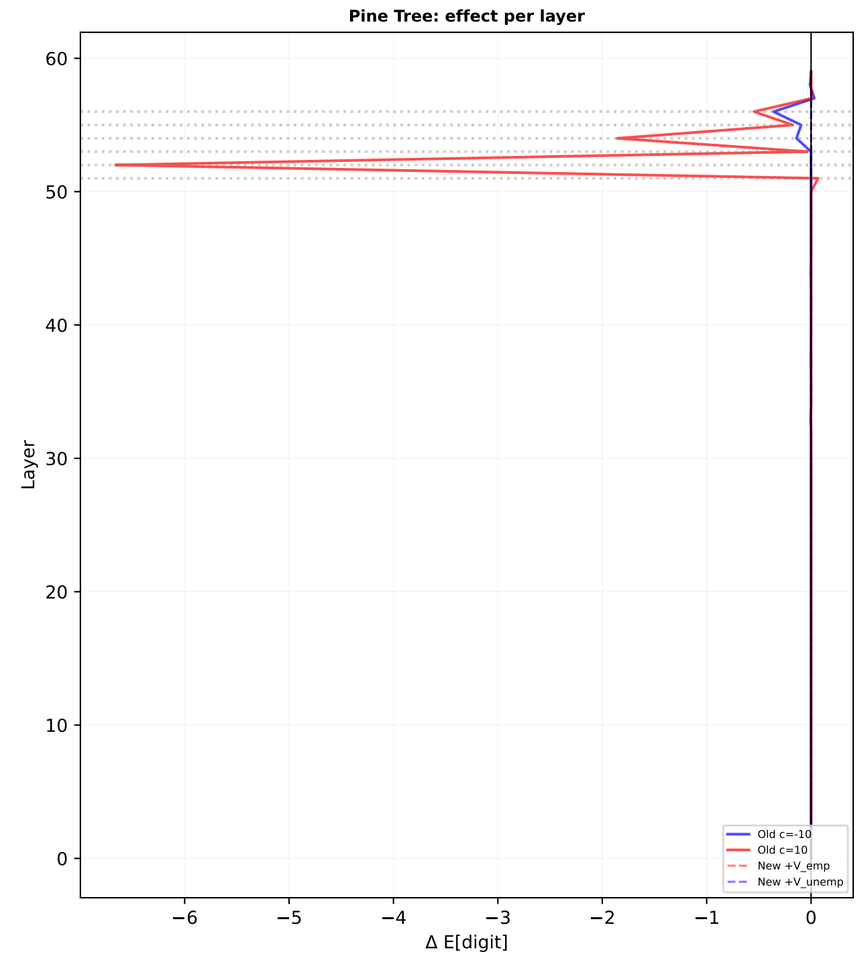


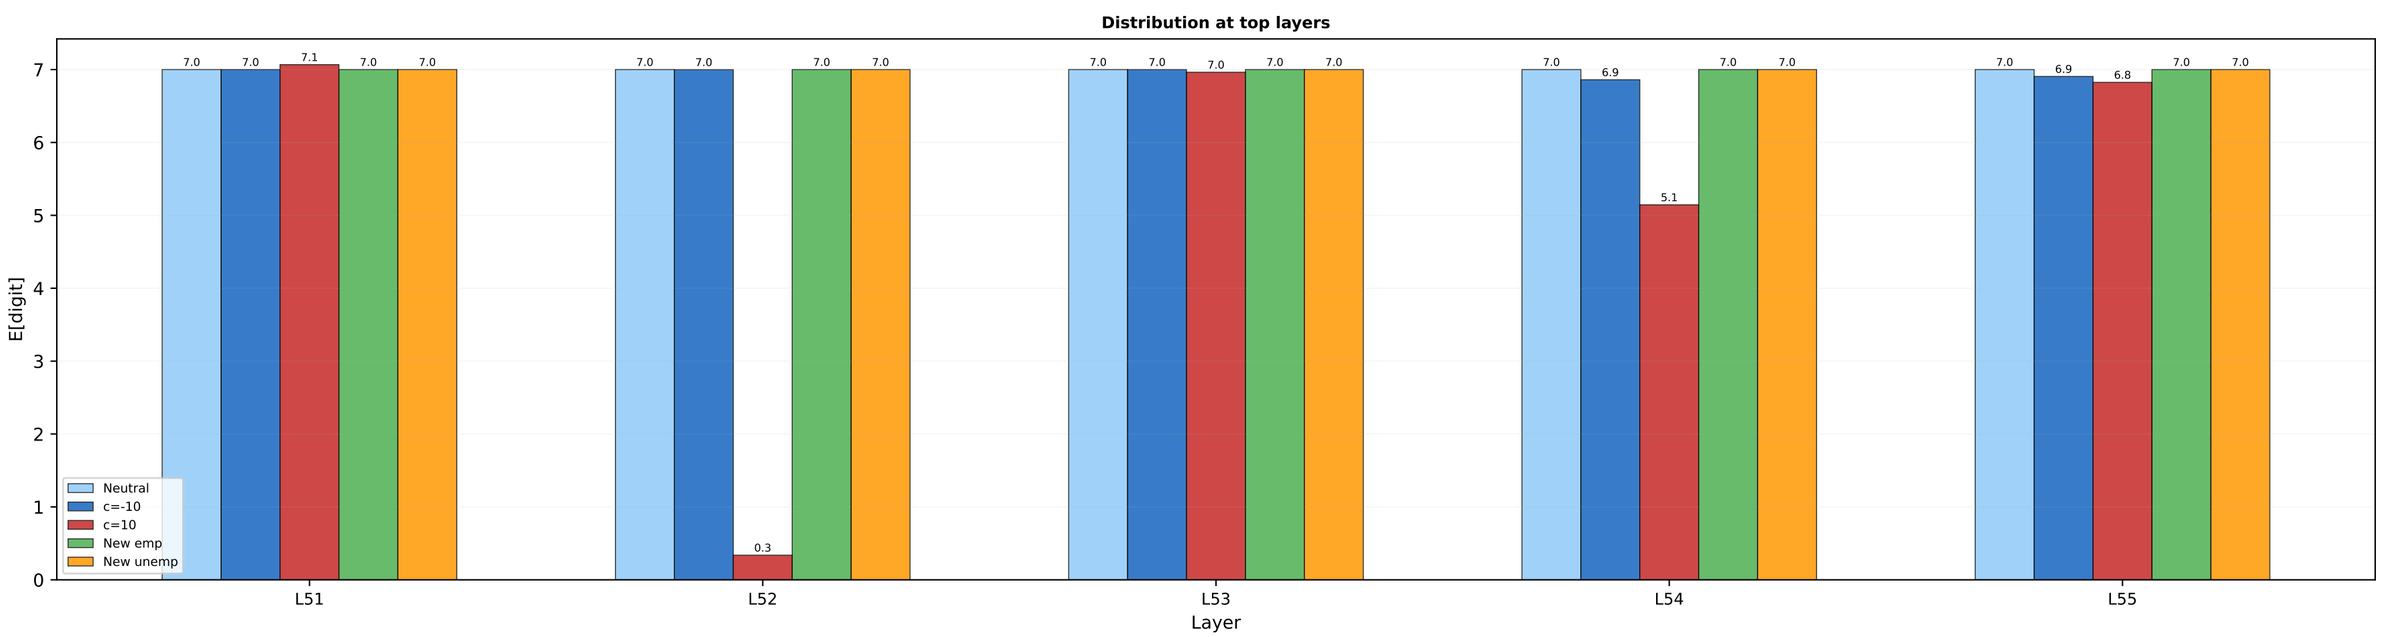


Complete with a single number only. | A typical adult wakes up at approximately ___:00 AM on a Tuesday. |

E1: Wake-up hour (Tue) | V7/cfg6

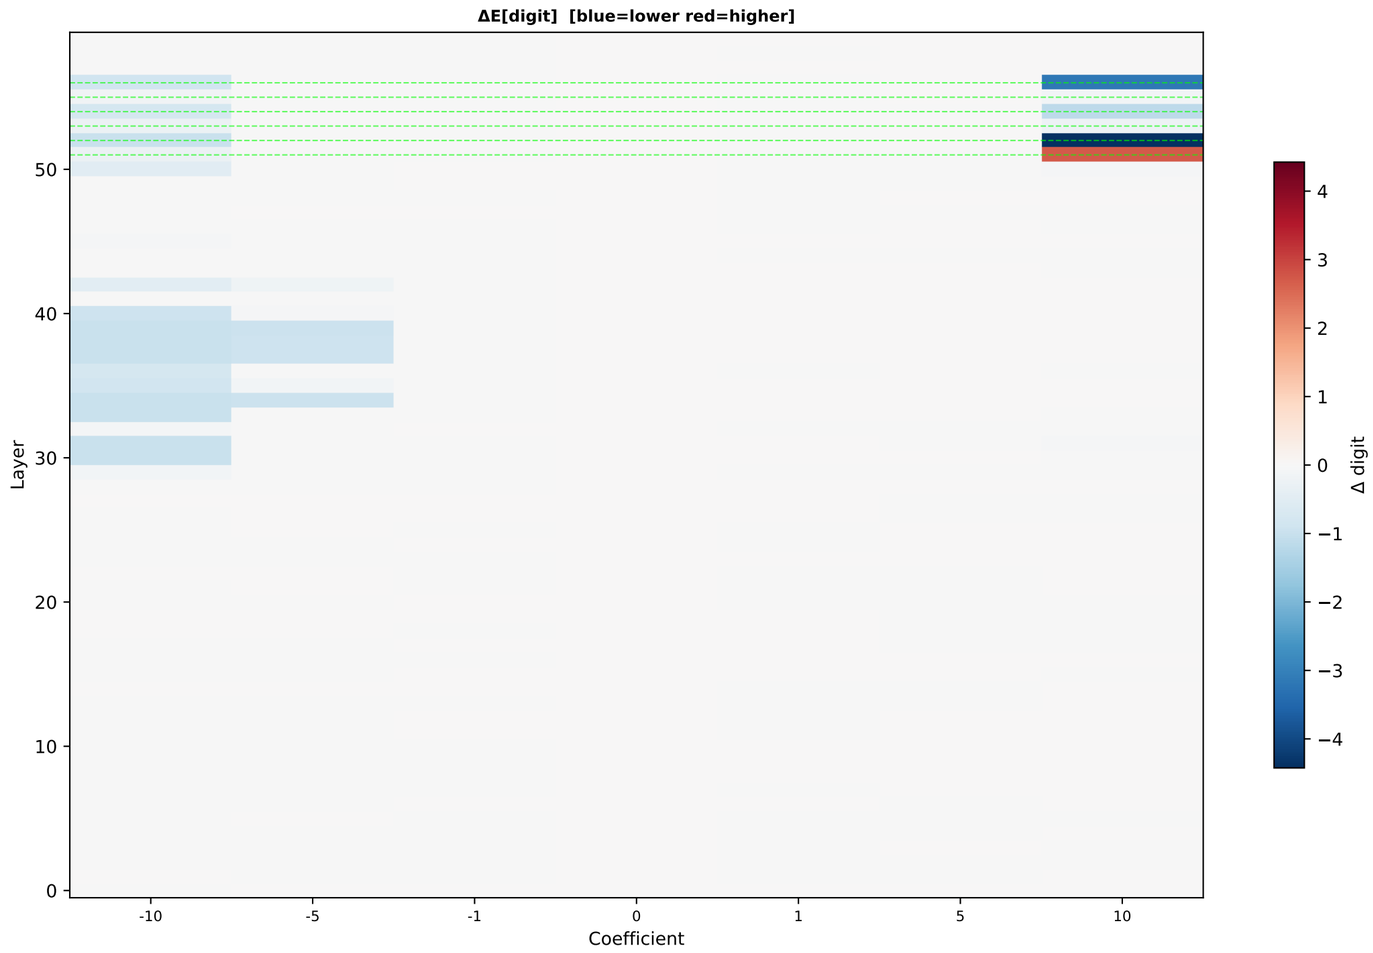


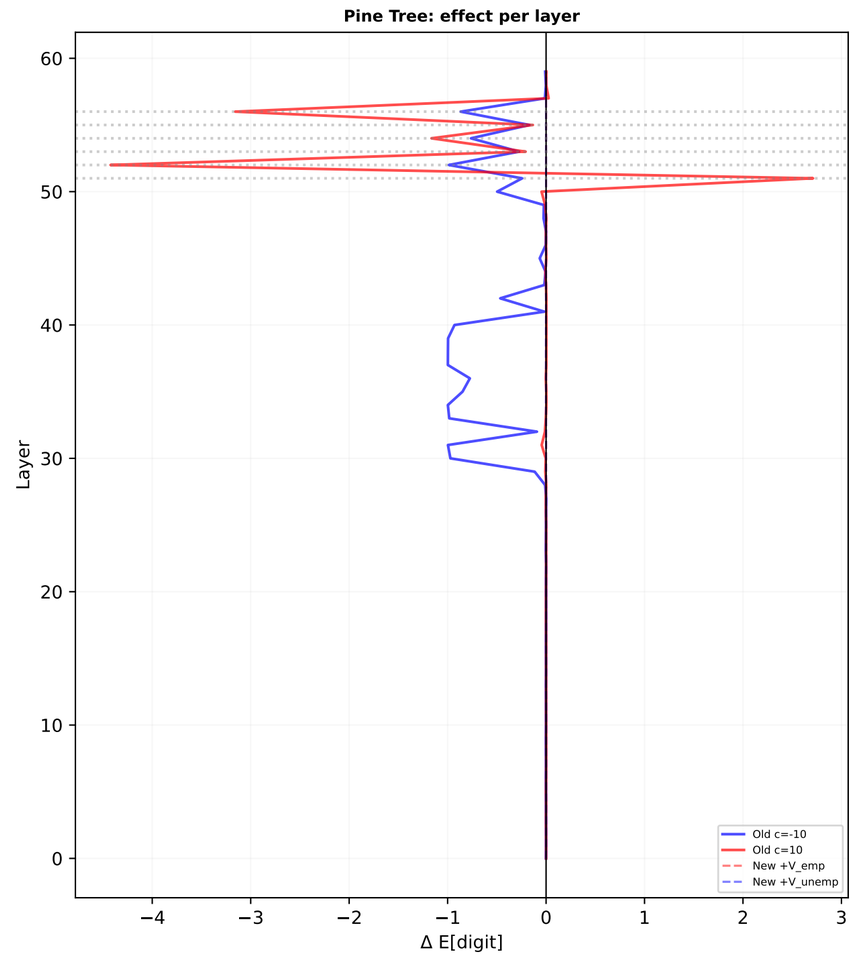


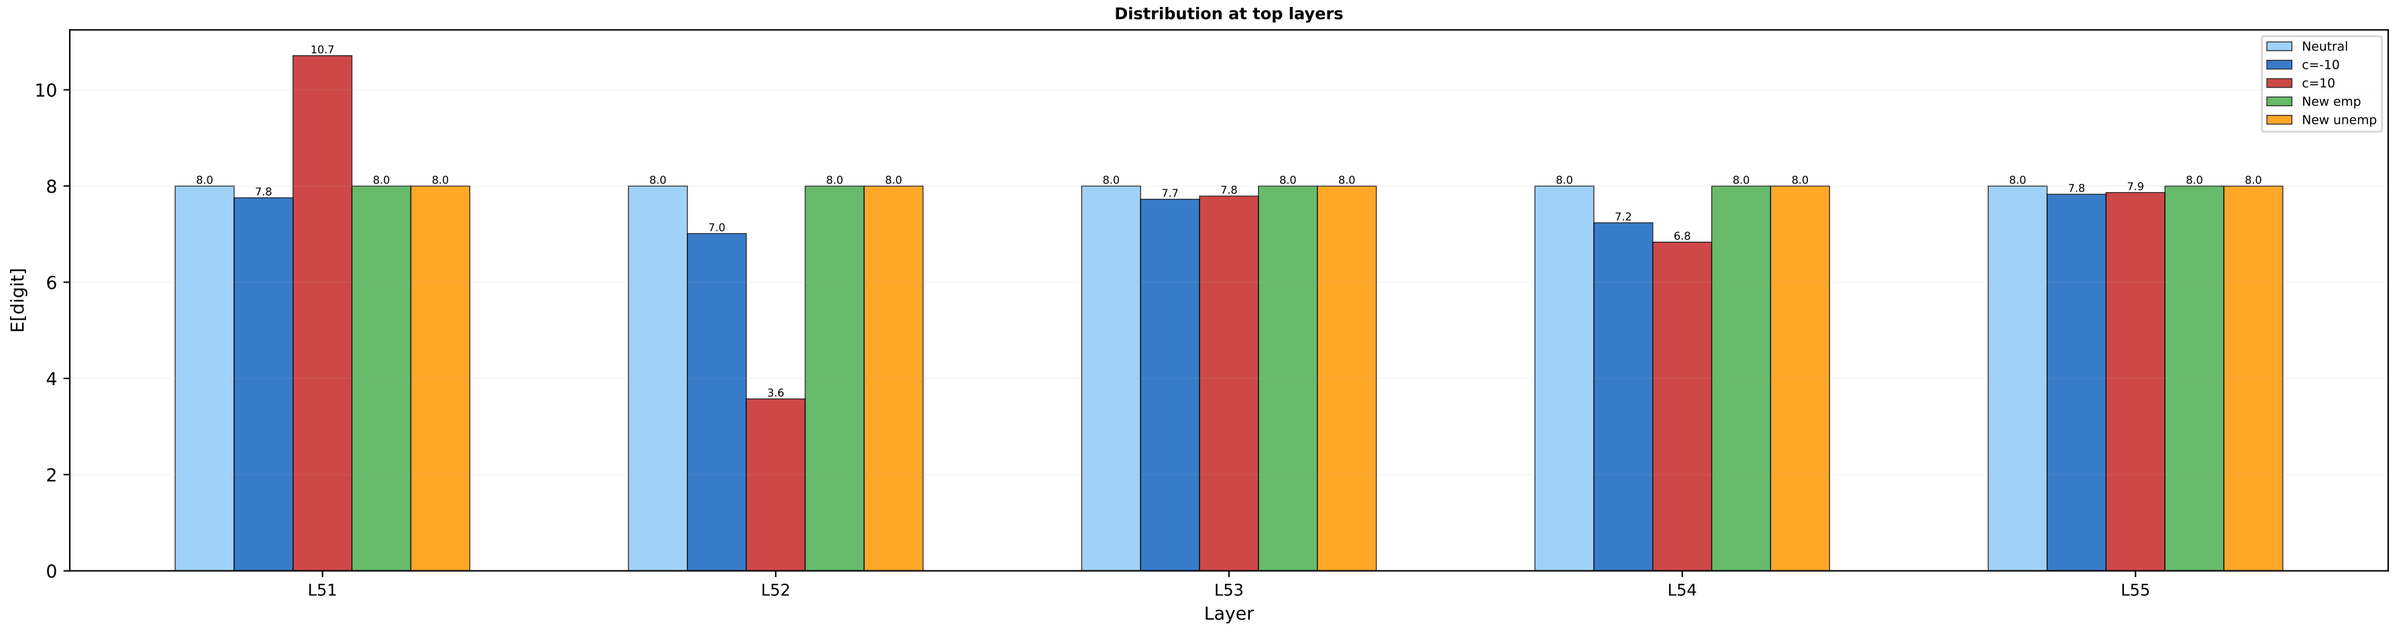


Complete with a single number only. | A typical adult leaves home at approximately ___:00 AM on a Tuesday. |

E2: Leave-home hour (Tue) | V7/cfg6

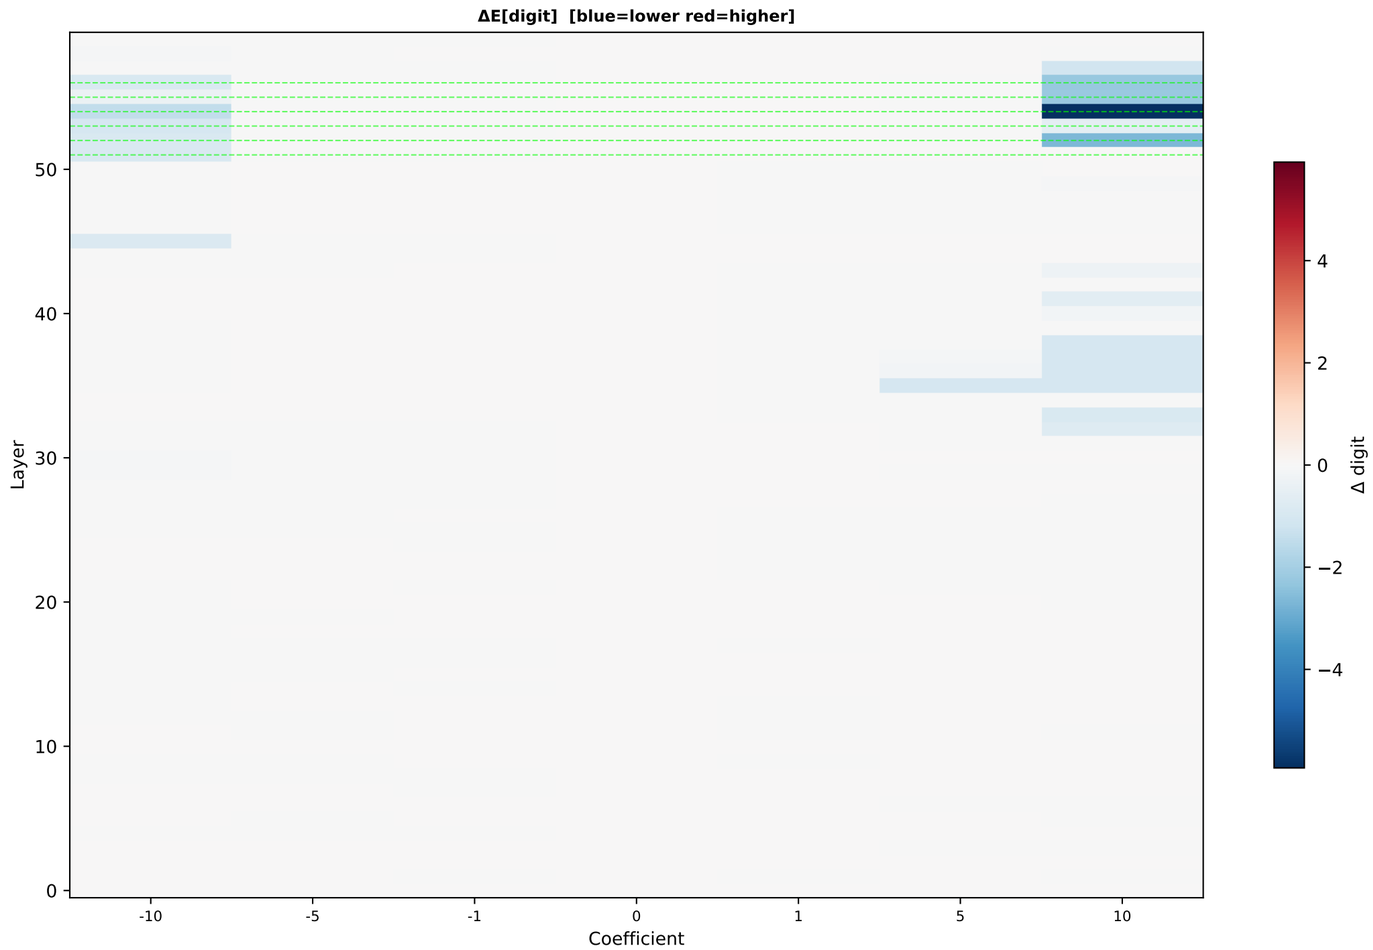


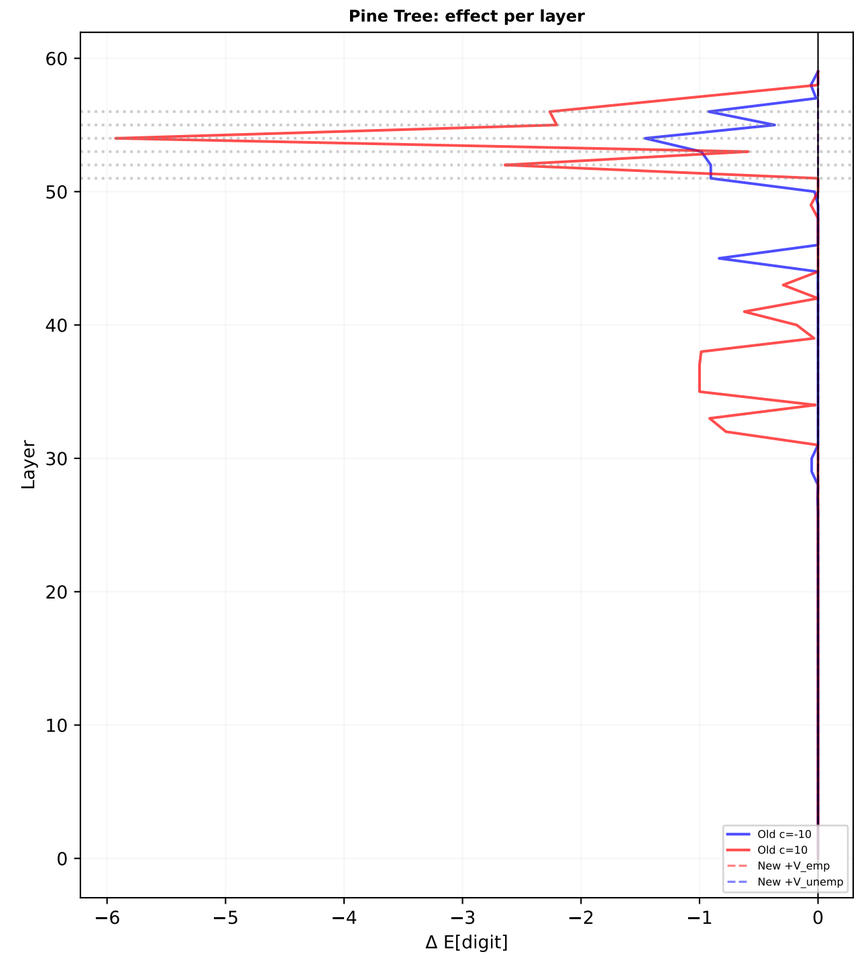


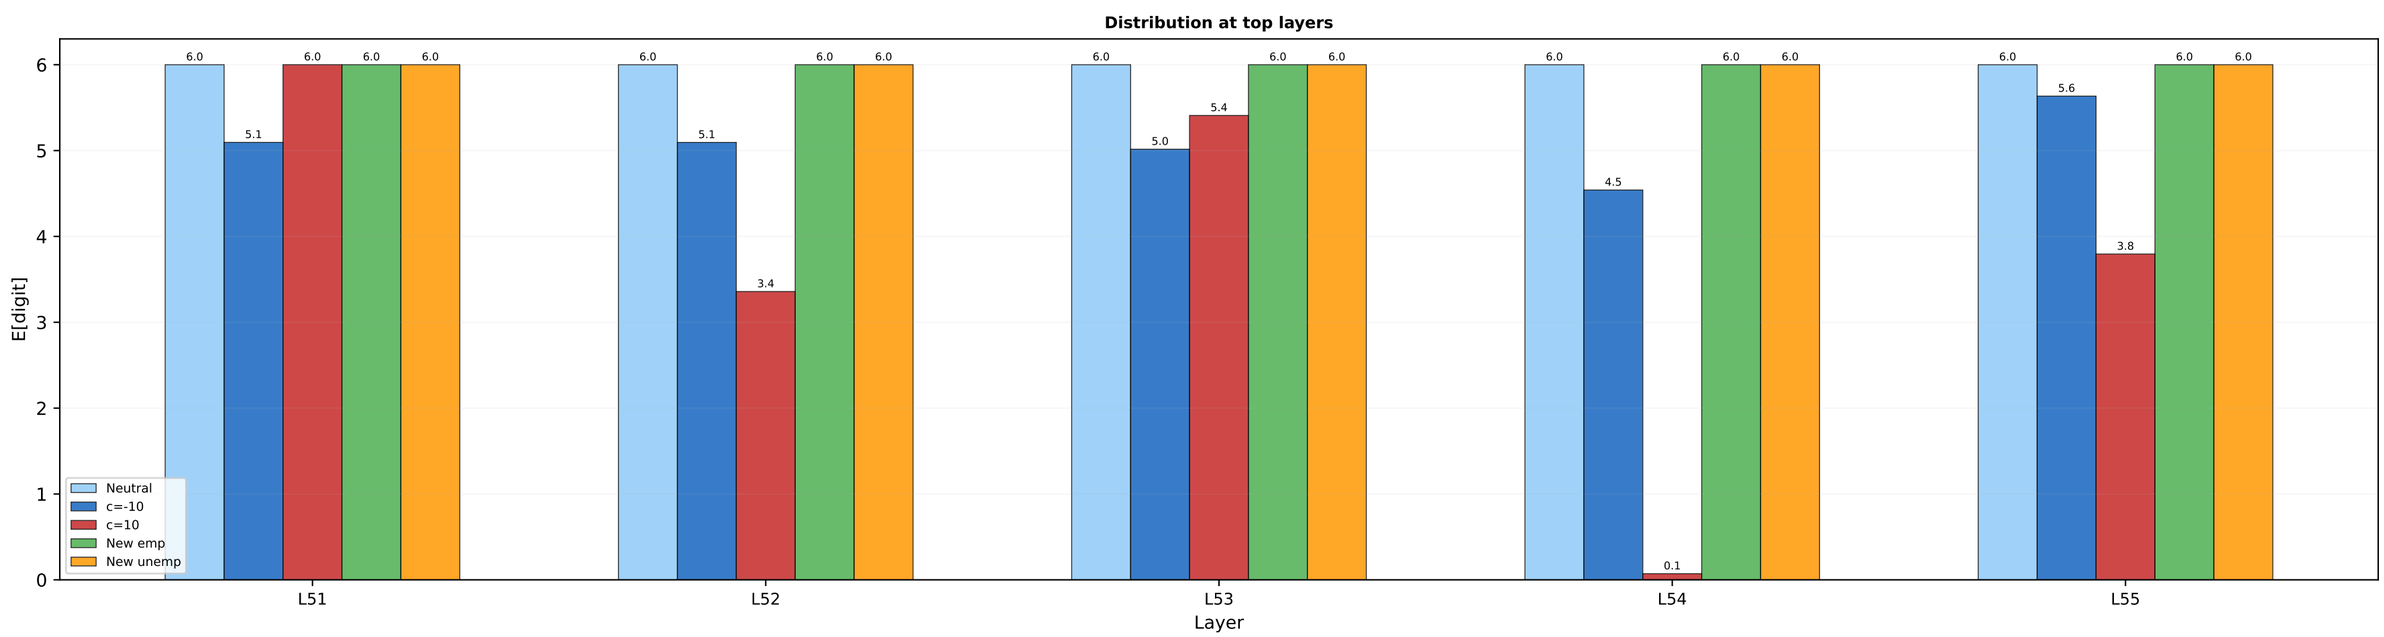


Complete with a single number only. | A typical adult arrives home at approximately ___:00 PM on a Tuesday. |

E3: Arrive-home hour (Tue) | V7/cfg6

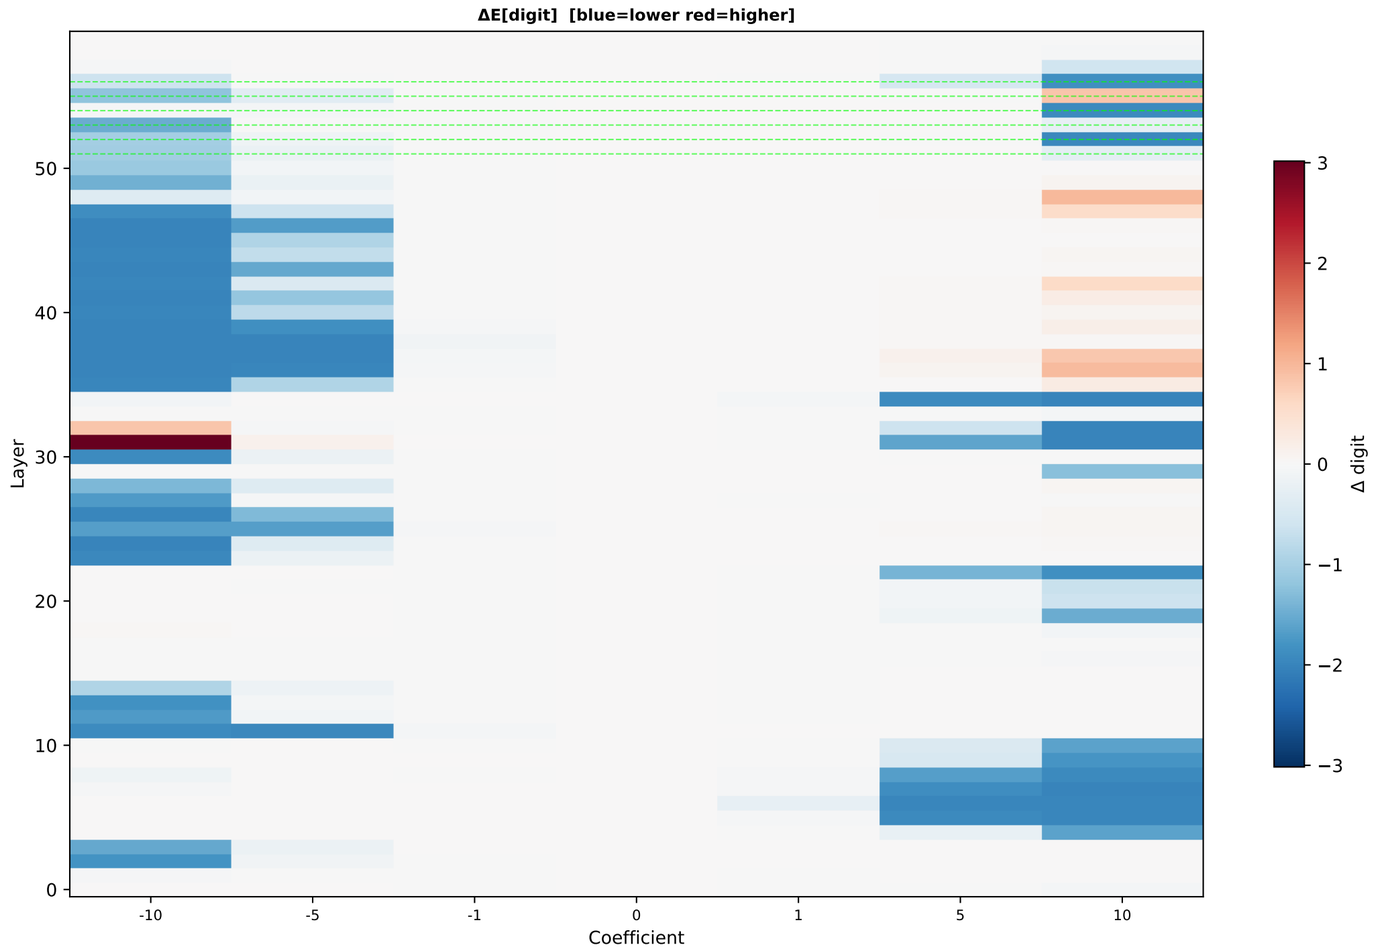


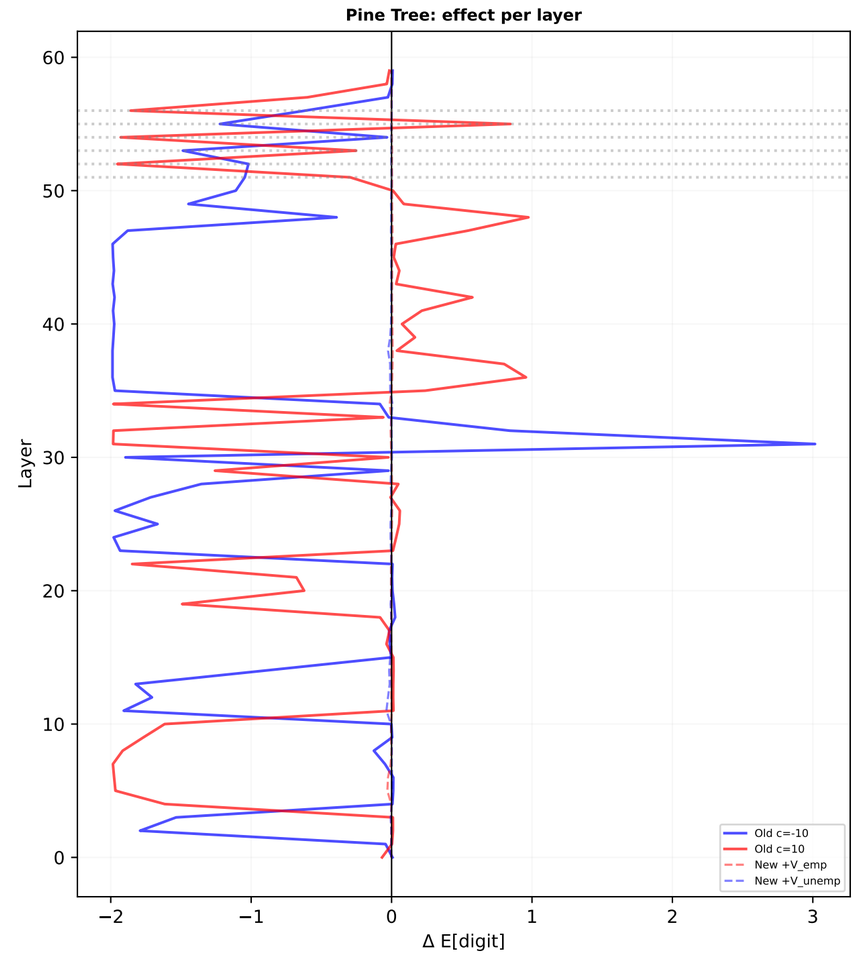


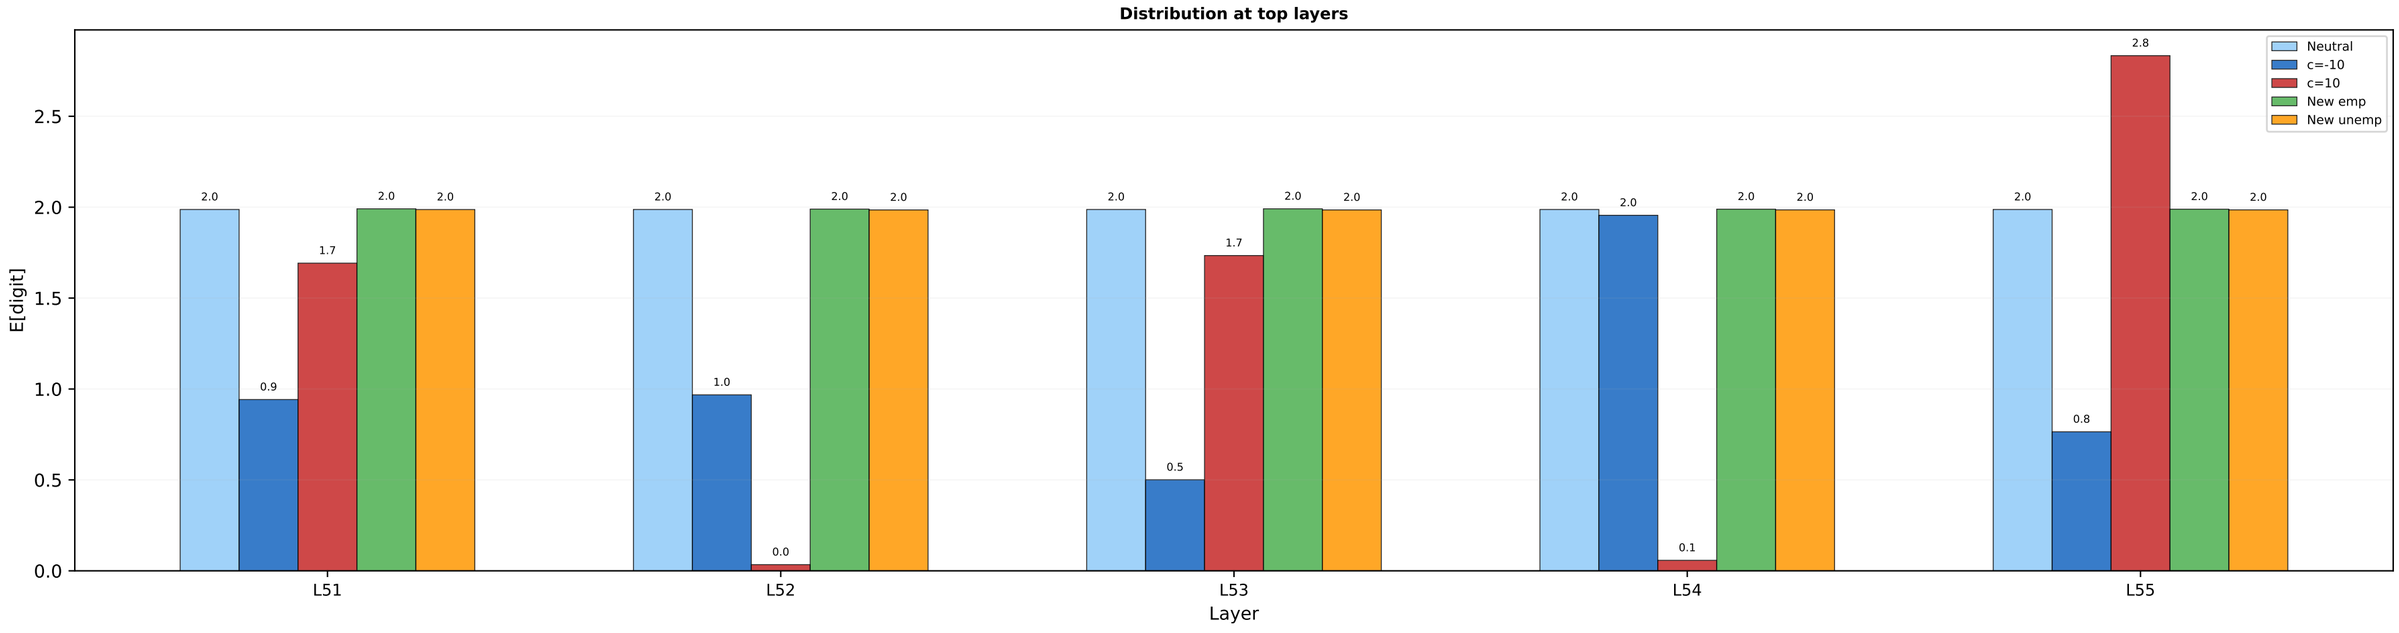


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at home between 8 AM and 6 PM on a Tuesday? ___ |

E4: Daytime hours at home (Tue) | V7/cfg6

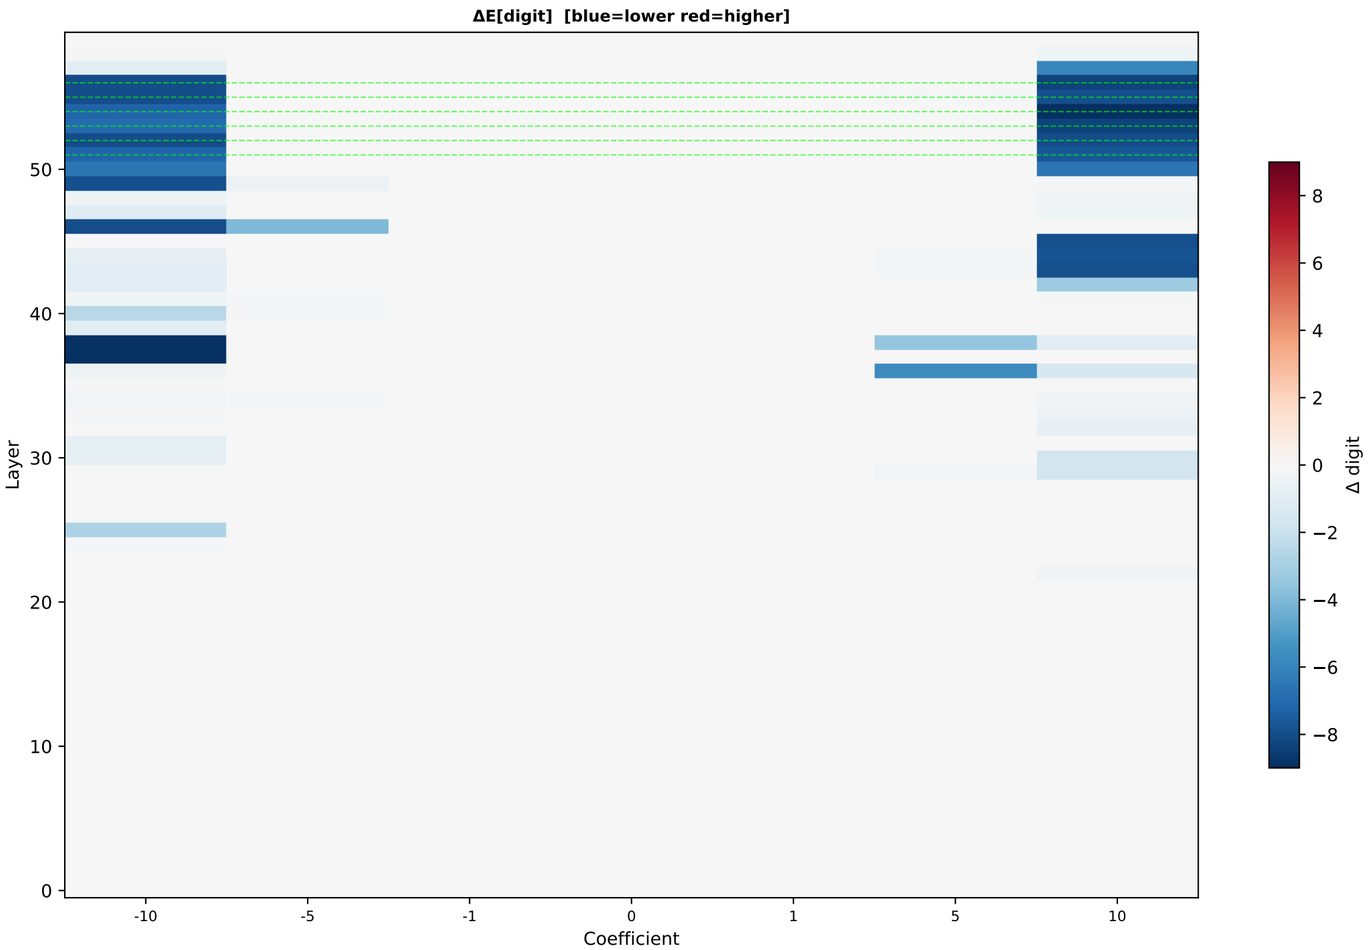


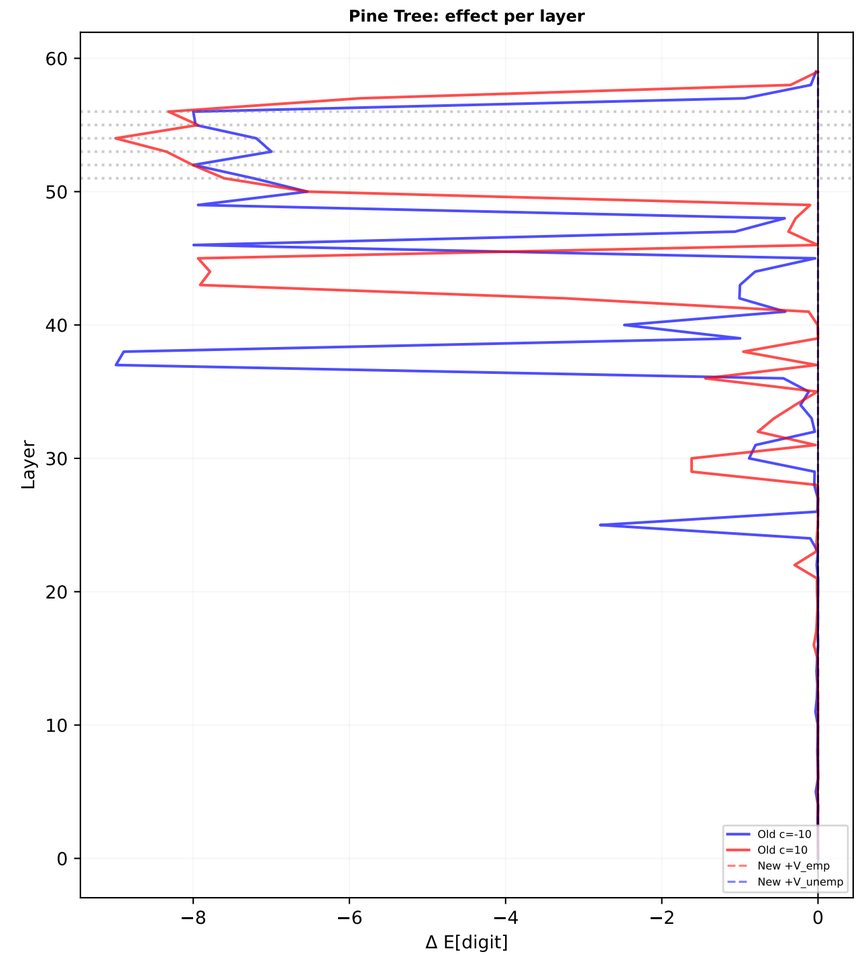


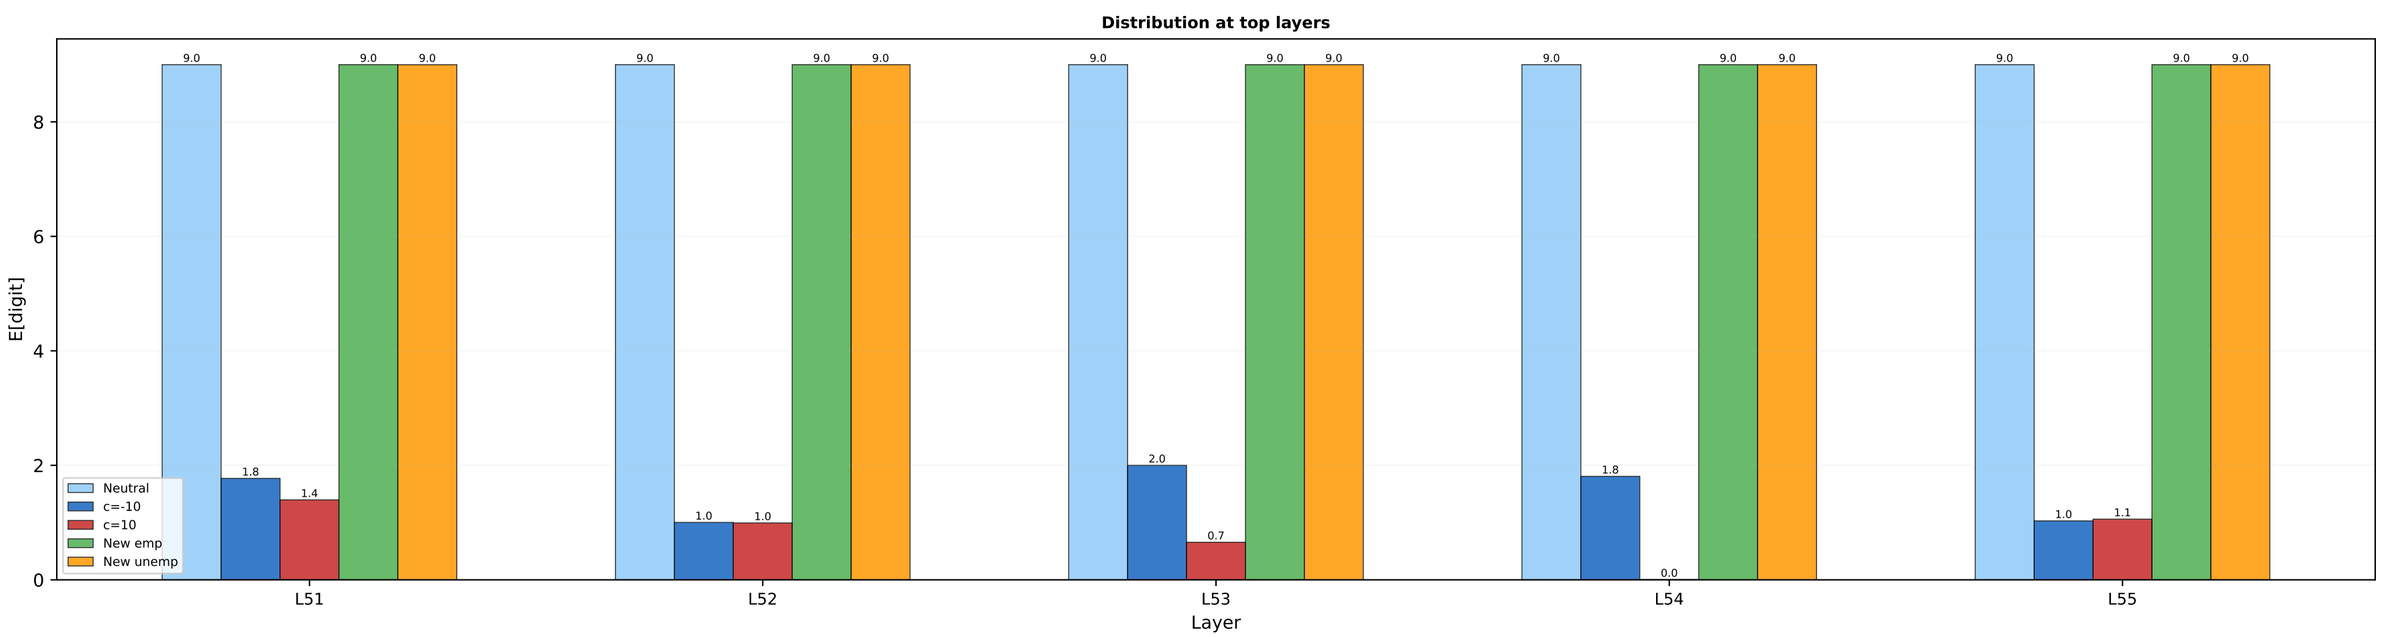


E5: Longest stretch outside (Tue) | V7/cfg6

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours a typical adult spends outside the home on a Tuesday? ___ |

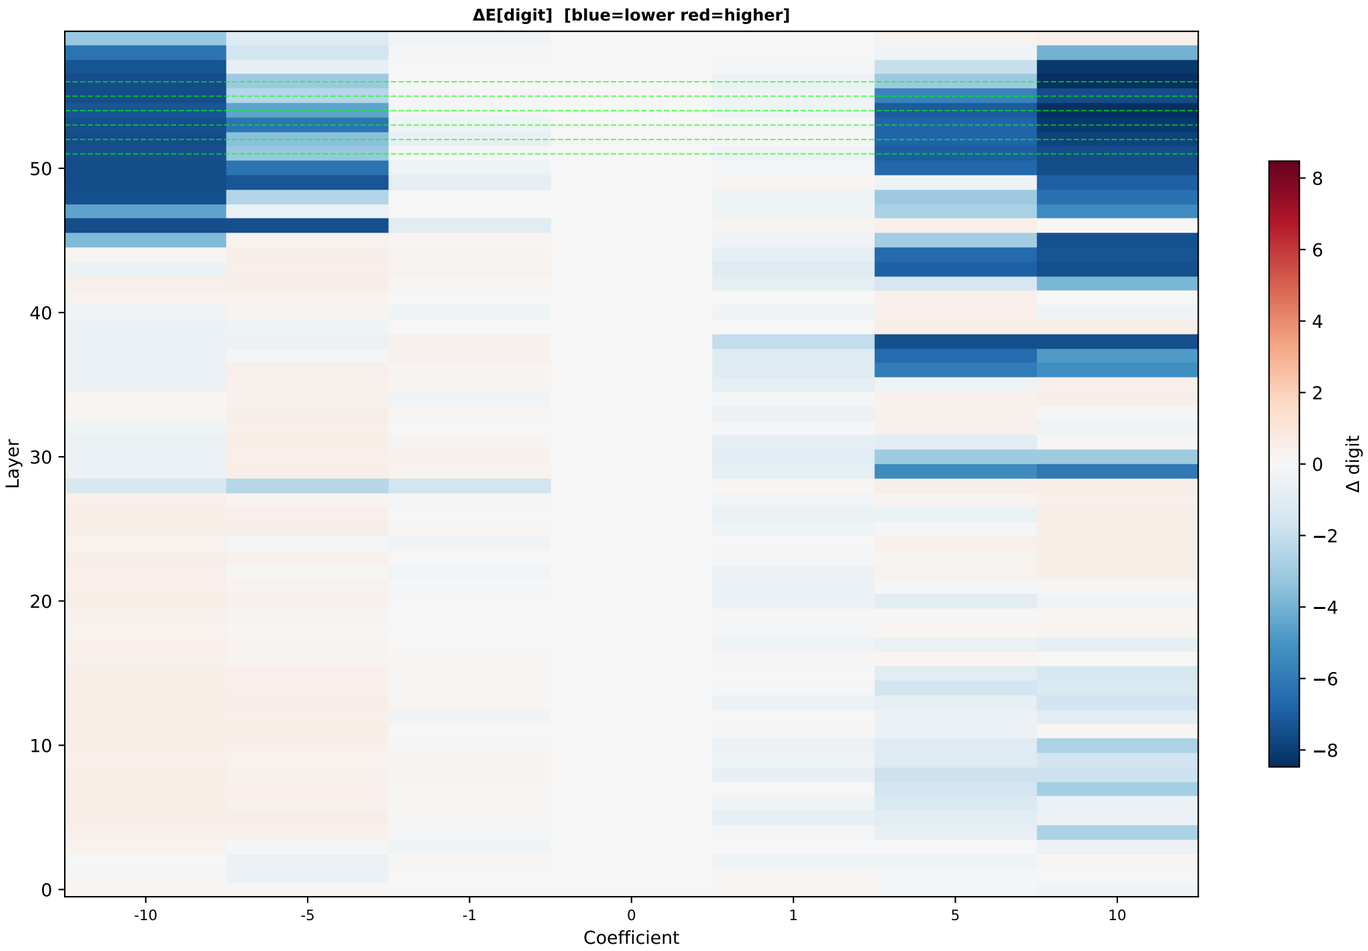


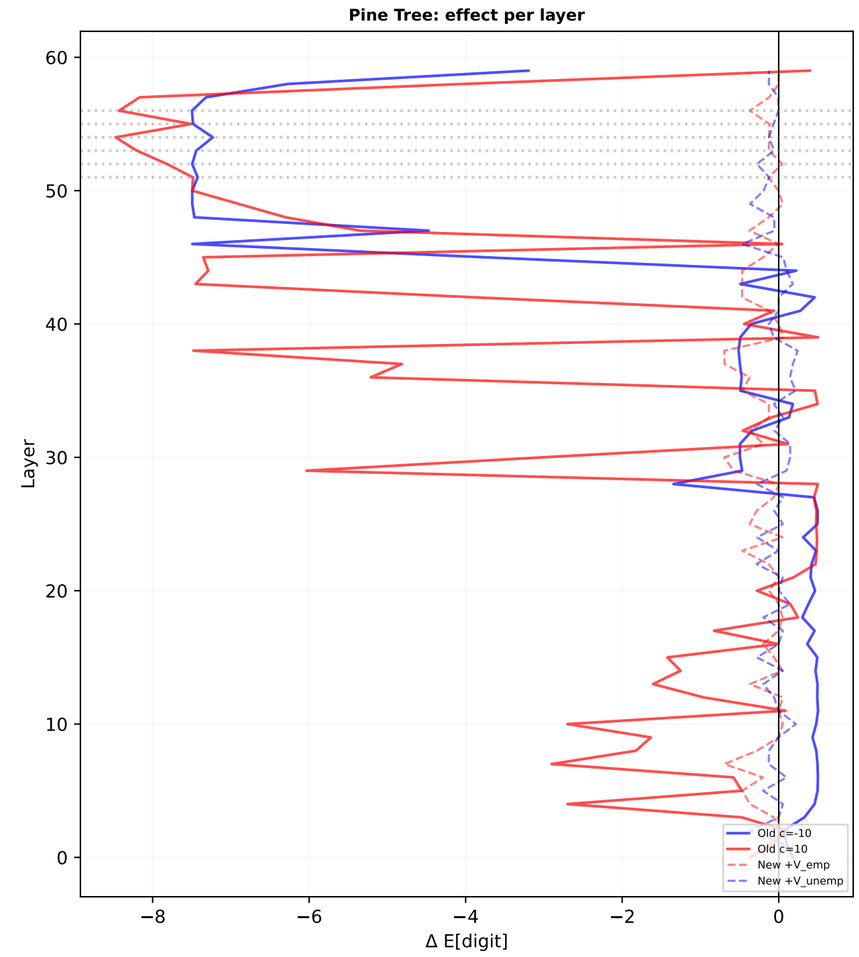


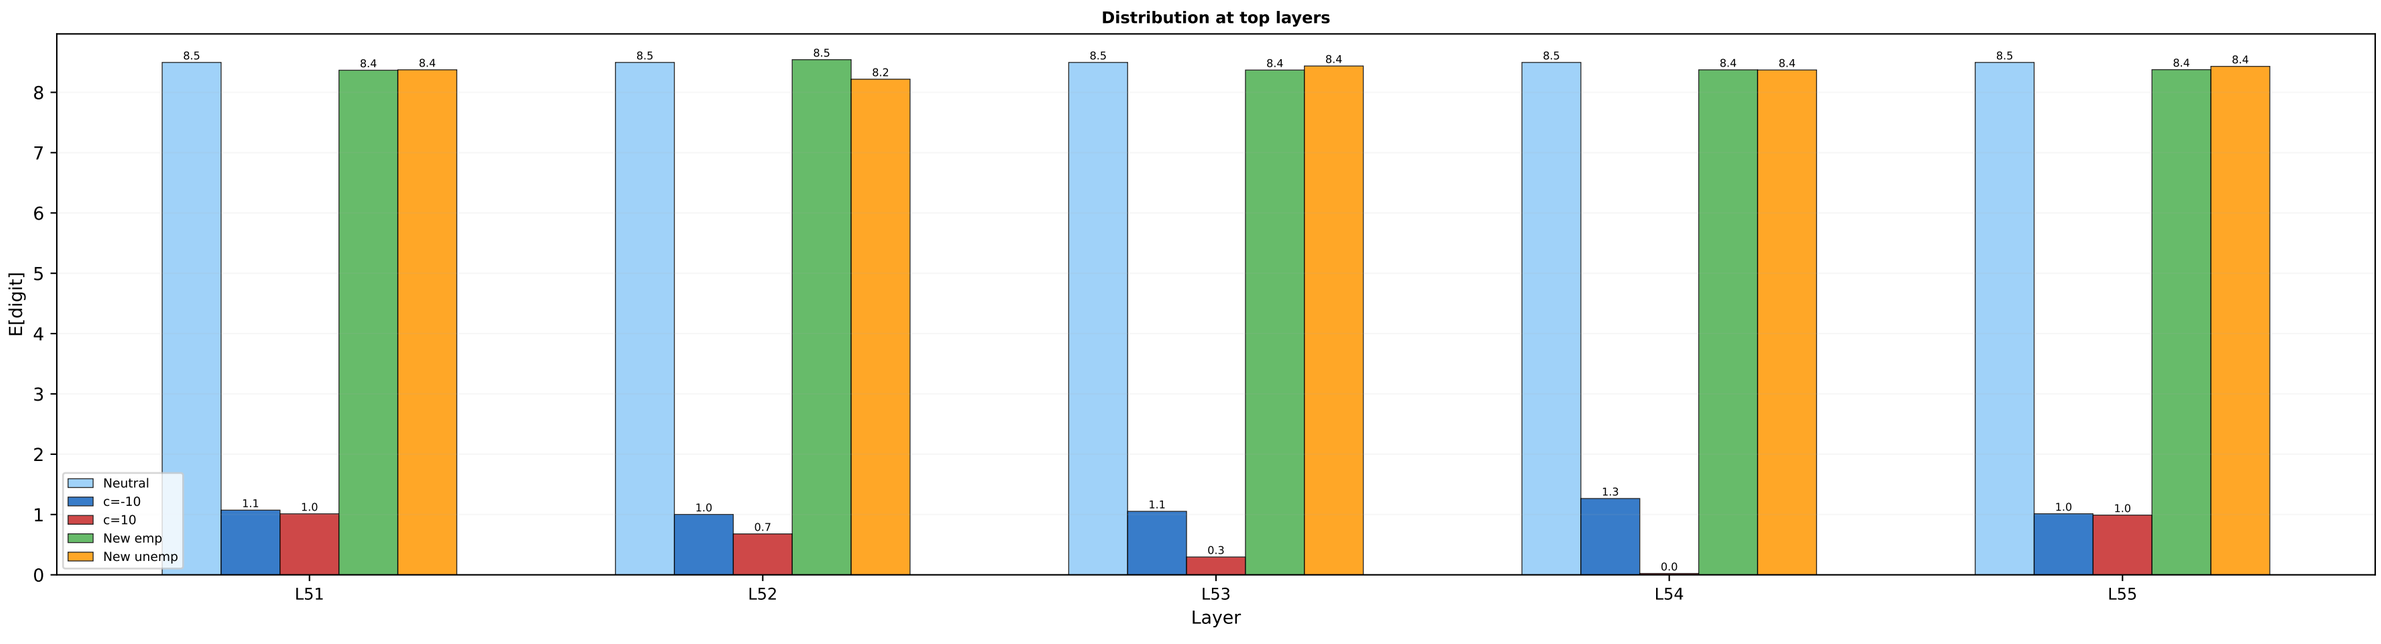


Answer with a single digit from 0 to 9. | How many total hours is a typical adult away from home on a Tuesday? ___ |

E6: Total hours away (Tue) | V7/cfg6

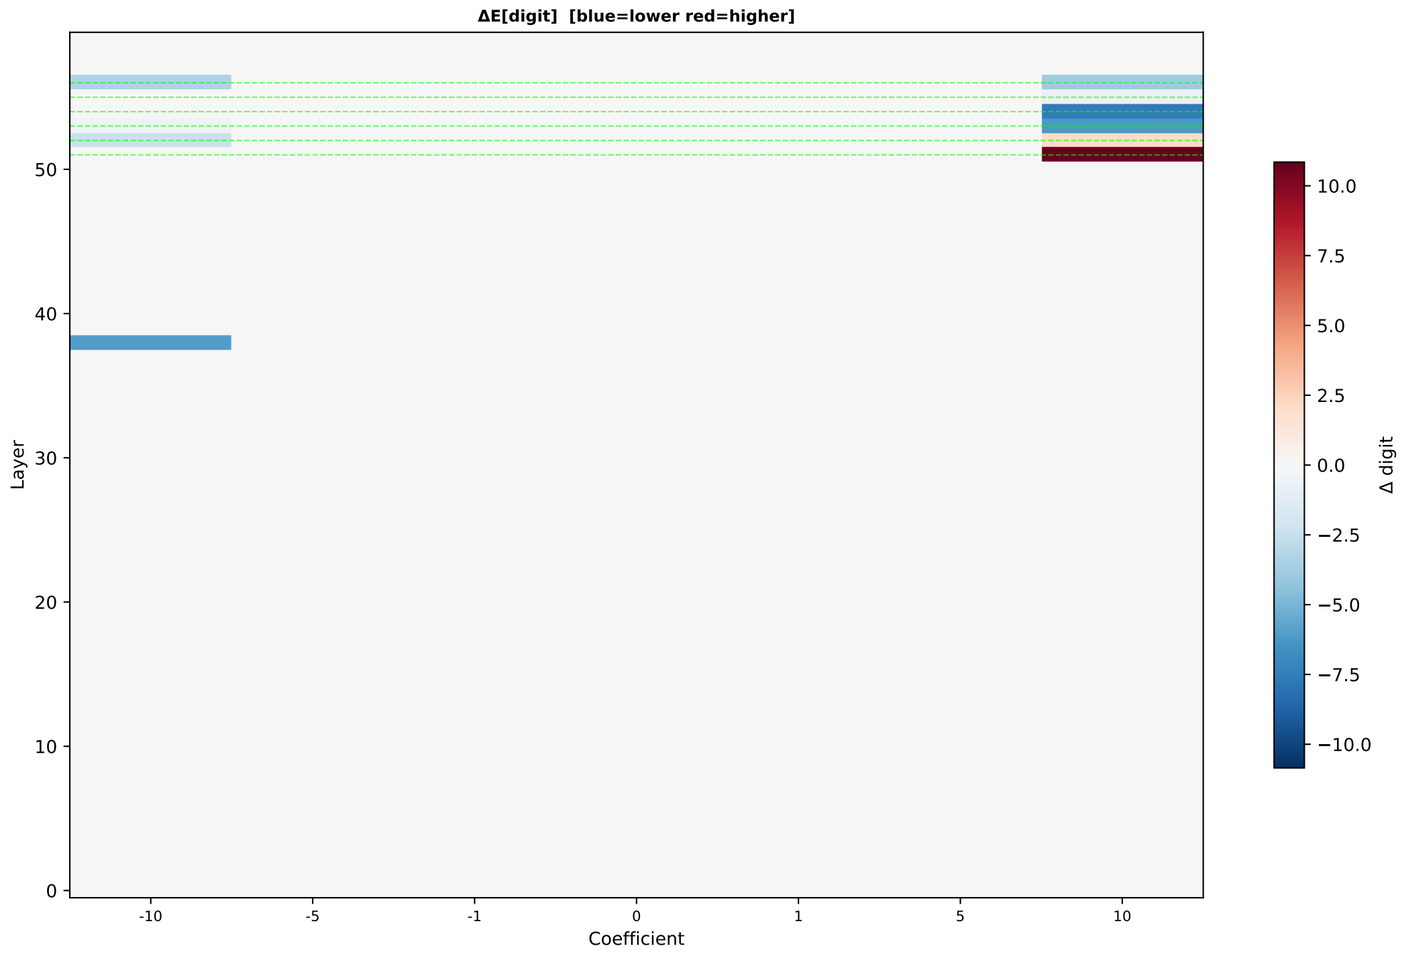


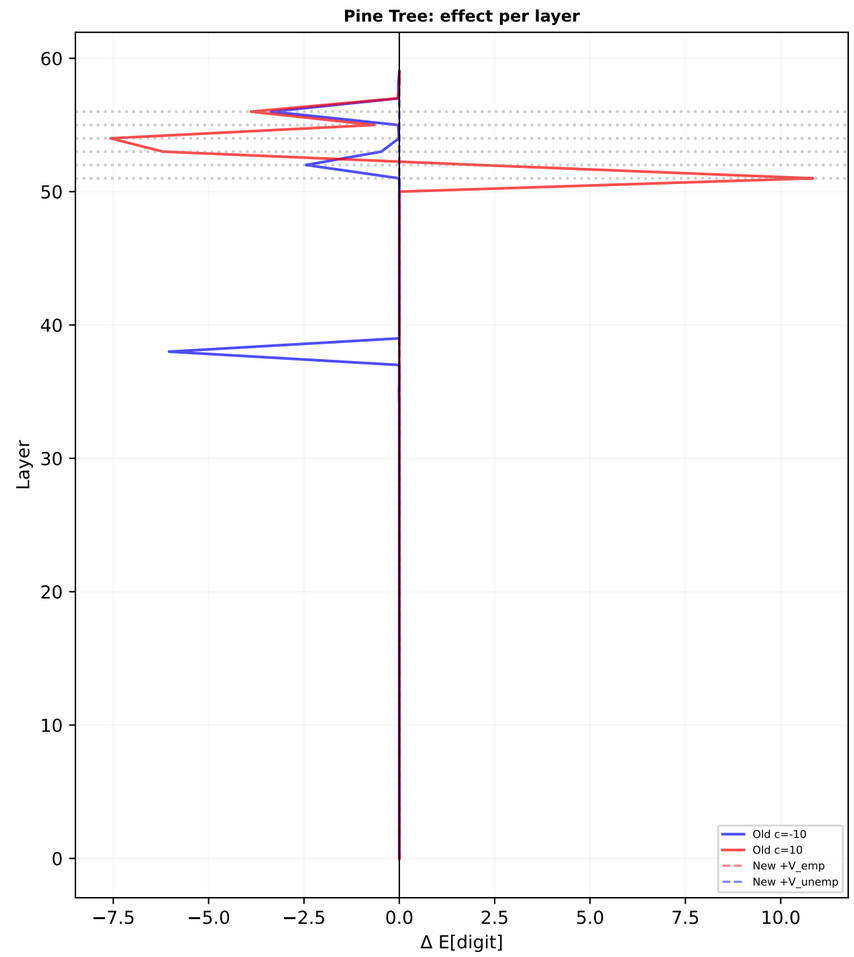


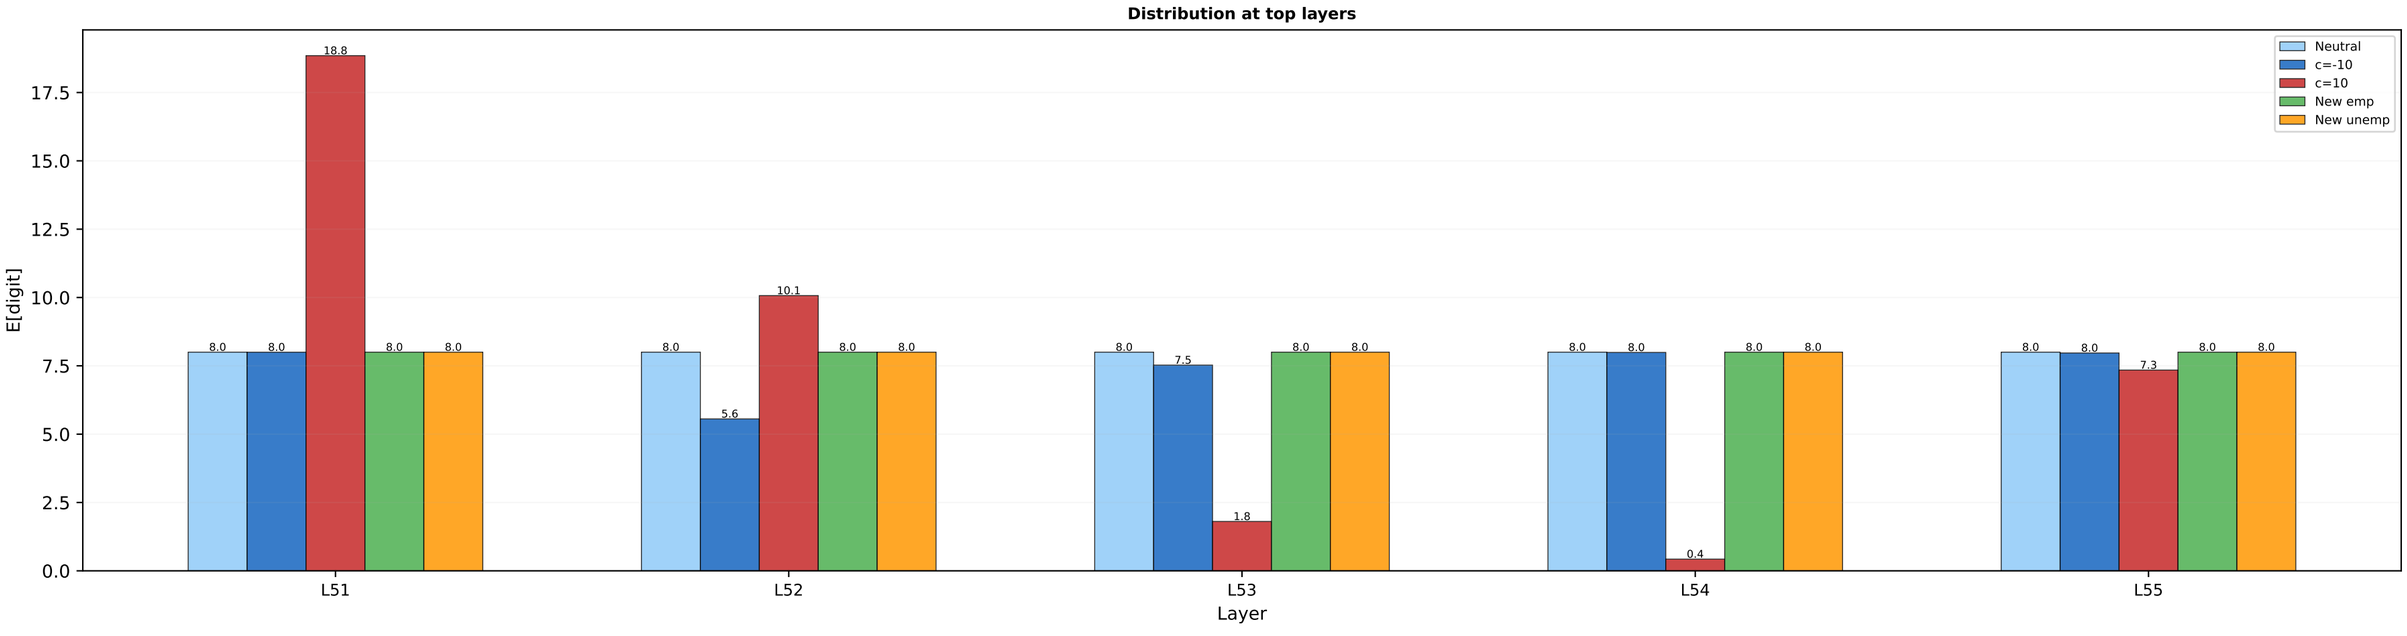


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at their most frequently visited non-home location on a Tuesday? ___ |

E7: Hours at primary non-home location (Tue) | V7/cfg6

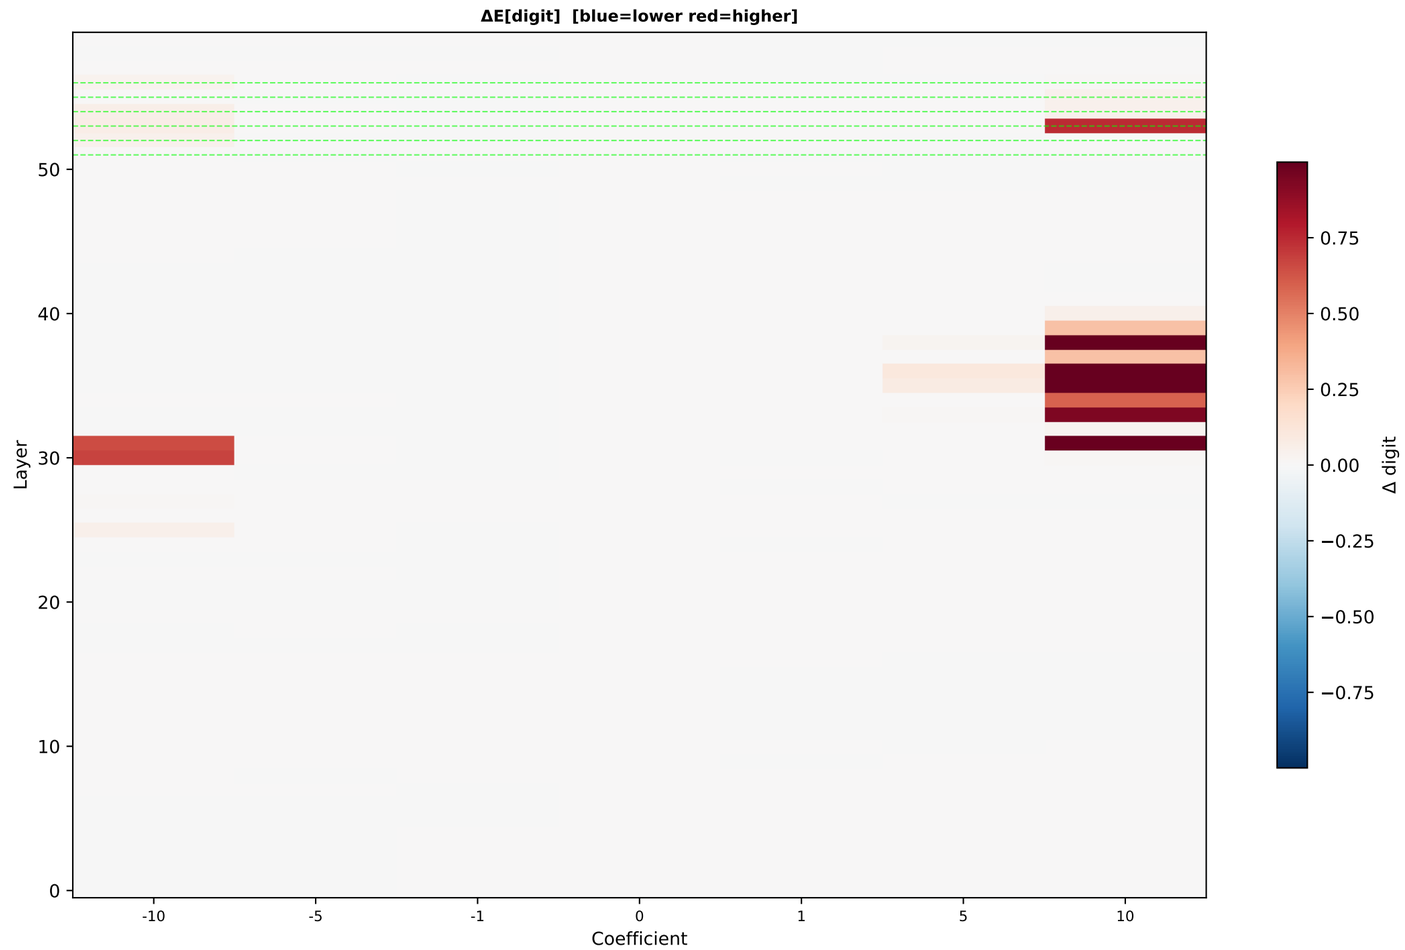


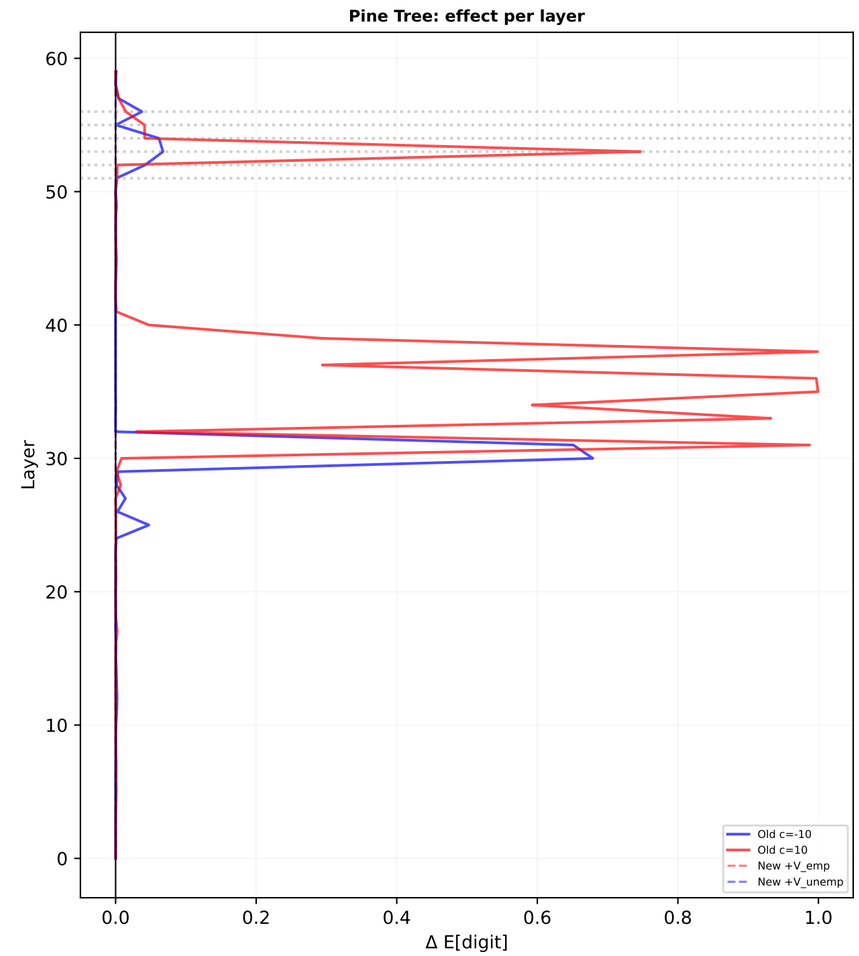


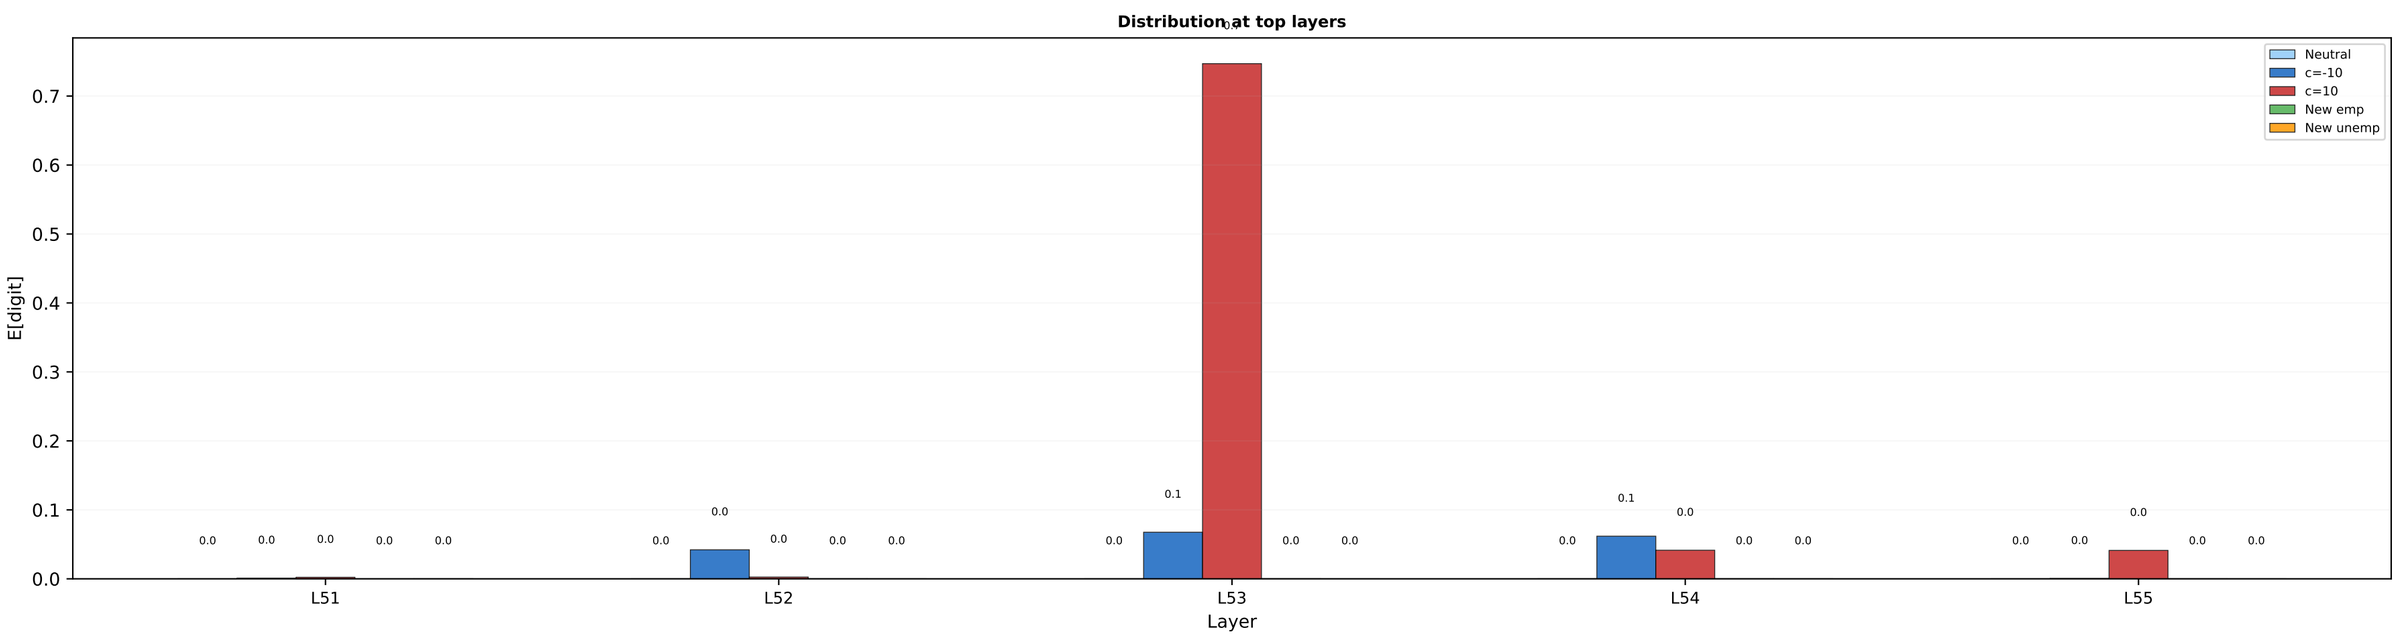


E8: Daytime home returns (Tue) | V7/cfg6

Answer with a single digit from 0 to 9. | How many times does a typical adult return home during the daytime (8 AM to 6 PM) on a Tuesday? ___ |

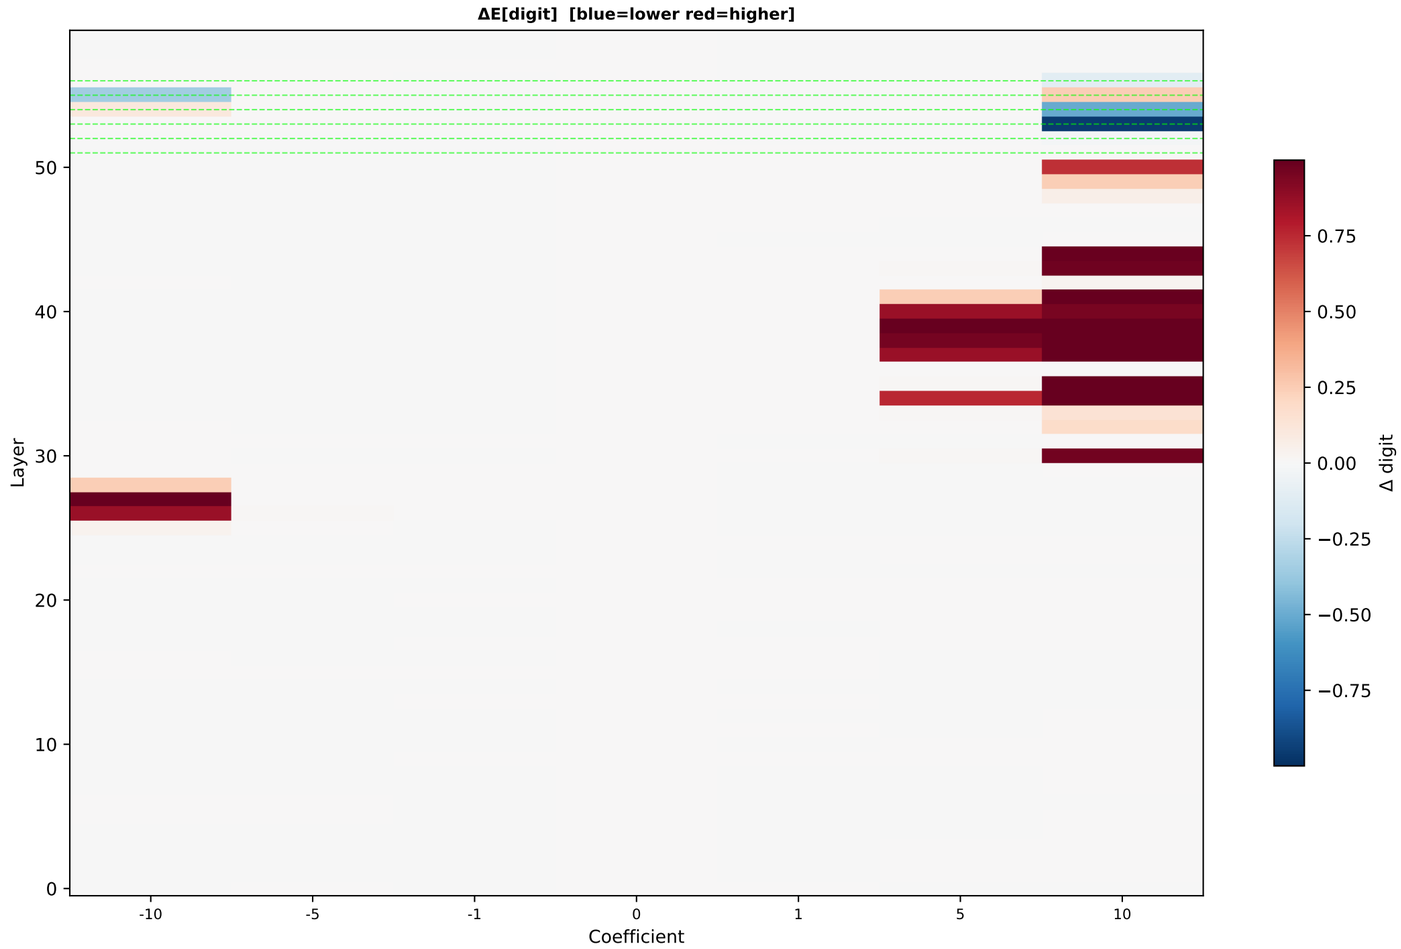


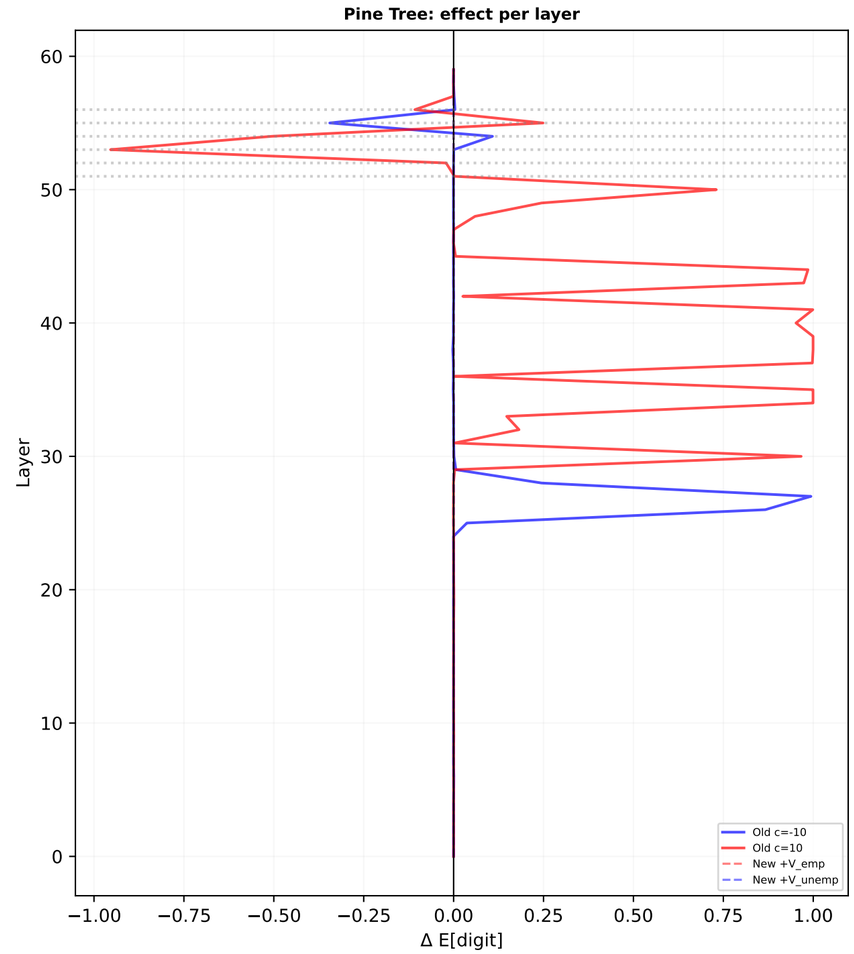


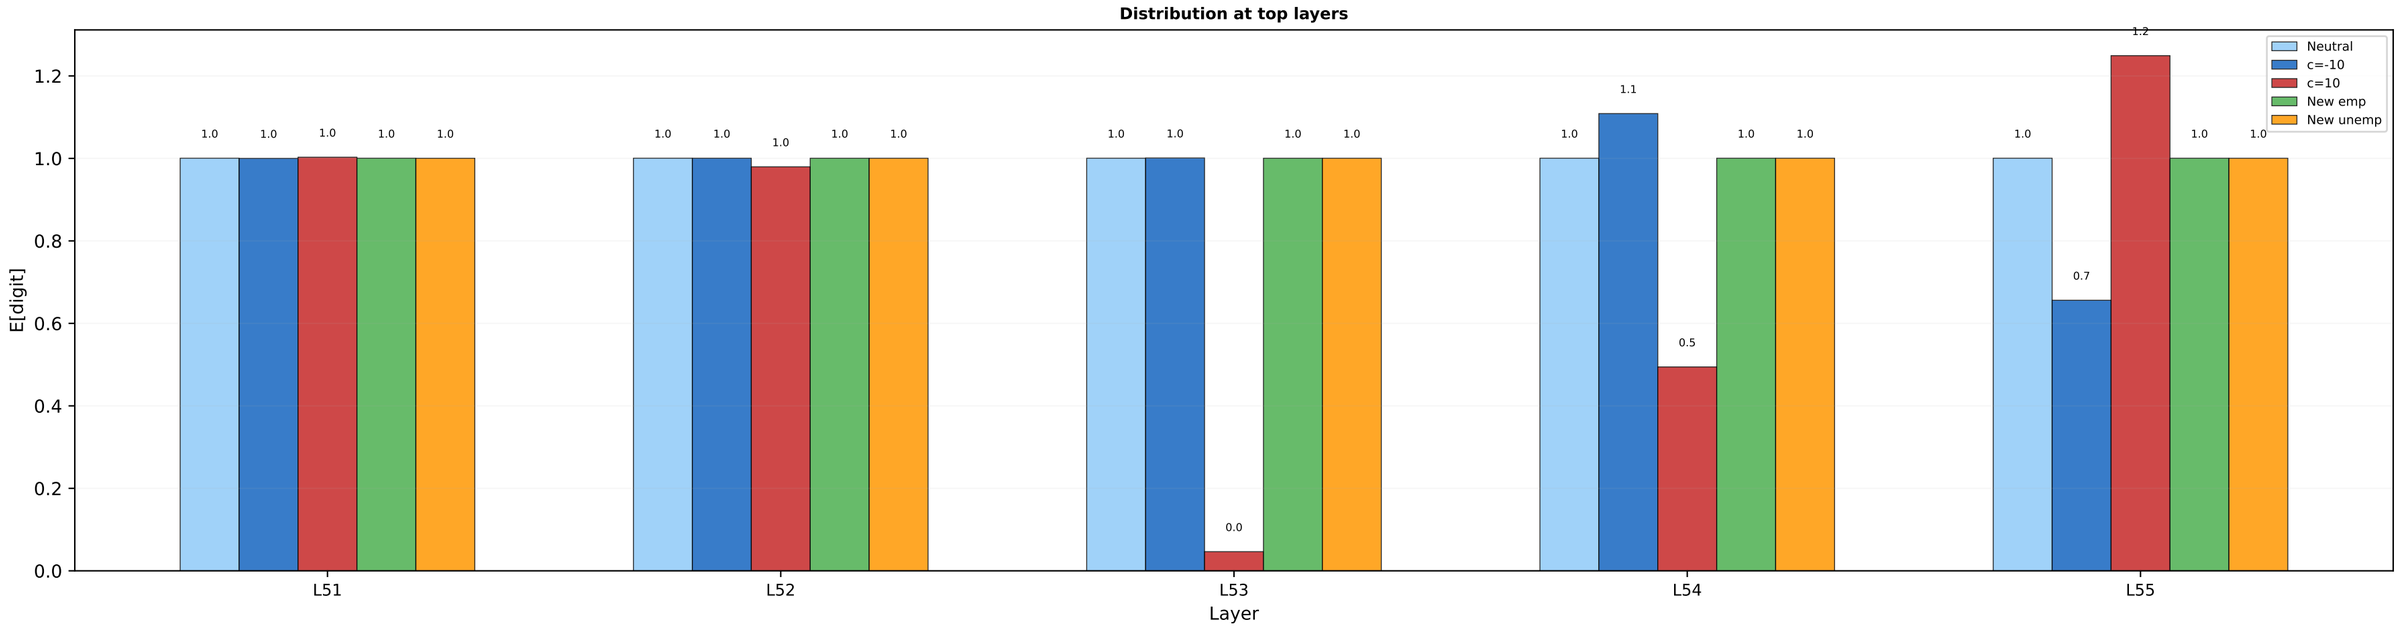


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend commuting or in transit on a Tuesday? ___ |

E9: Commute/transit hours (Tue) | V7/cfg6

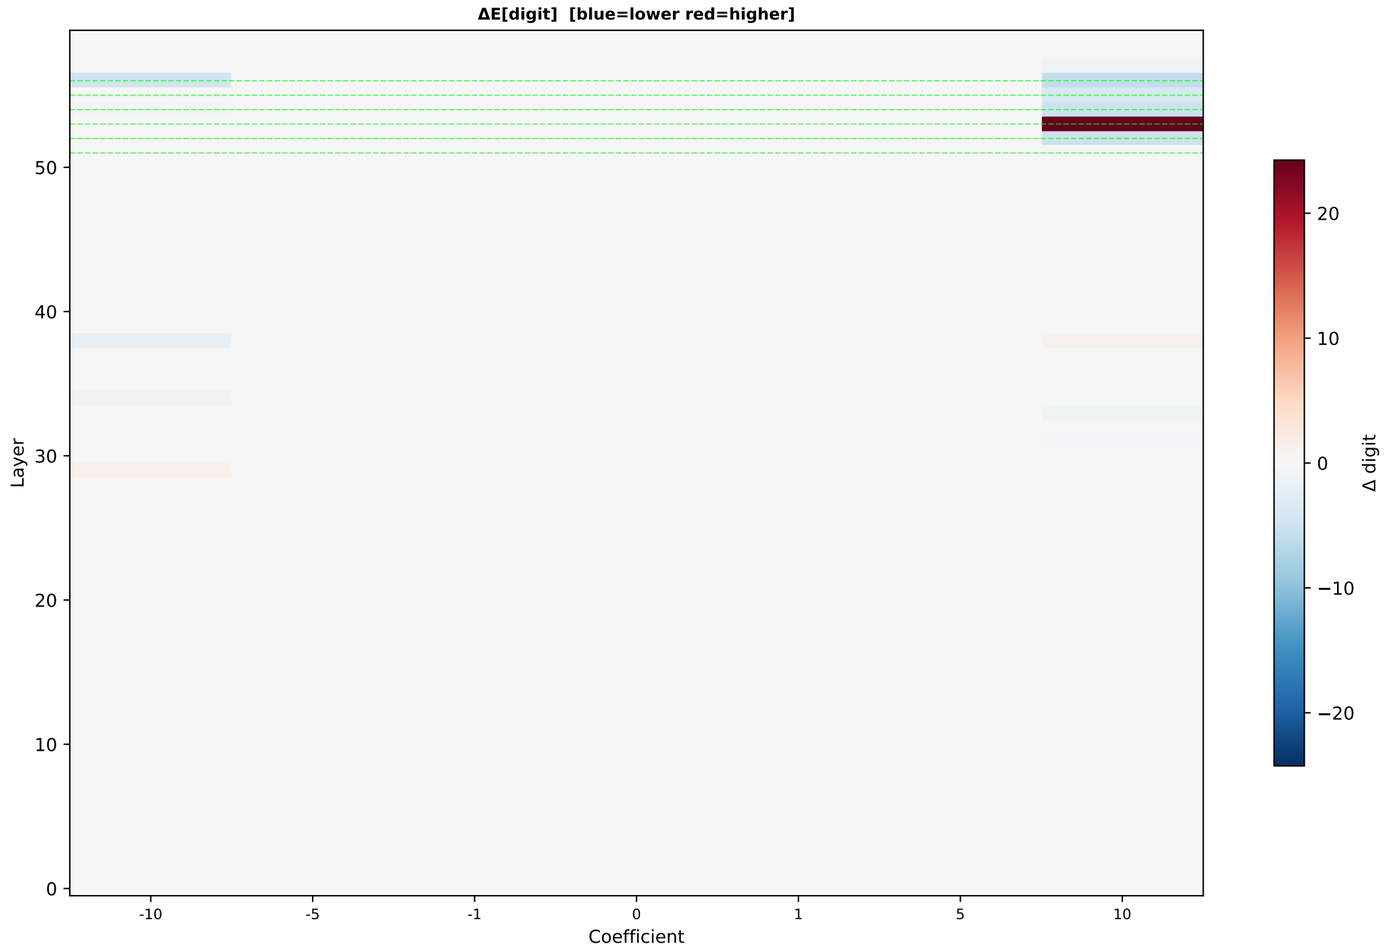


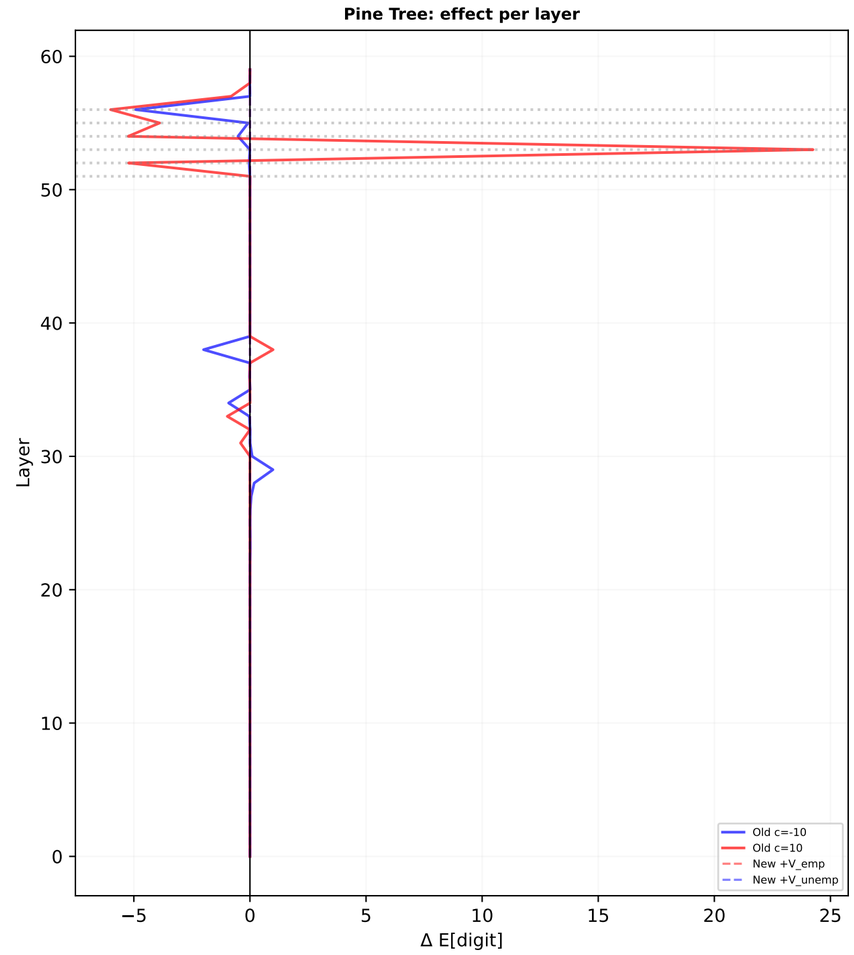


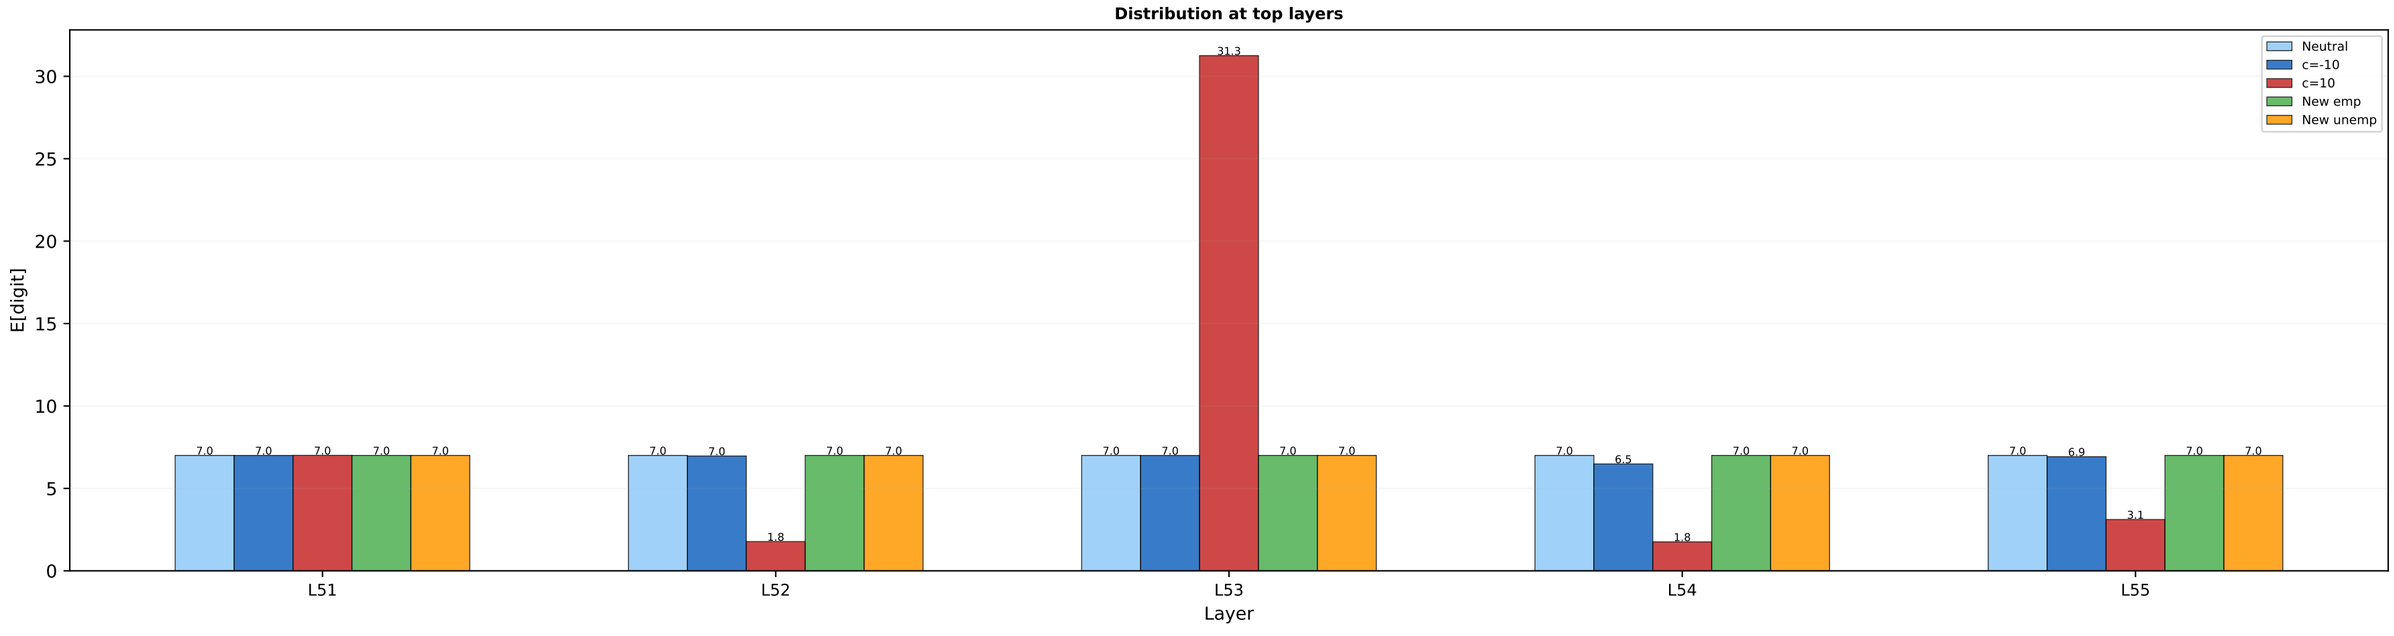


E10: Week-to-week consistency (Tue) | V7/cfg6

Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is a typical adult's Tuesday schedule from week to week? (0 = completely different, 9 = identical every week) ___ |

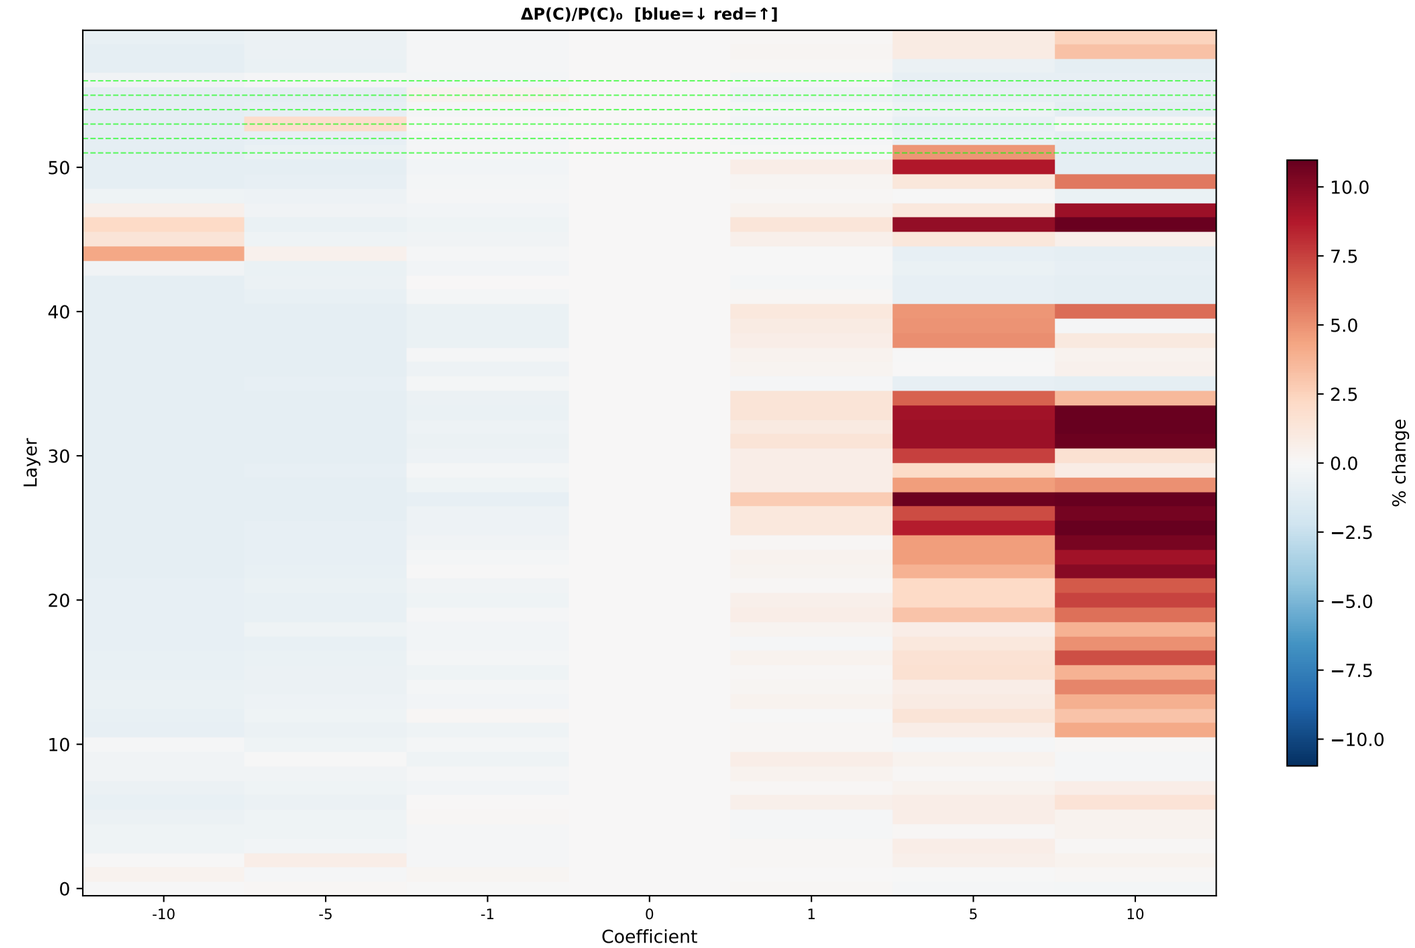


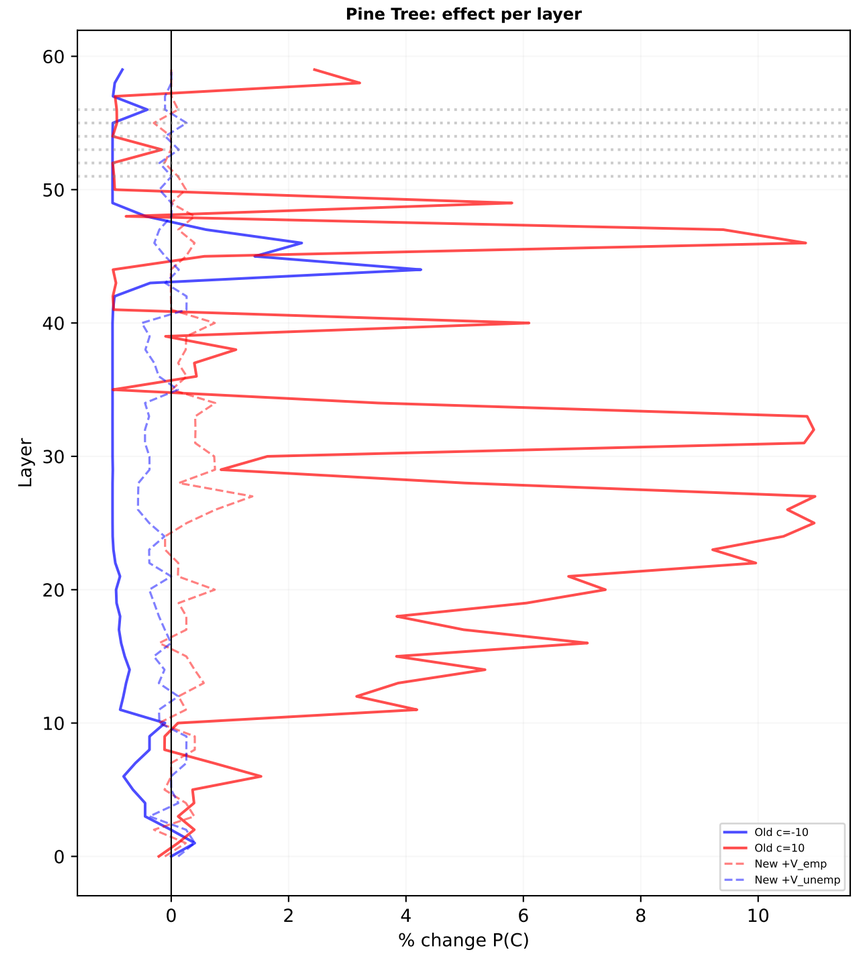


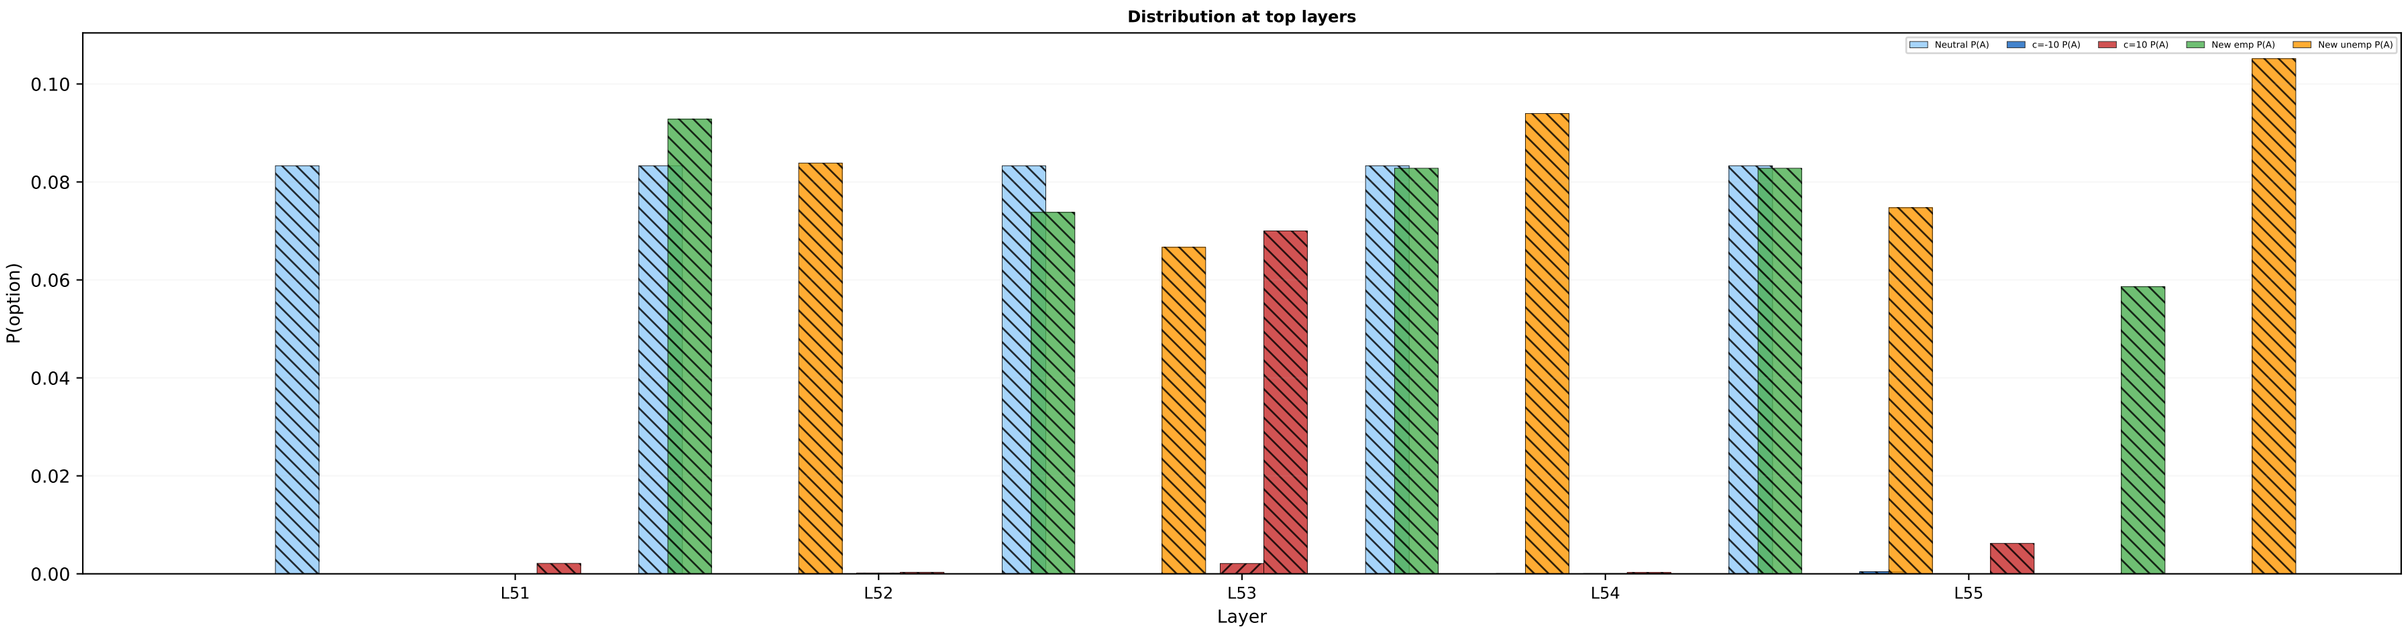


E11: 8 AM Tuesday status | V7/cfg6

At 8:00 AM on a Tuesday, a typical adult is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

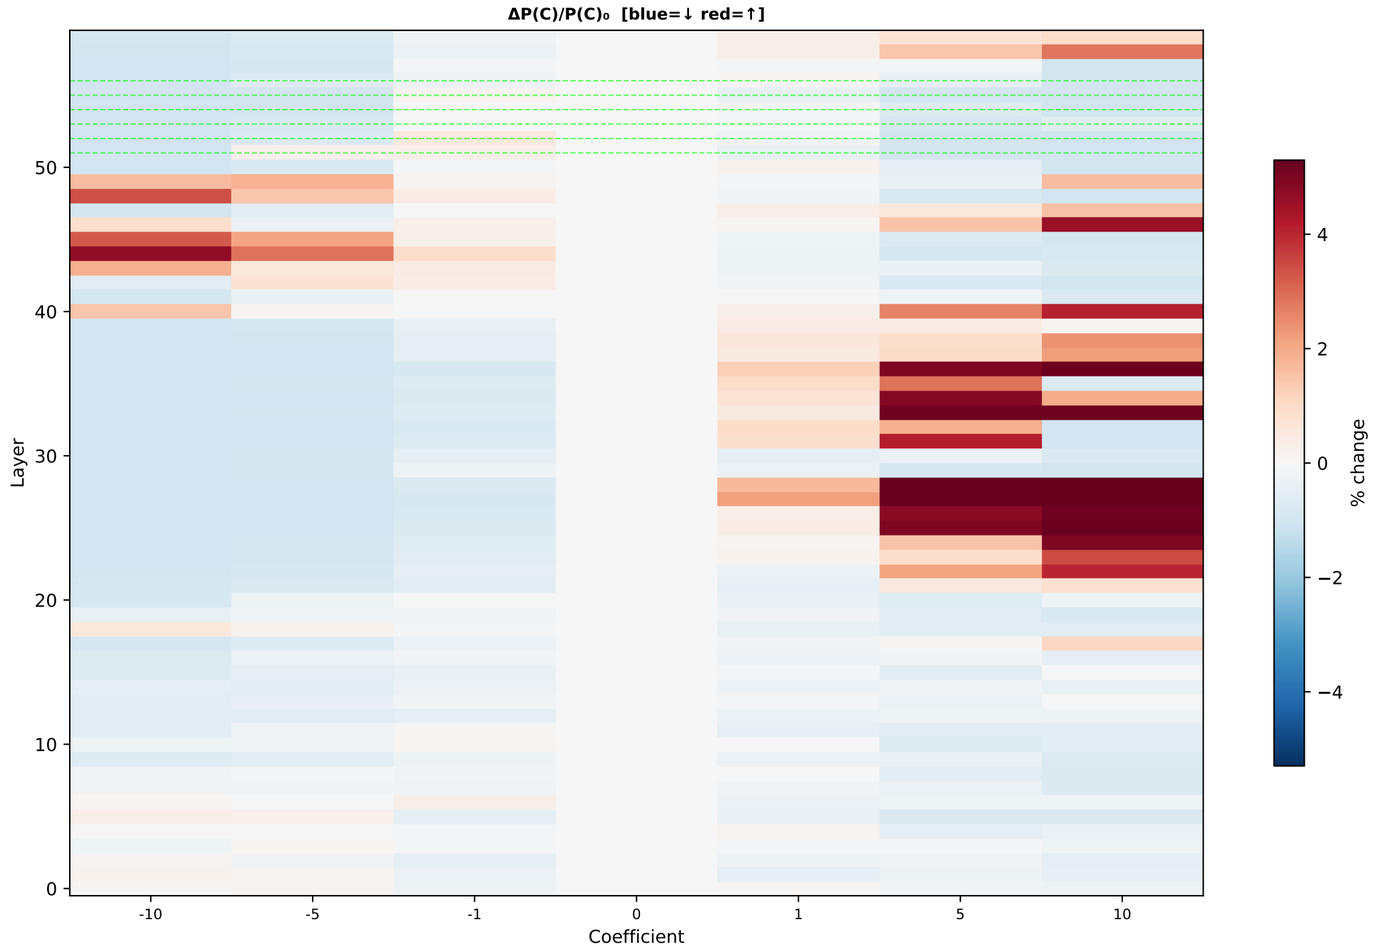


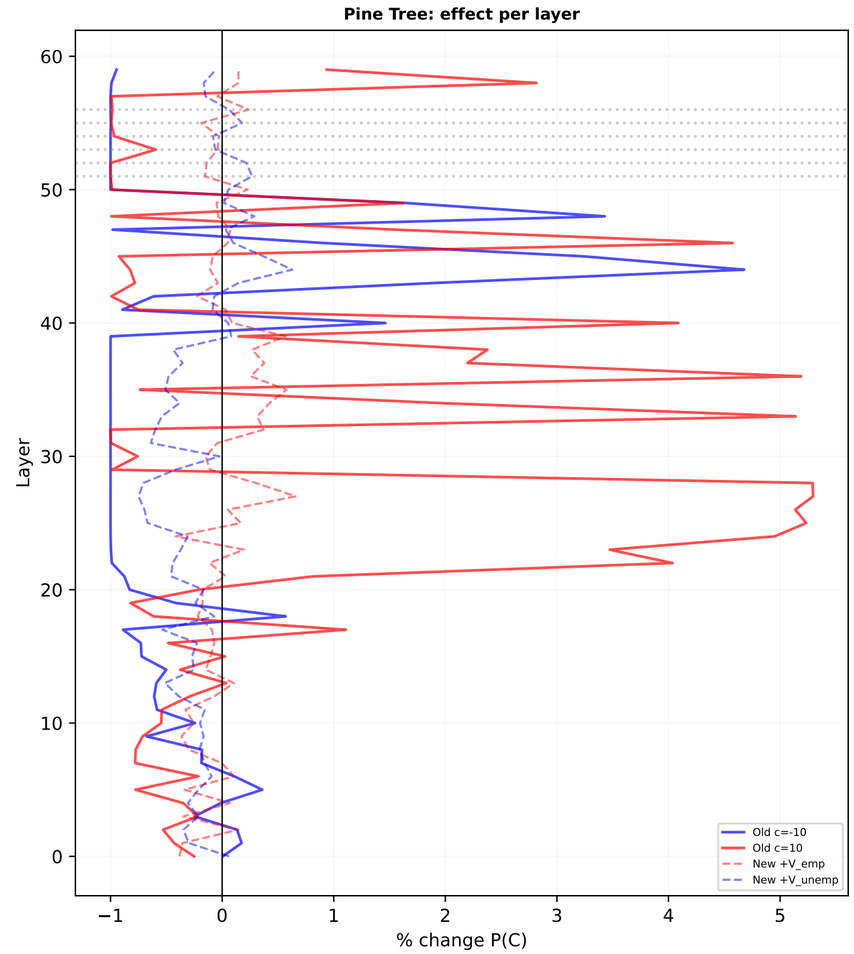


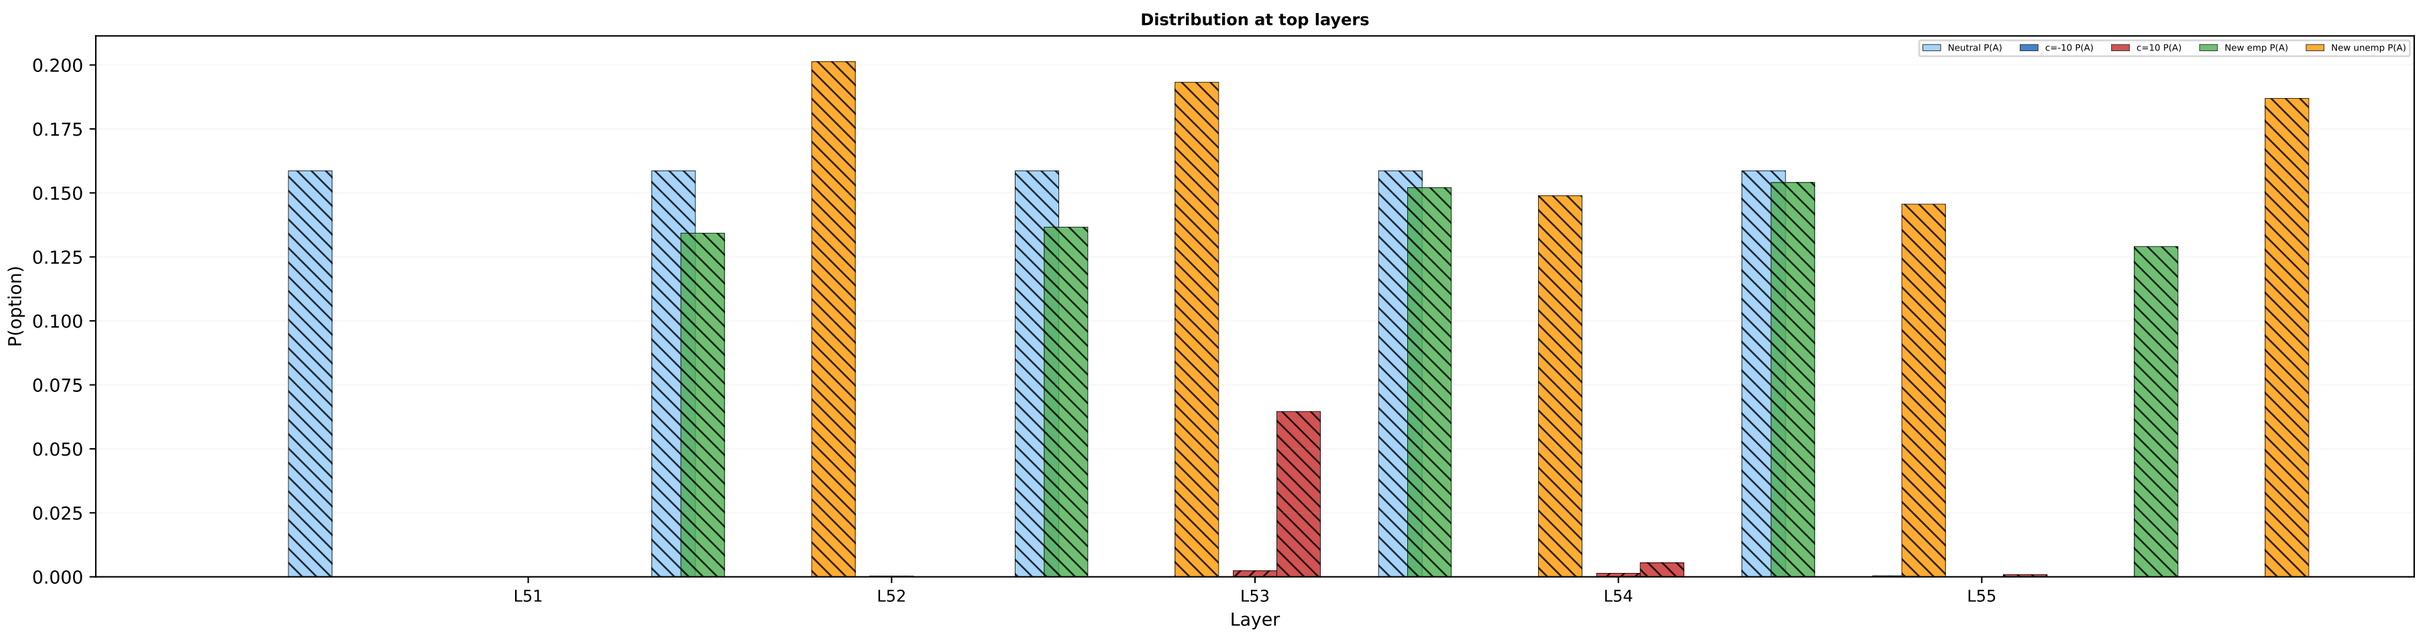


E12: 10:30 AM coffee availability | V7/cfg6

A typical adult is asked: "Are you usually free to meet for coffee at 10:30 AM on a Tuesday?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends on the week; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

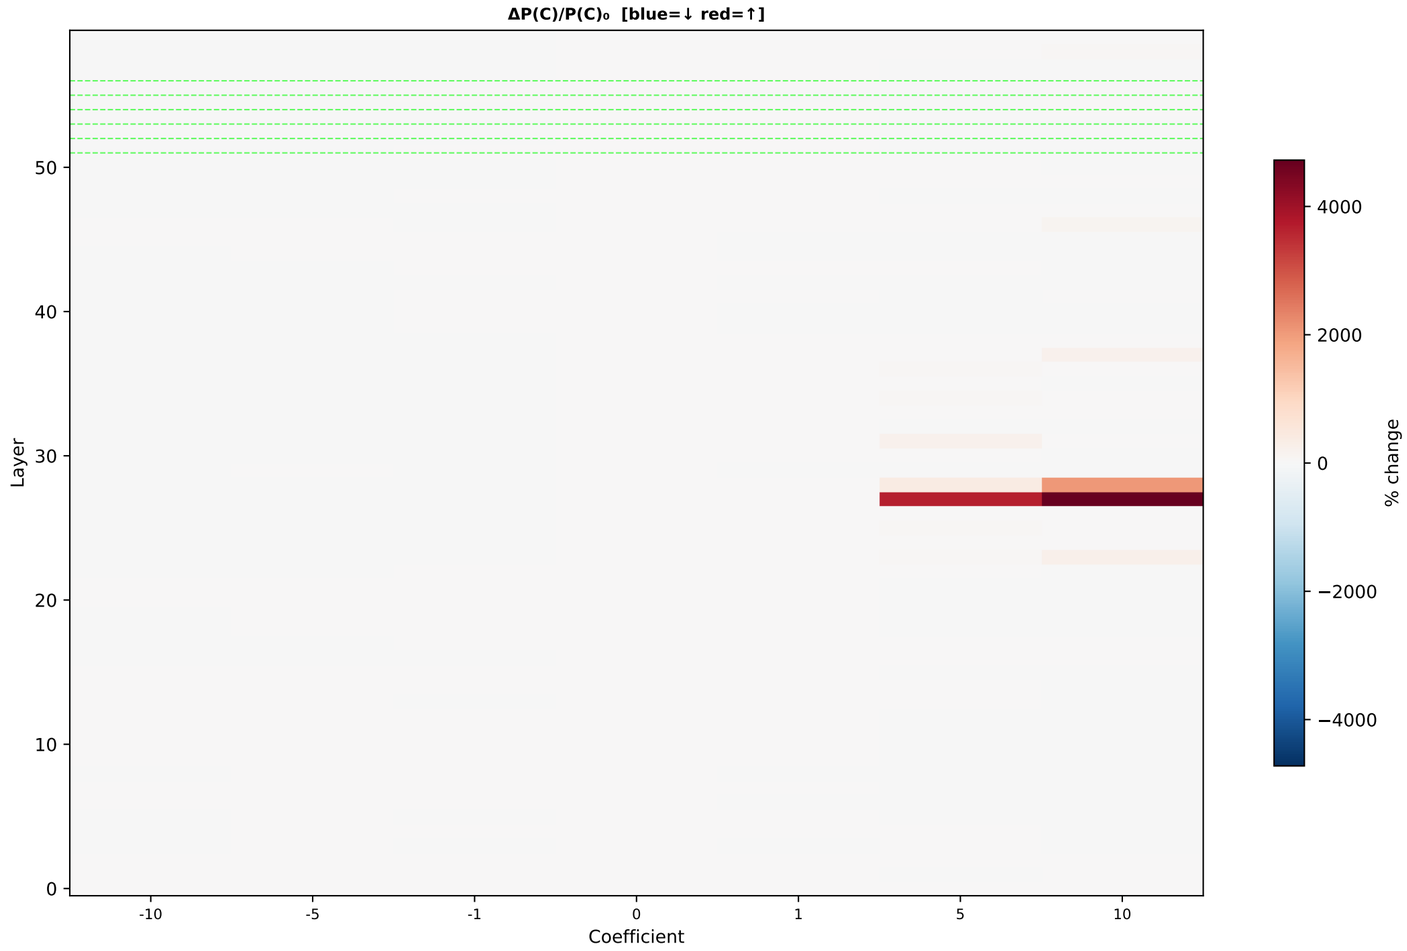


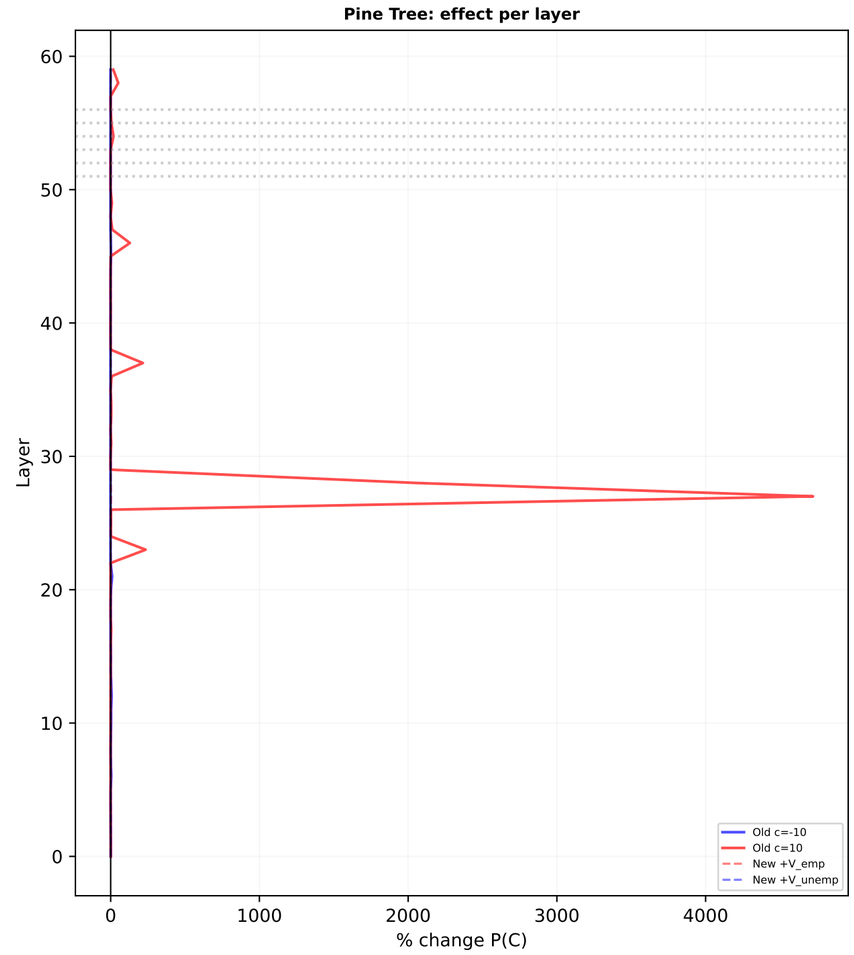


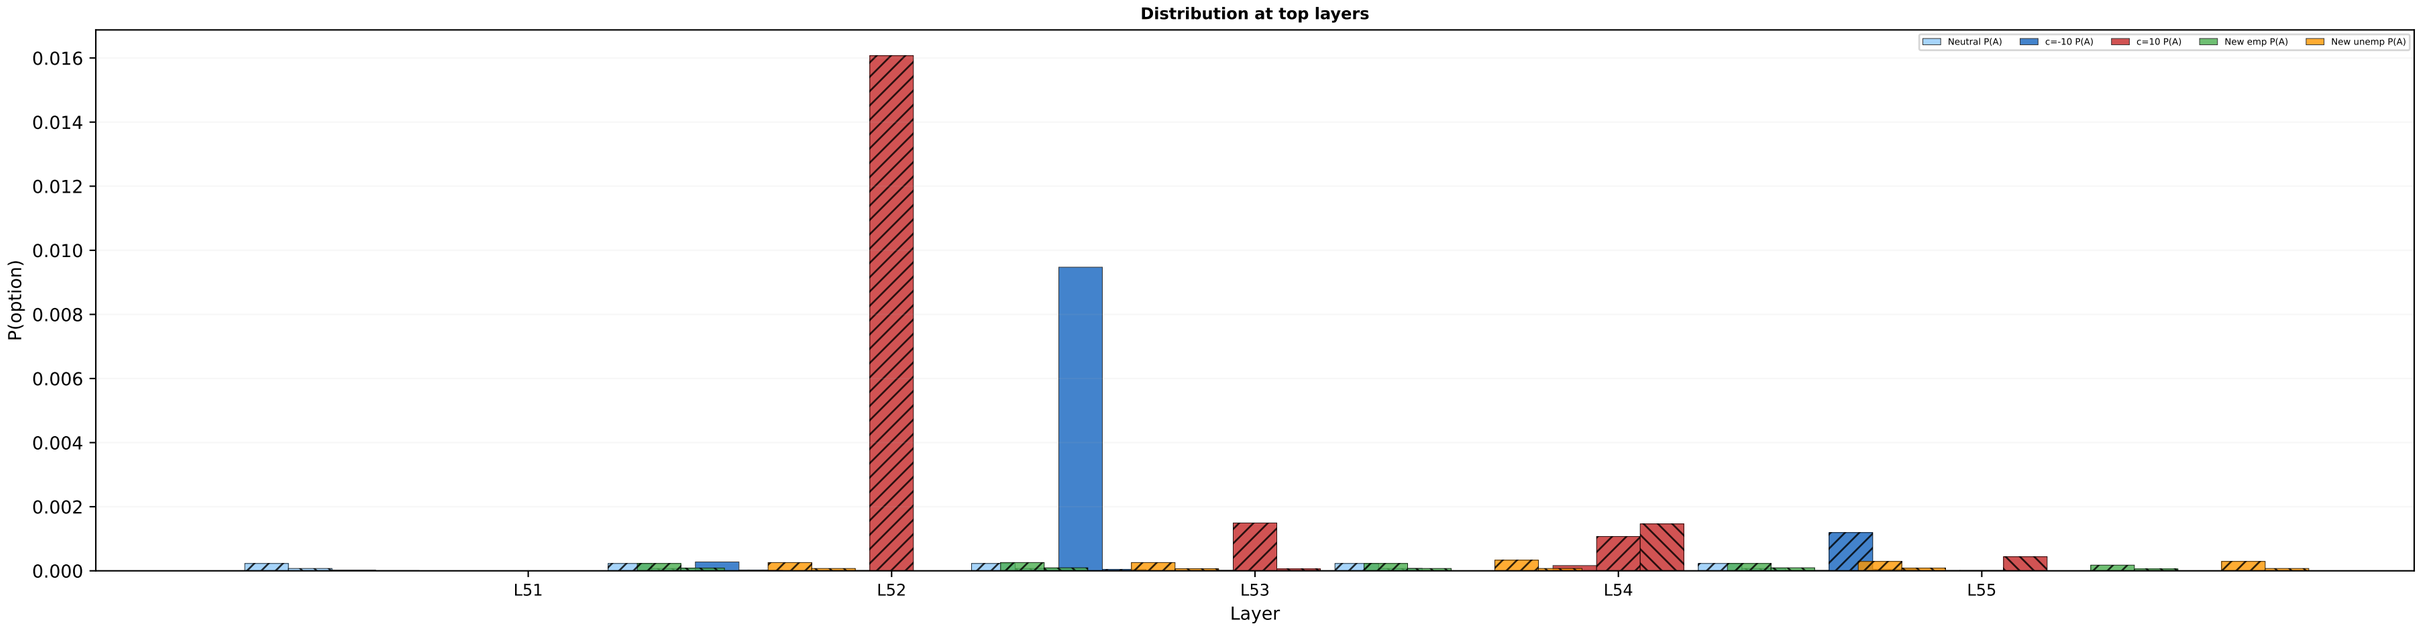


E13: Noon Tuesday availability | V7/cfg6

A typical adult is asked: "Can you meet me for lunch at noon on a Tuesday?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

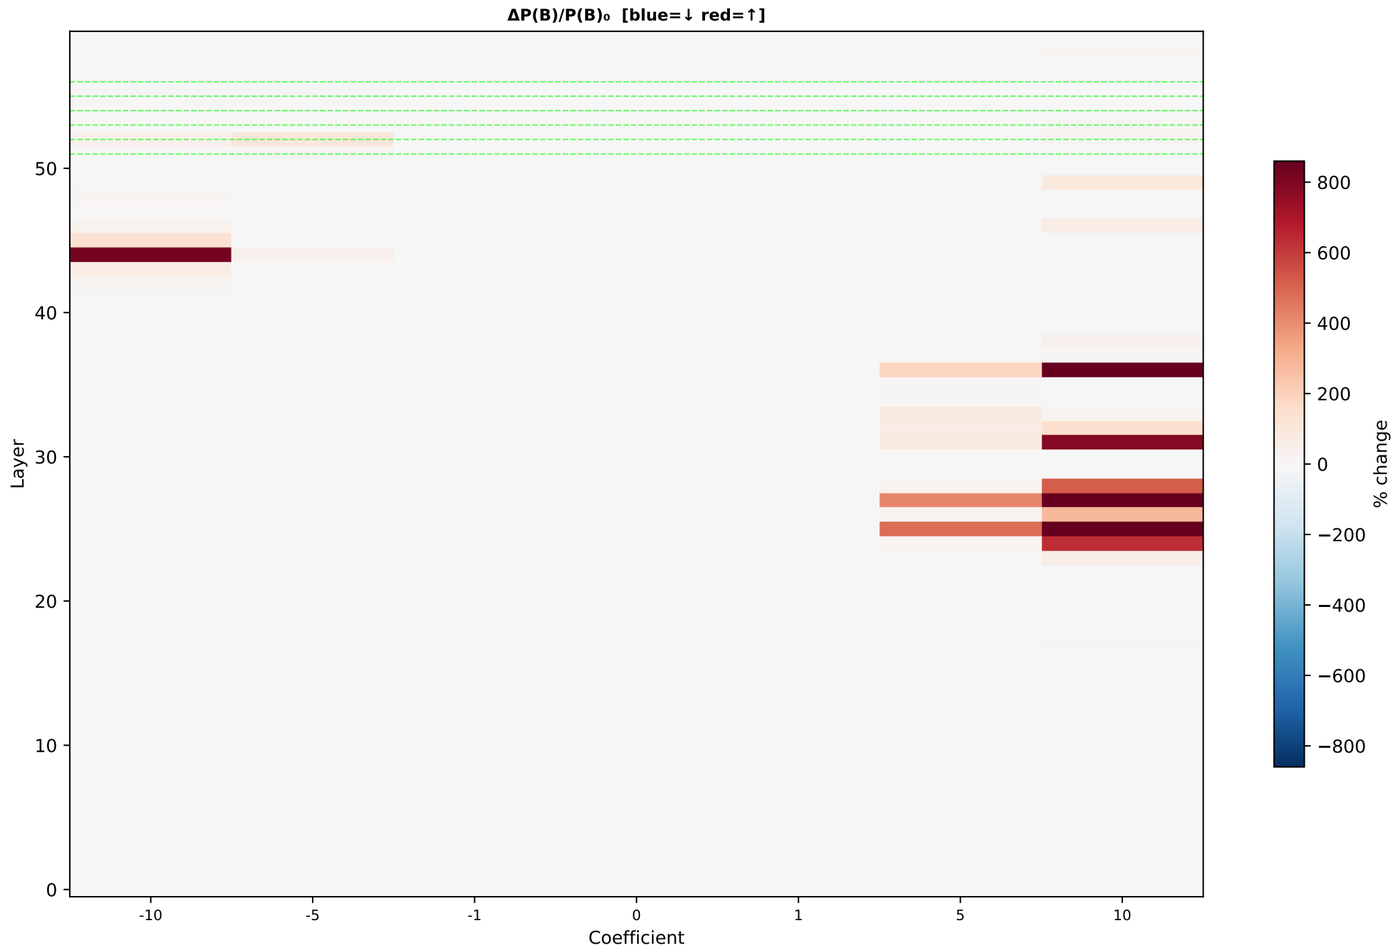


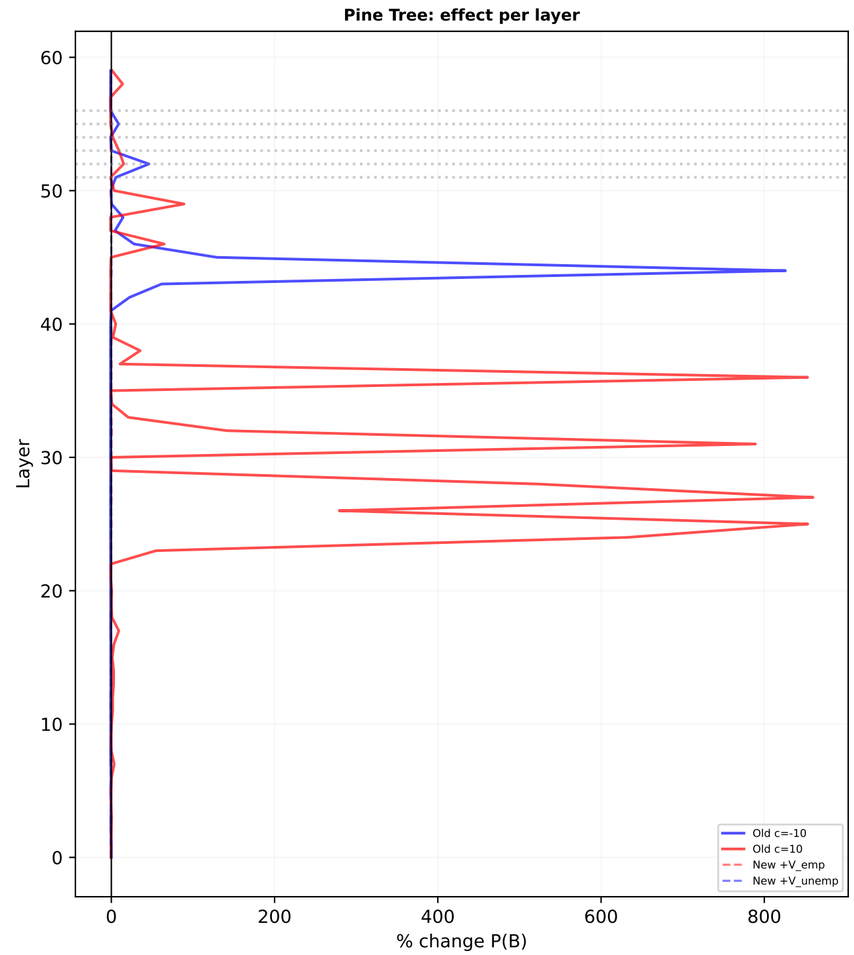


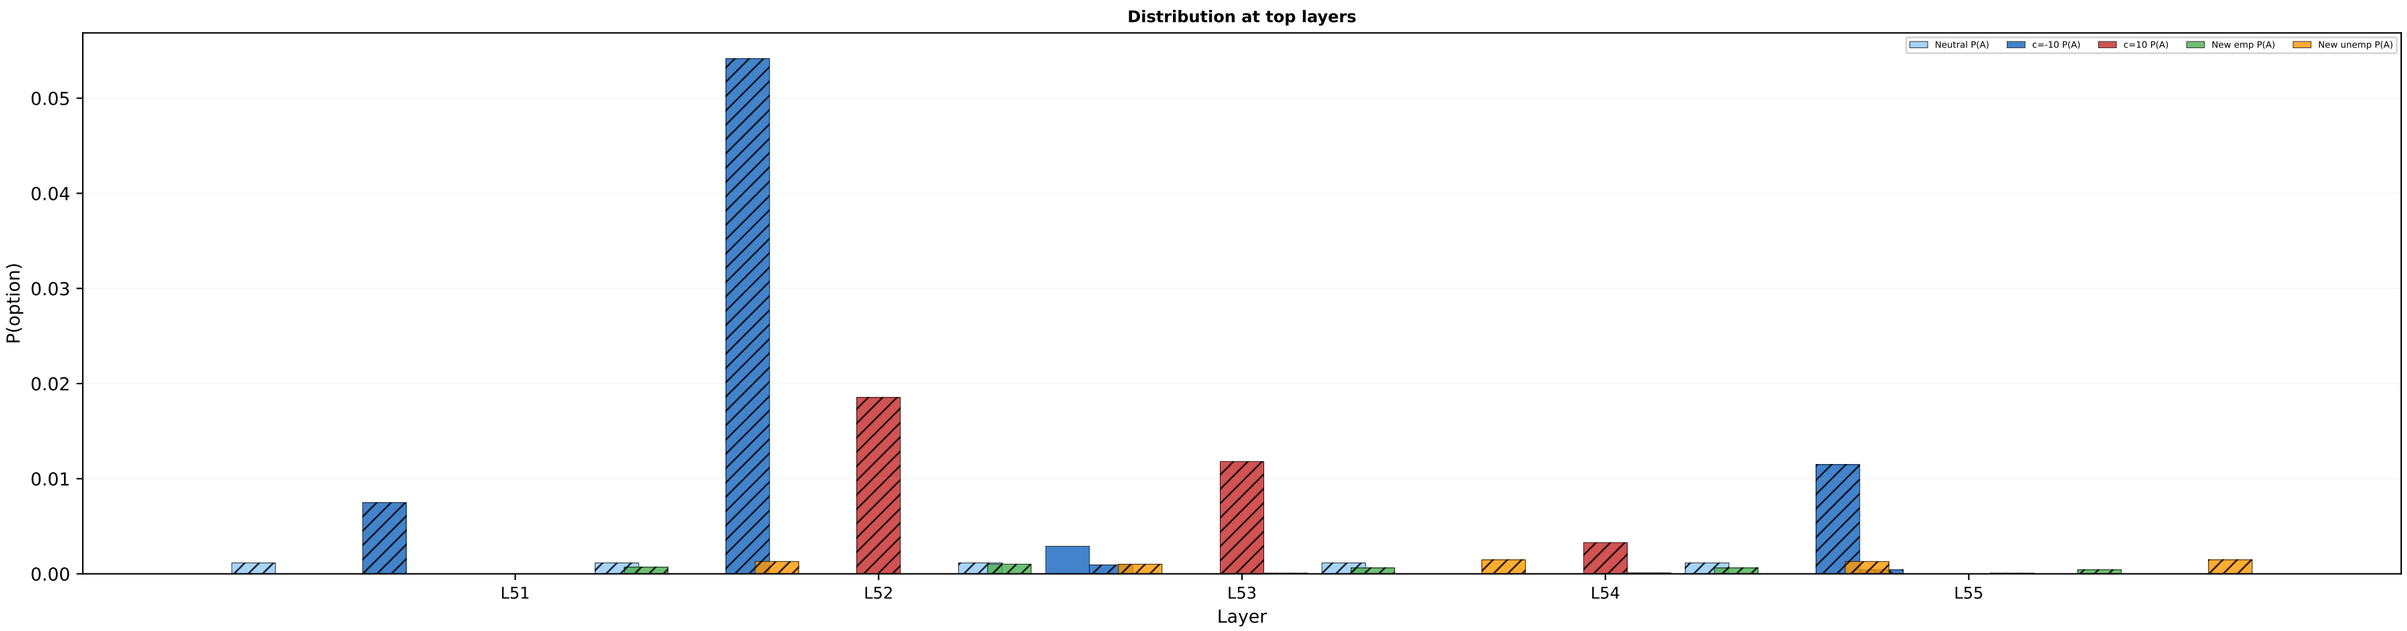


E14: 1 PM Tuesday availability | V7/cfg6

```
If you wanted to visit a typical adult at 1 PM on a Tuesday,
which reply would be most likely? | (A) "I am usually at home
around then." | (B) "I am usually at a regular daytime commitment
then." | (C) "It varies; I might be in different places." |
Answer: (
```

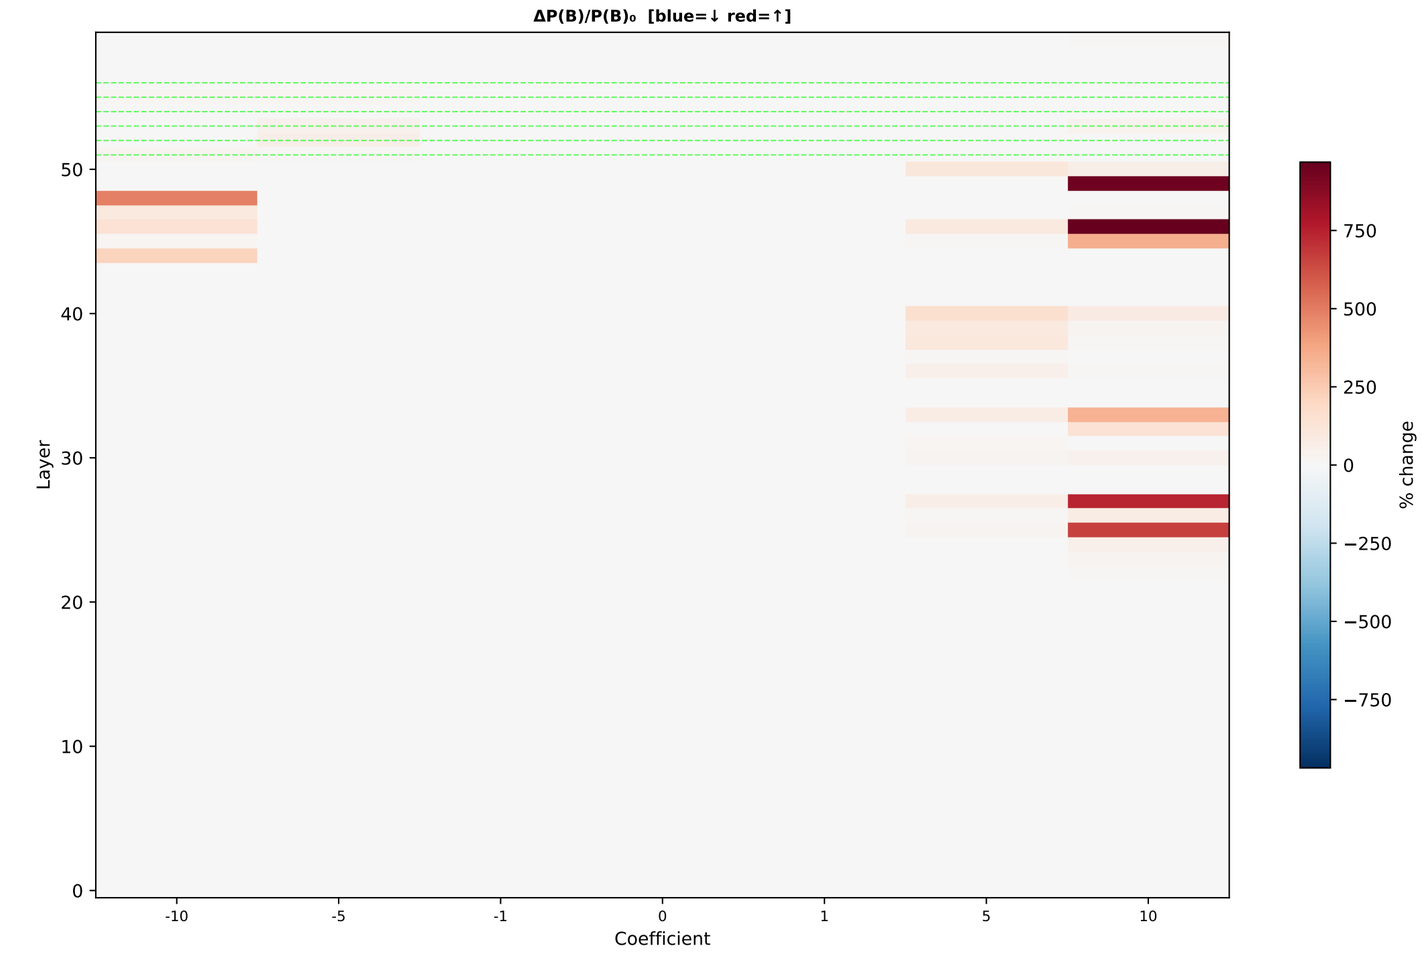


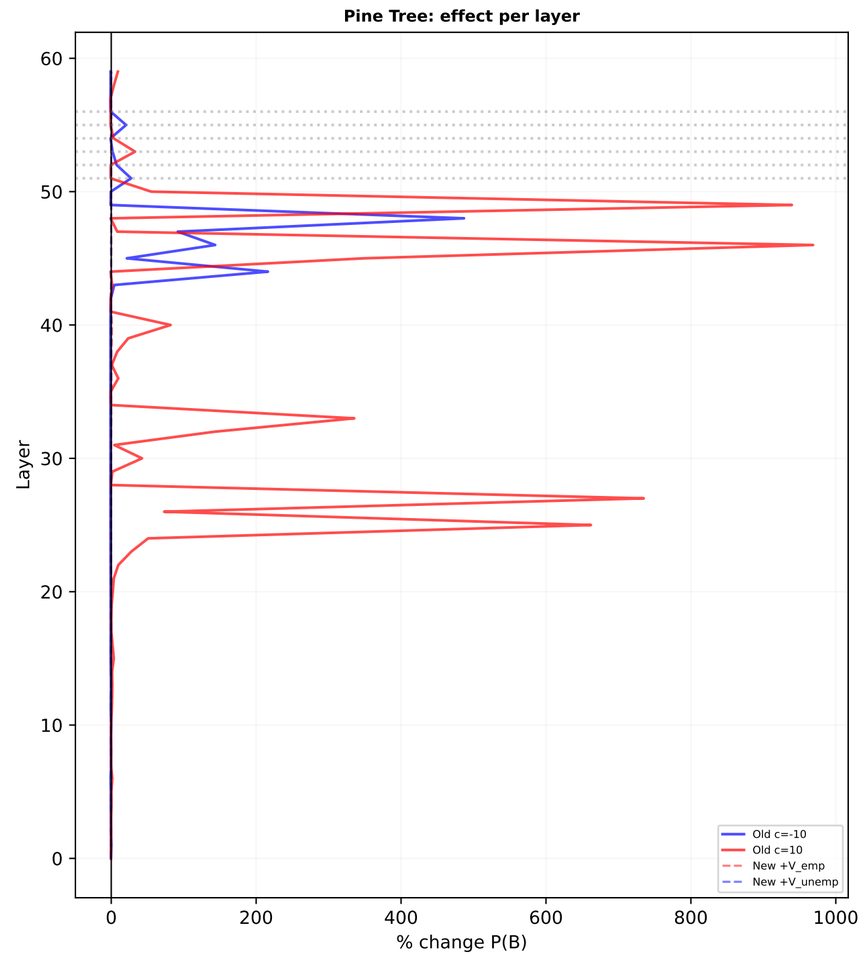


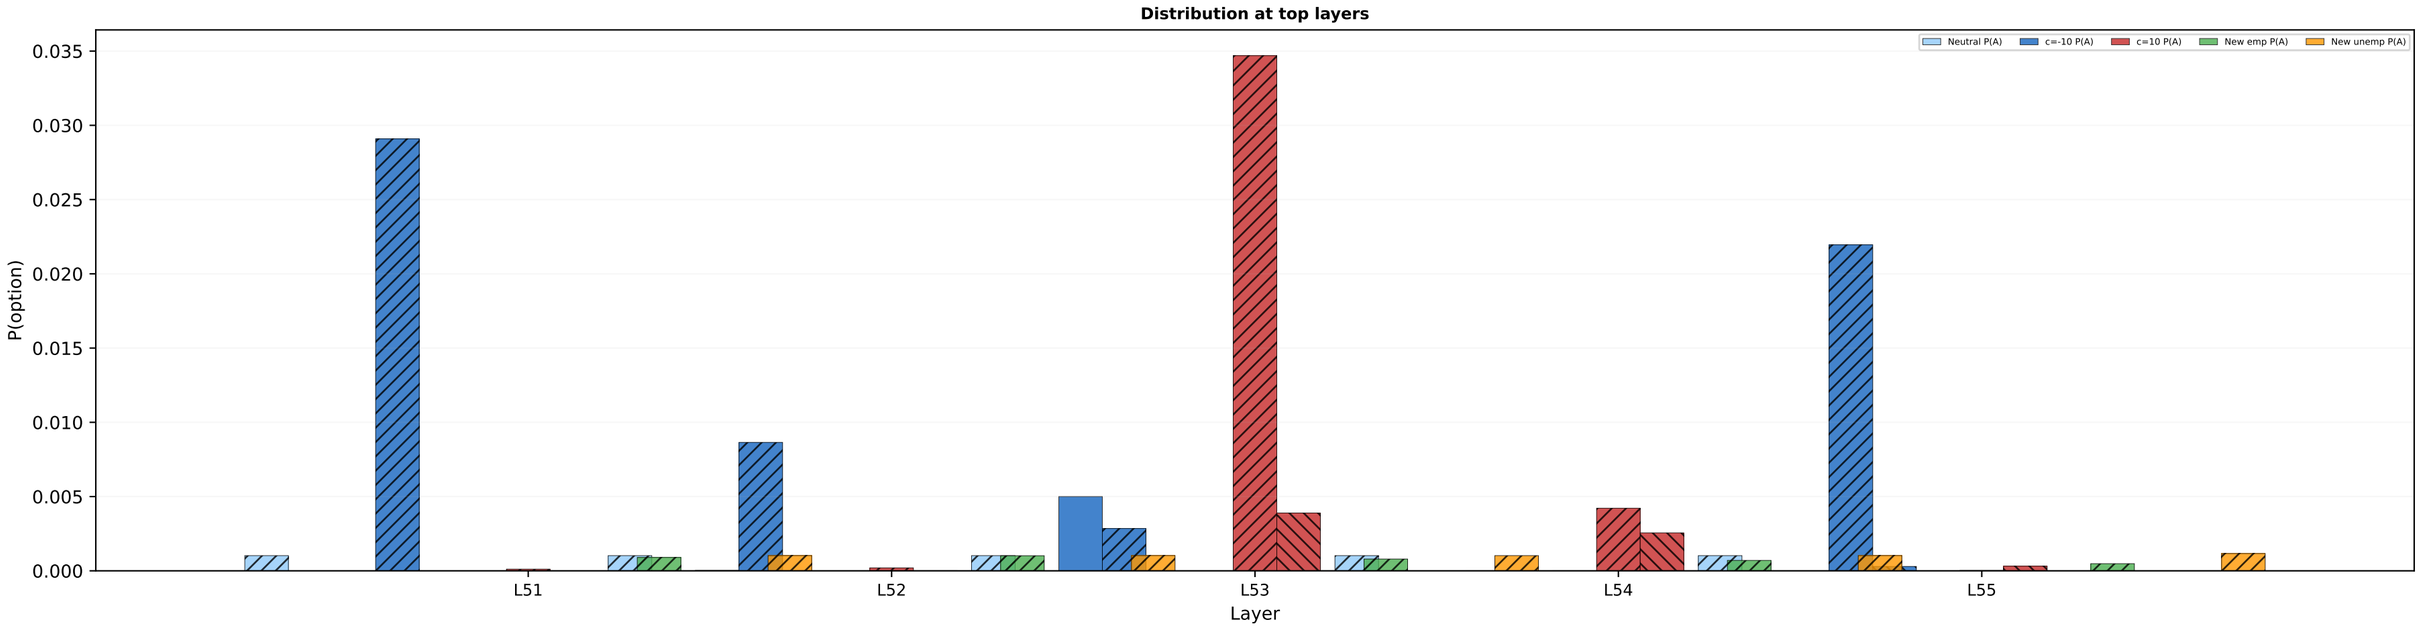


E15: 3 PM Tuesday location | V7/cfg6

At 3:00 PM on a Tuesday, a typical adult is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

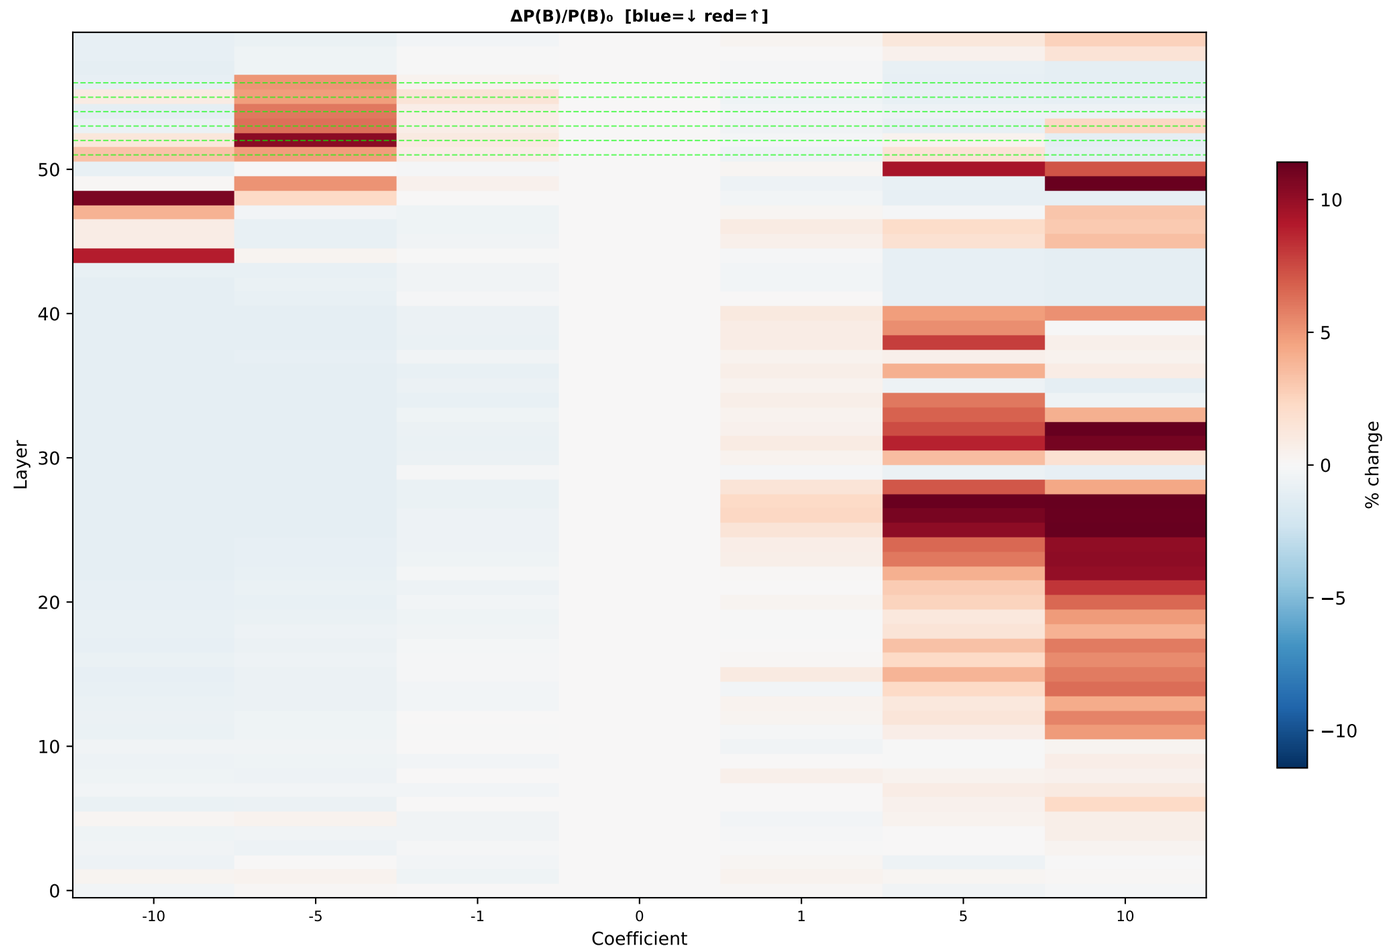


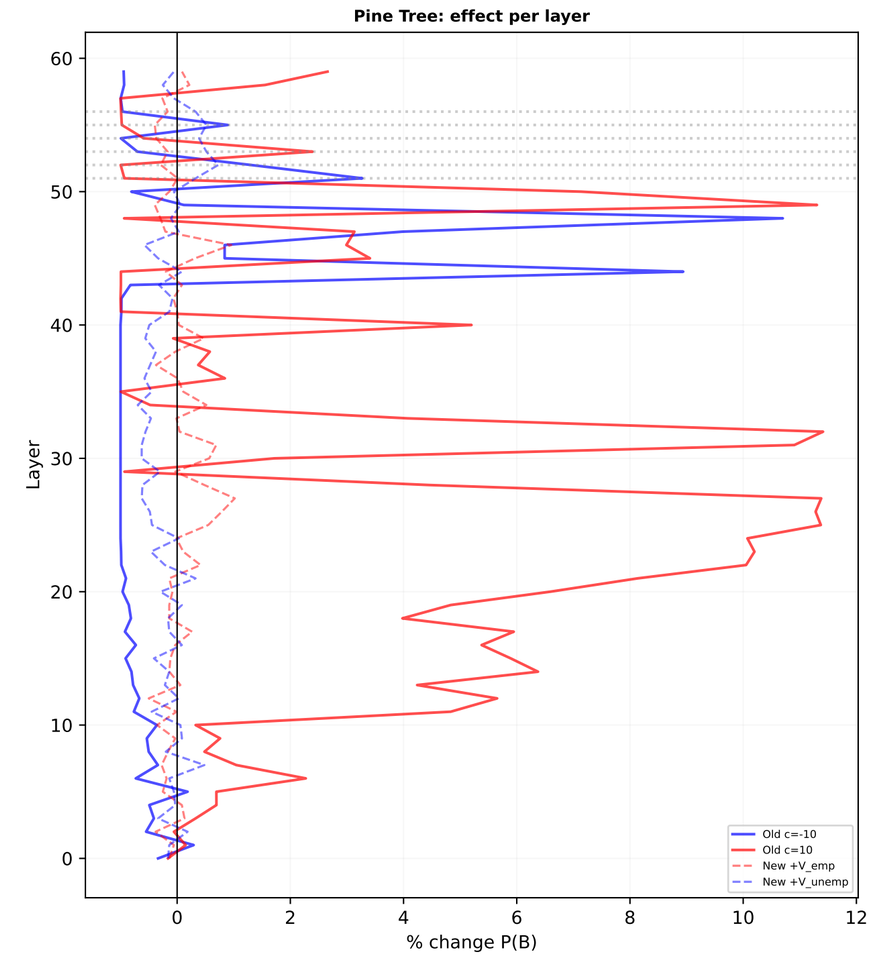


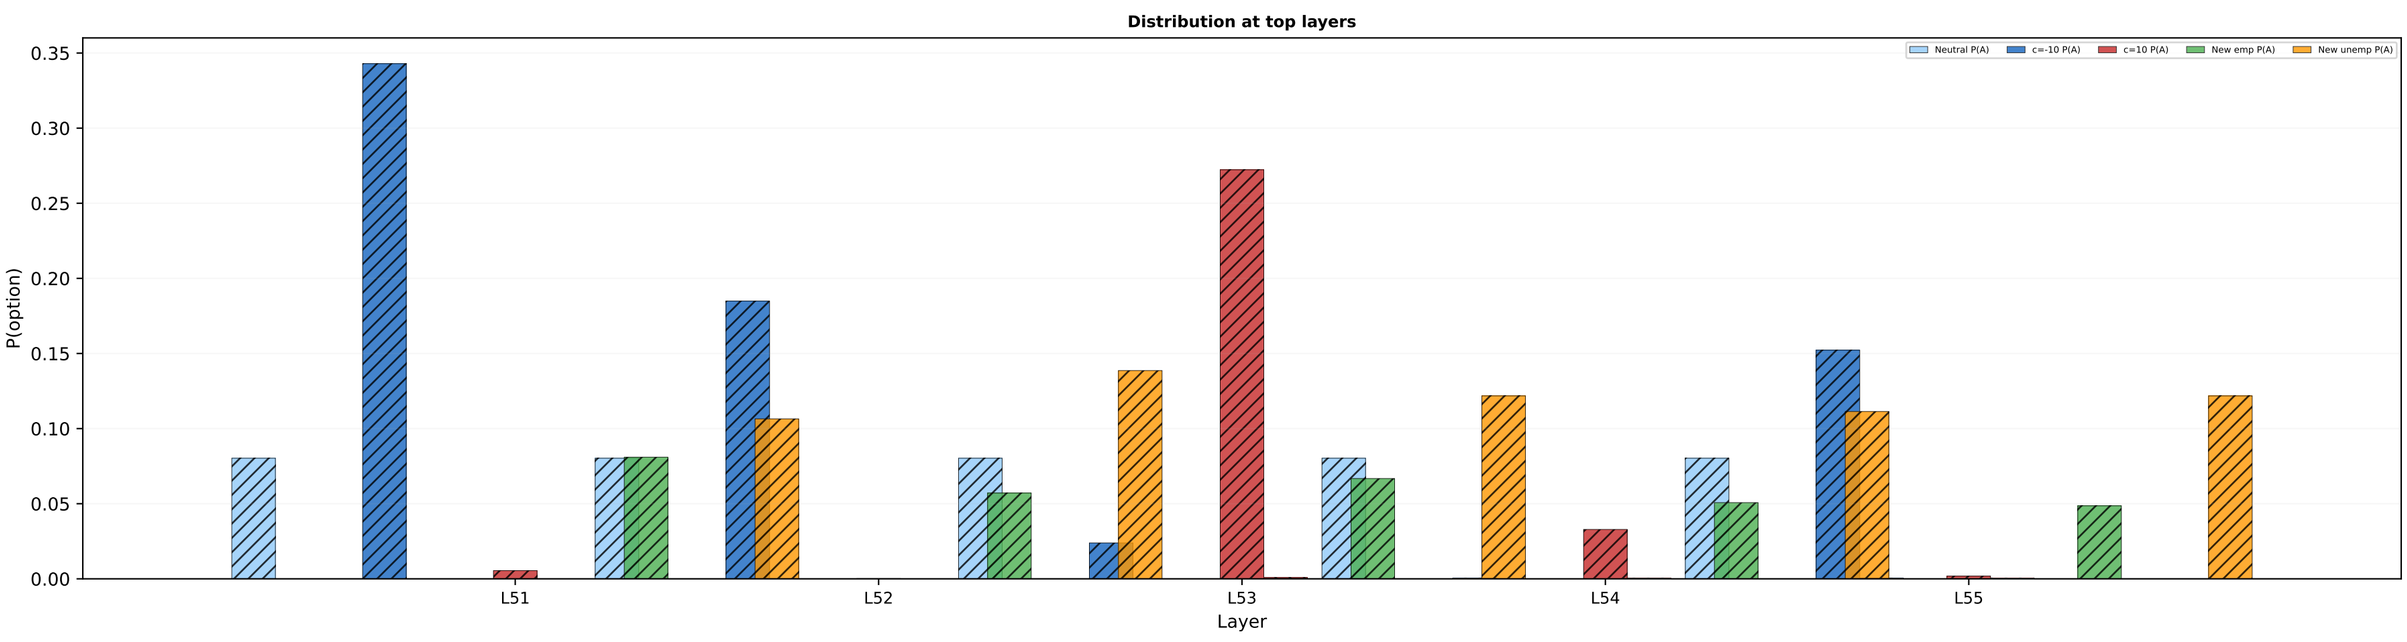


E16: 5 PM Tuesday status | V7/cfg6

At 5:00 PM on a Tuesday, a typical adult is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

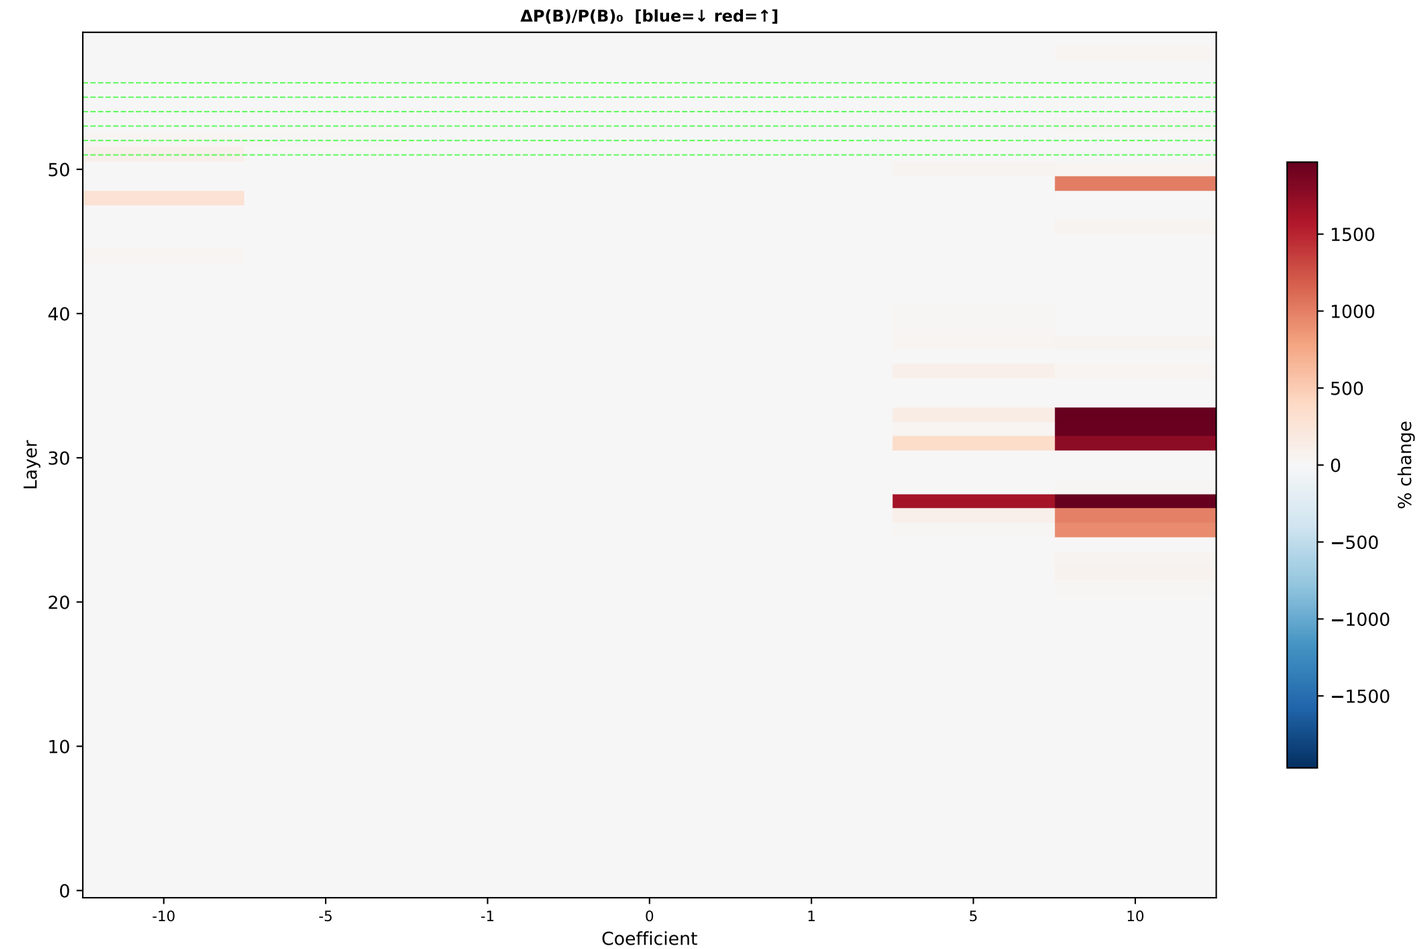


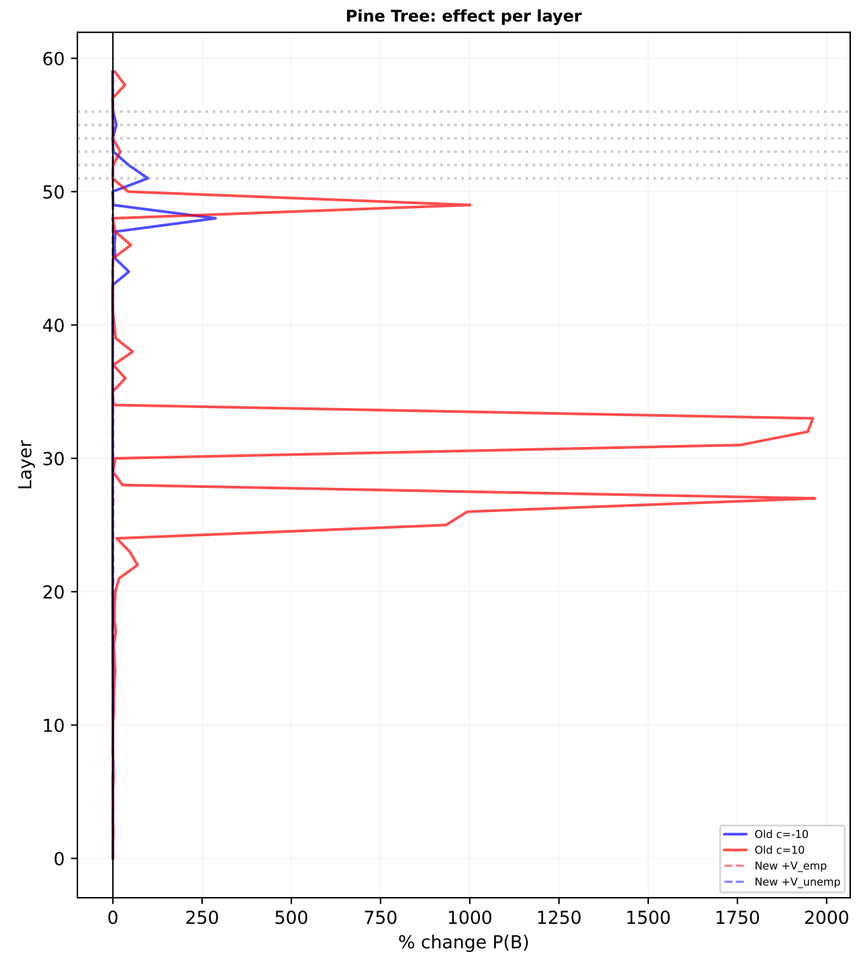


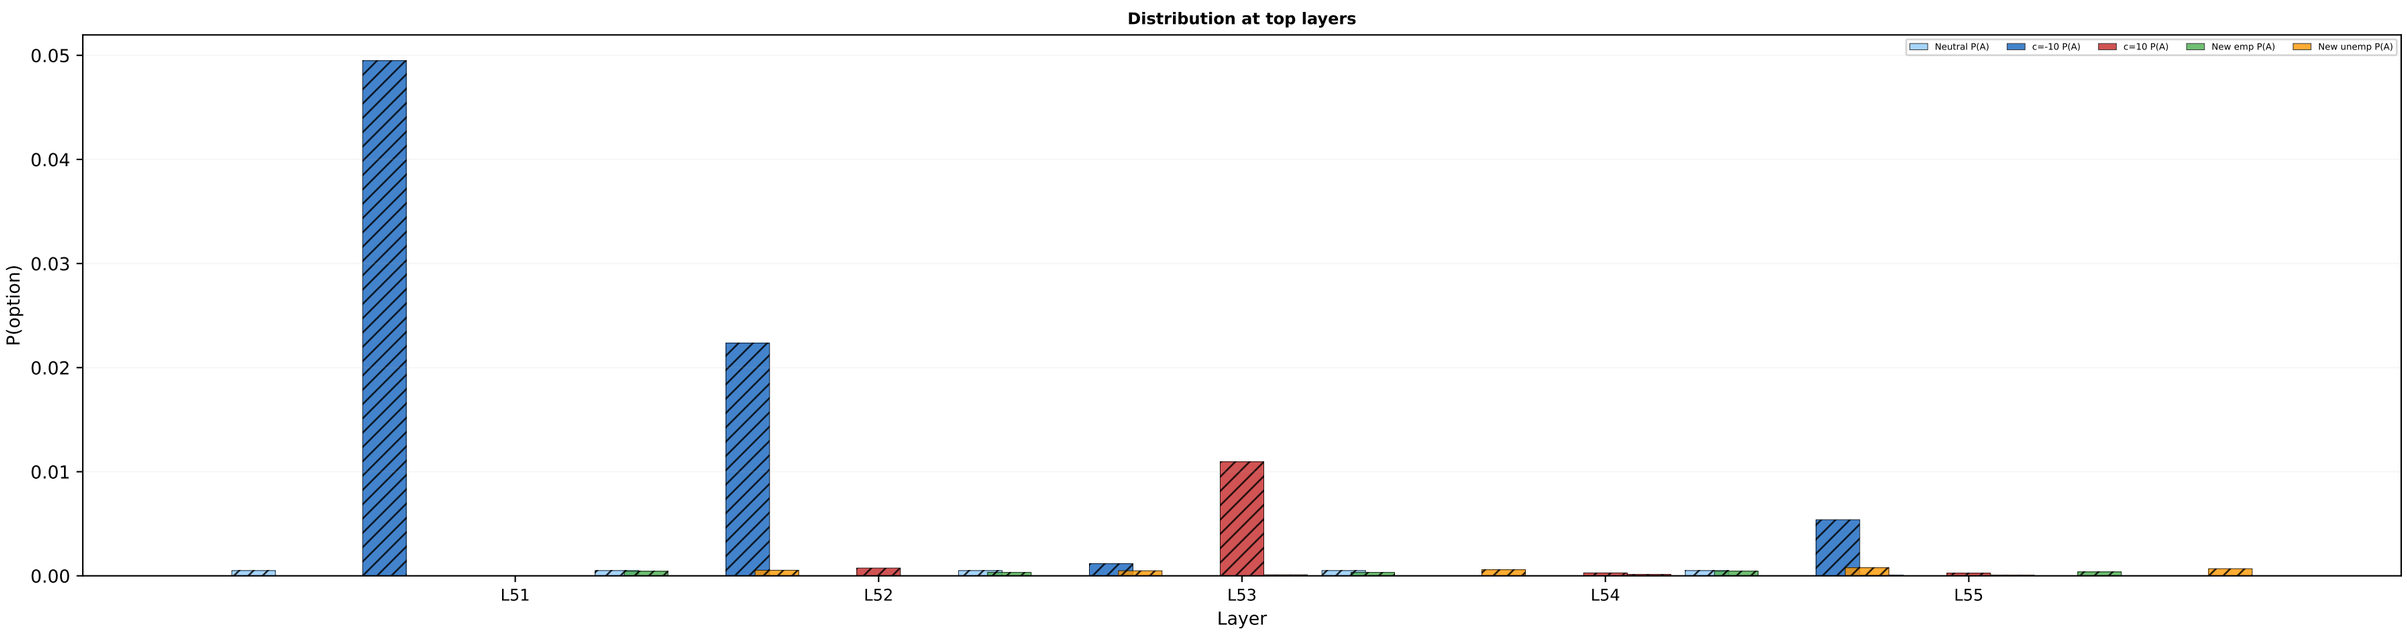


E17: 7 PM Tuesday status | V7/cfg6

At 7:00 PM on a Tuesday, a typical adult is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

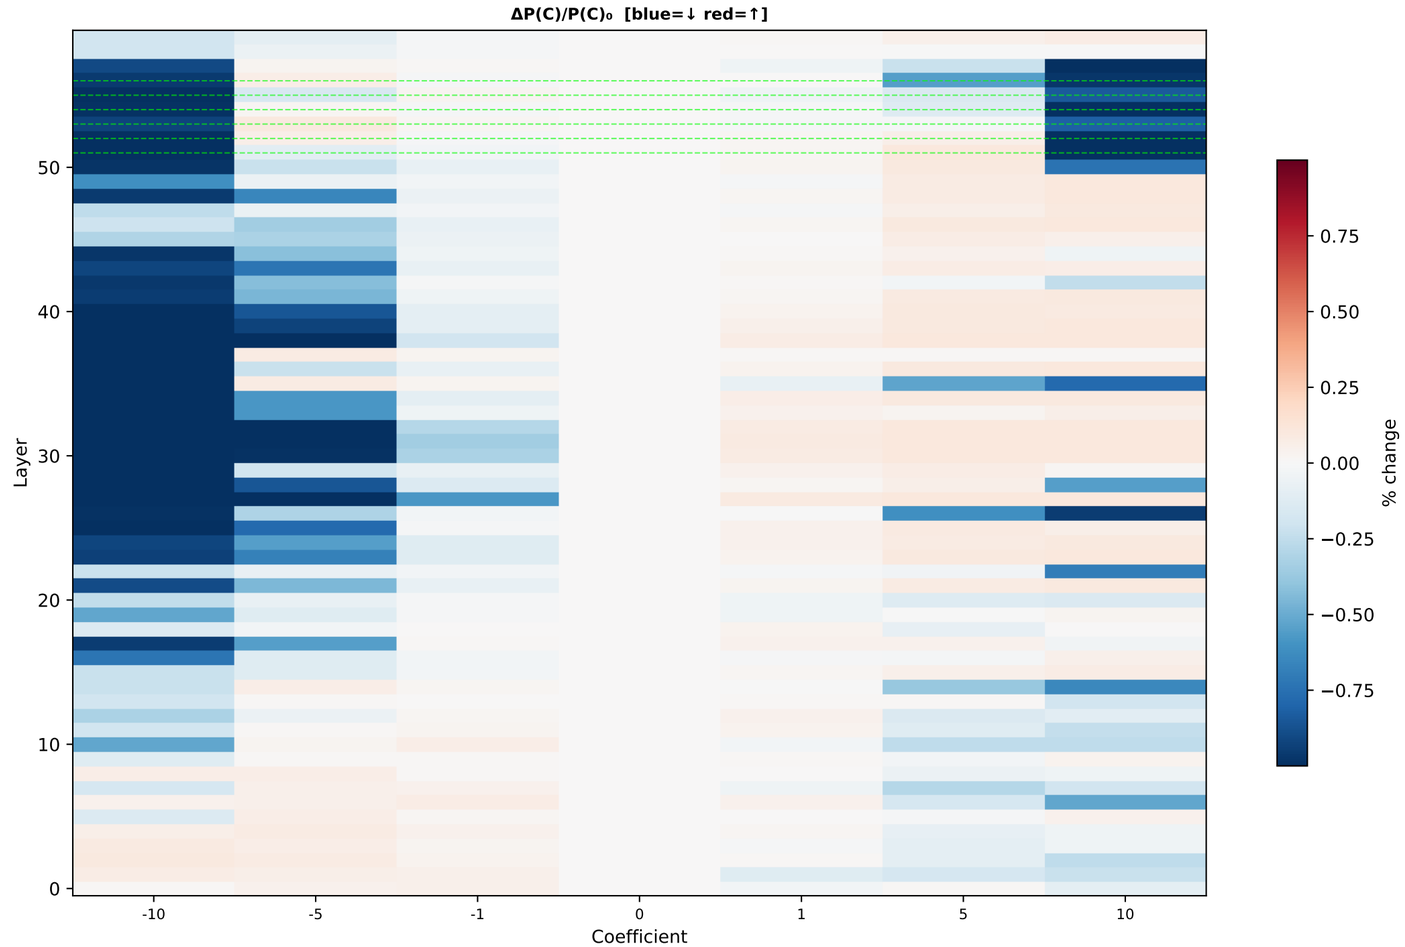


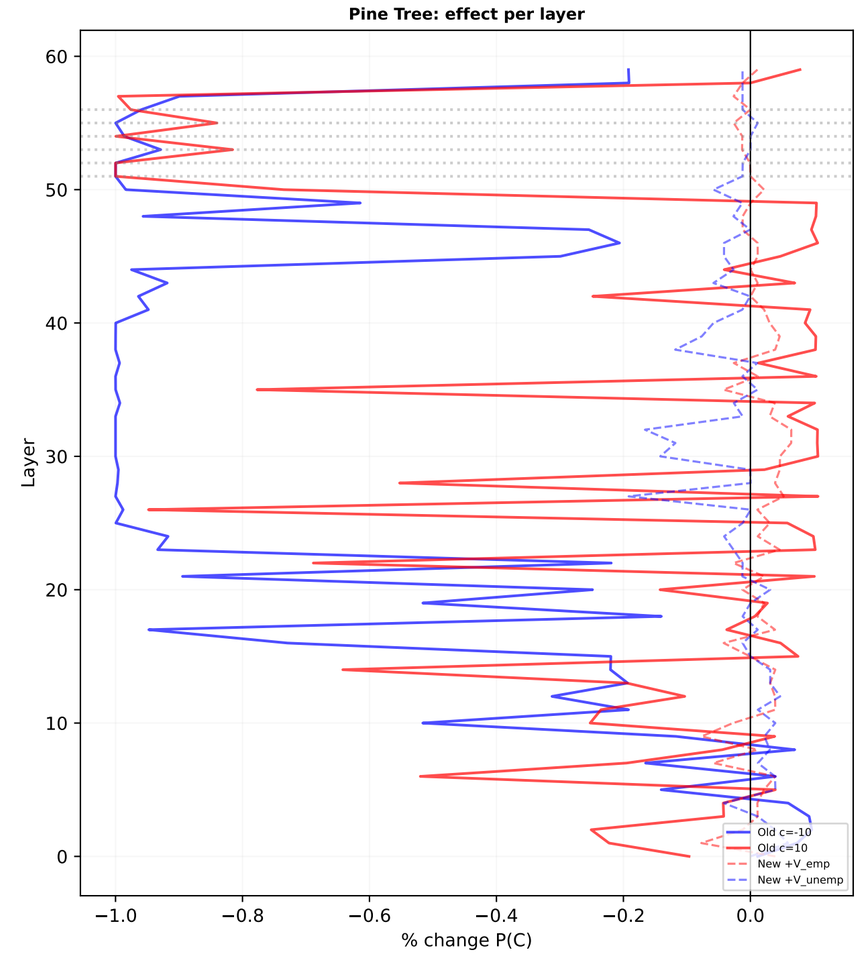


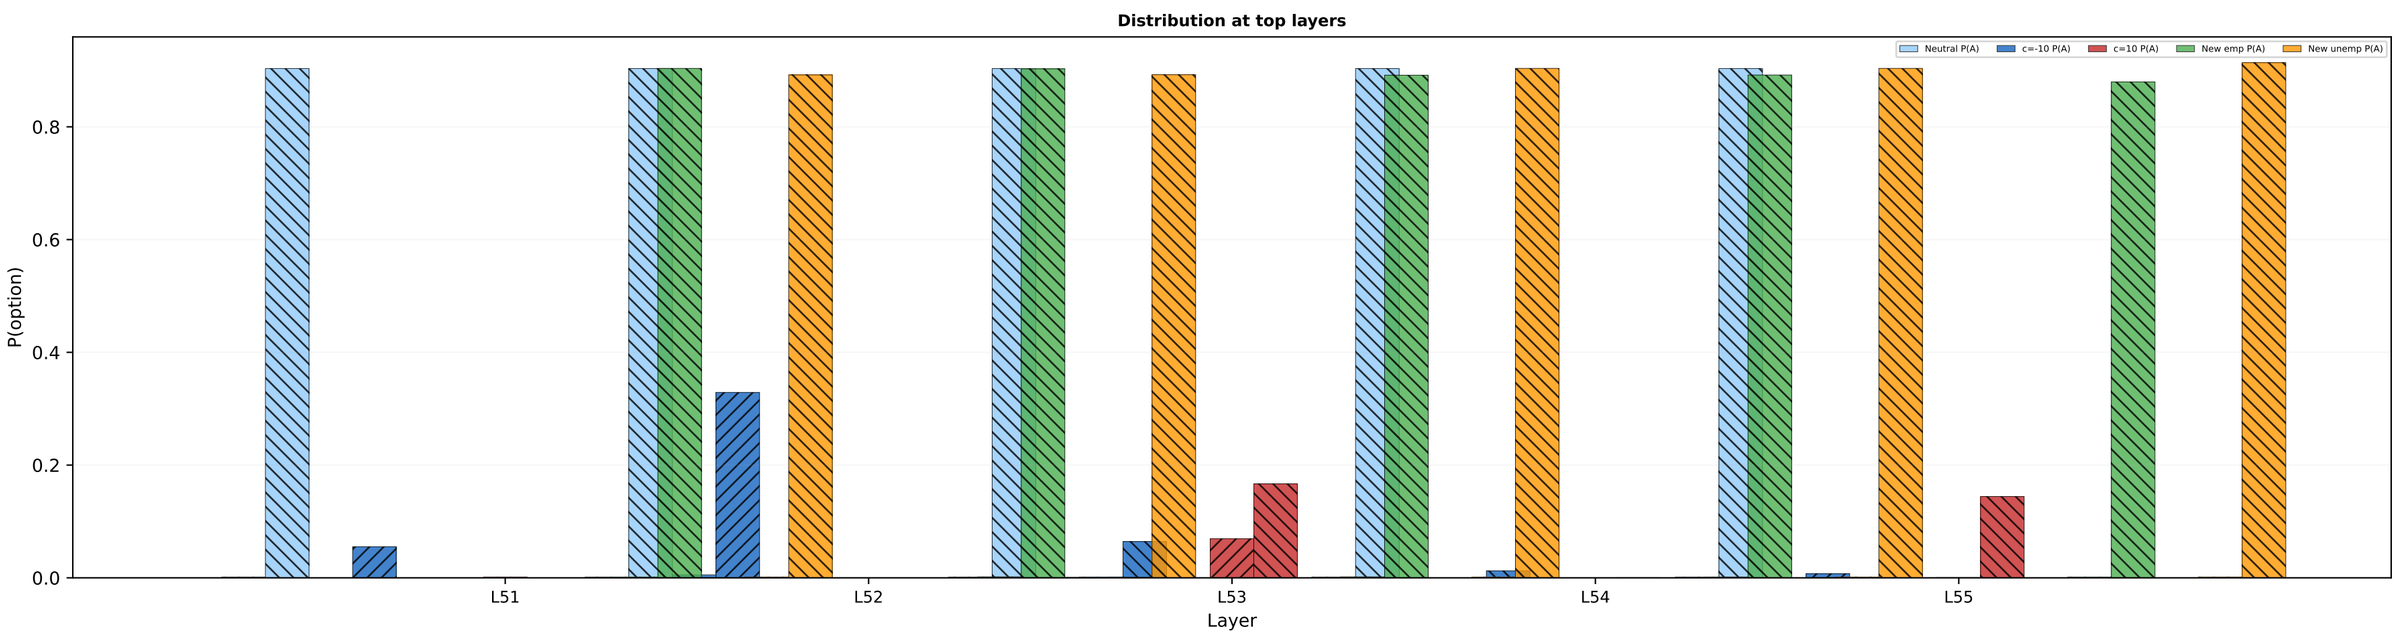


E18: Alarm clock habit (Tue) | V7/cfg6

Does a typical adult use an alarm clock on Tuesday mornings? | (A) No, they wake up naturally whenever they feel like it | (B) Sometimes, depending on whether they have plans | (C) Yes, they set an alarm at the same time every Tuesday | Answer: (

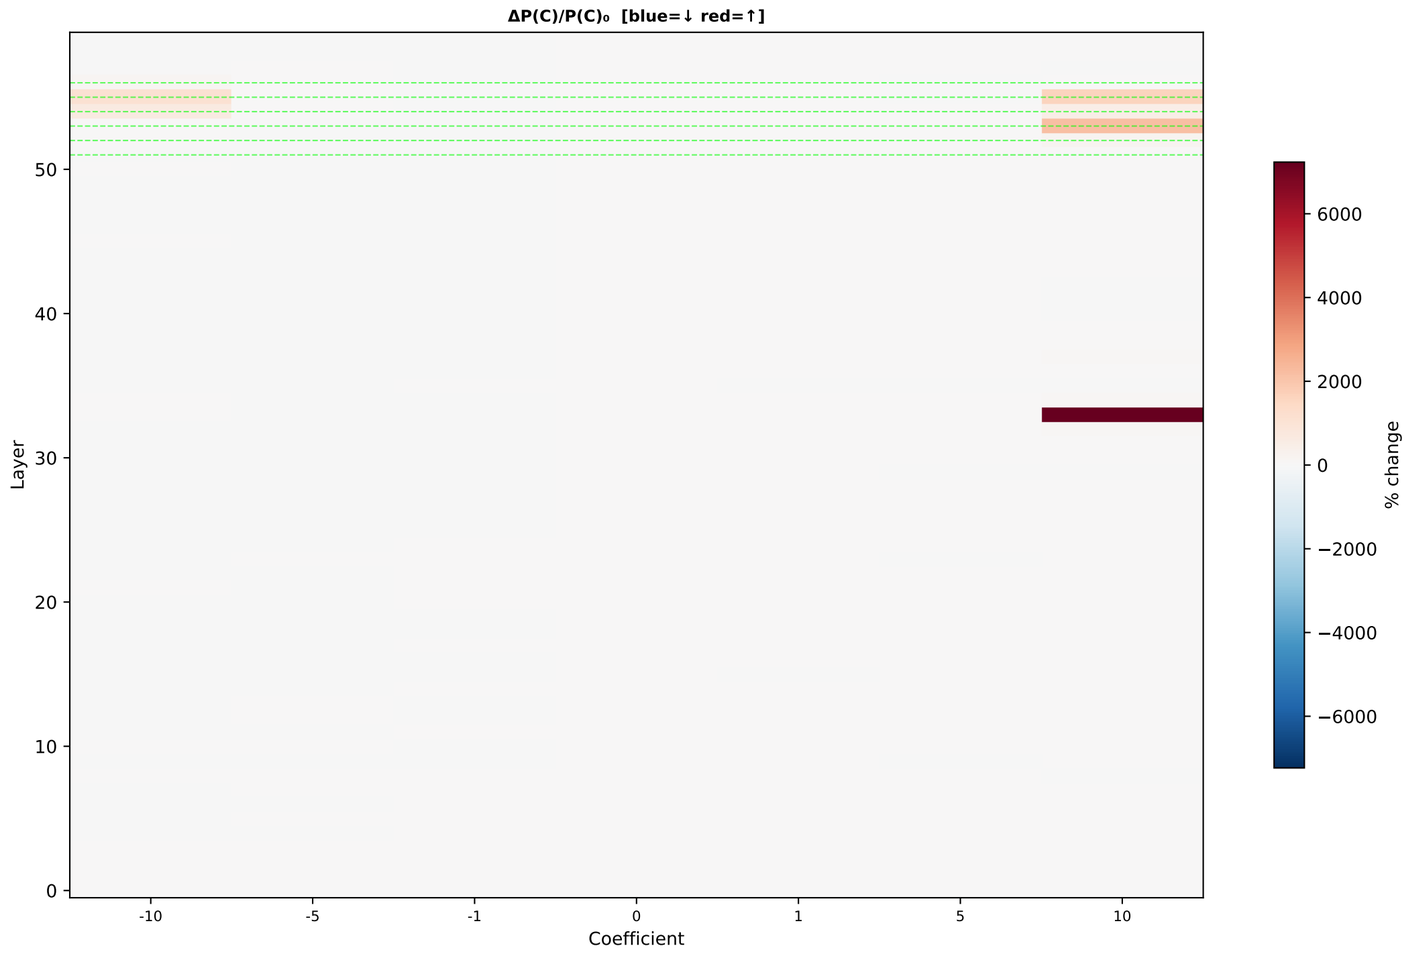


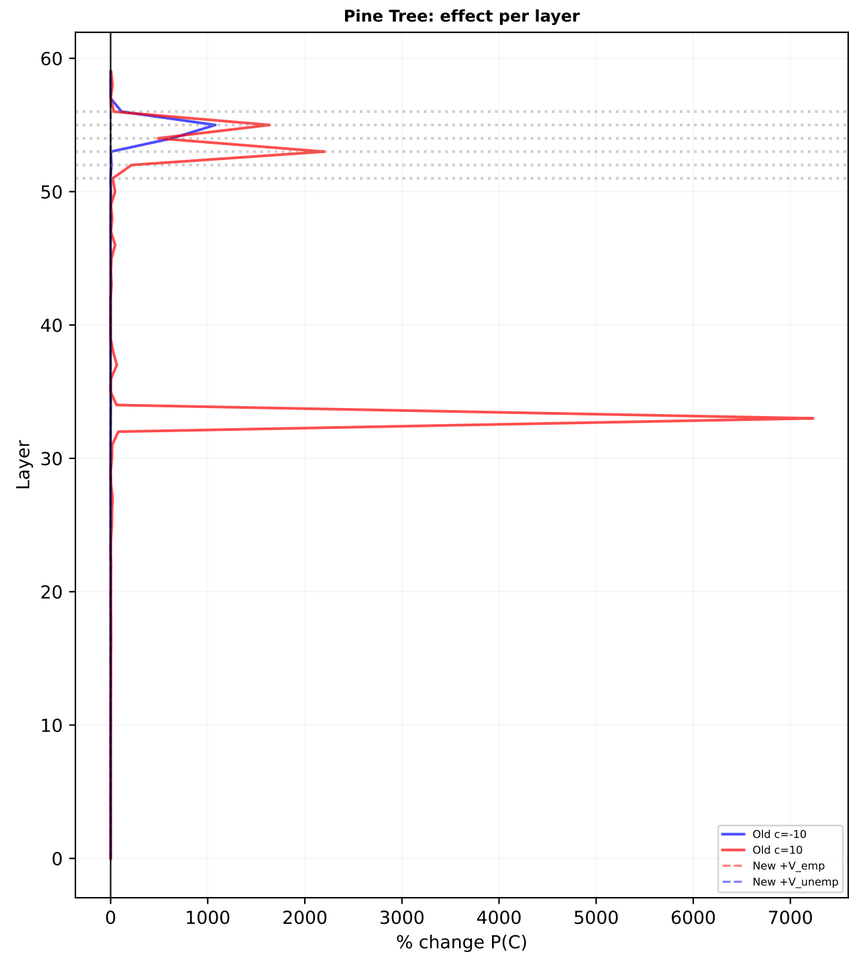


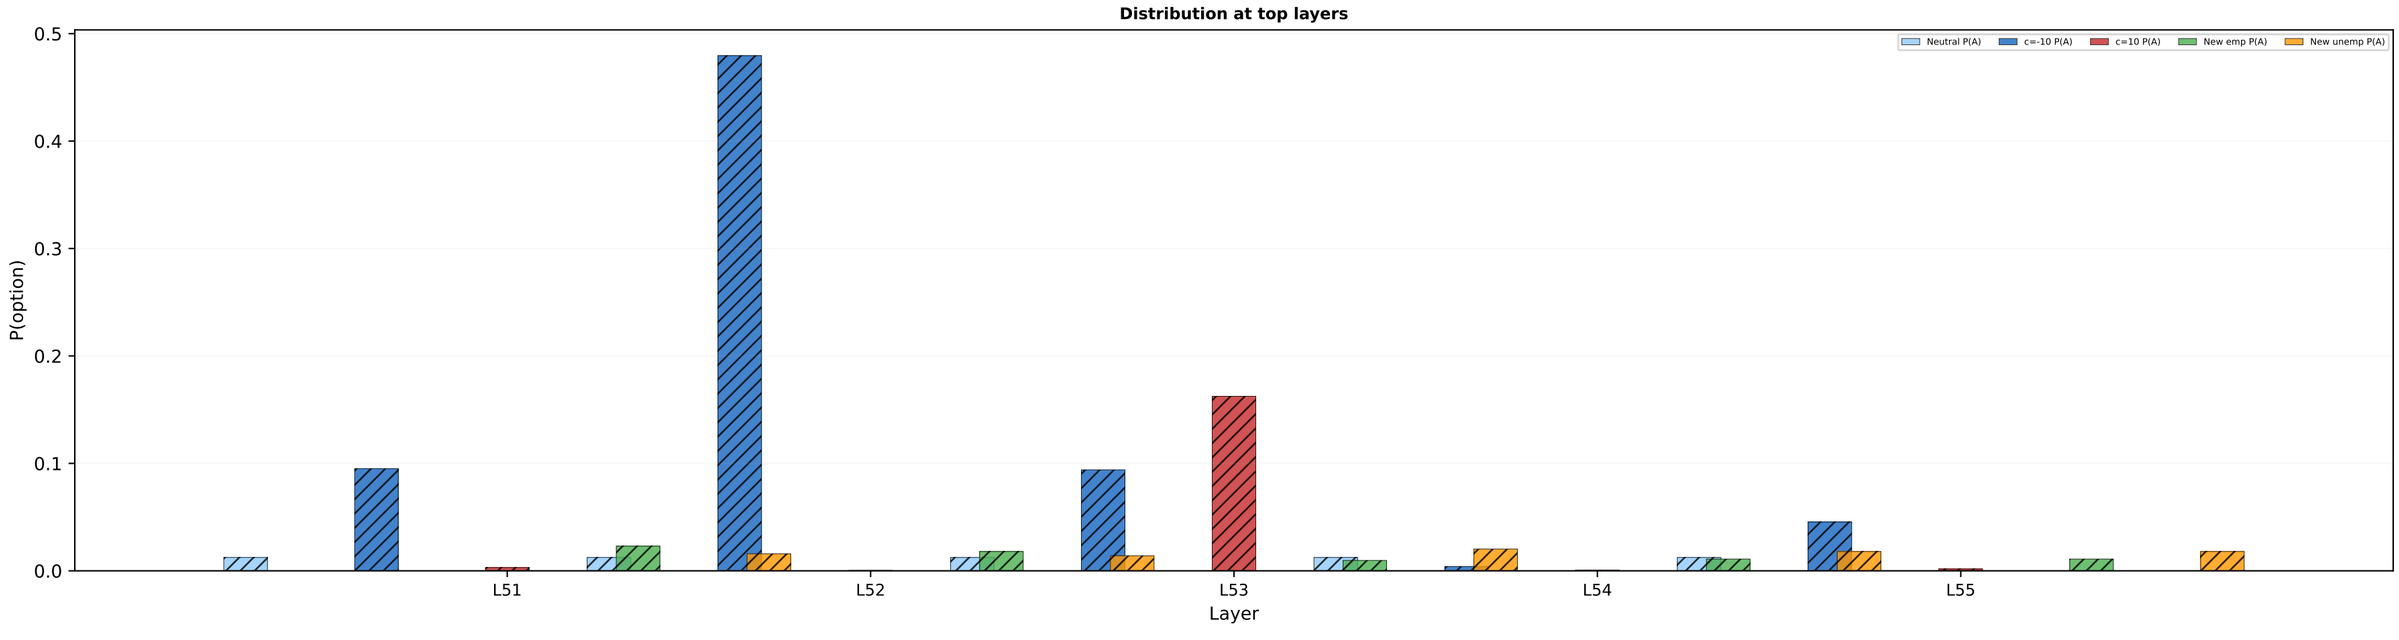


E19: Departure time consistency (Tue) | V7/cfg6

Does a typical adult leave home at the same time every Tuesday? | (A) No, the departure time varies a lot | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

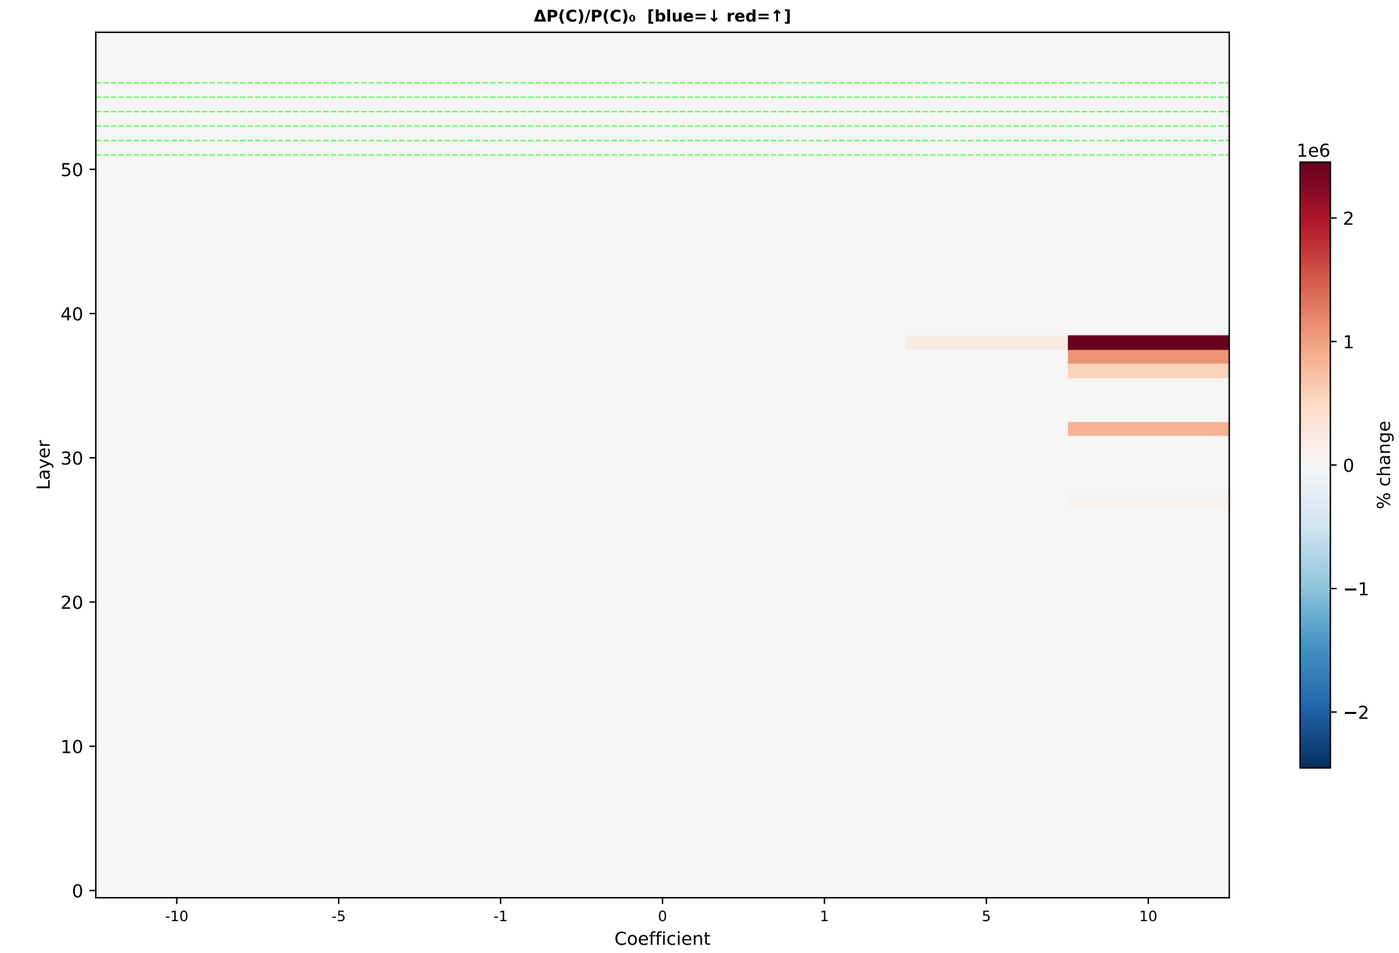


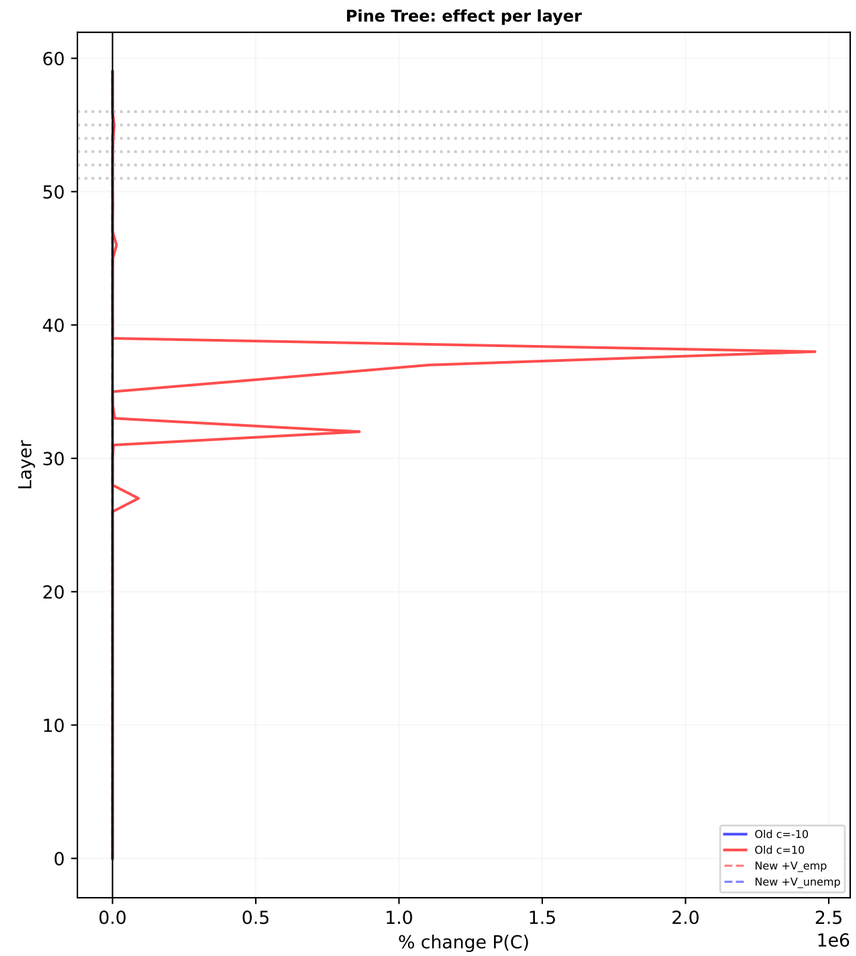


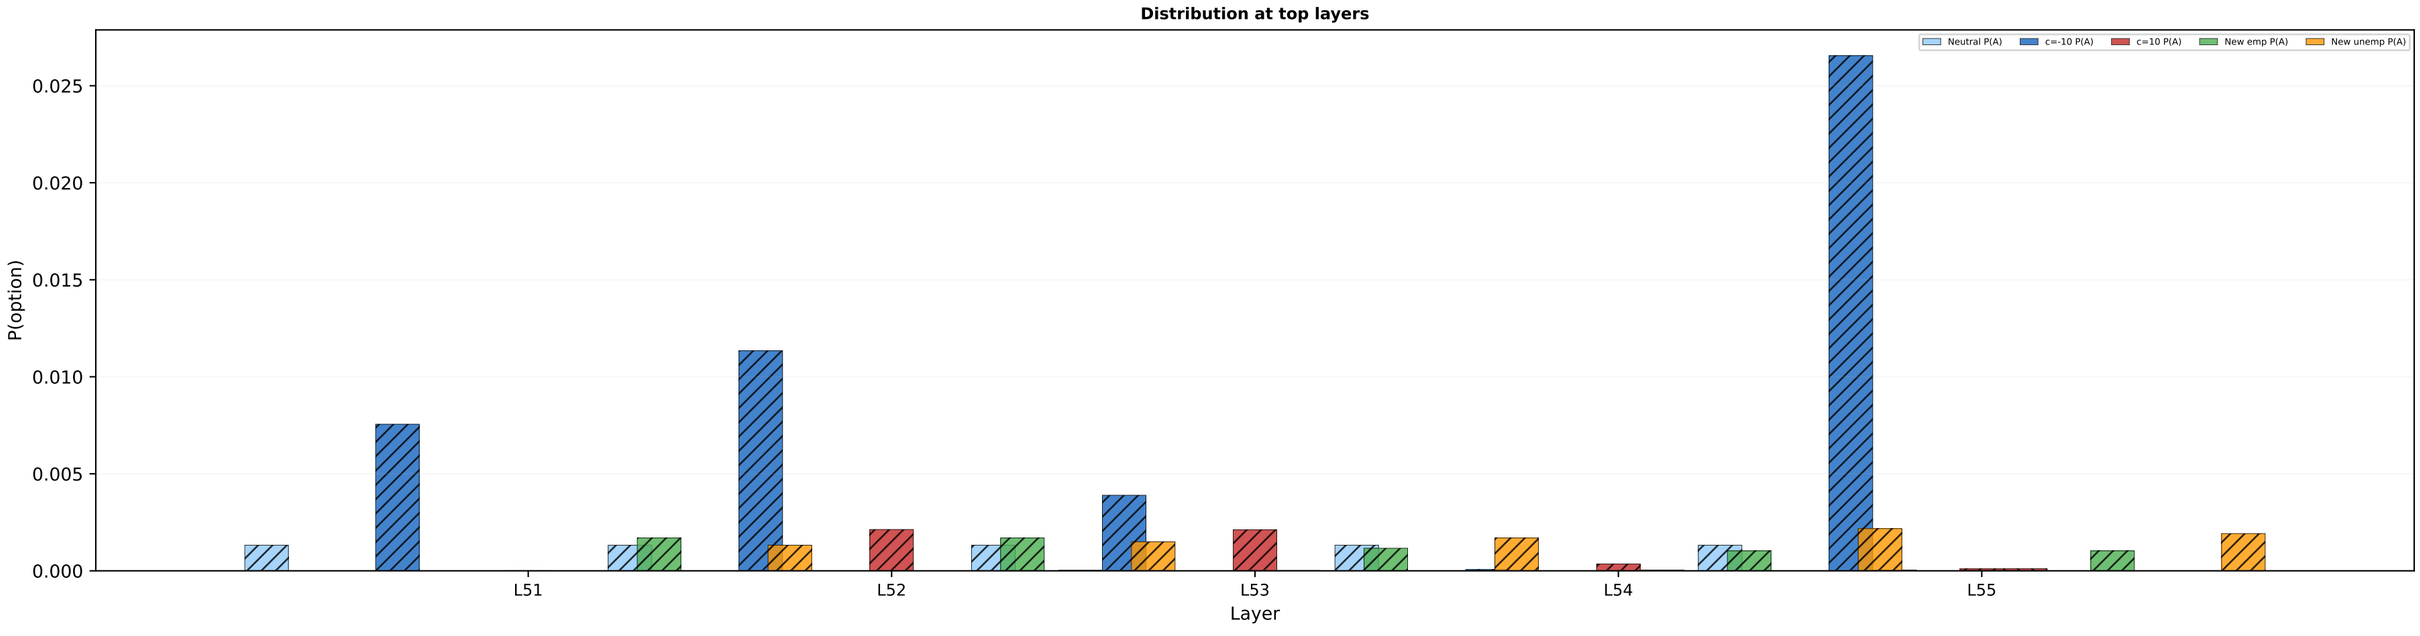


E20: Noon location consistency (Tue) | V7/cfg6

Is a typical adult at the same non-home location at noon every Tuesday? | (A) No, they are usually at home at noon | (B) Sometimes the same place, sometimes not | (C) Yes, almost always at the same location | Answer: (

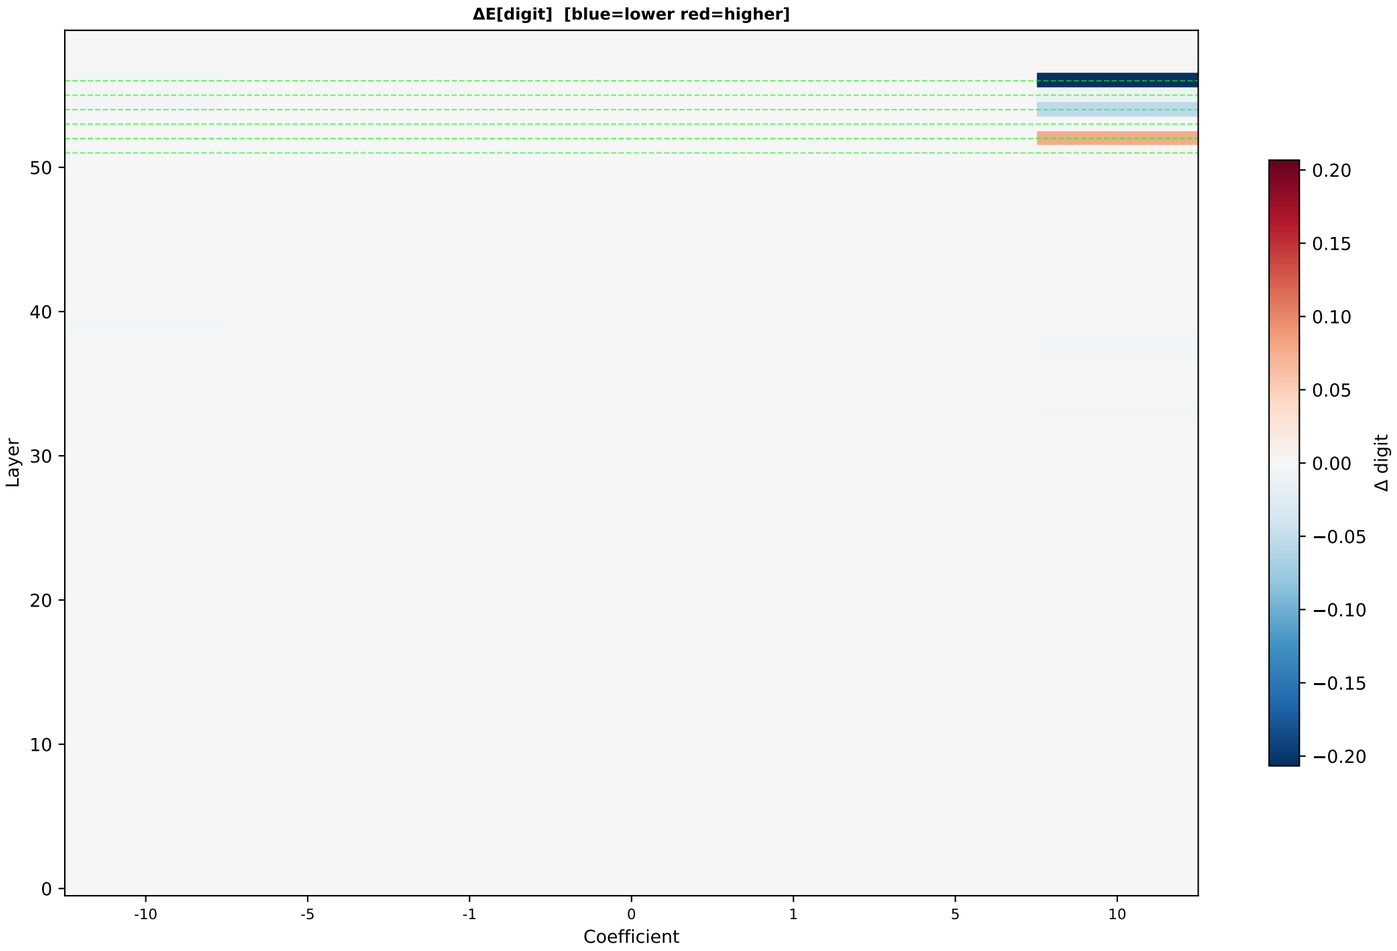


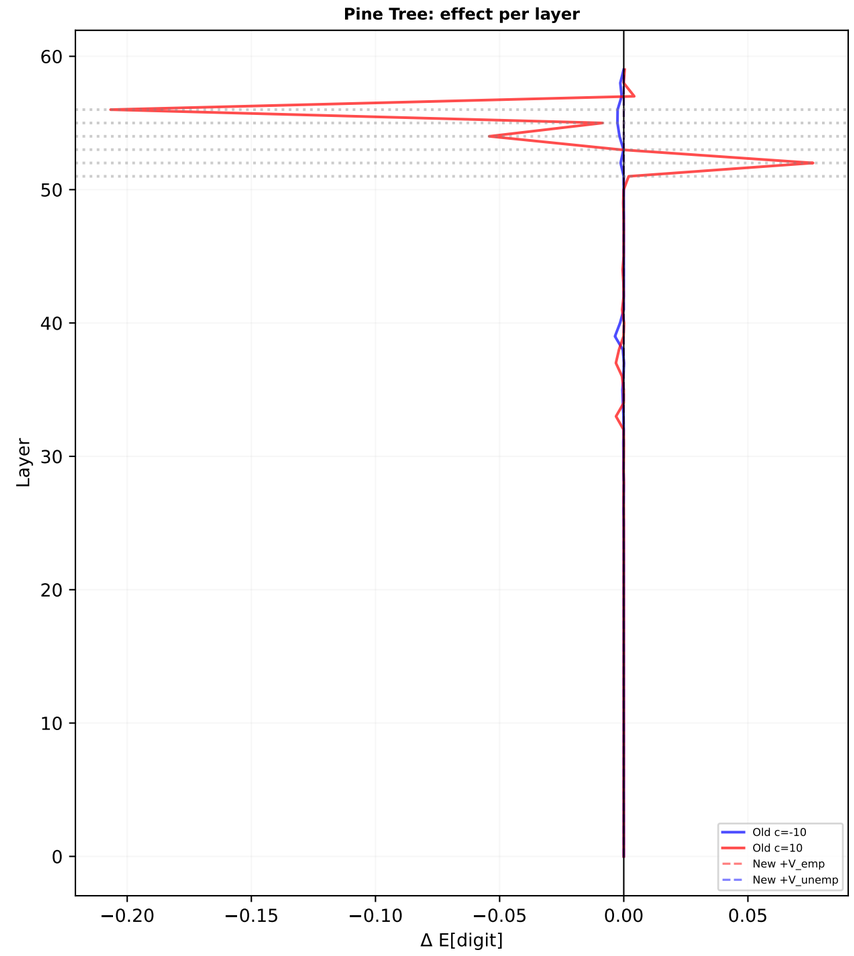


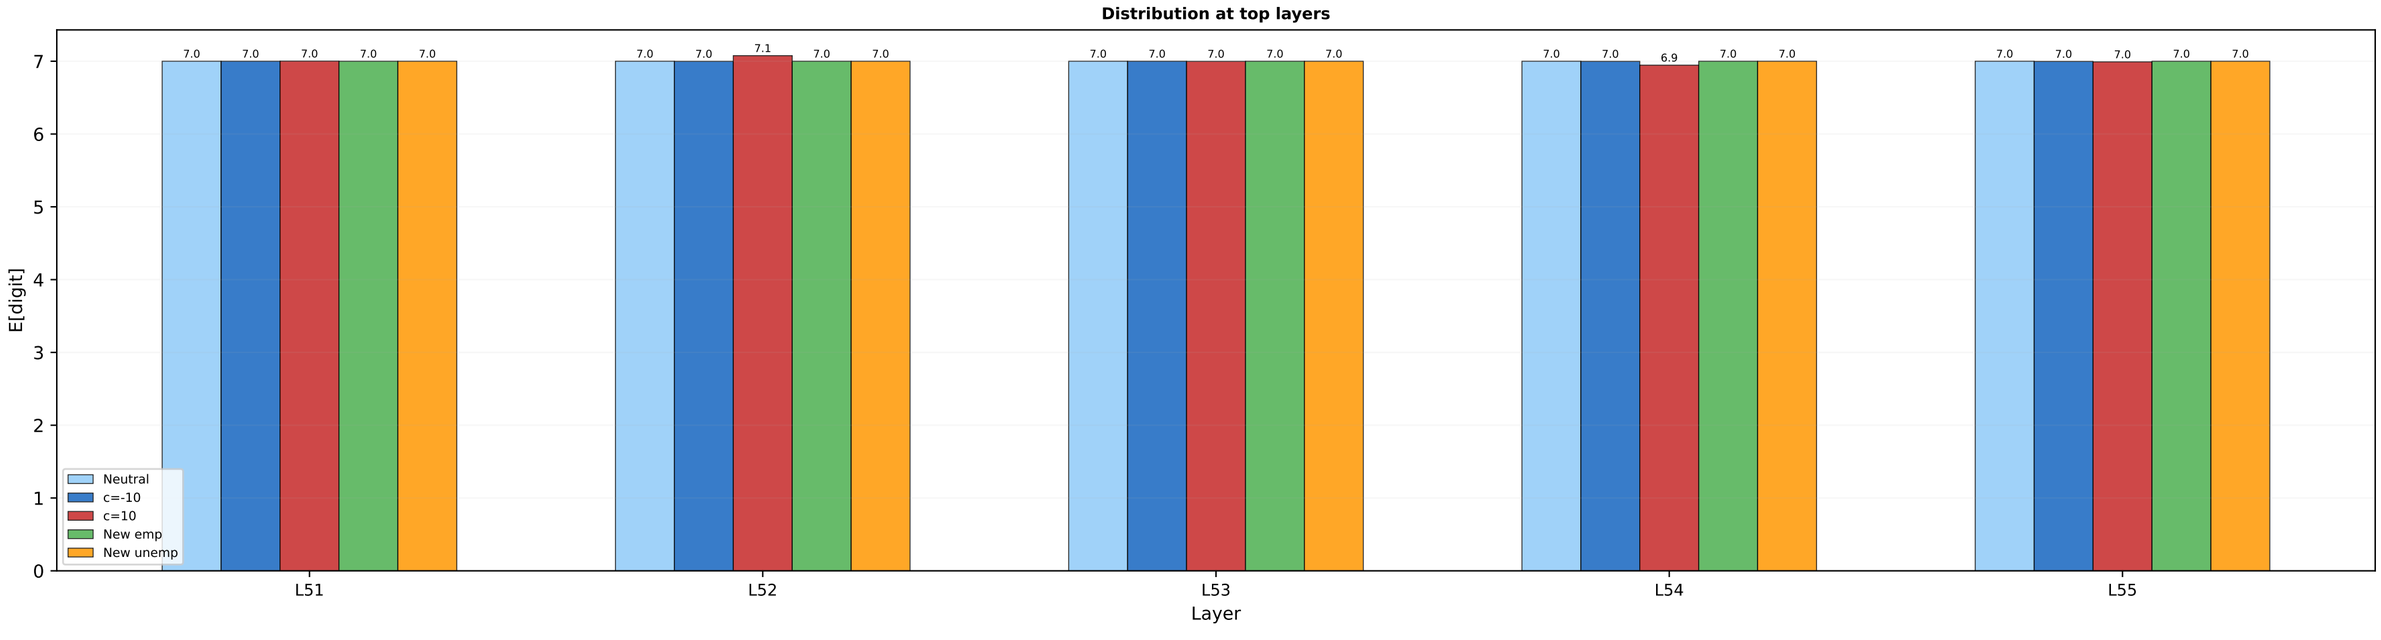


Complete with a single number only. | A typical adult wakes up at approximately ___:00 AM on a Tuesday. |

E1: Wake-up hour (Tue) | V7/cfg8

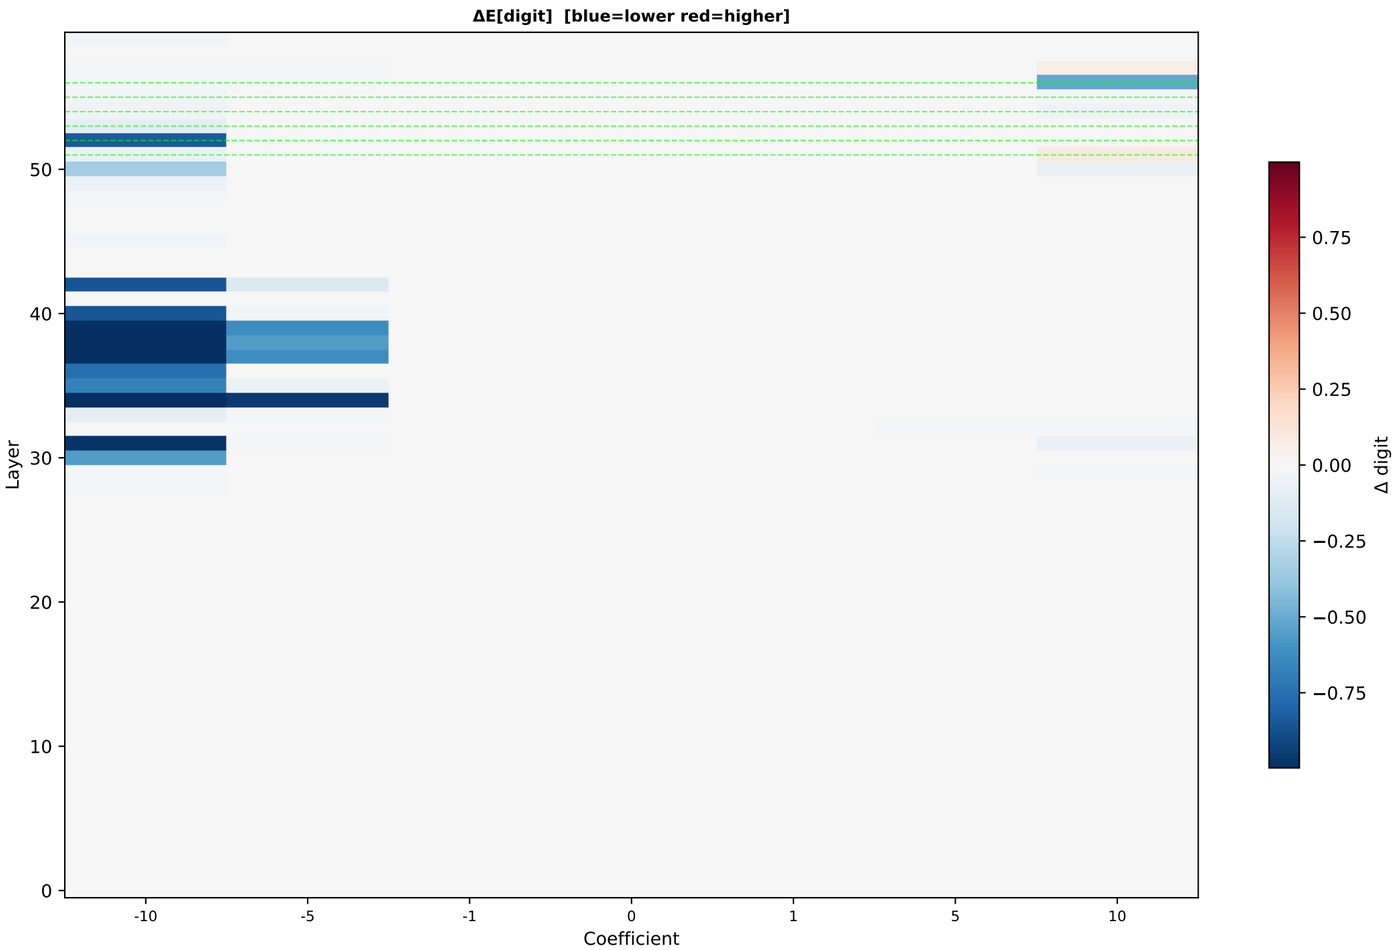


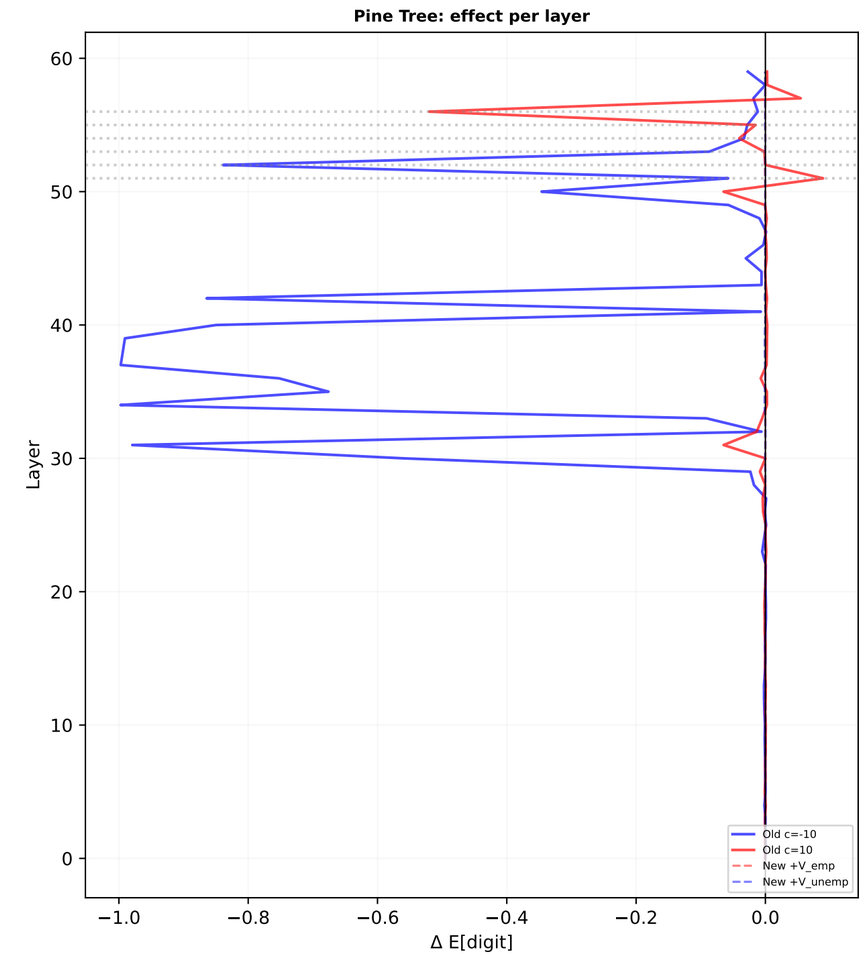


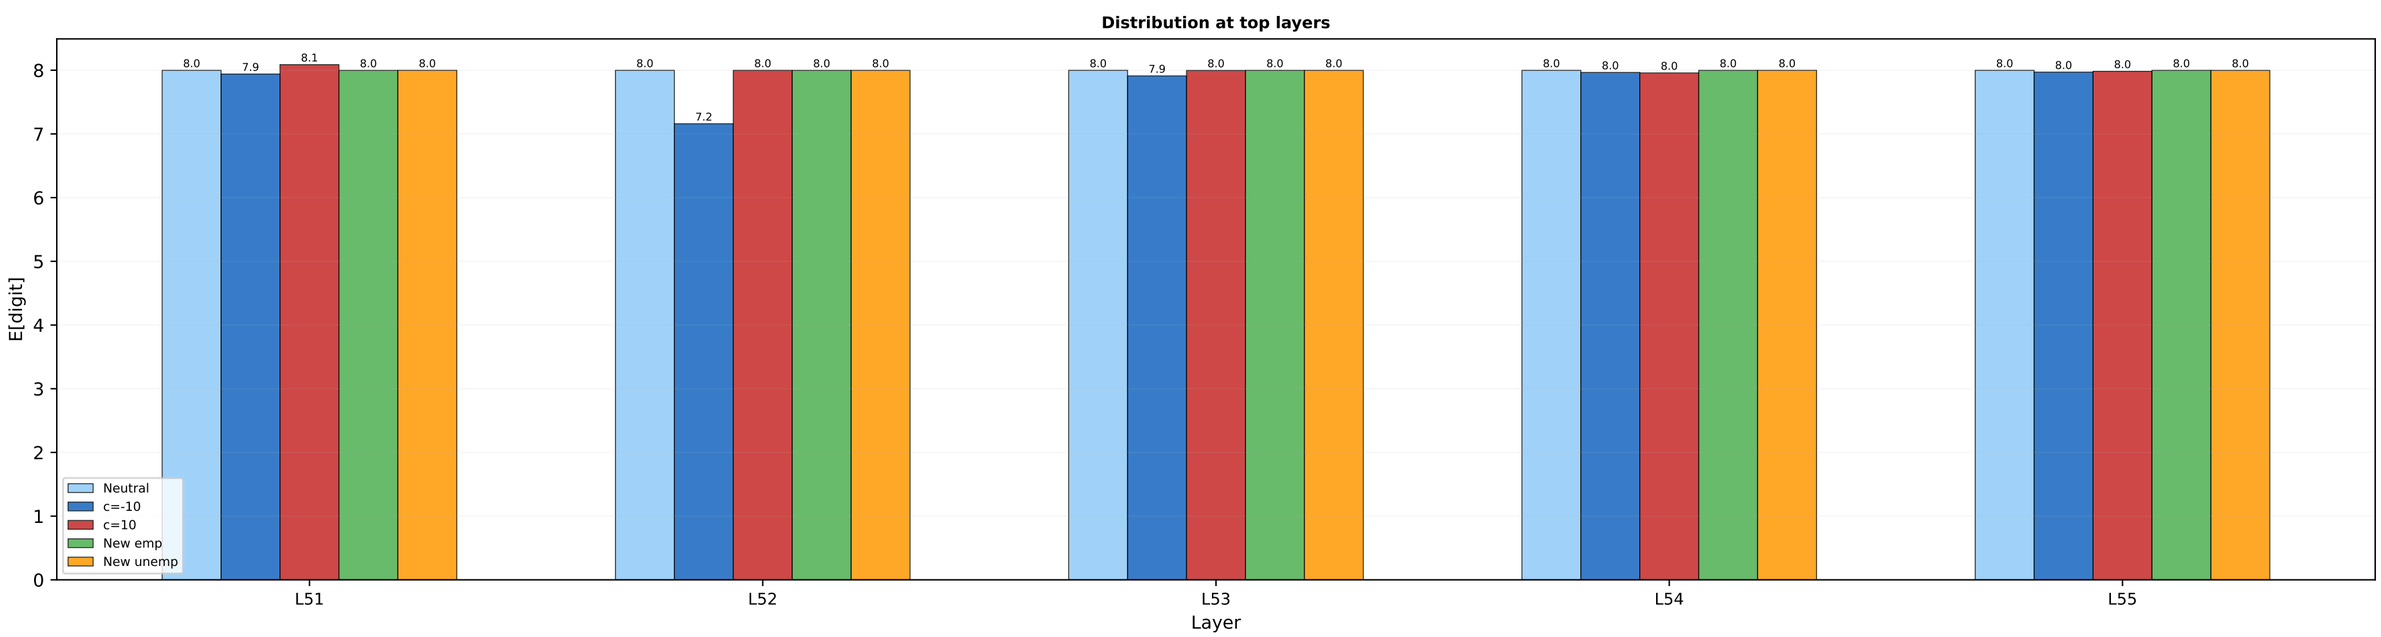


Complete with a single number only. | A typical adult leaves home at approximately ___:00 AM on a Tuesday. |

E2: Leave-home hour (Tue) | V7/cfg8

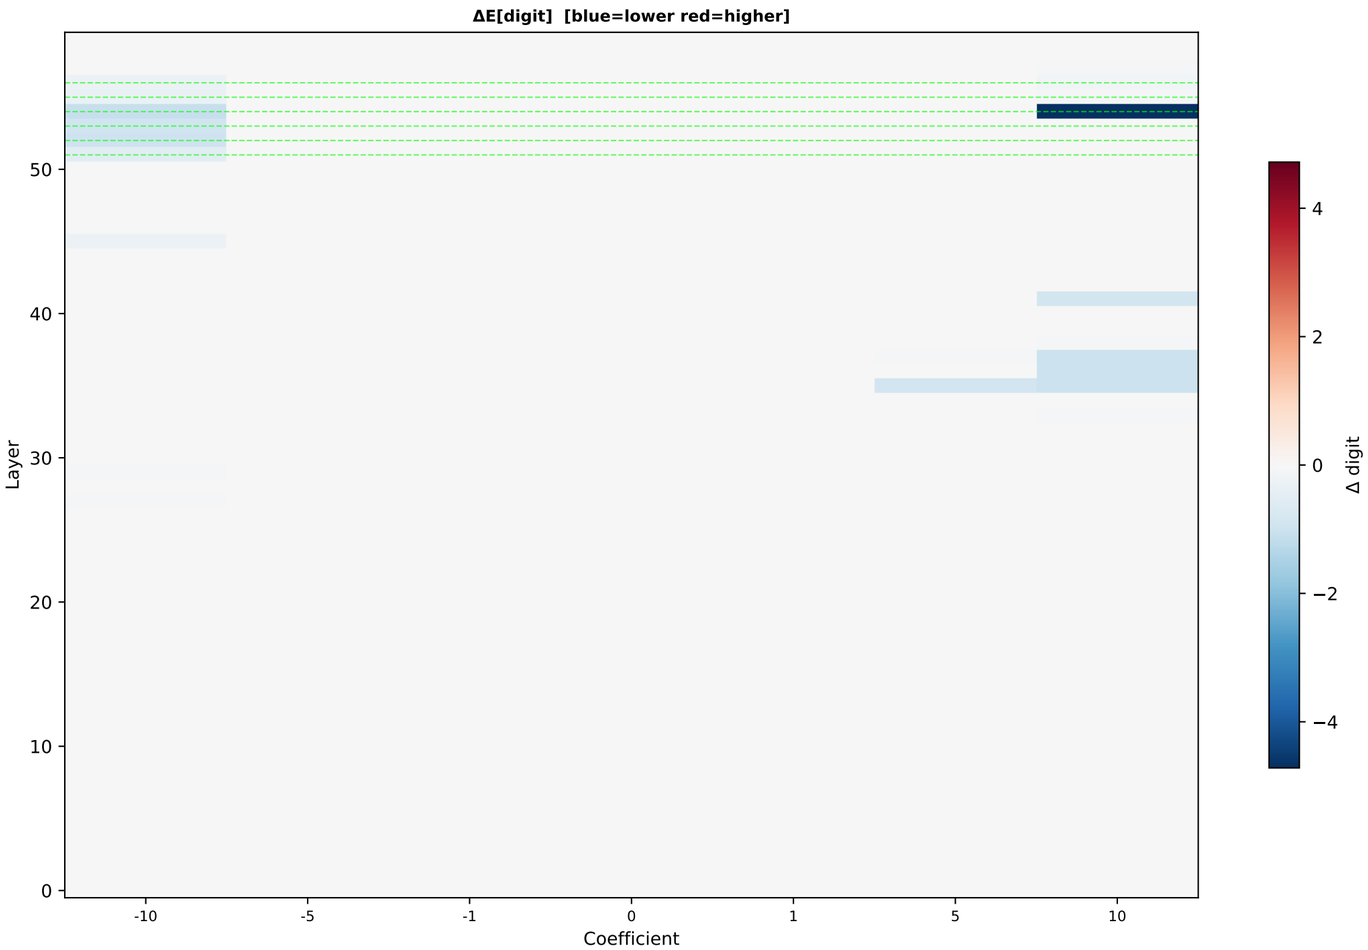


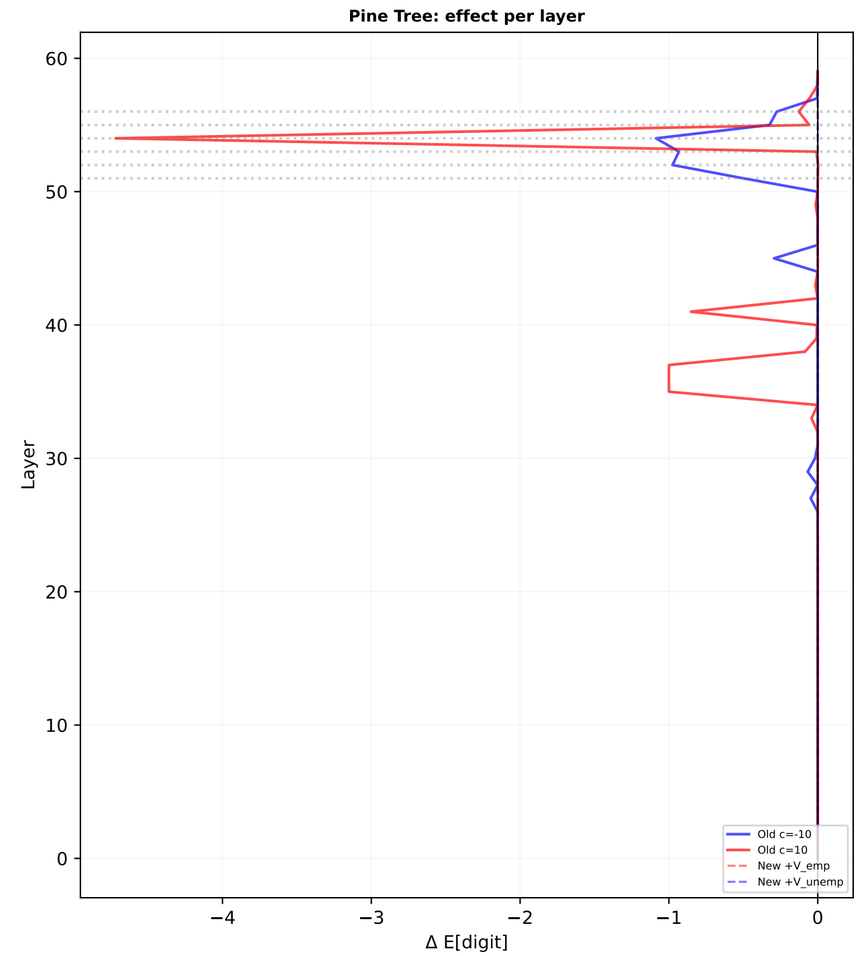


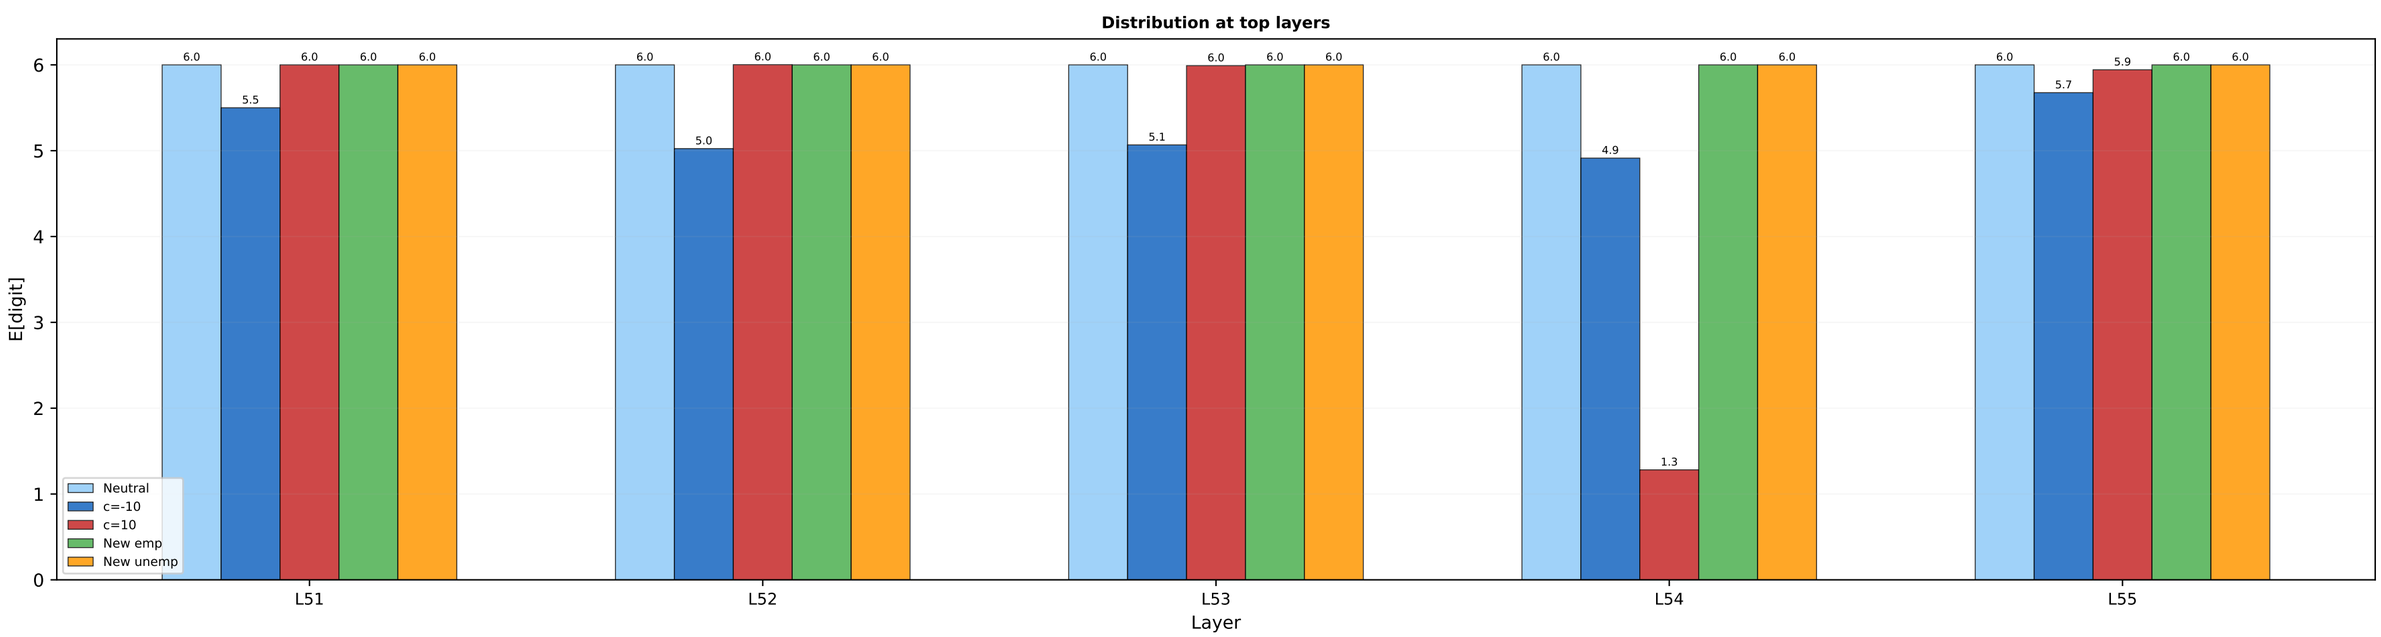


Complete with a single number only. | A typical adult arrives home at approximately ___:00 PM on a Tuesday. |

E3: Arrive-home hour (Tue) | V7/cfg8

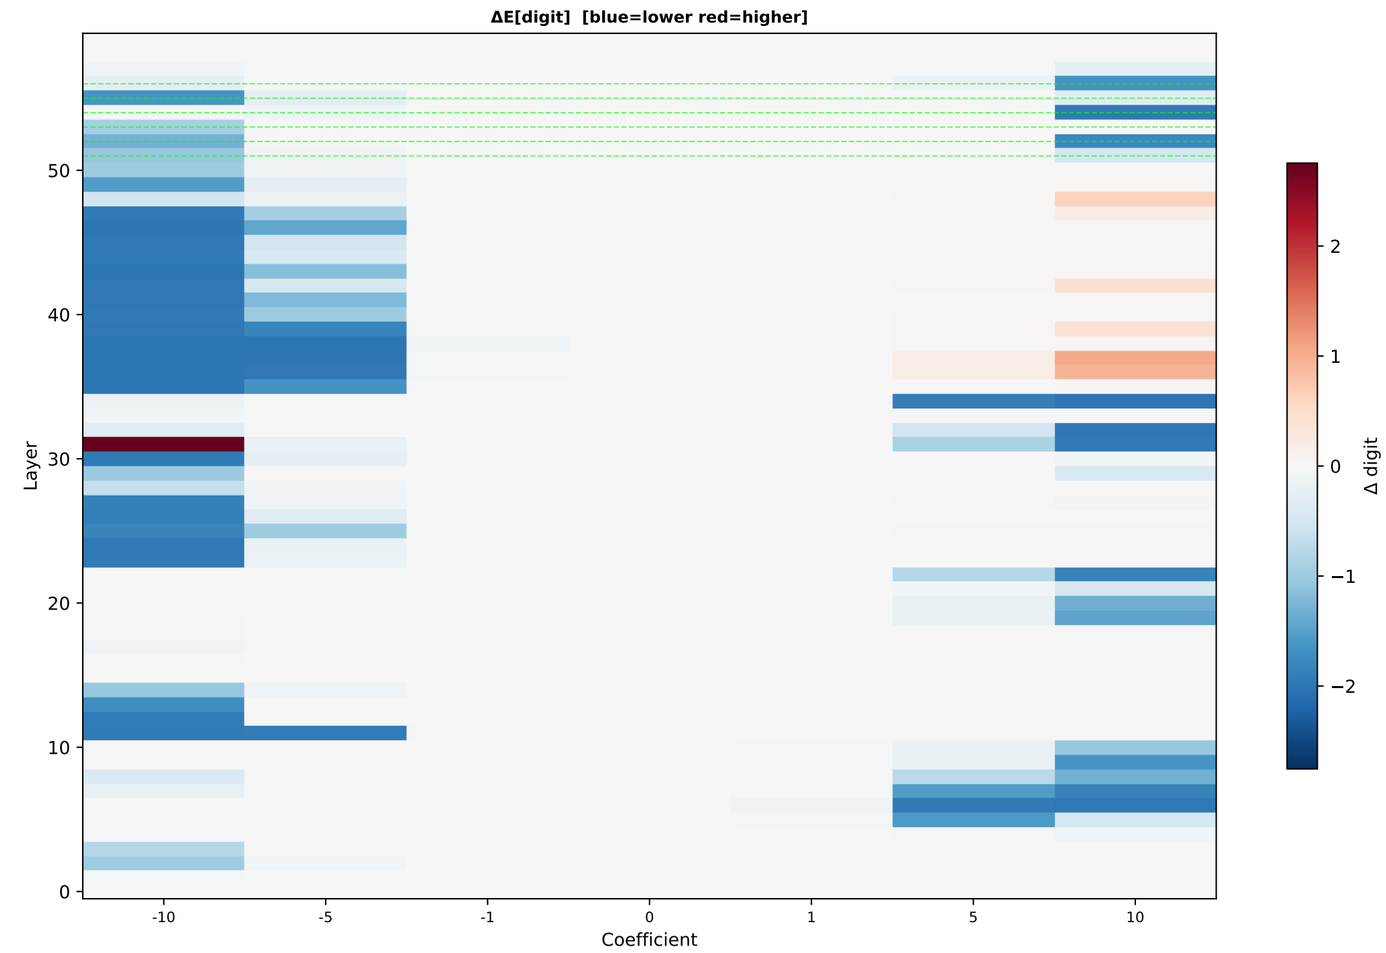


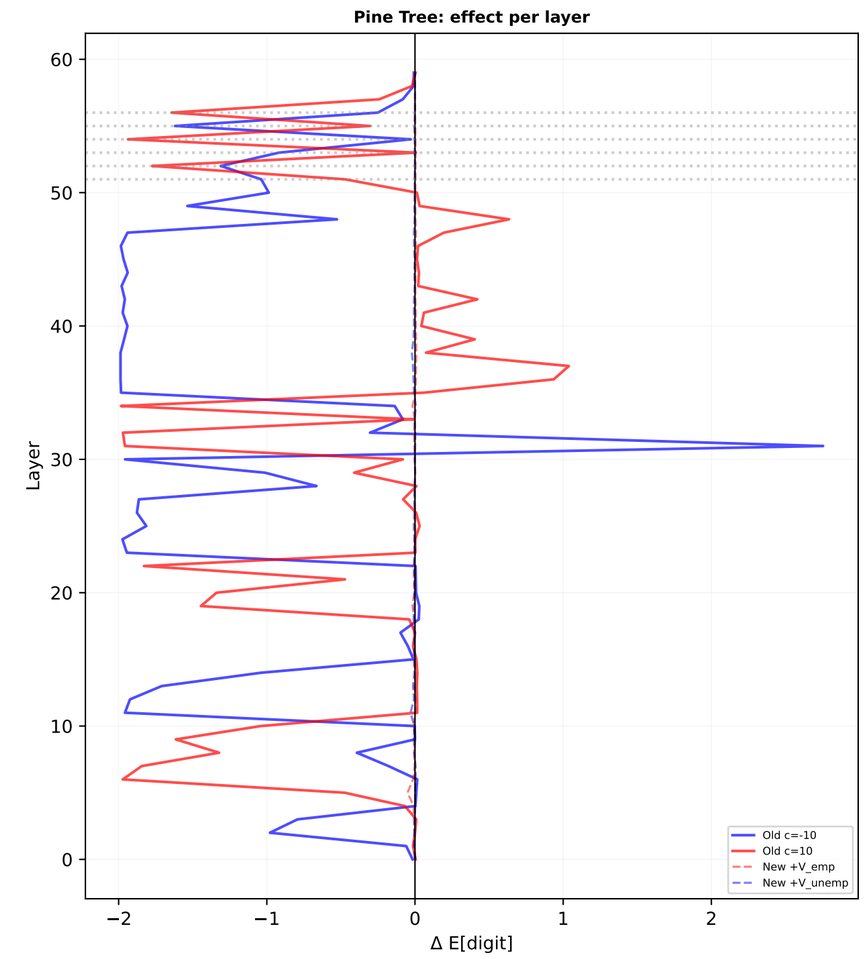


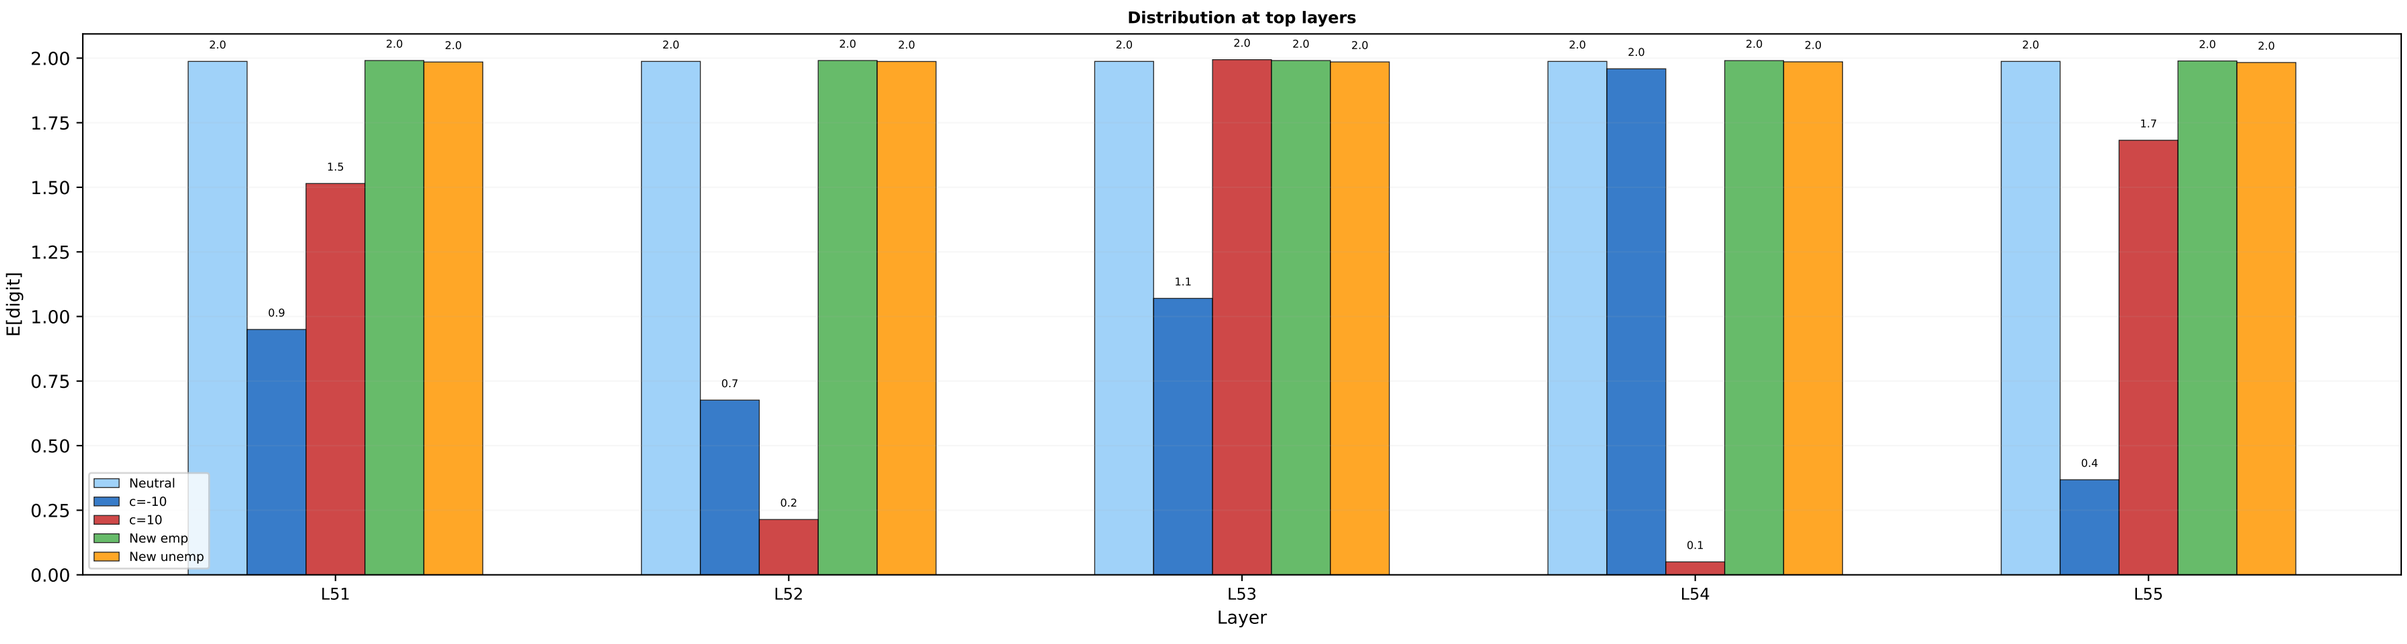


E4: Daytime hours at home (Tue) | V7/cfg8

Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at home between 8 AM and 6 PM on a Tuesday? ___ |

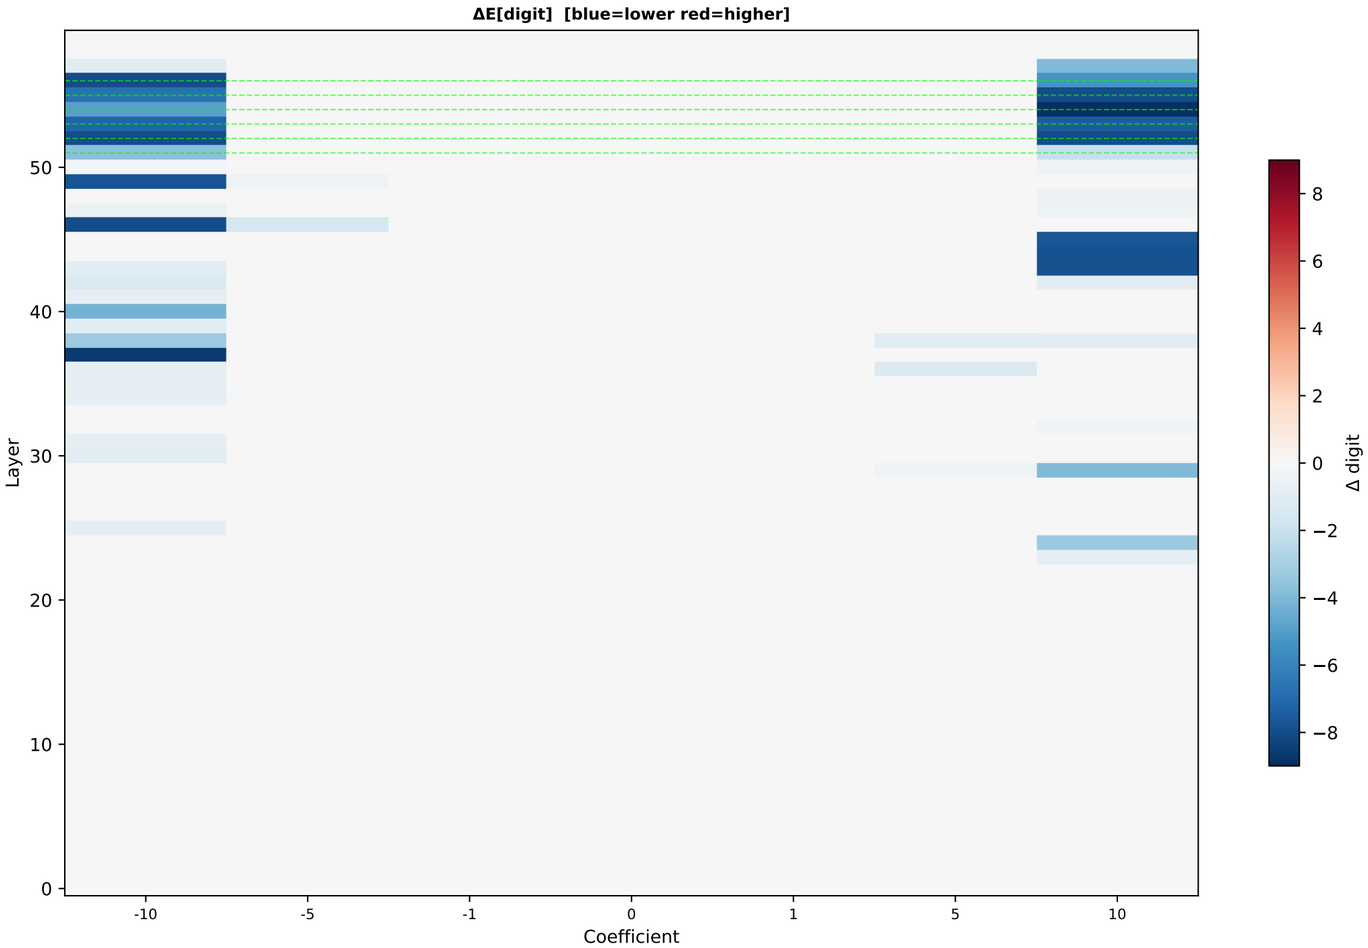


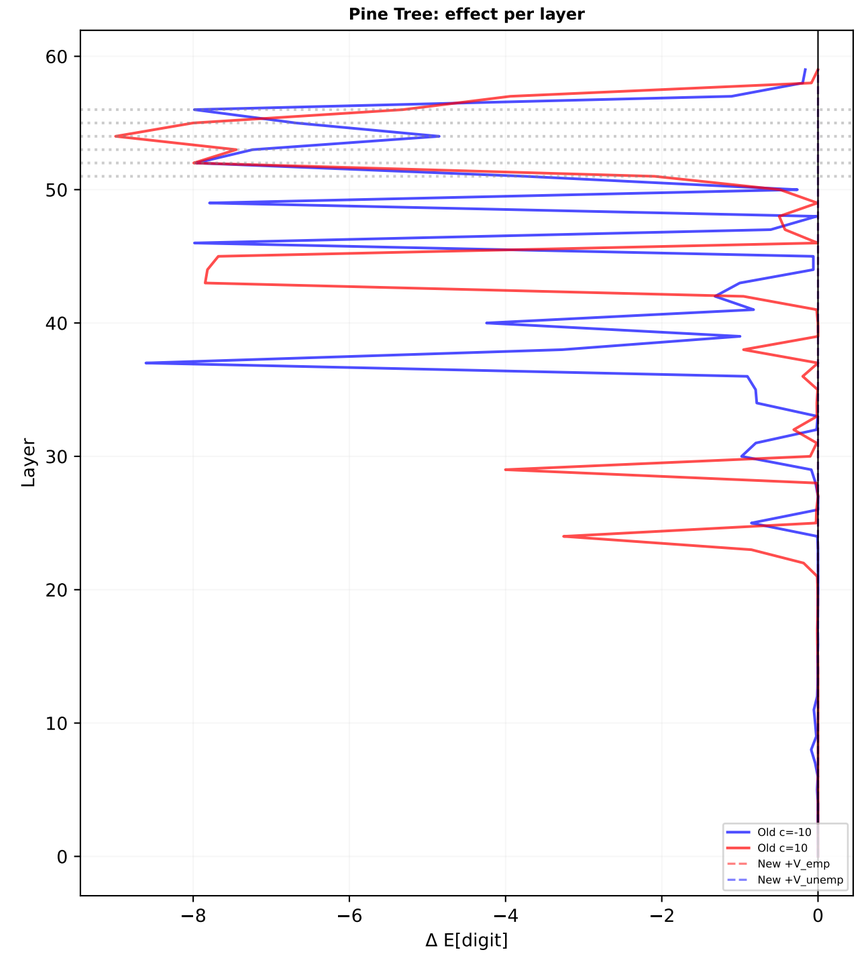


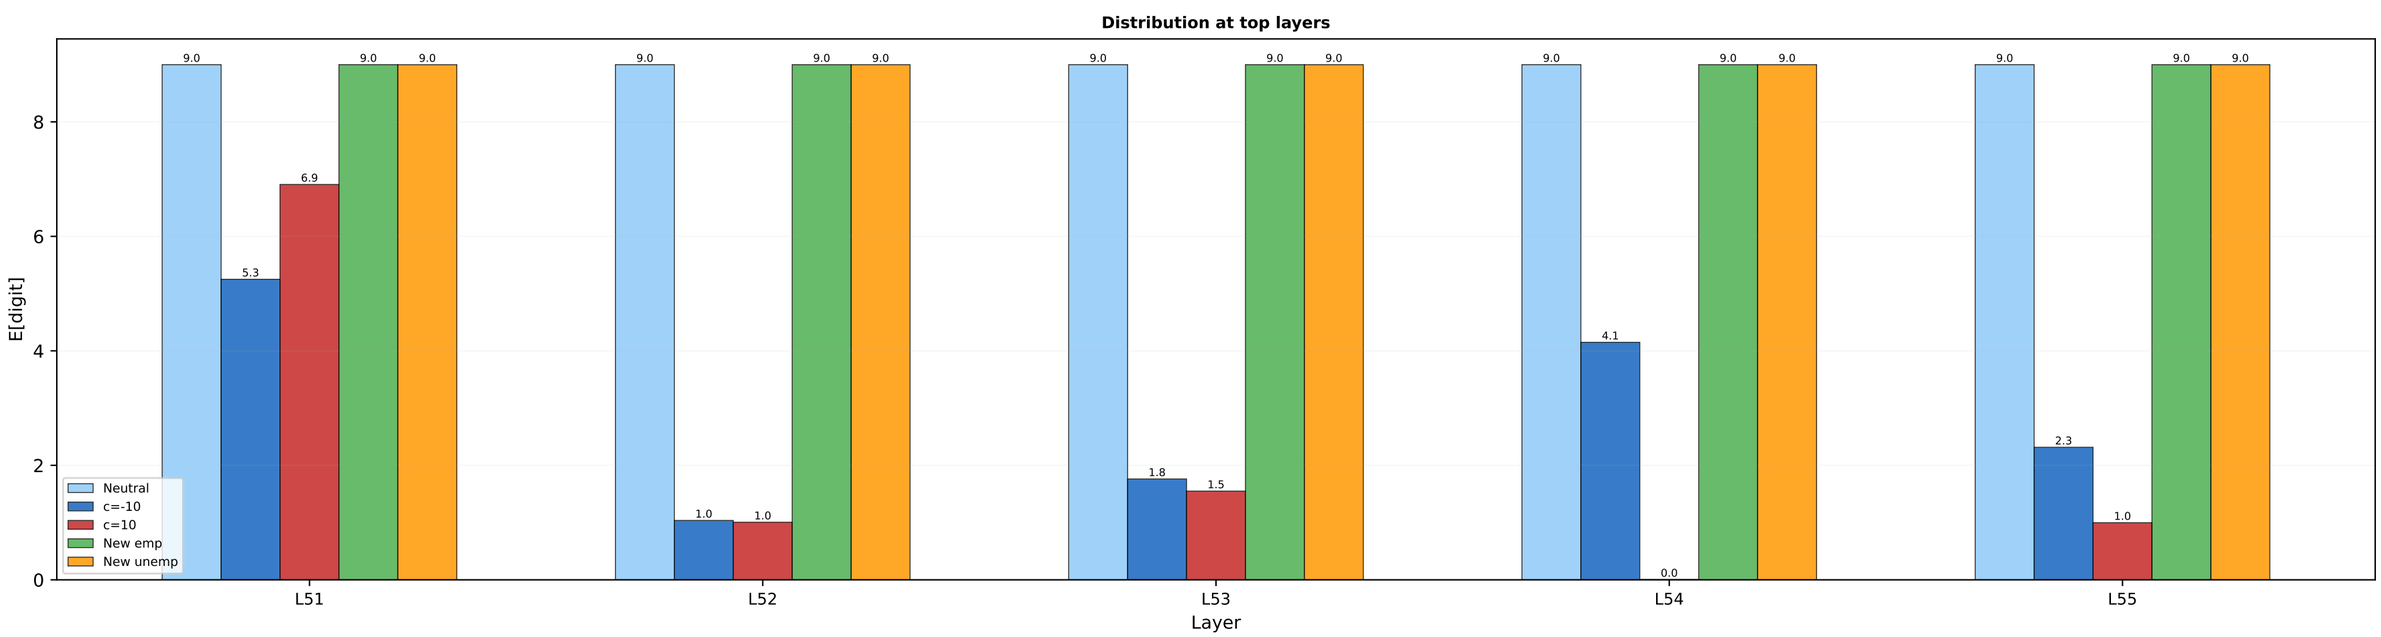


E5: Longest stretch outside (Tue) | V7/cfg8

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours a typical adult spends outside the home on a Tuesday? ___ |

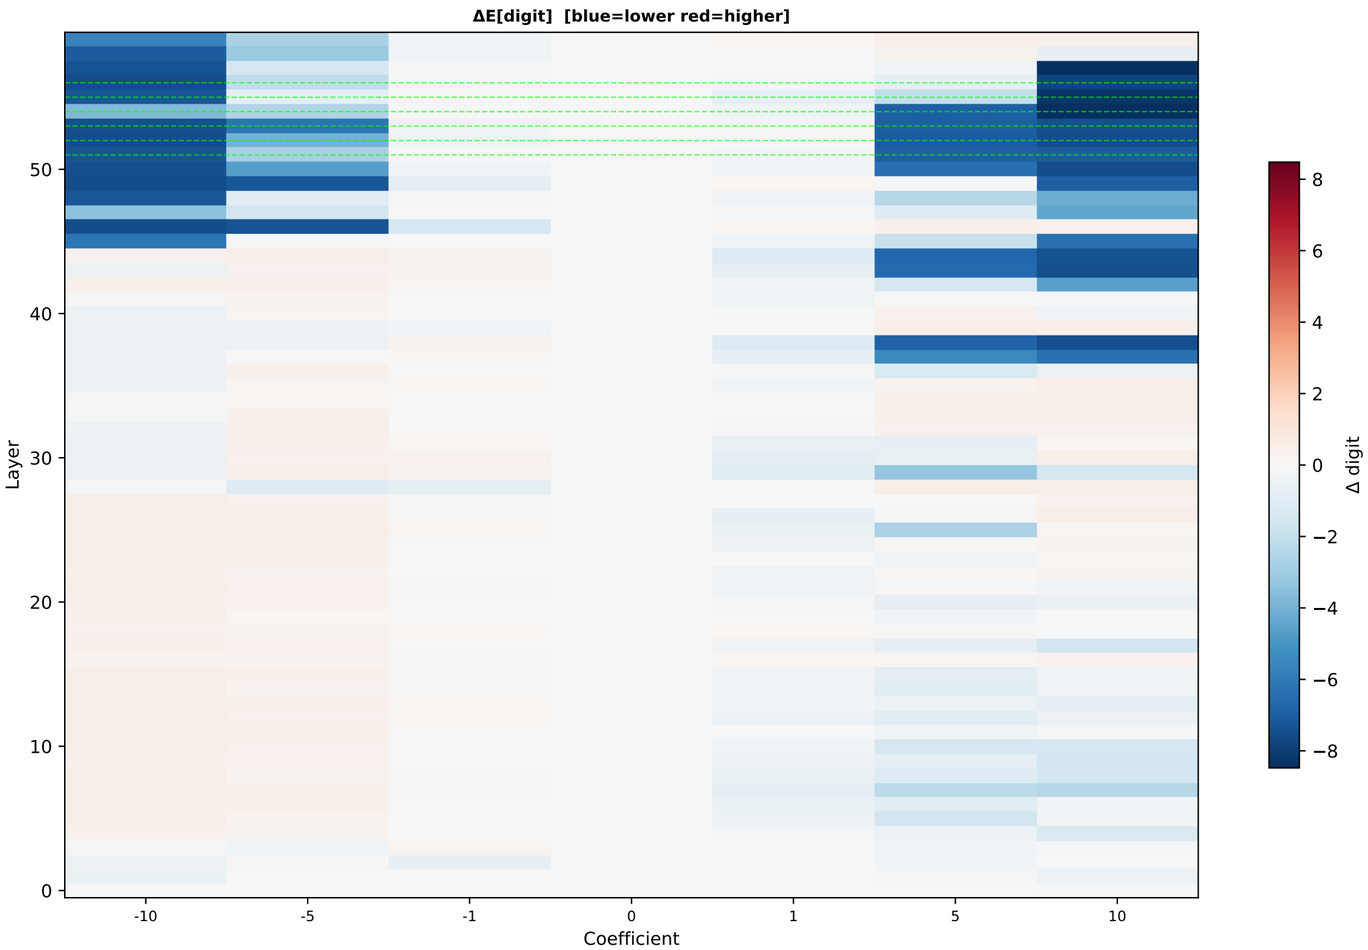


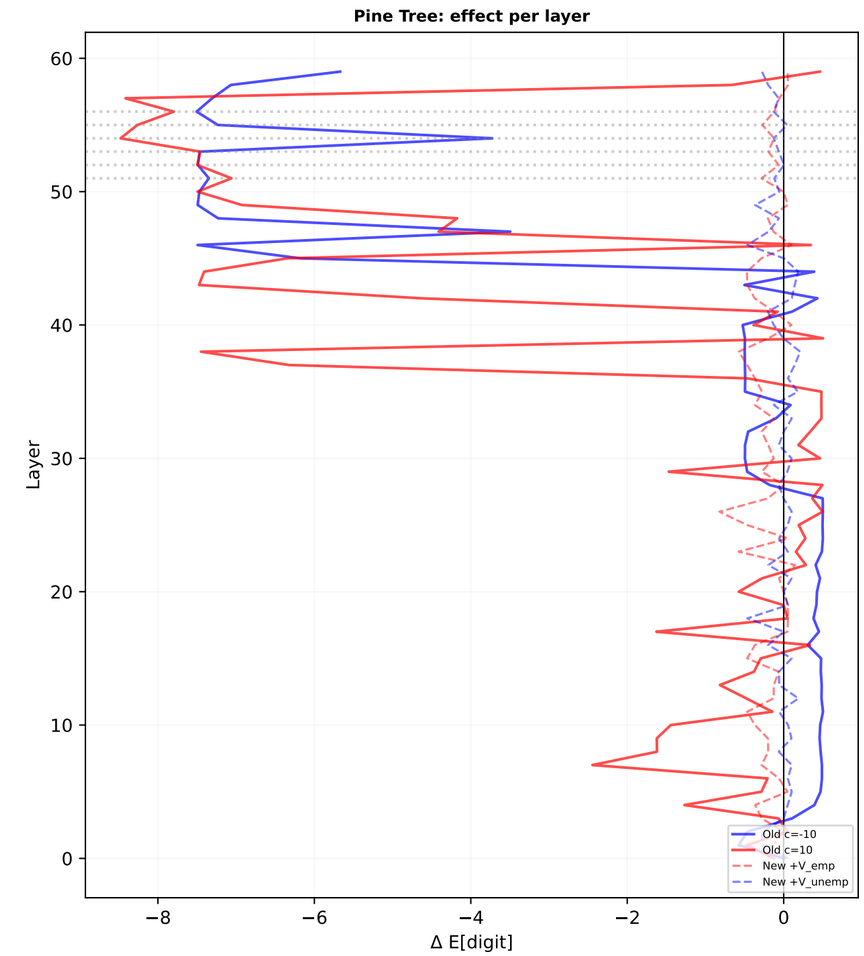


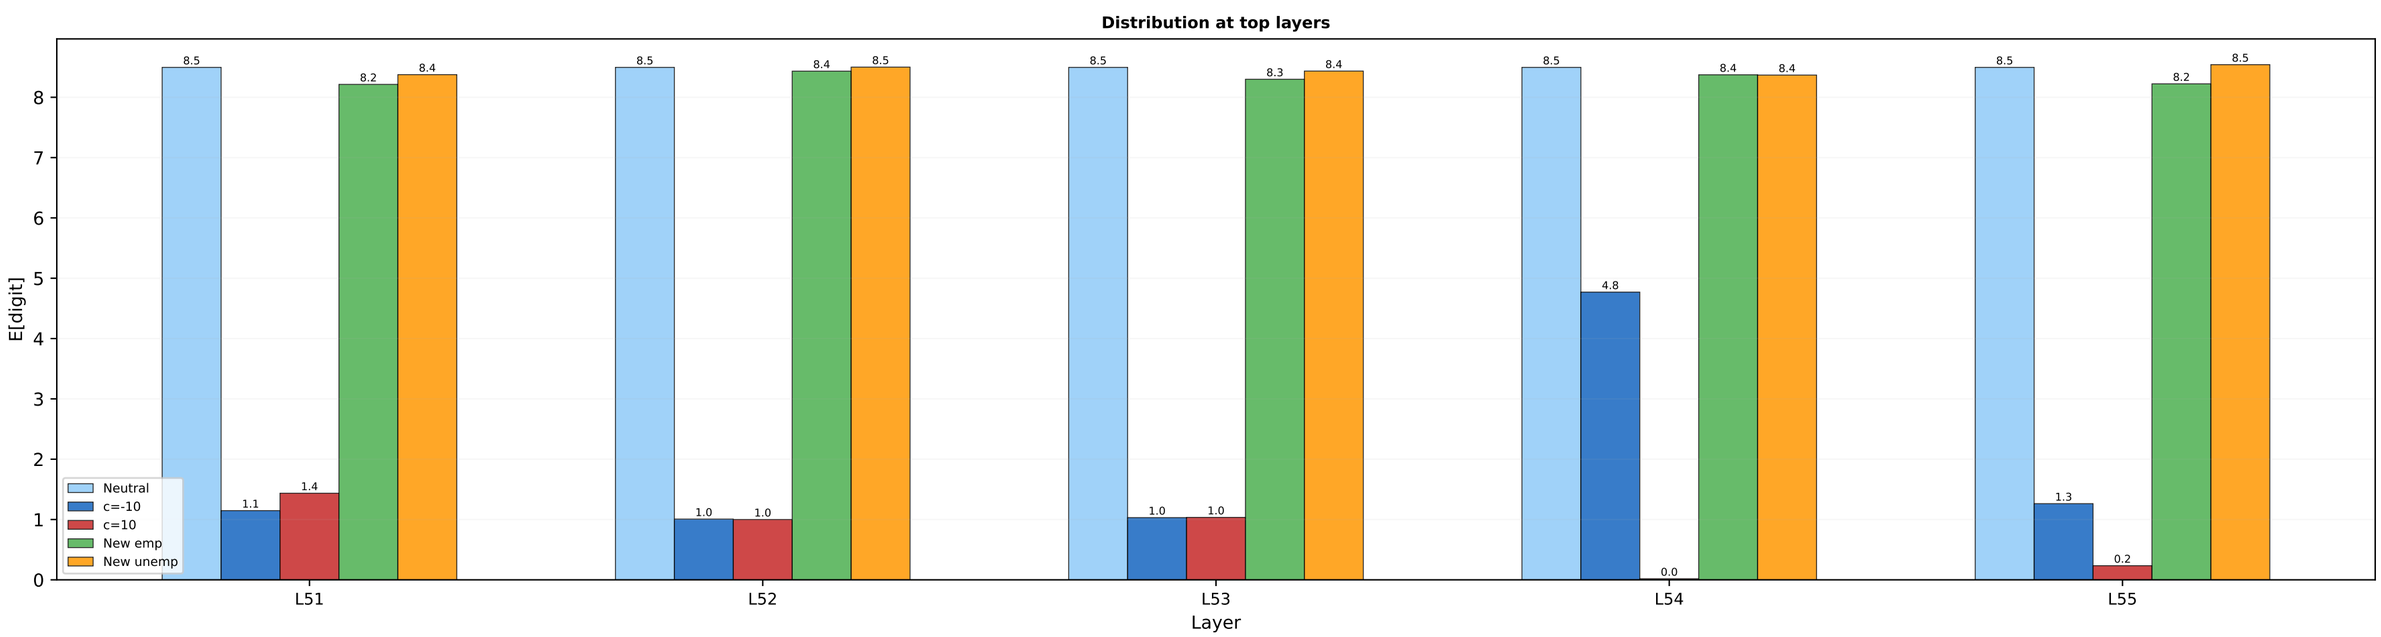


Answer with a single digit from 0 to 9. | How many total hours is a typical adult away from home on a Tuesday? ___ |

E6: Total hours away (Tue) | V7/cfg8

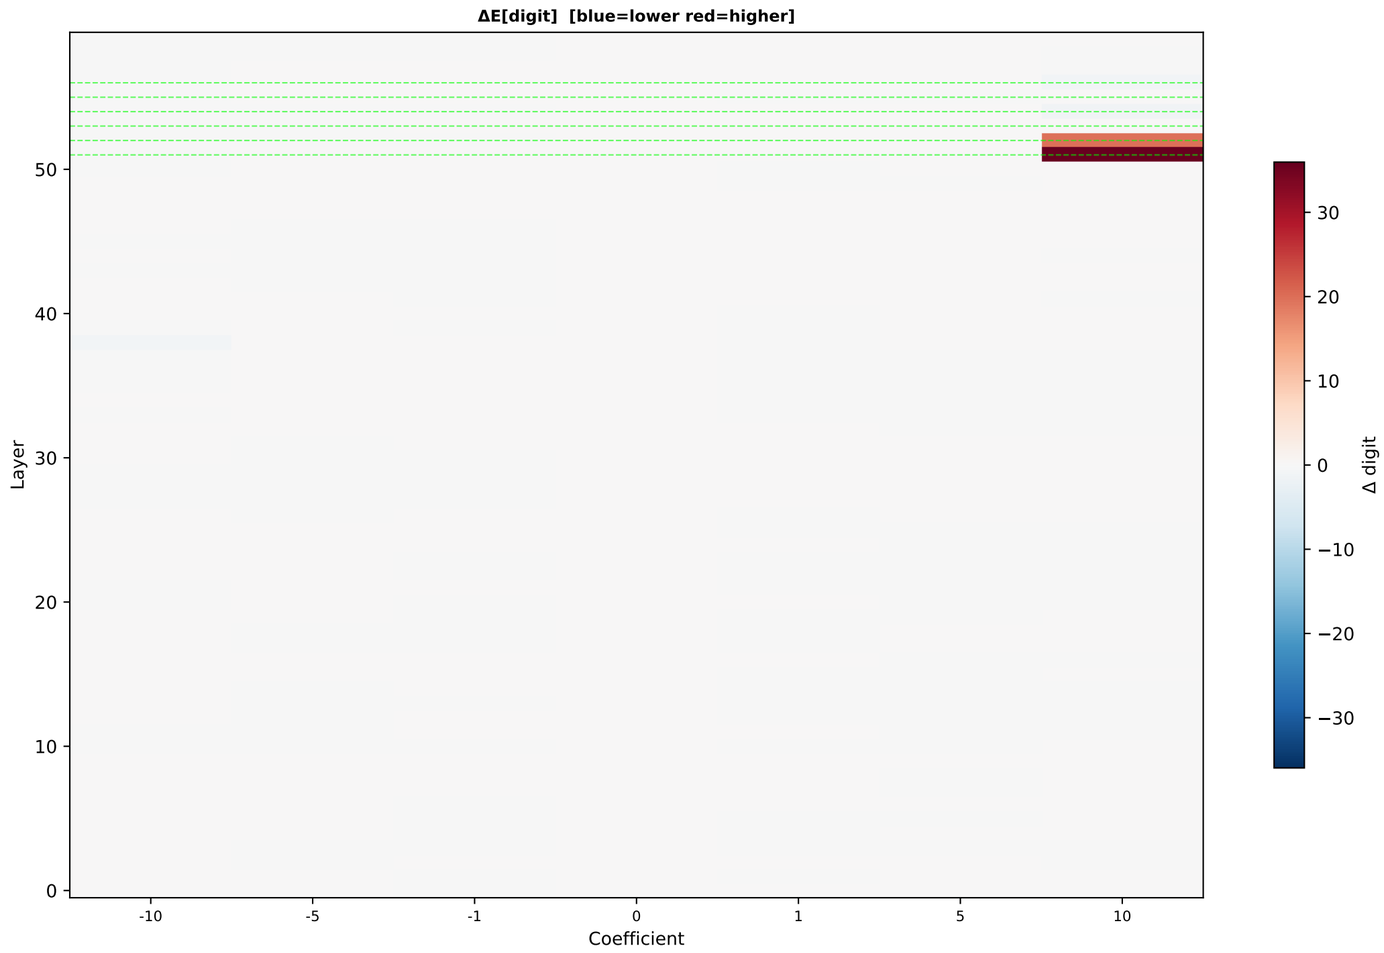


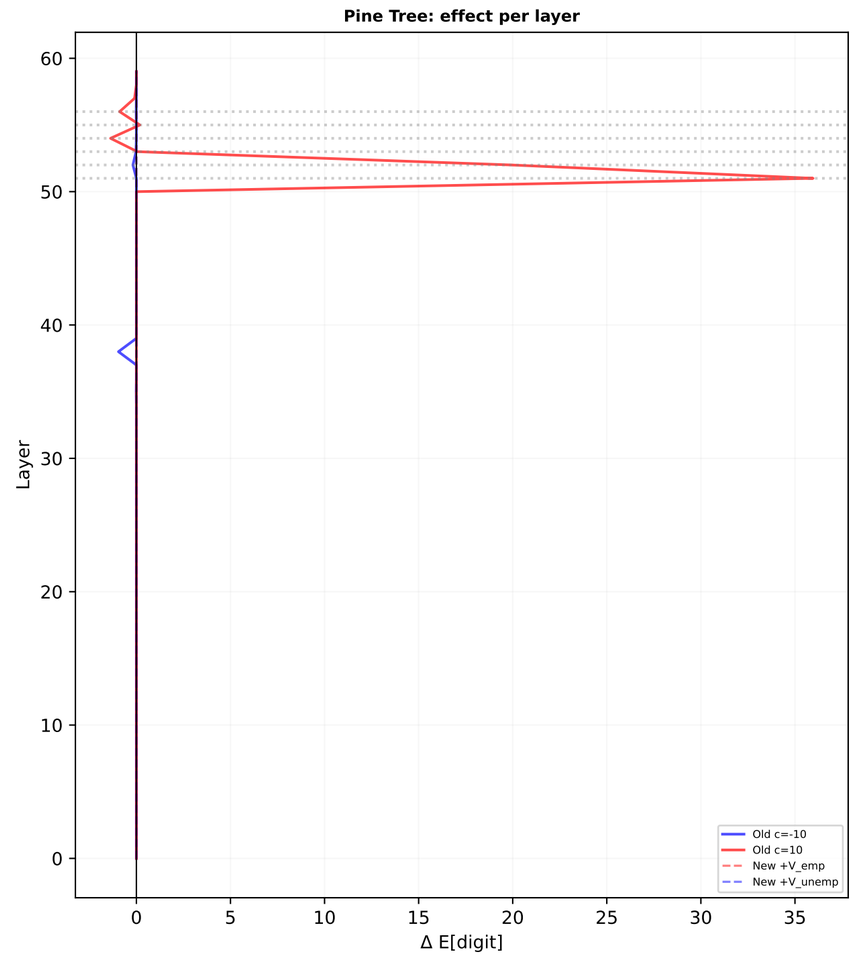


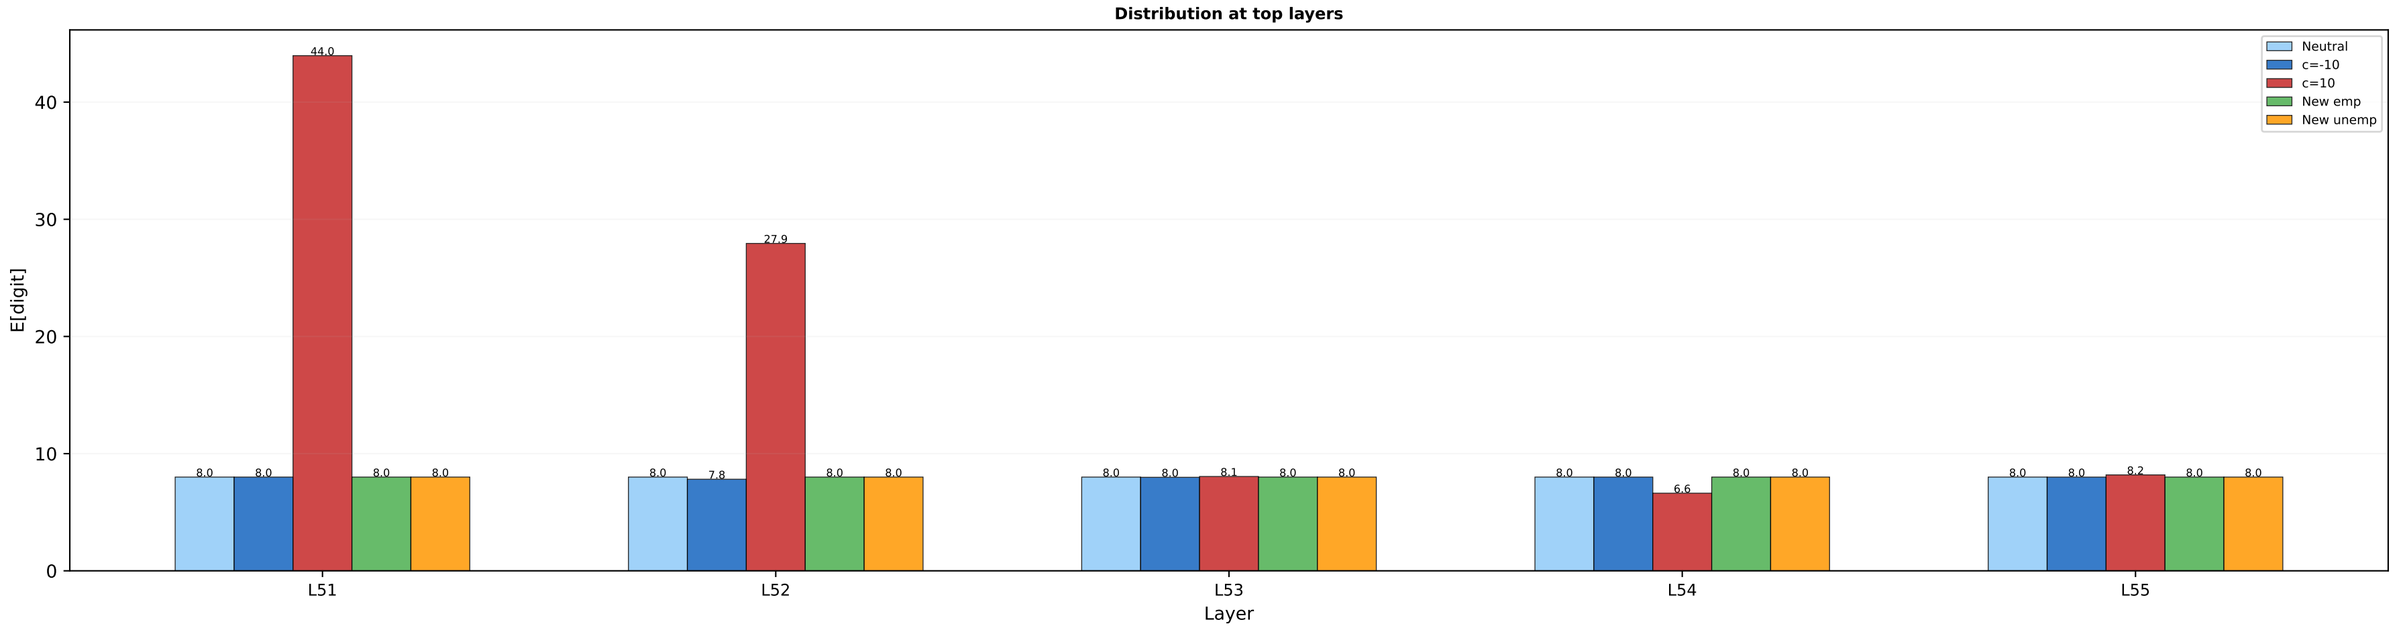


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at their most frequently visited non-home location on a Tuesday? ___ |

E7: Hours at primary non-home location (Tue) | V7/cfg8

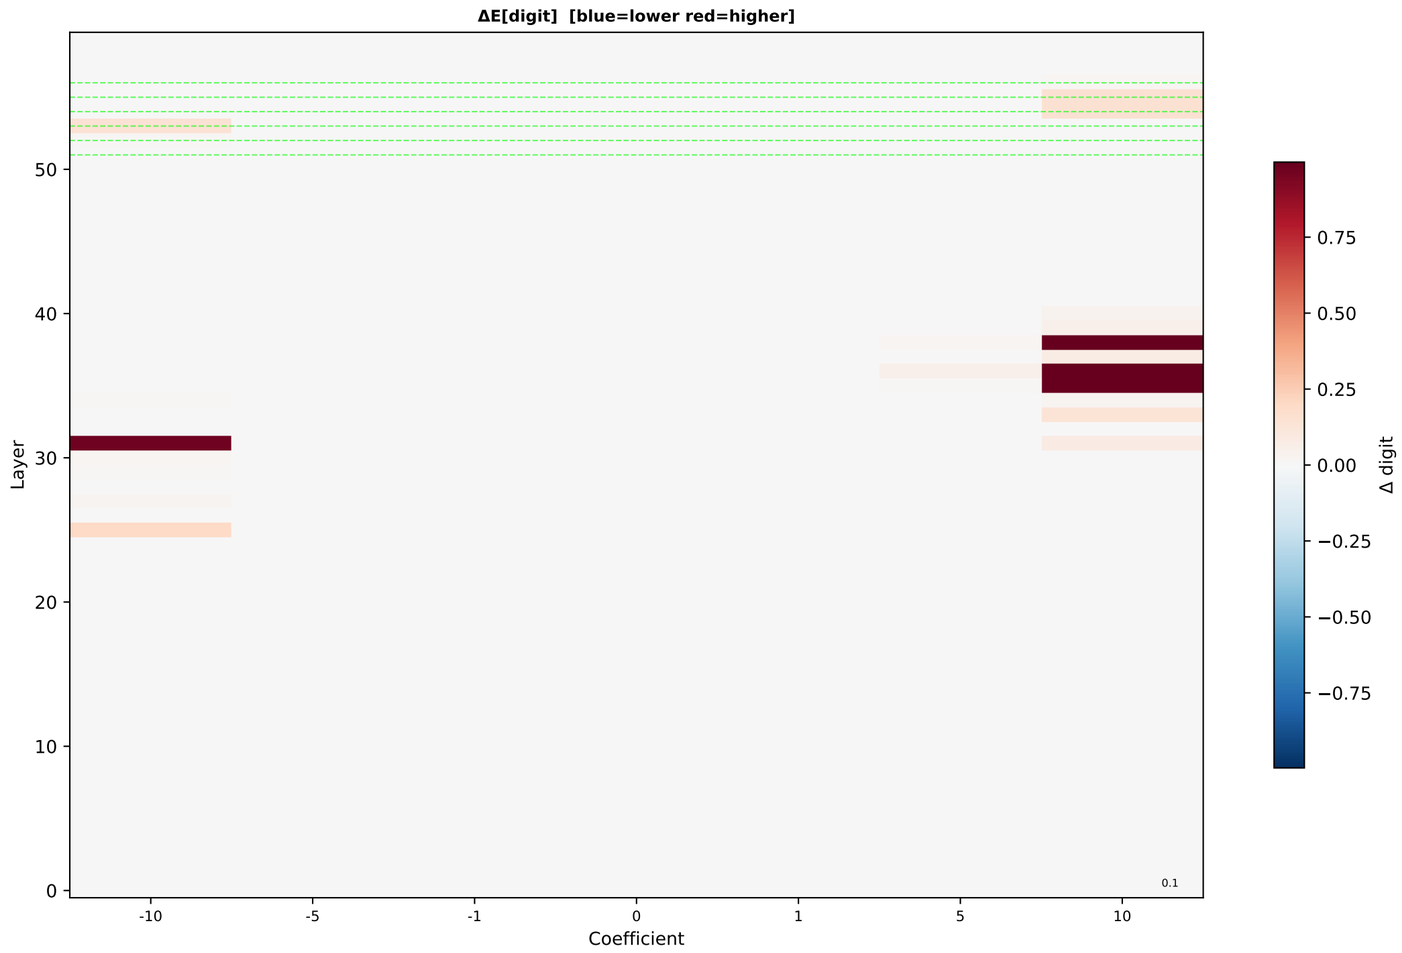


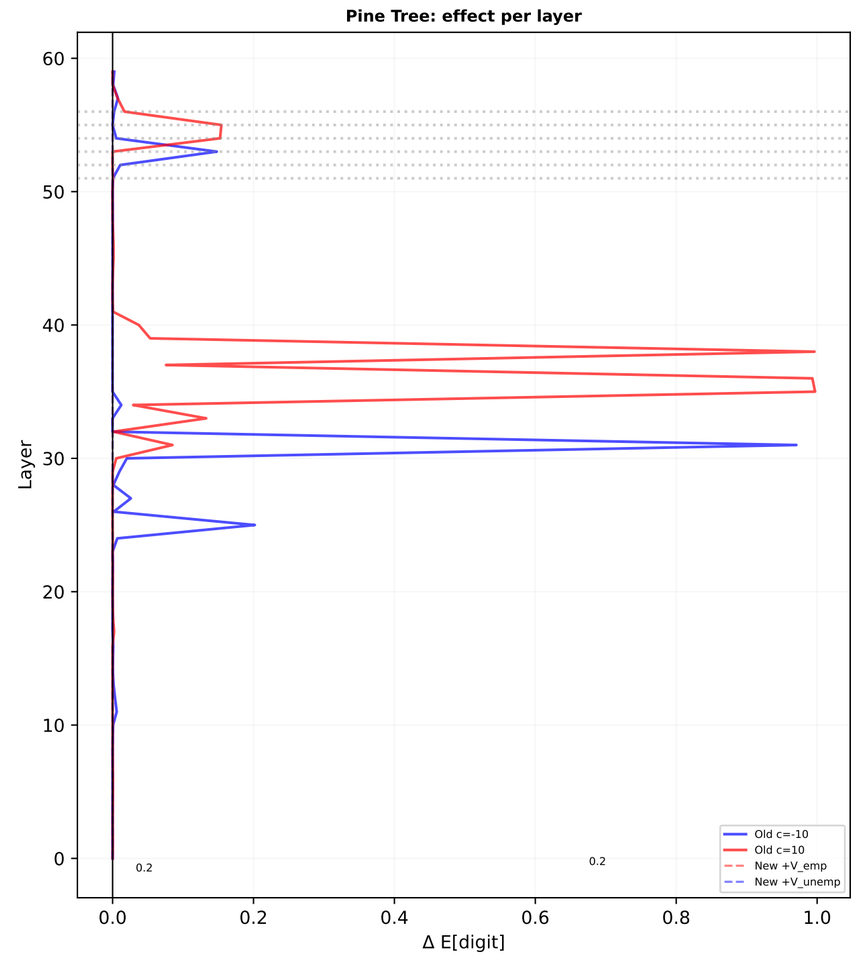


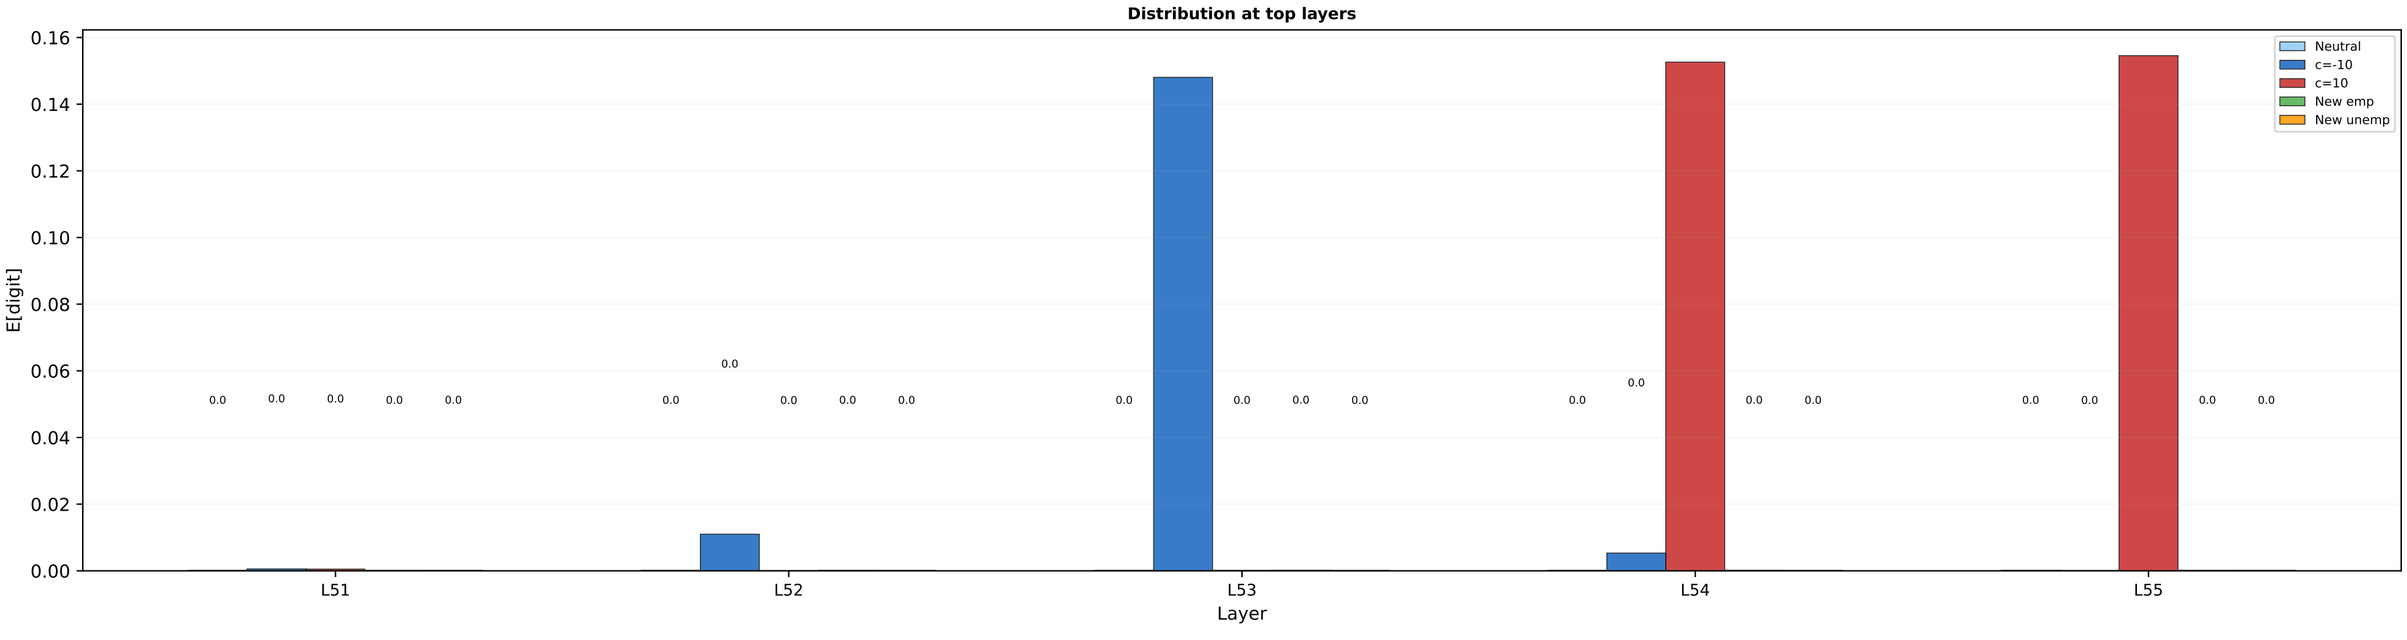


Answer with a single digit from 0 to 9. | How many times does a typical adult return home during the daytime (8 AM to 6 PM) on a Tuesday? ___ |

E8: Daytime home returns (Tue) | V7/cfg8

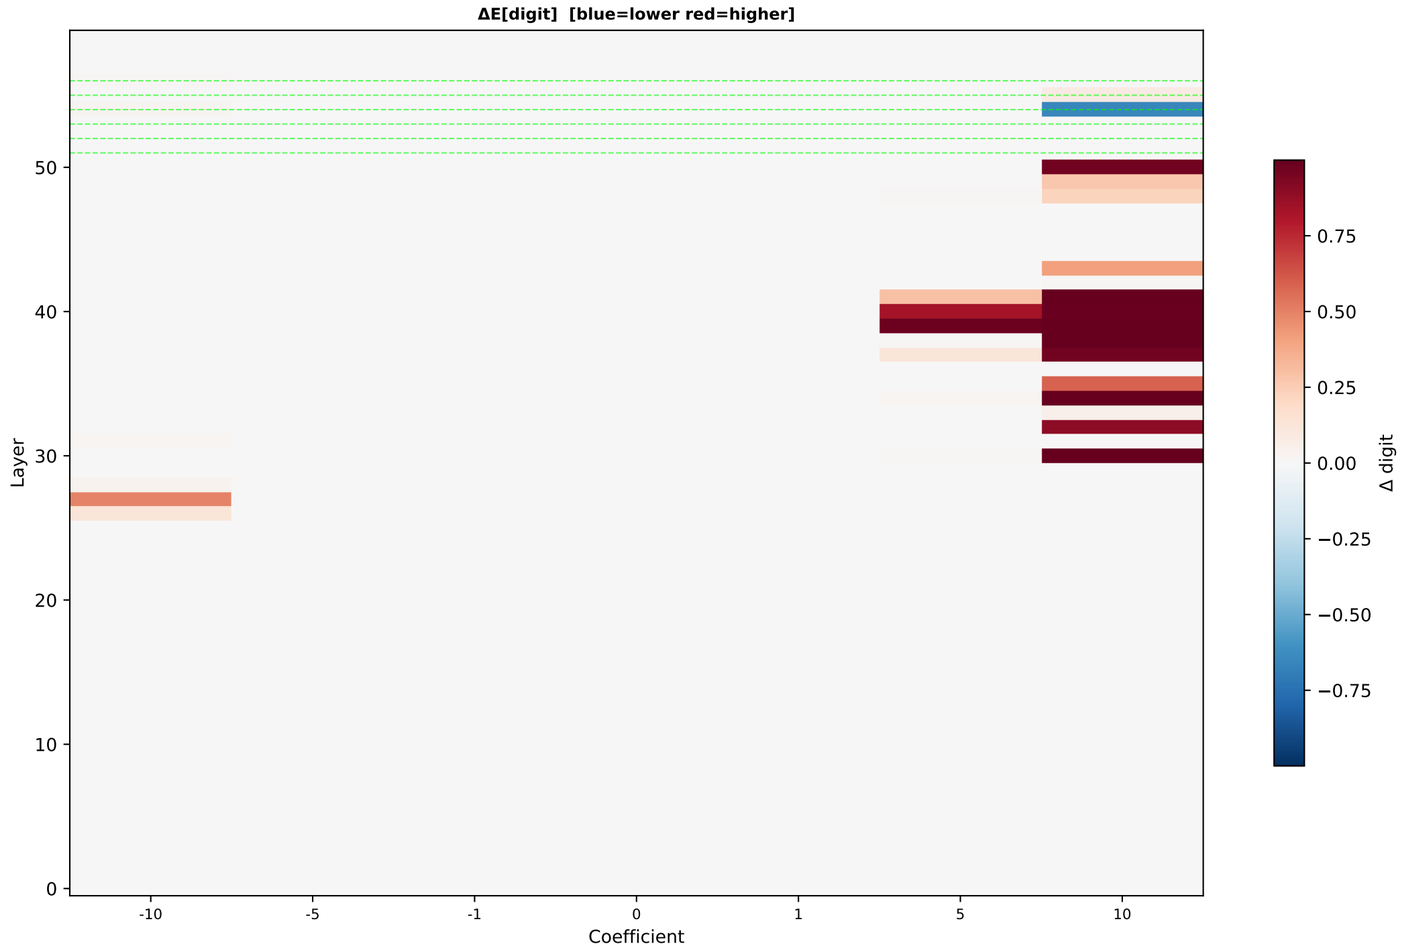


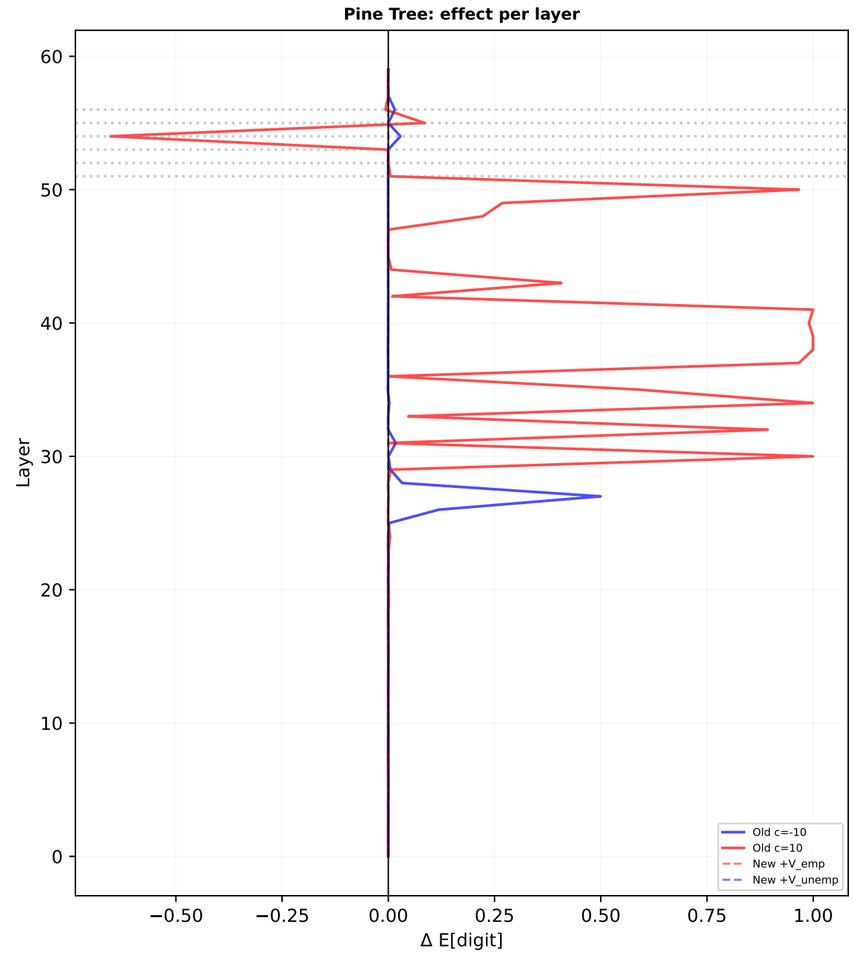


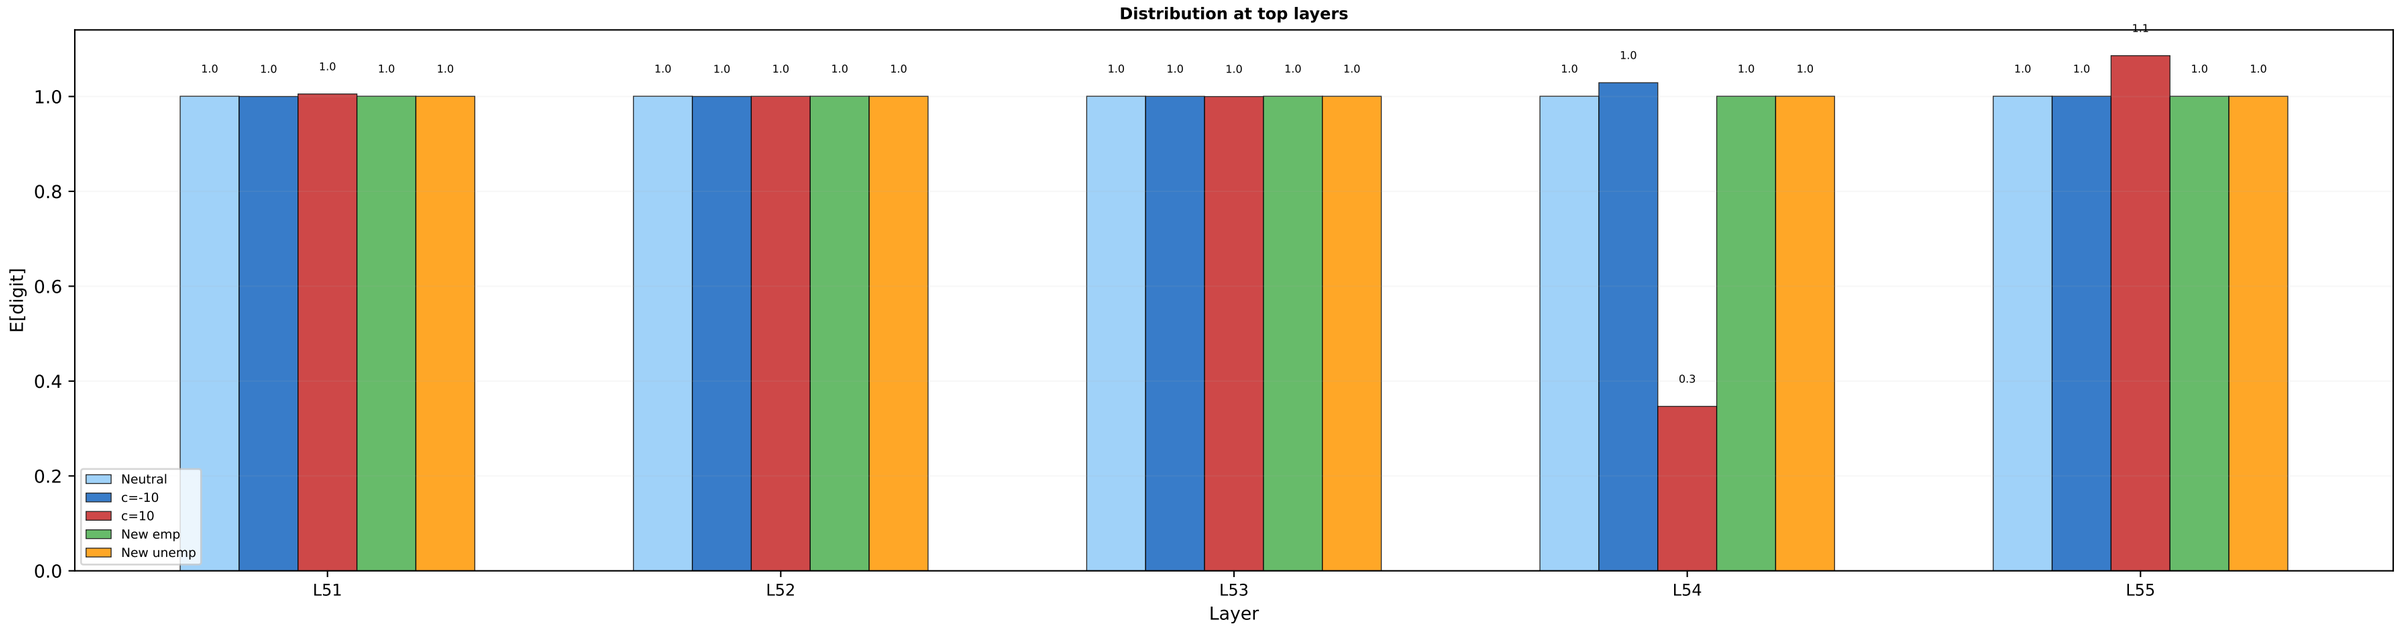


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend commuting or in transit on a Tuesday? ___ |

E9: Commute/transit hours (Tue) | V7/cfg8

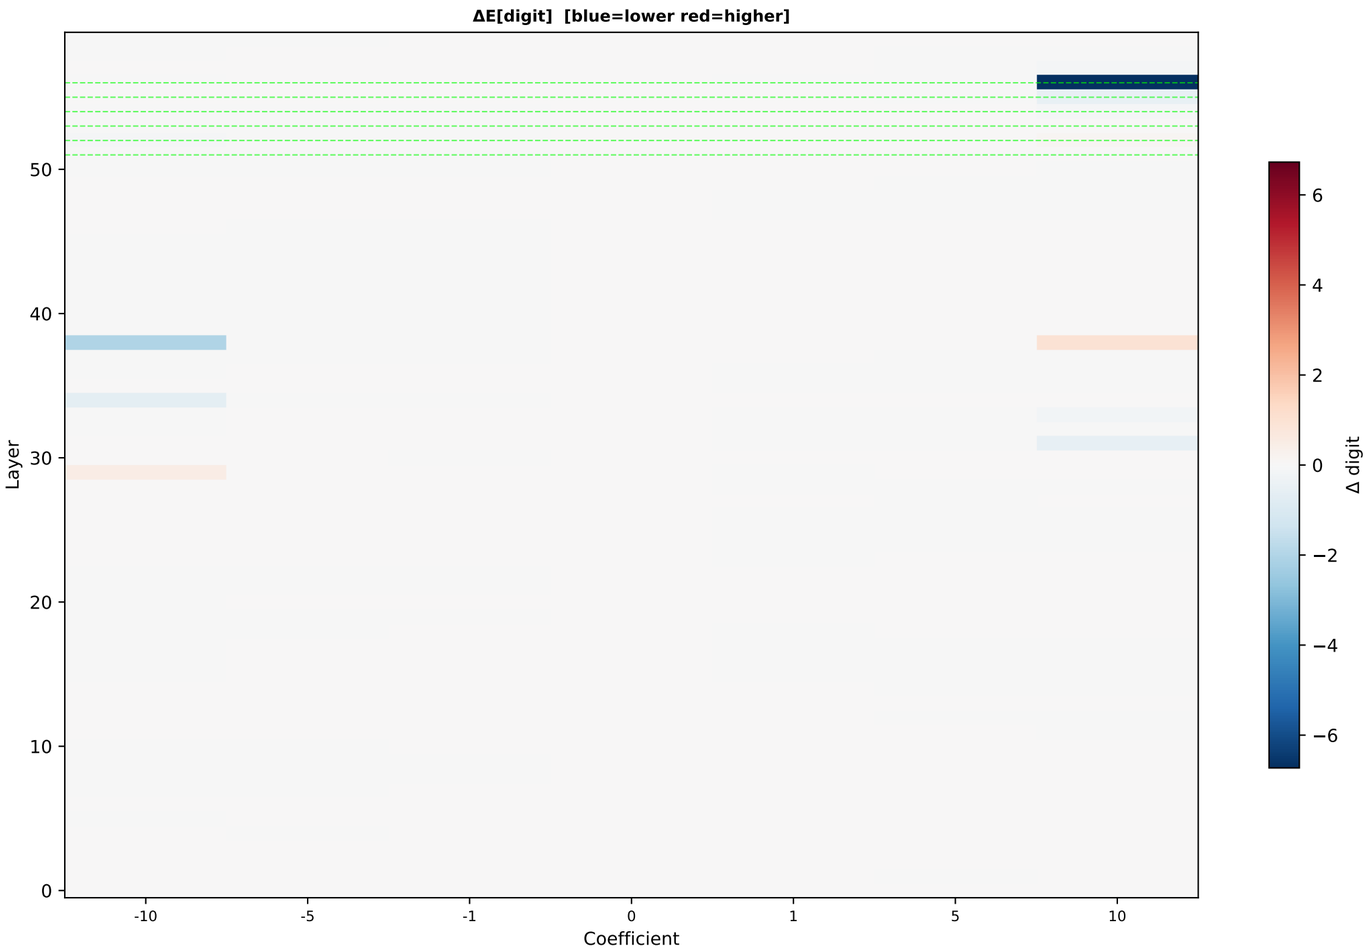


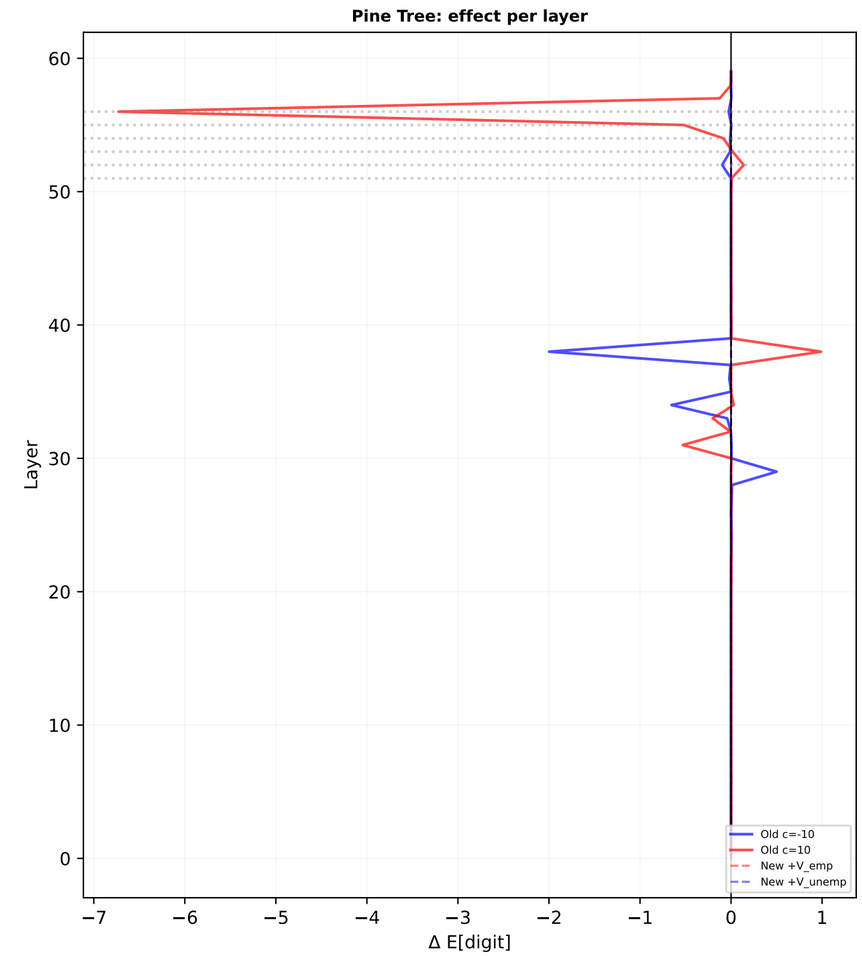


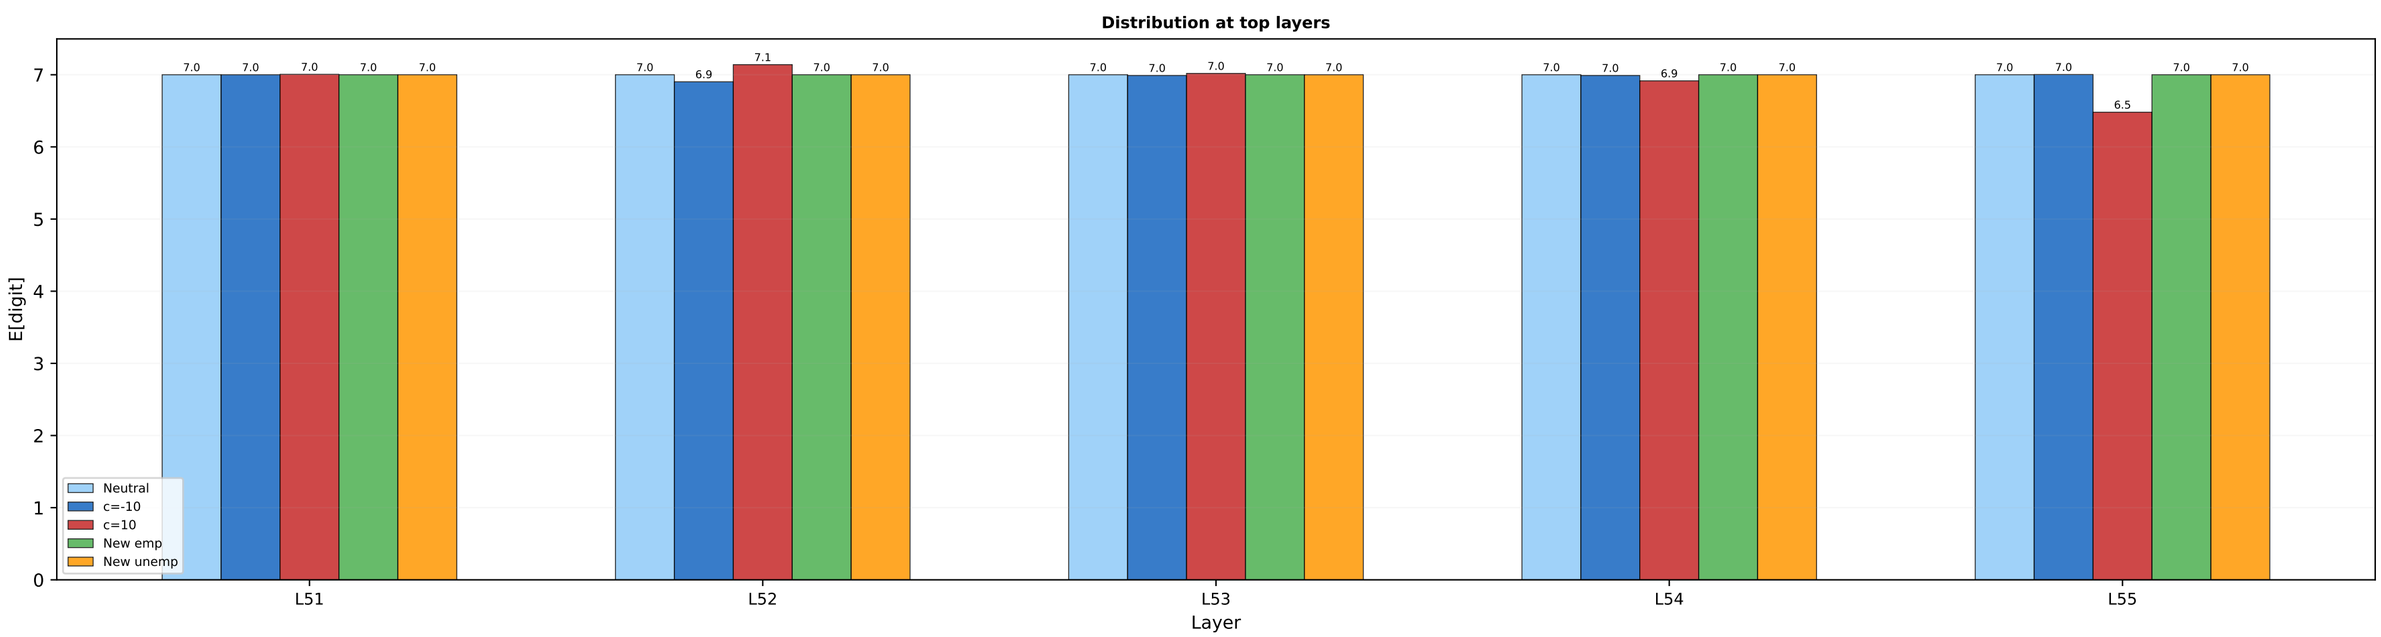


E10: Week-to-week consistency (Tue) | V7/cfg8

Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is a typical adult's Tuesday schedule from week to week? (0 = completely different, 9 = identical every week) ___ |

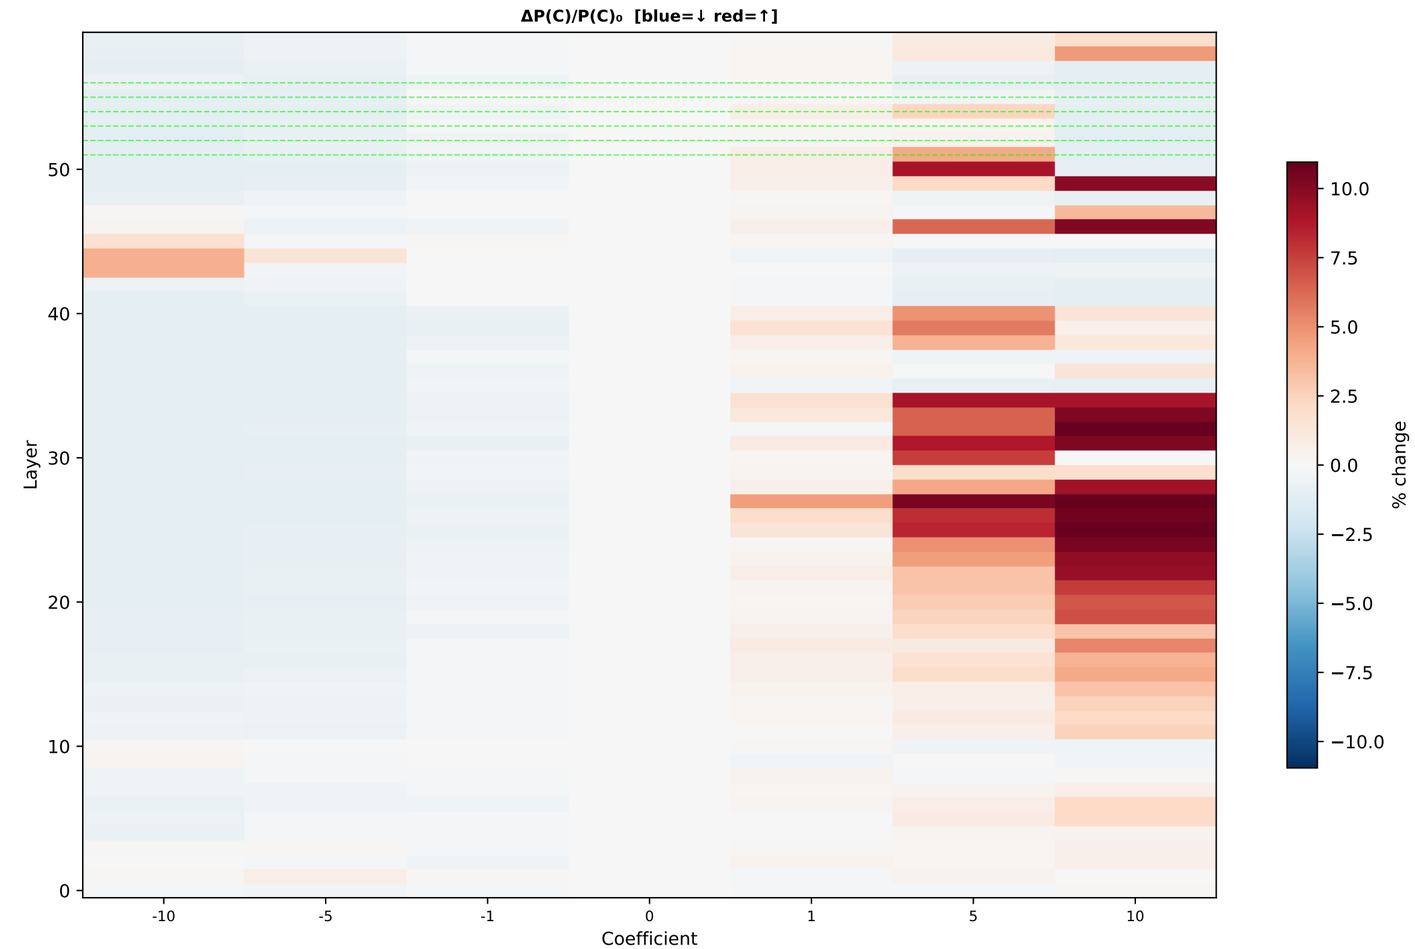


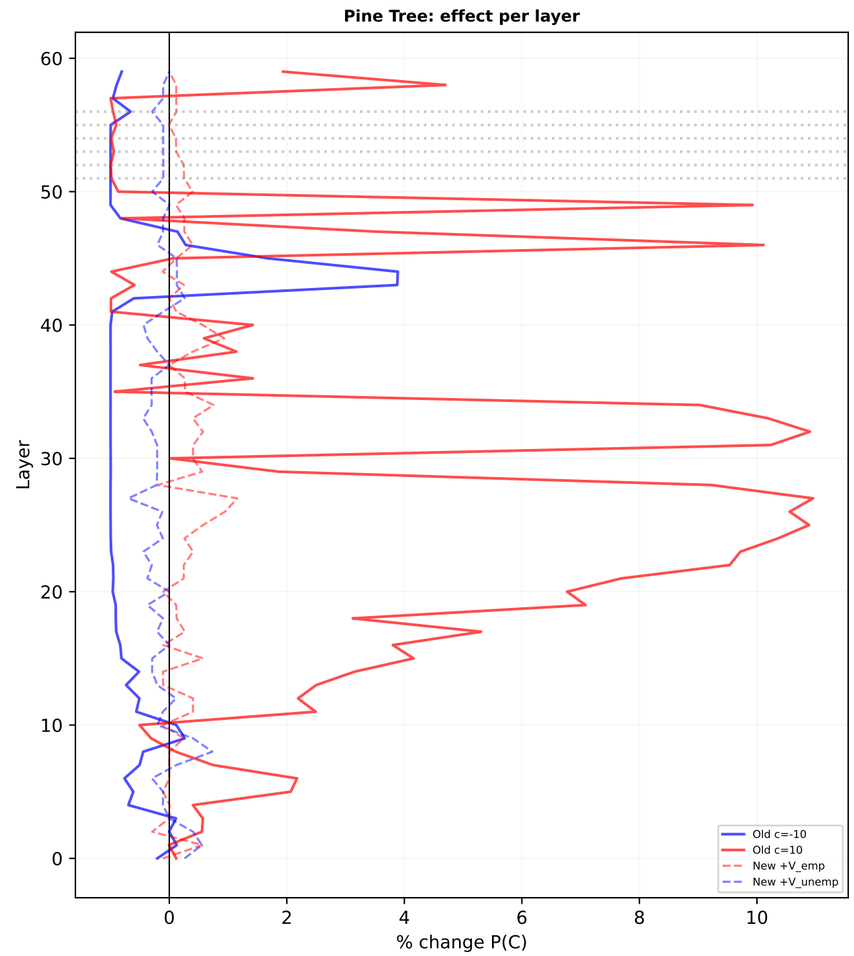


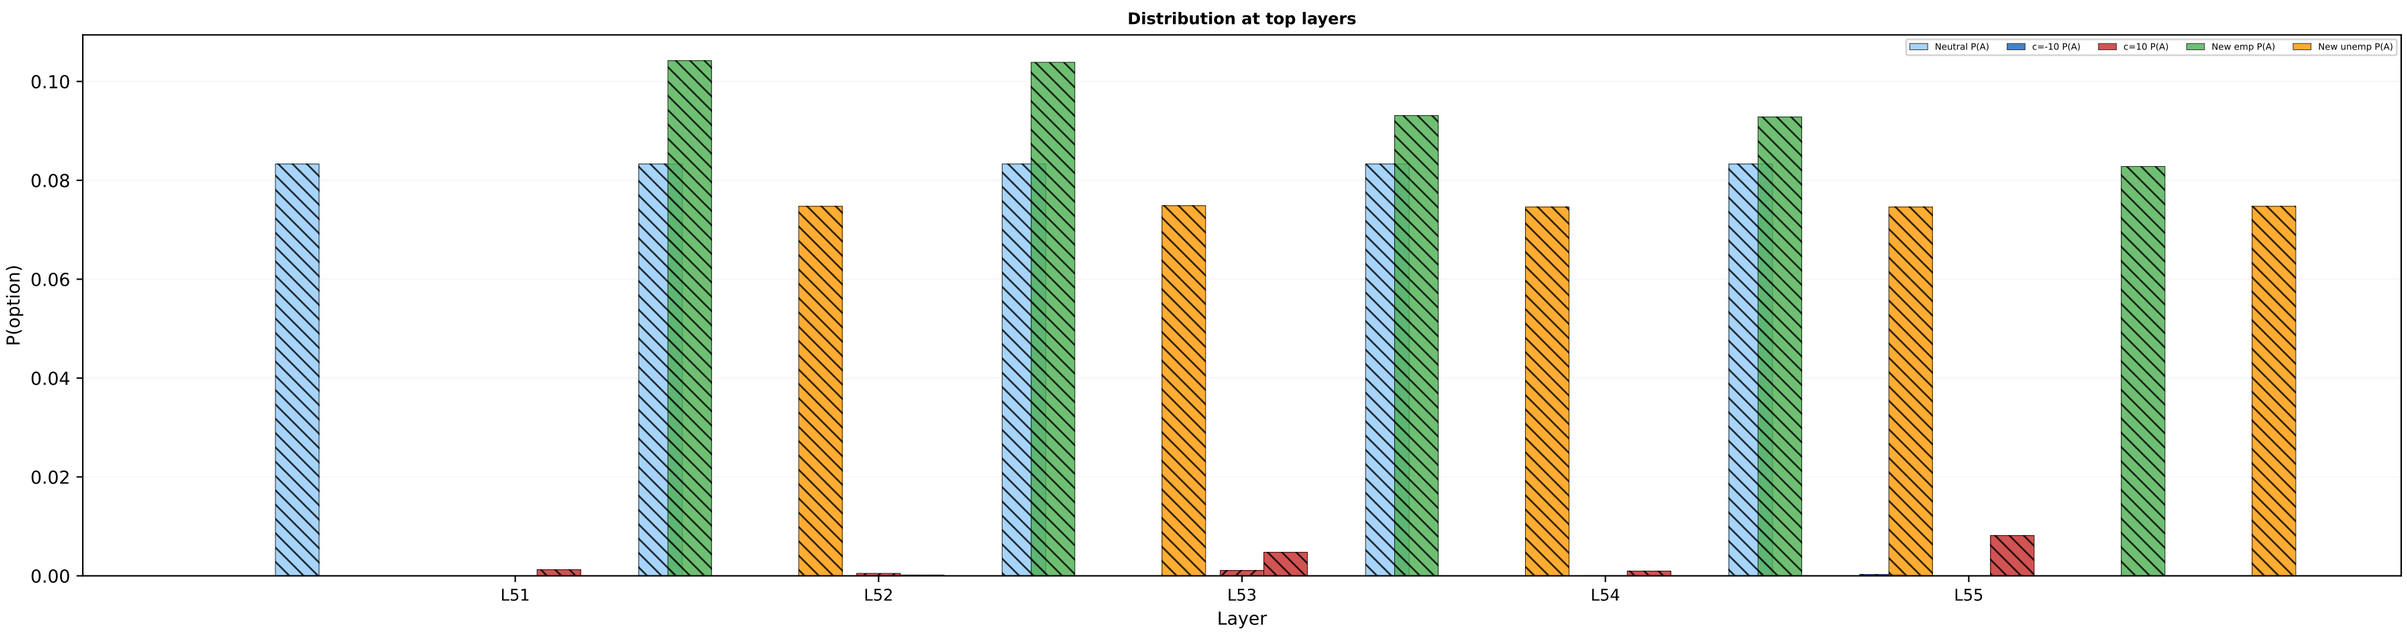


E11: 8 AM Tuesday status | V7/cfg8

```
At 8:00 AM on a Tuesday, a typical adult is most likely: | (A)
Still sleeping or just waking up | (B) Awake at home, starting
the day slowly | (C) Already out of the house or about to leave |
Answer: (
```

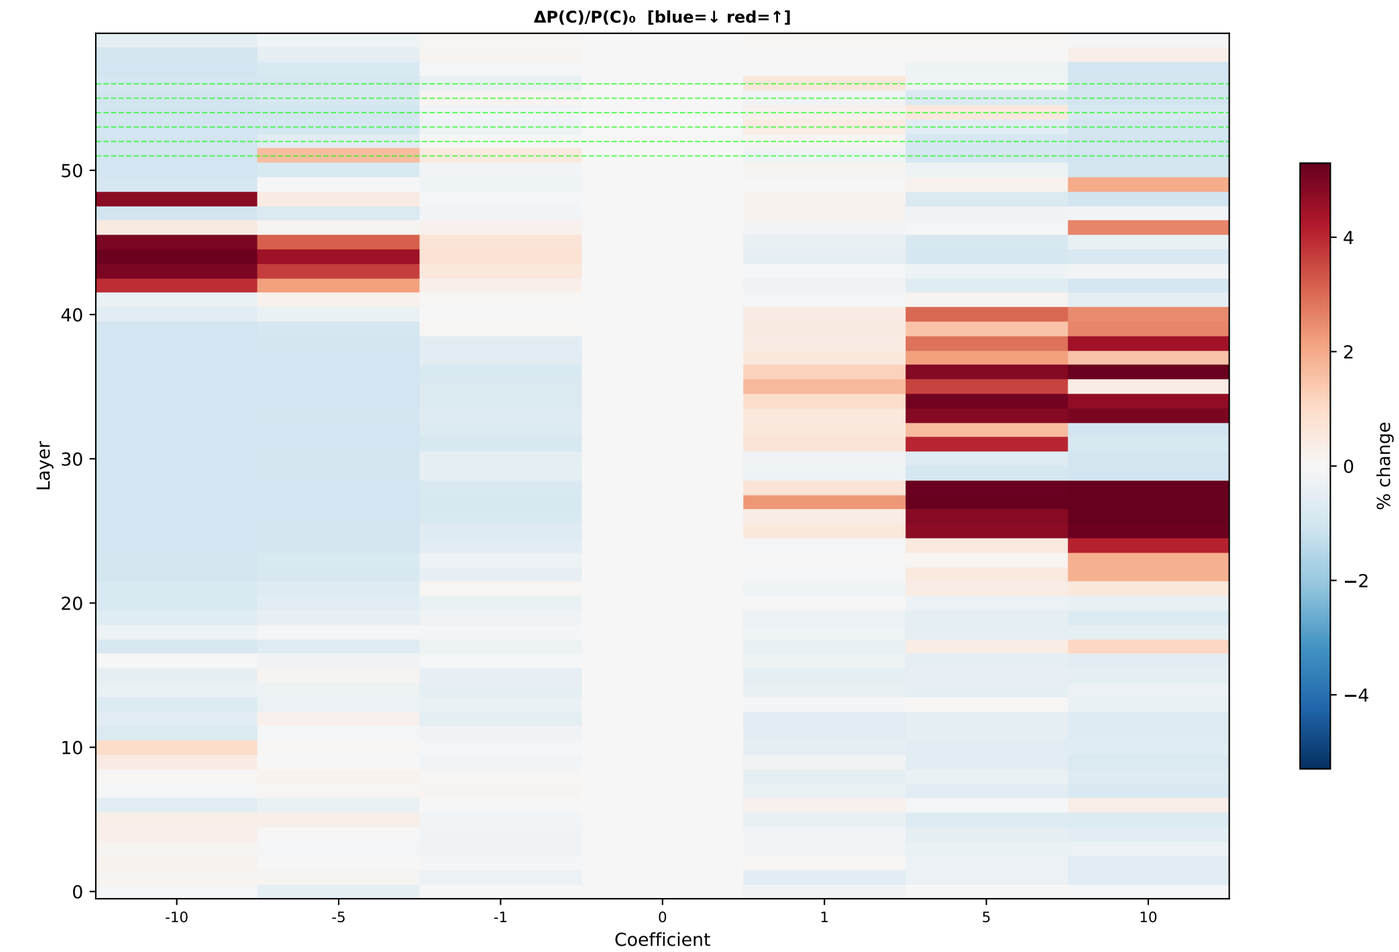


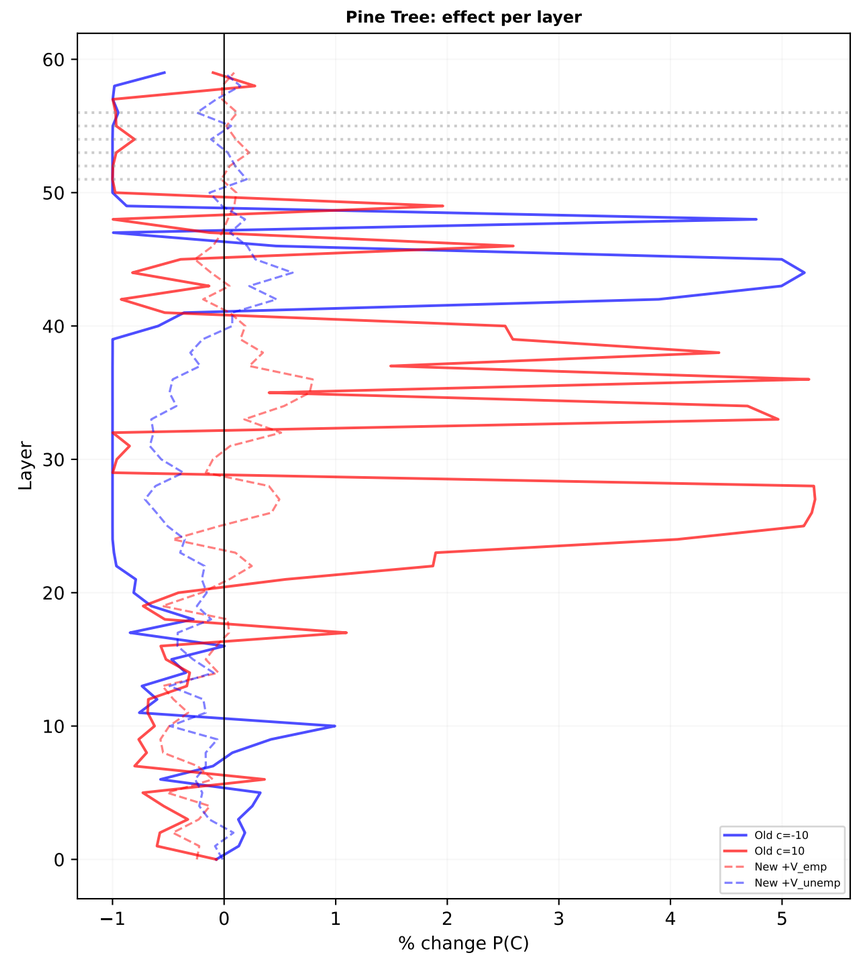


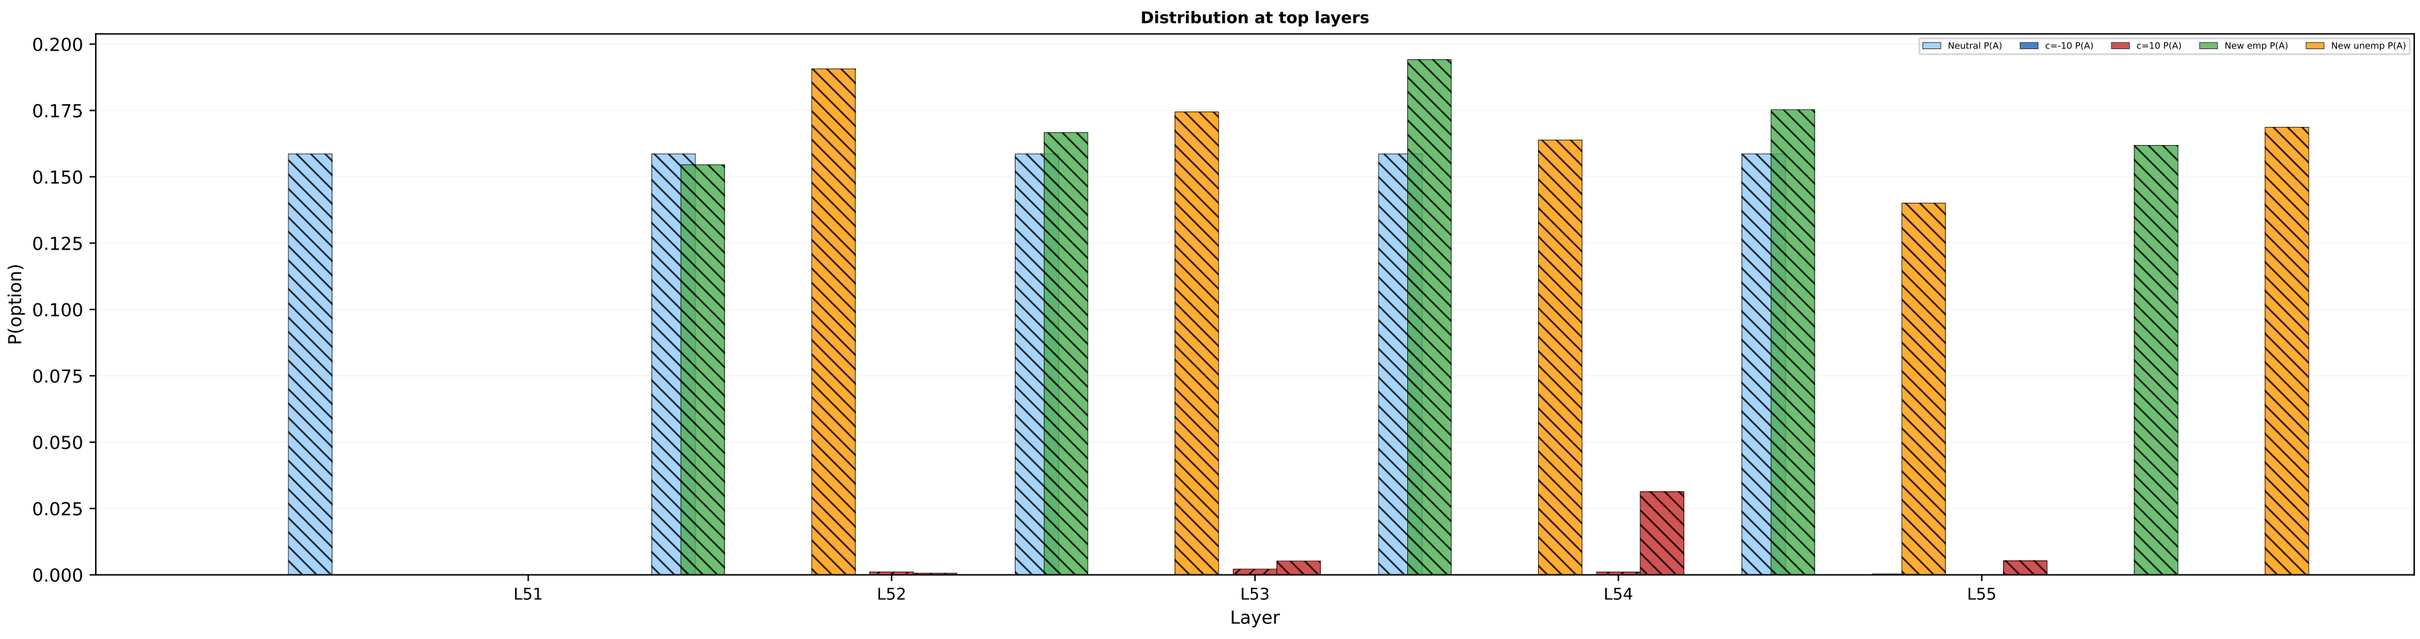


E12: 10:30 AM coffee availability | V7/cfg8

A typical adult is asked: "Are you usually free to meet for coffee at 10:30 AM on a Tuesday?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends on the week; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

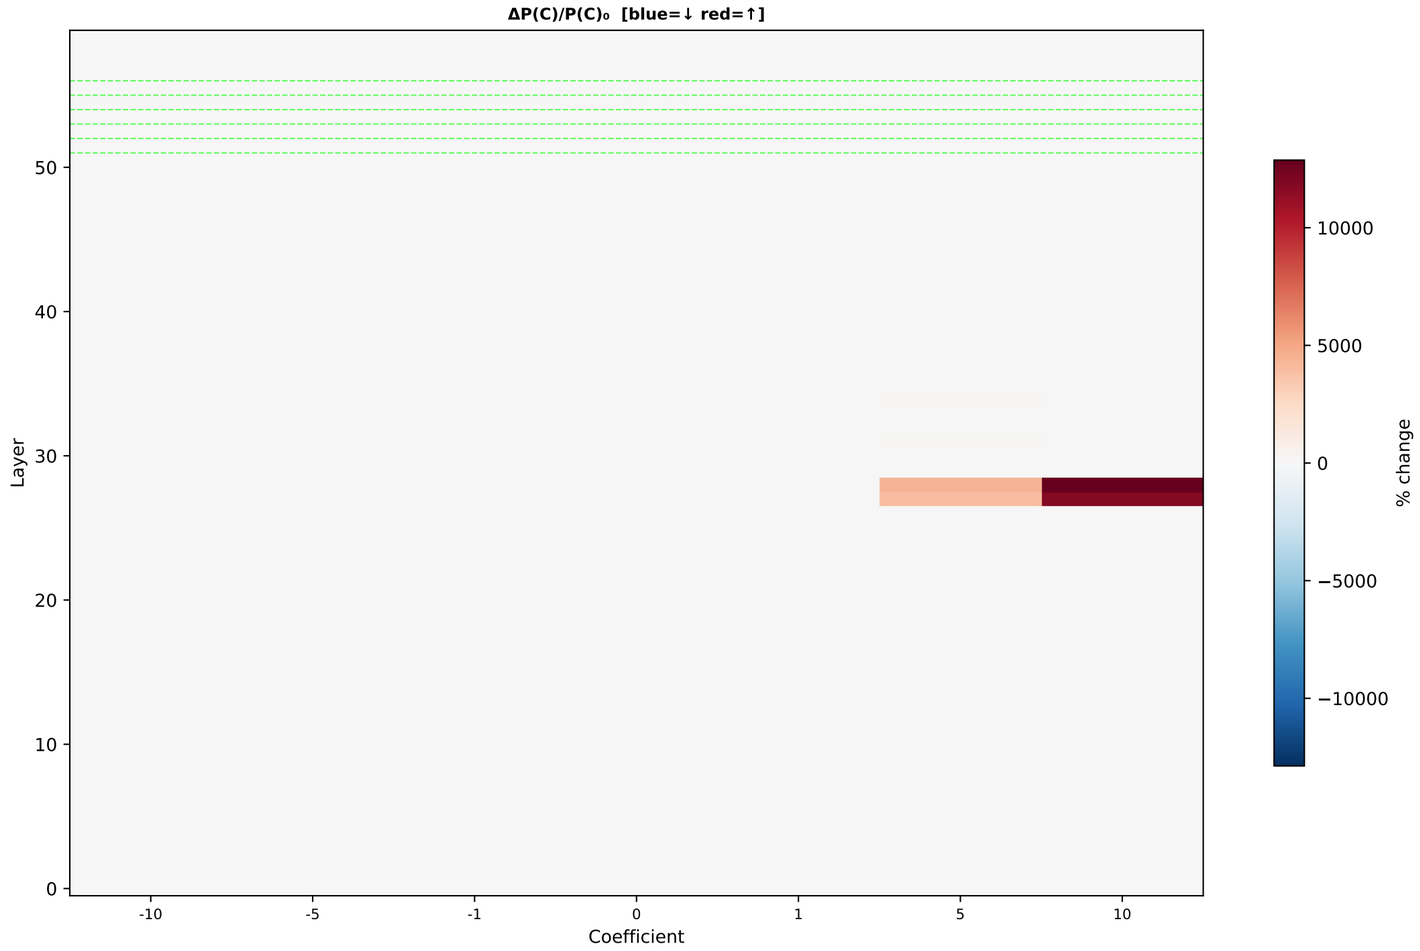


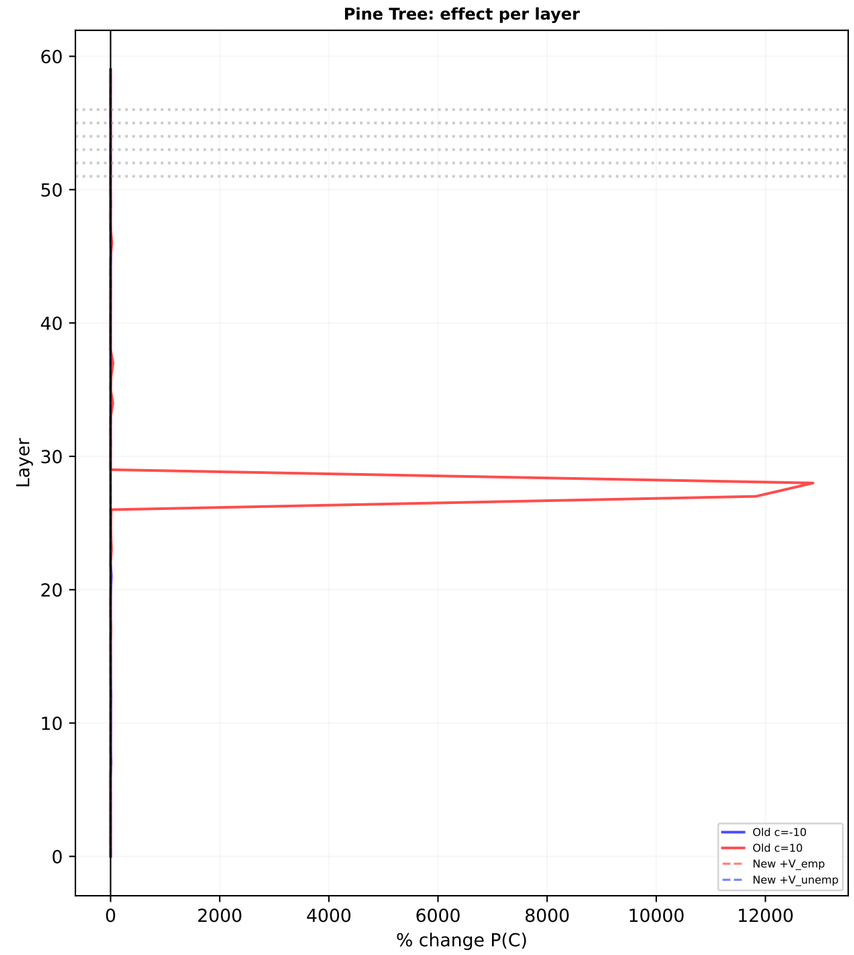


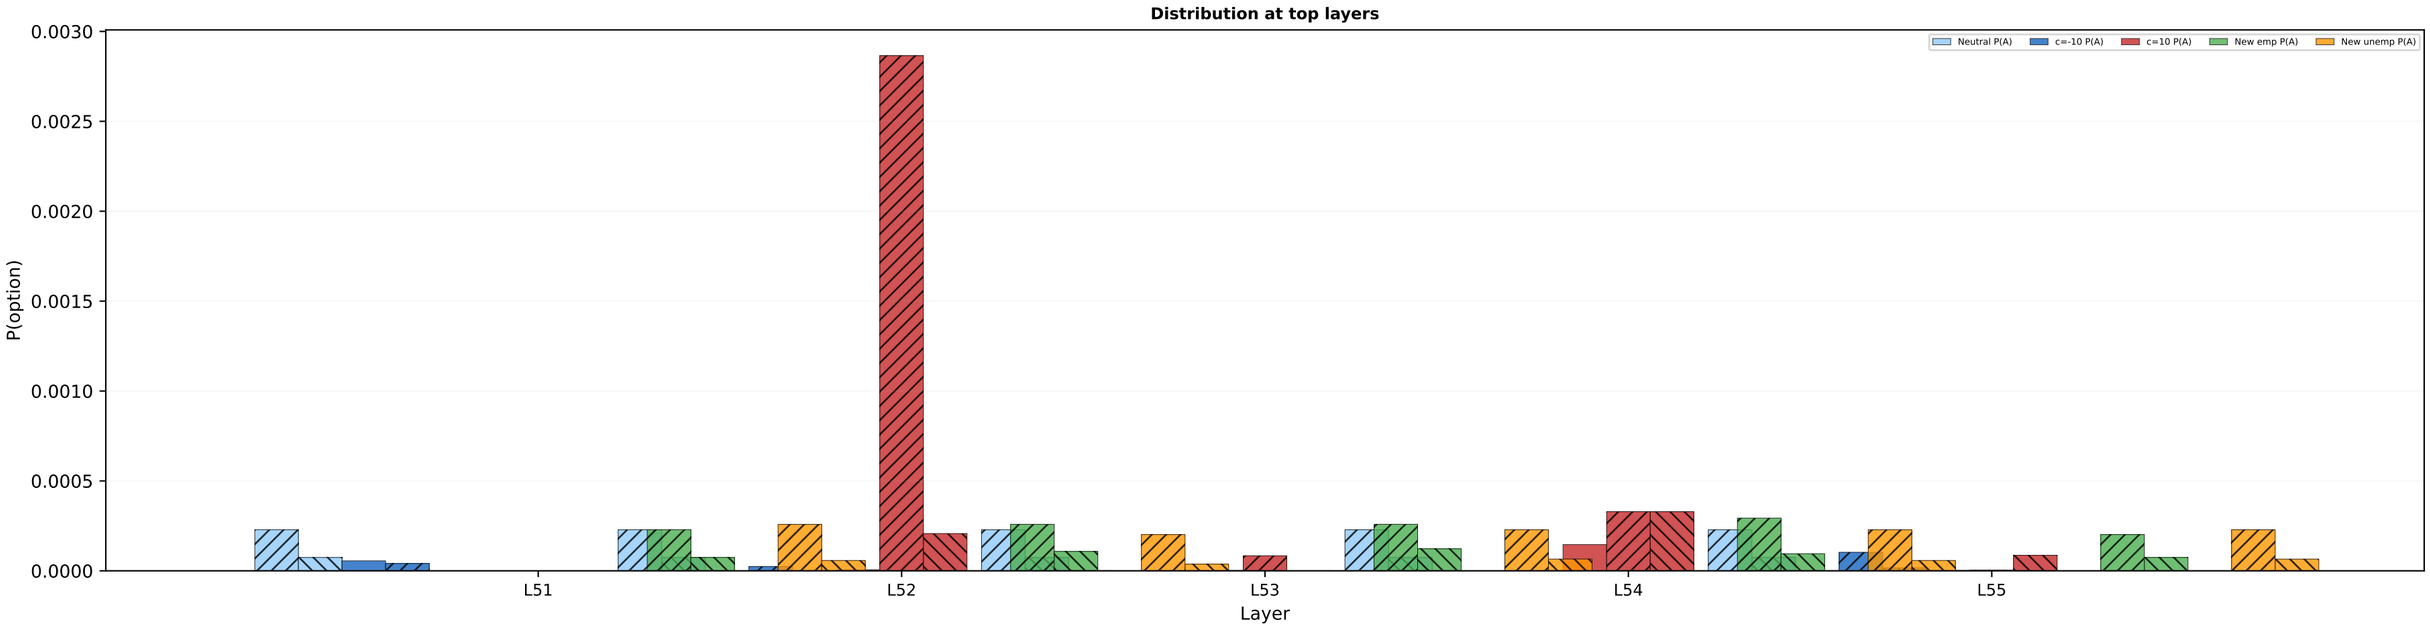


E13: Noon Tuesday availability | V7/cfg8

A typical adult is asked: "Can you meet me for lunch at noon on a Tuesday?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

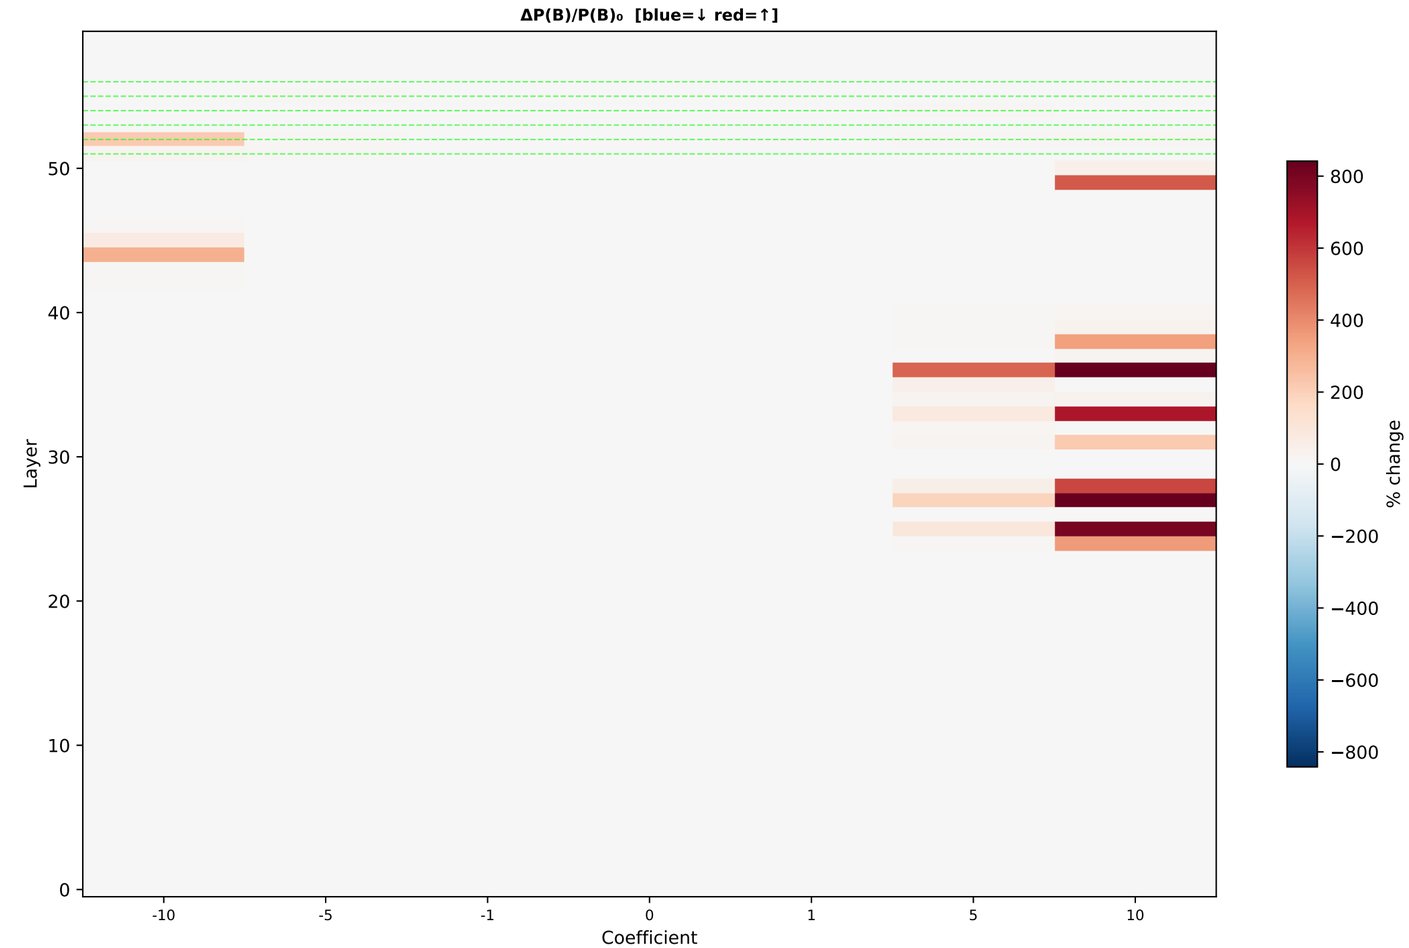


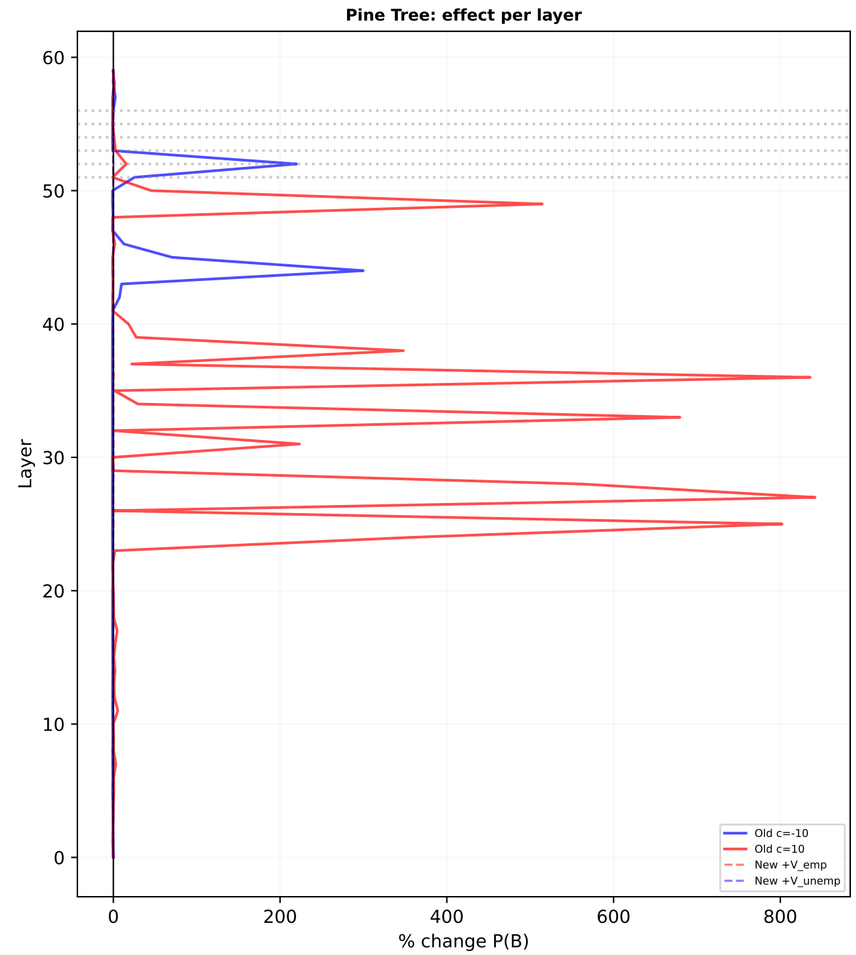


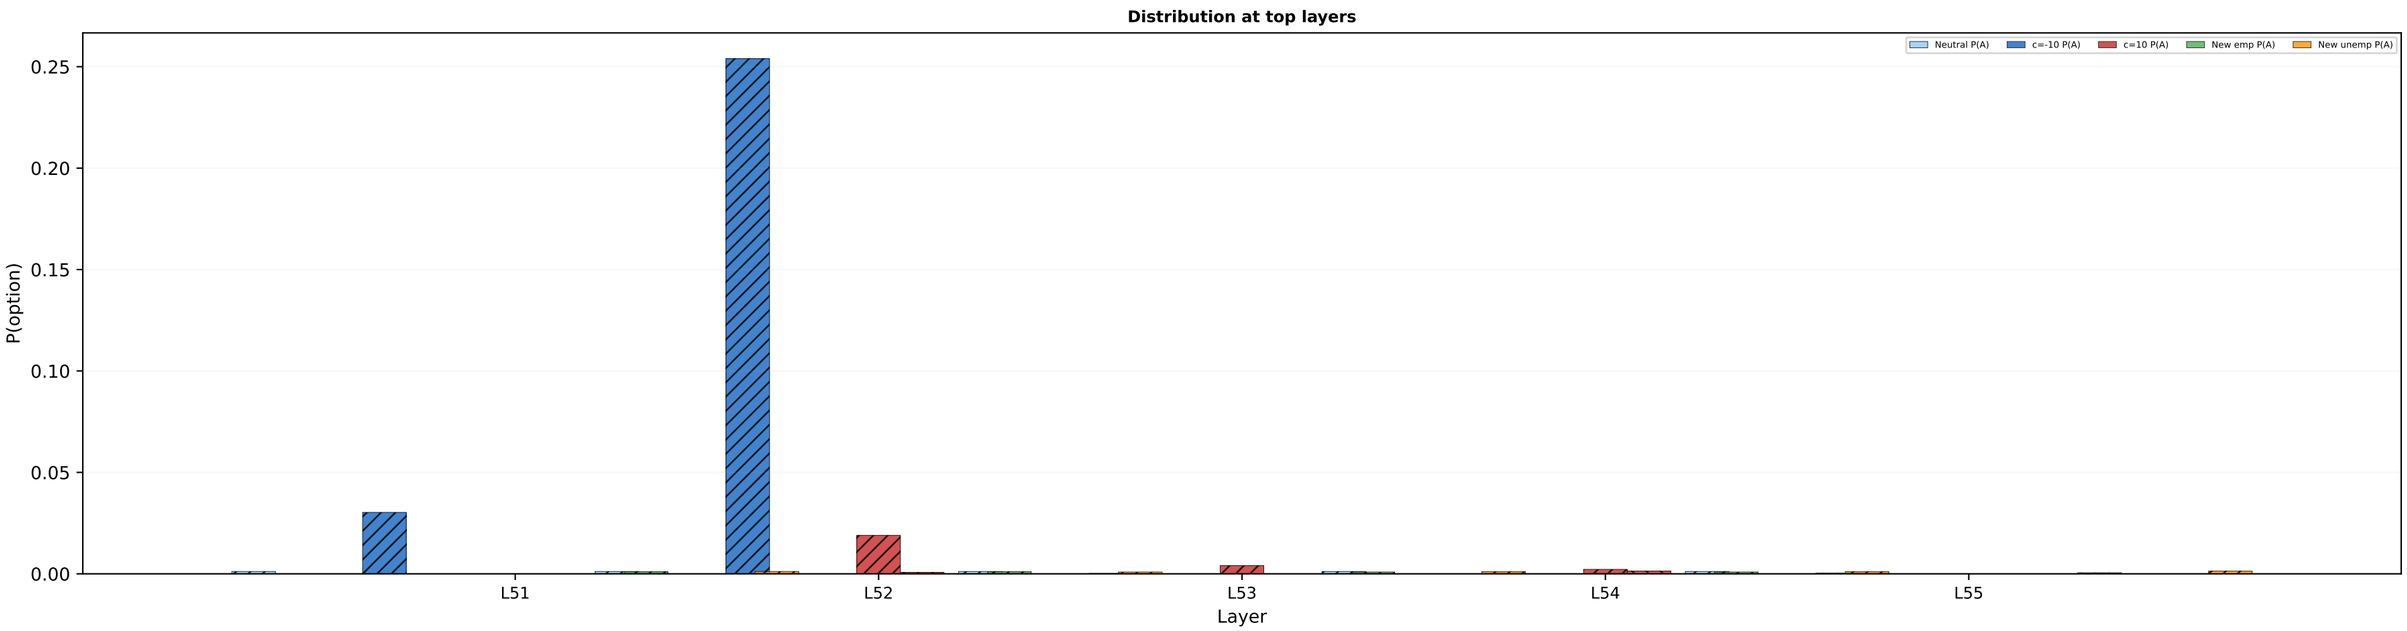


E14: 1 PM Tuesday availability | V7/cfg8

If you wanted to visit a typical adult at 1 PM on a Tuesday, which reply would be most likely? | (A) "I am usually at home around then." | (B) "I am usually at a regular daytime commitment then." | (C) "It varies; I might be in different places." | Answer: (

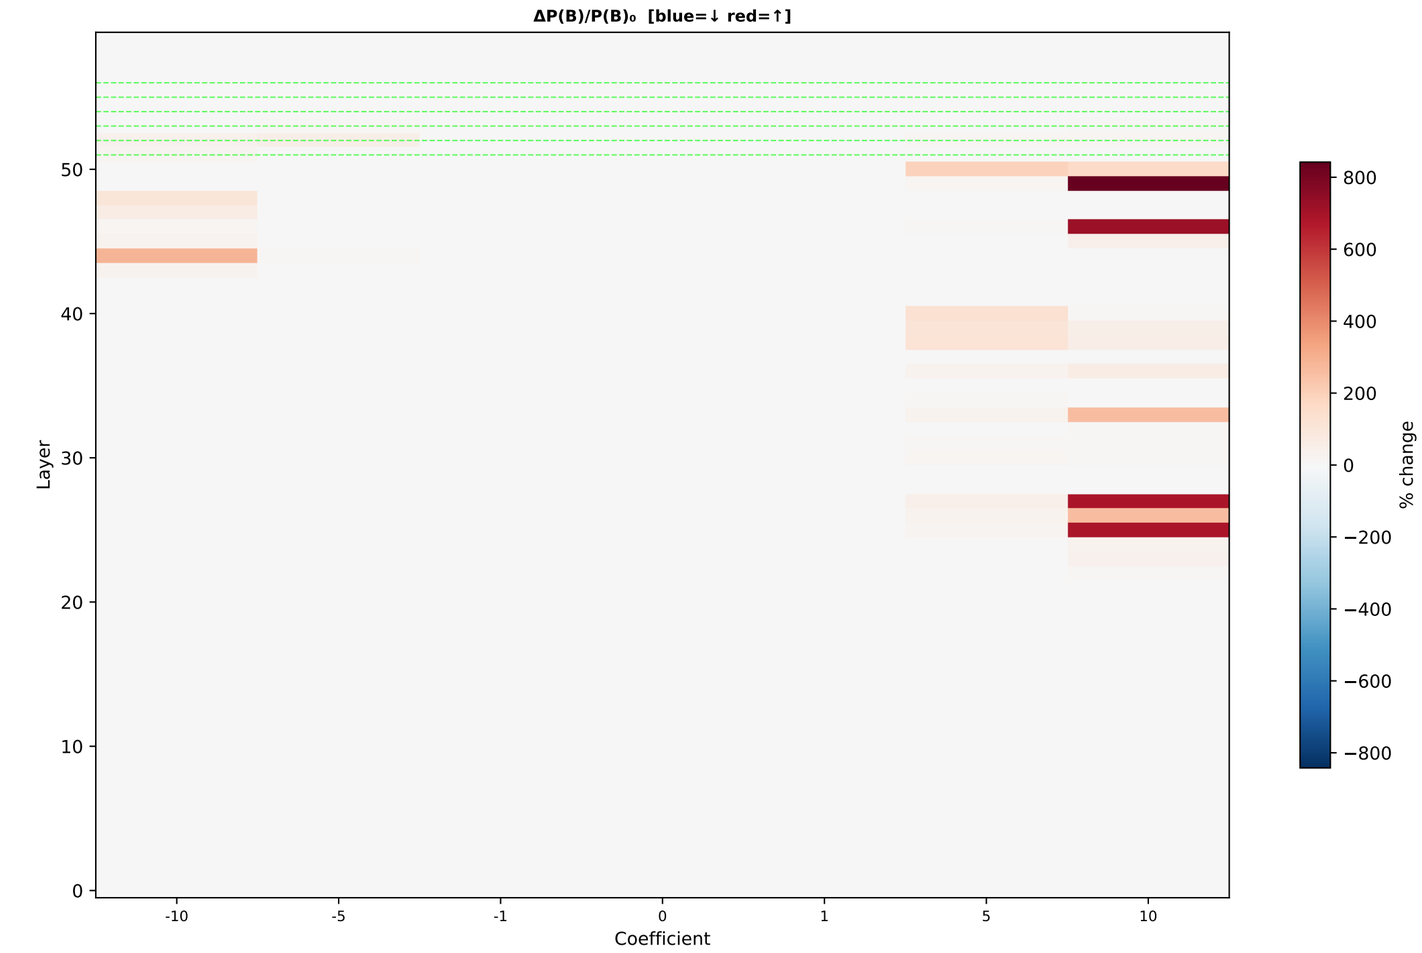


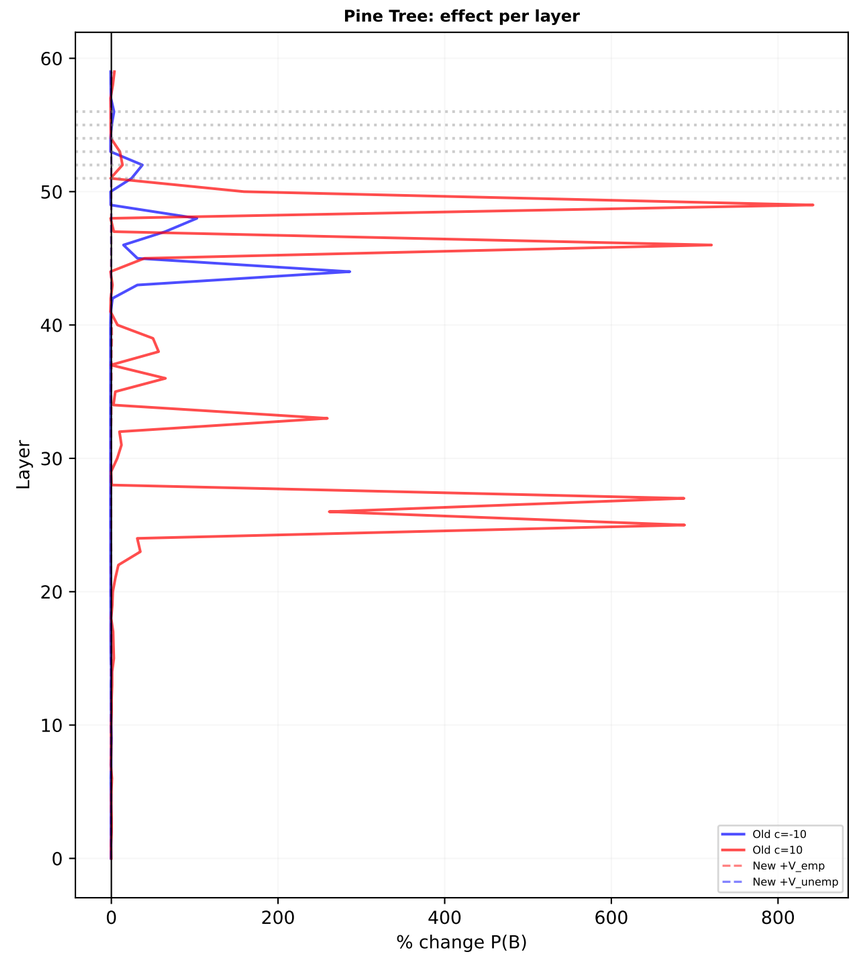


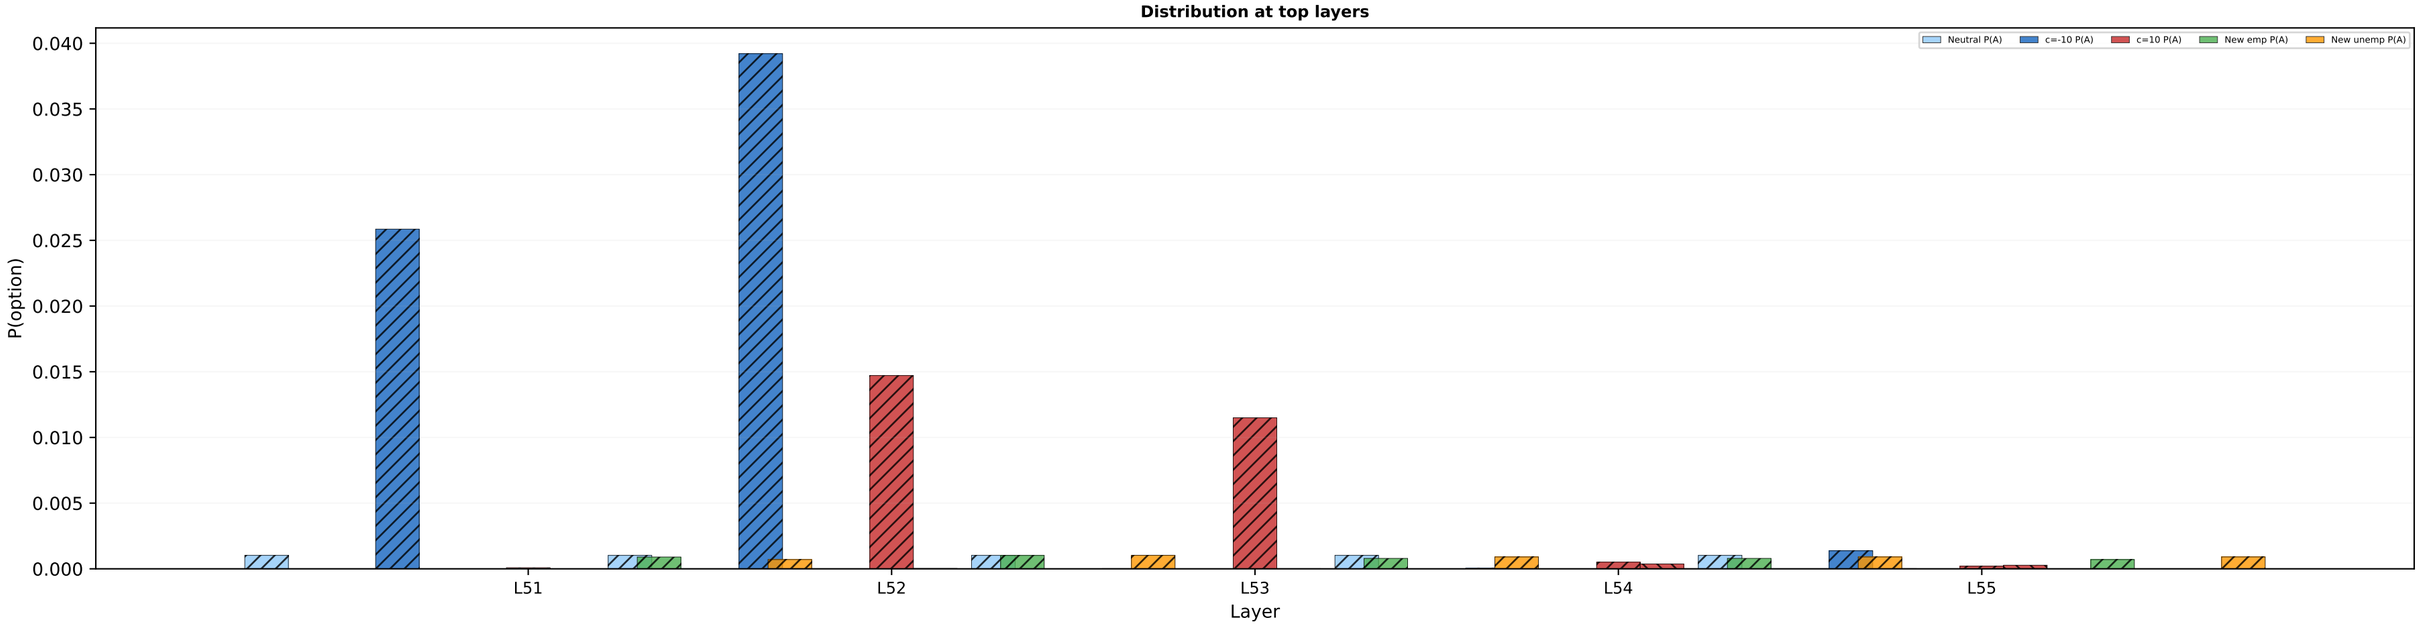


E15: 3 PM Tuesday location | V7/cfg8

At 3:00 PM on a Tuesday, a typical adult is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

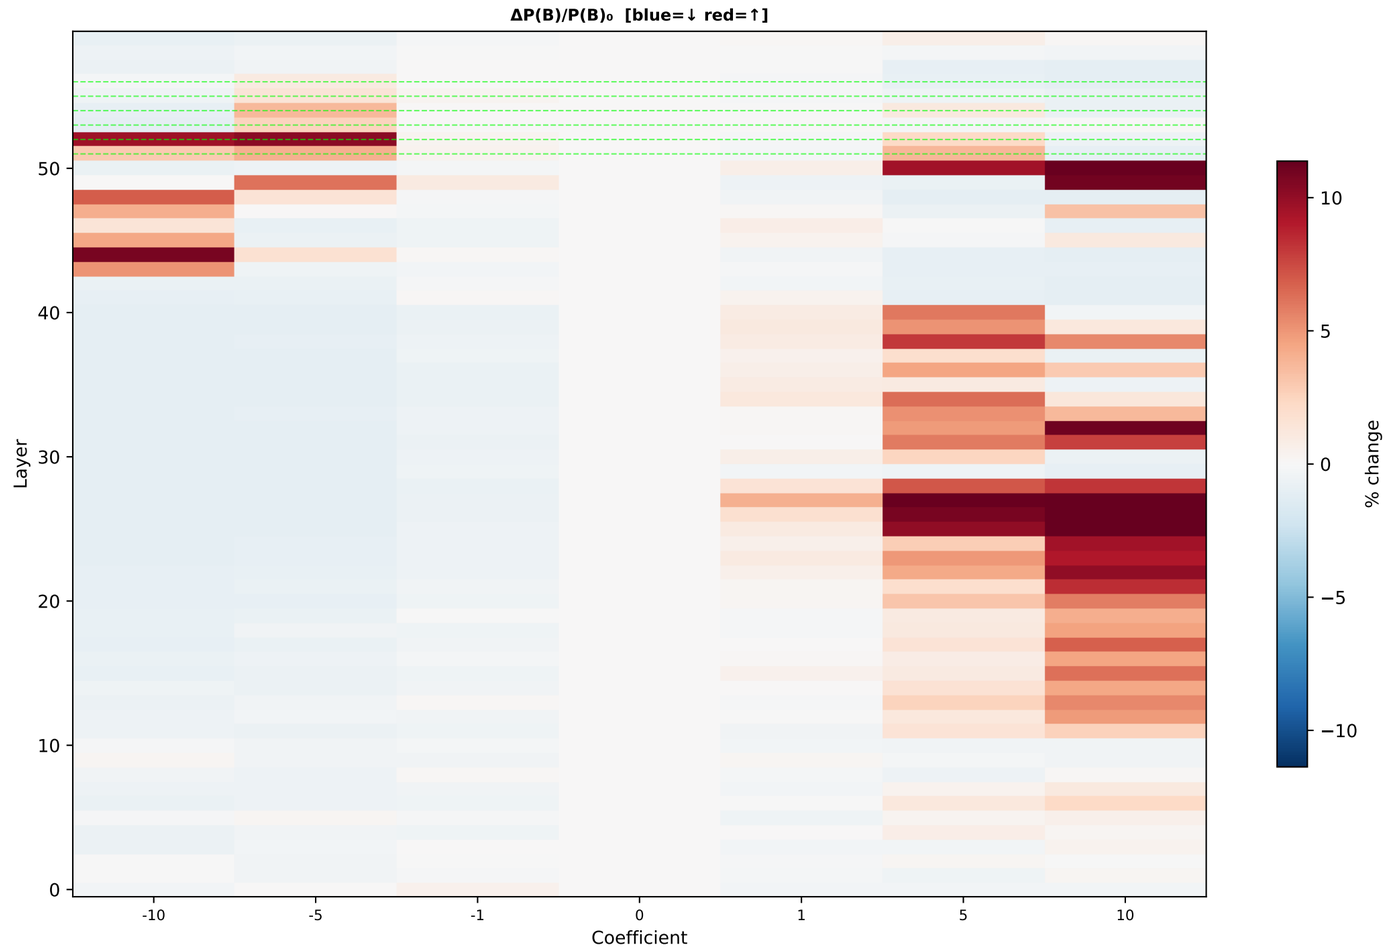


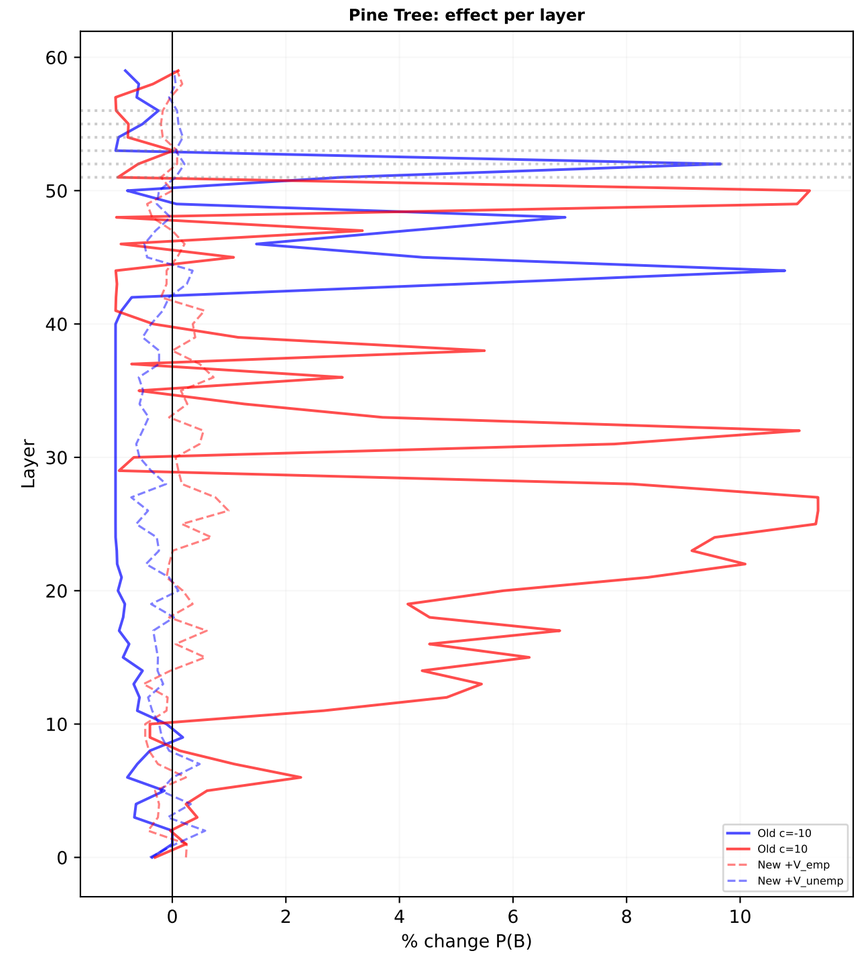


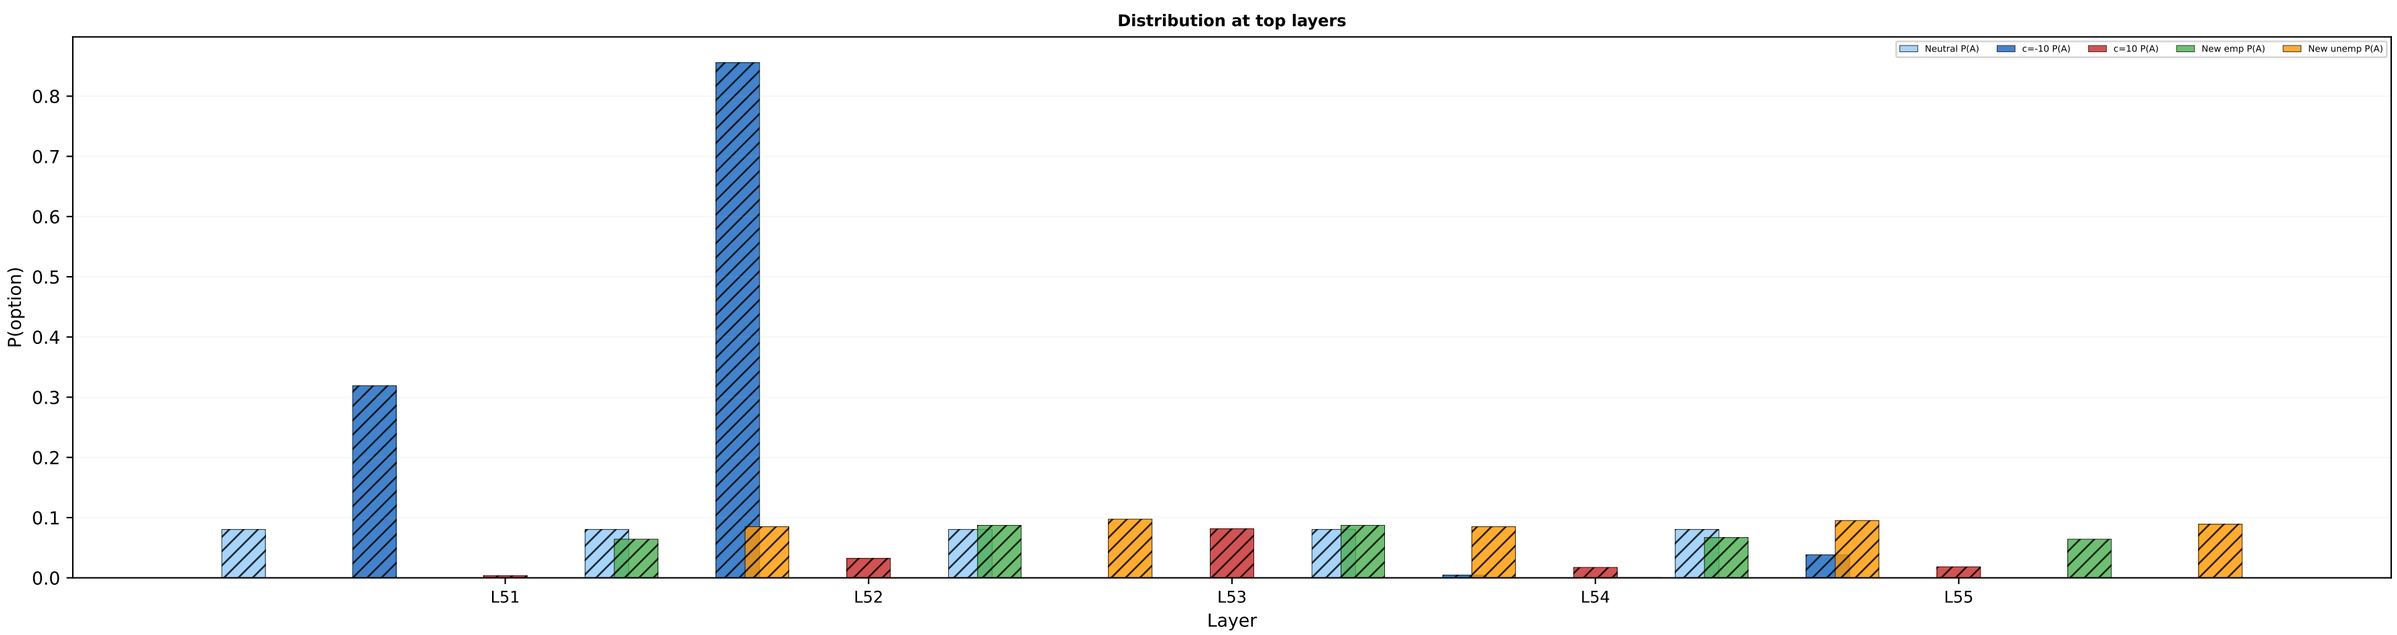


E16: 5 PM Tuesday status | V7/cfg8

At 5:00 PM on a Tuesday, a typical adult is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

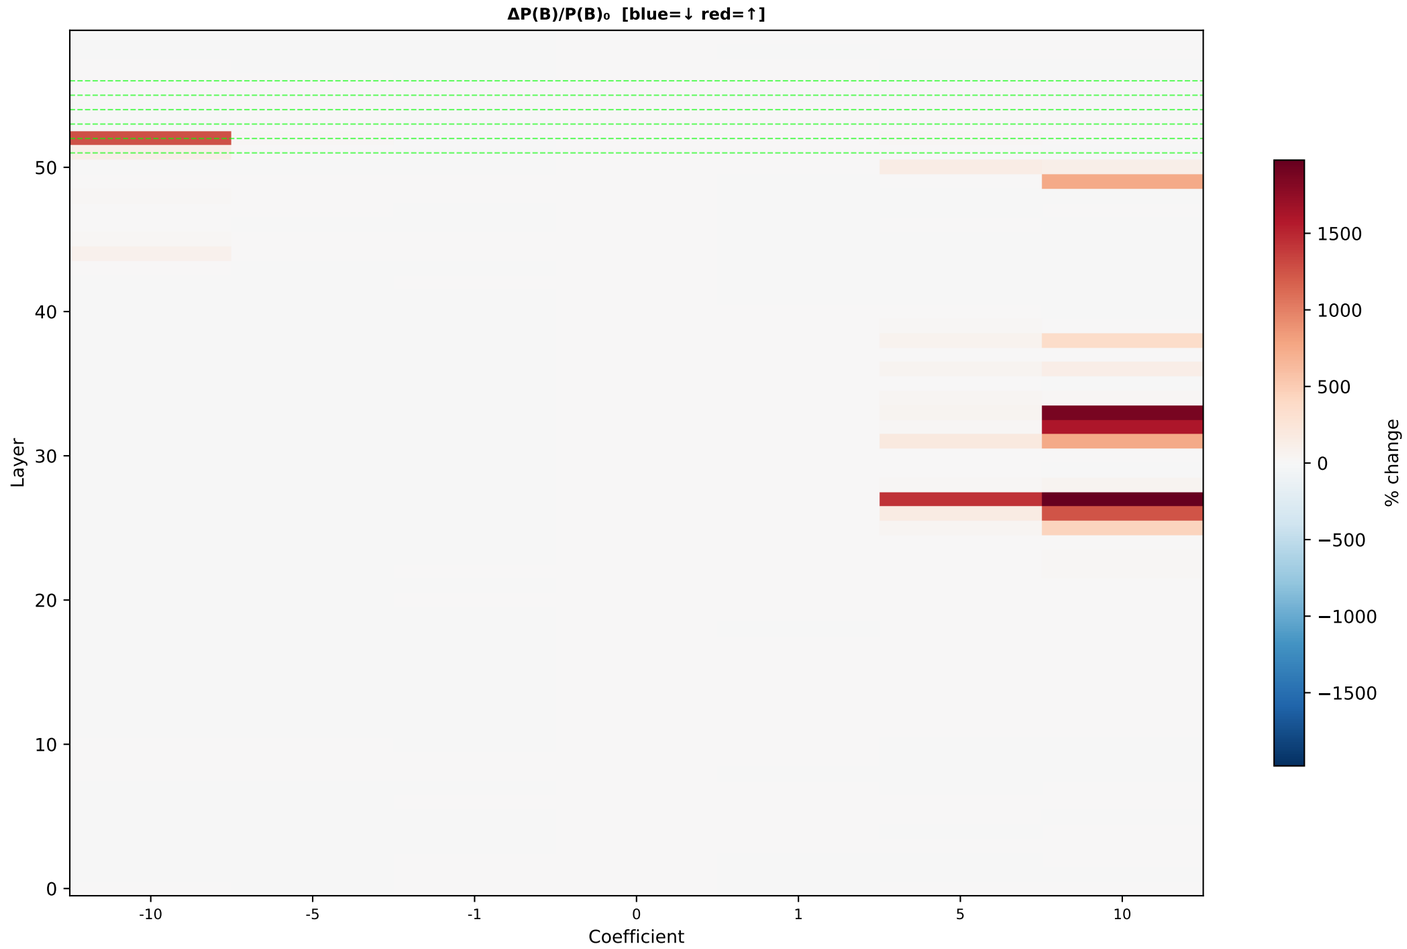


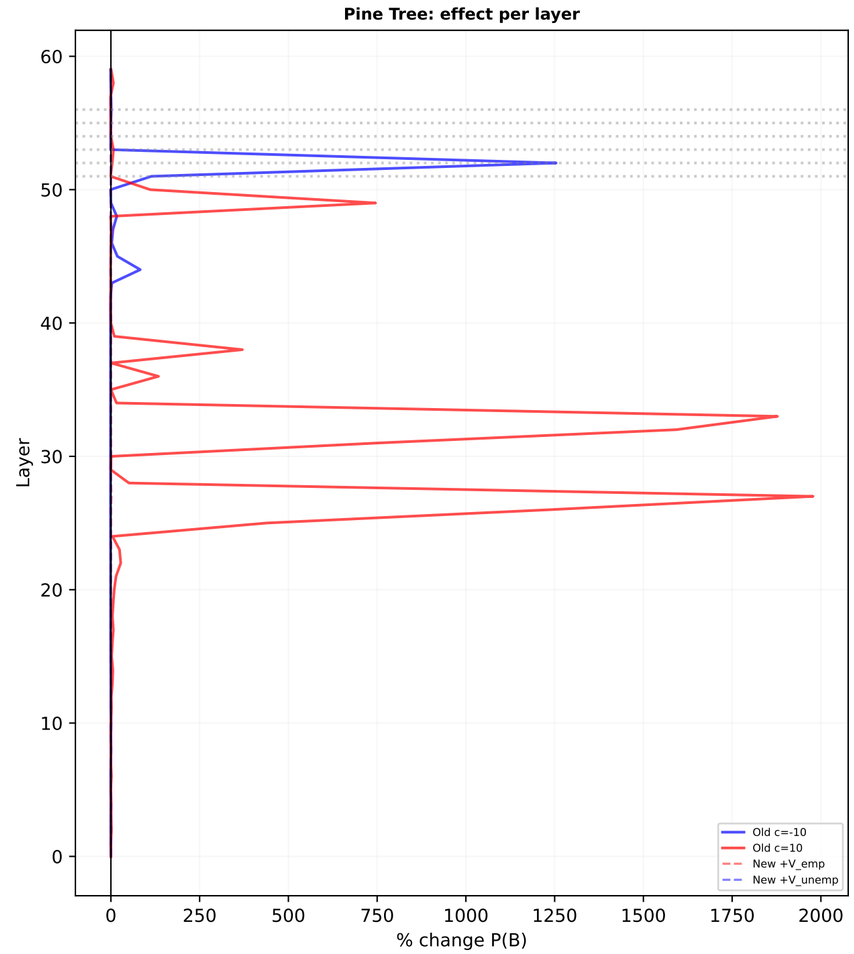


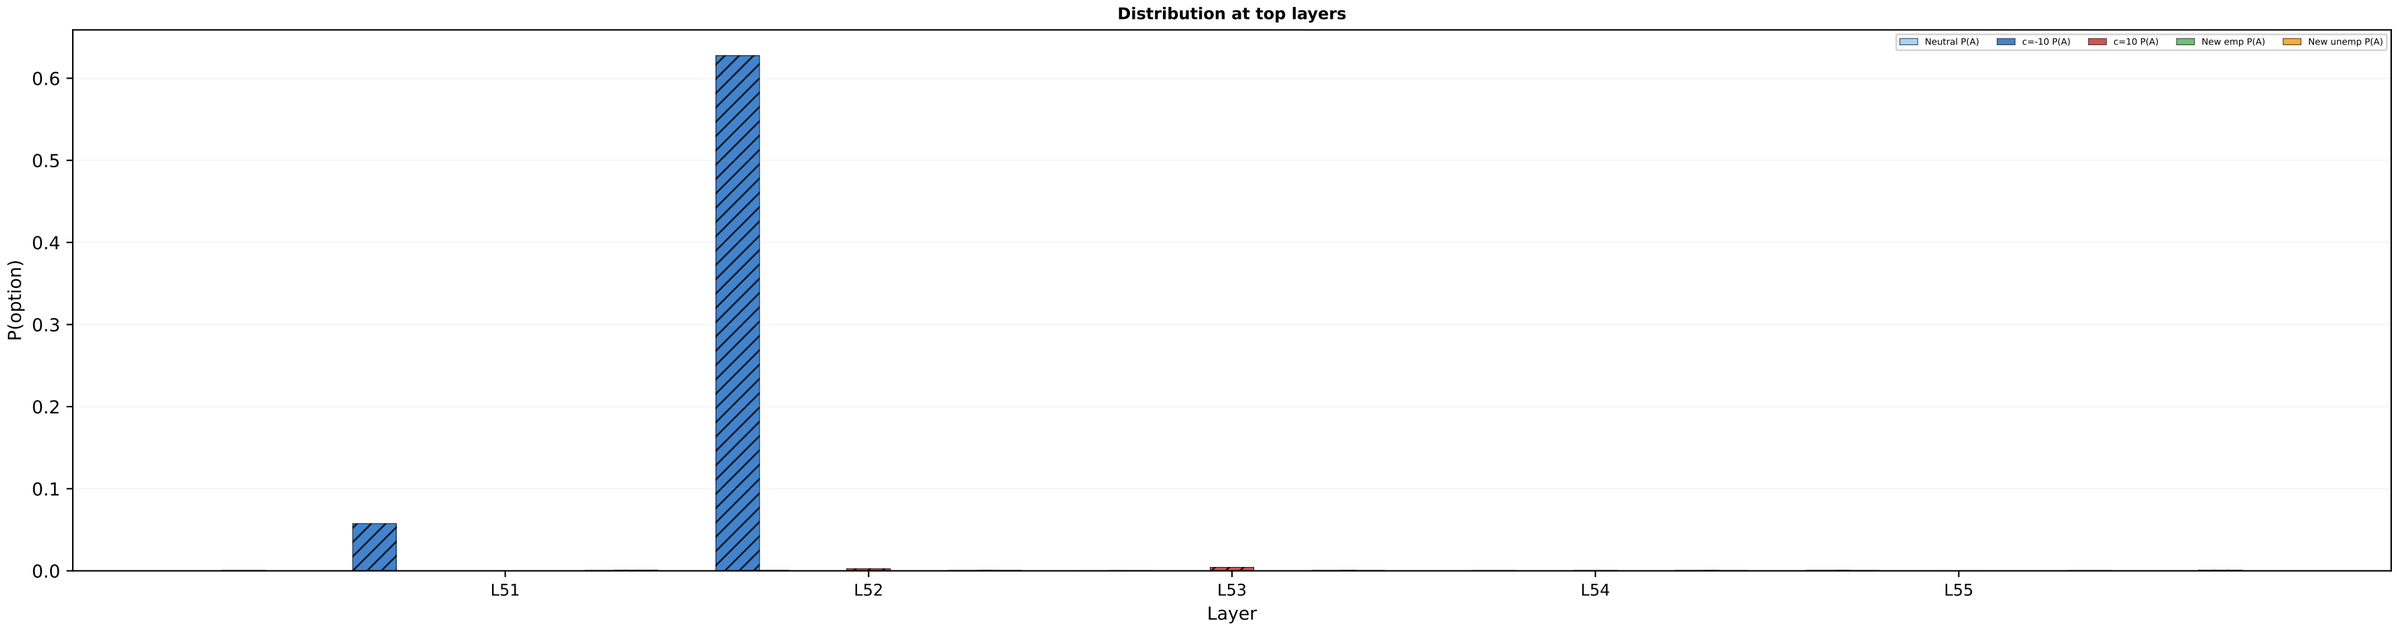


E17: 7 PM Tuesday status | V7/cfg8

At 7:00 PM on a Tuesday, a typical adult is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (







E18: Alarm clock habit (Tue) | V7/cfg8

Does a typical adult use an alarm clock on Tuesday mornings? | (A) No, they wake up naturally whenever they feel like it | (B) Sometimes, depending on whether they have plans | (C) Yes, they set an alarm at the same time every Tuesday | Answer: (

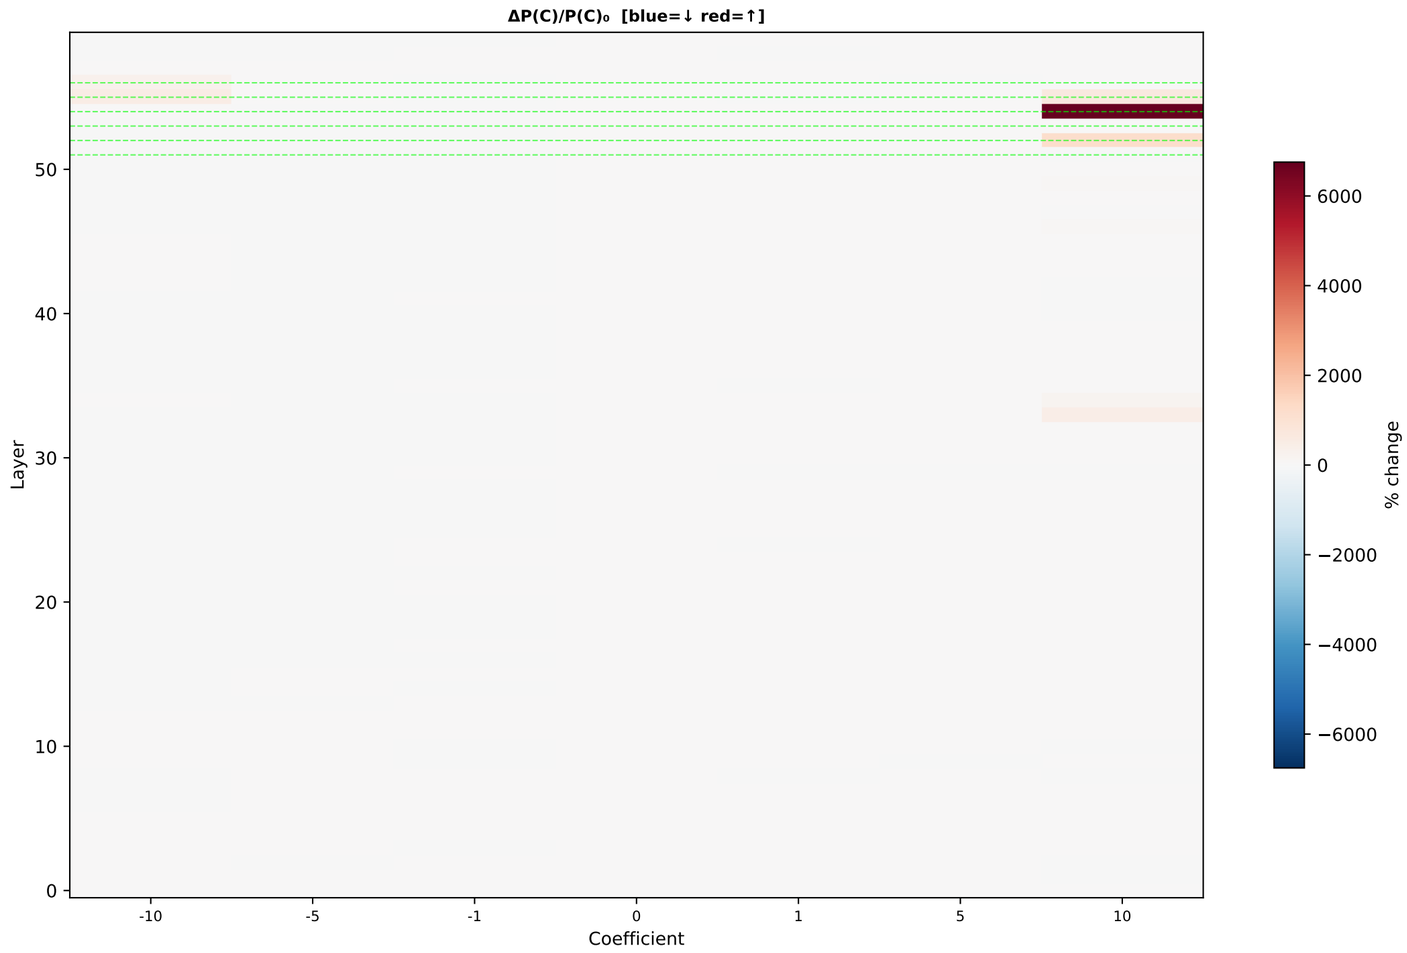
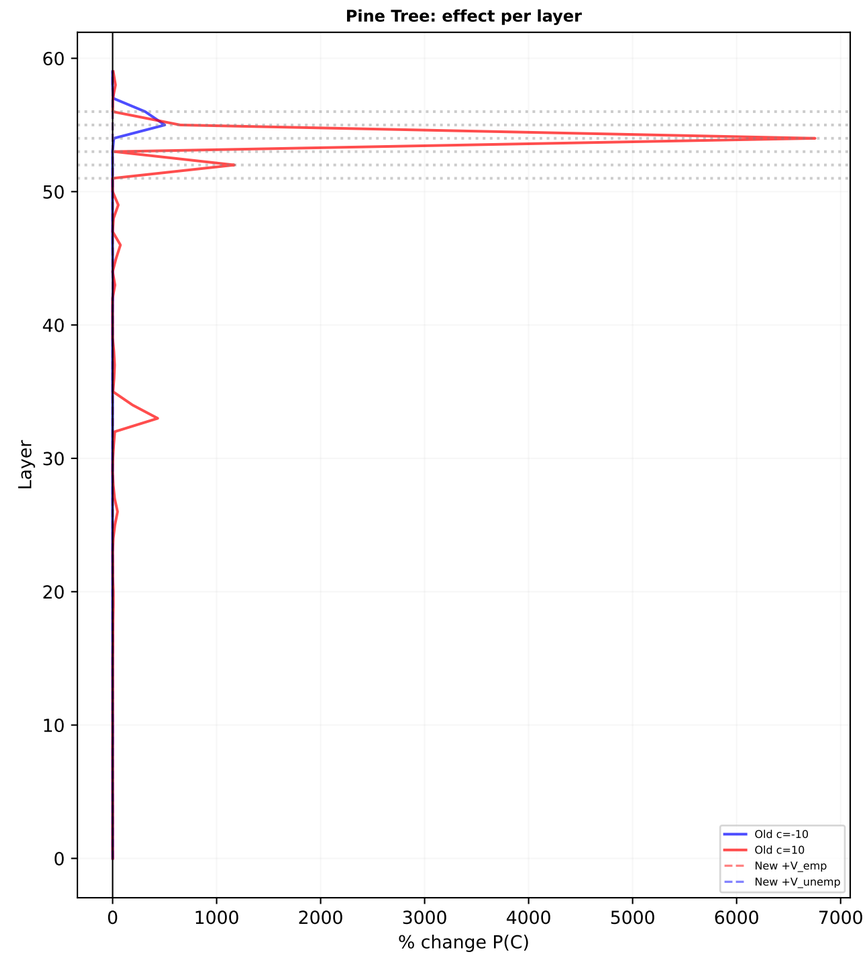
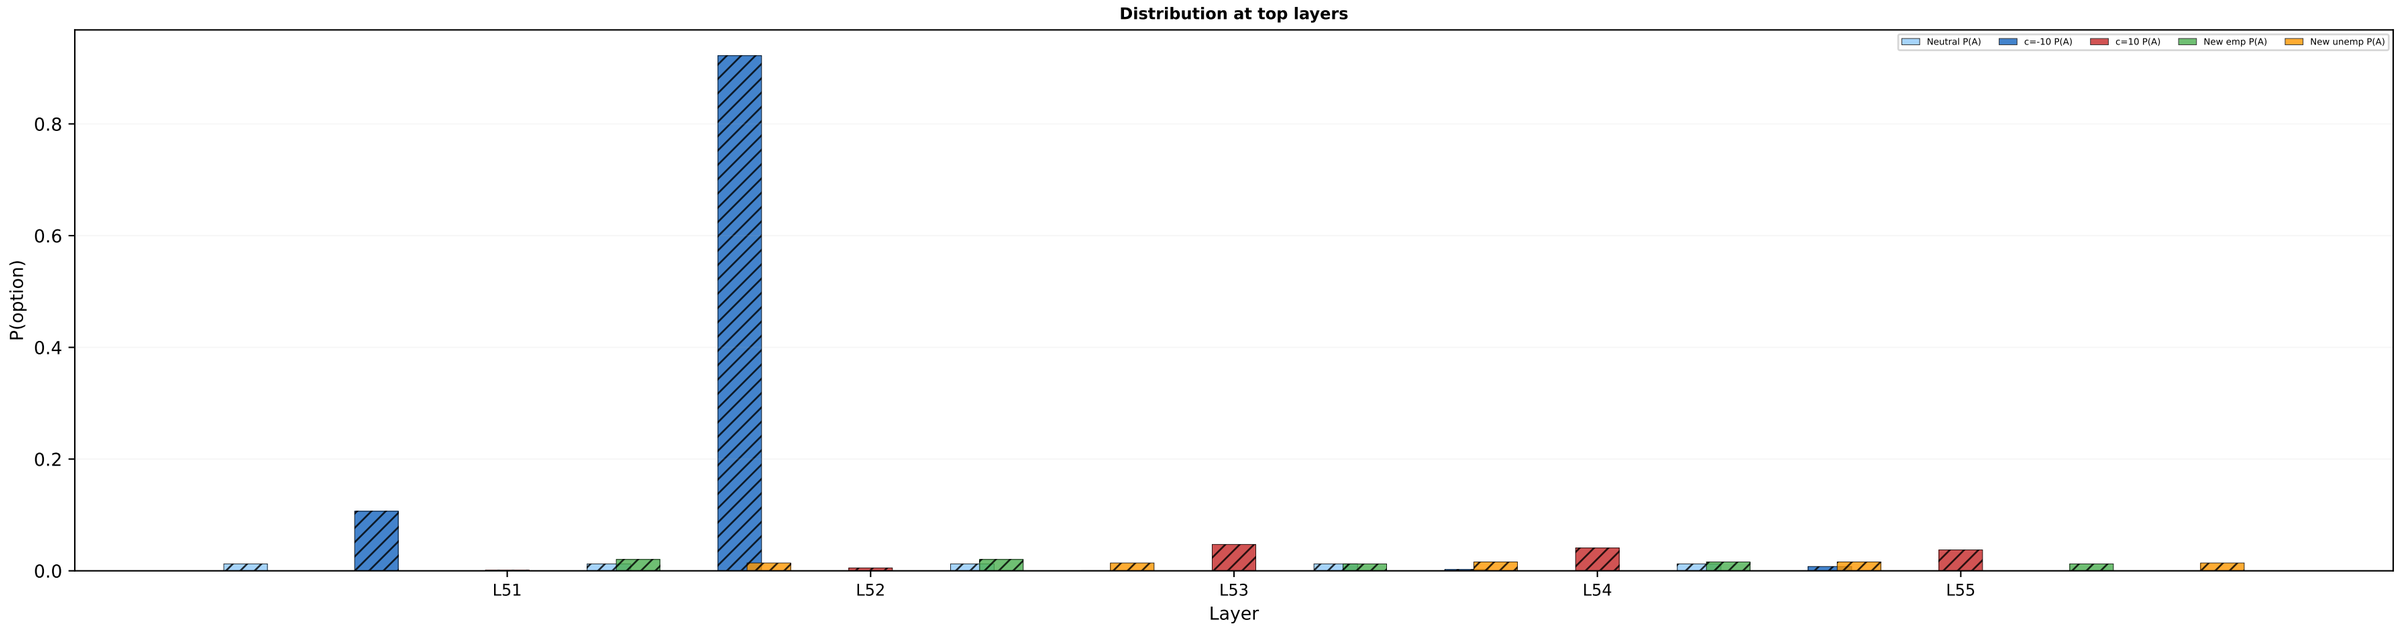
Does a typical adult leave home at the same time every Tuesday? | (A) No, the departure time varies a lot | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

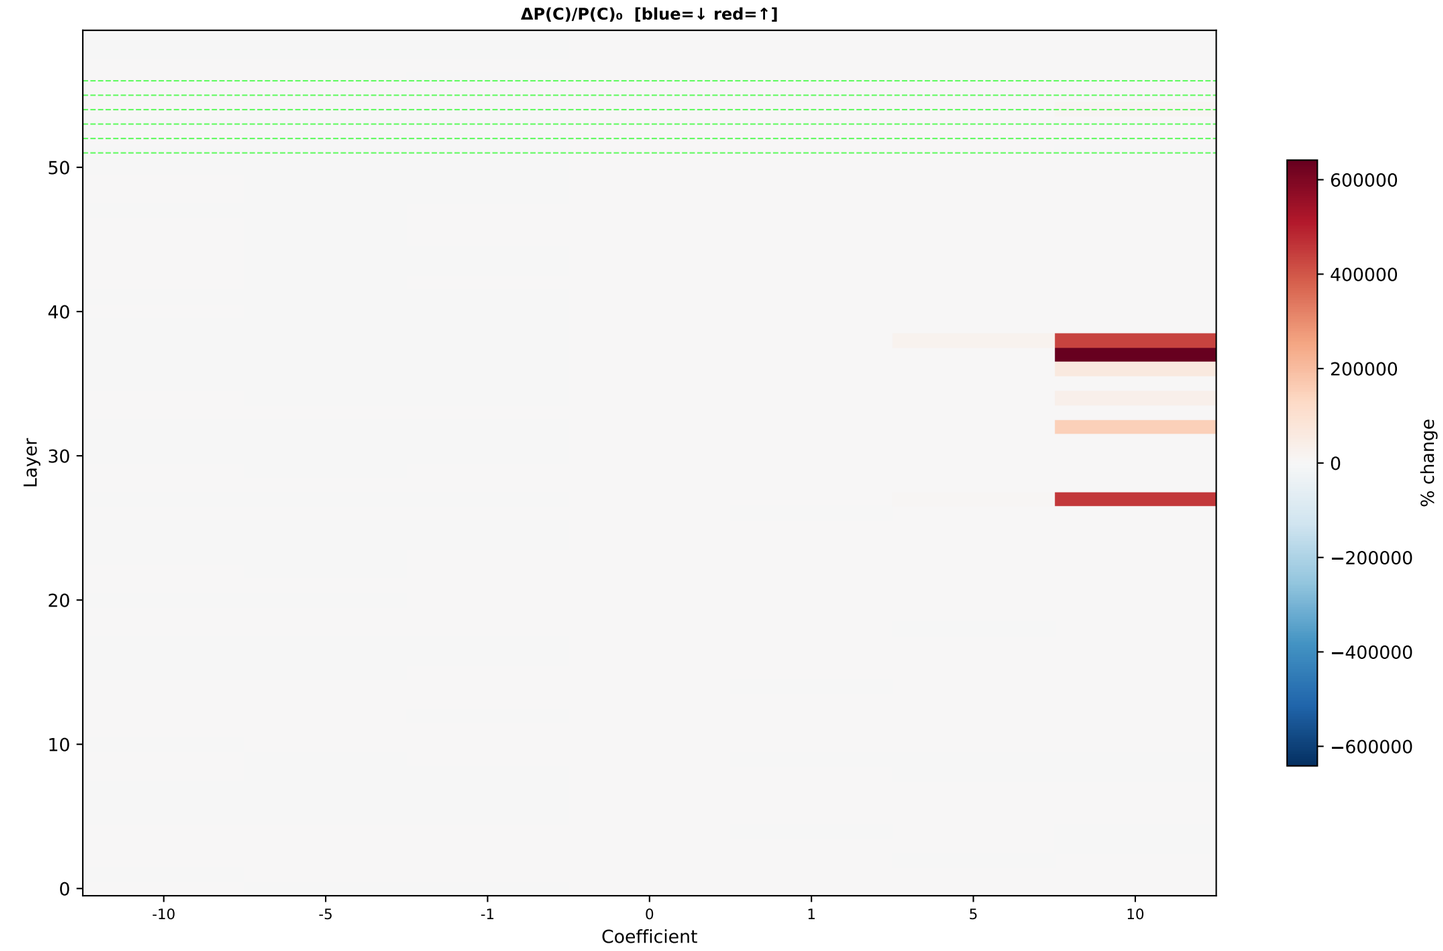


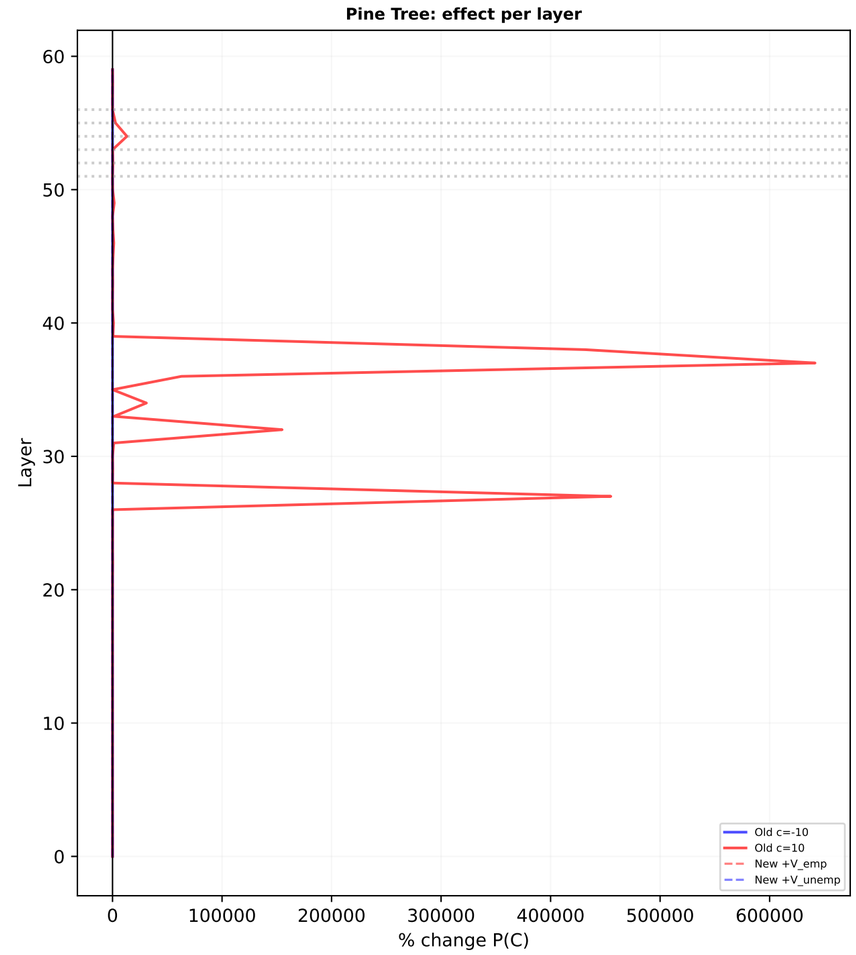


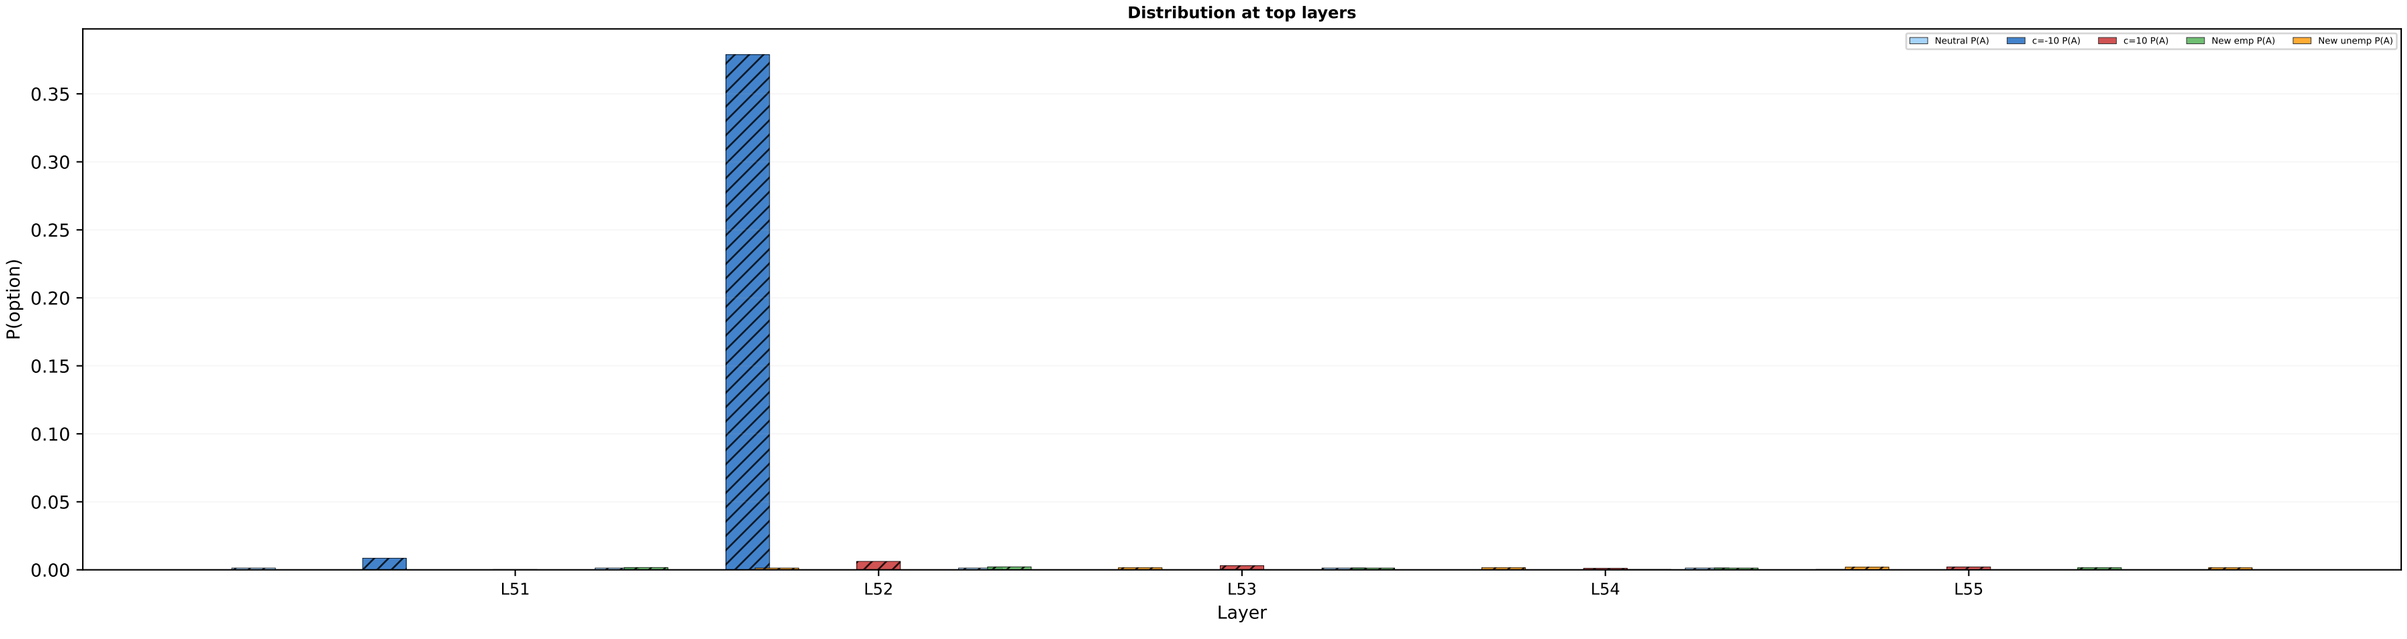


E20: Noon location consistency (Tue) | V7/cfg8

Is a typical adult at the same non-home location at noon every Tuesday? | (A) No, they are usually at home at noon | (B) Sometimes the same place, sometimes not | (C) Yes, almost always at the same location | Answer: (

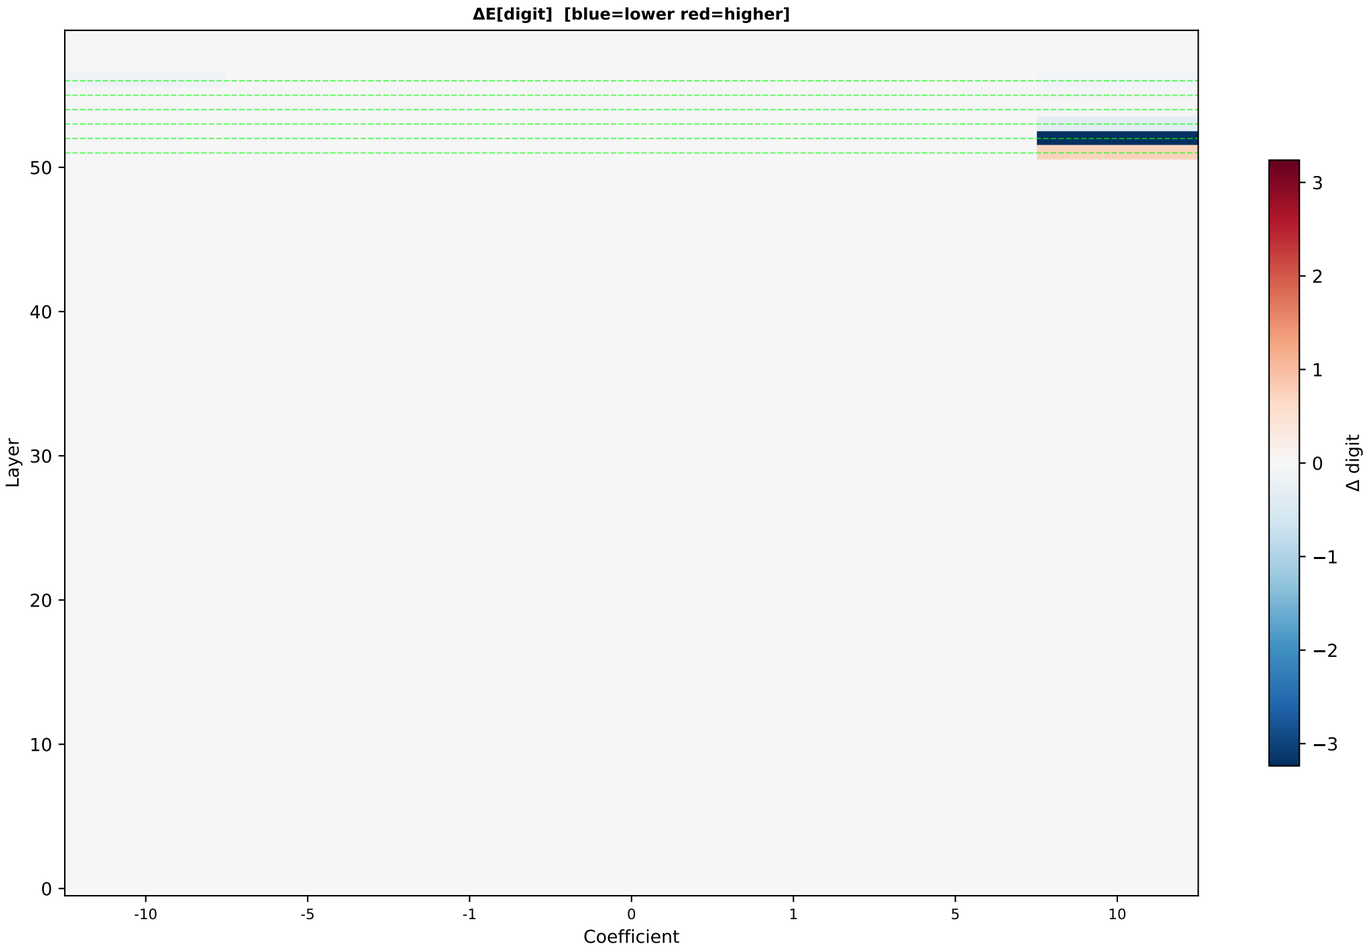


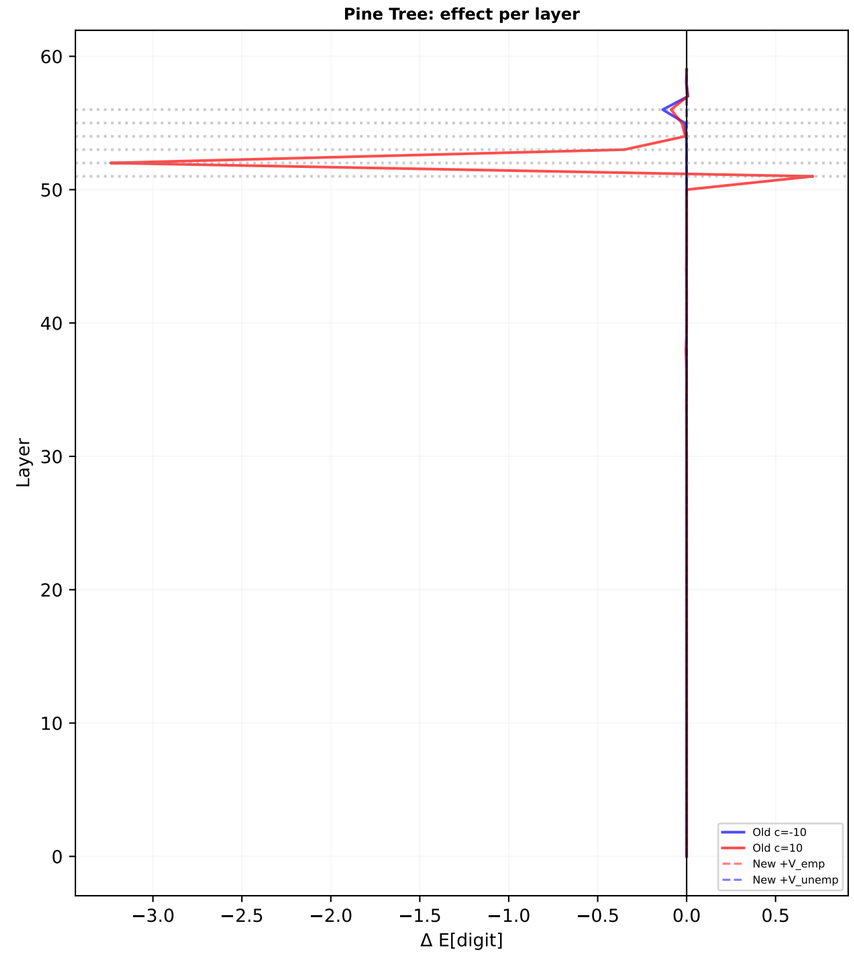


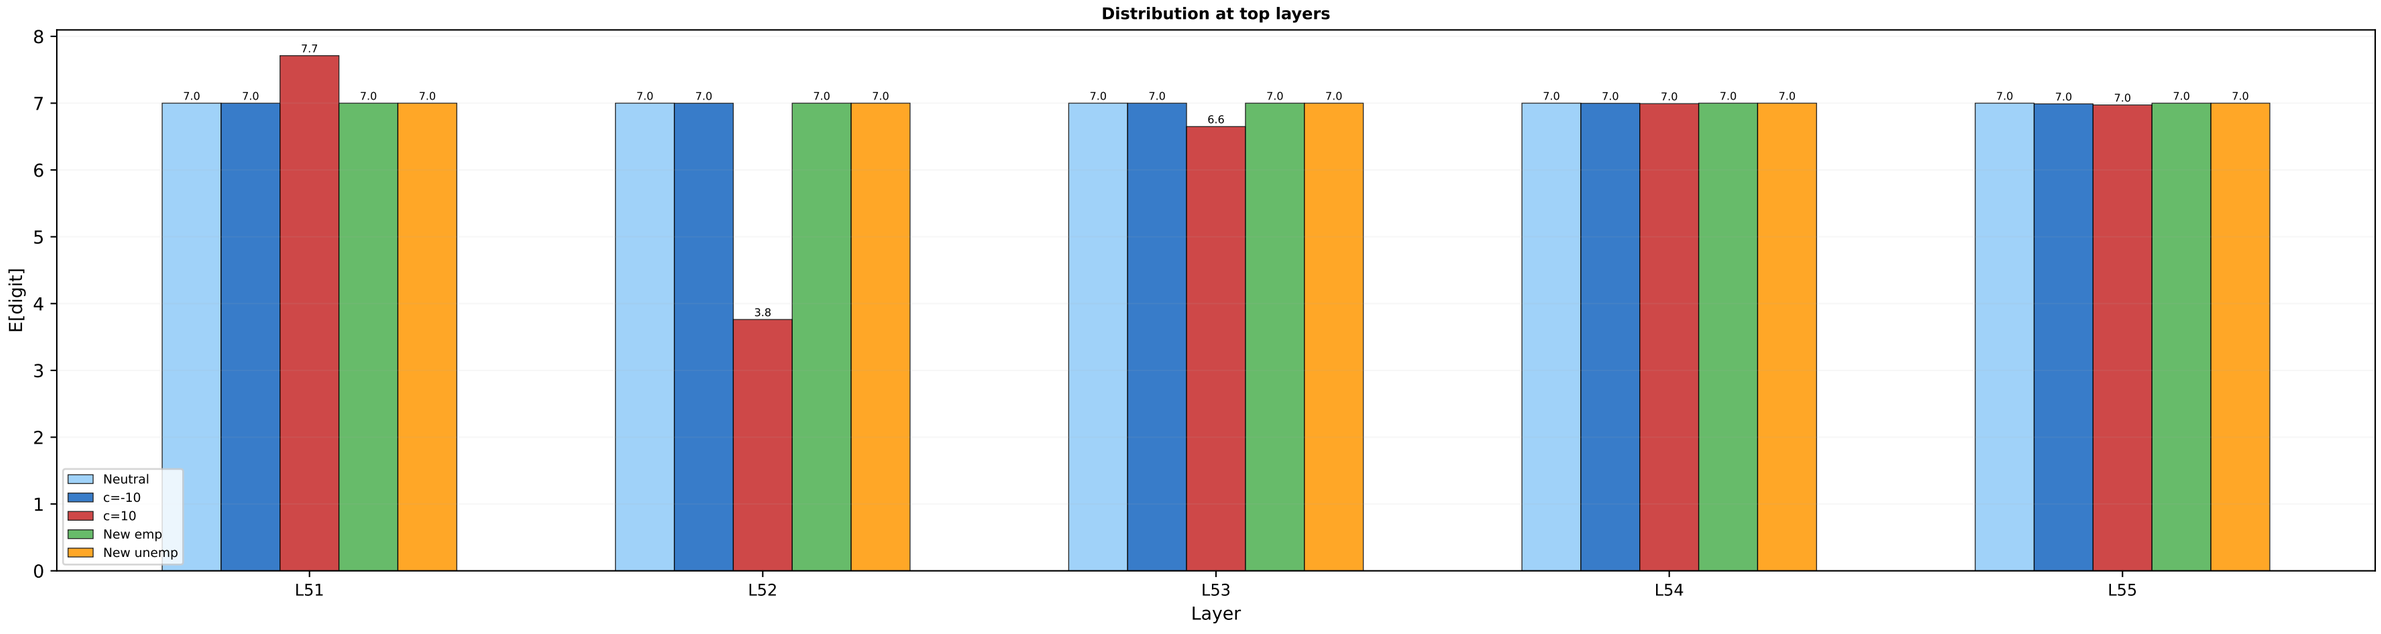


Complete with a single number only. | A typical adult wakes up at approximately ___:00 AM on a Tuesday. |

E1: Wake-up hour (Tue) | V8/cfg2

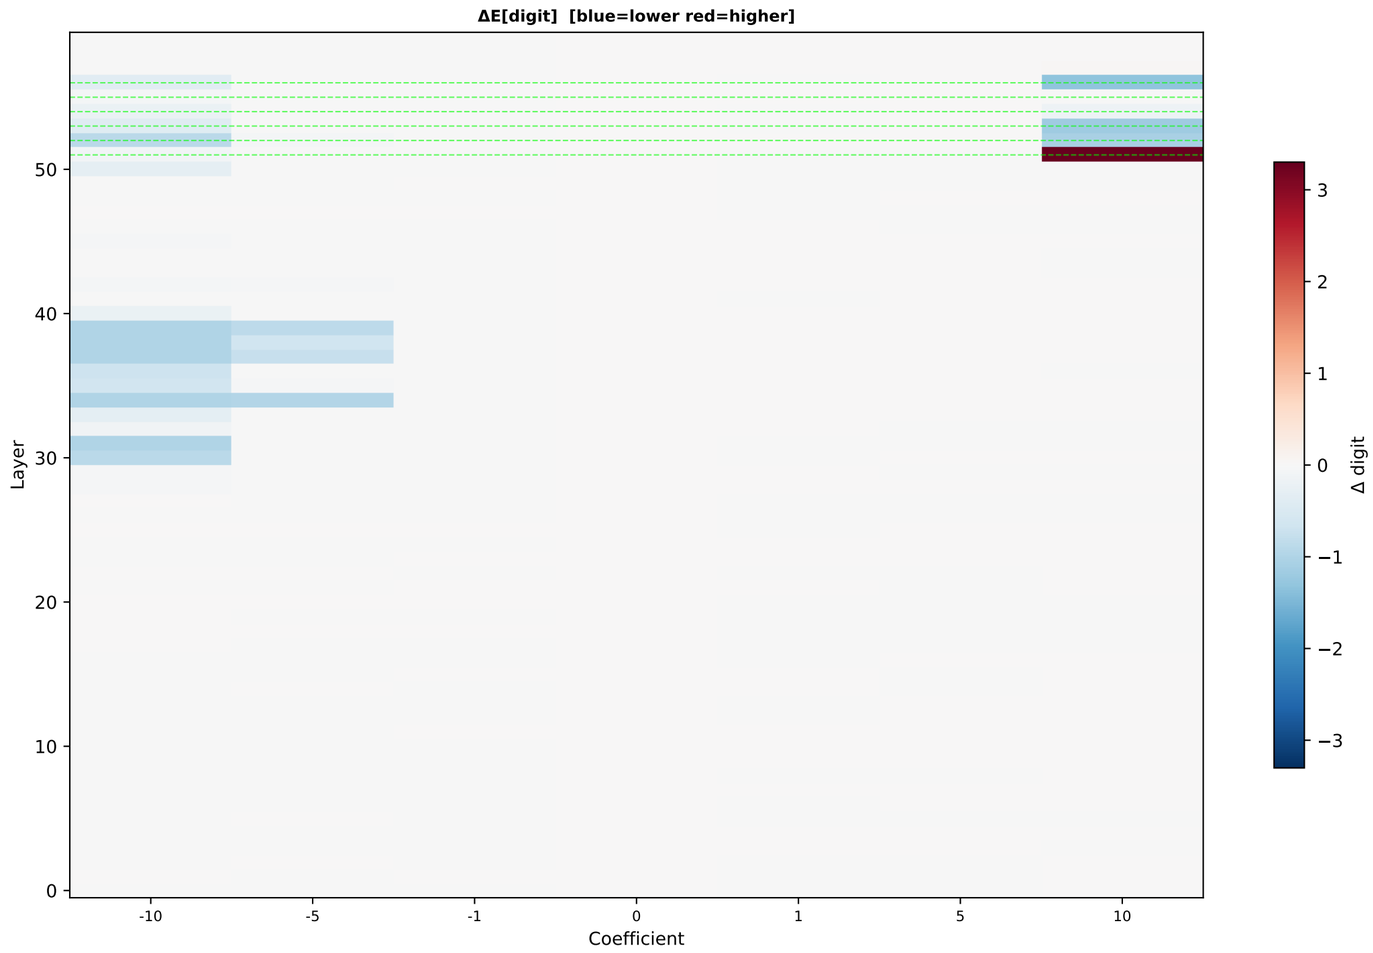


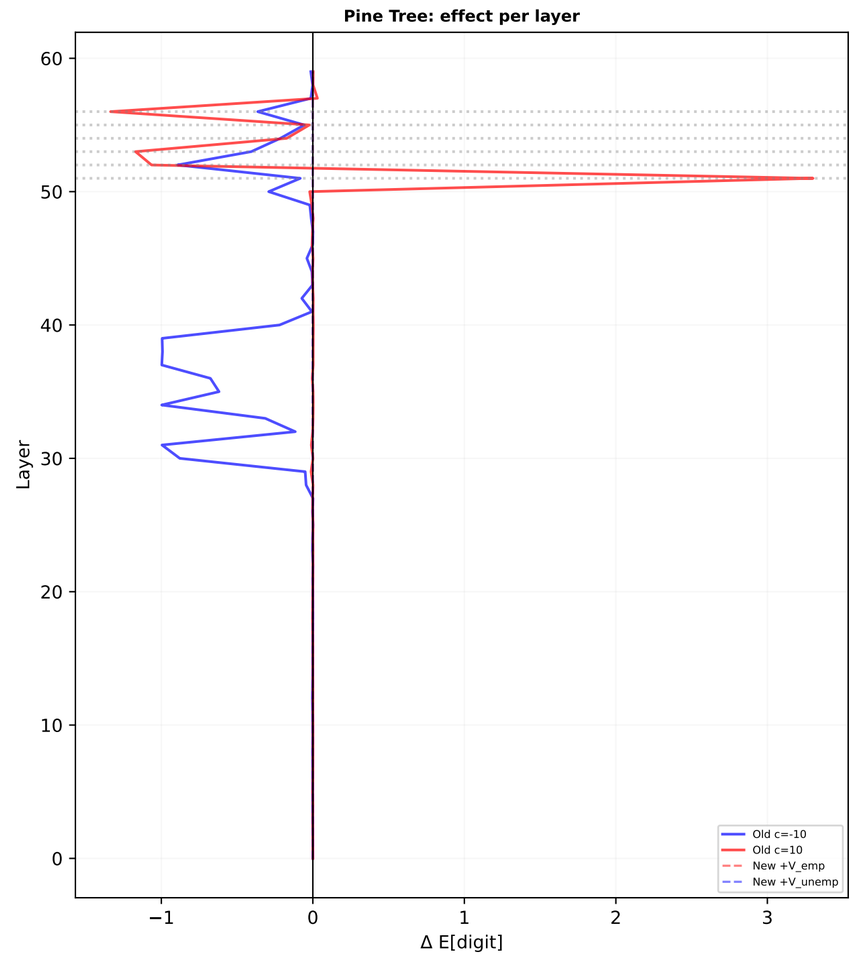


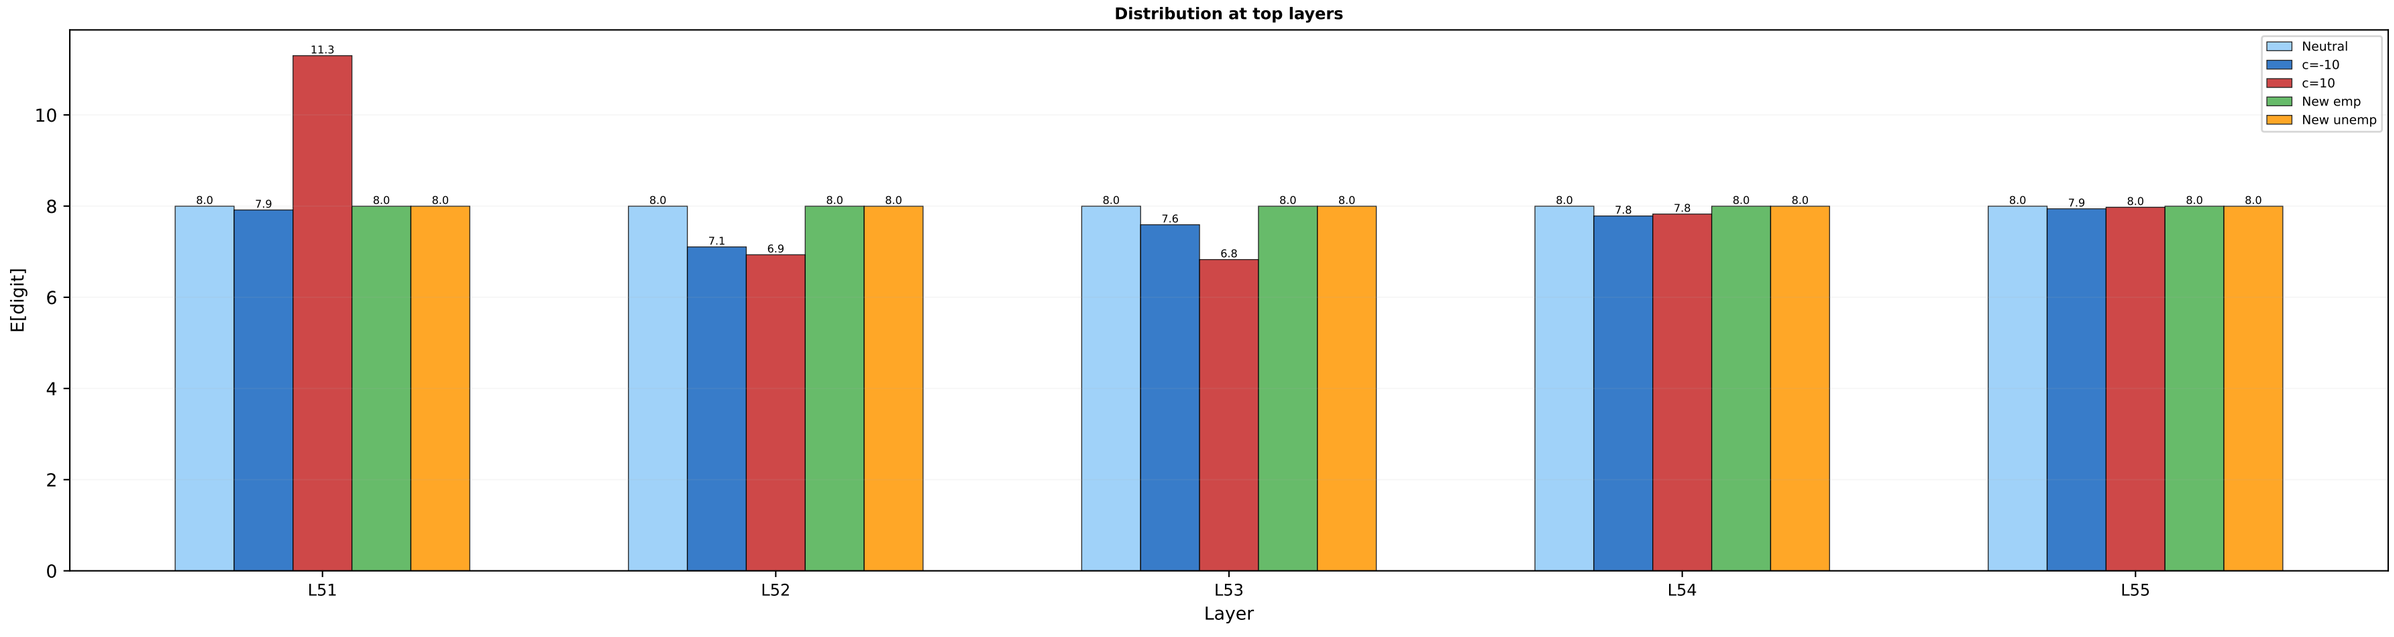


Complete with a single number only. | A typical adult leaves home at approximately ___:00 AM on a Tuesday. |

E2: Leave-home hour (Tue) | V8/cfg2

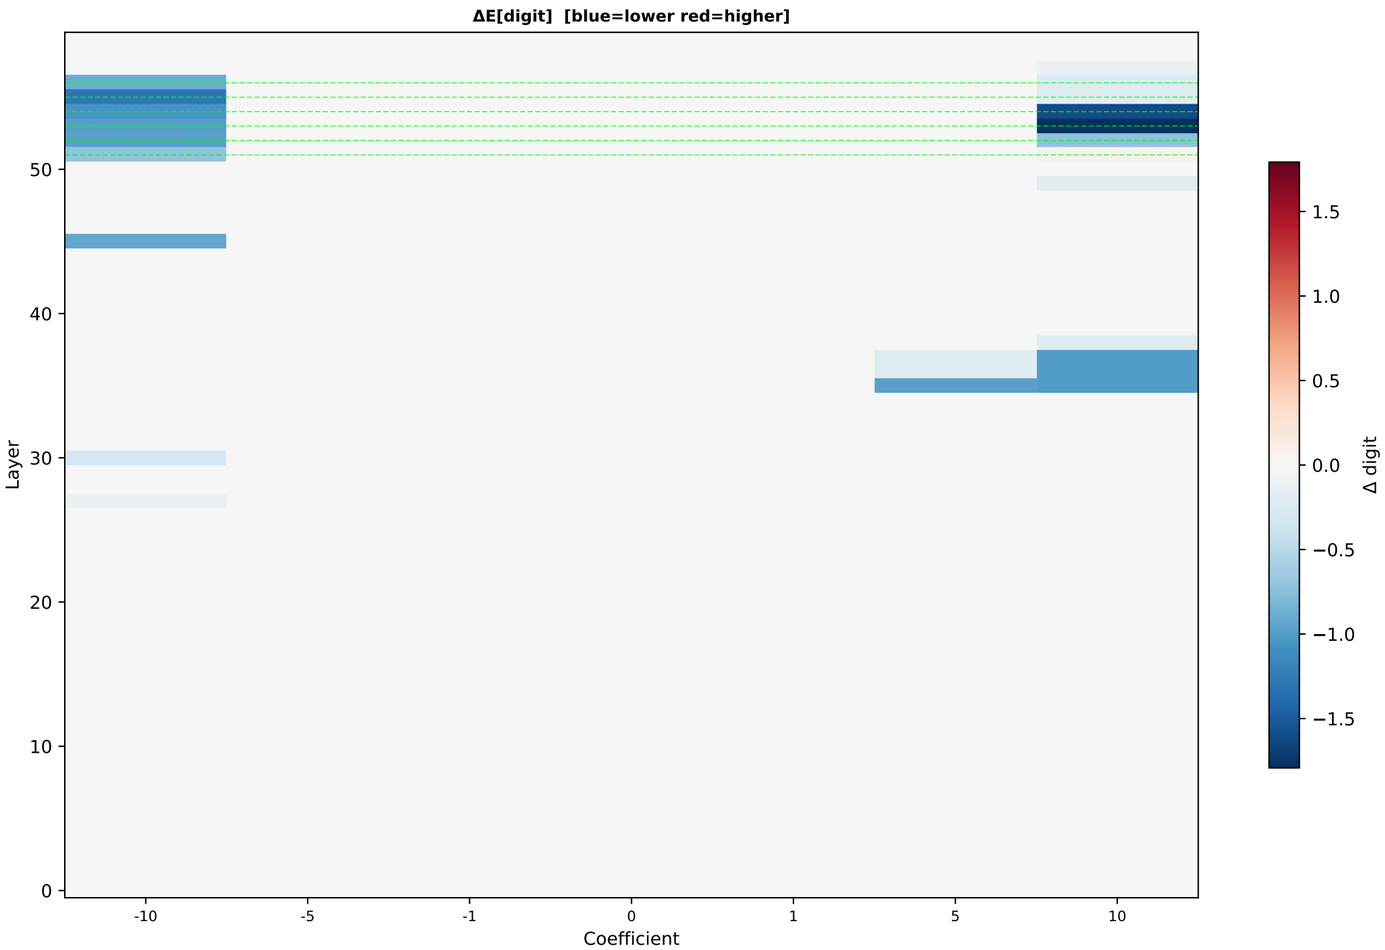


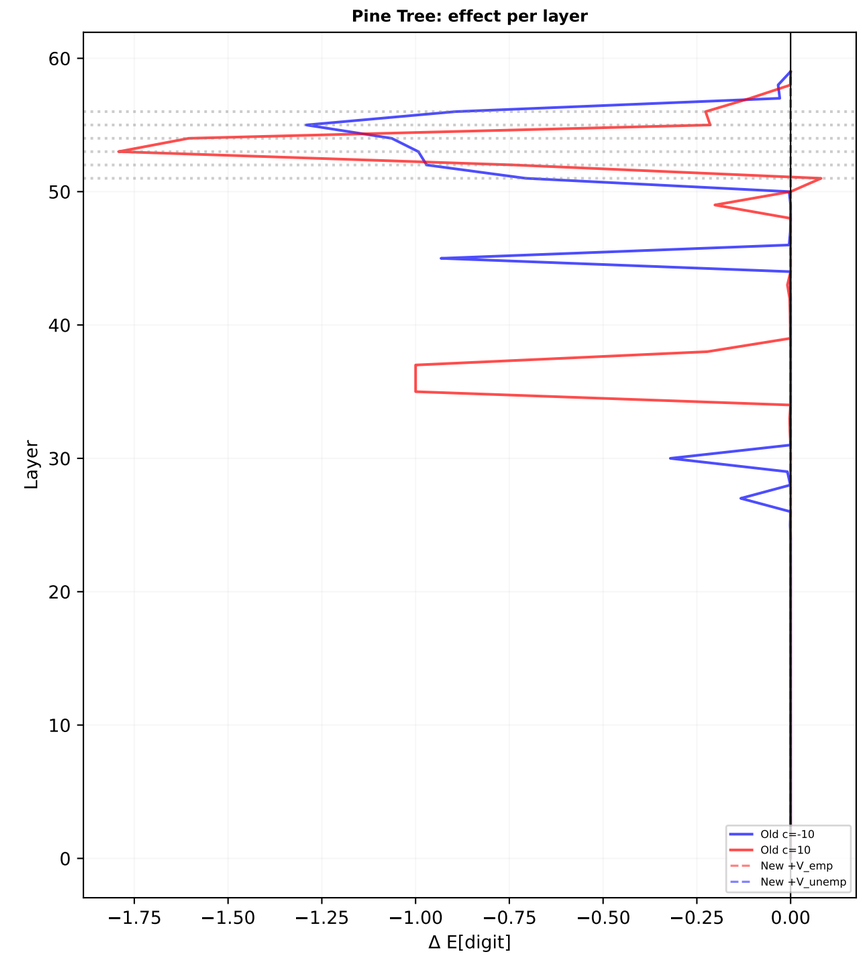


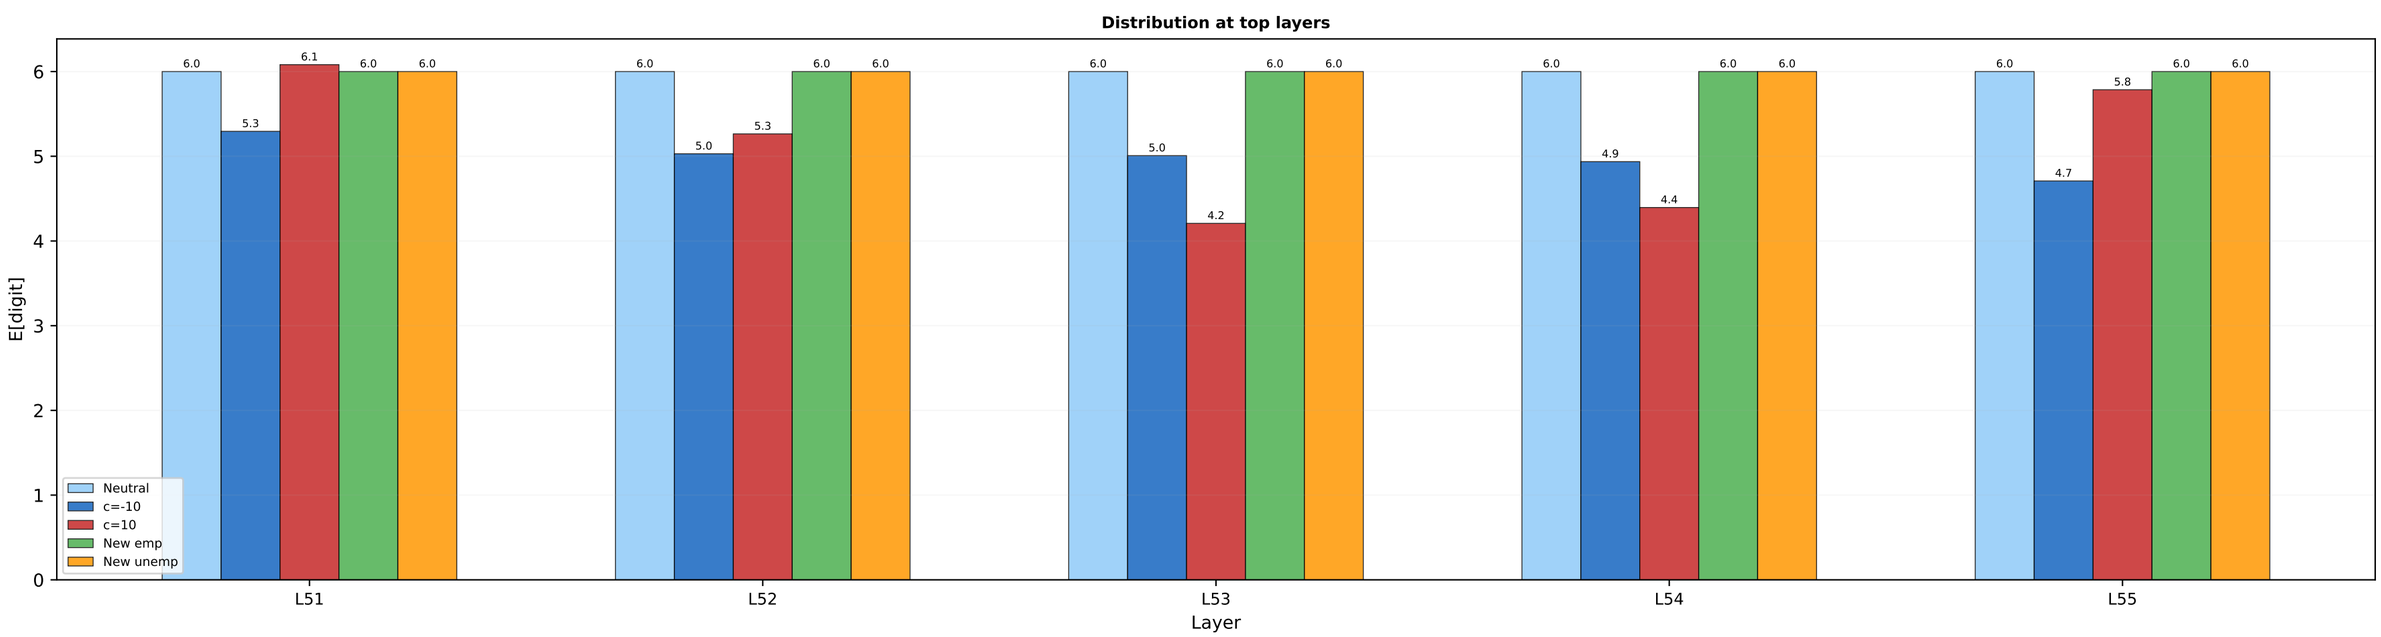


Complete with a single number only. | A typical adult arrives home at approximately ___:00 PM on a Tuesday. |

E3: Arrive-home hour (Tue) | V8/cfg2

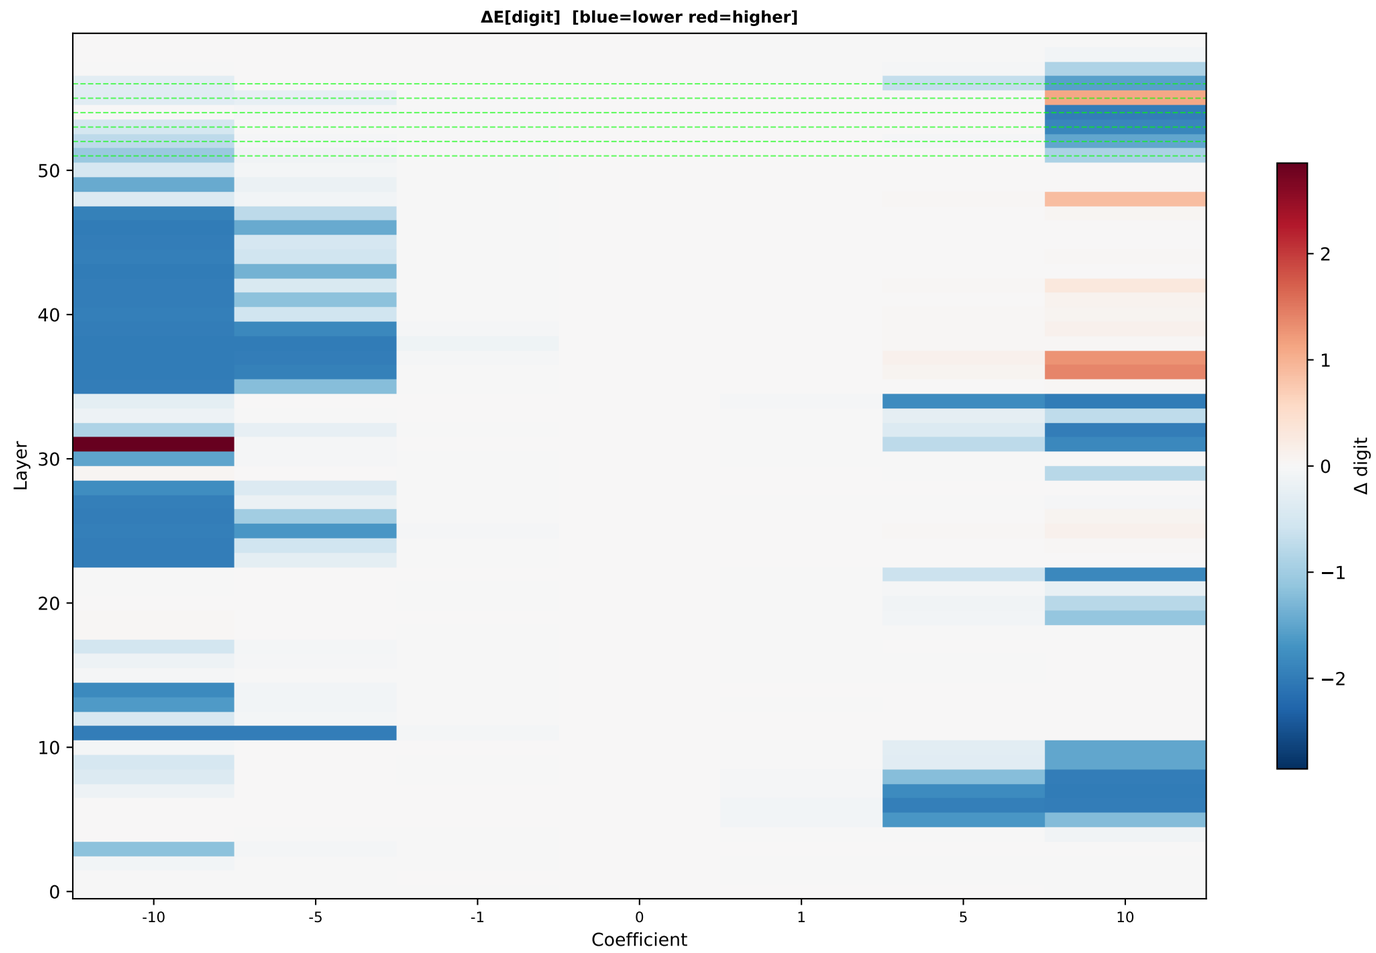


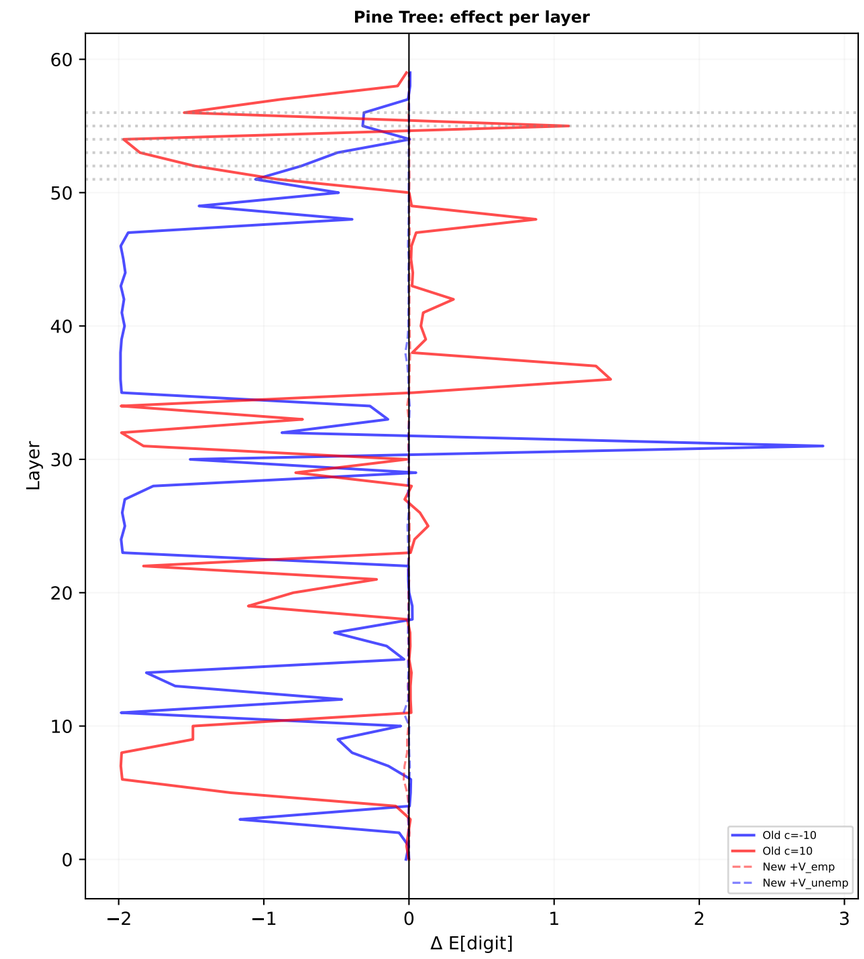


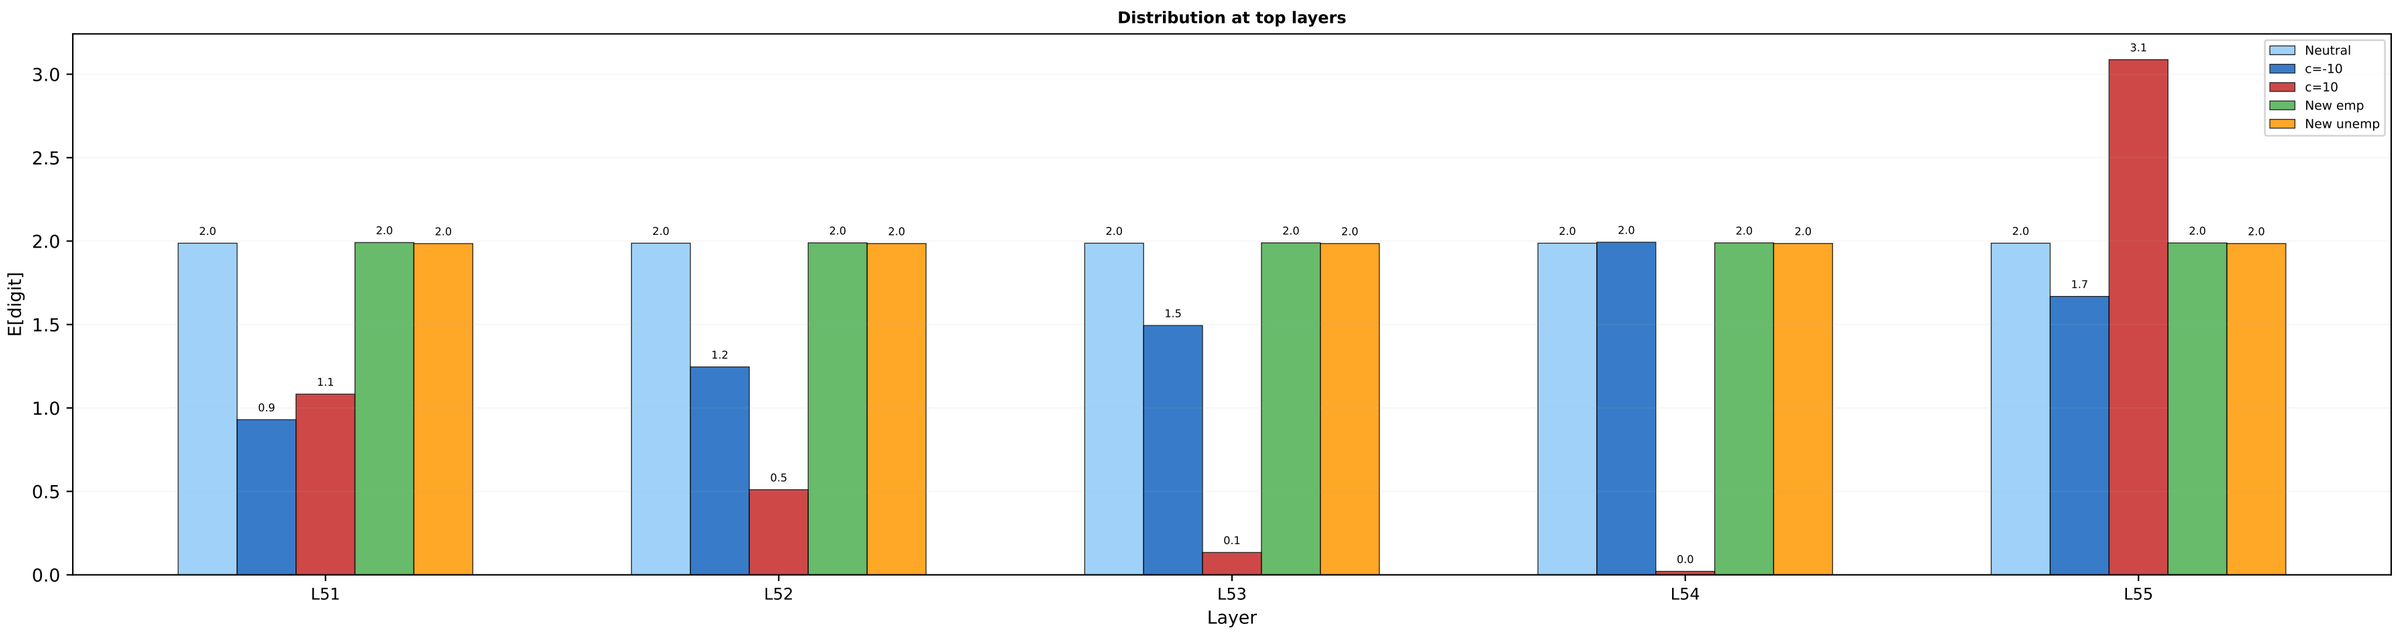


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at home between 8 AM and 6 PM on a Tuesday?
____ |

E4: Daytime hours at home (Tue) | V8/cfg2

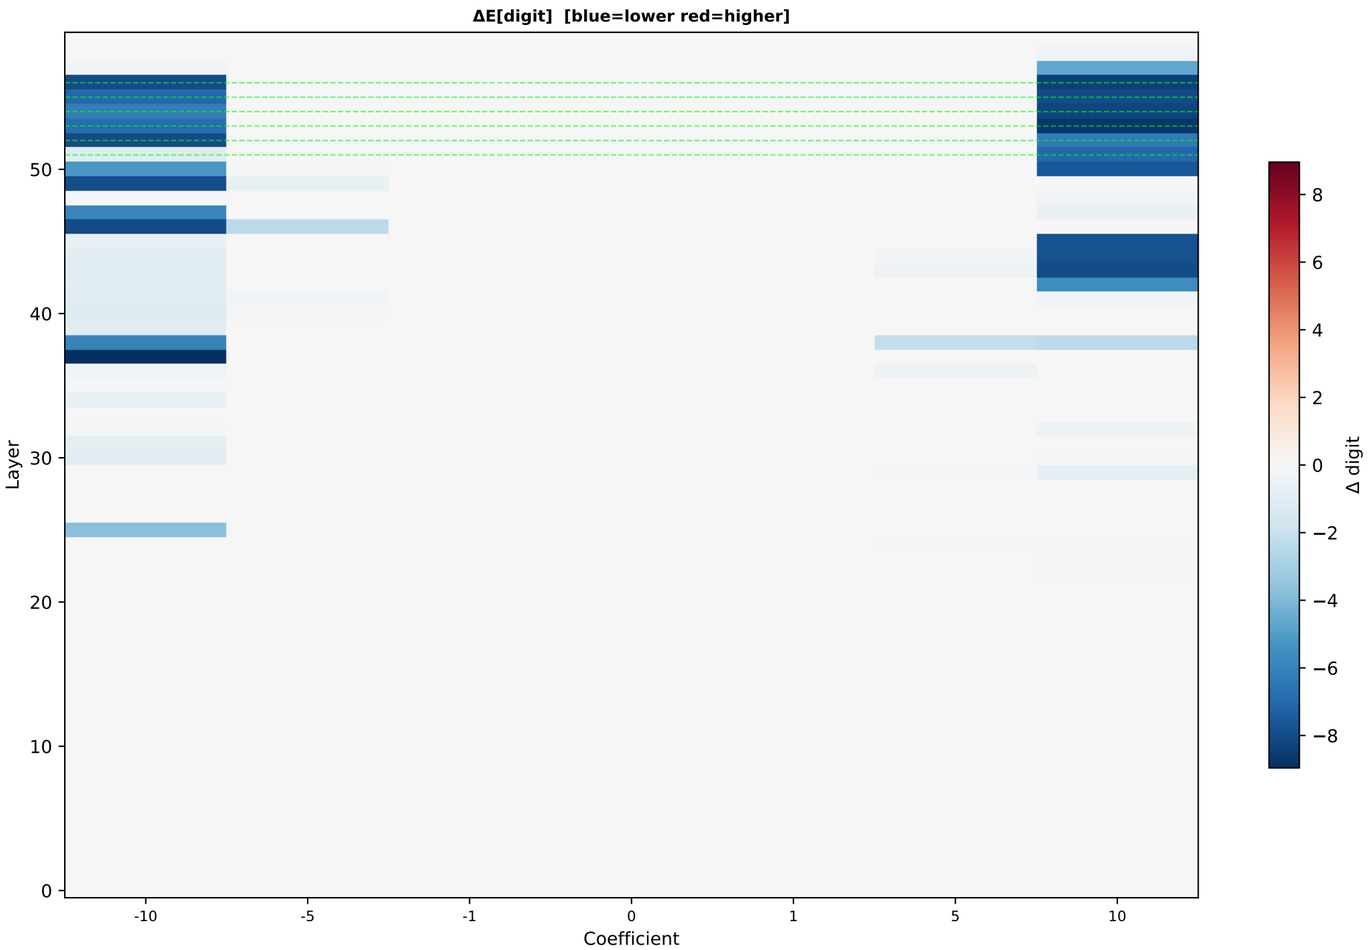


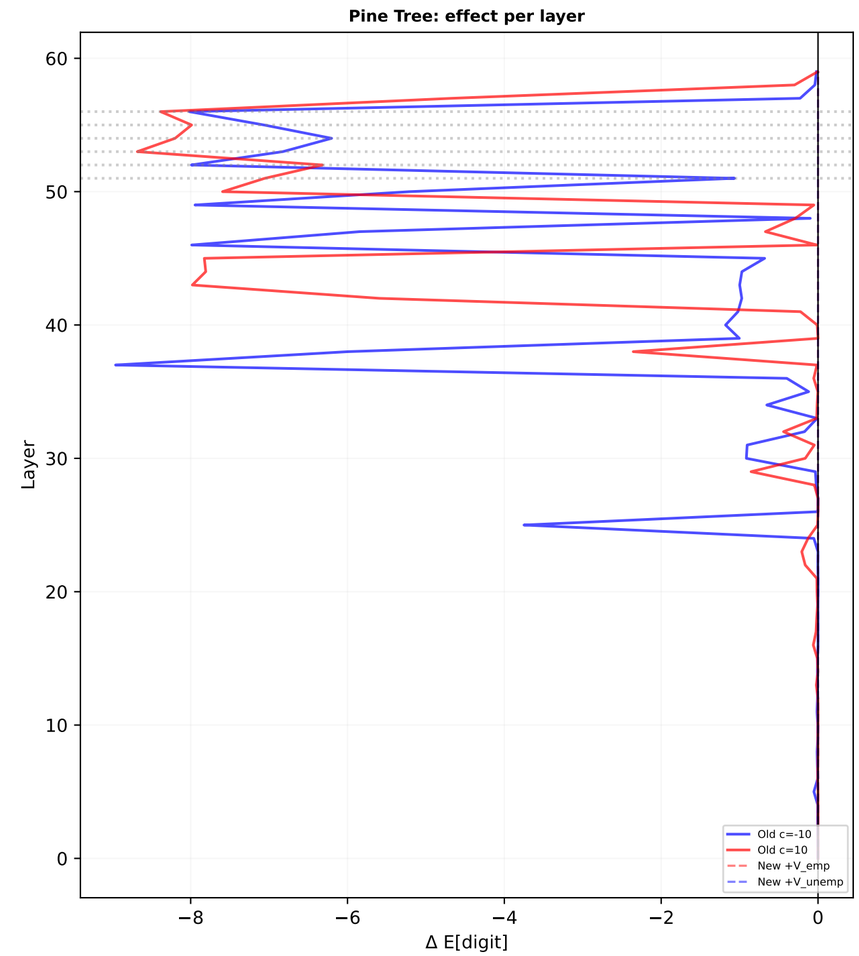


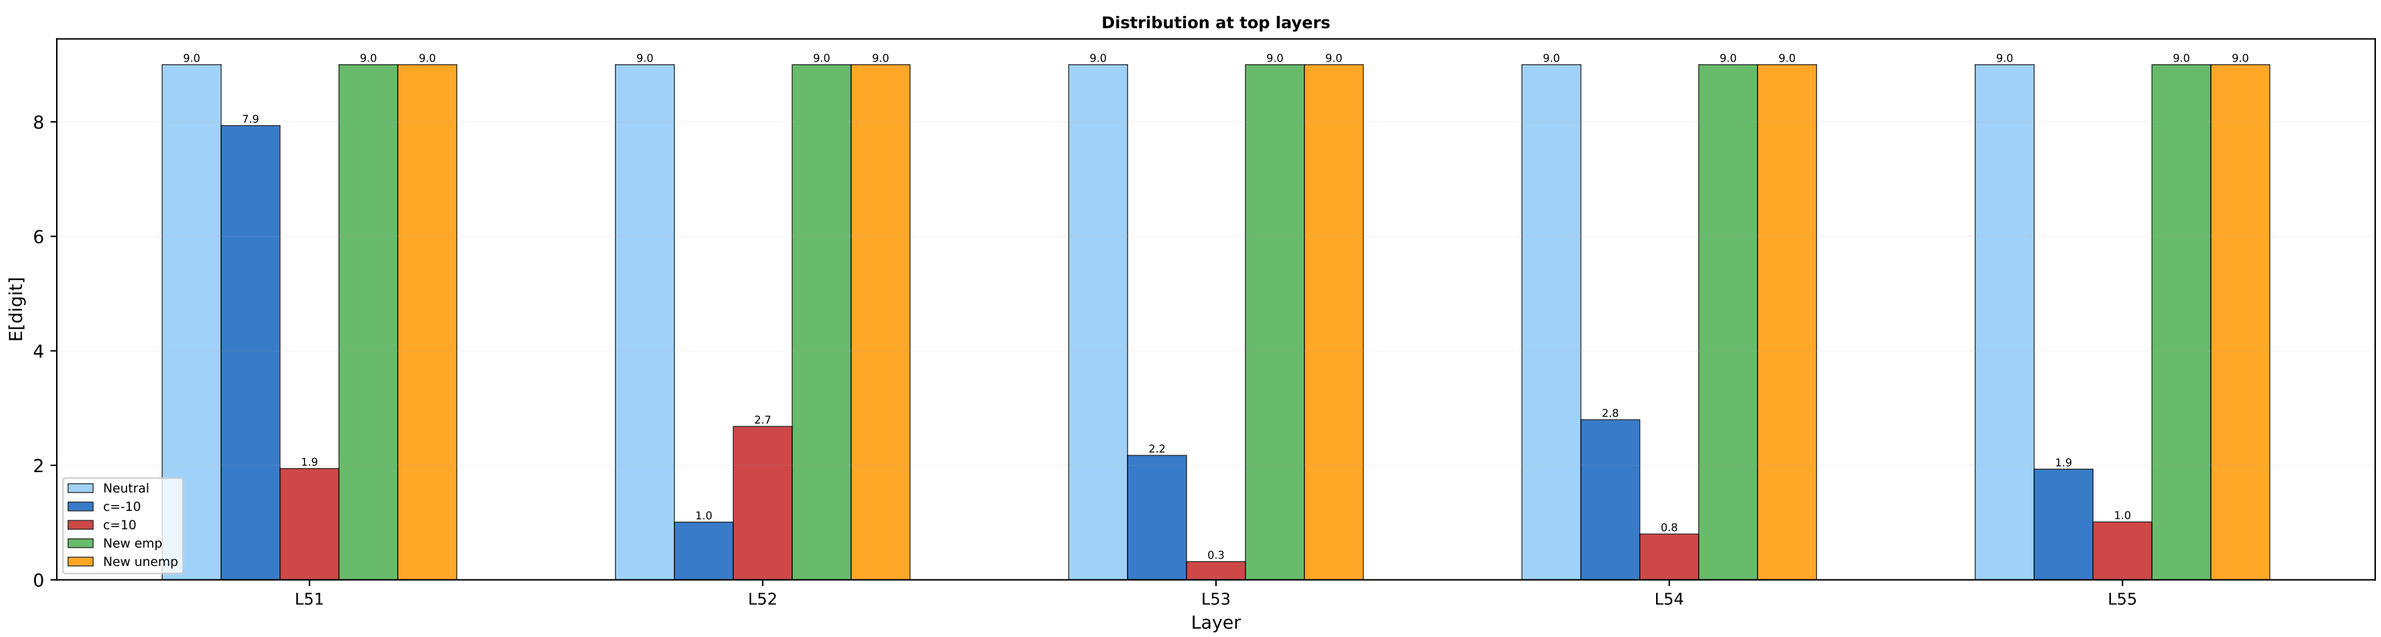


E5: Longest stretch outside (Tue) | V8/cfg2

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours a typical adult spends outside the home on a Tuesday? ___ |

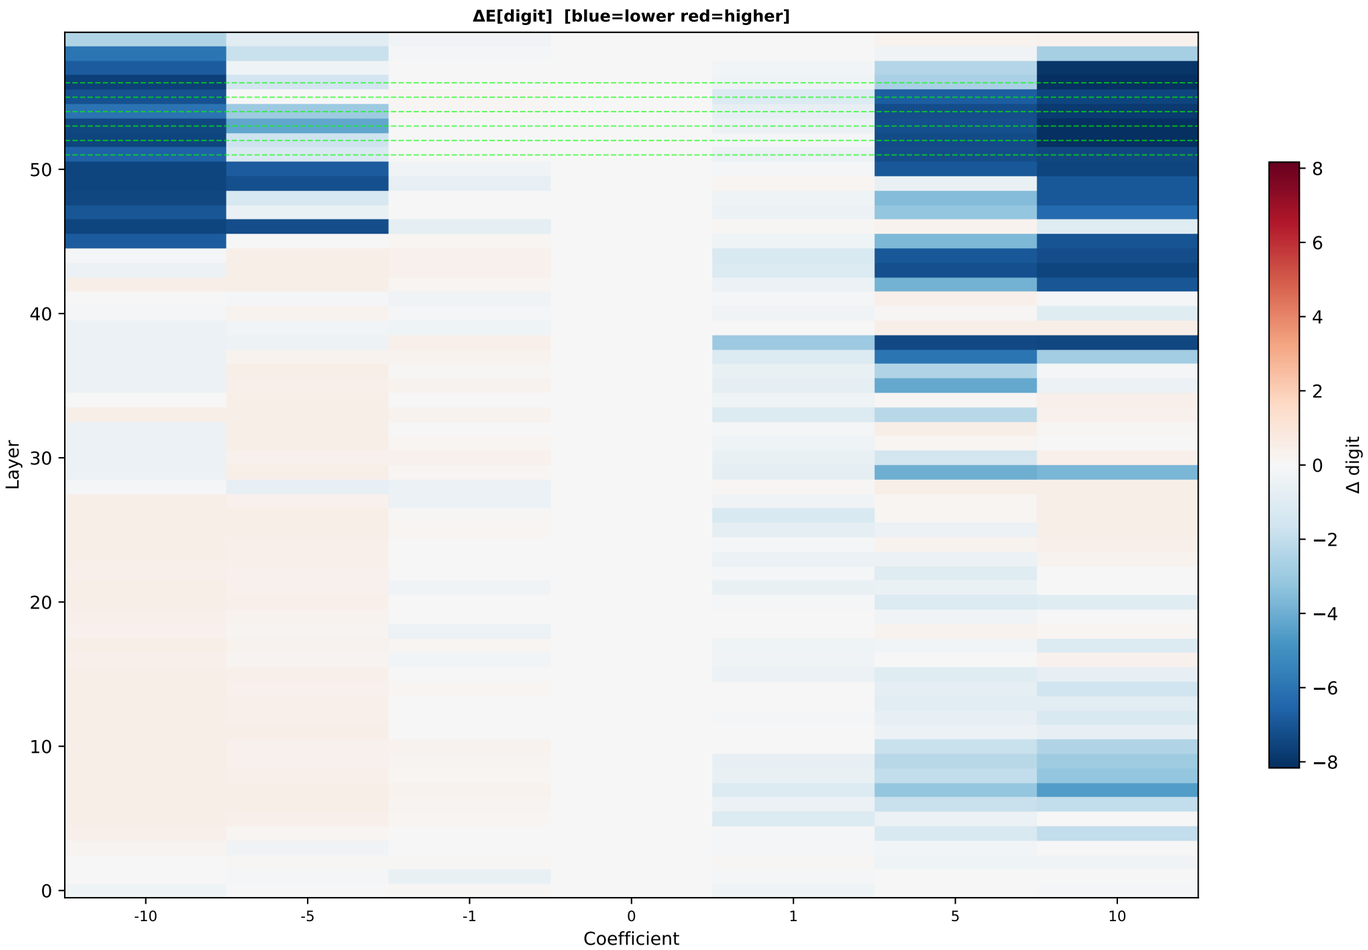


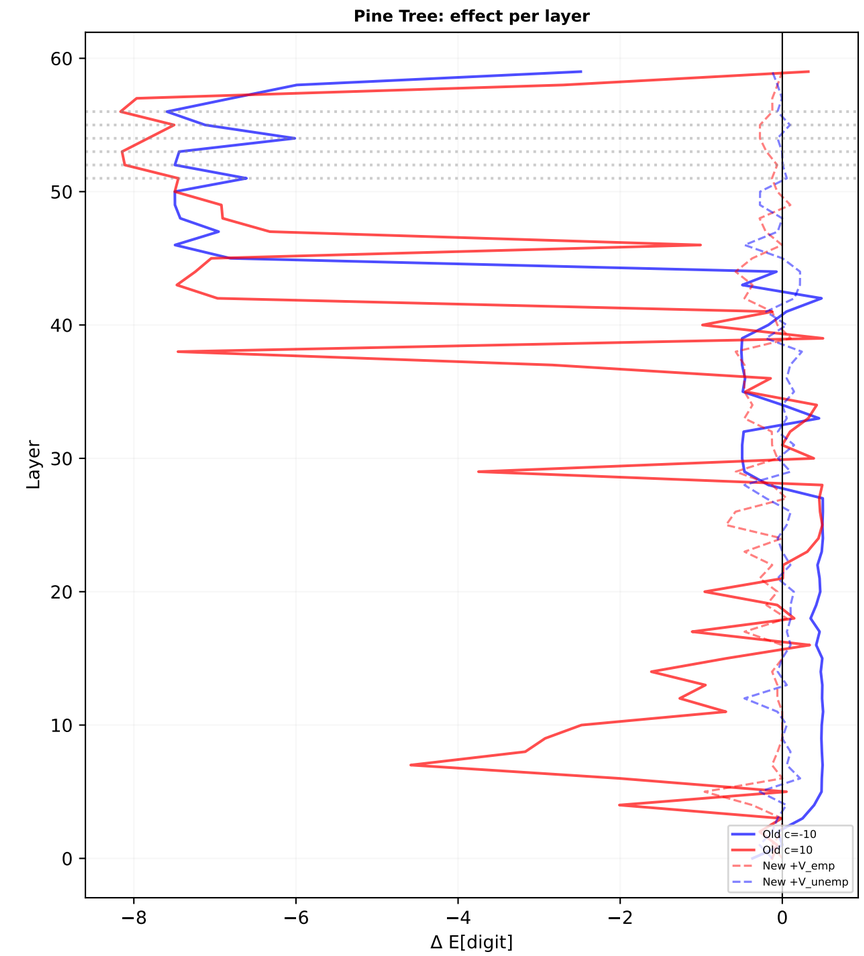


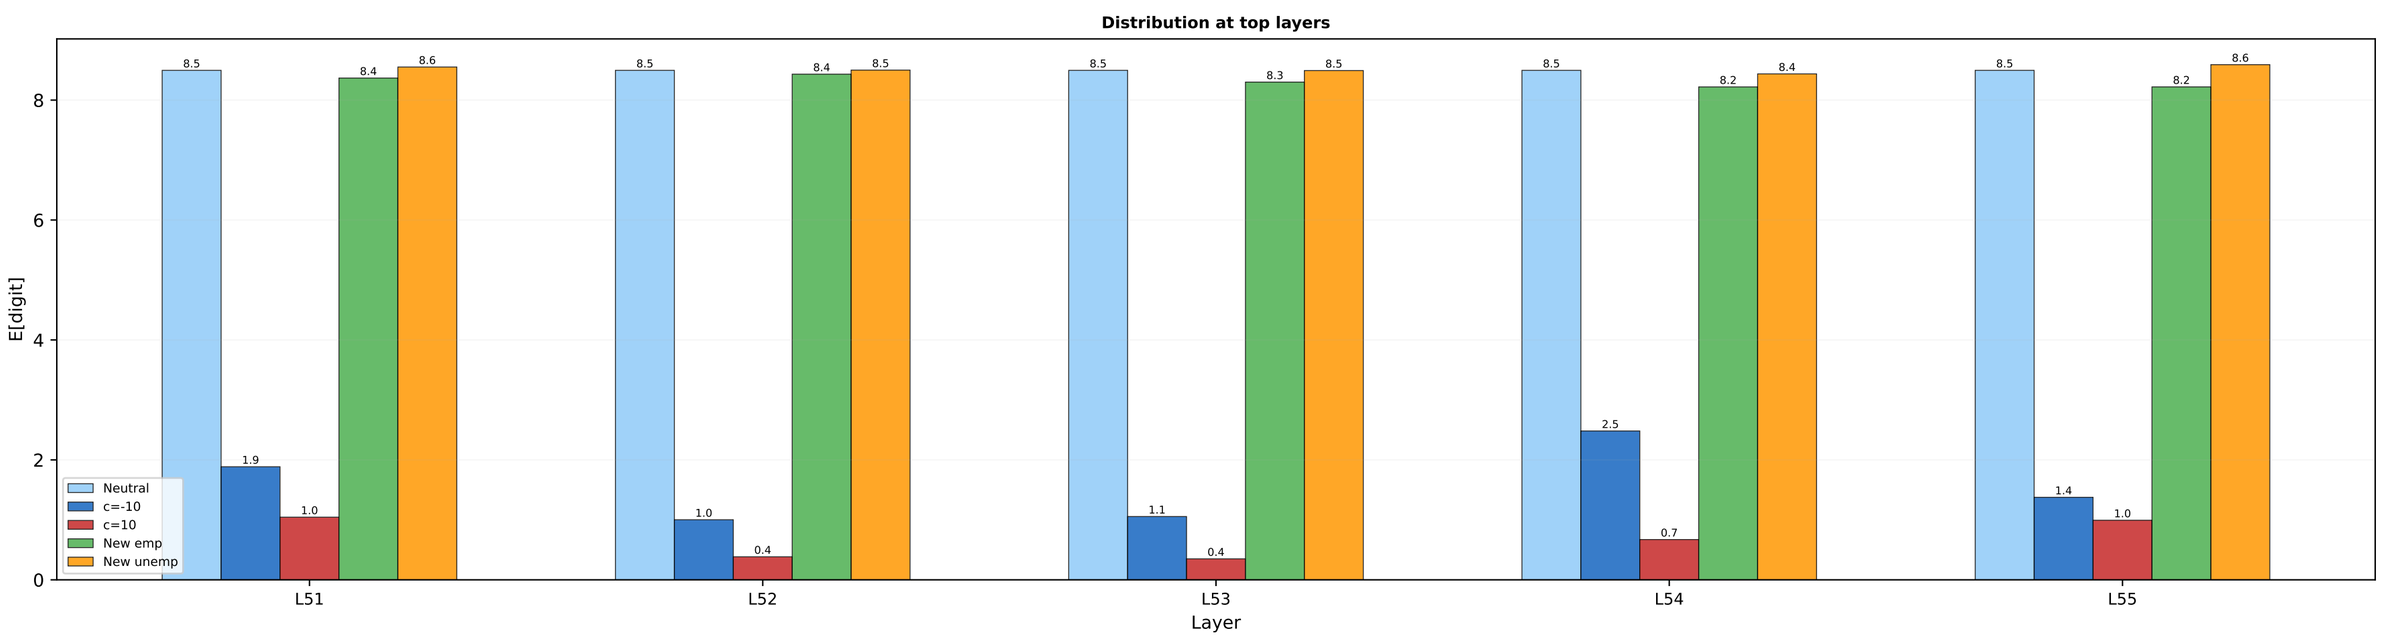


Answer with a single digit from 0 to 9. | How many total hours is a typical adult away from home on a Tuesday? ___ |

E6: Total hours away (Tue) | V8/cfg2

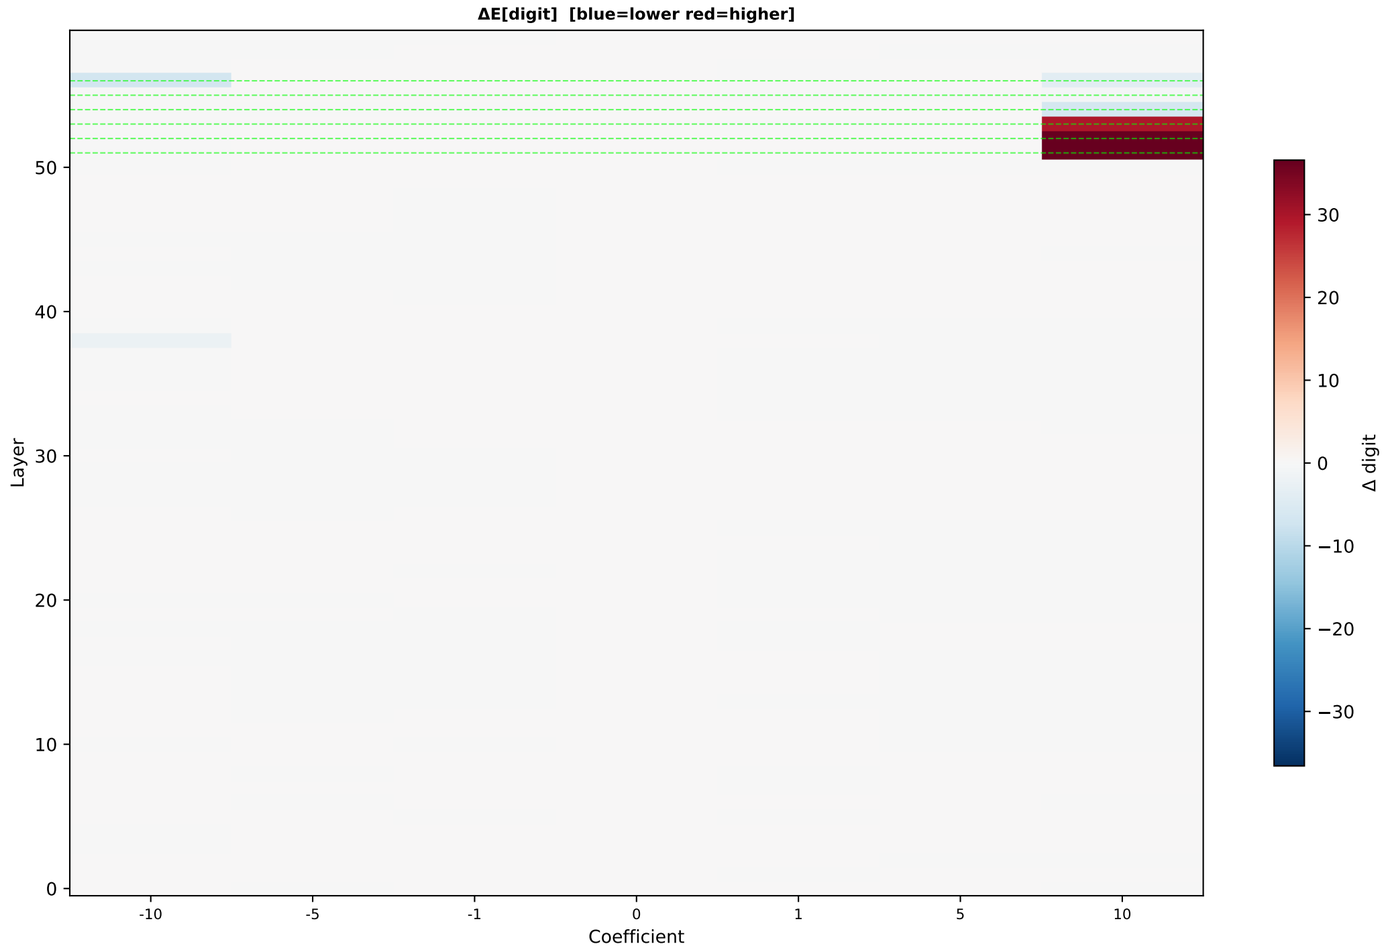


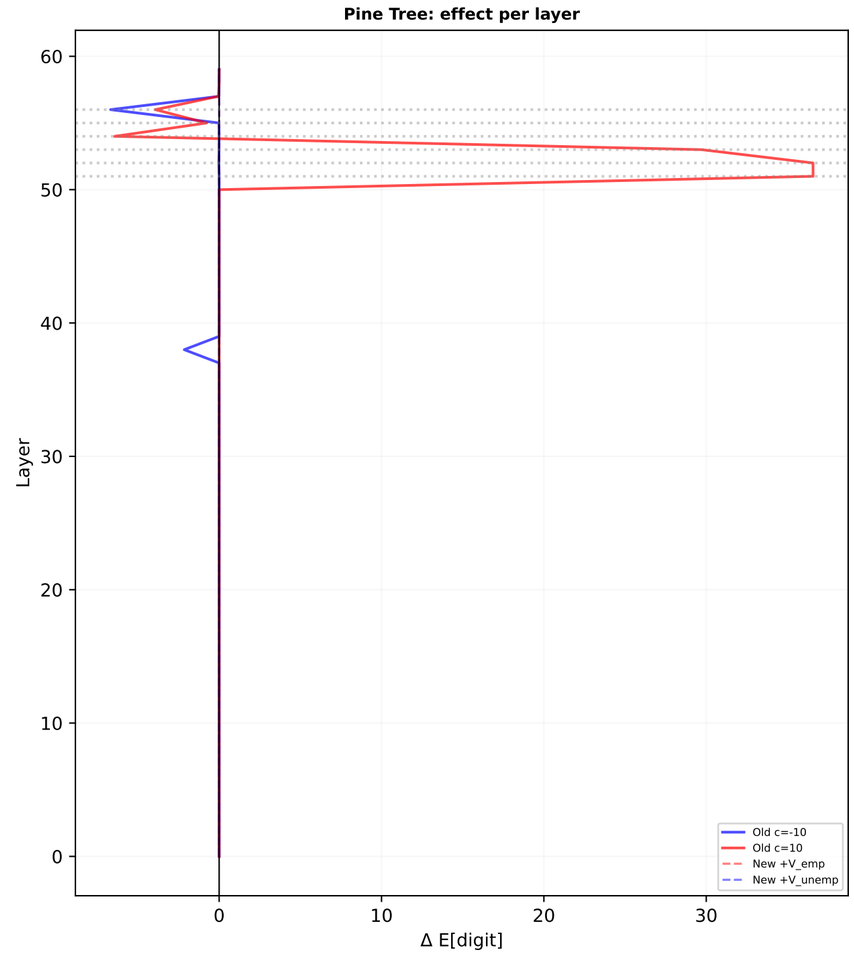


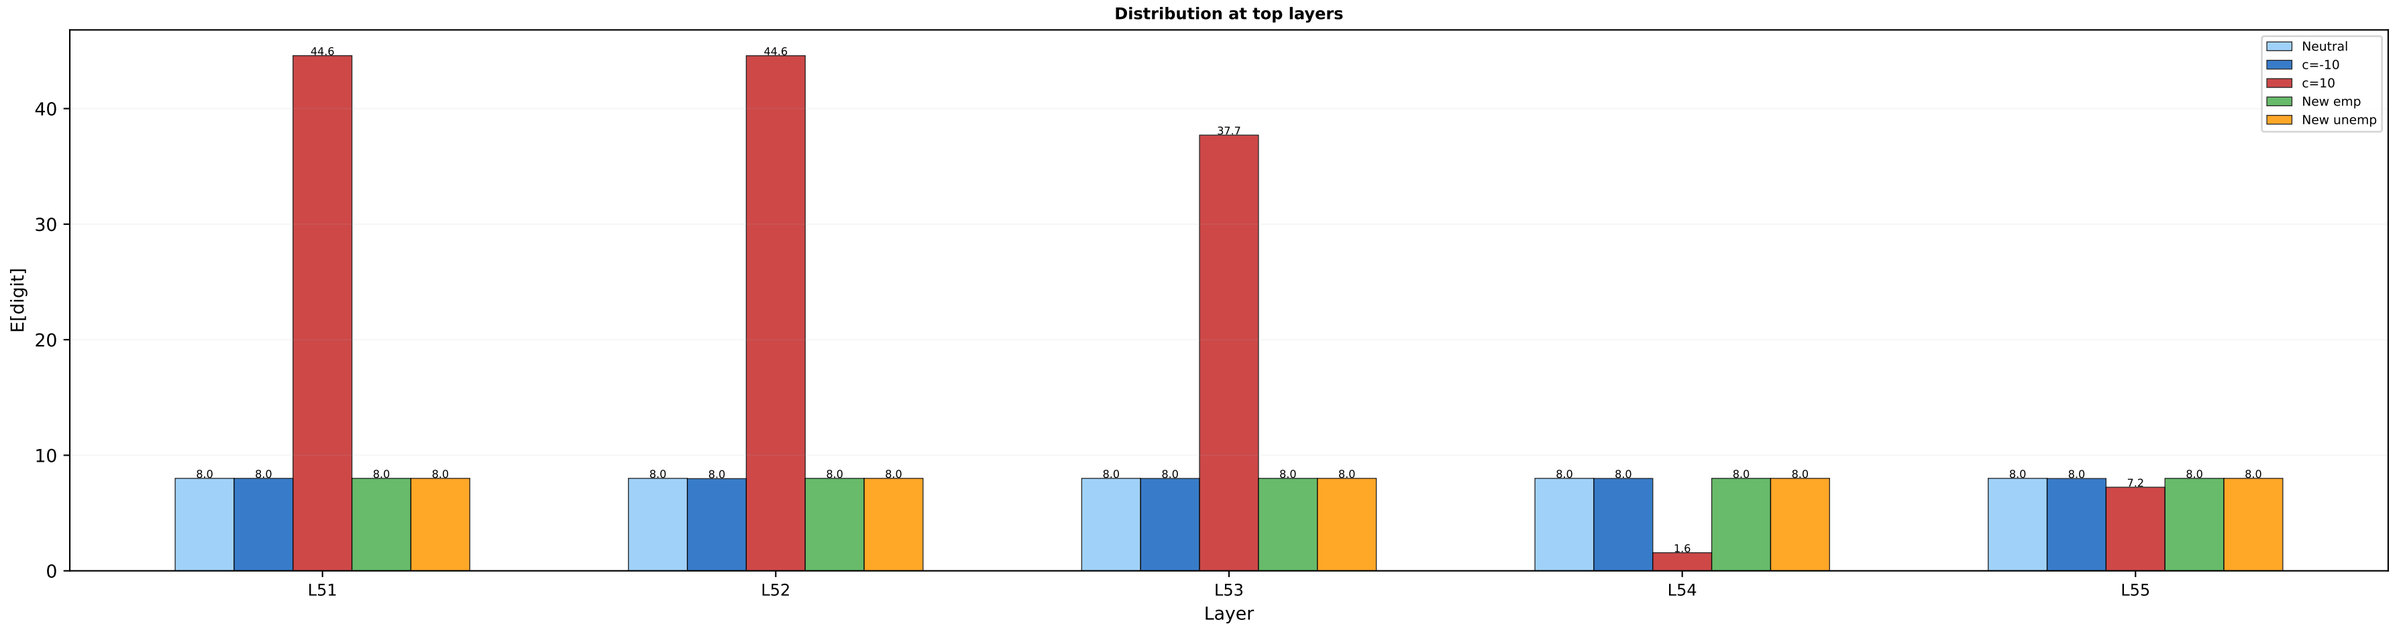


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at their most frequently visited non-home location on a Tuesday? ___ |

E7: Hours at primary non-home location (Tue) | V8/cfg2

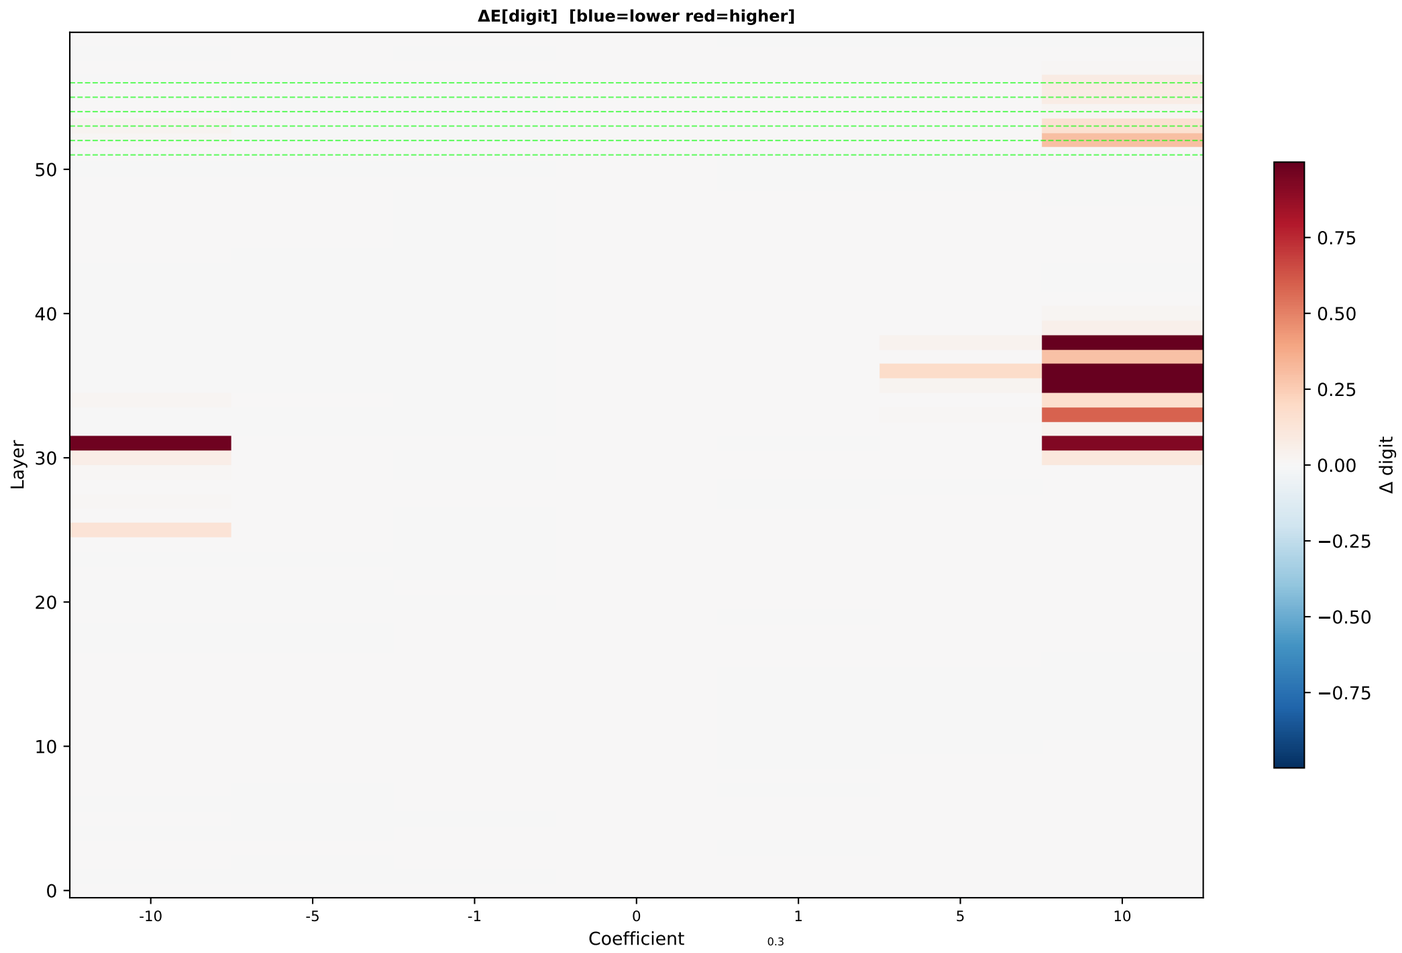


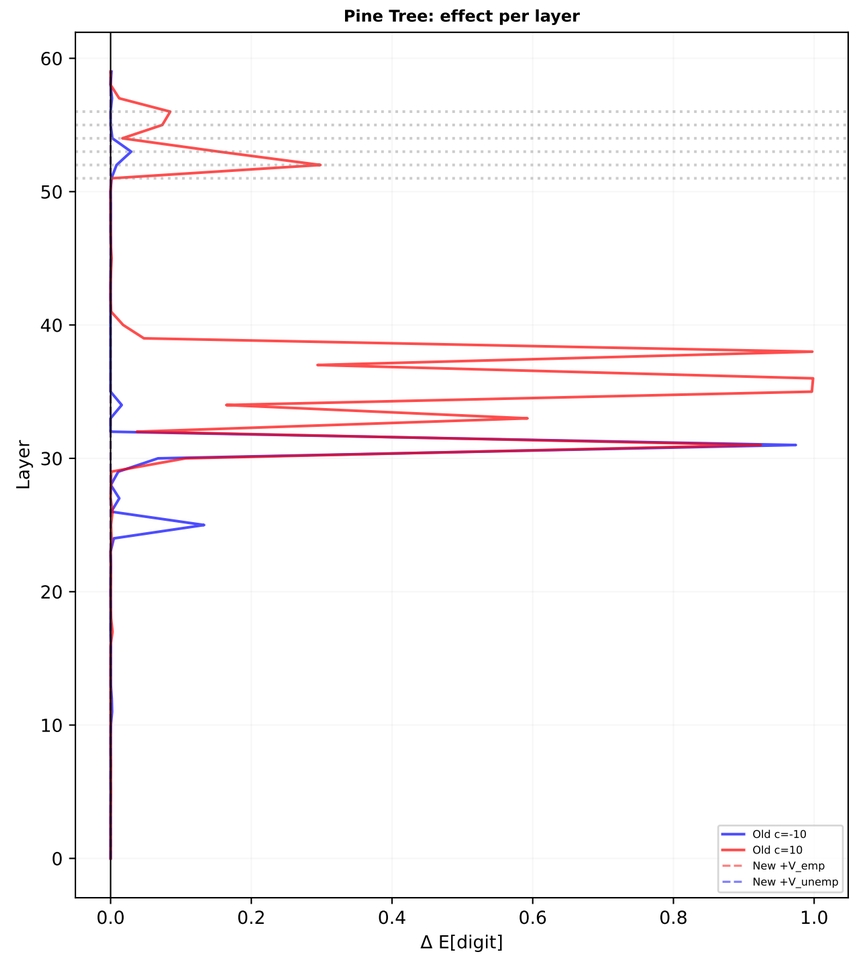


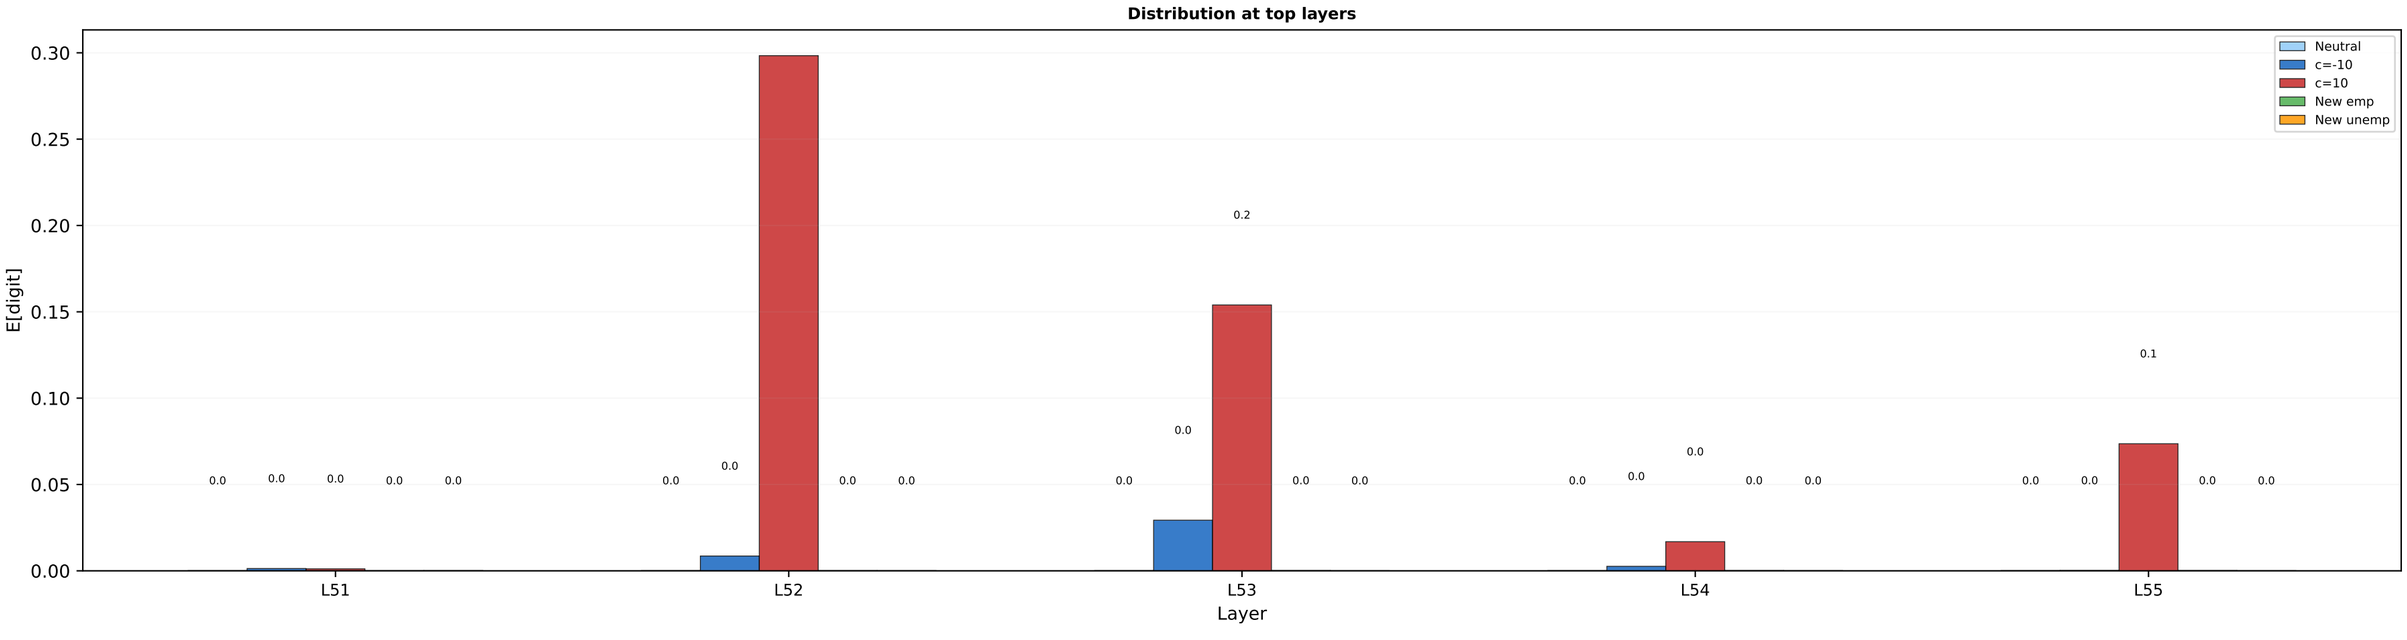


E8: Daytime home returns (Tue) | V8/cfg2

Answer with a single digit from 0 to 9. | How many times does a typical adult return home during the daytime (8 AM to 6 PM) on a Tuesday? ___ |

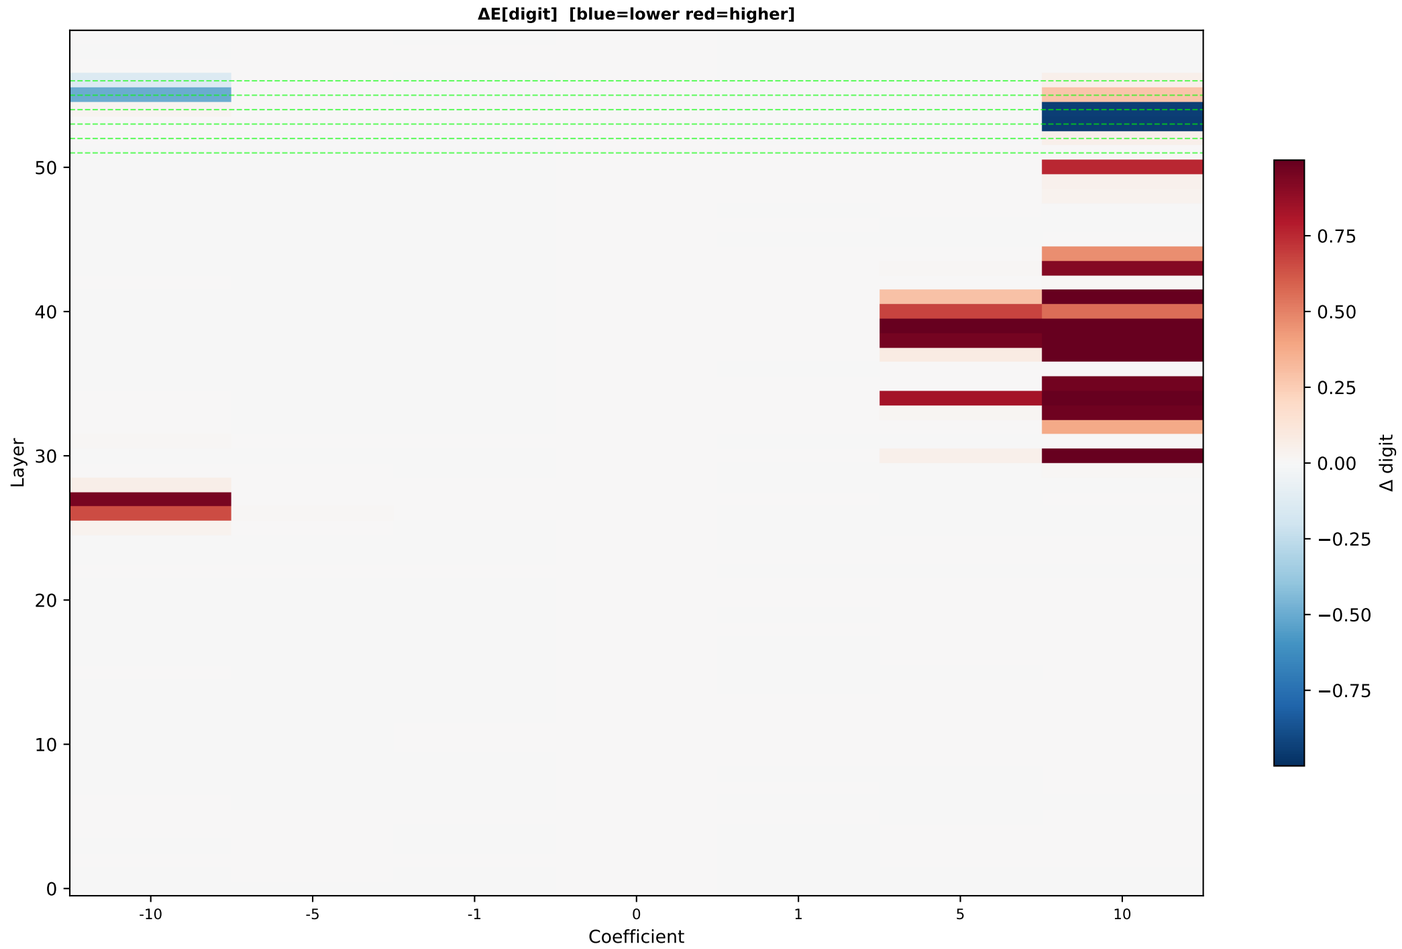


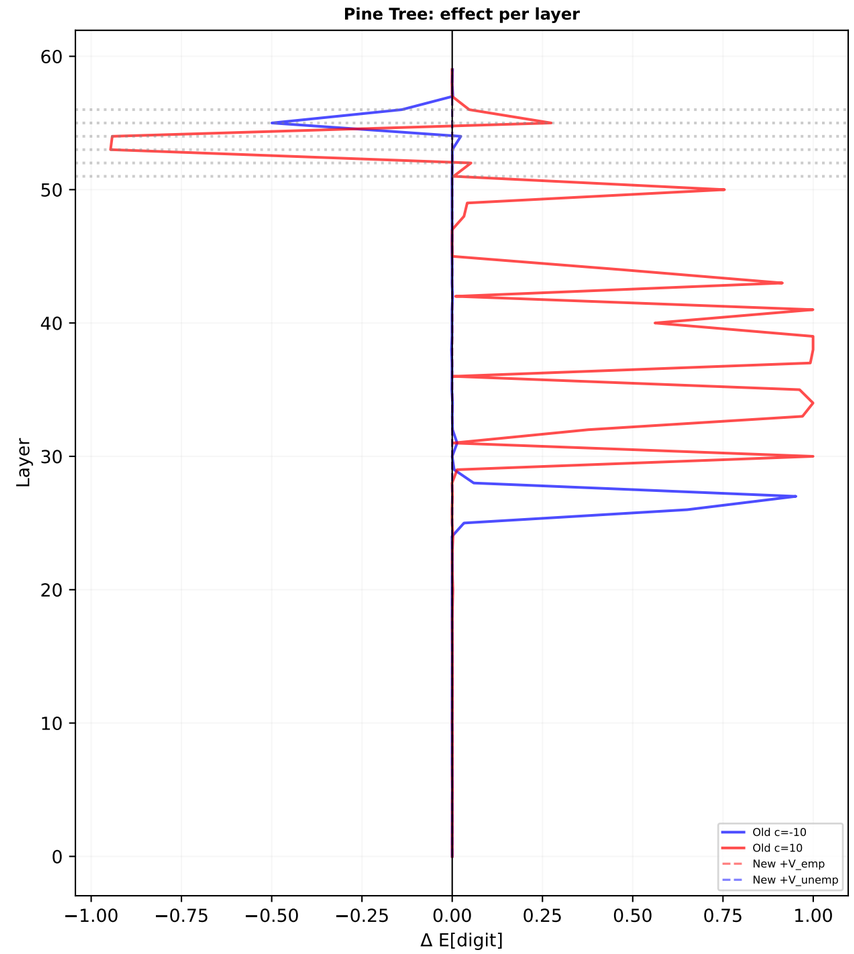


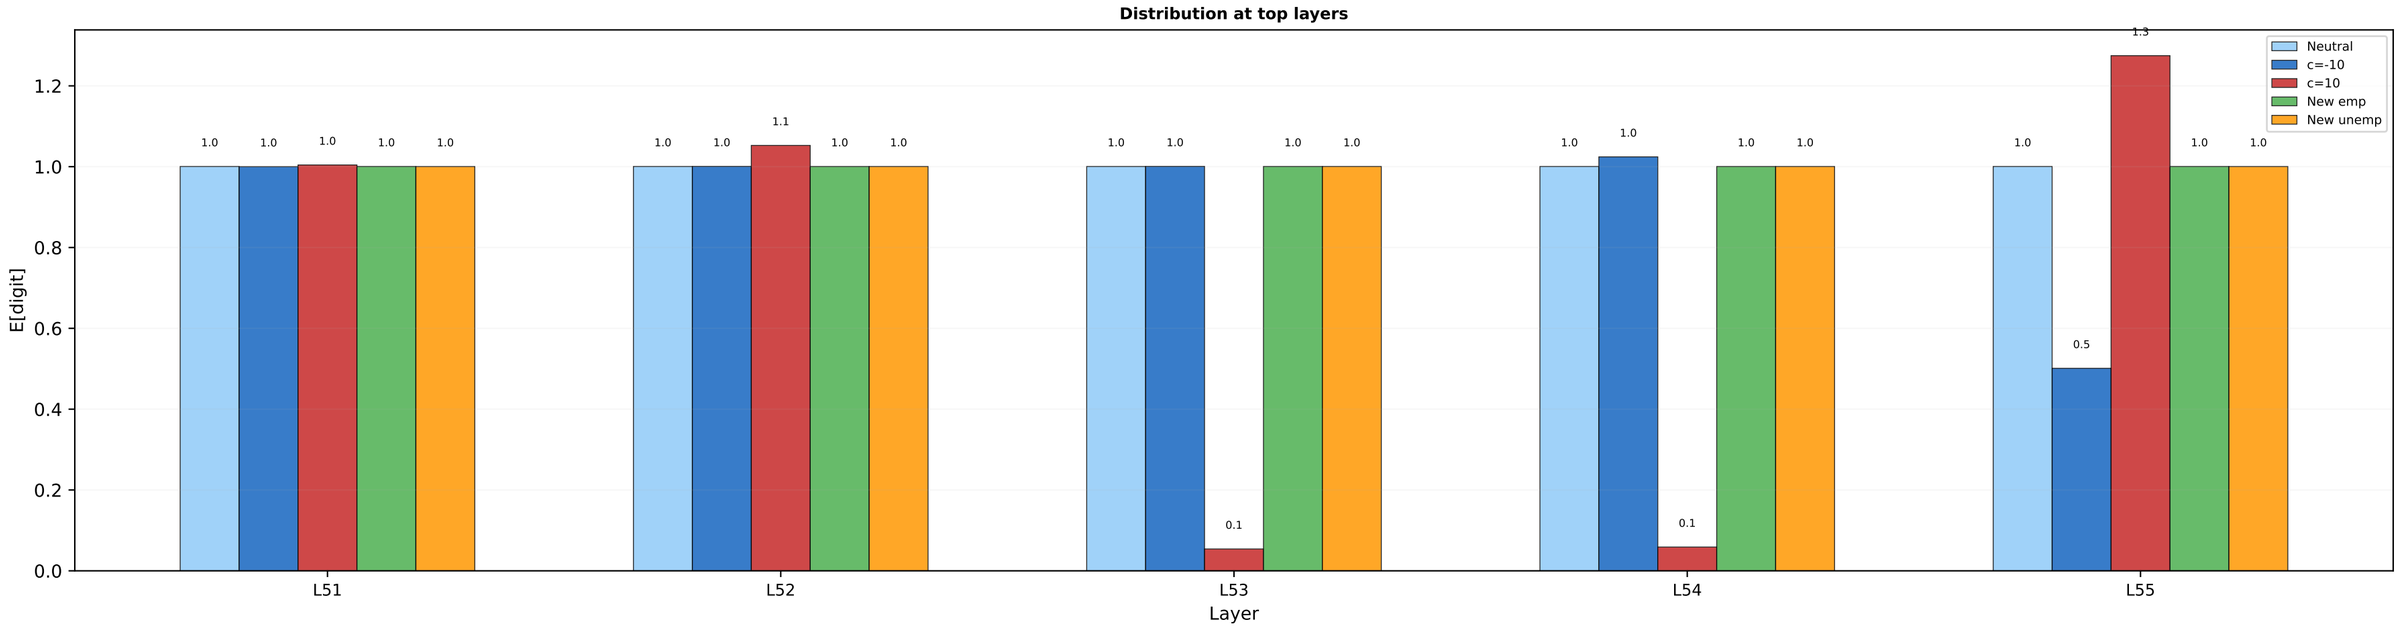


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend commuting or in transit on a Tuesday? ___ |

E9: Commute/transit hours (Tue) | V8/cfg2

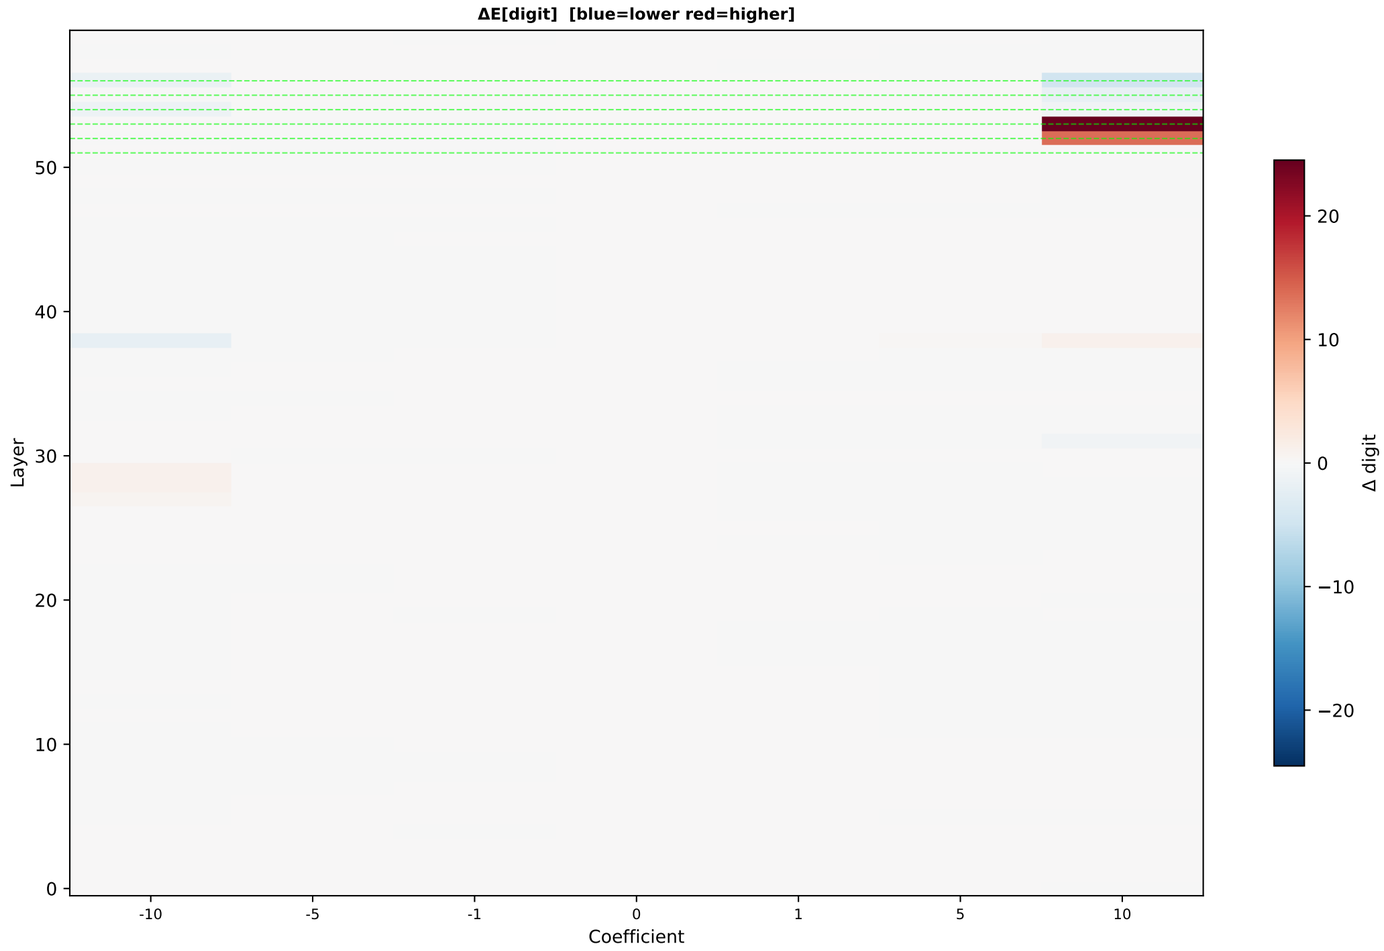


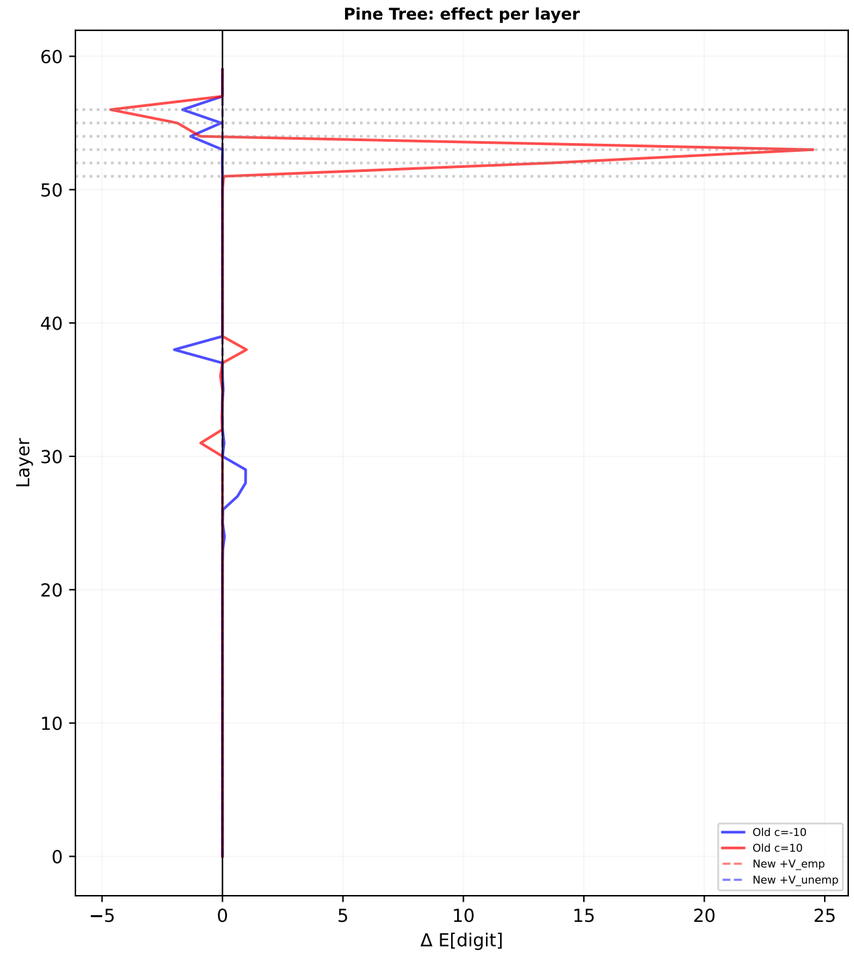


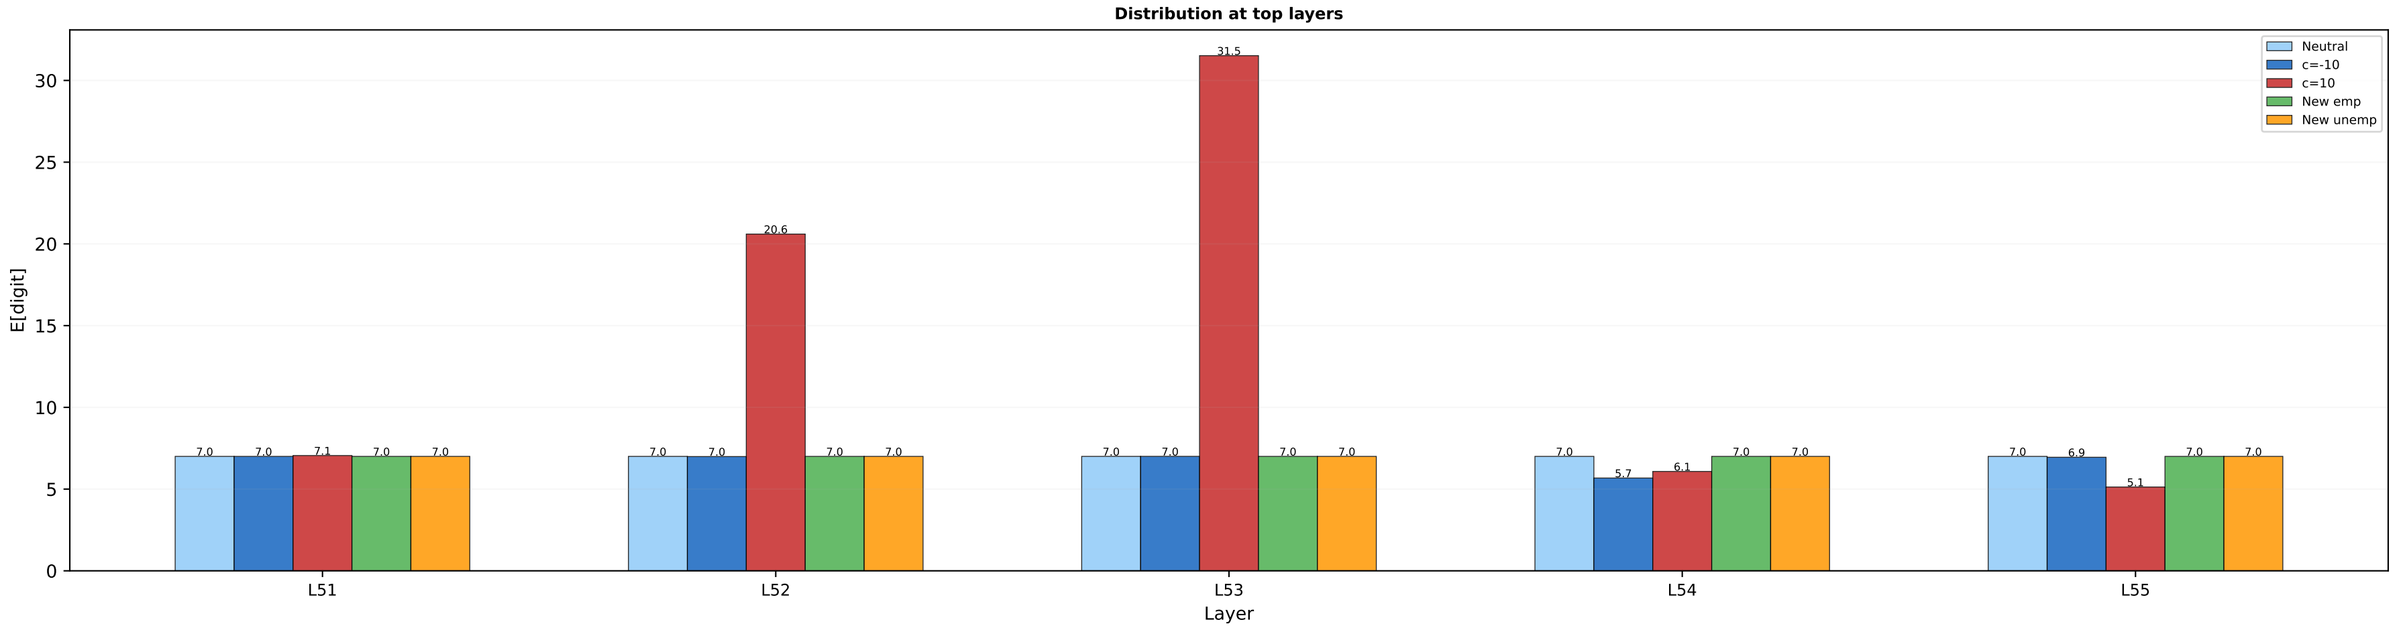


Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is a typical adult's Tuesday schedule from week to week? (0 = completely different, 9 = identical every week) ___ |

E10: Week-to-week consistency (Tue) | V8/cfg2

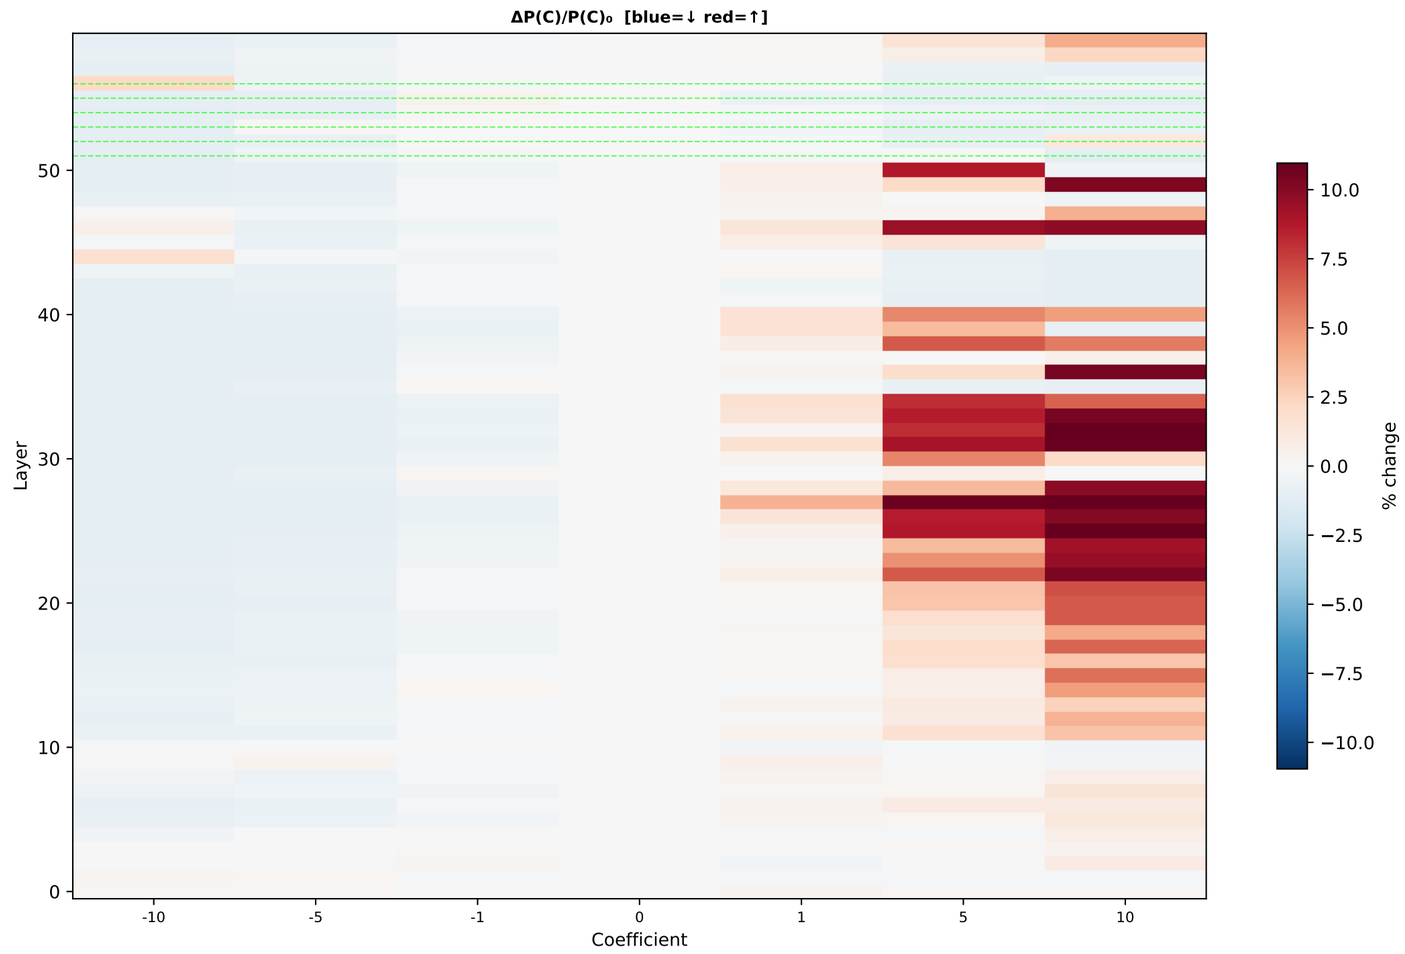


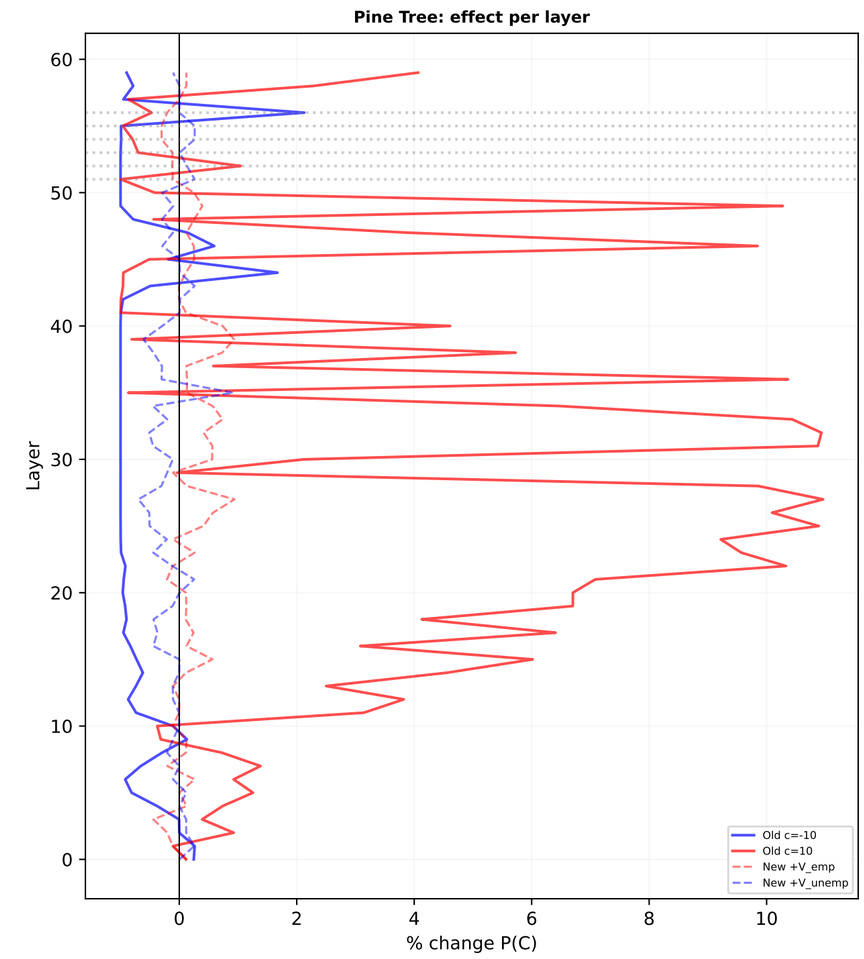


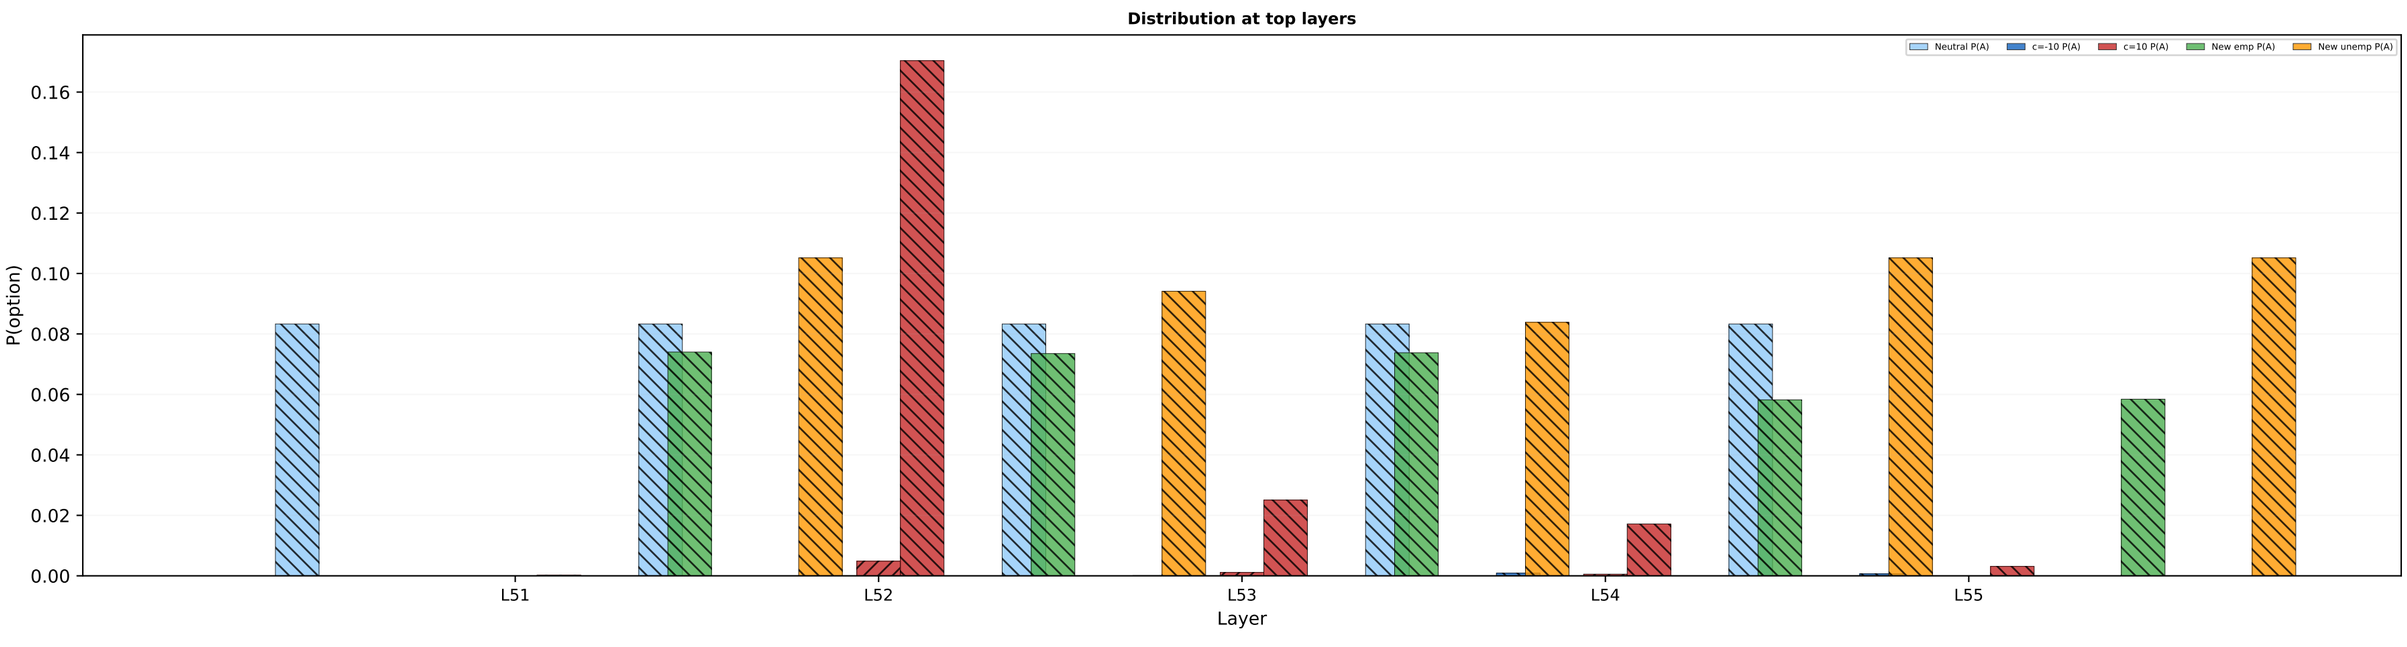


E11: 8 AM Tuesday status | V8/cfg2

At 8:00 AM on a Tuesday, a typical adult is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

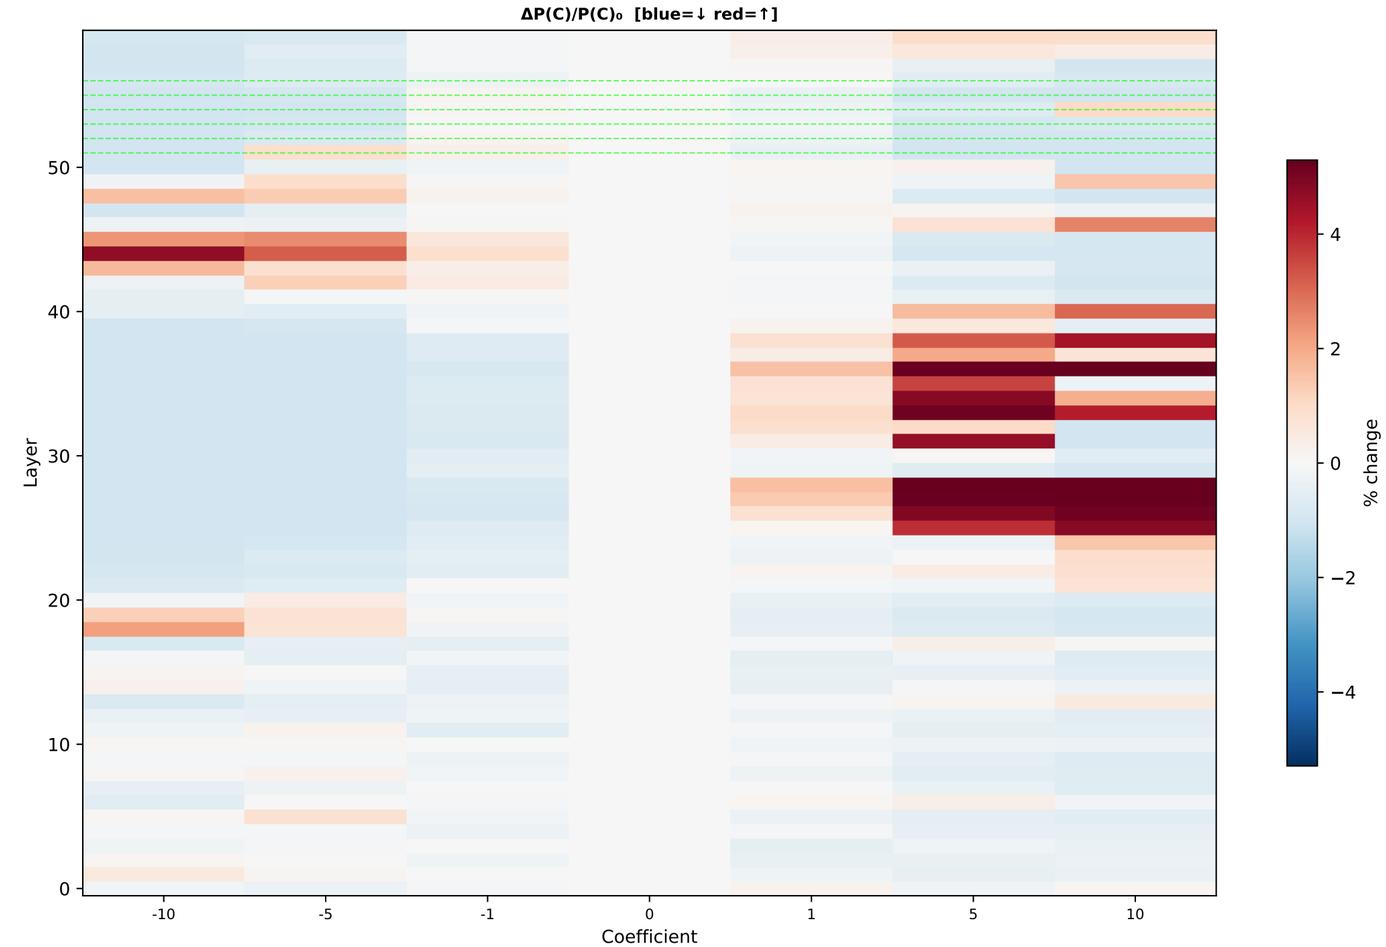


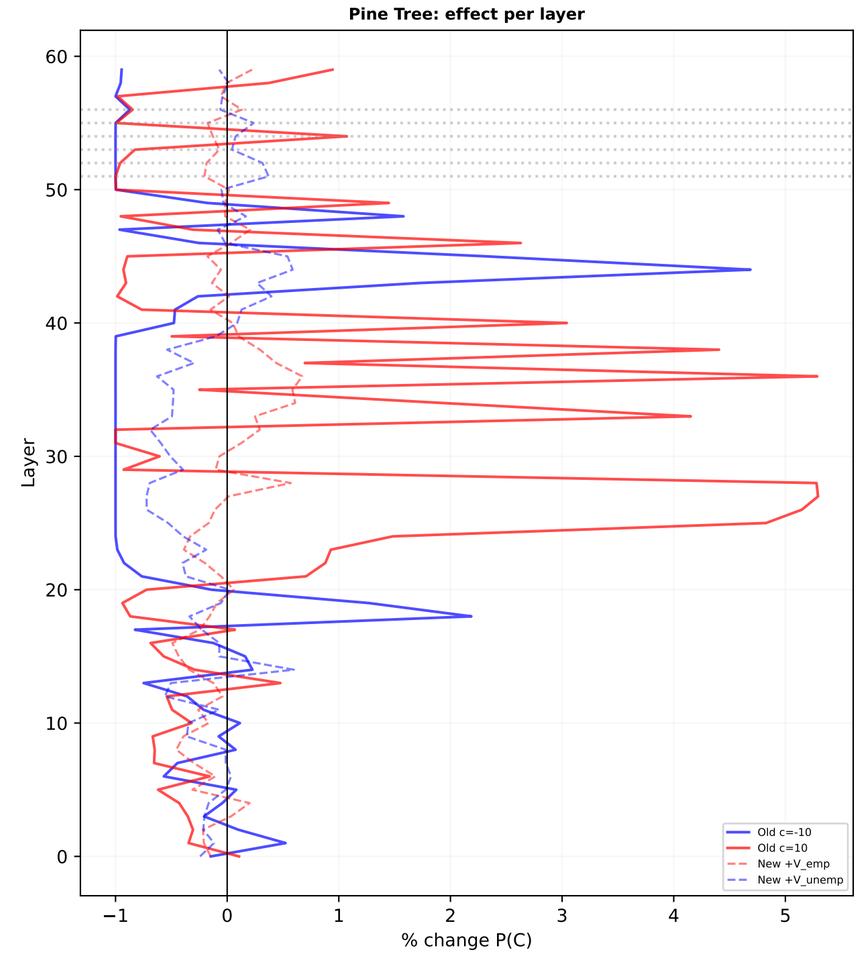


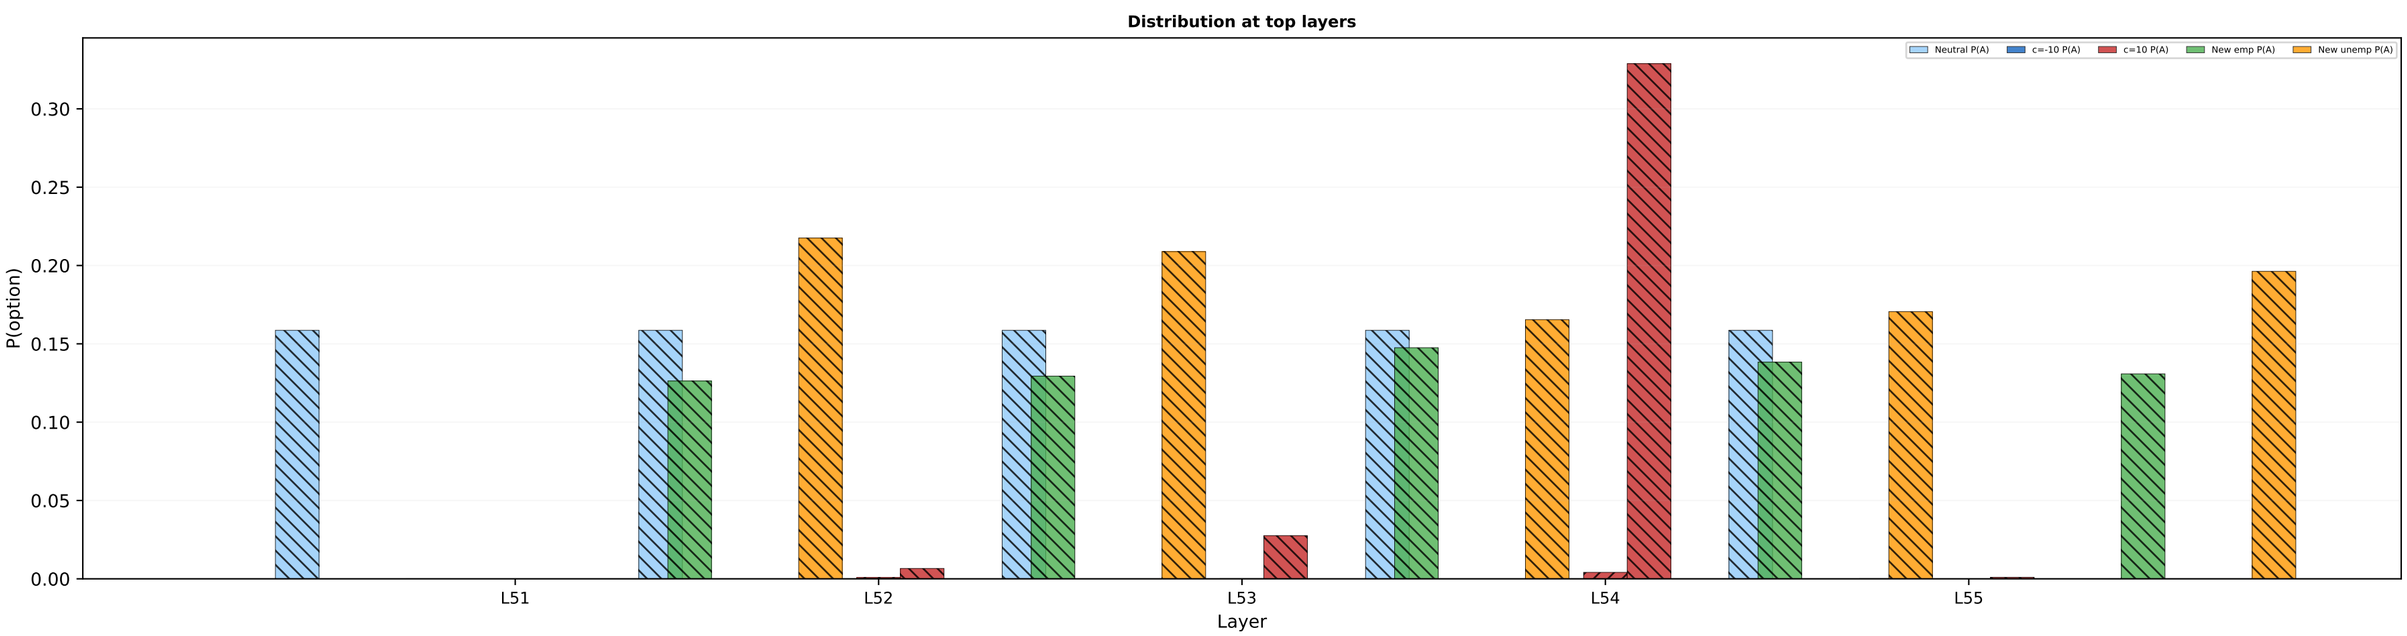


E12: 10:30 AM coffee availability | V8/cfg2

A typical adult is asked: "Are you usually free to meet for coffee at 10:30 AM on a Tuesday?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends on the week; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

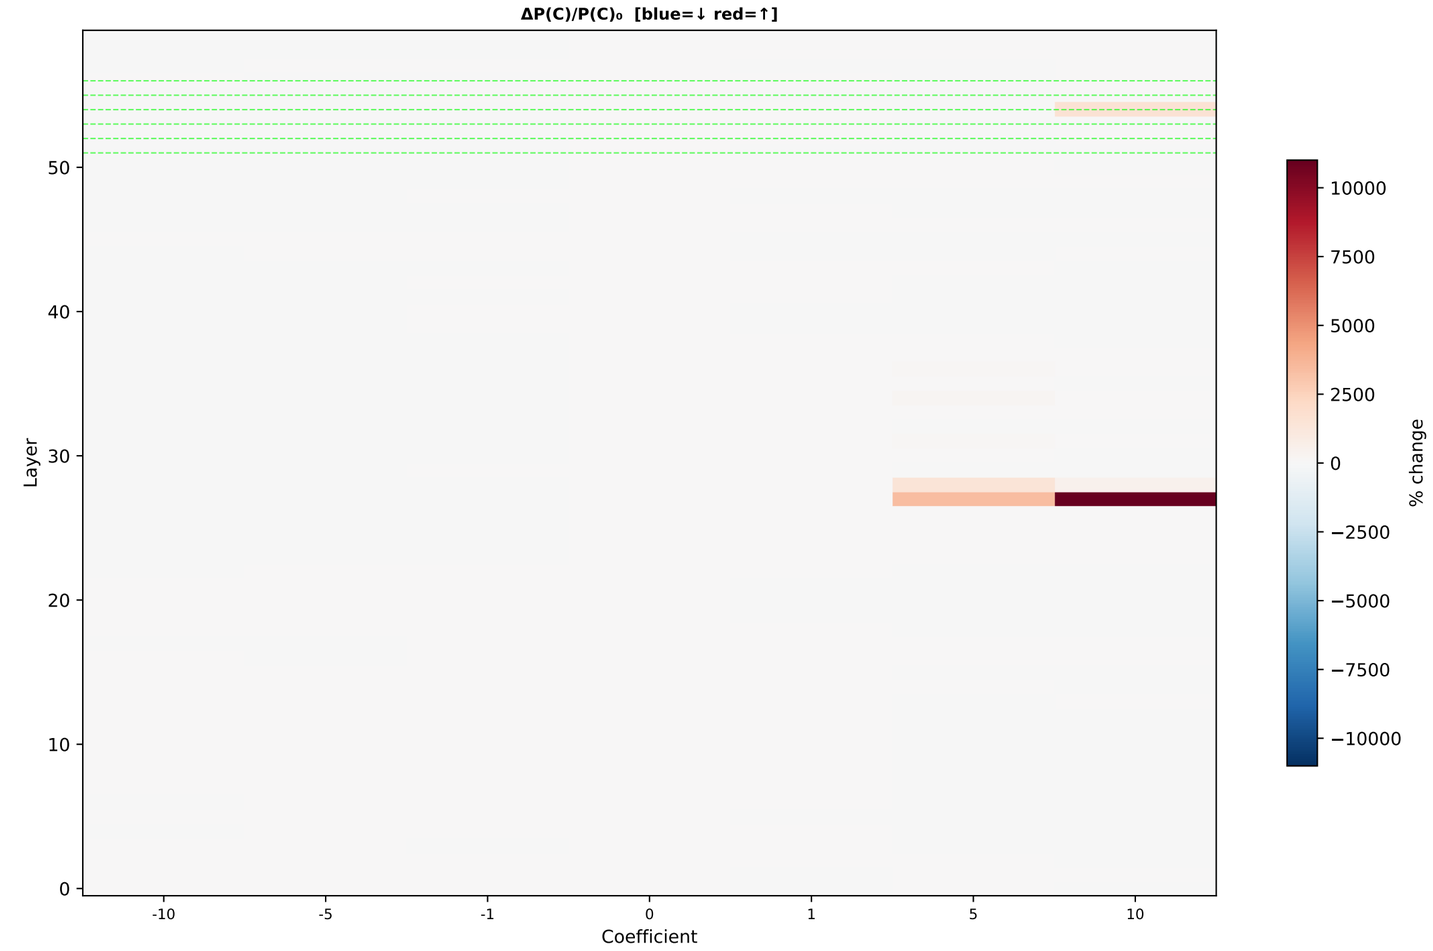


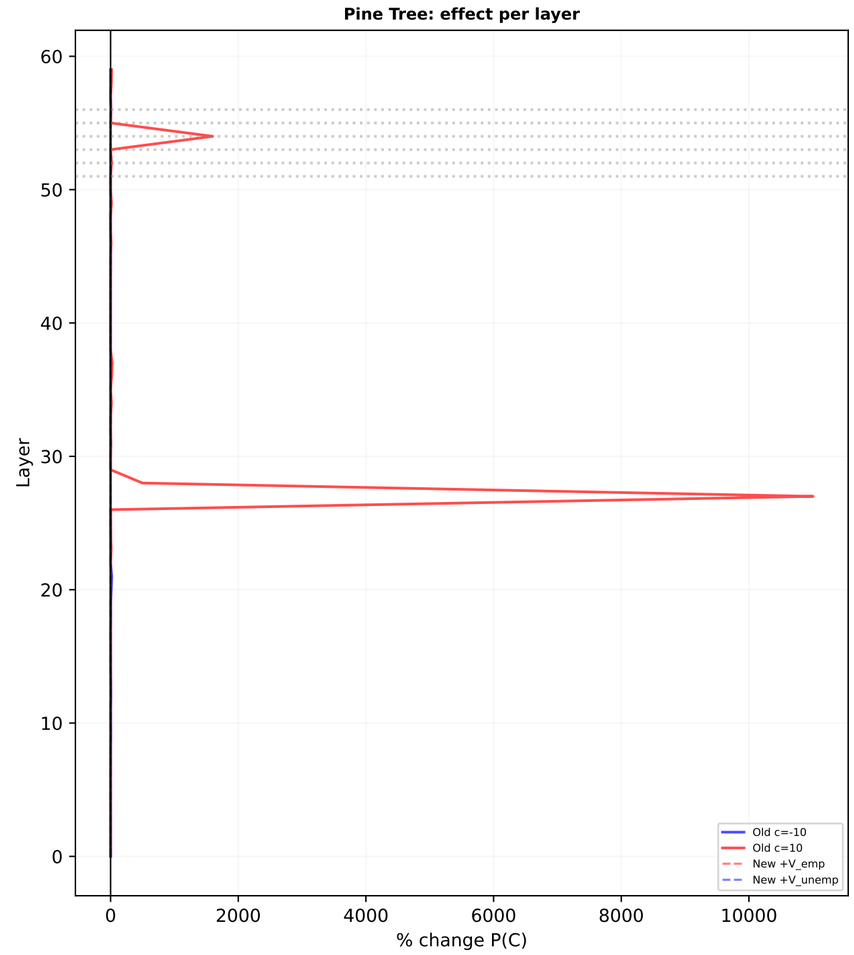


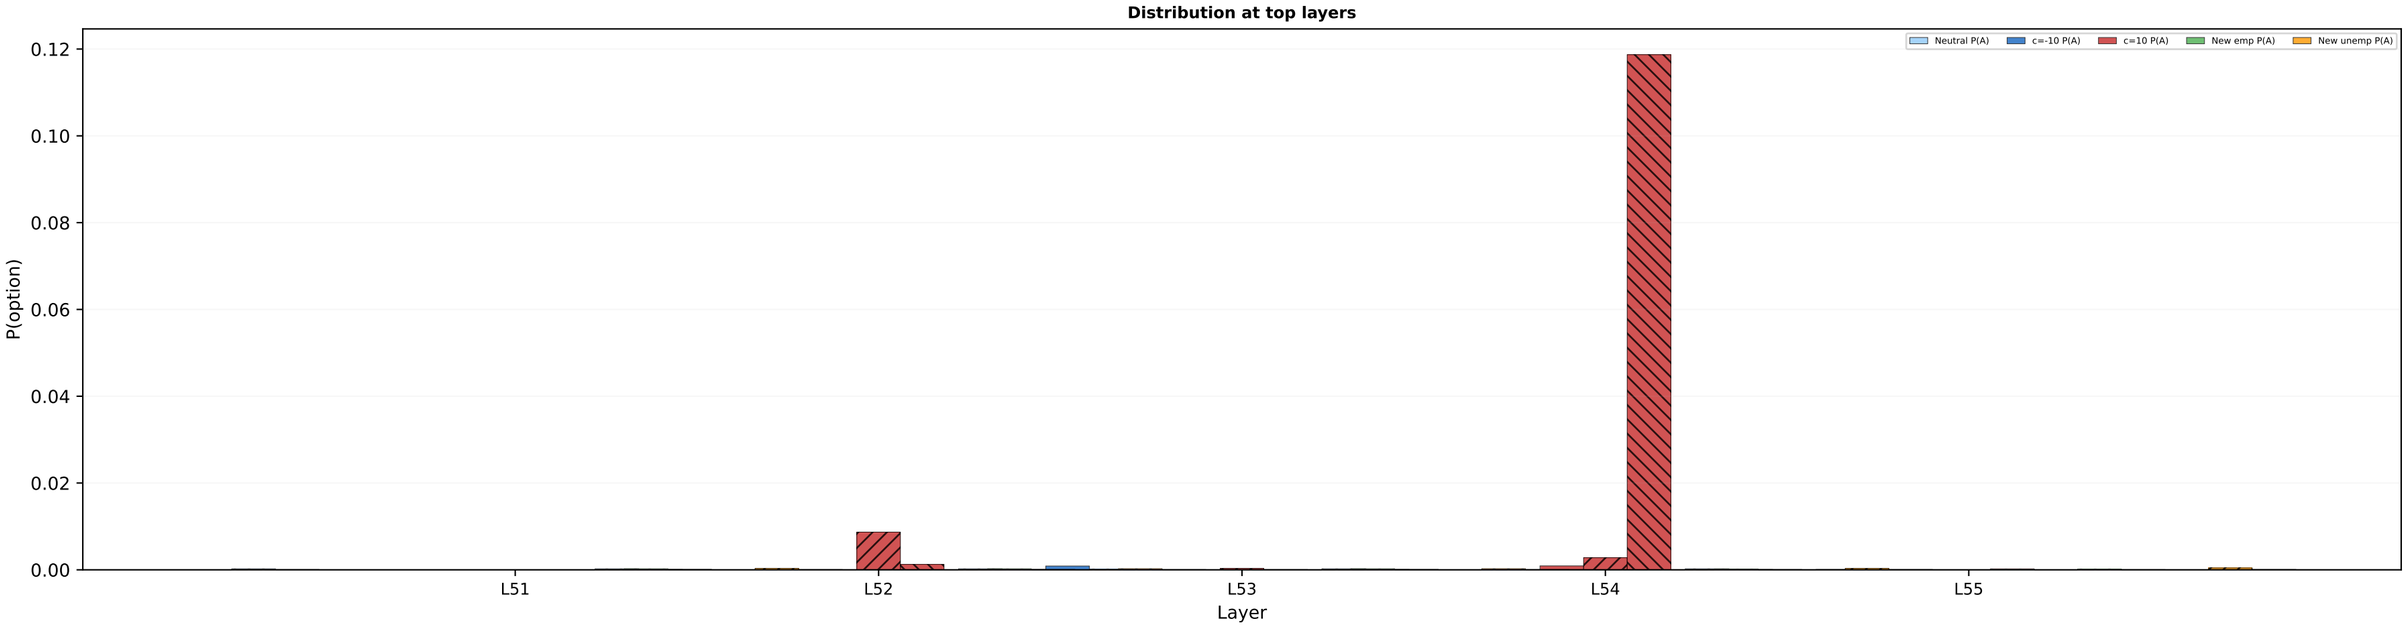


E13: Noon Tuesday availability | V8/cfg2

A typical adult is asked: "Can you meet me for lunch at noon on a Tuesday?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

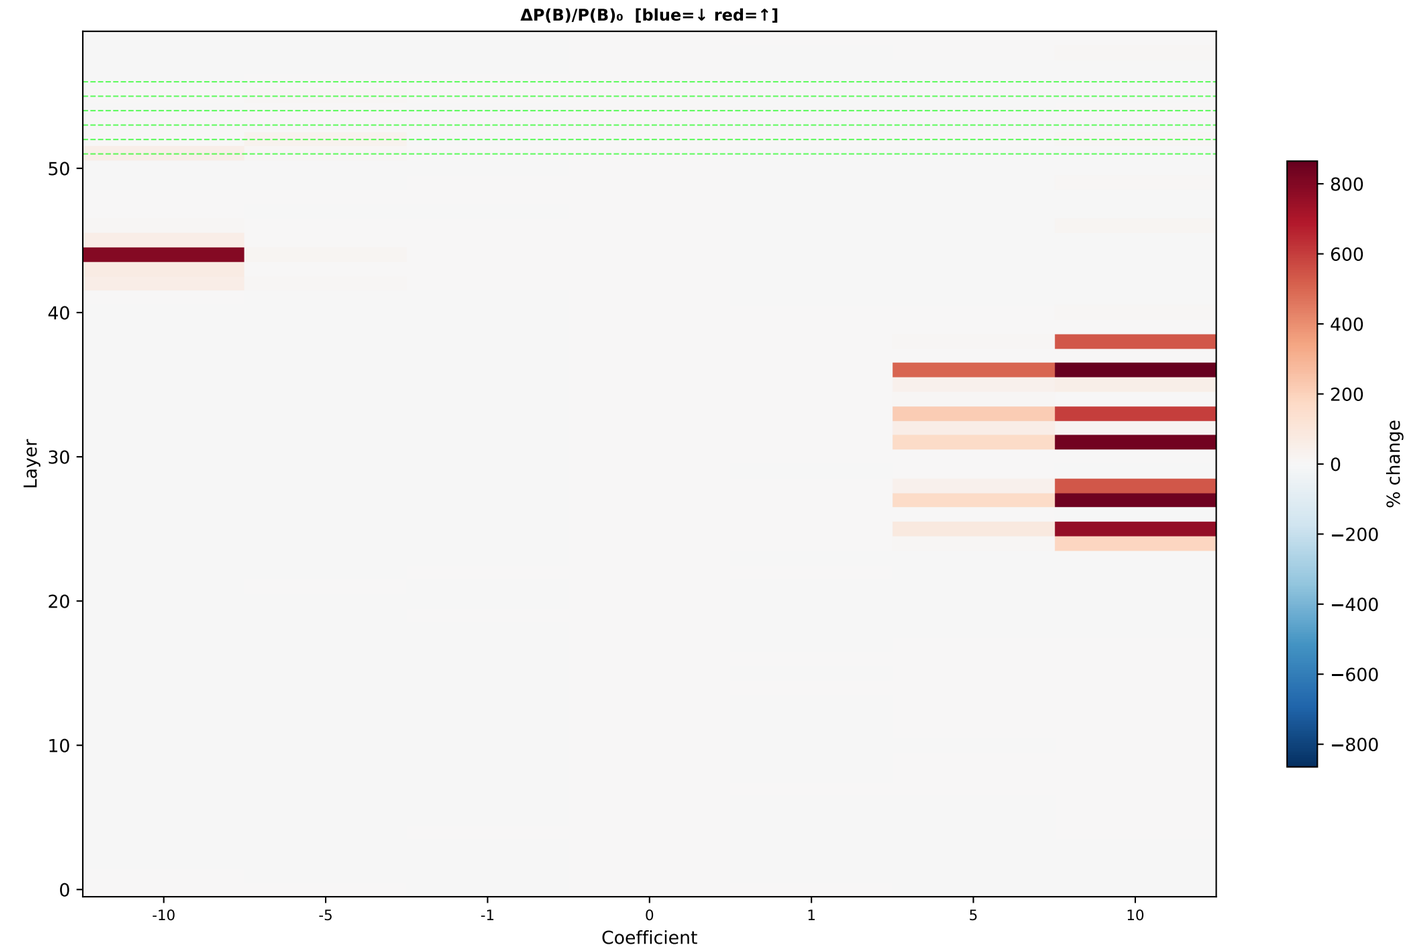


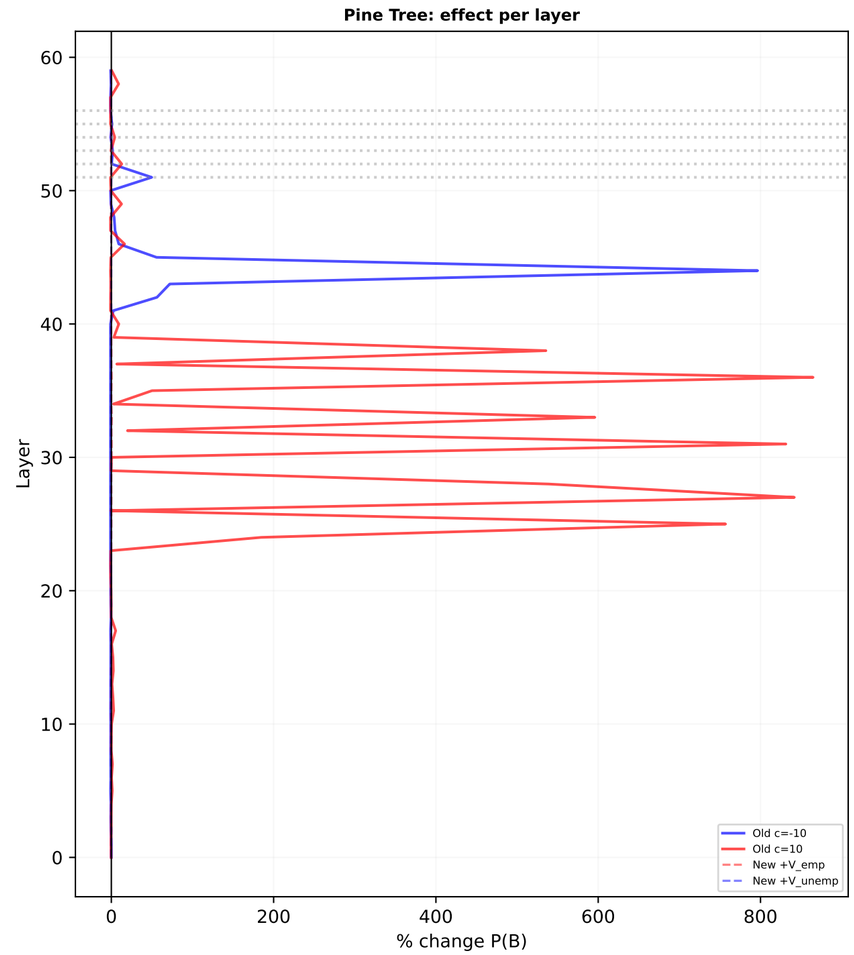


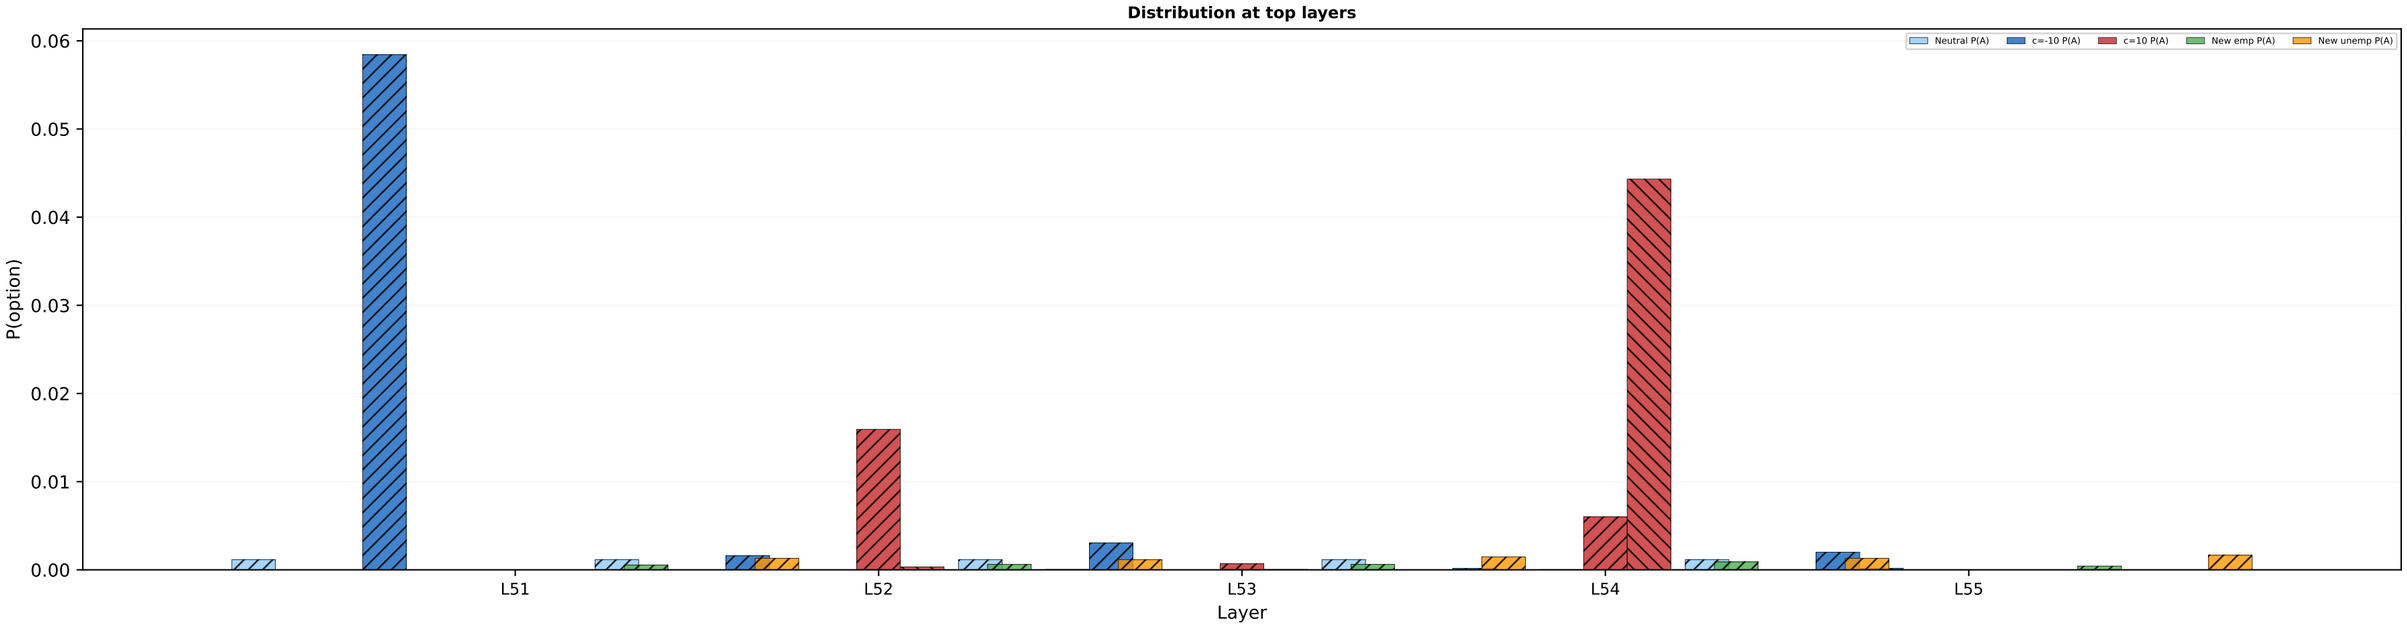


E14: 1 PM Tuesday availability | V8/cfg2

If you wanted to visit a typical adult at 1 PM on a Tuesday, which reply would be most likely? | (A) "I am usually at home around then." | (B) "I am usually at a regular daytime commitment then." | (C) "It varies; I might be in different places." | Answer: (

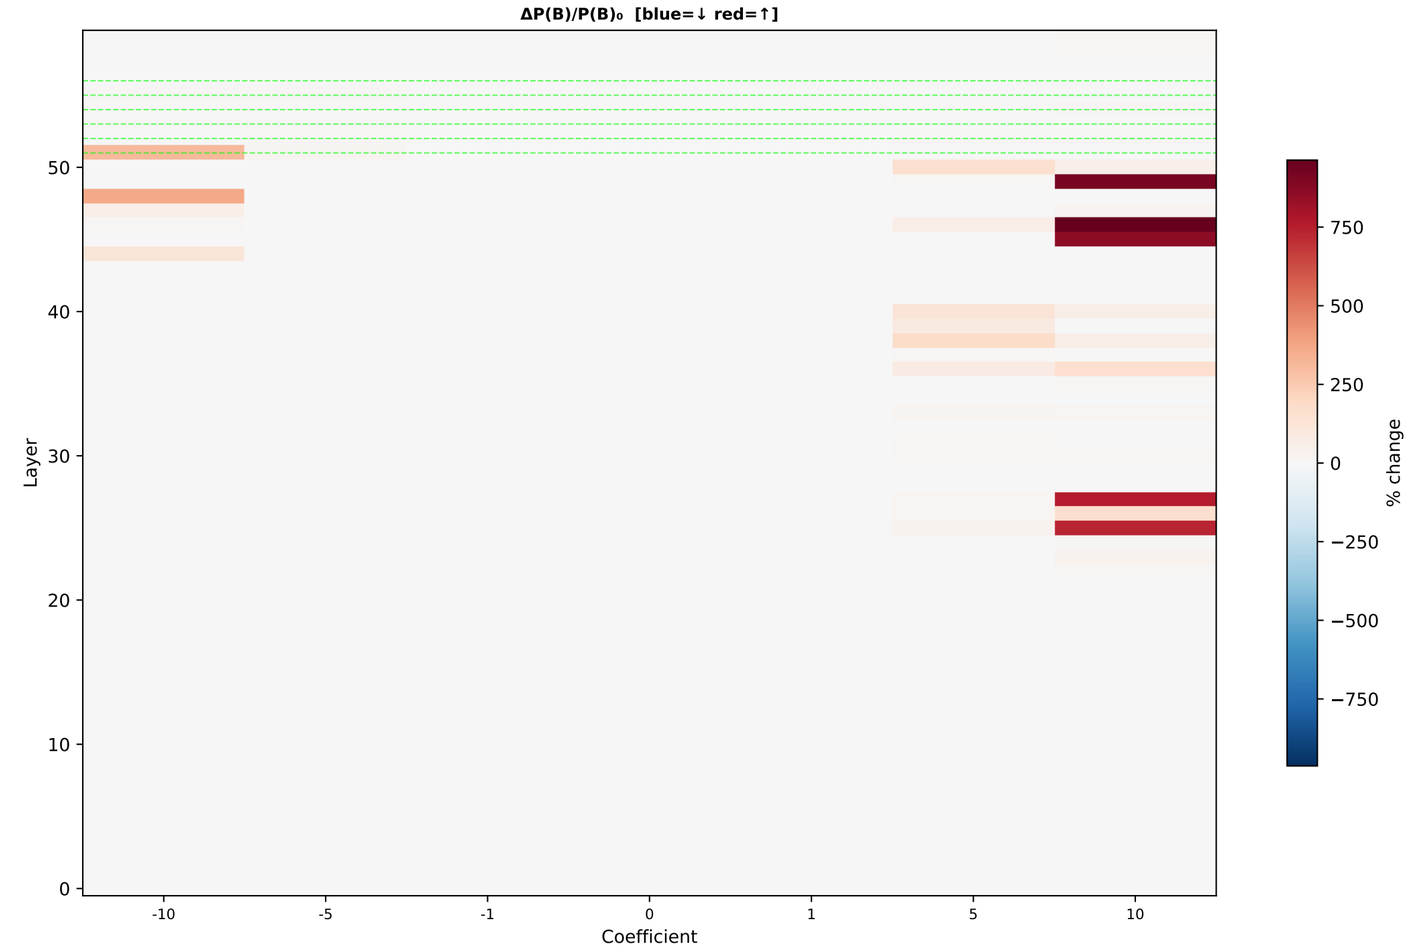


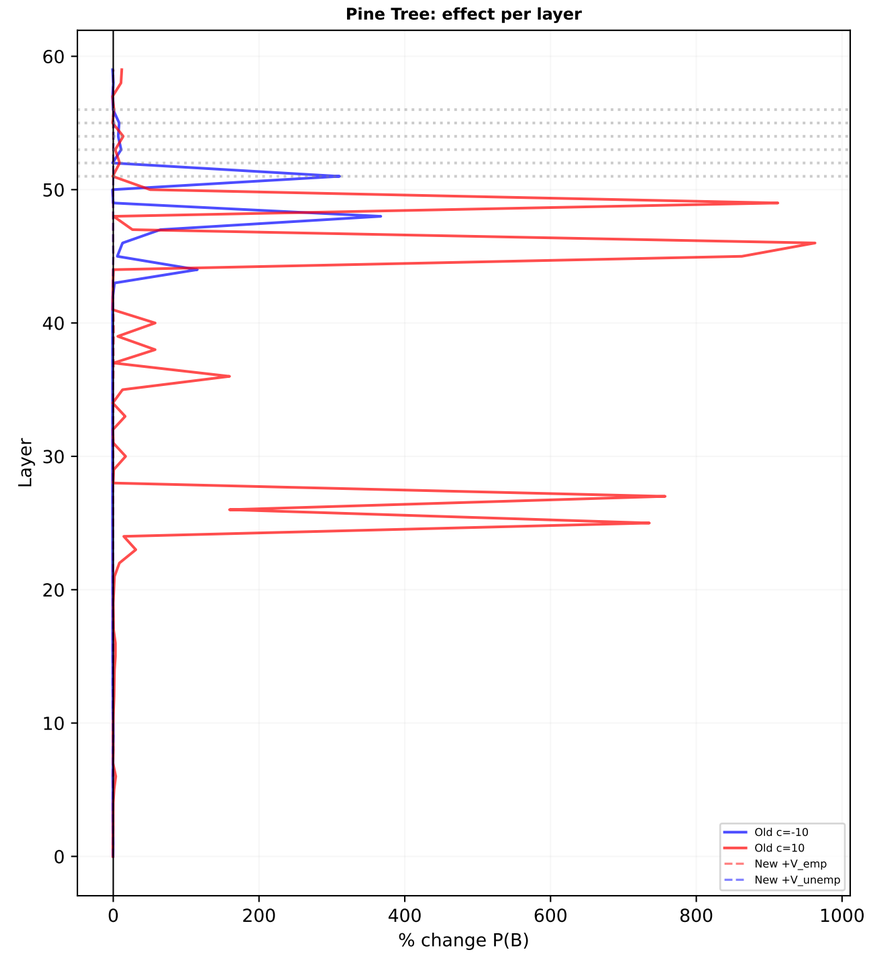


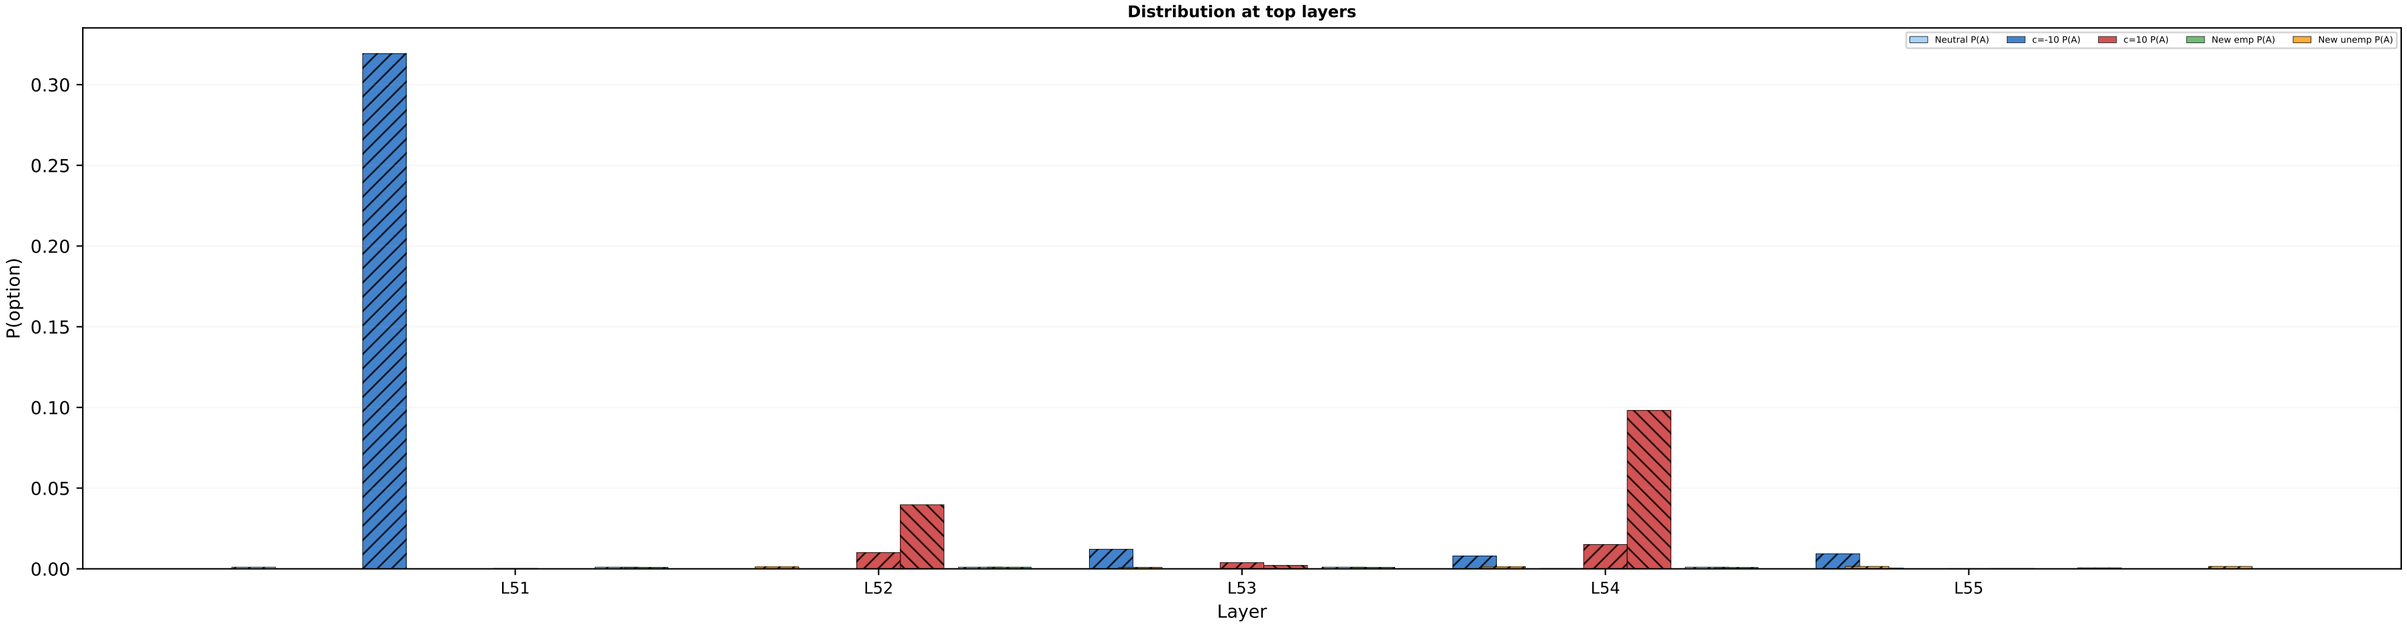


E15: 3 PM Tuesday location | V8/cfg2

At 3:00 PM on a Tuesday, a typical adult is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

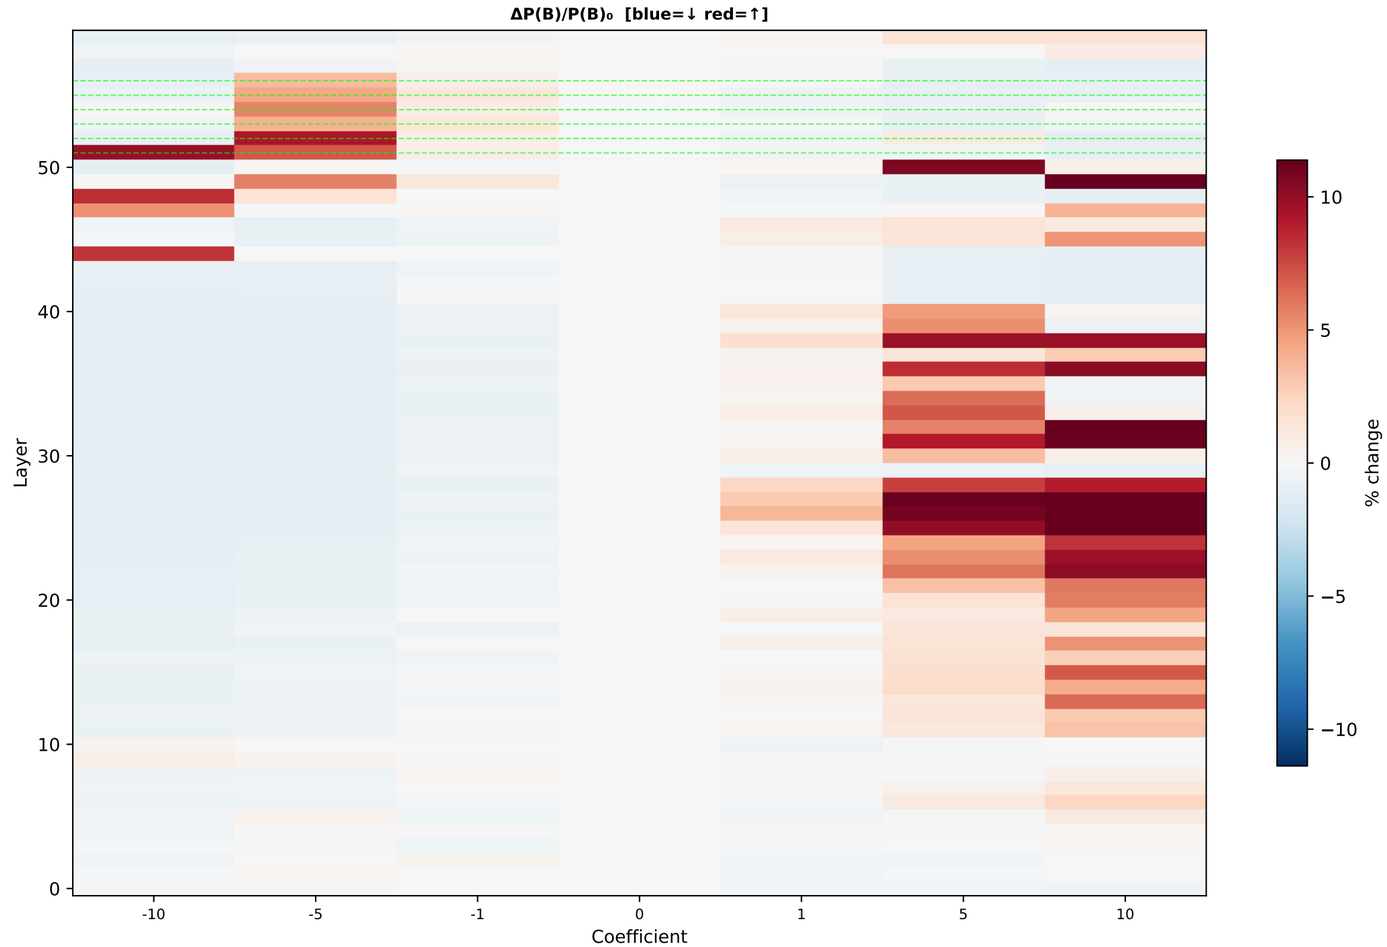


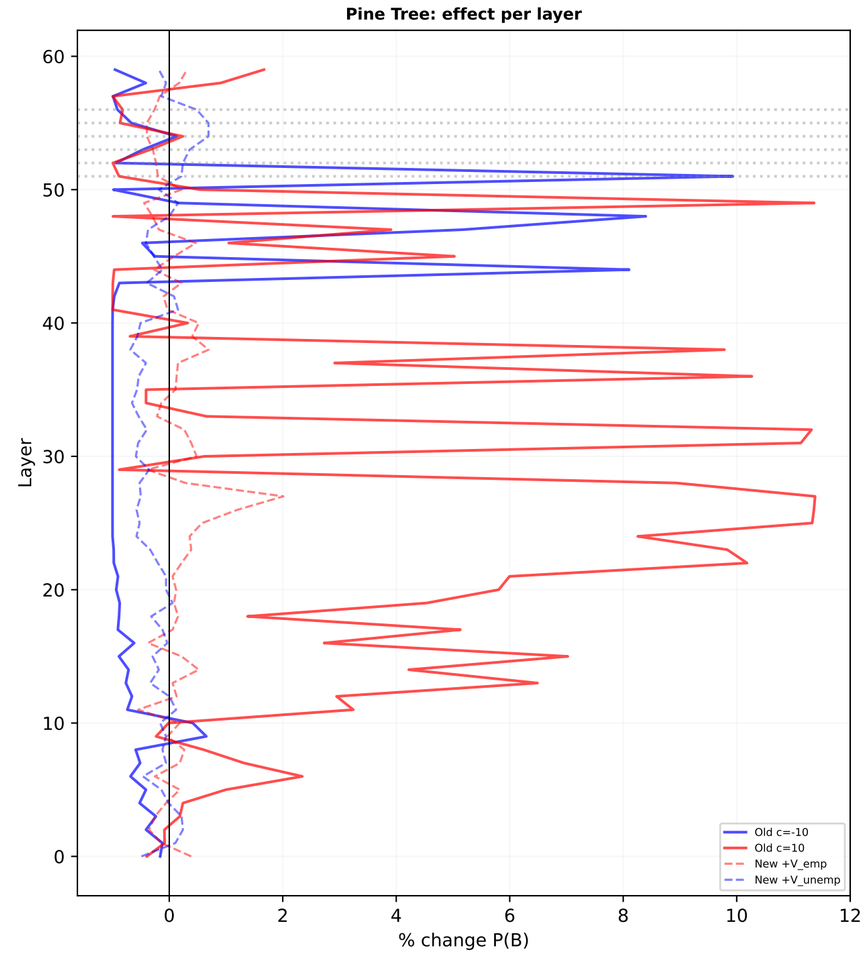


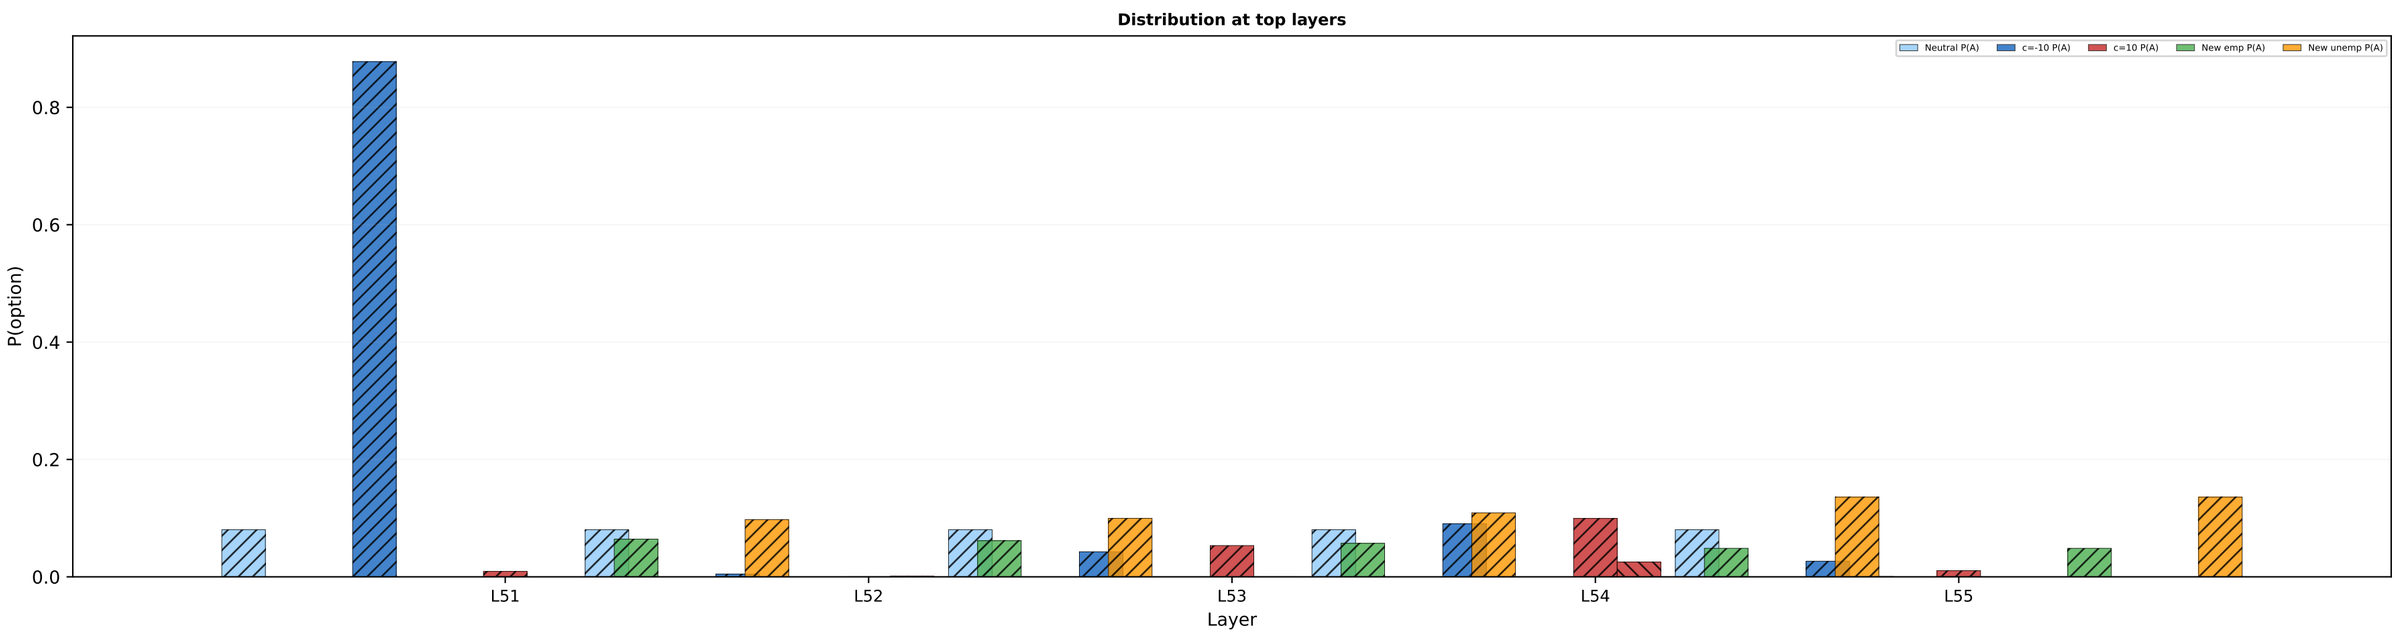


E16: 5 PM Tuesday status | V8/cfg2

At 5:00 PM on a Tuesday, a typical adult is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

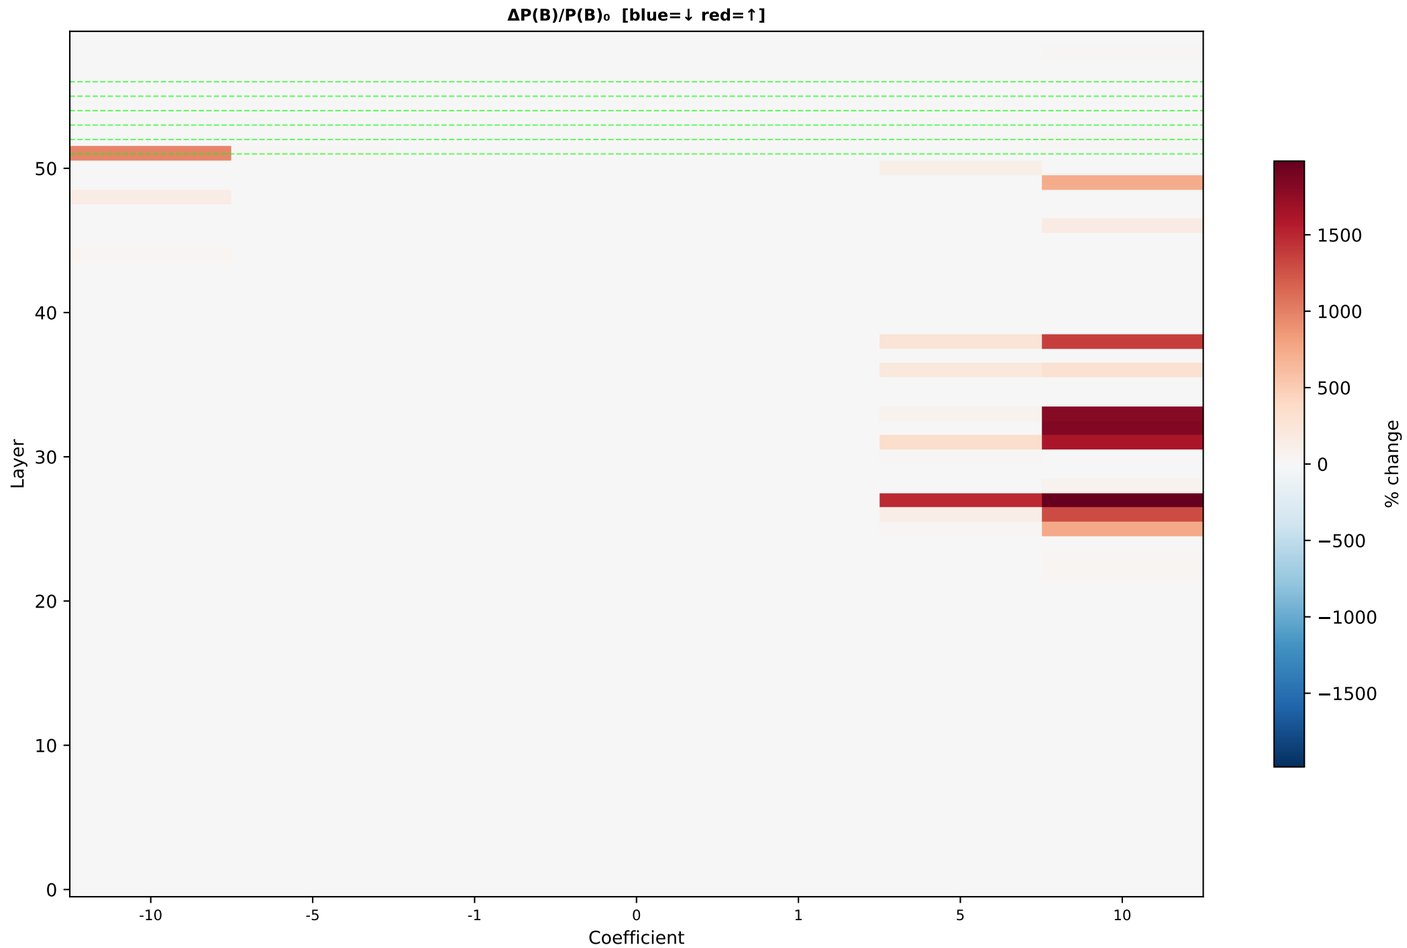


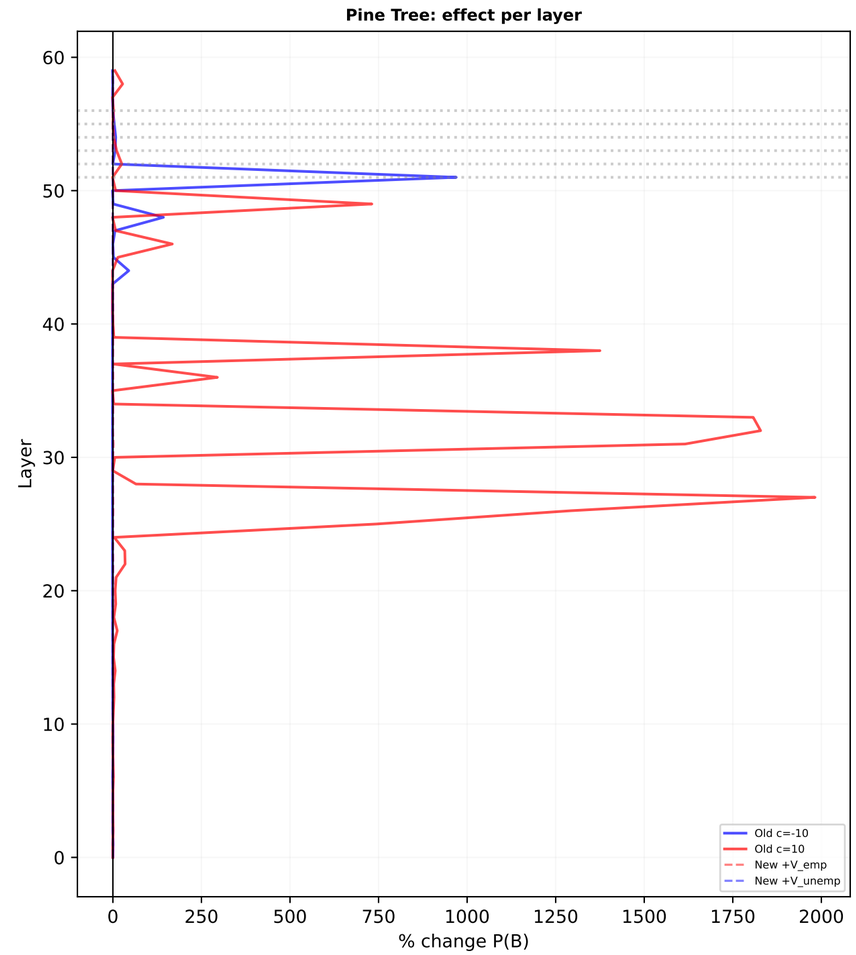


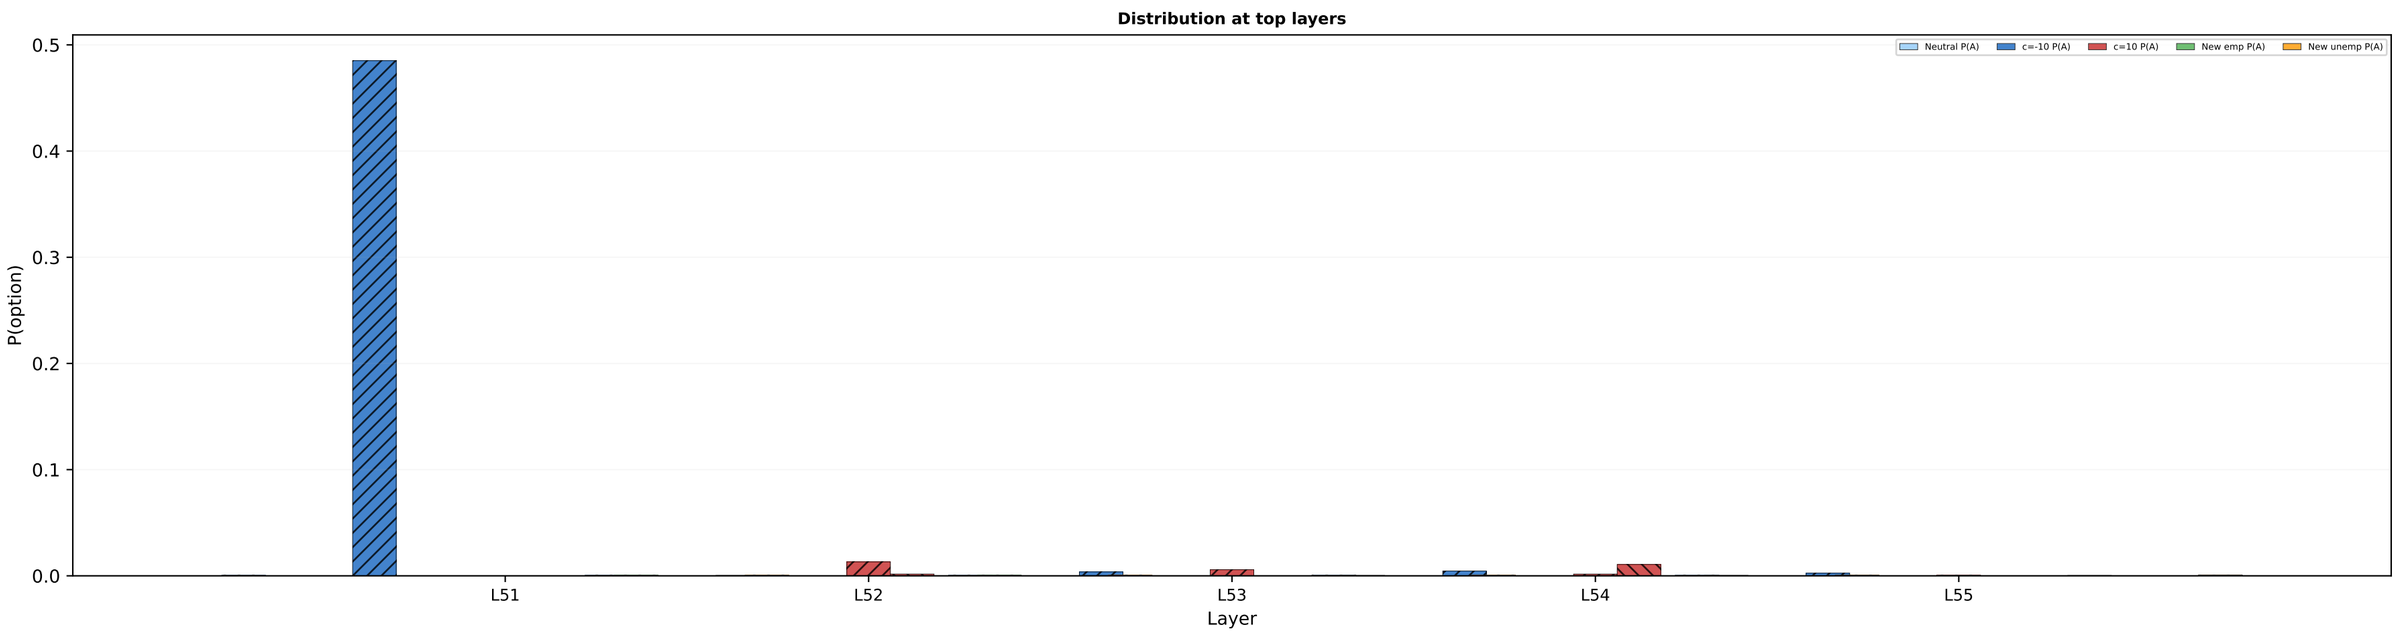


E17: 7 PM Tuesday status | V8/cfg2

At 7:00 PM on a Tuesday, a typical adult is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

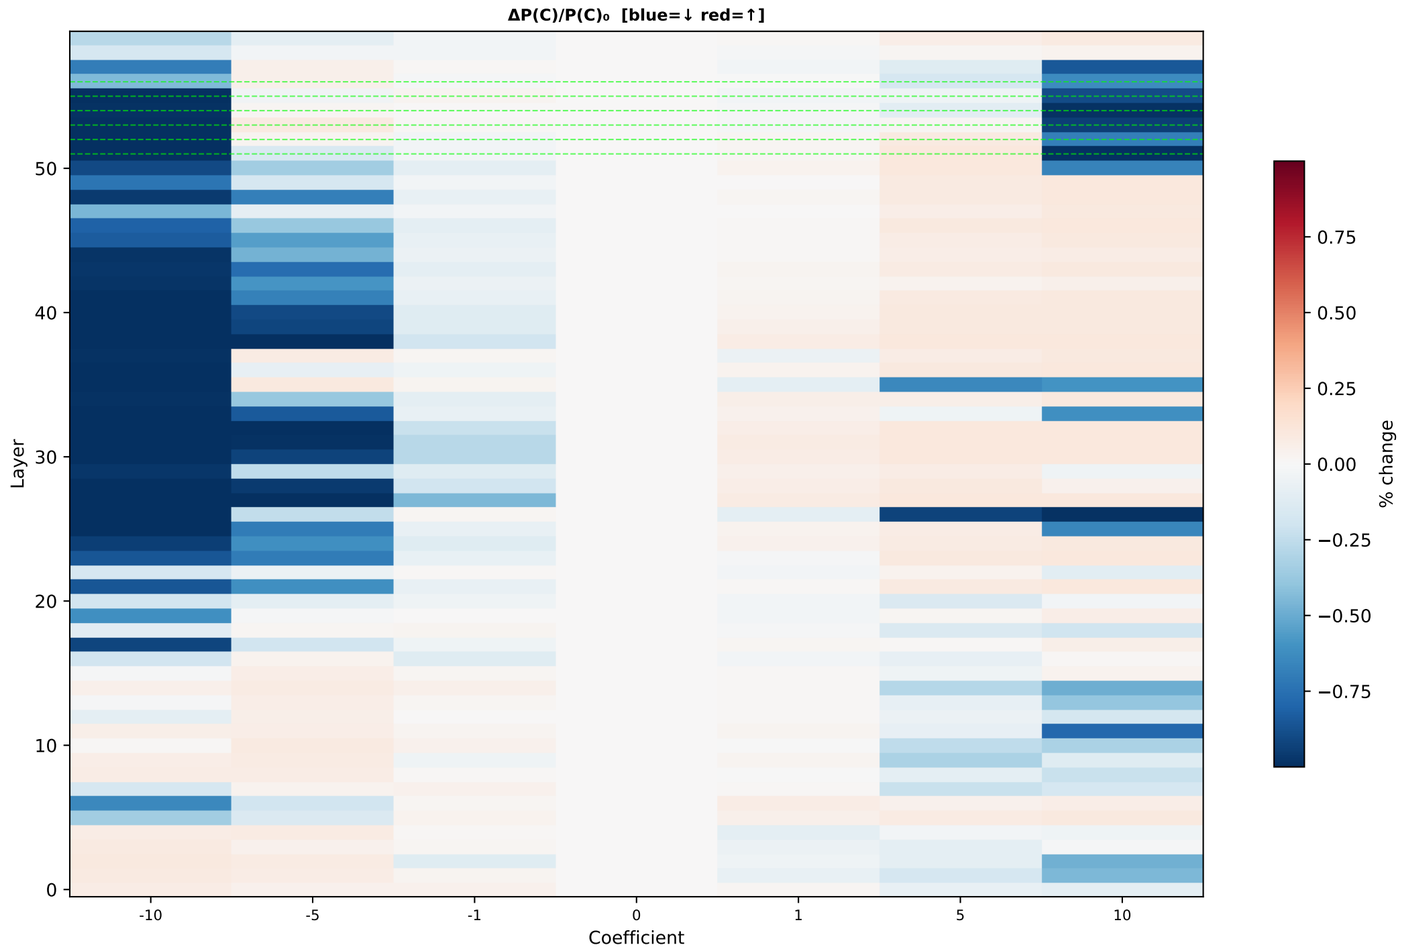


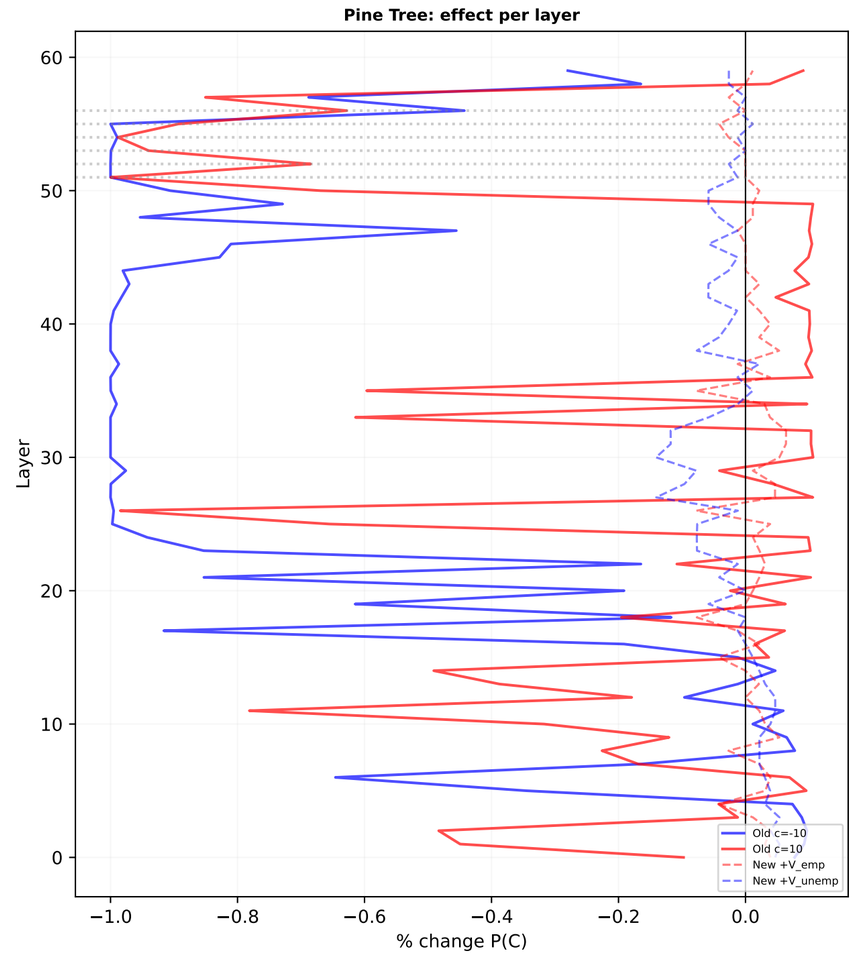


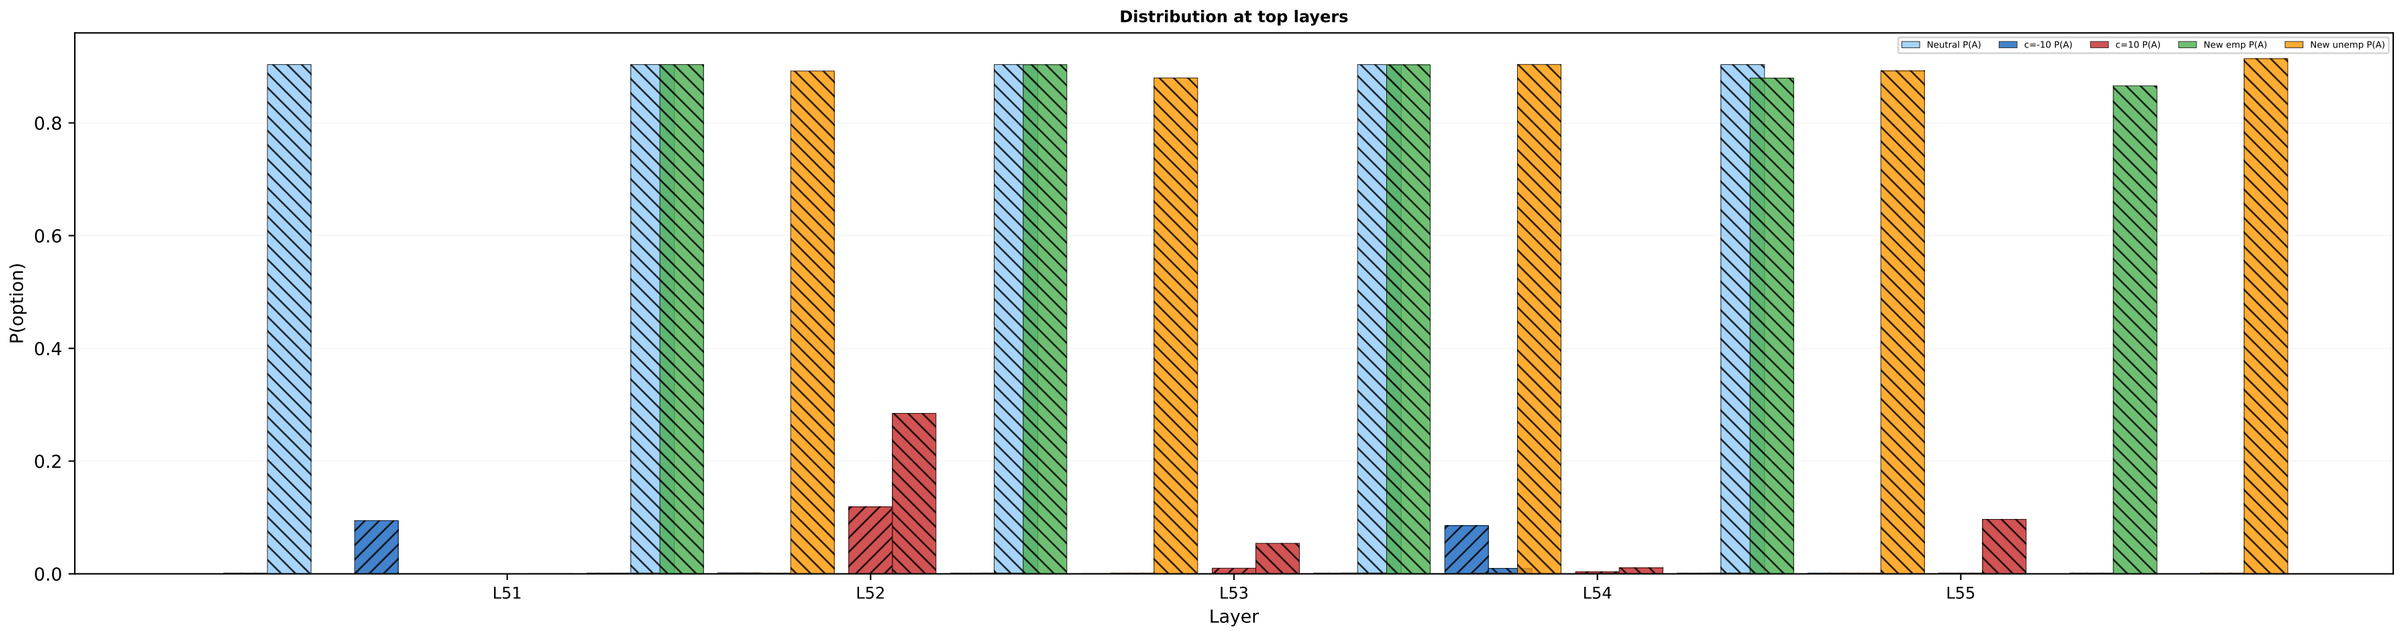


E18: Alarm clock habit (Tue) | V8/cfg2

Does a typical adult use an alarm clock on Tuesday mornings? | (A) No, they wake up naturally whenever they feel like it | (B) Sometimes, depending on whether they have plans | (C) Yes, they set an alarm at the same time every Tuesday | Answer: (

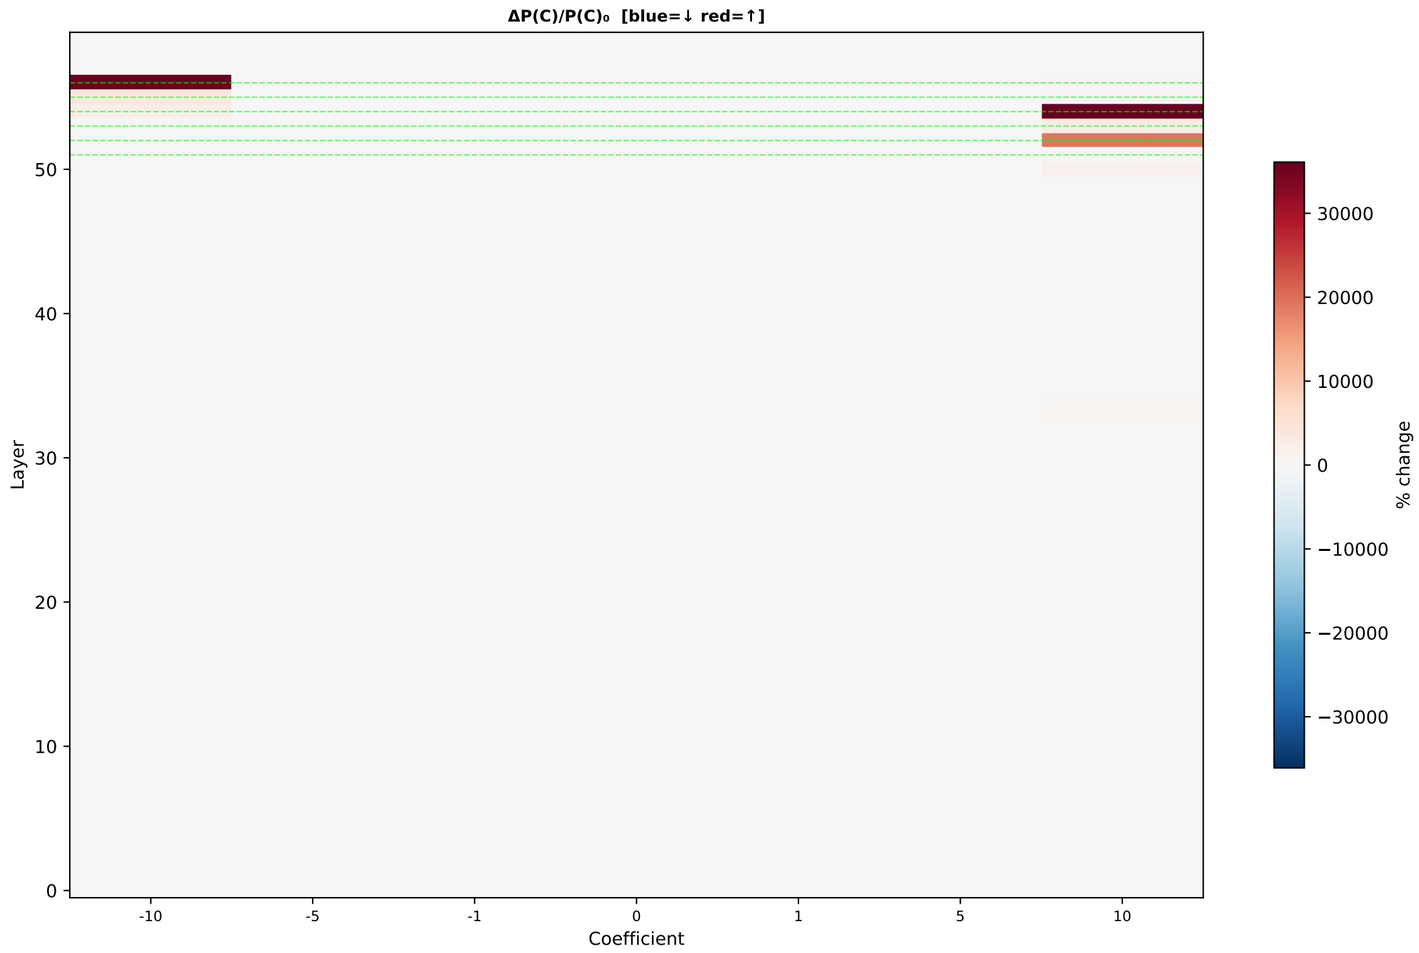


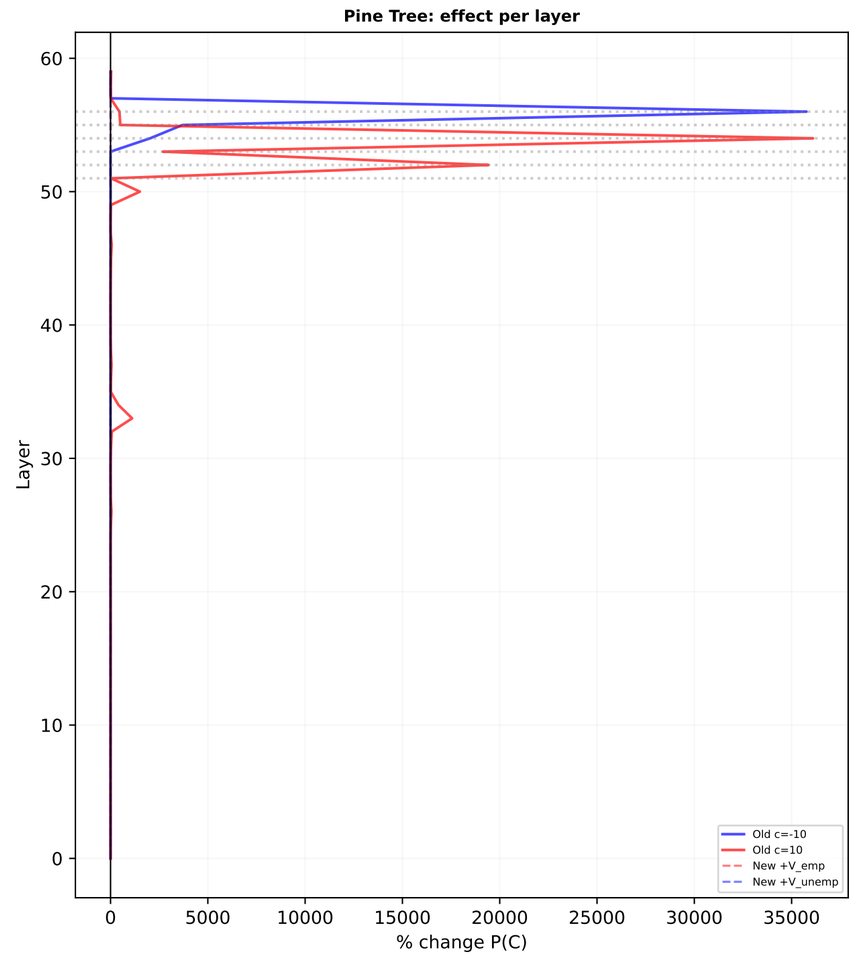


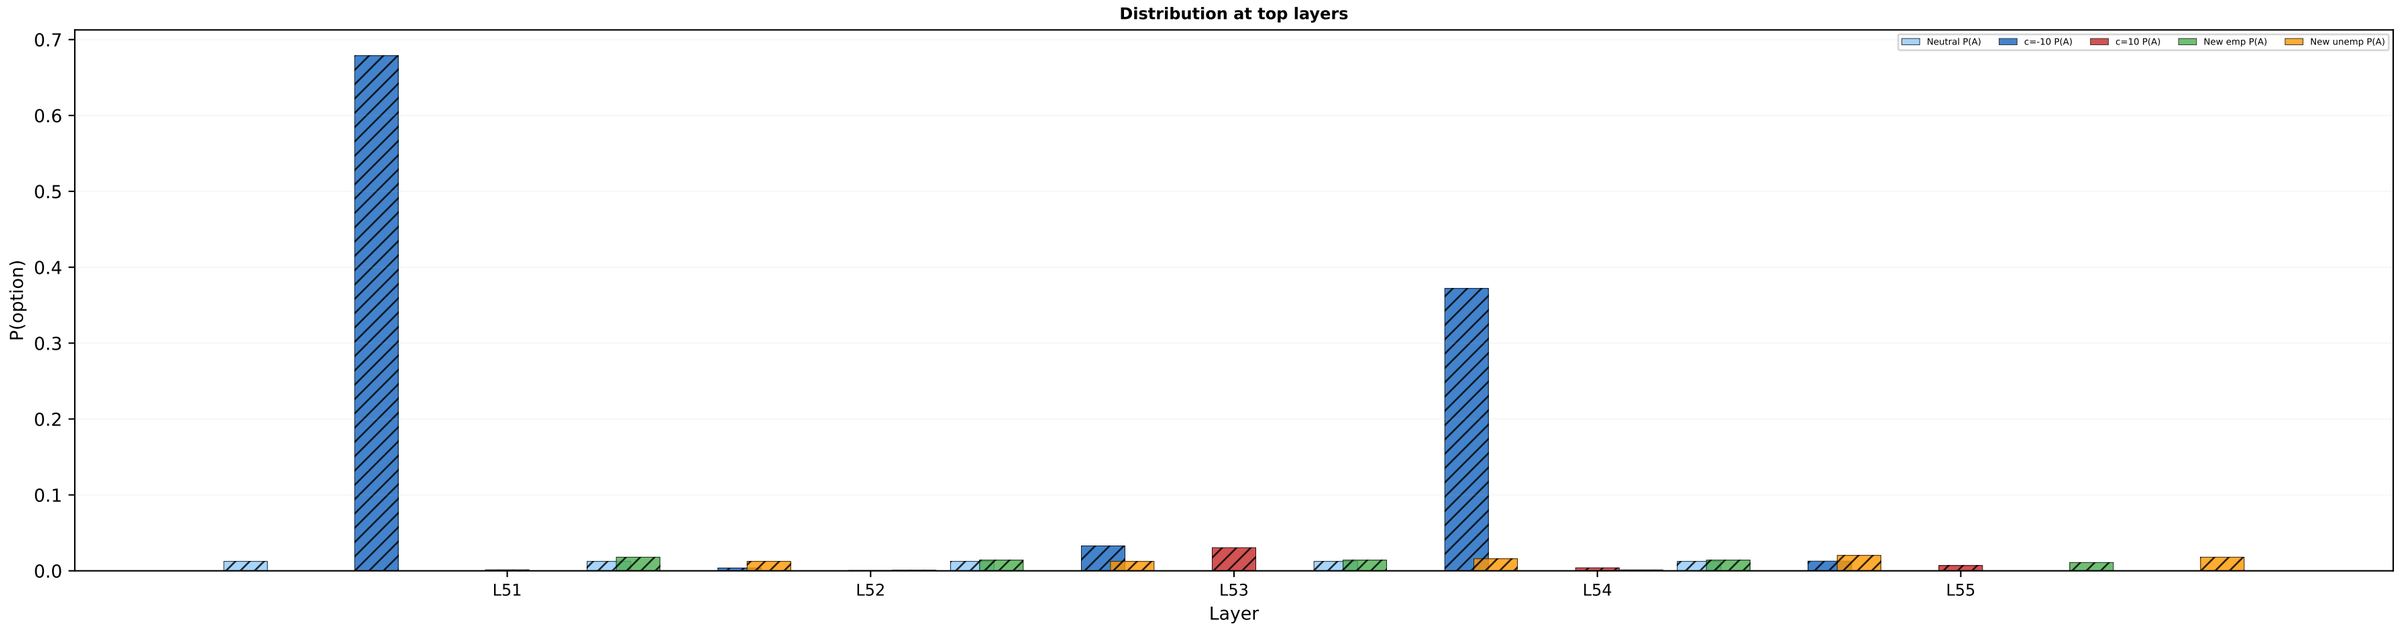


E19: Departure time consistency (Tue) | V8/cfg2

Does a typical adult leave home at the same time every Tuesday? | (A) No, the departure time varies a lot | (B) Roughly similar, but not exact | (C) Yes, within a few minutes of the same time | Answer: (

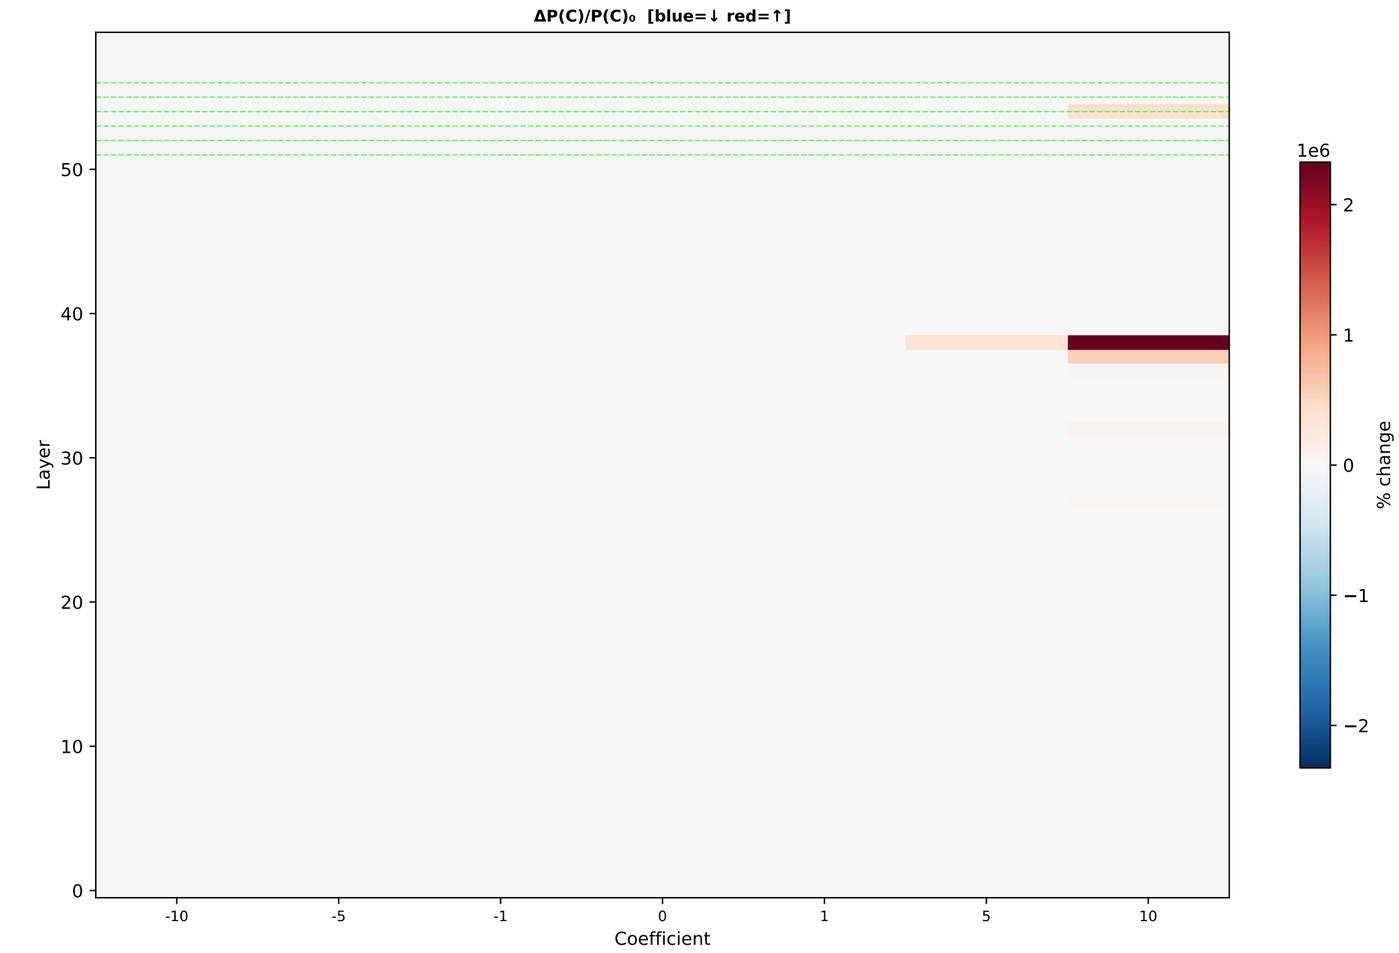


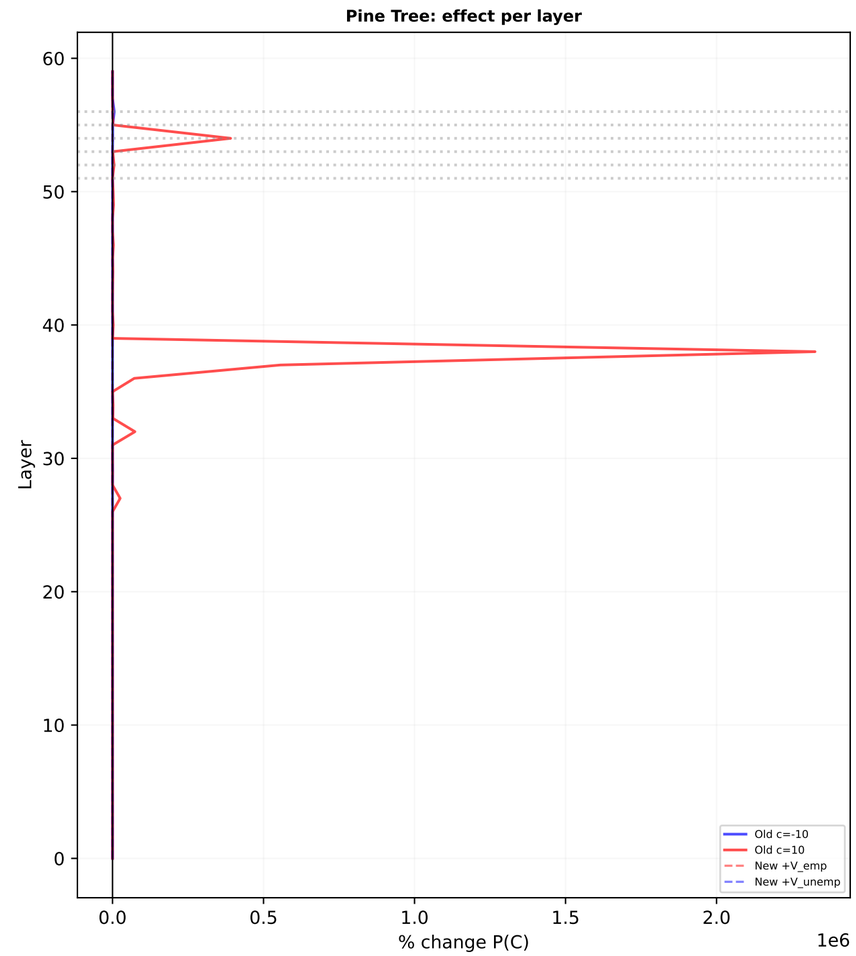


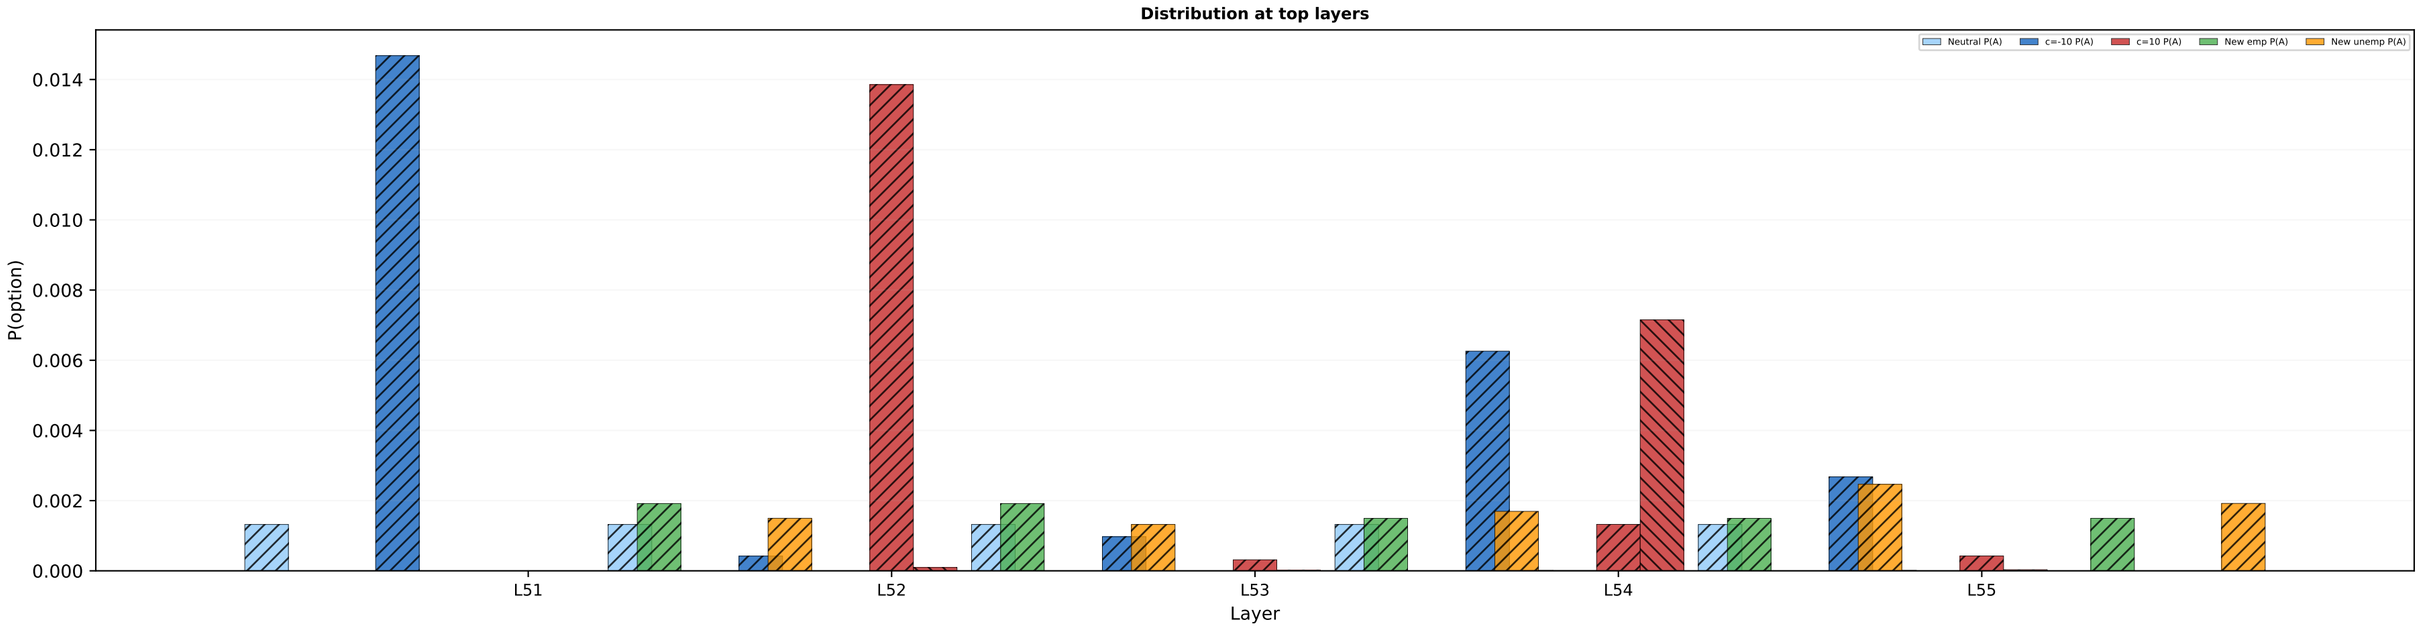


E20: Noon location consistency (Tue) | V8/cfg2

Is a typical adult at the same non-home location at noon every Tuesday? | (A) No, they are usually at home at noon | (B) Sometimes the same place, sometimes not | (C) Yes, almost always at the same location | Answer: (

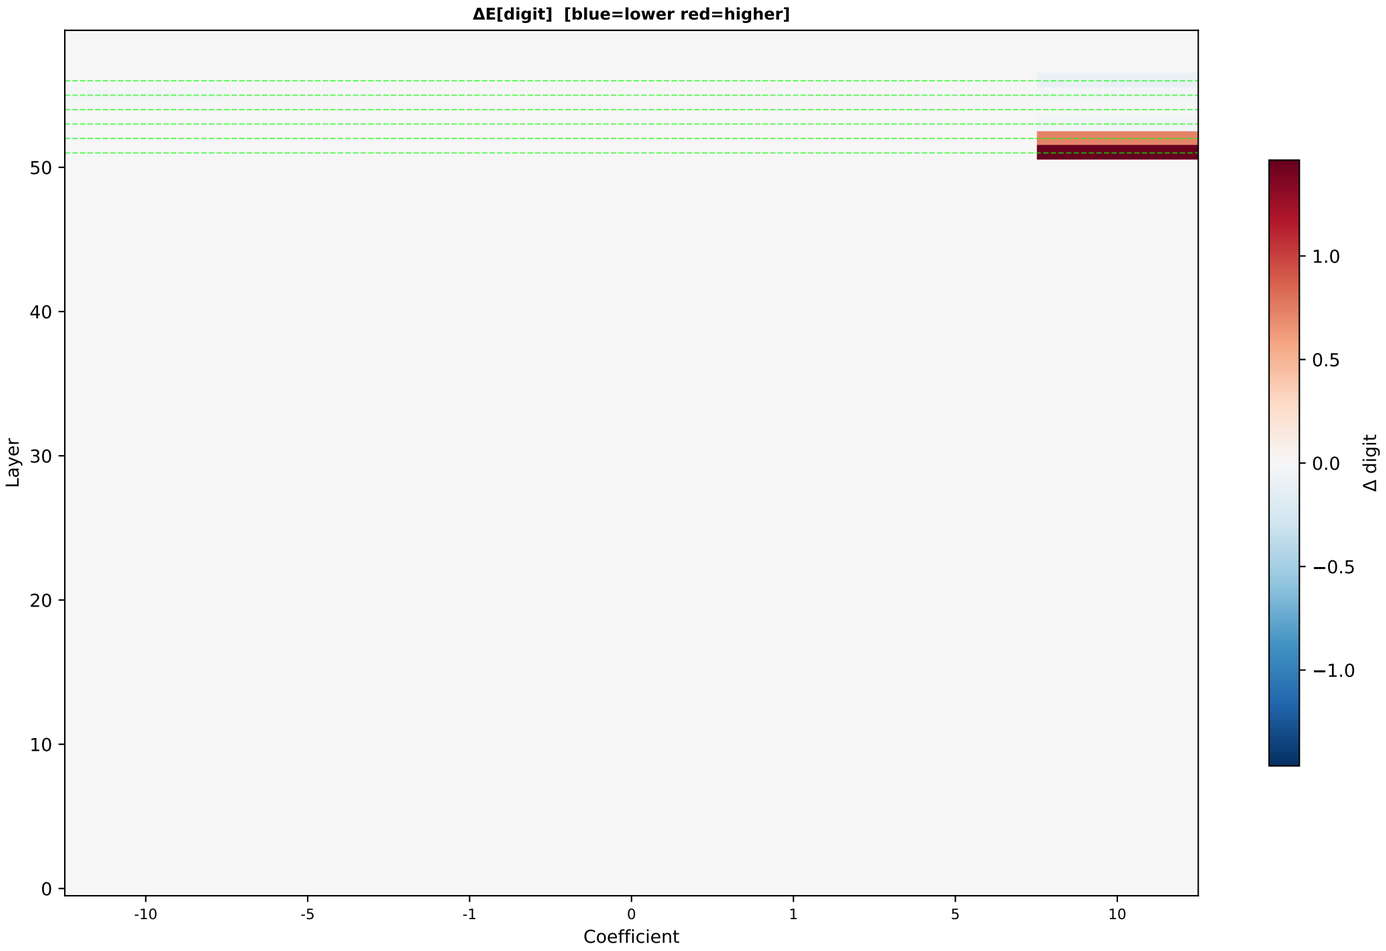


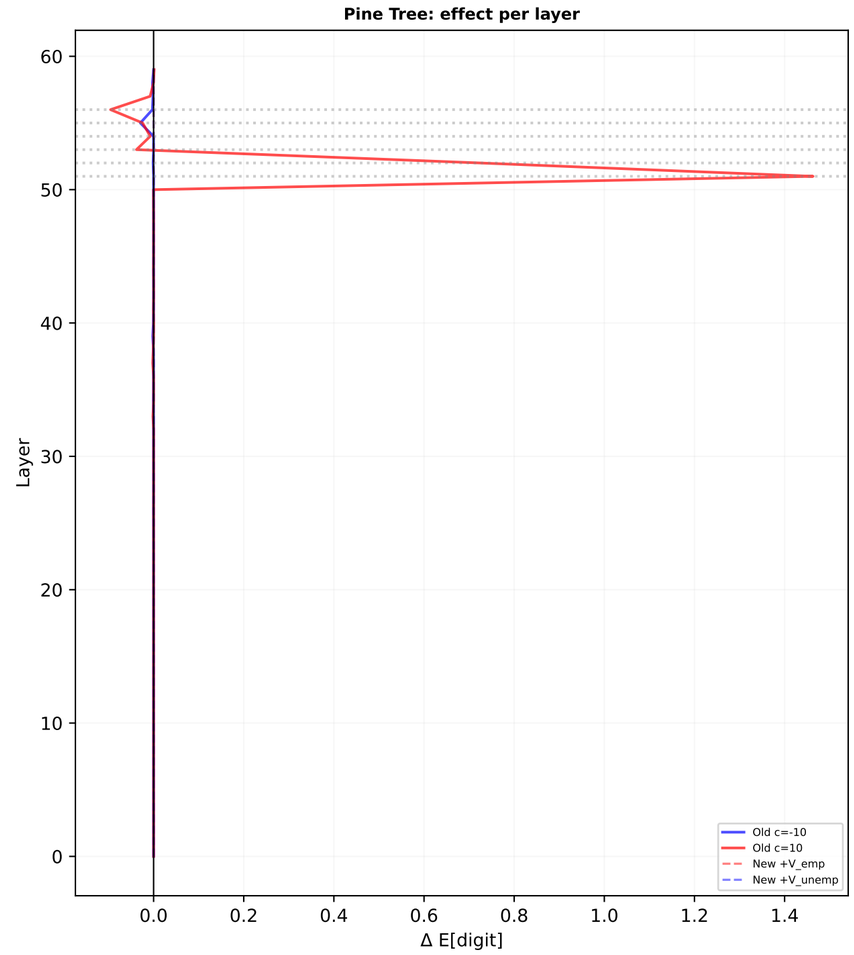


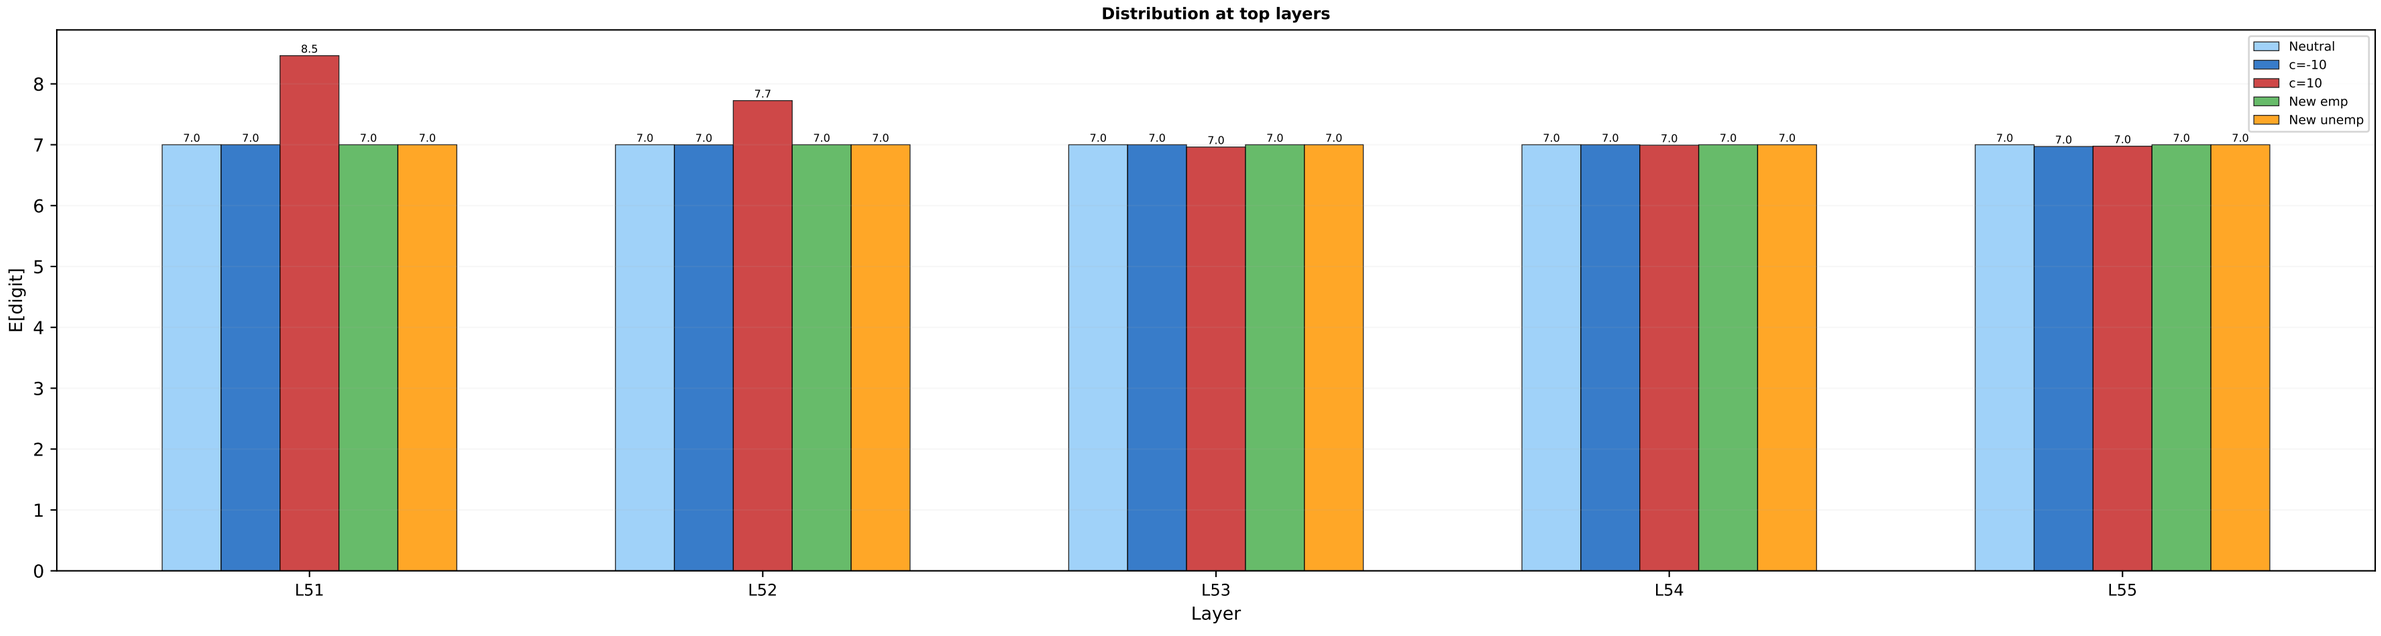


Complete with a single number only. | A typical adult wakes up at approximately ___:00 AM on a Tuesday. |

E1: Wake-up hour (Tue) | V8/cfg4

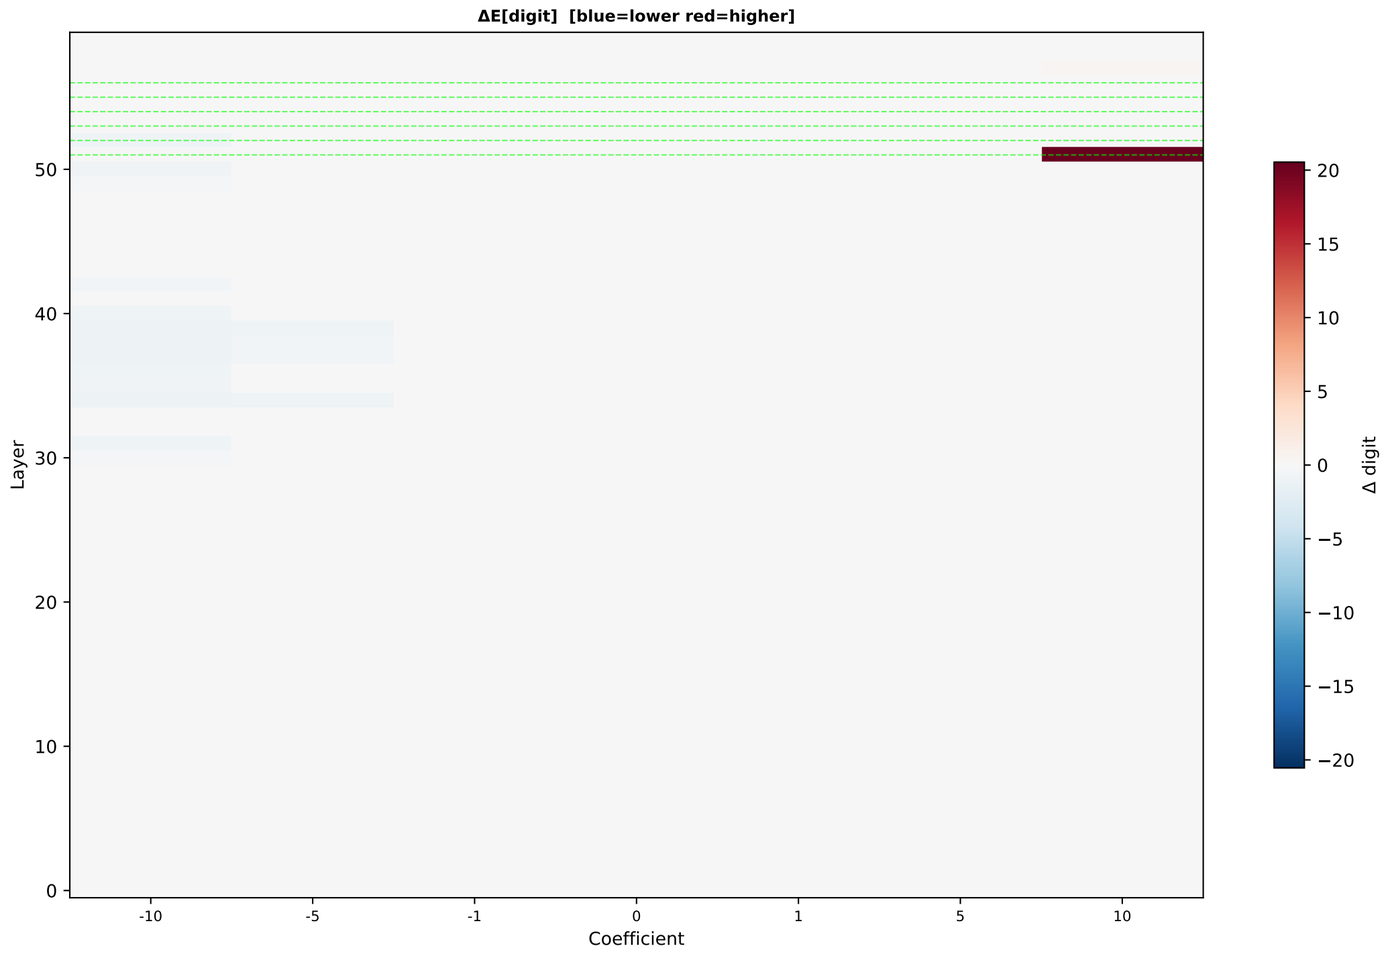


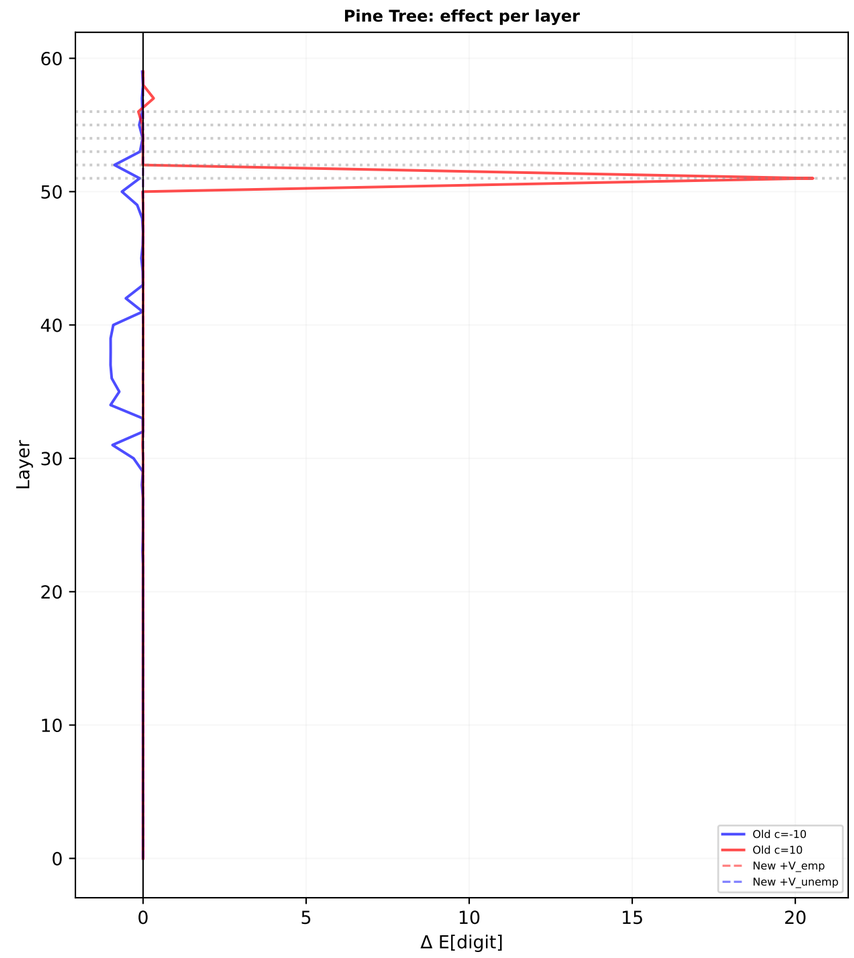


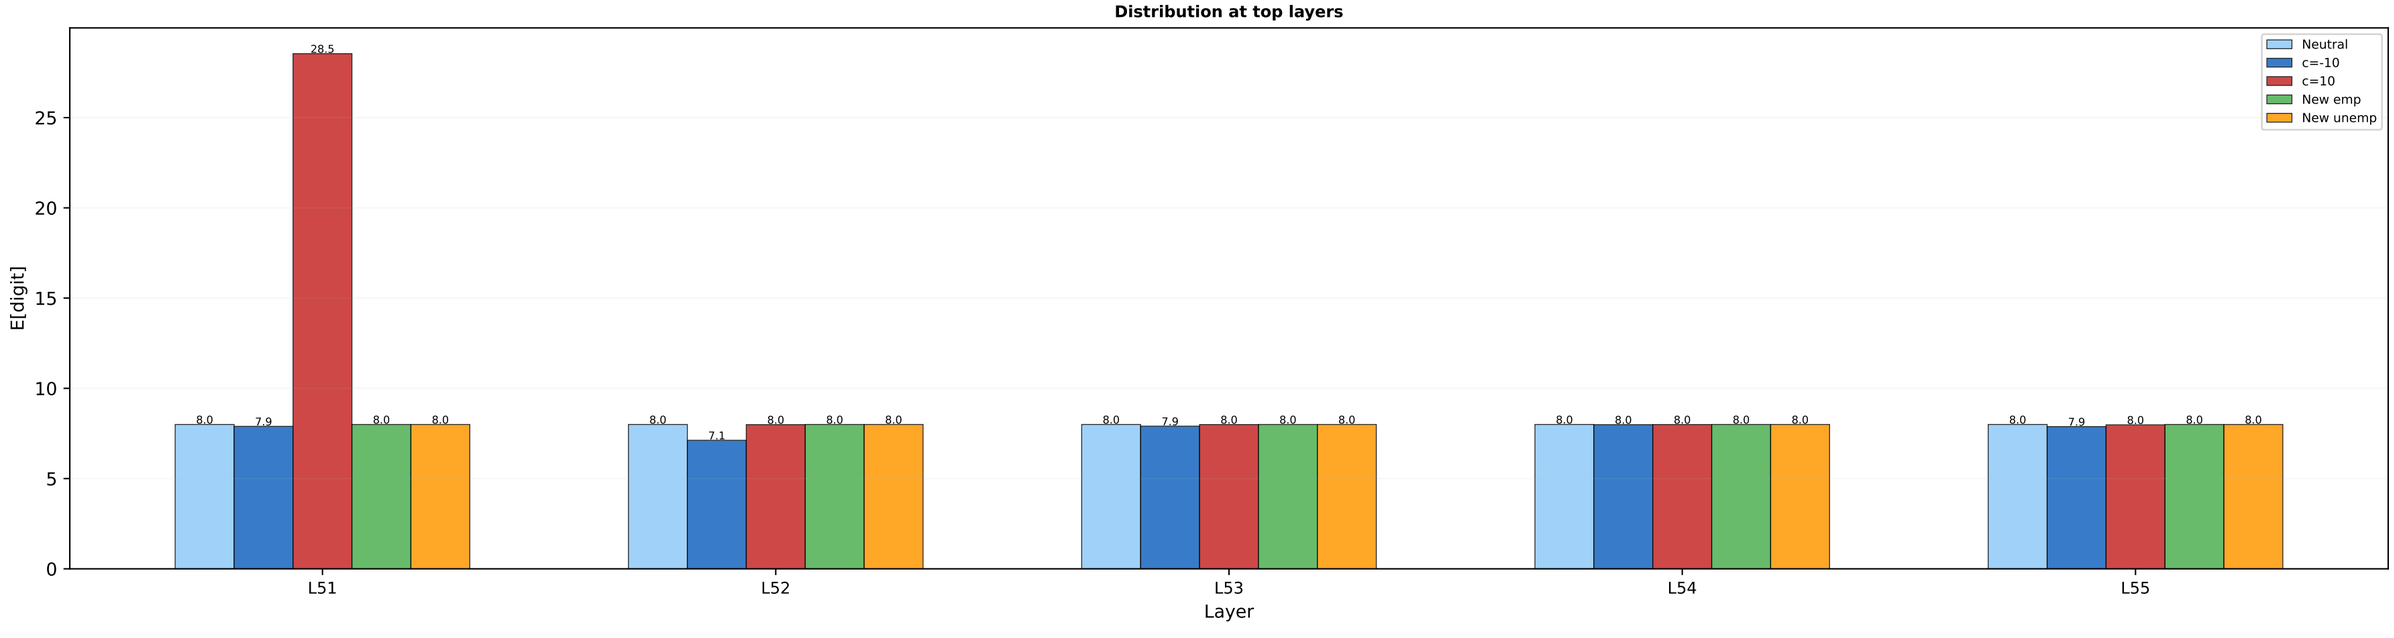


Complete with a single number only. | A typical adult leaves home at approximately ___:00 AM on a Tuesday. |

E2: Leave-home hour (Tue) | V8/cfg4

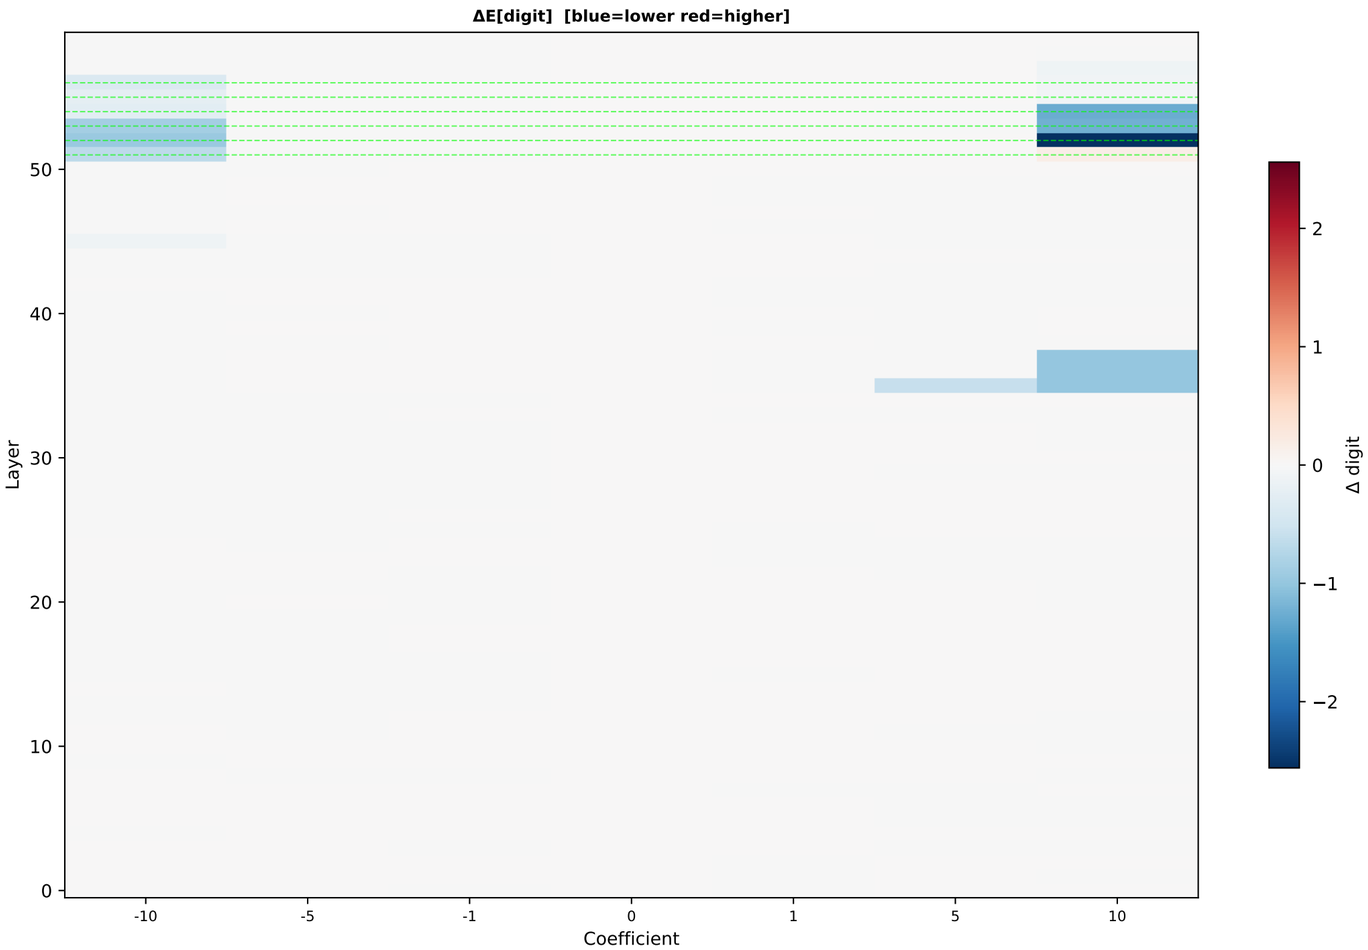


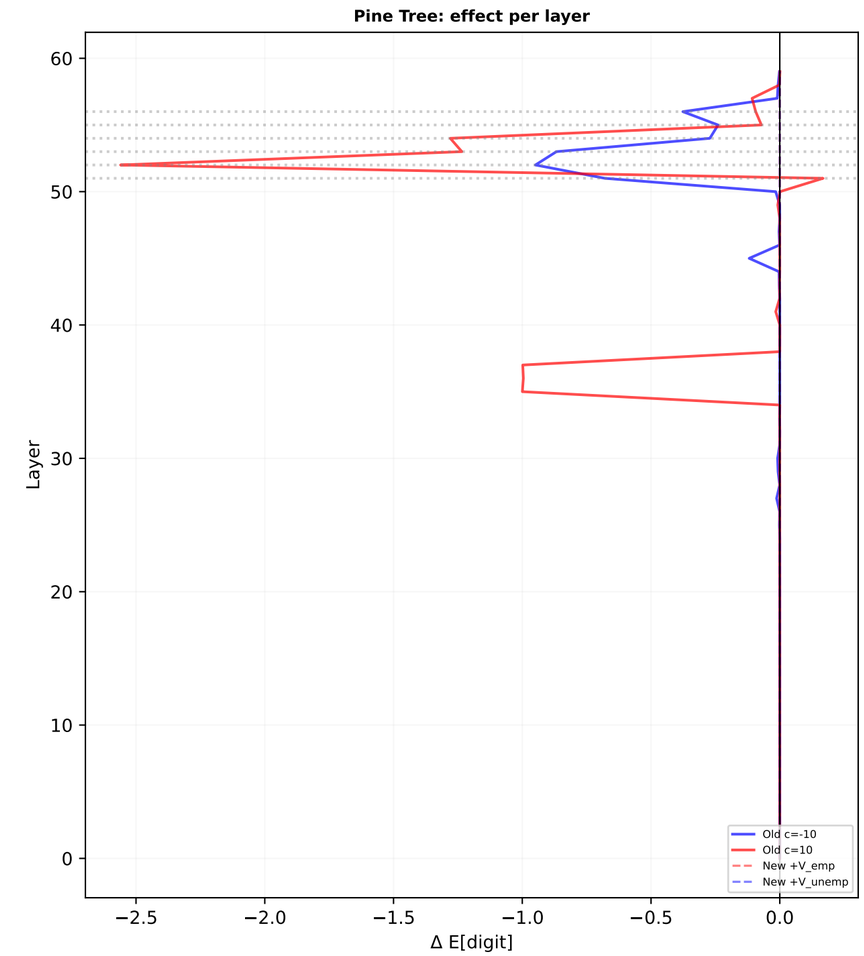


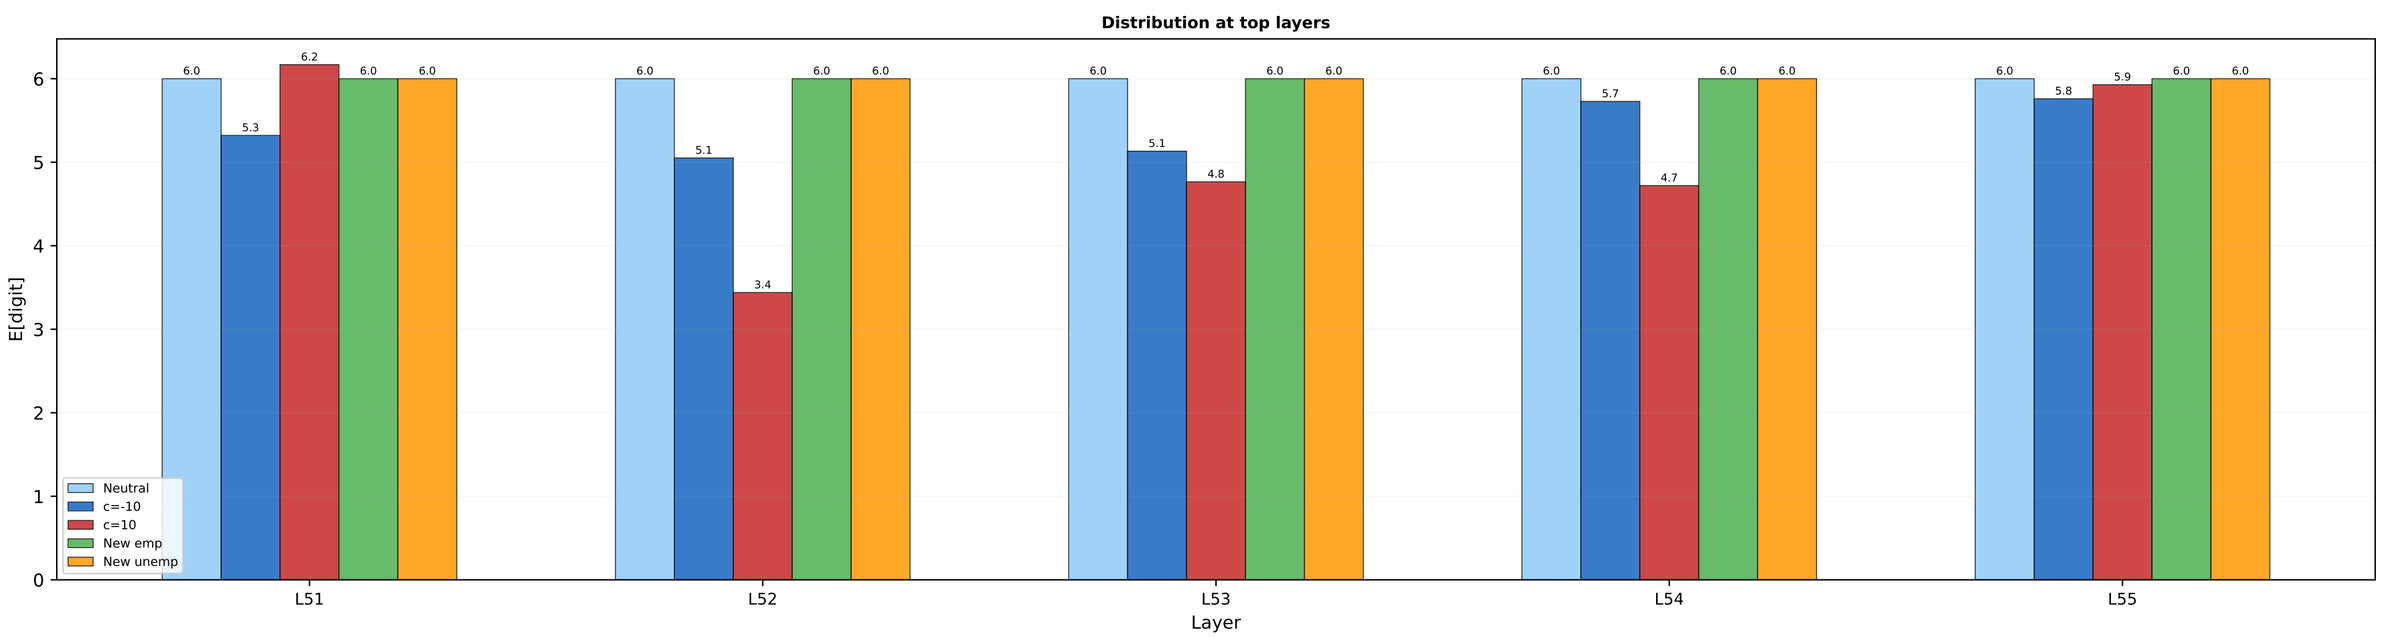


Complete with a single number only. | A typical adult arrives home at approximately ___:00 PM on a Tuesday. |

E3: Arrive-home hour (Tue) | V8/cfg4

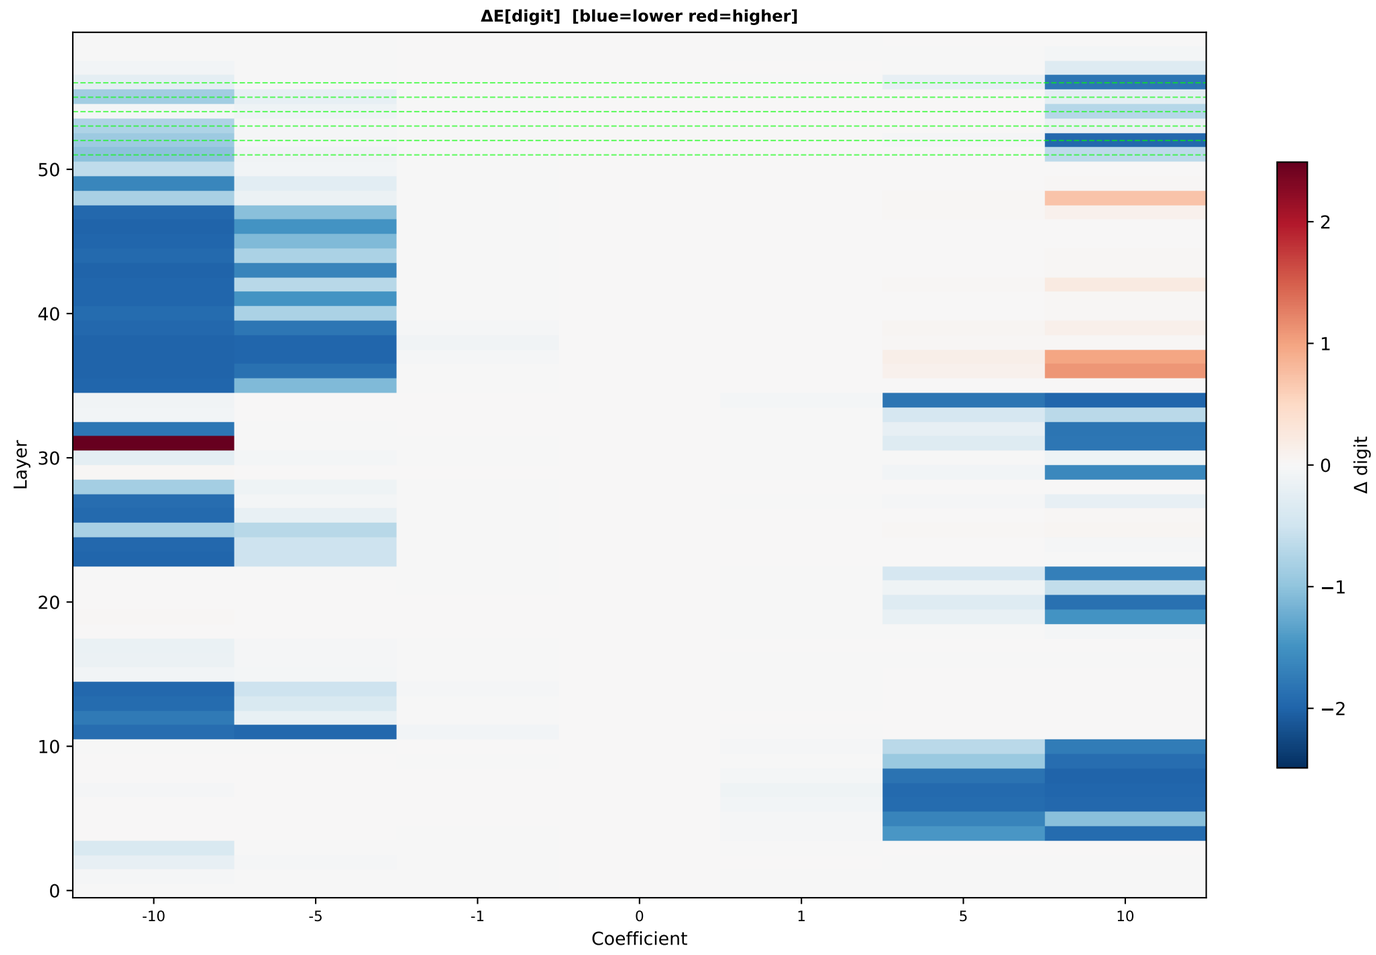


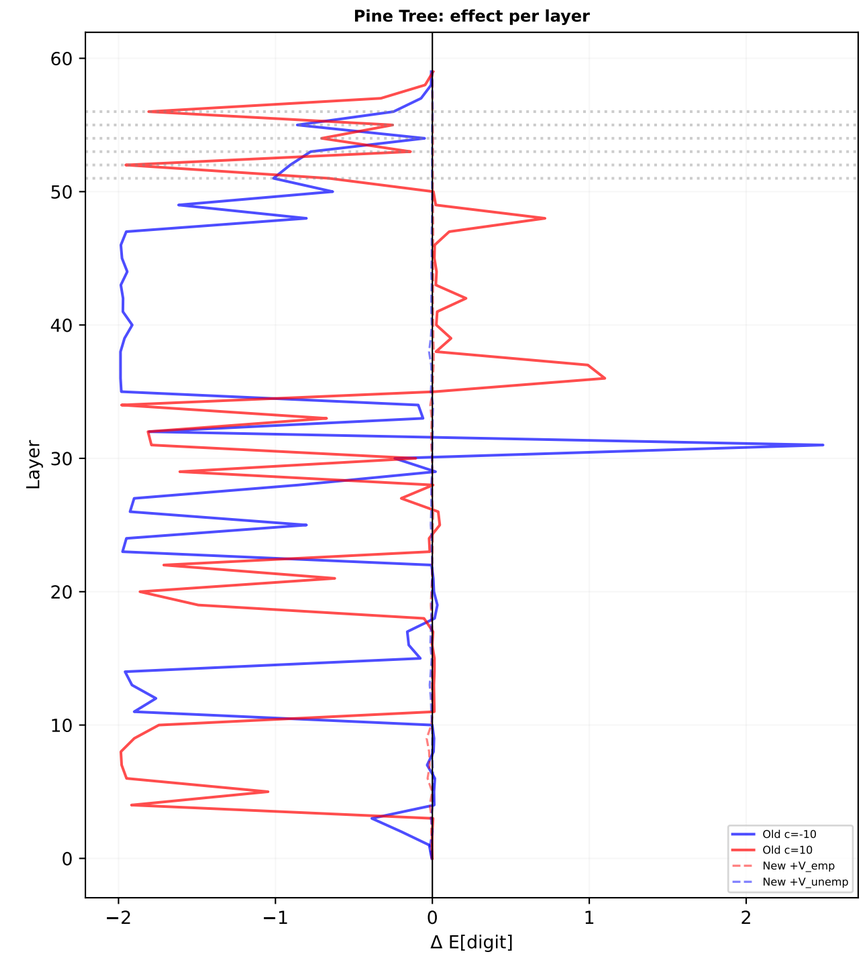


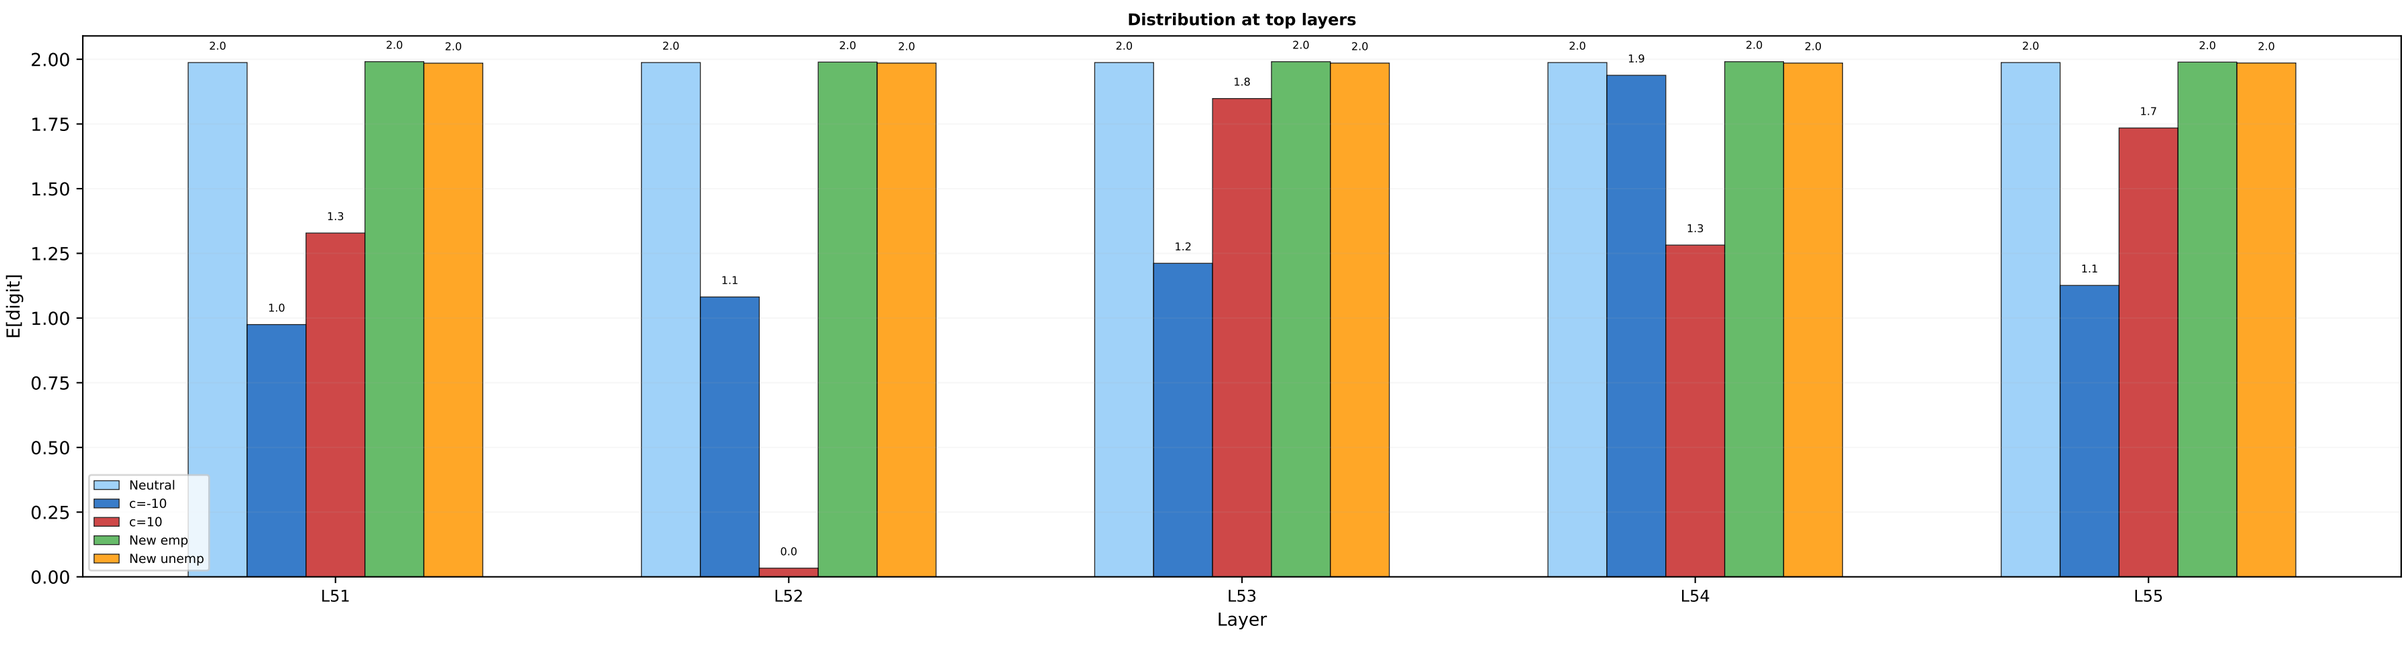


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at home between 8 AM and 6 PM on a Tuesday? ___ |

E4: Daytime hours at home (Tue) | V8/cfg4

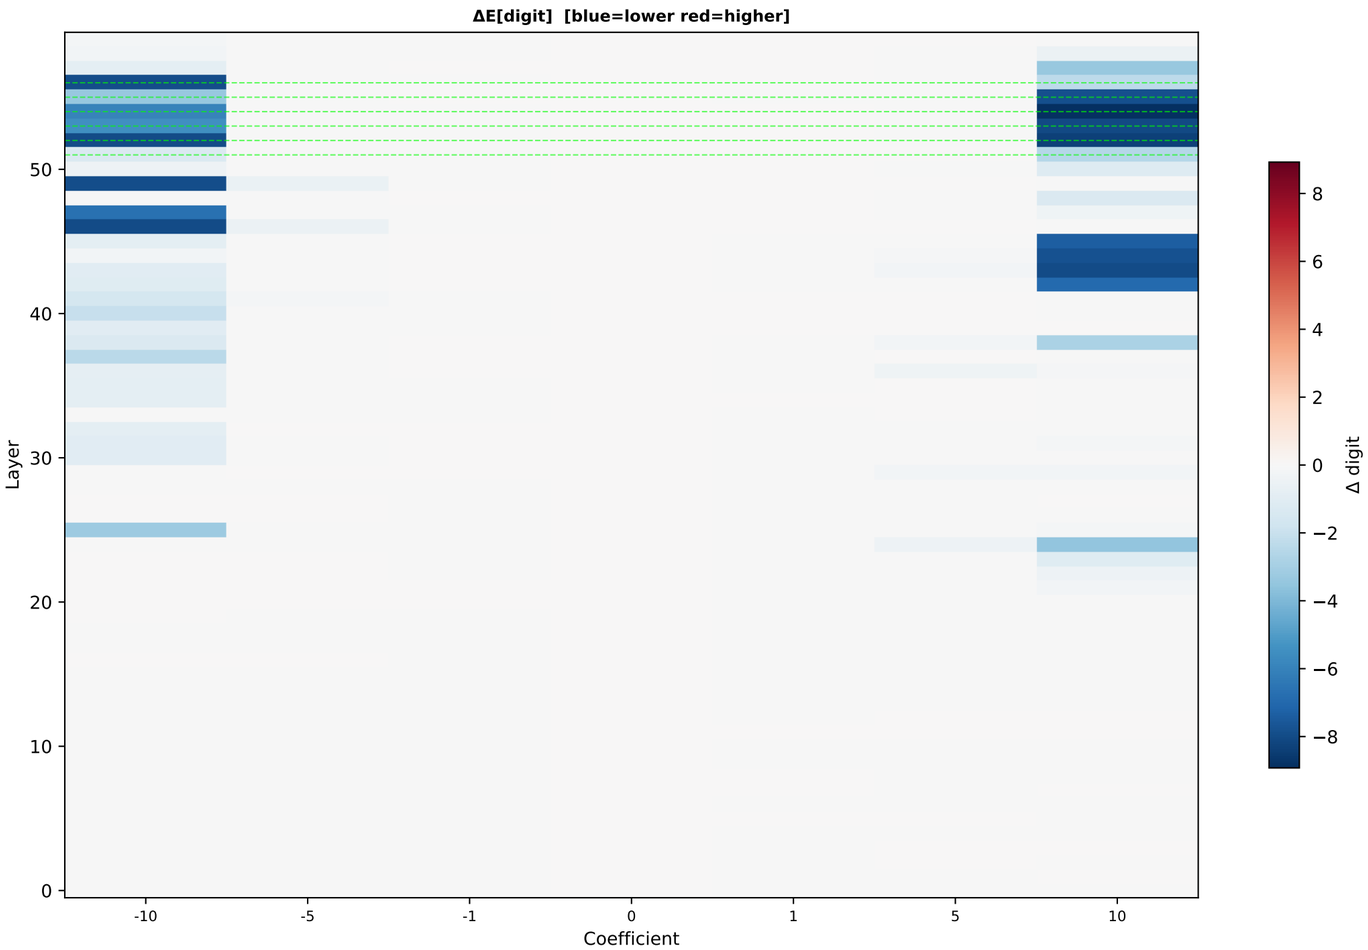


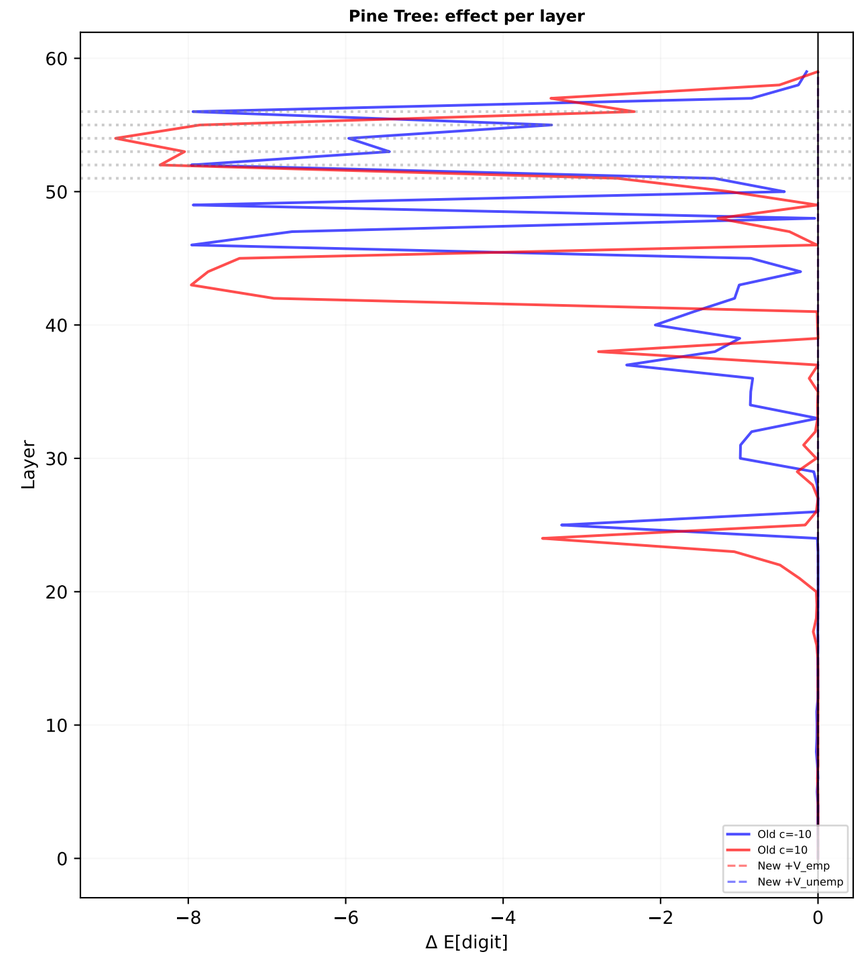


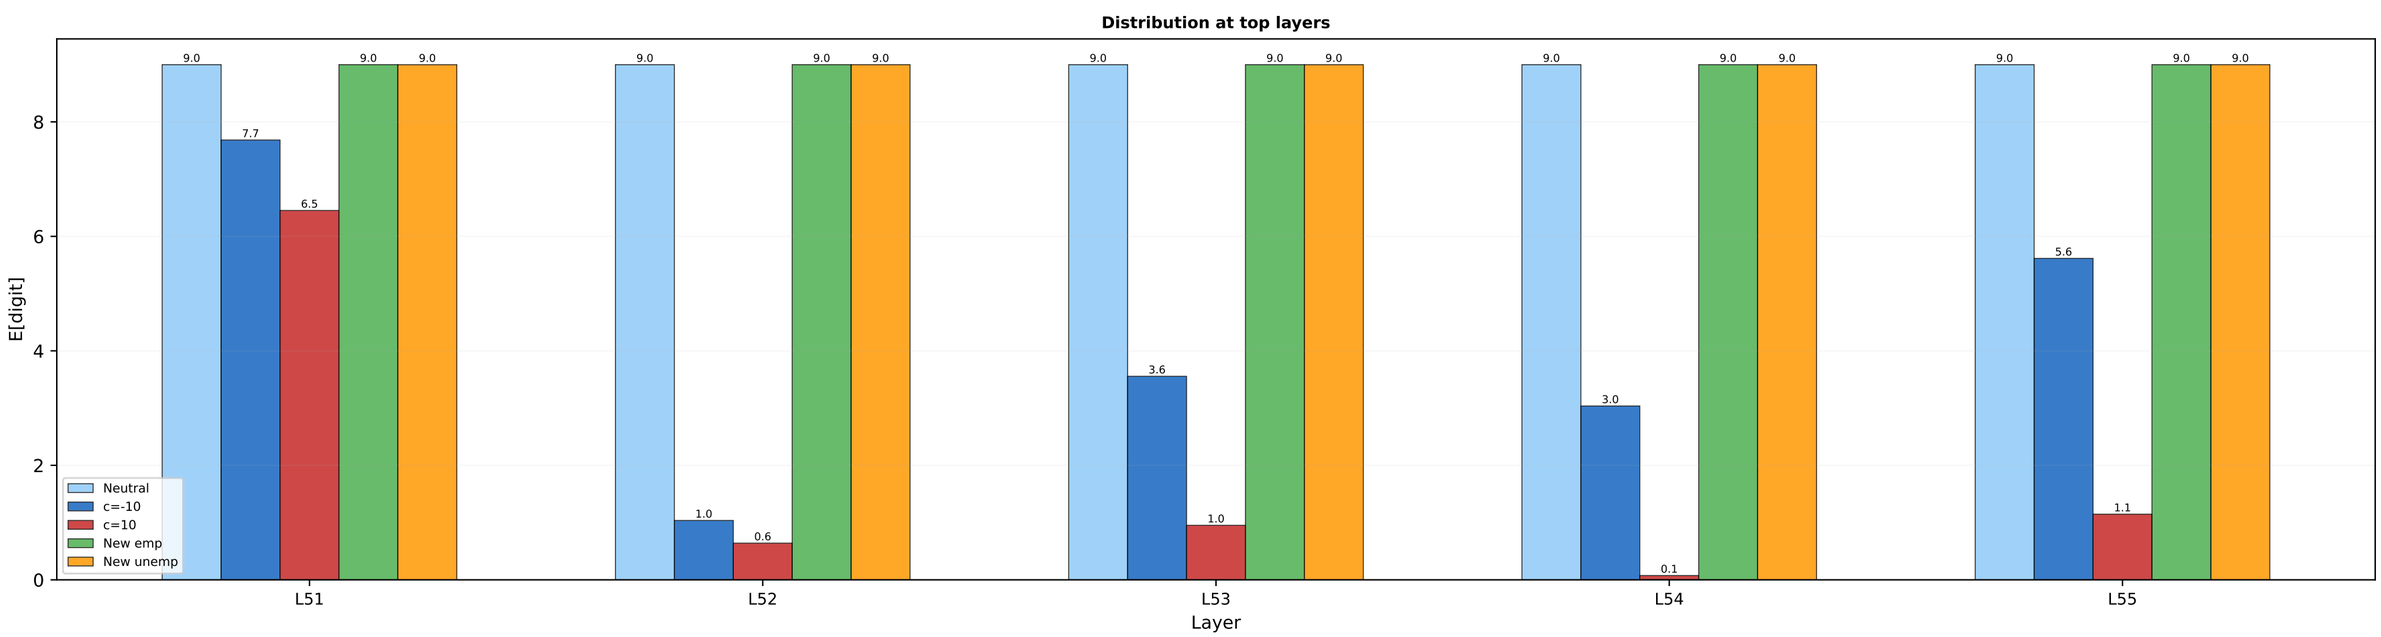


E5: Longest stretch outside (Tue) | V8/cfg4

Answer with a single digit from 0 to 9. | What is the longest continuous stretch of hours a typical adult spends outside the home on a Tuesday? ___ |

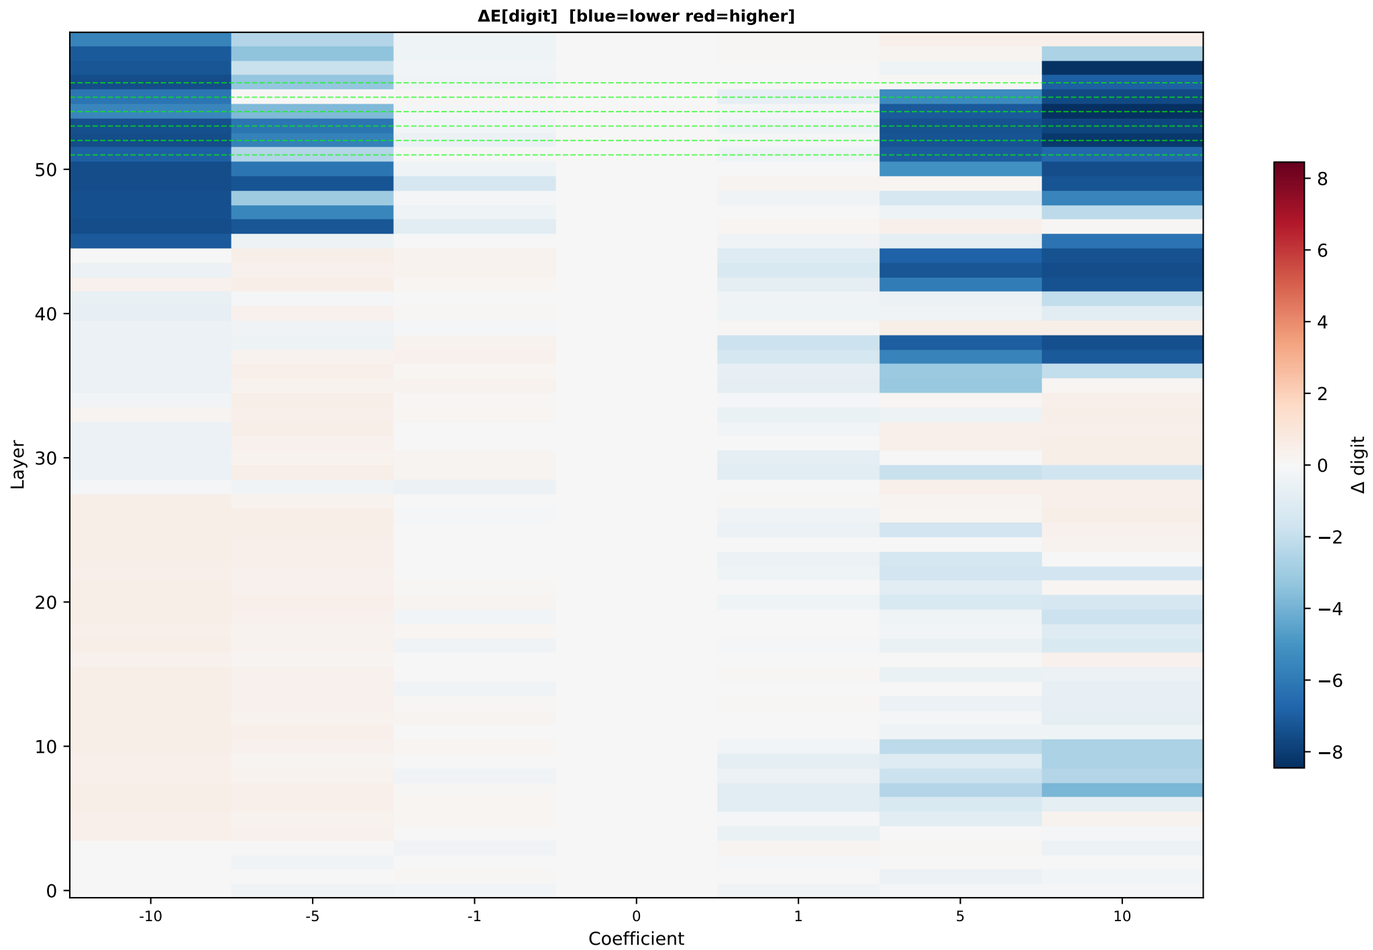


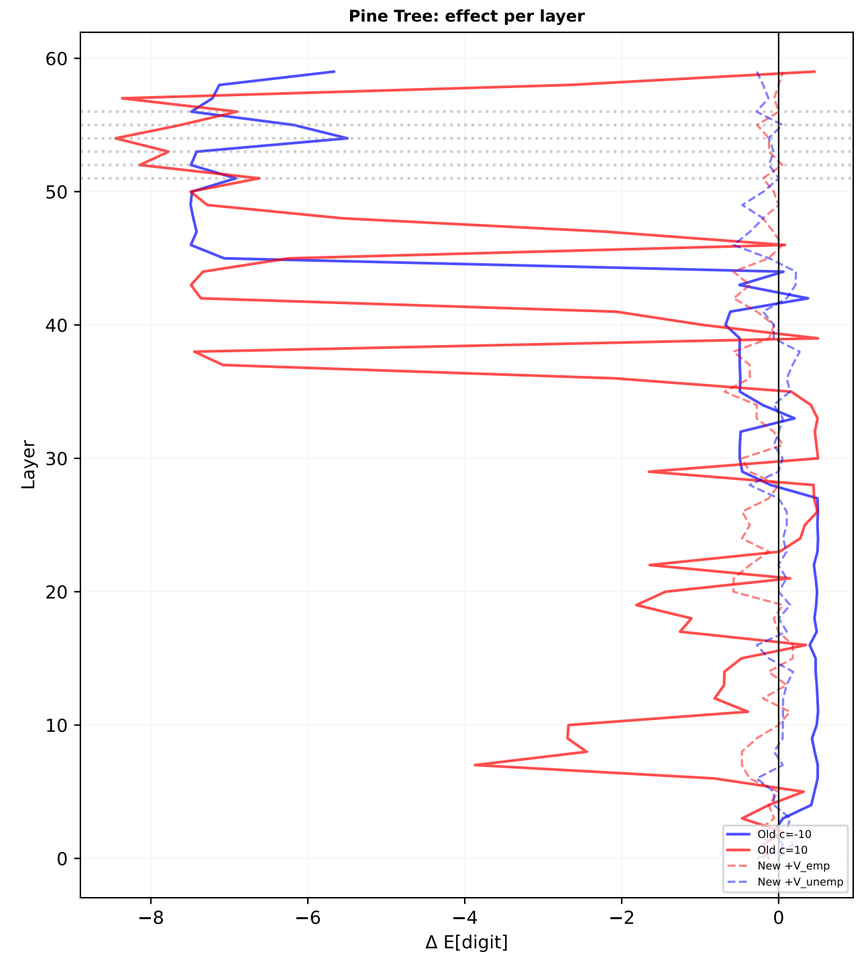


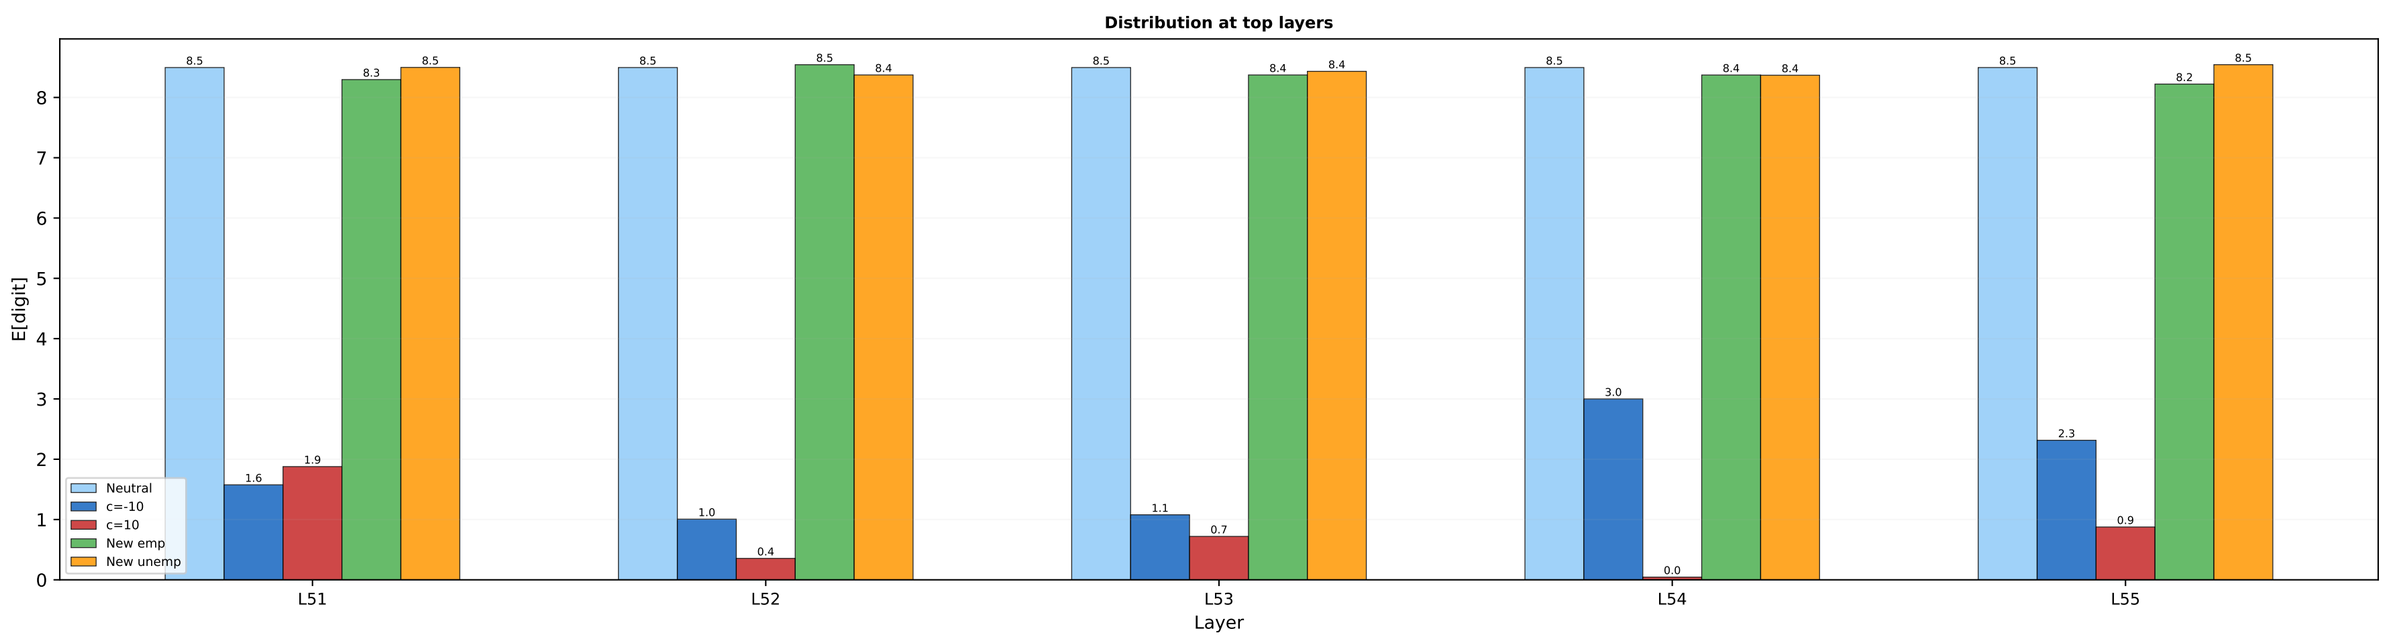


Answer with a single digit from 0 to 9. | How many total hours is a typical adult away from home on a Tuesday? ___ |

E6: Total hours away (Tue) | V8/cfg4

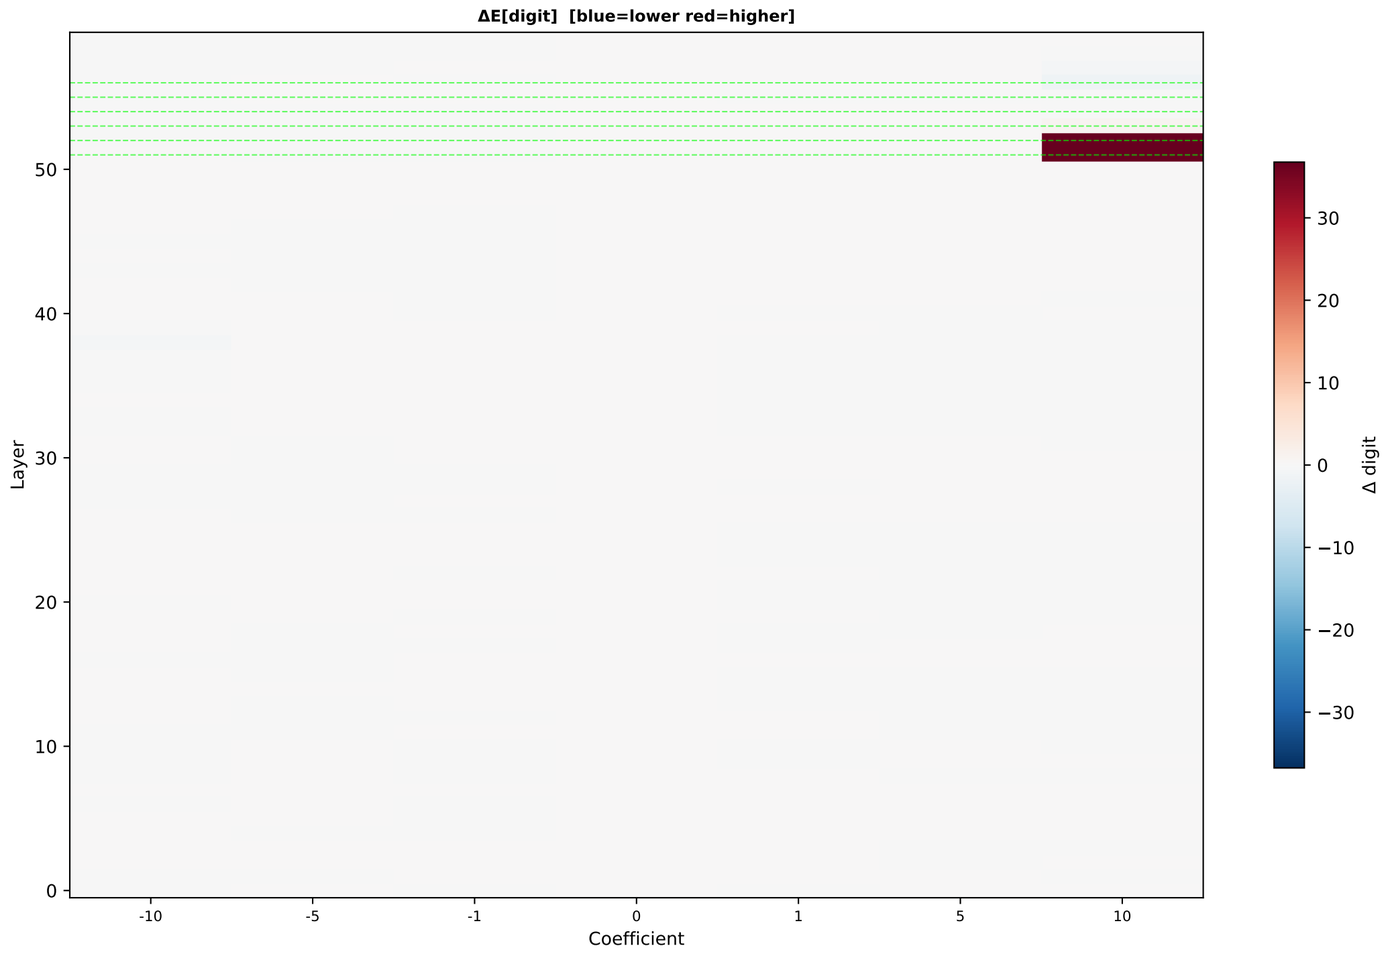


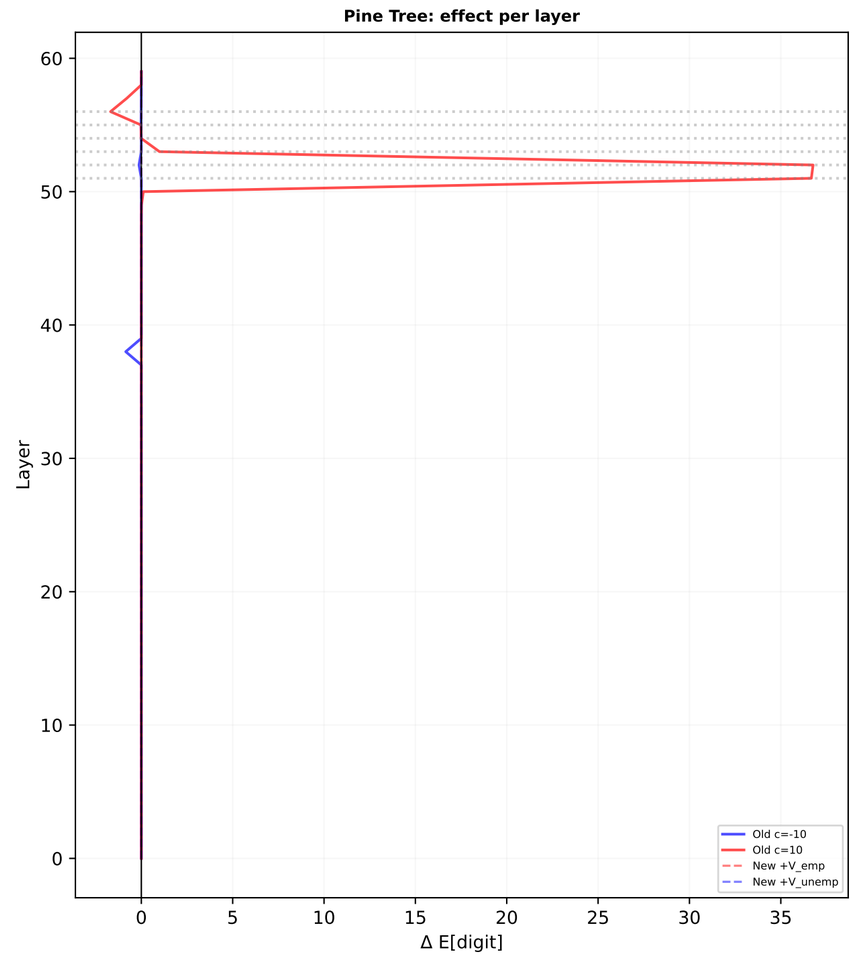


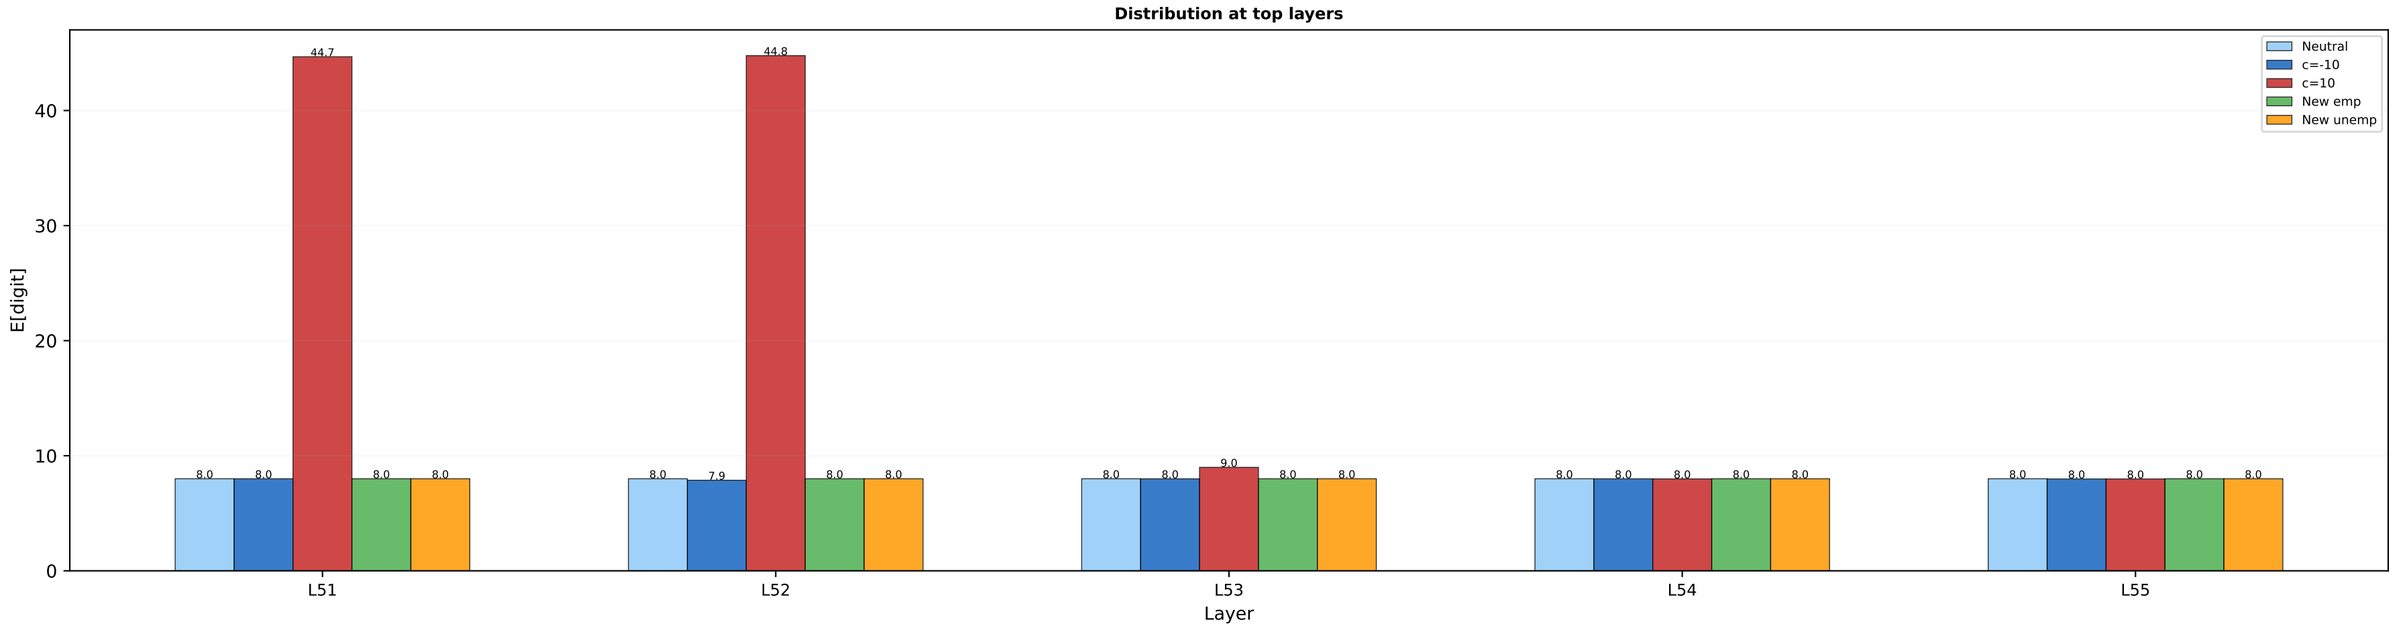


E7: Hours at primary non-home location (Tue) | V8/cfg4

Answer with a single digit from 0 to 9. | How many hours does a typical adult spend at their most frequently visited non-home location on a Tuesday? ___ |

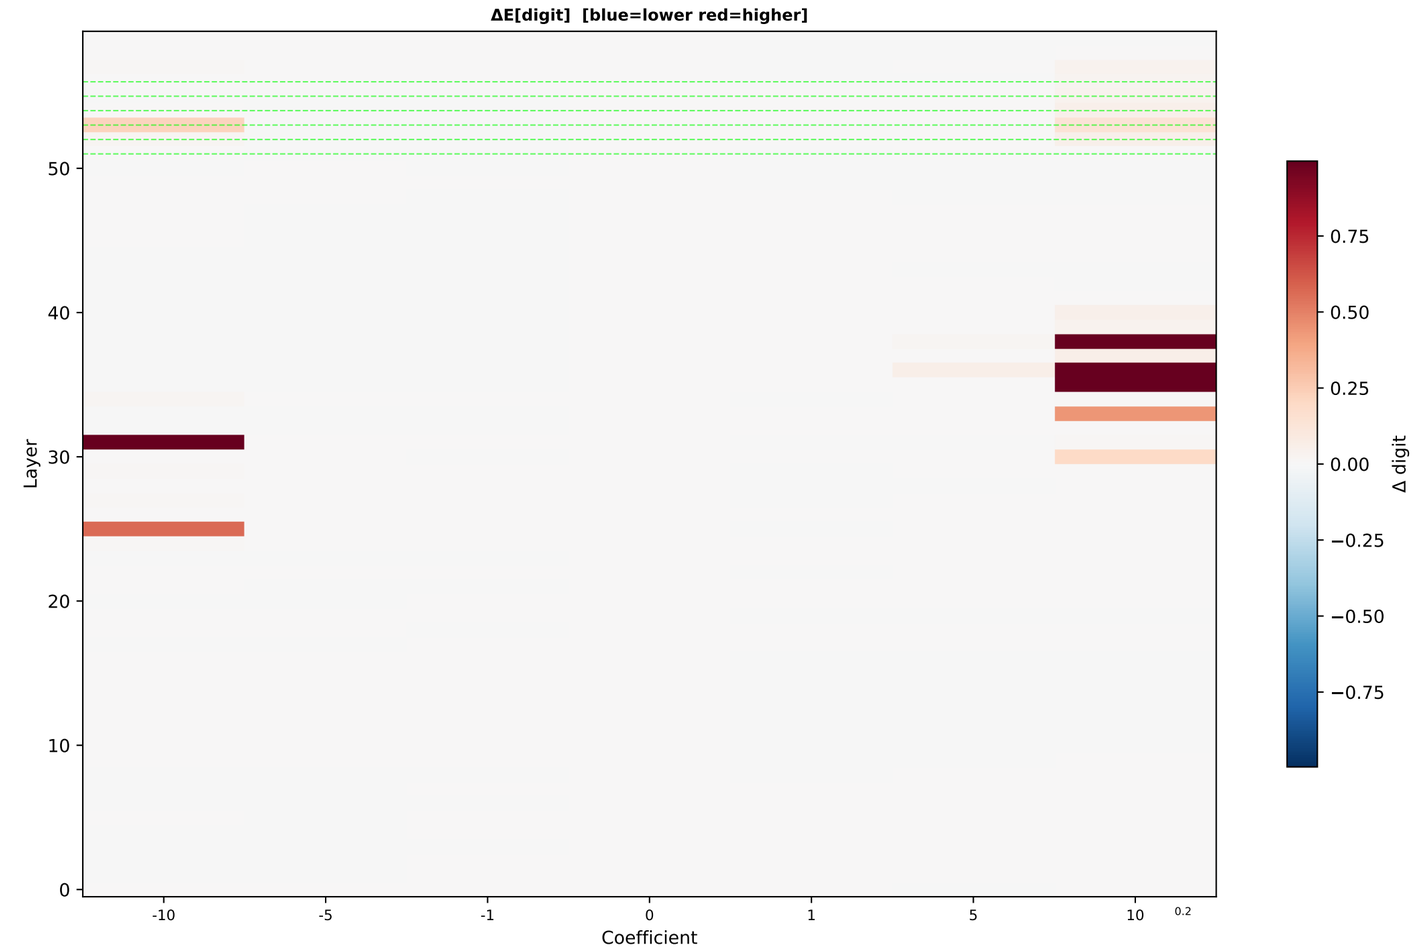


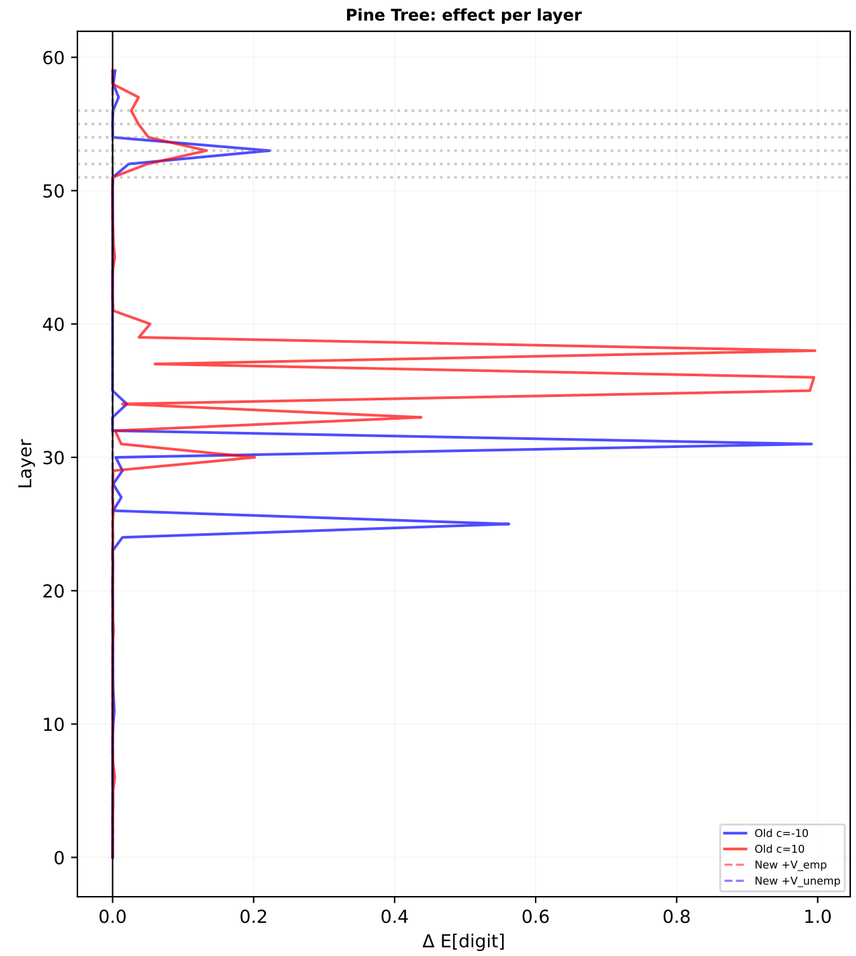


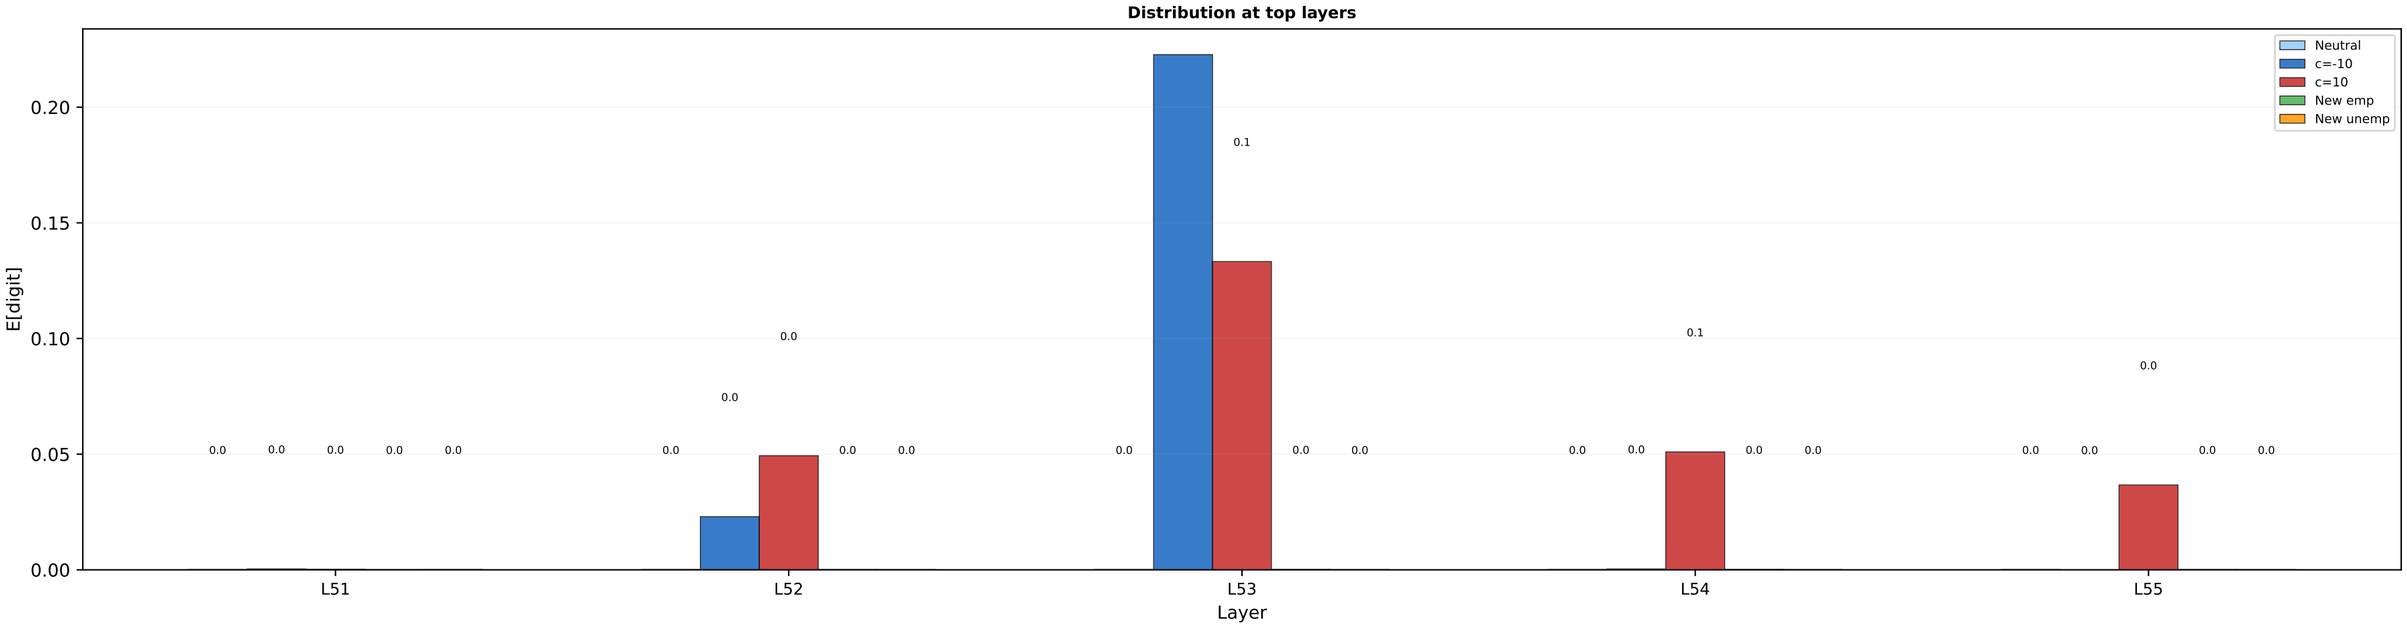


E8: Daytime home returns (Tue) | V8/cfg4

Answer with a single digit from 0 to 9. | How many times does a typical adult return home during the daytime (8 AM to 6 PM) on a Tuesday? ___ |

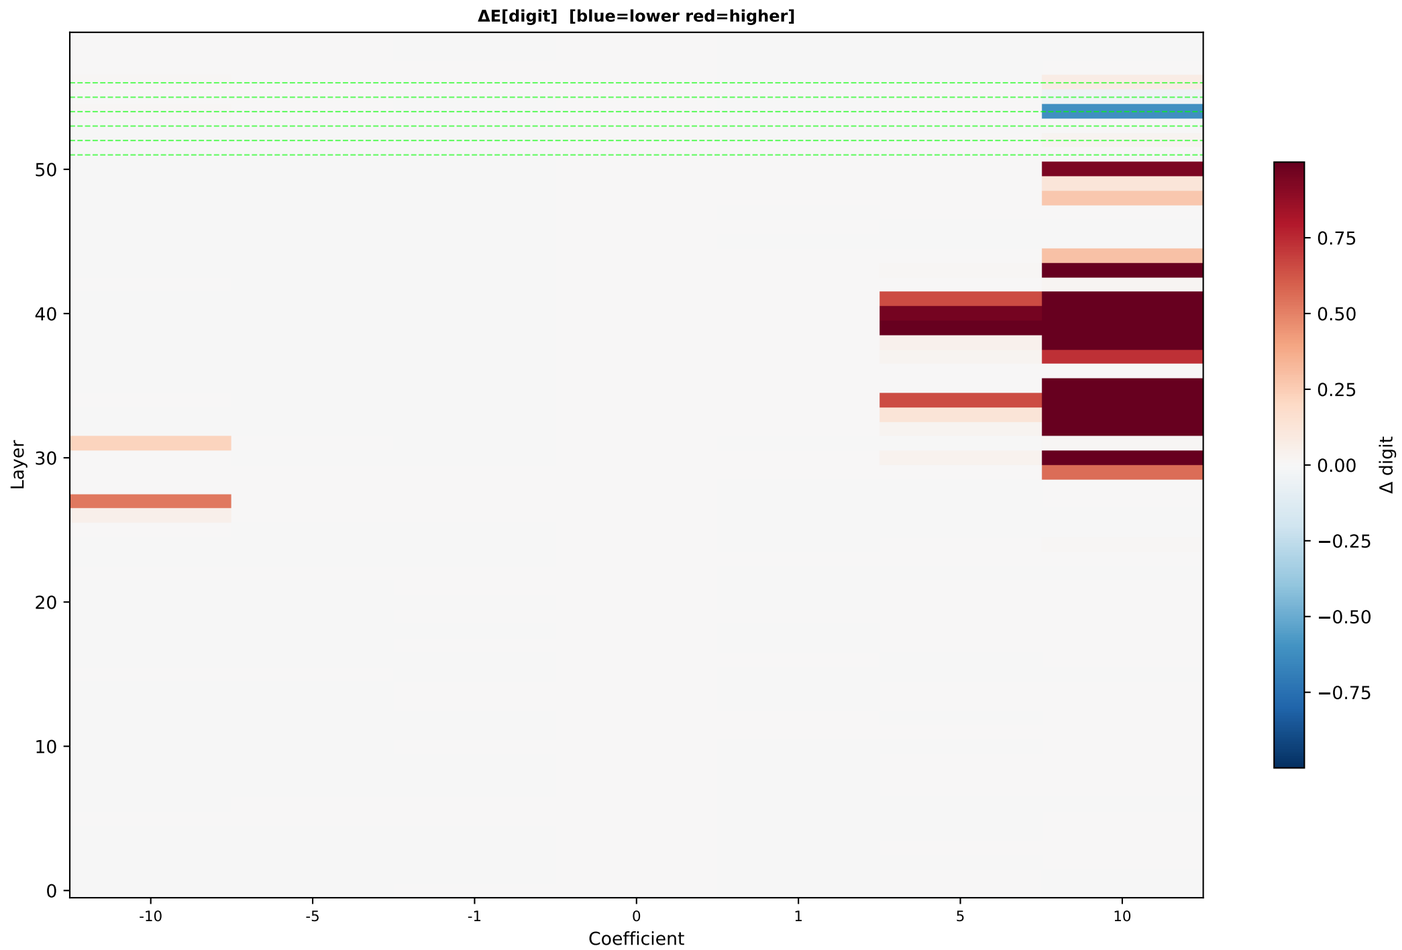


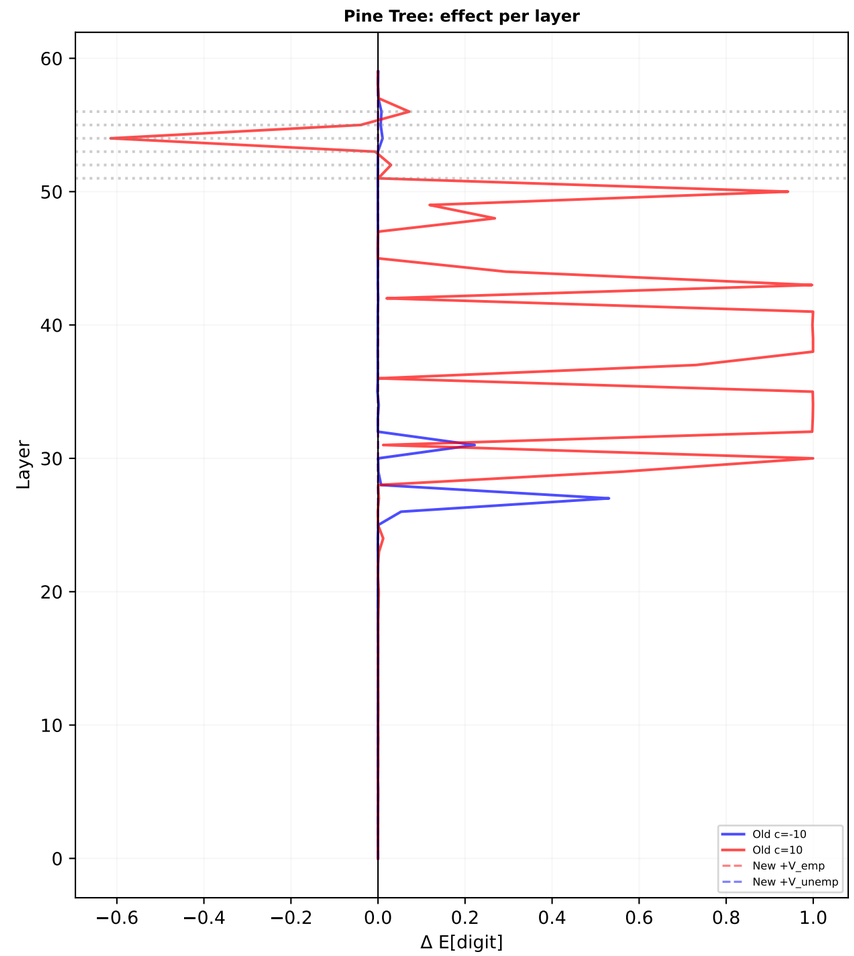


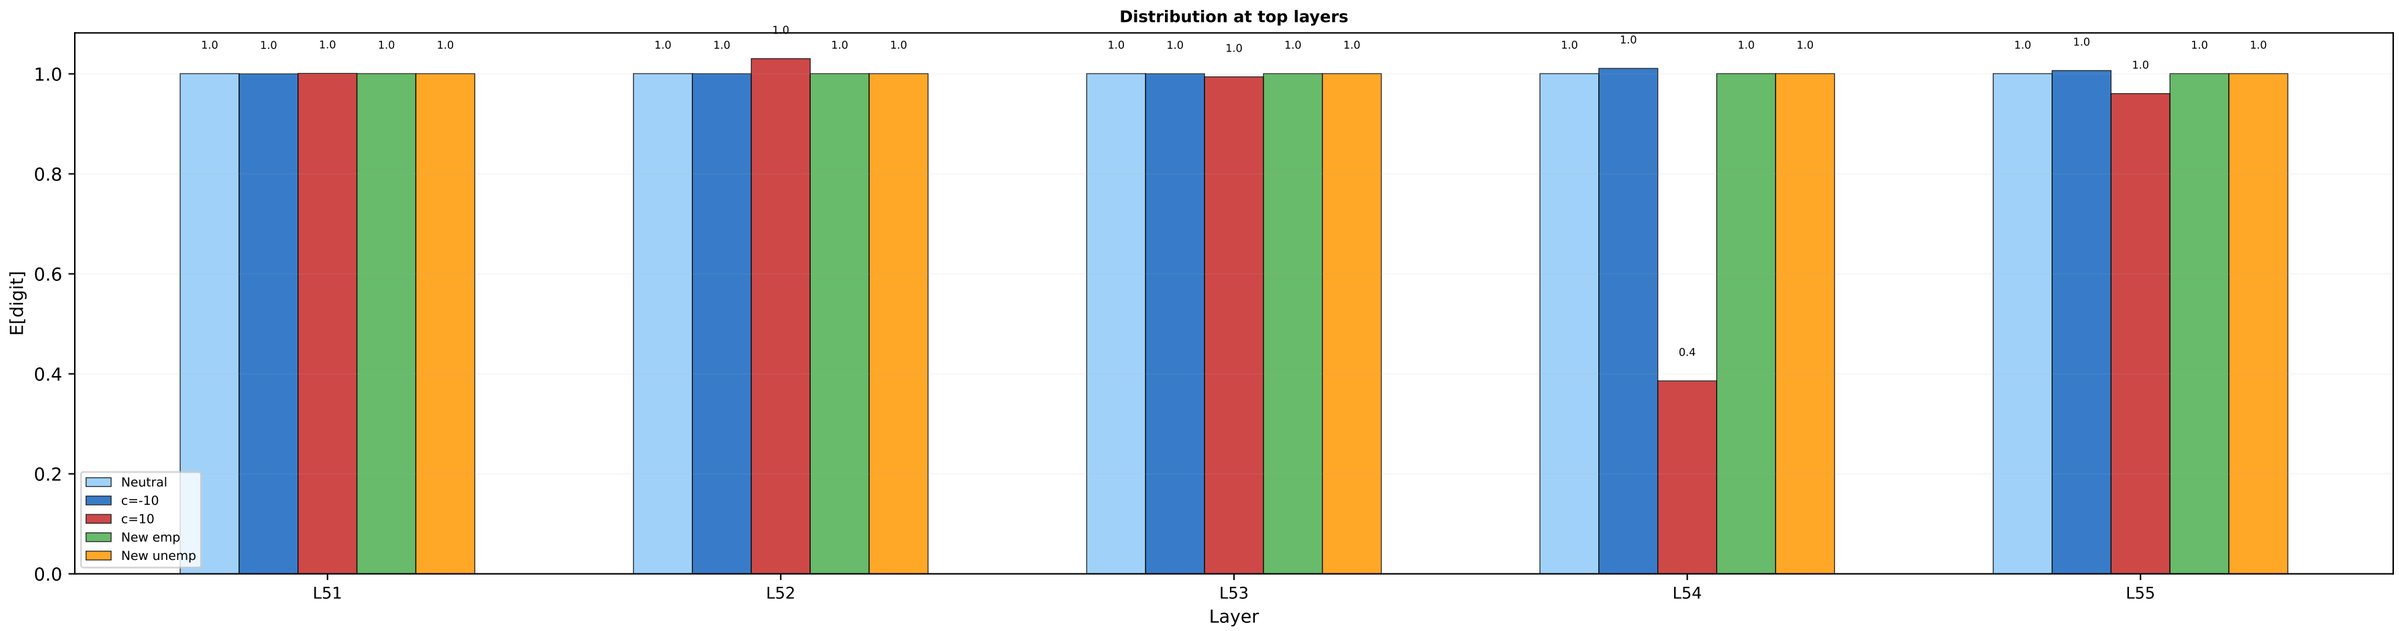


Answer with a single digit from 0 to 9. | How many hours does a typical adult spend commuting or in transit on a Tuesday? ___ |

E9: Commute/transit hours (Tue) | V8/cfg4

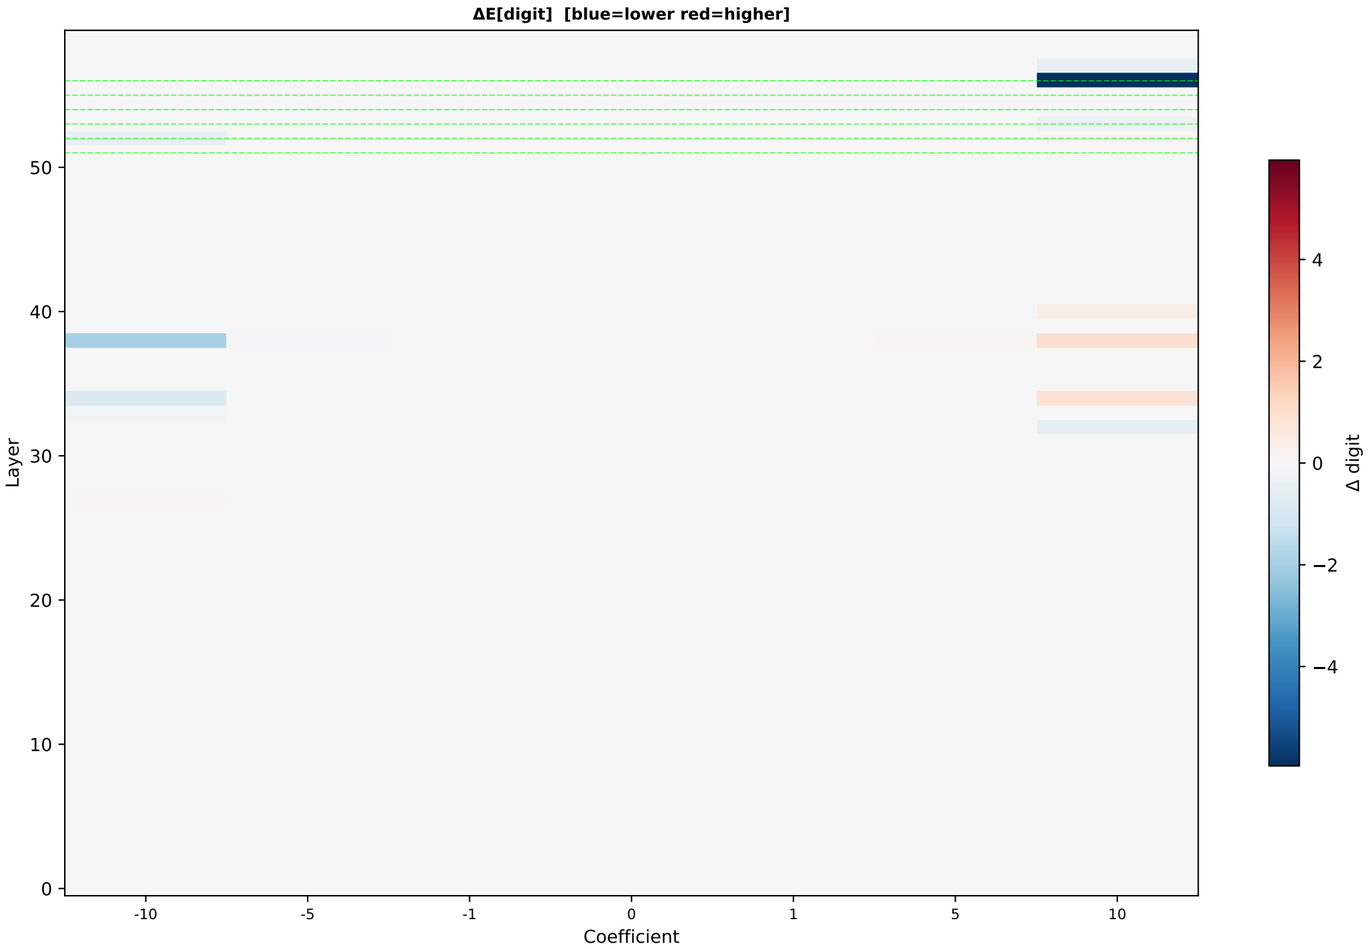


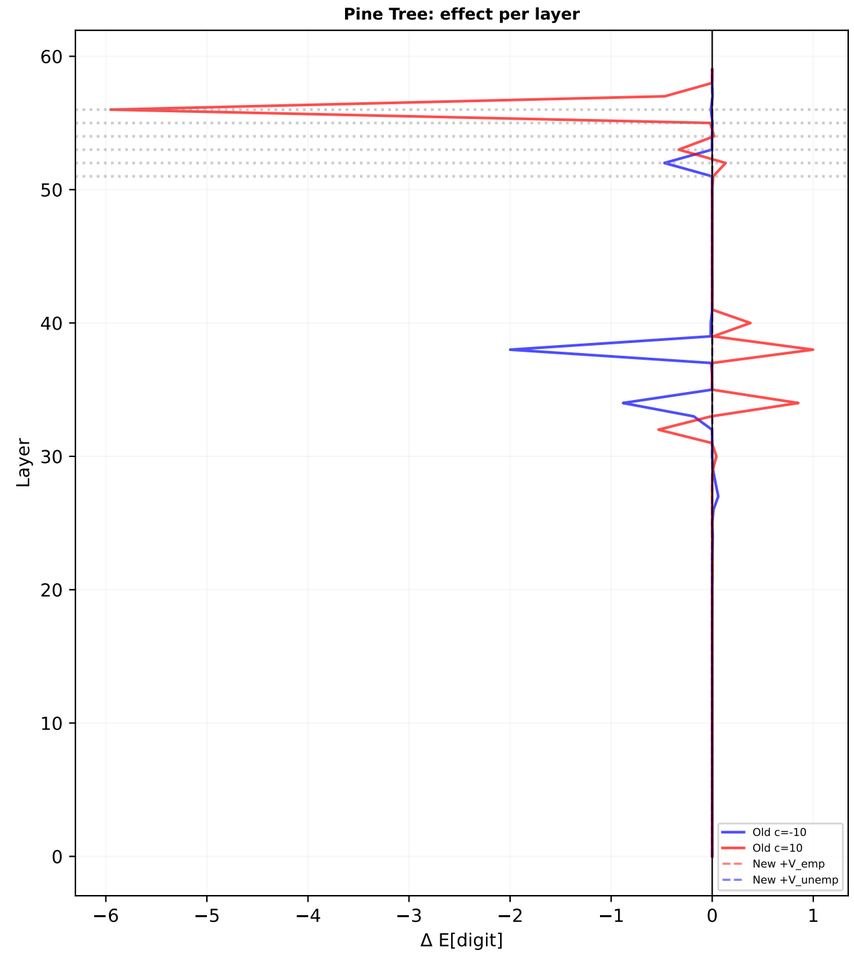


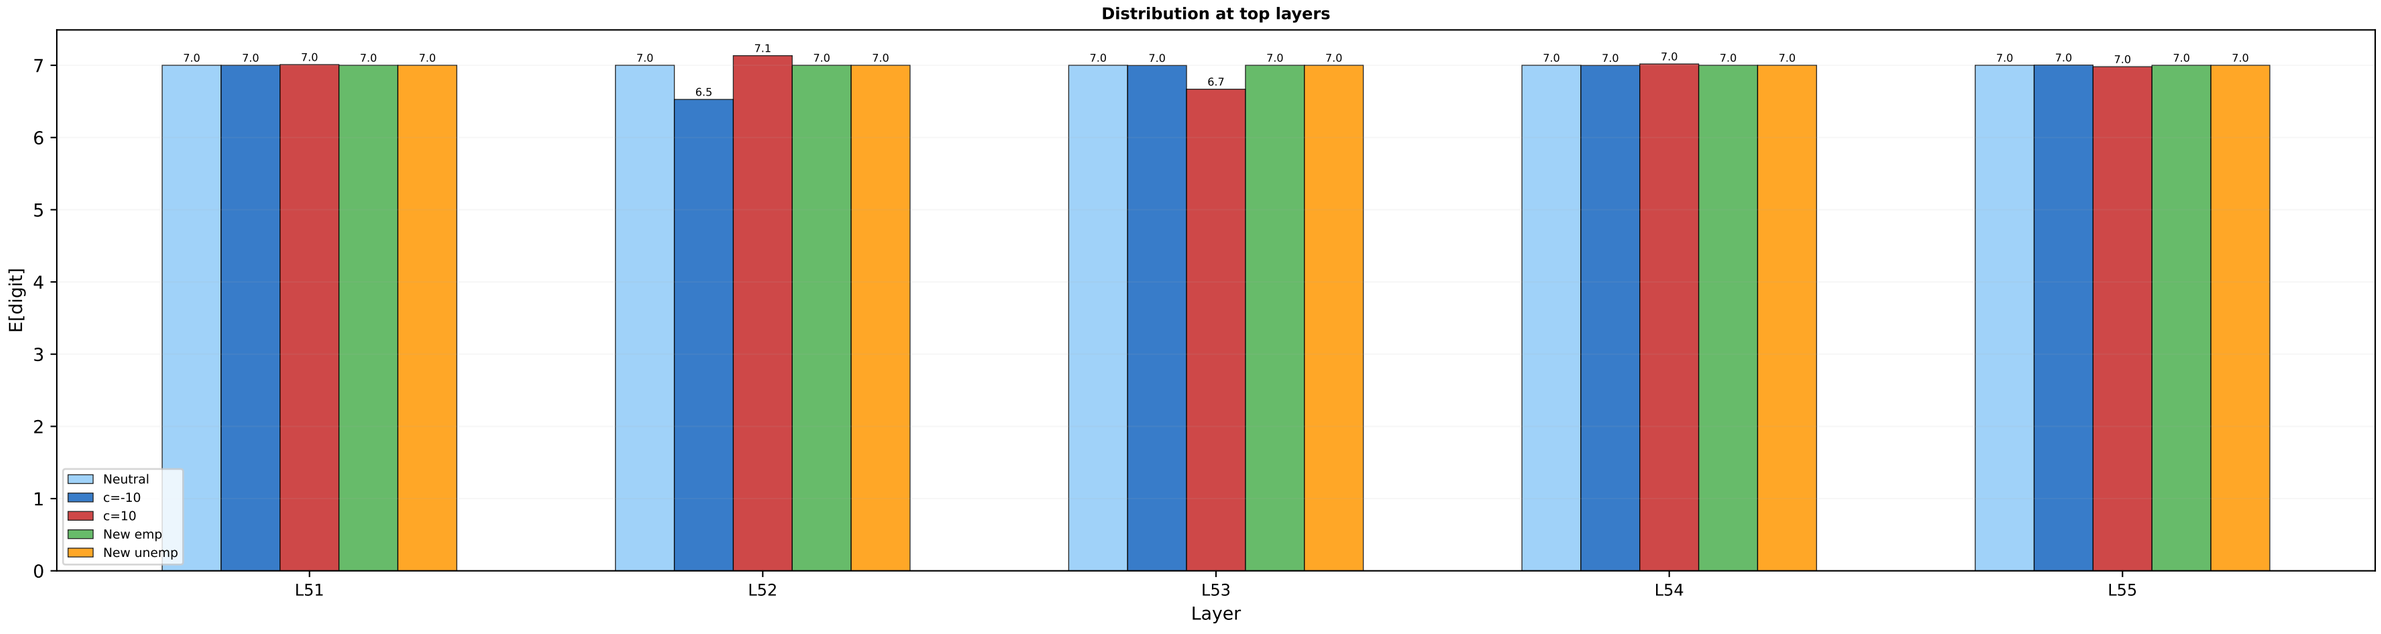


E10: Week-to-week consistency (Tue) | V8/cfg4

Answer with a single digit from 0 to 9. | On a scale of 0 to 9, how consistent is a typical adult's Tuesday schedule from week to week? (0 = completely different, 9 = identical every week) ___ |

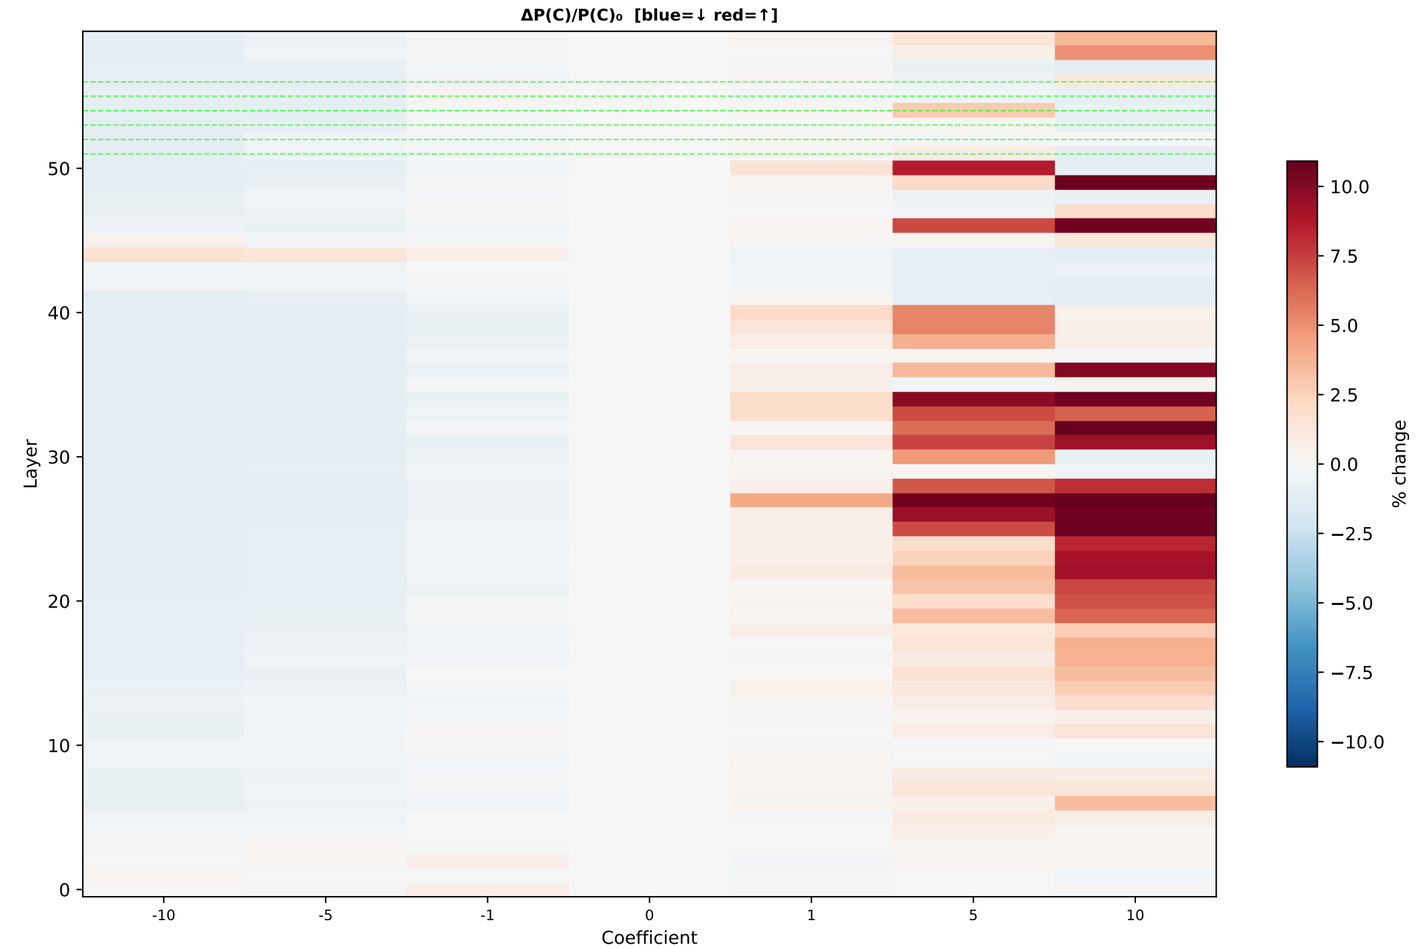


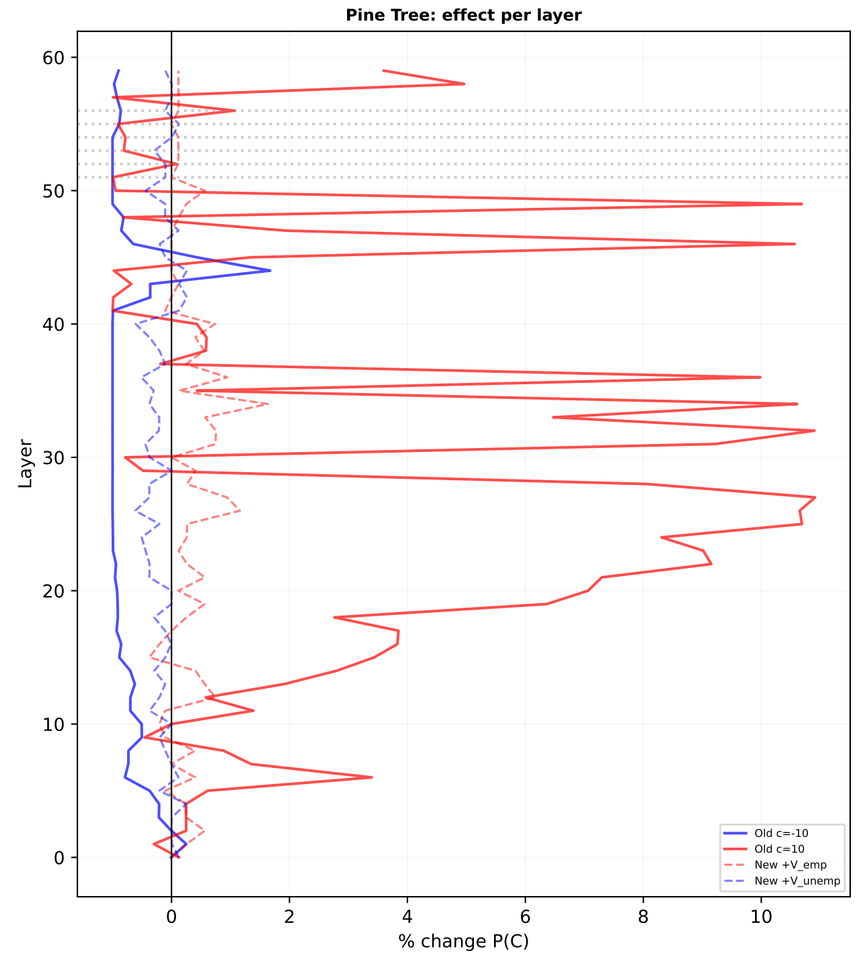


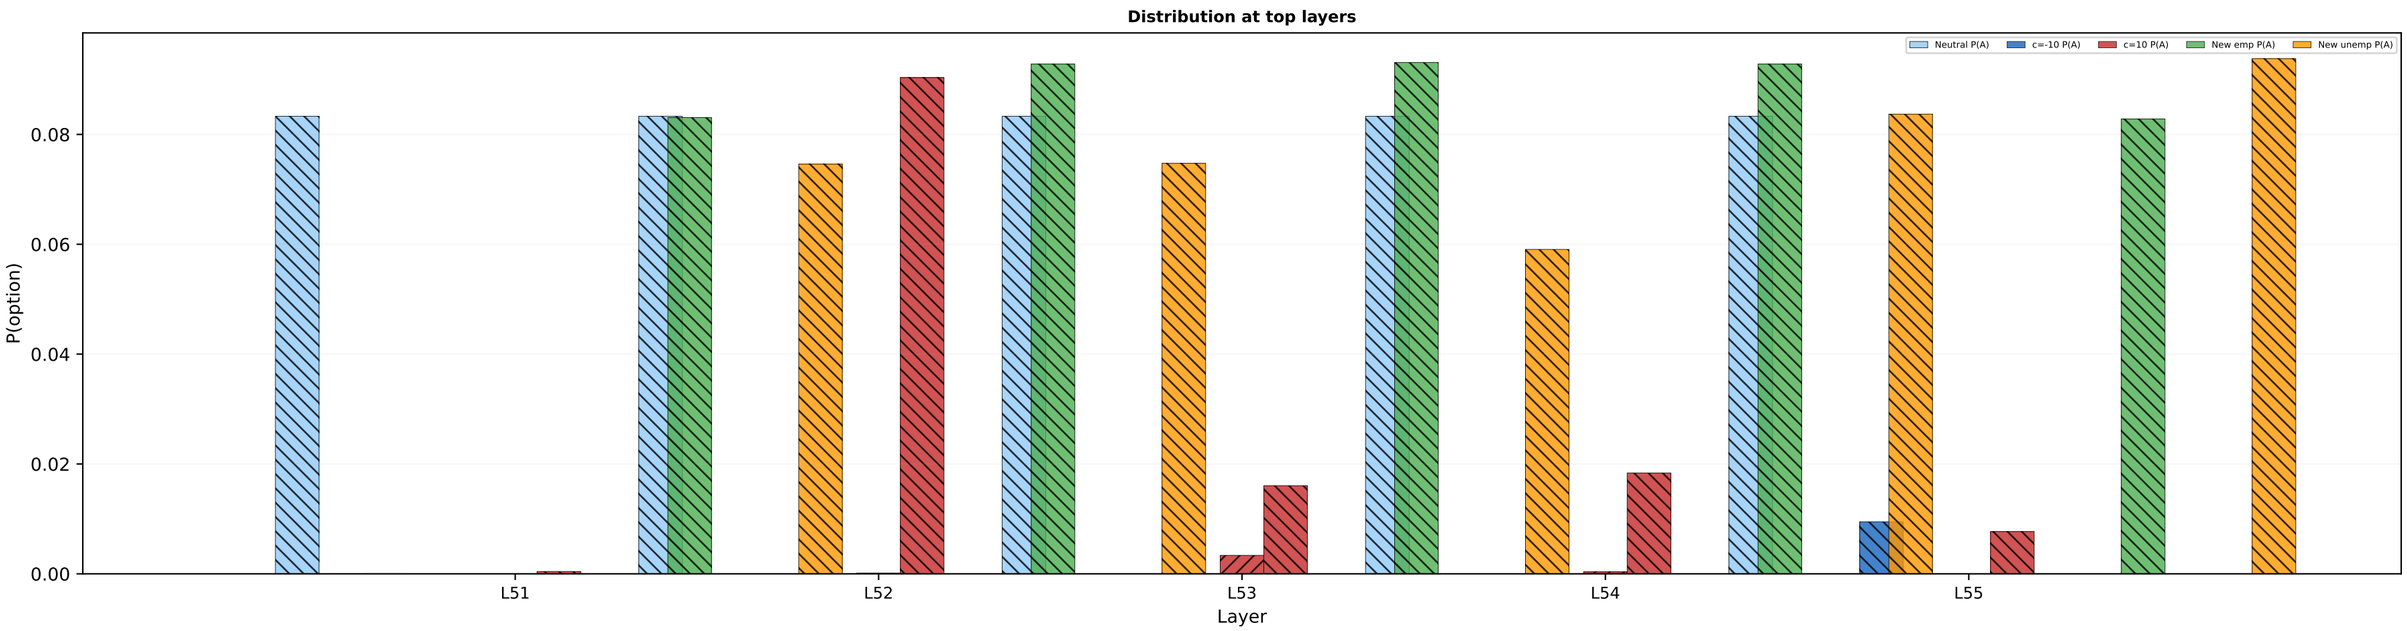


E11: 8 AM Tuesday status | V8/cfg4

At 8:00 AM on a Tuesday, a typical adult is most likely: | (A) Still sleeping or just waking up | (B) Awake at home, starting the day slowly | (C) Already out of the house or about to leave | Answer: (

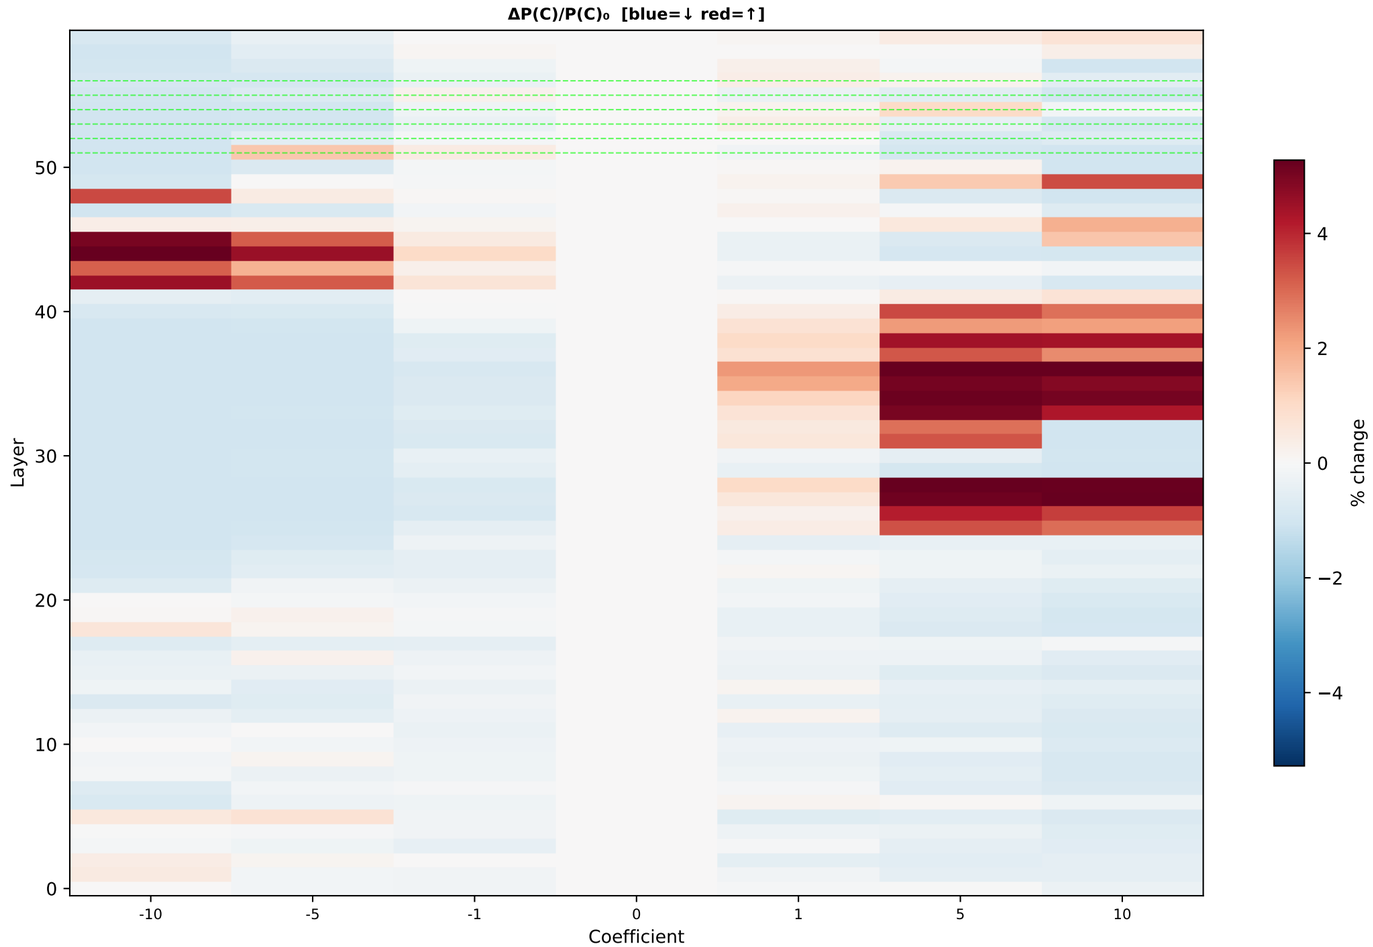


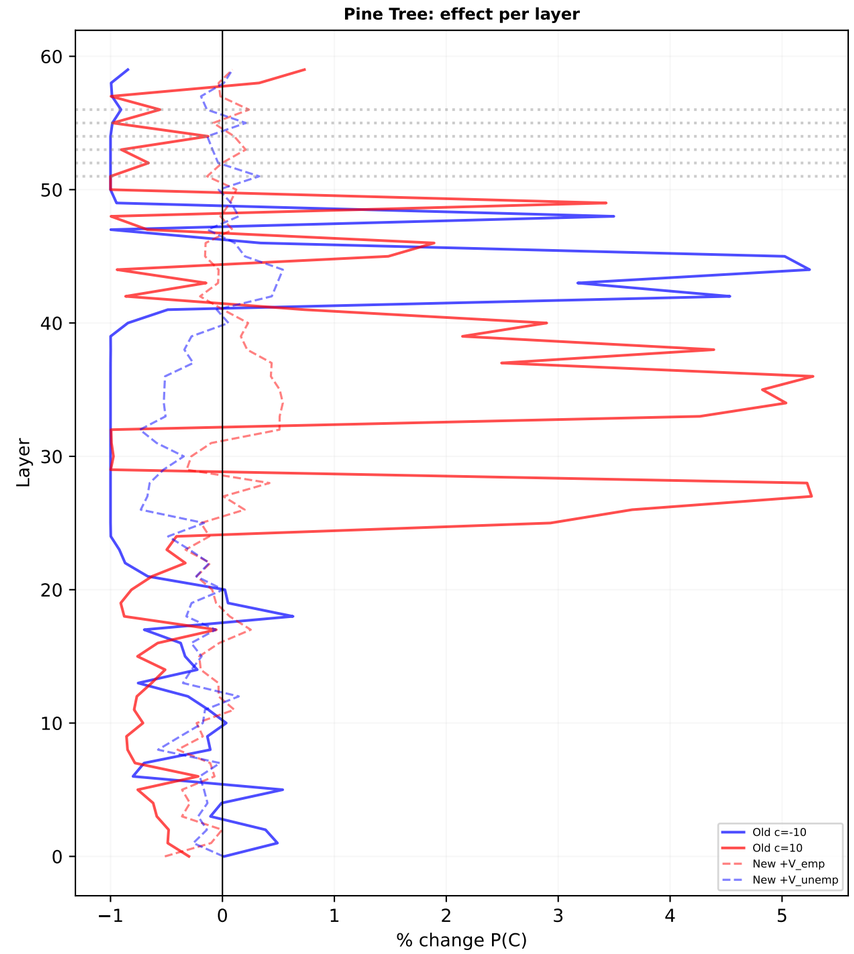


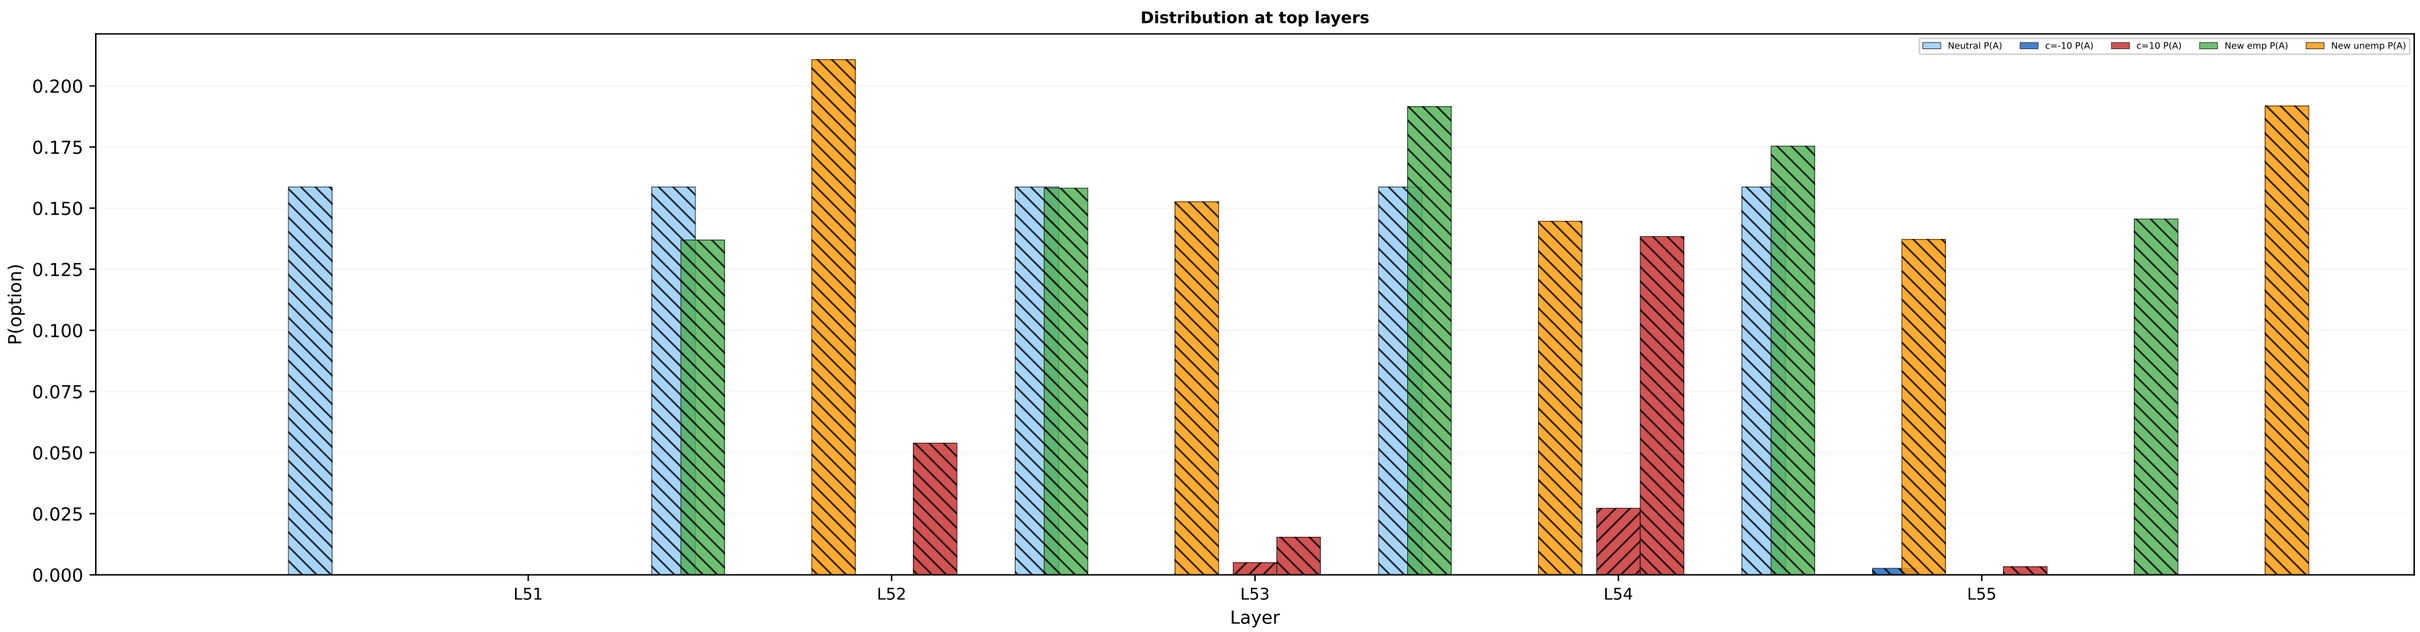


E12: 10:30 AM coffee availability | V8/cfg4

A typical adult is asked: "Are you usually free to meet for coffee at 10:30 AM on a Tuesday?" | The most likely reply is: | (A) "Yes, I am usually available around that time." | (B) "It depends on the week; sometimes I can, sometimes not." | (C) "No, I am almost always occupied at that hour." | Answer: (

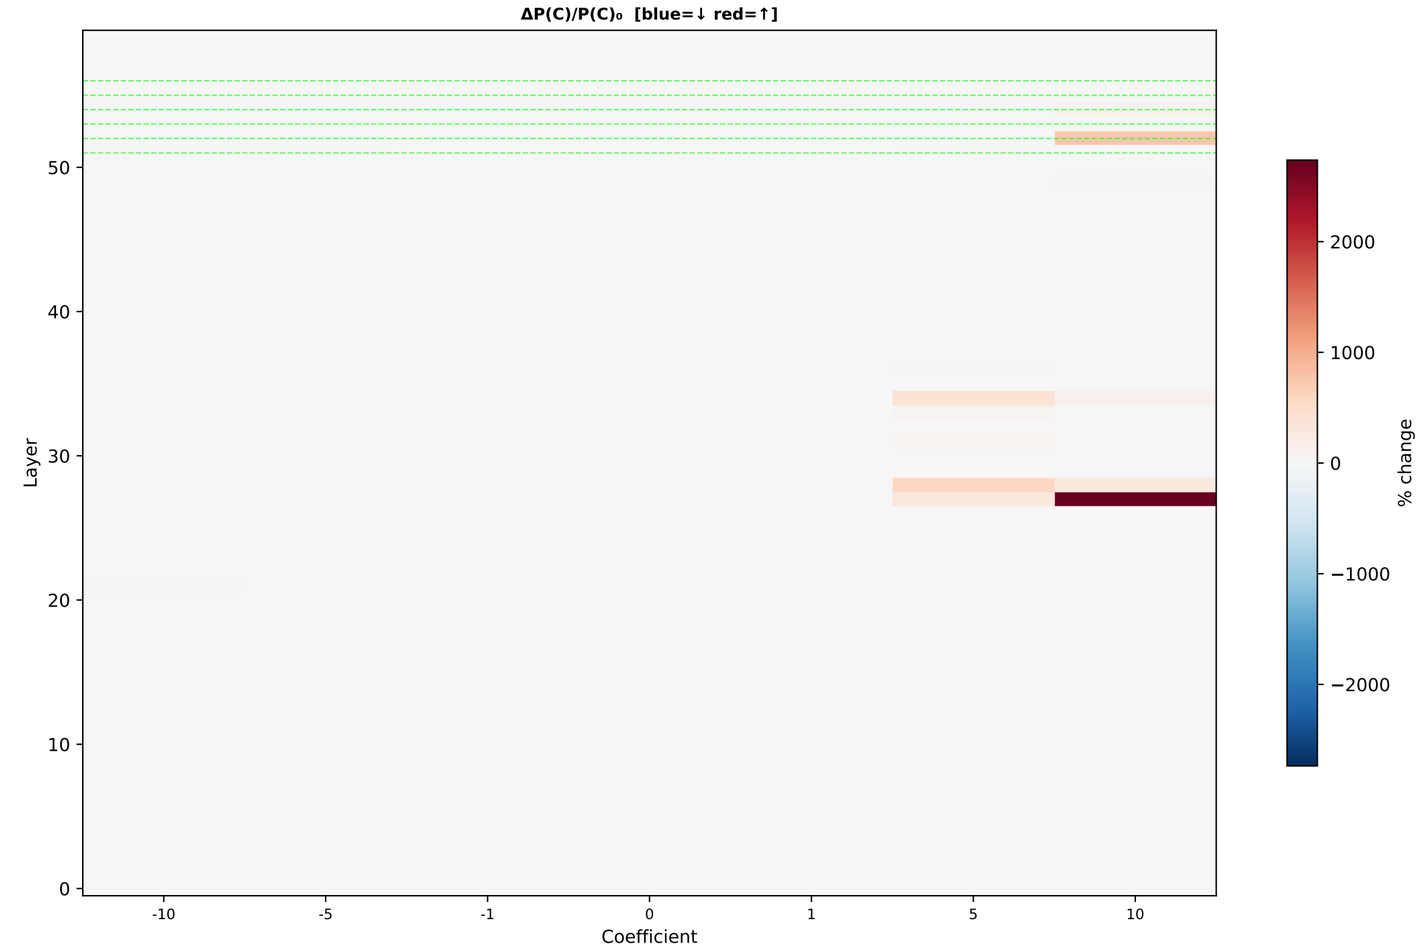


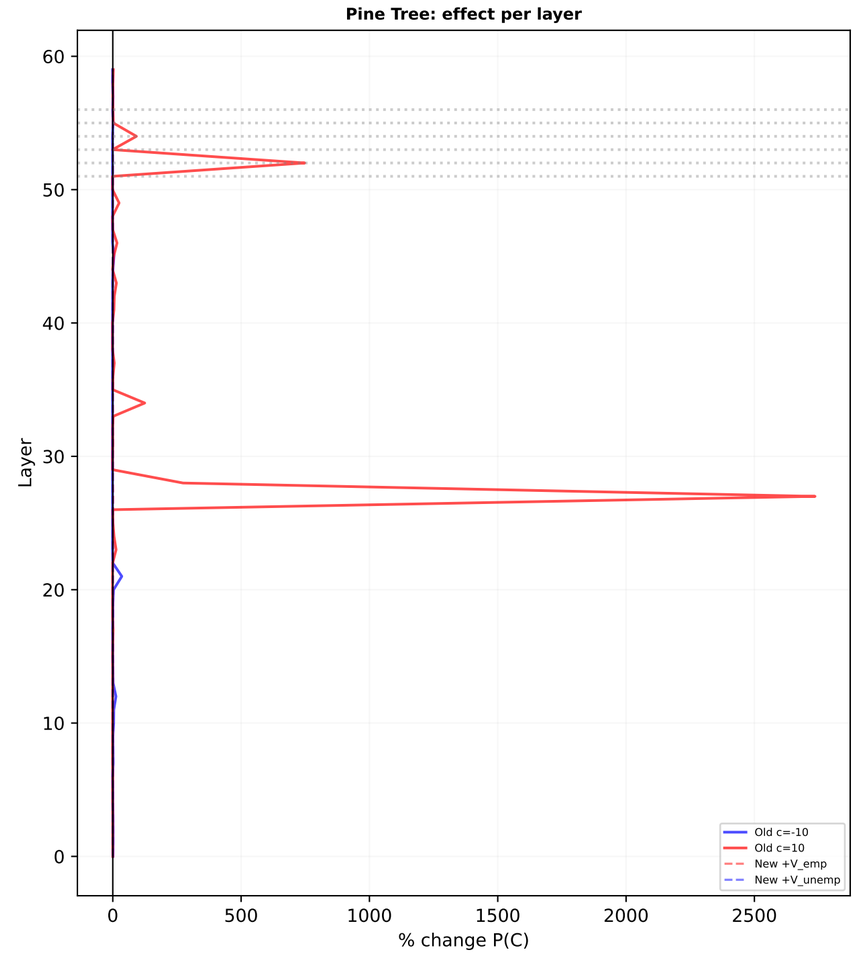


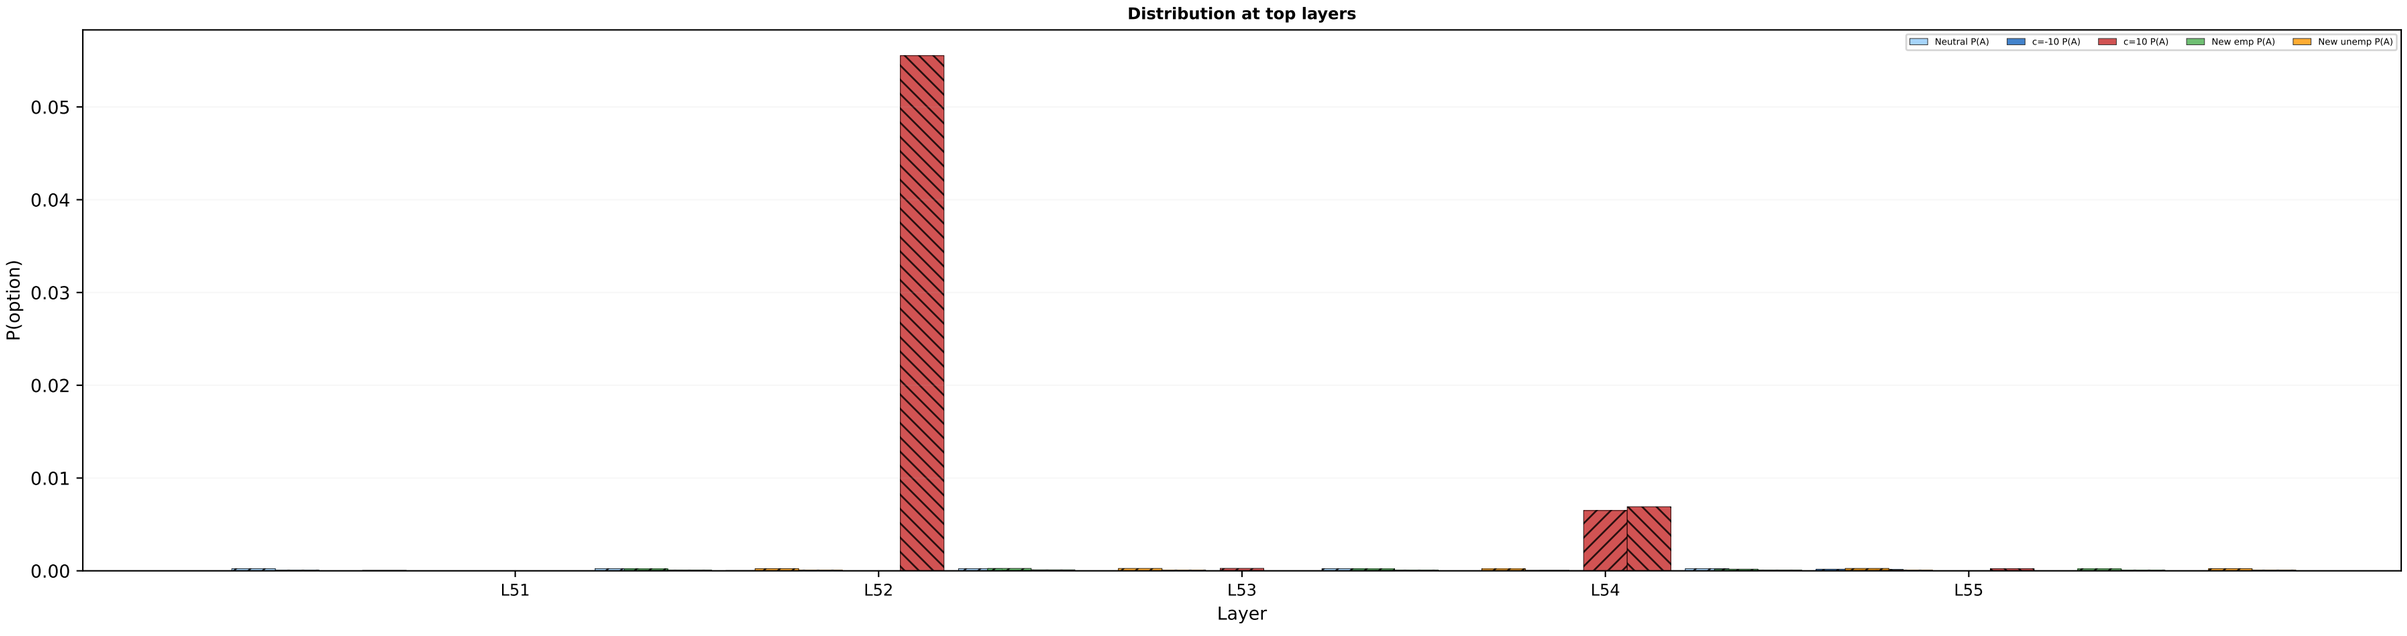


E13: Noon Tuesday availability | V8/cfg4

A typical adult is asked: "Can you meet me for lunch at noon on a Tuesday?" | The most likely reply is: | (A) "Sure, I have no fixed plans around that time." | (B) "I can, but I only have about 30 minutes." | (C) "Sorry, I cannot leave where I am at noon." | Answer: (

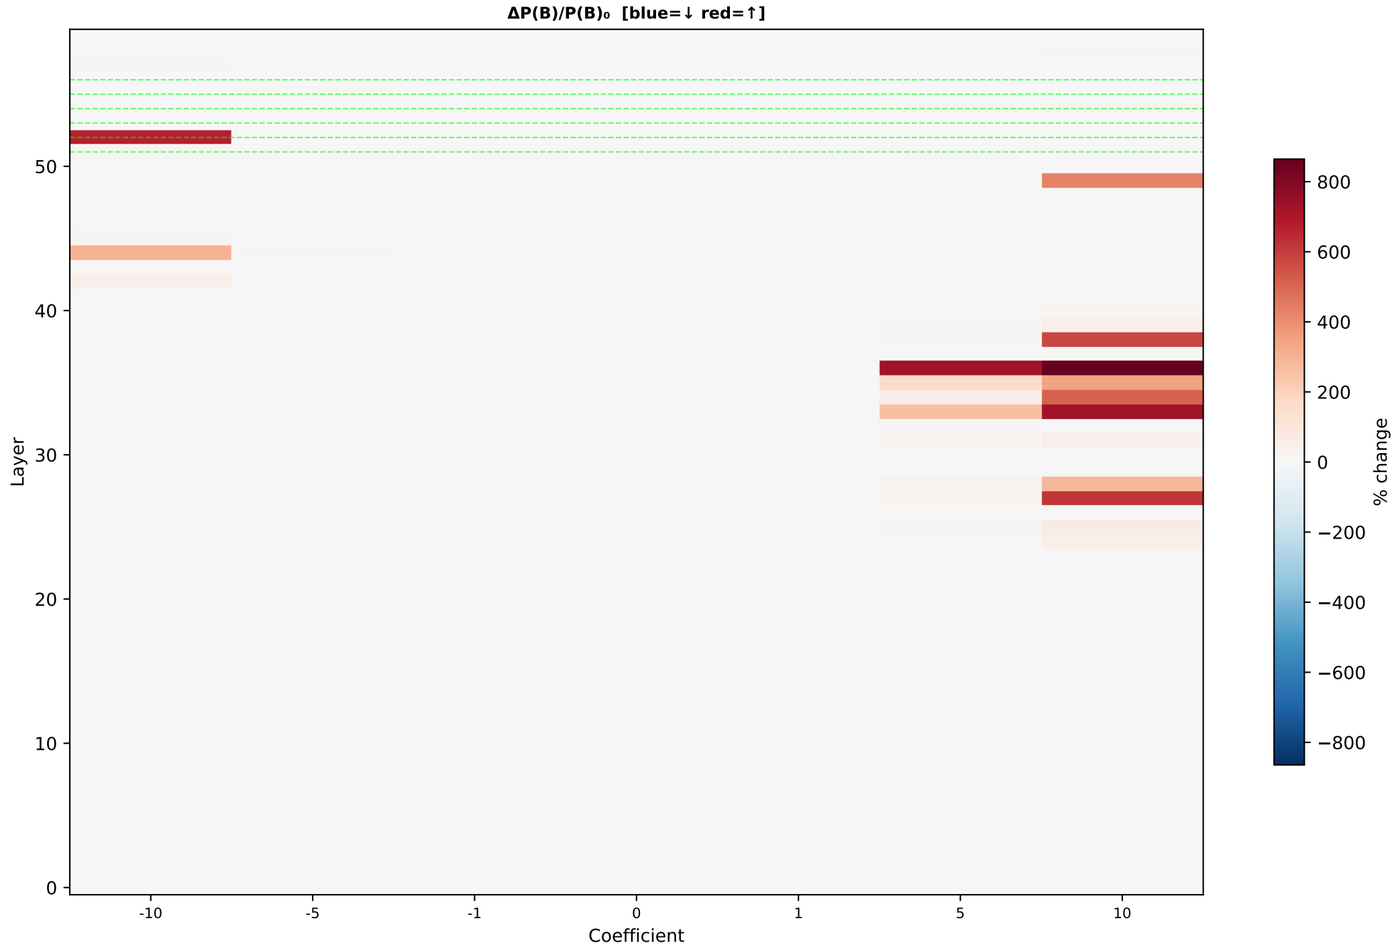


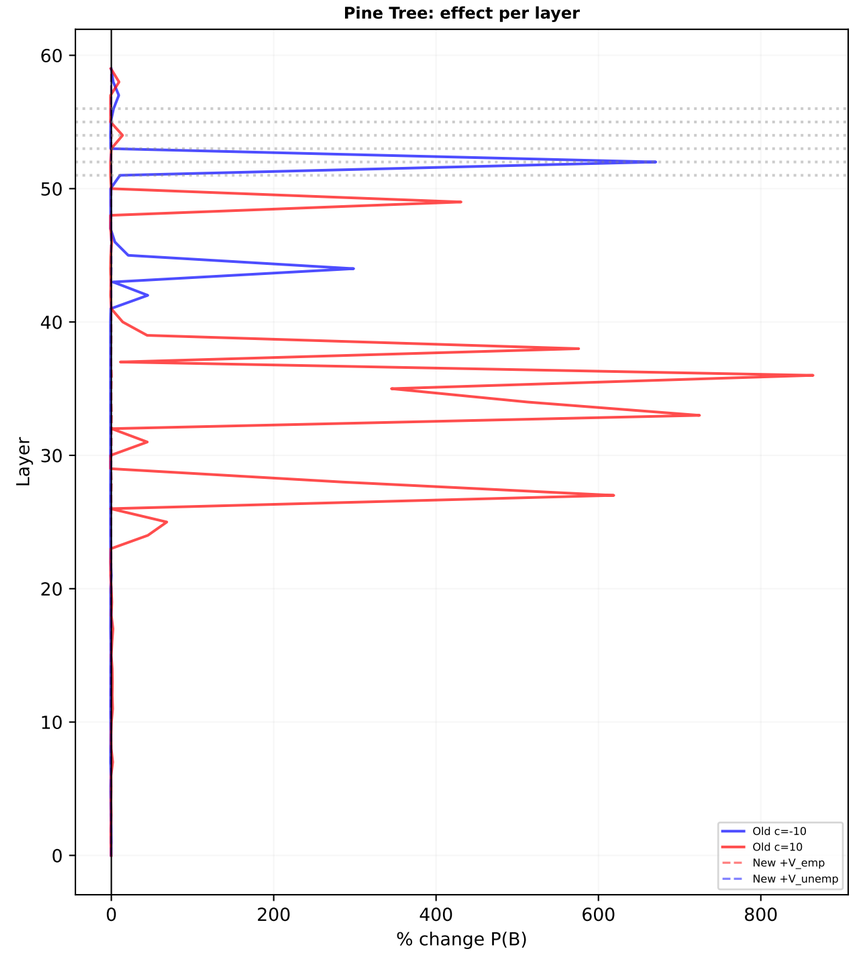


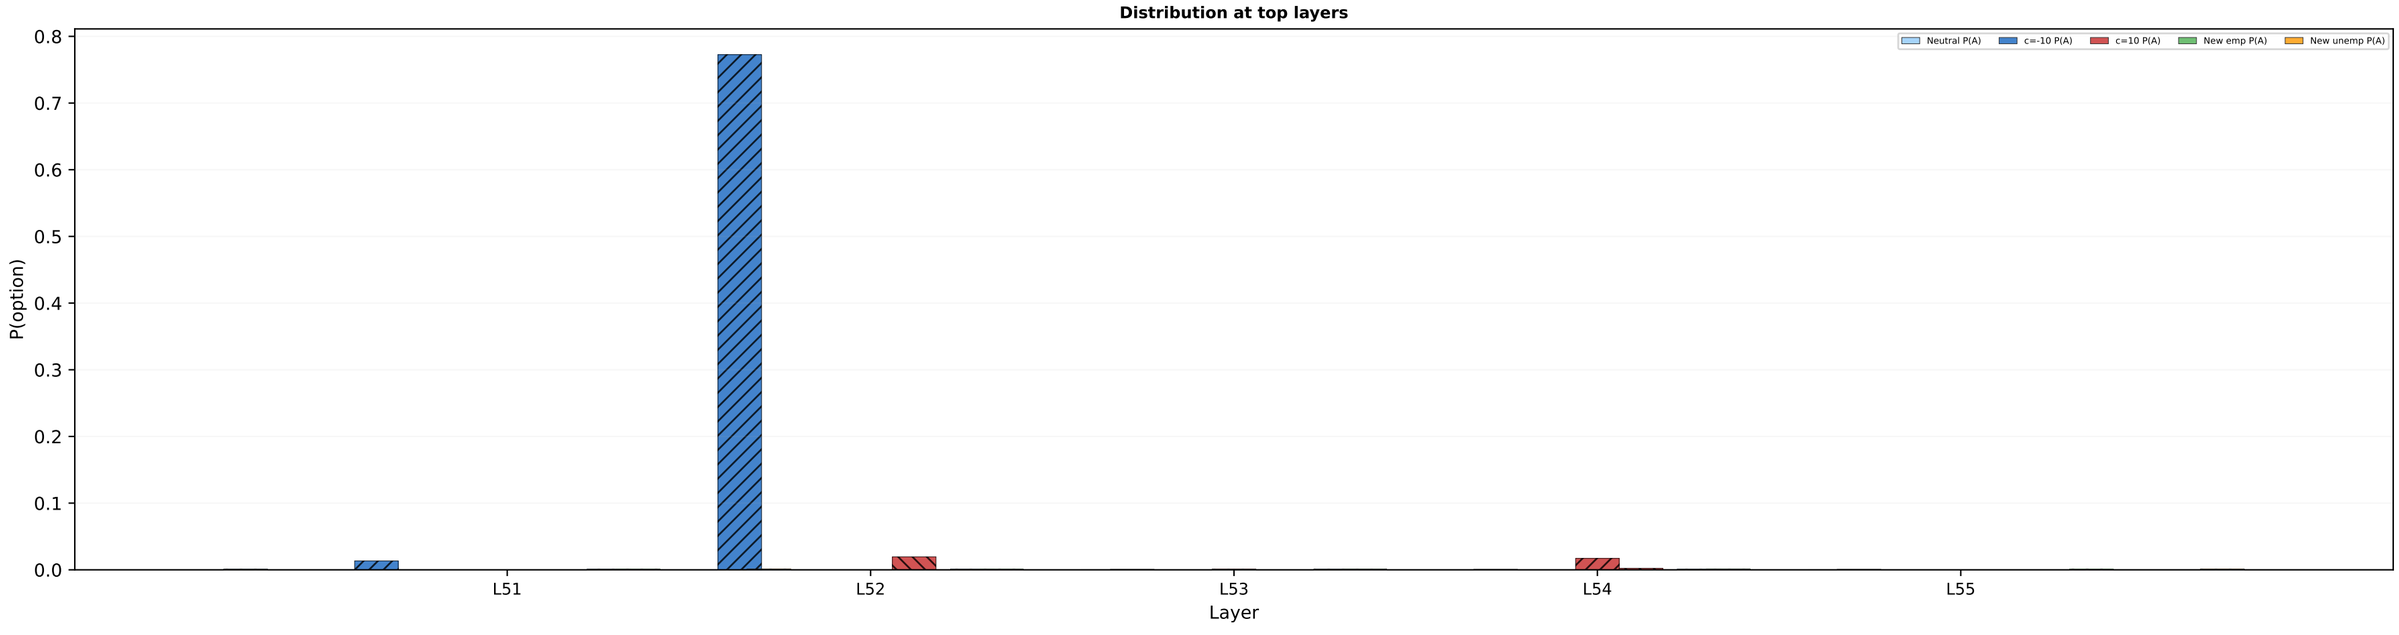


E14: 1 PM Tuesday availability | V8/cfg4

If you wanted to visit a typical adult at 1 PM on a Tuesday, which reply would be most likely? | (A) "I am usually at home around then." | (B) "I am usually at a regular daytime commitment then." | (C) "It varies; I might be in different places." | Answer: (

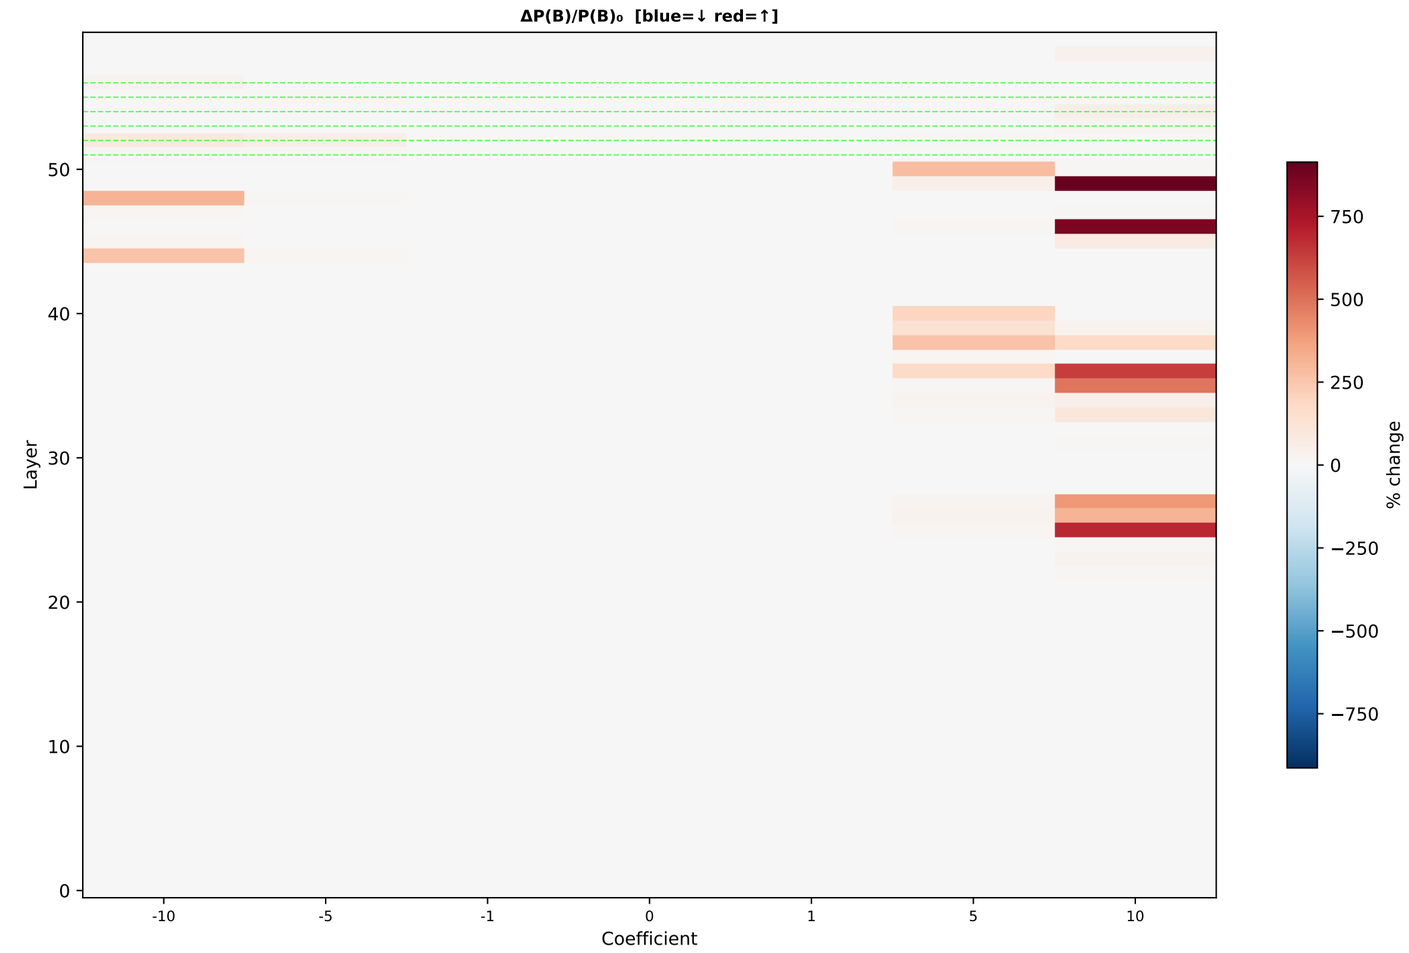


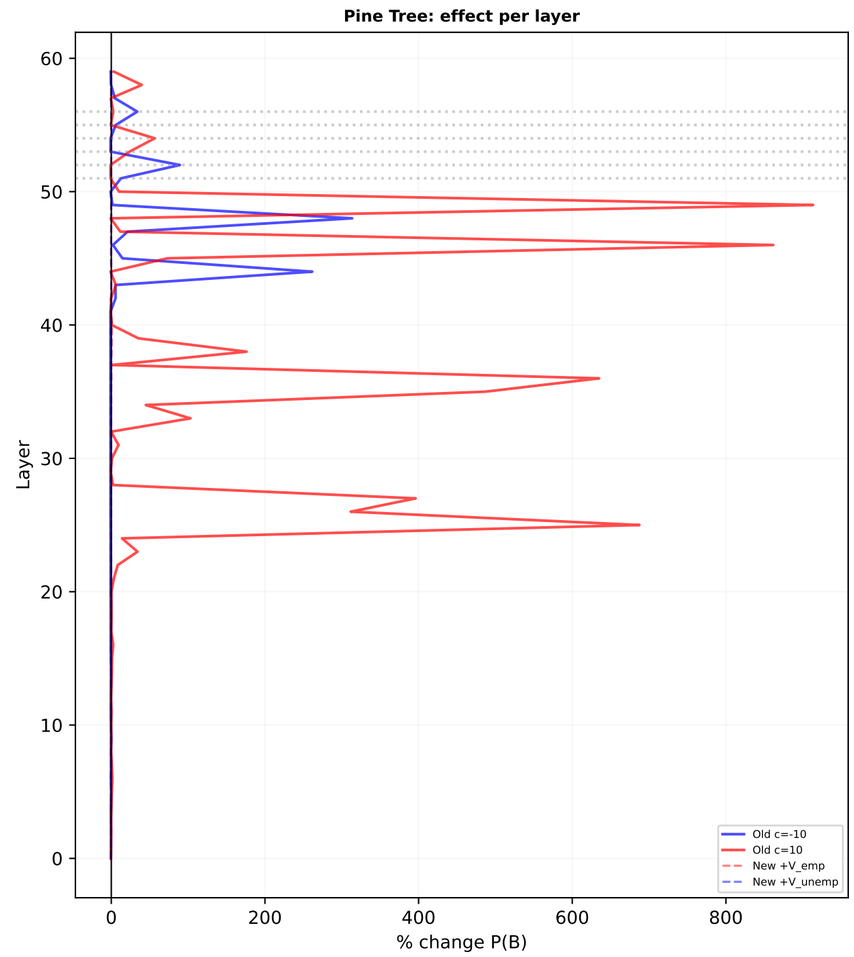


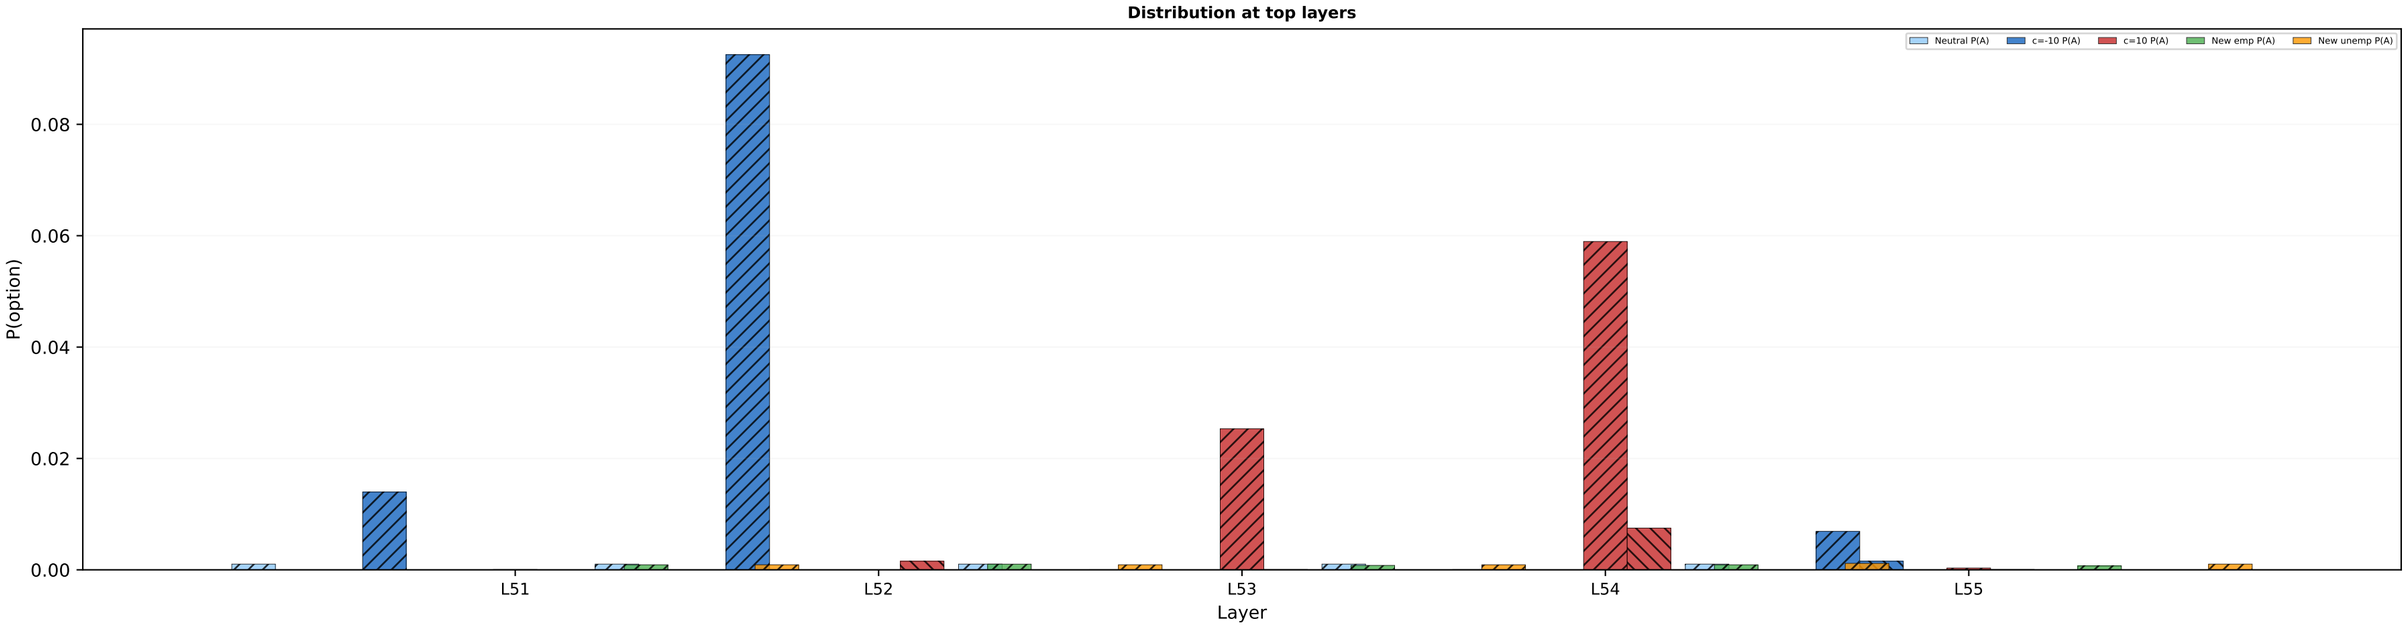


At 3:00 PM on a Tuesday, a typical adult is most likely: | (A) At home | (B) At the same non-home location they have been all day | (C) Moving between different locations | Answer: (

E15: 3 PM Tuesday location | V8/cfg4

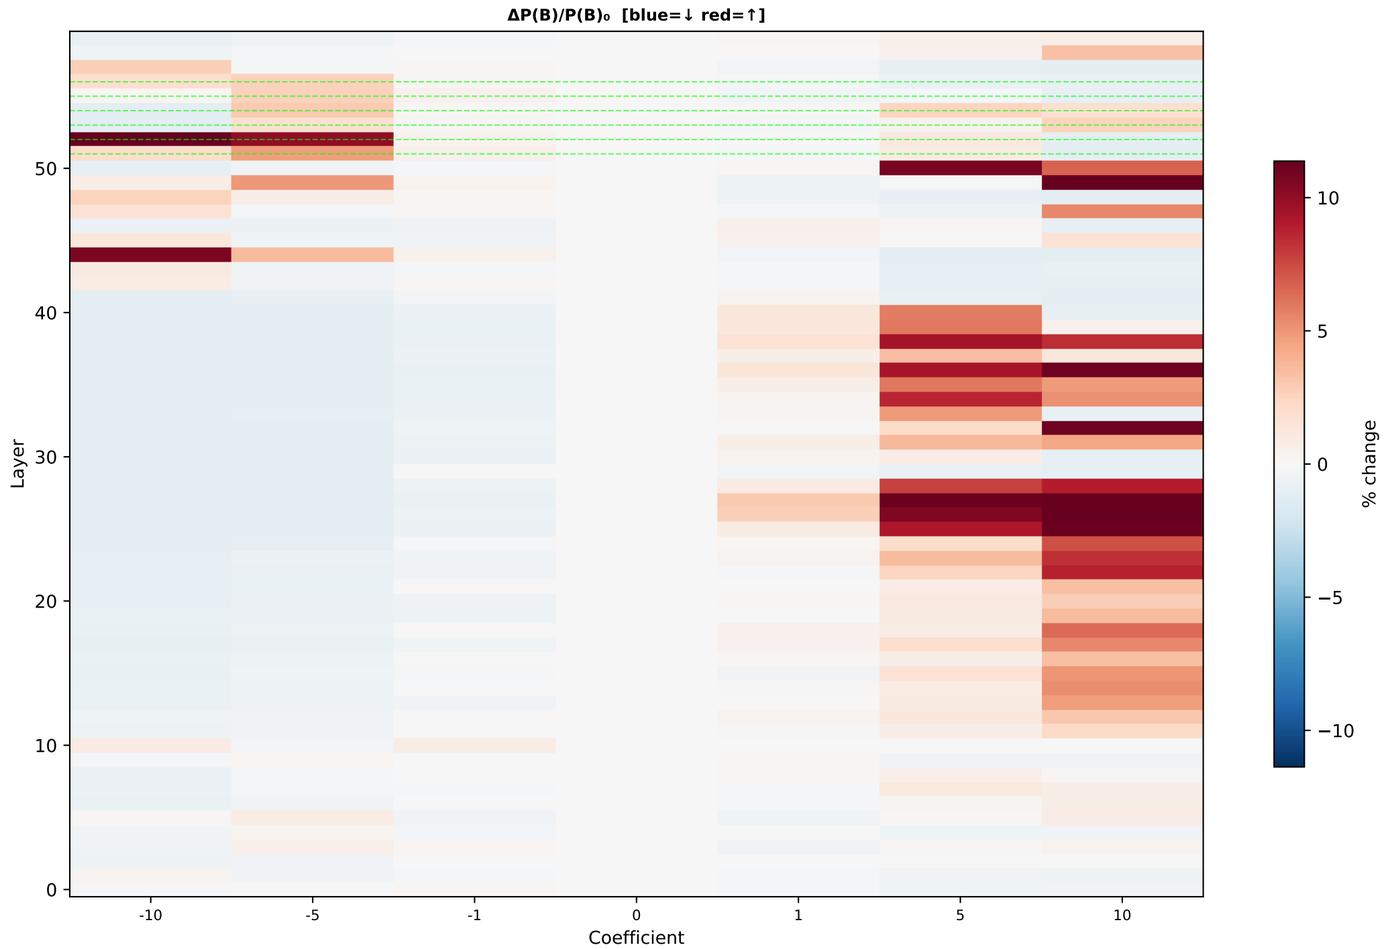


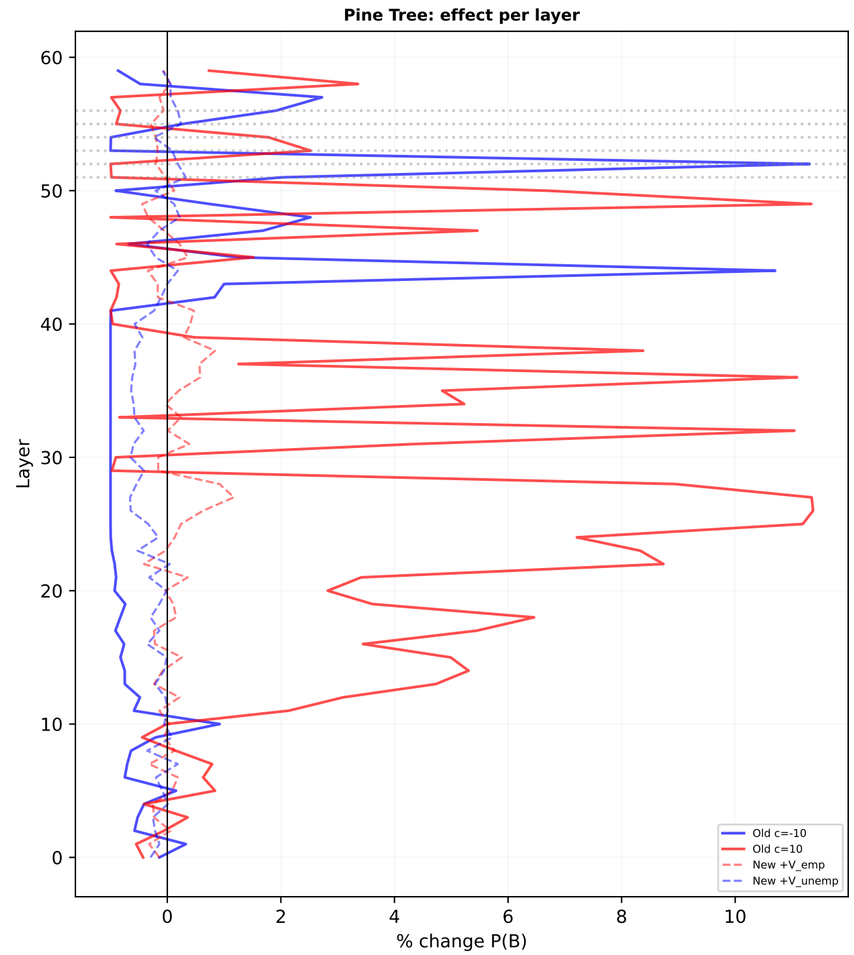


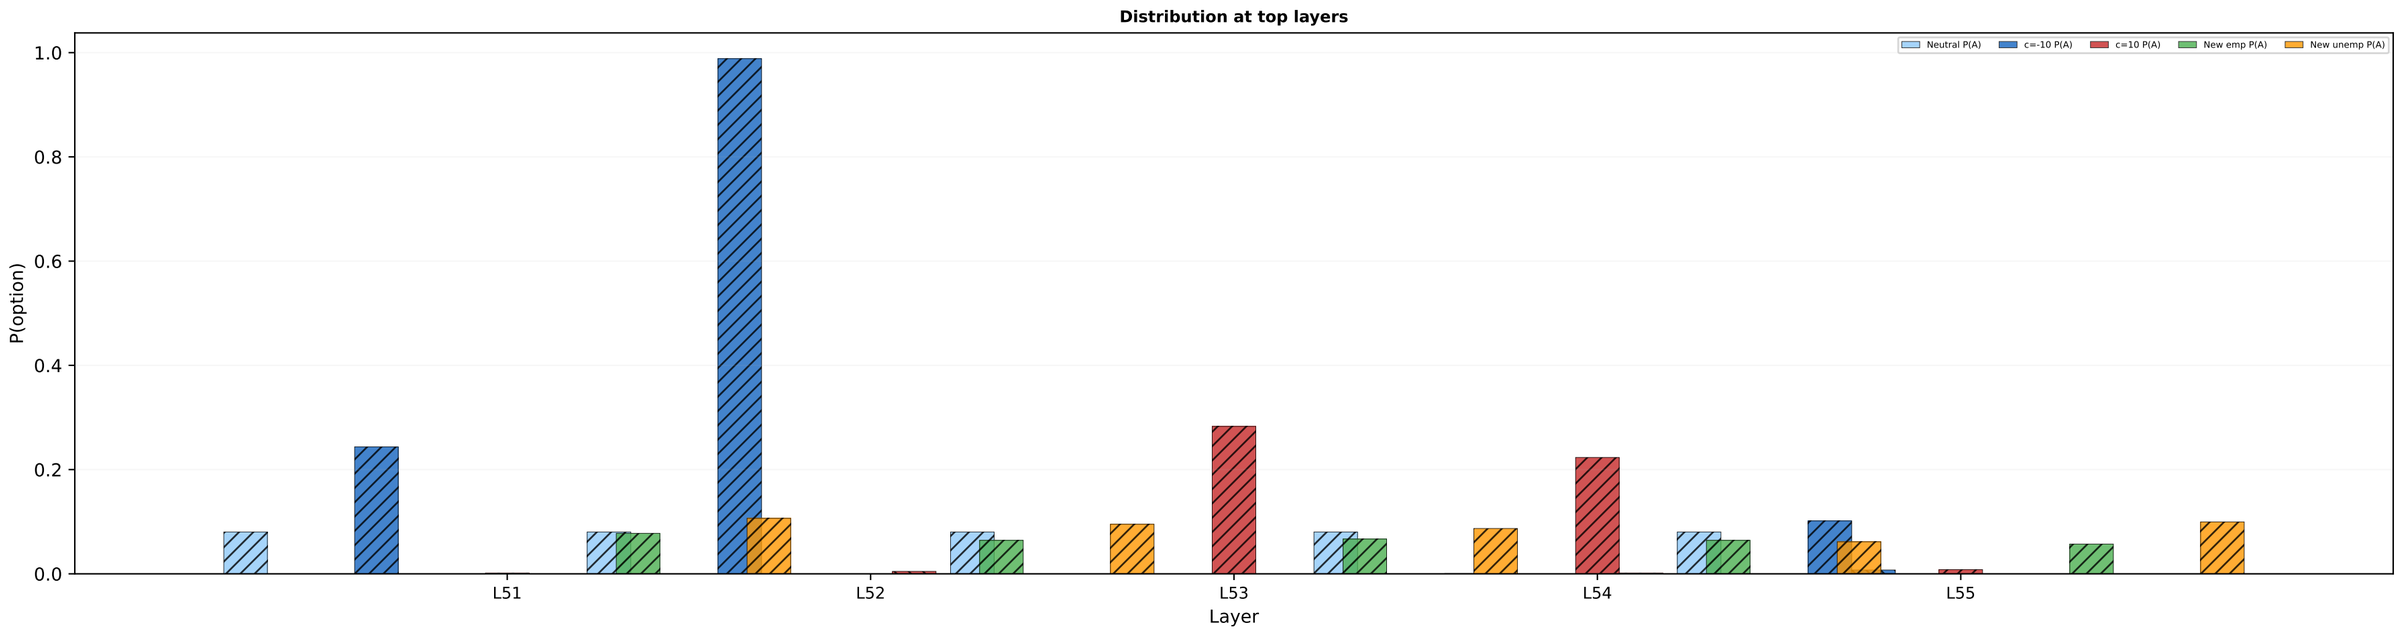


E16: 5 PM Tuesday status | V8/cfg4

At 5:00 PM on a Tuesday, a typical adult is most likely: | (A) At home, where they have been most of the day | (B) Heading home from a regular daytime location | (C) Still at a non-home location with no plans to leave yet | Answer: (

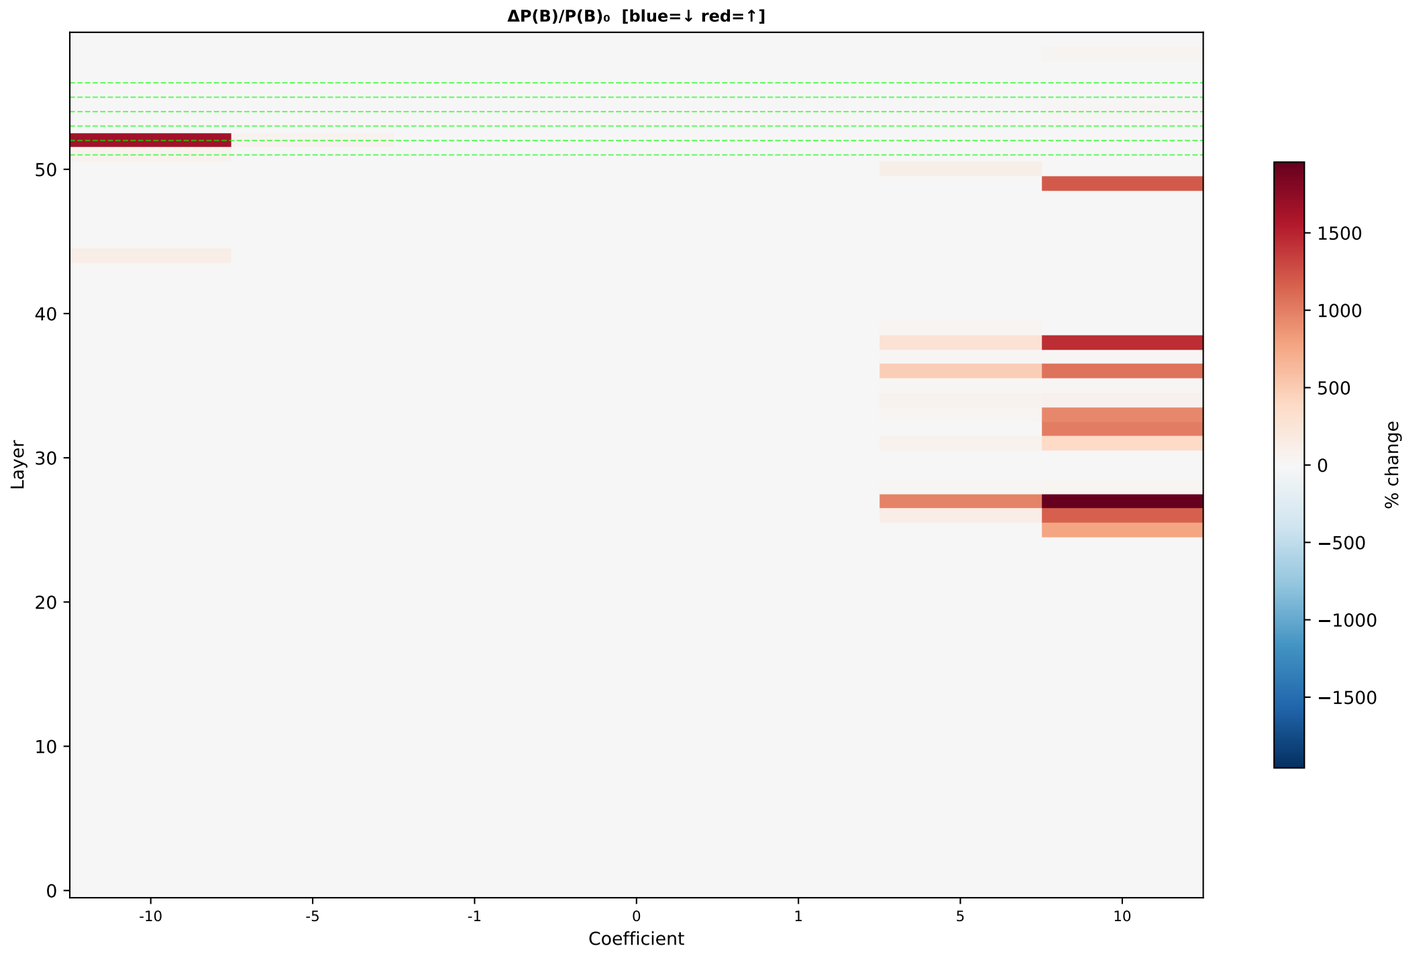


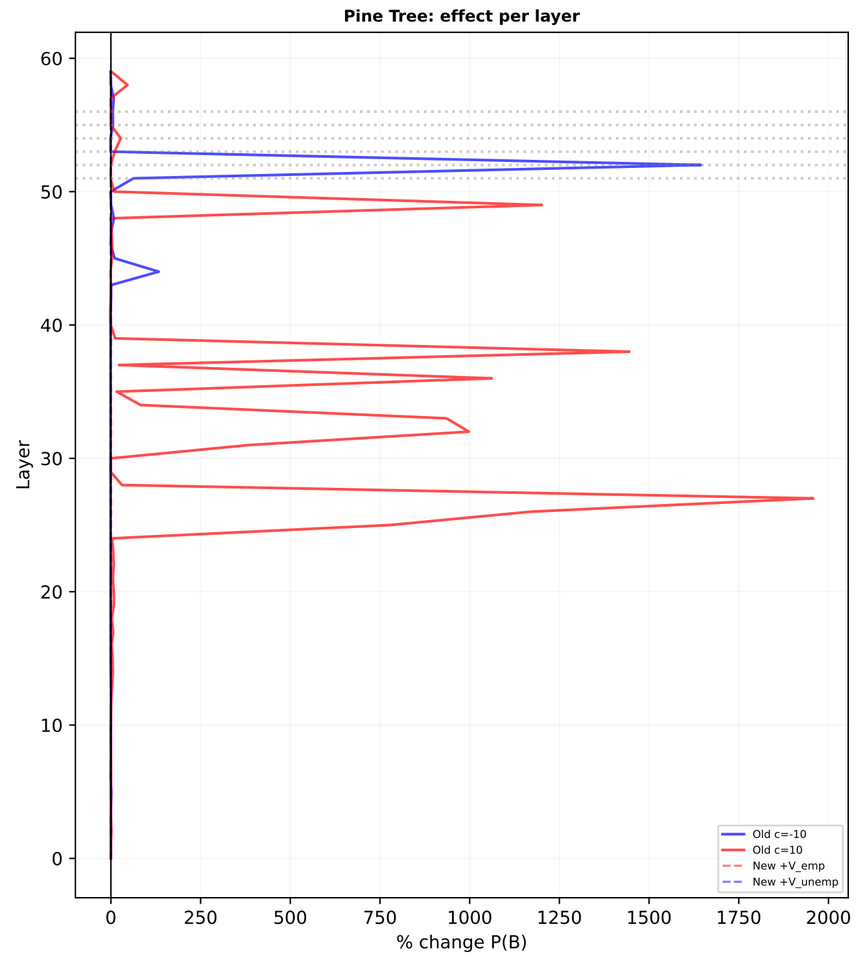


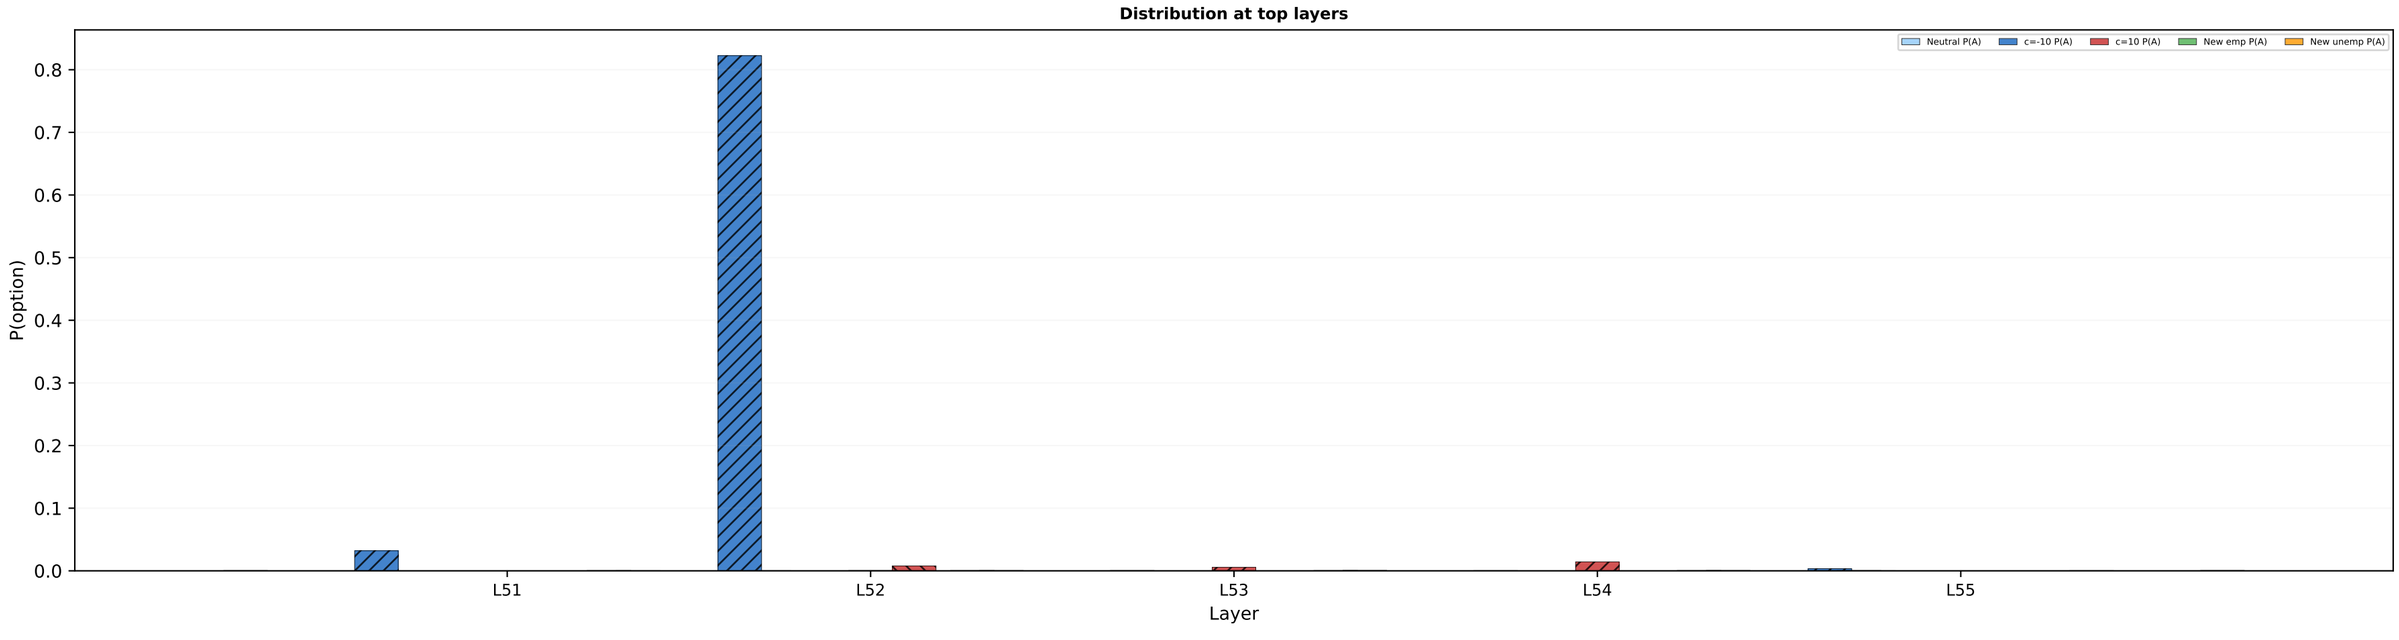


E17: 7 PM Tuesday status | V8/cfg4

At 7:00 PM on a Tuesday, a typical adult is most likely: | (A) Has been home most of the day | (B) Recently arrived home after being out all day | (C) Still out, not yet headed home | Answer: (

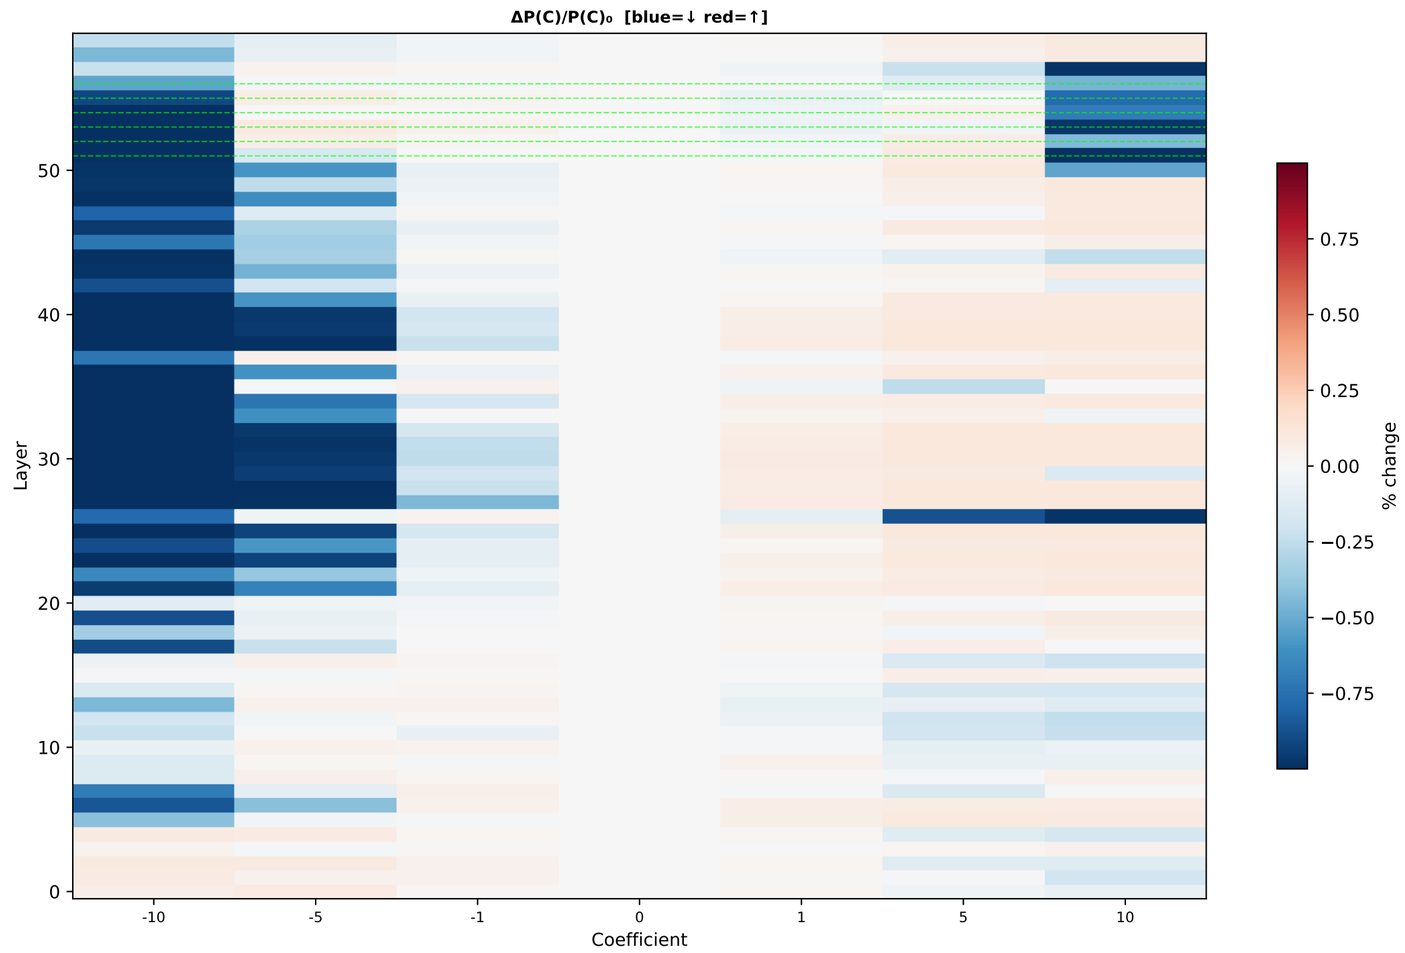


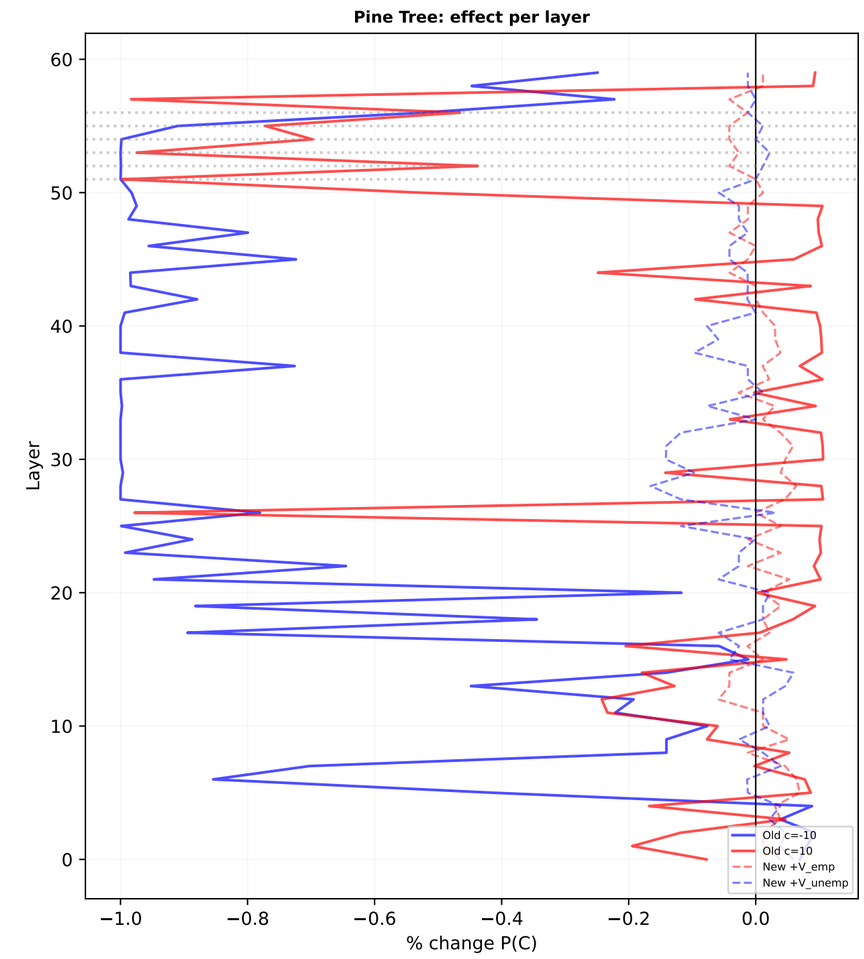


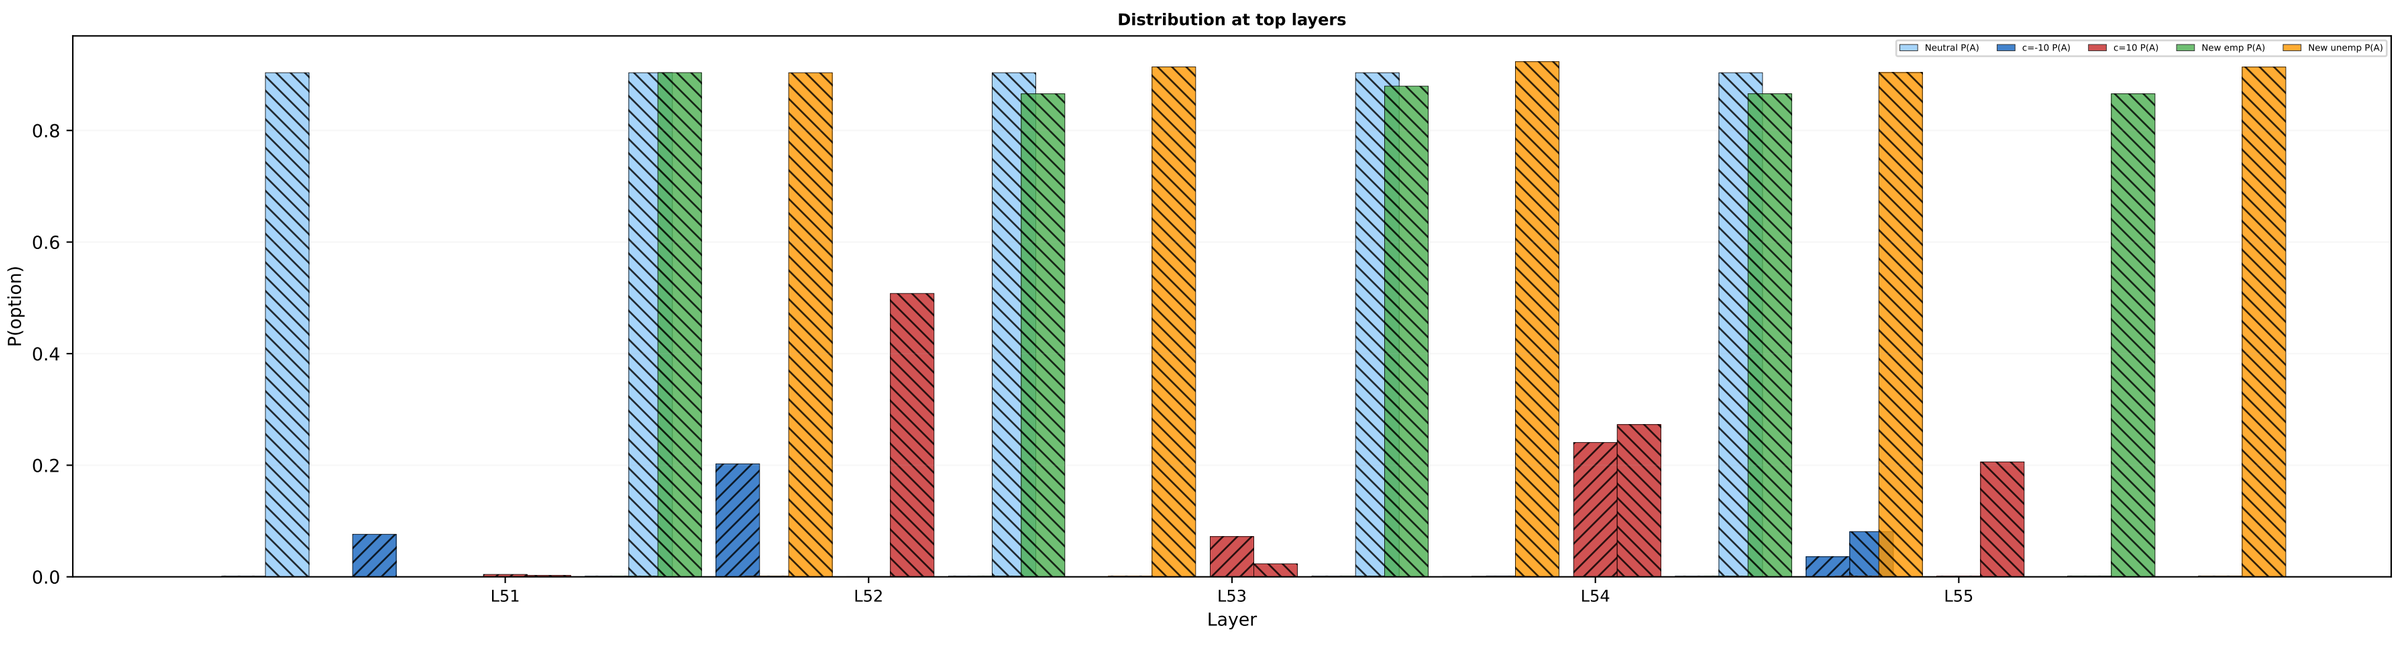


E18: Alarm clock habit (Tue) | V8/cfg4

Does a typical adult use an alarm clock on Tuesday mornings? | (A) No, they wake up naturally whenever they feel like it | (B) Sometimes, depending on whether they have plans | (C) Yes, they set an alarm at the same time every Tuesday | Answer: (







E19: Departure time consistency (Tue) | V8/cfg4
